College of Nursing

General Information

The College of Nursing offers academic nursing programs at the undergraduate and graduate levels. Knowledge and skills needed to complete the professional licensure examination to become a registered nurse are available through the traditional baccalaureate option. An accelerated option for students with degrees in other fields is available. Nurses who have obtained their basic nursing education through an associate degree or a diploma nursing program may fulfill the requirements for the BSN completion option without repetition of previous nursing education classes through the RN to BSN option. The Doctor of Philosophy in Nursing (Ph.D.) program prepares nurse scientists. Admission to the Ph.D. program is available at the post BSN and MSN levels. The Doctor of Nursing Practice (DNP) program prepares students for the highest level of advanced clinical nursing practice. Admission to the DNP program is available at the post BSN and MSN levels. Nurses who already have a graduate degree in nursing are eligible to take coursework to achieve a Post-Graduate Certificate (PGC) in an area of Advanced Nursing Practice. BSN prepared nurses are eligible to take coursework to achieve a Nurse Educator Certificate.

*Completion of the BSN nursing program does not guarantee eligibility to take the licensure examination, per section 335.066 RSMo of the Missouri Nursing Practice Act.

Accreditation

The UMSL College of Nursing is proud to be fully accredited/approved by the following bodies:

- The Bachelor of Science in Nursing (BSN), Doctor of Nursing Practice (DNP), and Post-Graduate APRN Certificate Programs at the University of Missouri-St. Louis are accredited by the Commission on Collegiate Nursing Education (CCNE), 665 K Street NW, SUITE 750, Washington, DC 20001, (202) 887-679.
- The pre-licensure program is fully approved by the Missouri State Board of Nursing (MOSBON) which ensures that graduates of the pre-licensure track of the BSN program are eligible to apply to take the registered nurse licensure examination (NCLEX-RN). Completion of the BSN nursing program does not guarantee eligibility to take the licensure examination, per section 335.066 RSMo of the Missouri Nursing Practice Act.
- The Doctor of Philosophy in Nursing (Ph.D.) at UMSL follows the national standards of the American Association of the Colleges of Nursing for Ph.D. programs.
- The University of Missouri- St. Louis is accredited by the Higher Learning Commission, an accreditation agency recognized by the U.S. Department of Education.

International Students

Students with international status are required to take the English for Academic Purposes (EAP) assessment at the University. Based upon the assessment, students may be required to complete recommended EAP courses prior to enrolling in nursing courses.

All students with international coursework (whether they are classified as an international student or as a citizen or permanent resident of the United States) must submit official transcripts from the international school(s), as

well as official course descriptions (in English) for every course taken at a foreign institution.

Professional Organizations

Sigma Theta Tau International Honor Society for Nursing

The Nu Chi Chapter of Sigma Theta Tau was officially established in April 1984. Membership is offered by invitation to those students graduating in the upper third of their class and to those recognized as outstanding community nursing leaders. Professional presentations are held twice each year and feature leaders in the nursing profession.

Student Nurses' Association

The College of Nursing is a constituent of the National Student Nurses' Association (SNA). The purpose of this organization is to provide nursing students in the basic baccalaureate program the opportunity to connect with the nursing profession prior to licensure. SNA provides students with volunteer, donation, and networking opportunities to increase their involvement in the nursing community. The organization is open to all nursing majors.

Minority Student Nurses' Association

The Minority Student Nurses' Association (MSNA) was developed to function as an academic support and networking group. The focus of MSNA is to provide service, knowledge, and sense of awareness through community and university service, and to create a bond between minority nursing students. MSNA is all about support, academics, and community outreach. Membership is open to all students from the CON regardless of race, culture, religion, or ethnic background.

Degrees

Bachelor of Science in Nursing (BSN)

- Traditional Curriculum
- Accelerated Curriculum
- RN to BSN Curriculum

Doctor of Nursing Practice (DNP)

- Acute Care Pediatric Nurse Practitioner Emphasis
- · Adult-Gerontology Nurse Practitioner Emphasis
- Dual Track Acute and Primary Care Nurse Practitioner Emphasis
- Family Nurse Practitioner Emphasis
- Primary Care Pediatric Nurse Practitioner Emphasis
- Psychiatric Mental Health Nurse Practitioner Emphasis
- · Women's Health Nurse Practitioner Emphasis
- MSN to DNP Curriculum

Doctor of Philosophy in Nursing

Curriculum

Certificates

Nurse Educator Certificate

Graduate Certificates

- Post-Graduate Acute Care Pediatric Nurse Practitioner
- Post-Graduate Adult-Gerontology Nurse Practitioner

- · Post-Graduate Family Nurse Practitioner
- Post-Graduate Primary Care Pediatric Nurse Practitioner
- · Post-Graduate Psychiatric-Mental Health Nurse Practitioner
- · Post-Graduate Women's Health Nurse Practitioner

Undergraduate Studies

The College of Nursing provides coursework leading to the Bachelor of Science in Nursing (BSN). The undergraduate program offers two means for achieving the bachelor's degree in nursing: studies that are preparatory for completion of the professional nurse licensure examination (pre-licensure program) and advanced placement for the professional registered nurse without repetition of fundamental nursing and clinical courses (RN to BSN program). An accelerated pre-licensure option is available for qualified individuals who hold earned bachelor's degrees or higher in non-nursing fields.

Students must meet University and College of Nursing requirements. Baccalaureate students meeting admission criteria may participate in the Pierre Laclede Honors College. Students who have been dismissed from another nursing program are not eligible for admission to the pre-licensure BSN program.

Faculty maintain the right to make appropriate curriculum changes to comply with standards for accreditation and approval as stipulated by the Commission on Collegiate Nursing Education and the Missouri State Board of Nursing's minimum standards. For that reason, students receive exceptional advising support from college advisors.

Degree Requirements for BSN

The Bachelor of Science in Nursing degree requires comprehensive course work in general education and nursing. Basic undergraduate nursing course work includes didactic, on-campus laboratory and clinical activities. Clinical experiences may require weekday, evening, and/or weekend commitments.

- Full-time study in the traditional BSN pre-licensure option can be completed in four academic years. Students admitted to the traditional BSN pre-licensure option in Fall 2025 will complete two years of general education coursework followed by two years of clinical nursing coursework. Students admitted to the traditional BSN pre-licensure option after Spring 2026 will complete one year of general education coursework follow by three years of clinical nursing coursework. This program is 95% in-person and 5% asynchronous online.
- Students admitted to the accelerated BSN pre-licensure option in Fall 2025 require full-time study and can be completed in 12 months (following the completion of general education courses). Students admitted to the accelerated BSN pre-licensure option in Summer 2026 require full-time study and can be completed in 15 months (following the completion of general education courses). This program is offered 70% in-person and 30% asynchronous online.
- The RN to BSN program is offered 100% asynchronous online.
 Clinical activities in the RN to BSN program are community-based and may be completed in the student's home community.

Courses that require clinical hours will require a student to pass a criminal background check and drug screening prior to entry into the program. Additional requirements and/or disclosures may become necessary throughout the courses of the program. Specific current immunizations, certifications, and examinations will also be required prior to the academic year. Students who fail to upload all health documents into an approved health compliance tracker listed in the student handbook

by the determined designated date will not be allowed to attend the clinical portion of their course. It is the responsibility of the student to obtain the information necessary for them to become knowledgeable about these requirements and plan their plan of study accordingly.

Latin Honors

In accordance with the University's Latin Honors policy, candidates graduating from the College of Nursing in the 2025-2026 Academic Year must meet the following GPA qualifications:

Summa Cum Laude 3.969
Magna Cum Laude 3.904
Cum Laude 3.772

Advanced Nursing Education

The College of Nursing provides coursework leading to the Doctor of Nursing Practice (DNP) or Doctor of Philosophy in Nursing (Ph.D.). The DNP program prepares graduates for the highest level of clinical practice, including clinical and translational analysis for improved practice outcomes. Post-Graduate Certificate Programs (PGC) are offered to allow students to take the examinations for advanced practice nursing certification in any of our population of foci areas. The Ph.D. program prepares nurses to pursue theoretical inquiry and conduct original research for the purpose of extending knowledge in the field.

Students must meet university and College of Nursing requirements.

Faculty maintain the right to make appropriate curriculum changes to comply with standards for accreditation and approval as stipulated by the Commission on Collegiate Nursing Education. For that reason, students receive exceptional advising support from the graduate academic advisors.

Courses that require clinical hours will require a student to pass a criminal background check and drug screening prior to entry into the program. Additional requirements and/or disclosures may become necessary throughout the courses of the program. Specific current immunizations, certifications, and examinations will also be required prior to or within the first semester of the program and prior to any semester requiring a residency experience. Students who fail to upload all health documents into an approved health compliance tracker listed in the student handbook by the determined designated date will not be allowed to attend the practicum portion of their course. It is the responsibility of the student to obtain the information necessary for them to become knowledgeable about these requirements and plan their plan of study accordingly.

Applying to Graduate Nursing Programs

The UMSL College of Nursing participates in Nursing's Centralized Application Service (NursingCAS) online application system. NursingCAS collects and processes your application documents and verifies your transcripts. We receive your application information from NursingCAS and use it to make our admission decisions. Information and instructions are found on our College of Nursing's How to Apply to a Nursing Graduate Program webpage.

DNP

The DNP program is an online program with required on-campus immersive learning experiences that focus on the preparation of leaders in clinical nursing who can improve quality of care for individuals and

populations through advanced practice and through improving systems of care. The curriculum is based on national standards for DNP education.

Courses are designed to support nursing science, clinical research, leadership and a specialty area. Concepts woven throughout the courses include methodologies for translating research into practice, using culturally competent leadership techniques with diverse and underserved populations, advanced nursing science and clinical scholarship, clinical prevention, advanced nursing practice and clinical decision making, understanding organizational systems and change, and policy development. The DNP program is available for nurses who have completed an accredited MSN or BSN academic degree.

The UMSL College of Nursing is committed to admitting a diverse group of students who will become nurse leaders responsive to the specific needs of the communities and populations we serve. We value diversity, intellectual discourse and rigor, caring, professionalism, mutual respect and support, innovation, collaboration, and transparency. Applicants will be selected using inclusive and balanced admission criteria that measure their potential in nursing practice, education, research, and scholarship. We measure our success by graduates who become lifelong learners and leaders in their communities and in the profession of nursing.

DNP population of foci available for study include:

- Adult-Geriatric Nurse Practitioner Primary Care
- Family Nurse Practitioner Primary Care
- Pediatric Nurse Practitioner Acute Care
- Pediatric Nurse Practitioner Primary Care
- Pediatric Nurse Practitioner Dual Track Acute and Primary Care
- Psychiatric-Mental Health Nurse Practitioner Primary Care
- Women's Health Nurse Practitioner Primary Care

Post-Graduate Certificate

Students with nursing graduate degrees who wish to become eligible for a nurse practitioner certification may complete one of the post-graduate certificates (PGC). The length of the program and the specific plan of study for each student will vary. The average part-time student can complete the certificate in one to two years.

PGC population of foci available for study include:

- Adult-Geriatric Nurse Practitioner Primary Care
- Family Nurse Practitioner Primary Care
- Pediatric Nurse Practitioner Acute Care
- · Pediatric Nurse Practitioner Primary Care
- Psychiatric-Mental Health Nurse Practitioner Primary Care
- Women's Health Nurse Practitioner Primary Care

Ph.D

The Doctor of Philosophy in Nursing (Ph.D.) program at the University of Missouri–St. Louis (UMSL) affords students with academic, clinical, and research resources of the University of Missouri system. Upon completion of all degree requirements, the Ph.D. degree is awarded by the UMSL Graduate School. The Ph.D. degree is an online program with synchronous and asynchronous classes.

Nurse Educator Certificate

The Nurse Educator Certificate program at the University of Missouri– St. Louis (UMSL) prepares learners to design and implement nursing curricula, develop and implement meaningful teaching strategies, and effectively assess and evaluate student learning outcomes to facilitate learning in a clinical, classroom, and/or professional setting. The 12-credit hour program consists of four graduate level courses and a one credit hour practicum.

Licensure and Certification

As of June 1, 2025, it has been determined that the following programs meet educational requirements in for Registered Nurse licensure in all U.S. states and territories except California, Mississippi, New Hampshire, New Mexico and the Washington D.C.

- Bachelor's of Science in Nursing -Traditional track
- Bachelor's of Science in Nursing- Accelerated track

As of June 1, 2025, it has been determined that the following programs meet educational requirements in for nurse practitioner certification by the

- Adult-Geriatric Nurse Practitioner graduates meet the educational requirements to be eligible for the AGNP national certification exam, through the American Nurse Credentialing Center (ANCC) or The American Association of Nurse Practitioners (AANP)
- Family Nurse Practitioner- graduates meet the educational requirements to be eligible for the FNP national certification exam, through the American Nurses Credentialing Center (ANCC) or the American Association of Nurse Practitioners (AANP)
- Pediatric Nurse Practitioner- Acute Care and Pediatric Nurse Practitioner- Primary Care graduates Graduate Certificate program meets the educational requirements to be eligible for the PNP national certification exam, through the Pediatric Nursing Certification Board (PNBC)
- Psychiatric -Mental Health Nurse Practitioner graduates meet the educational requirement to sit for national certification as a PMHNP by the American Nurse Credentialing Center (ANCC).
- Women's Health Nurse Practitioner- Primary Care graduates meet the educational requirements to be eligible for the WHNP National Certification Exam (NCC)

As of June 1, 2025 it has been determined that the following programs meet educational requirements Advanced Practice Registered Nurse licensure in all U.S. states and territories except Kansas, New Jersey, South Carolina, & Wisconsin

- Doctor of Nursing Practice
 - Acute Care Pediatric Nurse Practitioner Emphasis
 - · Adult-Gerontology Nurse Practitioner Emphasis
 - Dual Track Acute and Primary Care Pediatric Nurse Practitioner Emphasis
 - Family Nurse Practitioner Emphasis
 - Primary Care Pediatric Nurse Practitioner Emphasis
 - Psychiatric Mental Health Nurse Practitioner Emphasis
 - Women's Health Nurse Practitioner Emphasis
- Post-Graduate Certificate
 - Adult-Geriatric Nurse Practitioner- Primary Care
 - Family Nurse Practitioner-Primary Care
 - · Pediatric Nurse Practitioner-Acute Care
 - Pediatric Nurse Practitioner-Primary Care

- Psychiatric-Mental Health Nurse Practitioner-Primary Care
- · Women's Health Nurse Practitioner Primary Care

Students who live outside the state of Missouri and are considering enrolling in any program that leads to a professional licensure, are strongly encouraged to inquire with the applicable licensing board to determine the most up-to-date information regarding state licensure requirements prior to enrolling in any academic program. UMSL updates state licensure requirements annually; however, state laws, regulations, and policies may change at any time, which can impact the program's ability to meet educational requirements for licensure or certification. For the most up to date information about Licensure and Certification requirements, please visit https://www.umsl.edu/oiec/regulations/state-approvals.html.

Under federal regulations, we may not enroll into licensure or certification program students located in a state or territory in which our program does not meet the educational requirements to be eligible for licensure. However, if you plan to seek licensure and employment in any of the following states or territories listed above you may enroll in the program after signing an attestation indicating your plans to become licensed and employed in a state that meets requirements.

If you plan to seek licensure in one of the states listed above, please contact Office of Student Services at nursing@umsl.edu for more information.

Courses

NURSE 1000 Cultural Diversity in Healthcare: 3 semester hours

This course introduces cultural congruence across the lifespan.

Transcultural nursing concepts will be examined, as well as theories & practices in relationship to human caring. Application and analysis of health care practices within selected cultural contexts are explored.

NURSE 1020 Introduction to Nursing Practice: 2 semester hours

This course introduces students to the nursing profession, focusing on the roles and functions of nurses, nursing education, and systems in various settings. Students will explore the conceptual and philosophical basis of nursing, critical thinking in the nursing process, and key concepts such as self-care, nursing theory, and professional standards. The course includes the social, legal, ethical, cultural, and inter-professional contexts of nursing practice, and contemporary issues such as informatics, client care technology, and genetics. Emphasis is placed on interprofessional collaboration to enhance client outcomes and improve healthcare delivery, preparing students to meet the evolving demands of the nursing profession.

NURSE 1050 Communication for the Healthcare Professional: 3 semester hours

This course focuses on the development of communication skills utilized in professional nursing. The individual's relationship with self, individuals, communities, and populations are discussed. Communication and collaboration concepts in nursing are introduced to develop effective human caring relationships with diverse populations.

NURSE 2000 Nutrition in Health: 3 semester hours

This course examines nutritional needs across the illness and wellness continuum with emphasis on nutritional principles related to health promotion and protection. Content includes assimilation, digestion and absorption of nutrients, and cultural and economic influences on dietary practices across the lifespan.

NURSE 2050 Pathophysiology: 3 semester hours

Prerequisites: BIOL 1141 and BIOL 1162. This course focuses on the normal processes and mechanisms operating within the human body. Explores the nature of disease, its causes and the bodily changes that accompany. The course includes general principles of disease, diseases specific to internal organs, and the clinical implications.

NURSE 2060 Medical Terminology: 1 semester hour

This course introduces the language of medicine. Students will learn the foundational medical terms used in healthcare settings, including prefixes, suffixes, root words, and abbreviations. Emphasis will be placed on understanding and accurately using medical terminology in clinical documentation and communication. By the end of the course, students will be able to interpret and construct medical terms related to various body systems, diseases, procedures, and treatments.

NURSE 3000 Health Promotion and Disease Prevention Concepts Across the Lifespan: 2 semester hours

Prerequisites: Admission to nursing clinical major. This course focuses on the role of the nurse in promoting health and reducing risk behaviors of individuals and families across the lifespan. Concepts of nutrition, physical activity, coping and stress management skills, social determinants of health, and health disparities will be examined with an emphasis on the impact of genetics, values, lifestyles and cultural influences. Patient education for health promotion, risk reduction, and disease prevention across the lifespan will be explored.

NURSE 3005 Introduction to Professional Nursing: 3 semester hoursPrerequisites: Admission to the Accelerated BSN program. This course

introduces students to the role of the professional nurse. Health promotion and disease prevention across the life span are examined. Ethics, legal standards, and healthcare policy concepts are also explored.

NURSE 3015 Professional Nursing Concepts and Practice: 6 semester hours

Prerequisites: Admission to the Accelerated BSN program. Introduction to the structure of the discipline of nursing, selected theoretical and conceptual models, and their application to nursing process, clinical reasoning, and education as a foundation for socialization into professional nursing practice. Includes didactic, laboratory, and clinical components.

NURSE 3020 Fundamental Concepts of Professional Nursing Practice: 6 semester hours

Prerequisites: Admission to nursing clinical major. Introduces evidence-based nursing concepts and skills that create the framework for professional nursing practice. Emphasis is placed on fundamental practice concepts including nursing process, clinical decision making, basic physiological and psychosocial health care needs, holistic and culturally congruent care, and the delivery of safe, high quality nursing care across the health-wellness continuum. Students learn and practice skills in a lab setting with the application of acquired skills in a clinical and/or community setting.

NURSE 3025 Community-Based Clinical Education I: 1 semester hour

Prerequisites: Admission to nursing clinical major. This introductory seminar course provides the students with a basic understanding of how to apply community engagement principles in community-based health settings. Students in this course will be expected to successfully complete 5 hours of an in-person service experience, guided through the creation and delivery of a health promotion presentation for older adults, as well as participate in self-reflective exercises, and debriefing discussions.

NURSE 3030 Health Assessment Concepts: 4 semester hours

Prerequisites: Admission to Nursing Clinical Major. This course integrates theoretical knowledge and interpersonal skills for client assessment, emphasizing the differentiation between normal and abnormal findings. Students will develop problem-solving, critical thinking, and cultural competency skills to identify and document multidimensional health variations across the lifespan. The course includes both classroom instruction and laboratory experiences, where students will practice essential psychomotor skills, preparing them for comprehensive and culturally sensitive health assessments in nursing practice.

NURSE 3035 Health Assessment and Promotion: 3 semester hoursPrerequisites: Admission to the Accelerated BSN Program. Health
promotion, client education, and physical assessment skills across the
lifespan are developed using the nursing process framework. Didactic and
laboratory components are included.

NURSE 3040 Concepts of Evidence-Based Practice: 3 semester hours

Prerequisites: Admission to nursing clinical major. This course focuses on utilizing evidence-based practice to promote health and wellness, illness, and prevent injury among individuals, families, communities, and populations. Emphasis is placed on education, collaboration, utilizing evidence in practice for quality improvement, and resource utilization. This course builds on content presented in previous coursework and increases the complexity of students' mastery of focus concepts.

NURSE 3050 Concepts of Pharmacology: 3 semester hours

Prerequisites: Admission to nursing clinical major. Building upon knowledge of illness and wellness concepts developed in previous coursework, students will learn to apply this knowledge to the pharmacotherapeutic component of caring for patients across the lifespan.

NURSE 3055 Foundations of Nursing Pharmacotherapeutic Concepts: 3 semester hours

Prerequisites: NURSE 3005, NURSE 3015, and NURSE 3035. This course covers concepts and principles of pharmacology across the lifespan with an emphasis on pharmacotherapeutics and an evidence-based, comprehensive approach to the clinical application of drug therapy. Cultural considerations, individual needs, and patient education related to pharmacology are examined.

NURSE 3060 Behavioral Health Concepts: 4 semester hours

Prerequisites: NURSE 3000, NURSE 3020, and NURSE 3030. This course focuses on mental health and illness across the lifespan for individuals experiencing emotional distress, crisis, and severe, persistent mental illness. Students will increase basic skills in interpersonal communication, decision-making, and professional behavior as they utilize theory concepts and research from nursing, psychology, pharmacology, and other disciplines in the provision of care to individuals, families, groups, and vulnerable populations. The course includes basic theory and clinical experiences in hospital and community settings. Students will complete 45 clinical hours.

NURSE 3065 Professional Nursing Adult and Elder Care I: 5 semester hours

Prerequisites: NURSE 3005, NURSE 3015, and NURSE 3035. This course covers nursing care of adult and elder patients including healthy aging and maintenance of functional capacity. Its content addresses common physiologic and social changes, challenges, and adaptations affecting adult and elder populations. Strategies for health promotion and disease management are addressed in the care of adult and elder patients experiencing fluid and electrolyte imbalances, cardiovascular, integumentary, immunologic, pulmonary, and hematologic alterations. Pathophysiologic processes of organ systems are explored. Didactic and clinical components are included. Students will complete 90 clinical hours.

NURSE 3070 Concepts of Caring for Adults I: 5 semester hours
Prerequisites: NURSE 3000, NURSE 3020, and NURSE 3030. This
course focuses on the nursing care of the adult patient experiencing
selected pathophysiological processes affecting body regulatory
mechanisms. These mechanisms are related to multiple concepts
across the illness and wellness continuum. Emphasis is placed on health
restoration, maintenance and support of chronic illness as well as the
continued development of critical thinking processes, and evidence-based
nursing practice. This course includes lecture and active learning within
the classroom, as well as a clinical component. Students will complete 90
clinical hours.

NURSE 3075 Professional Nursing Mental Health: 5 semester hours
Prerequisites: NURSE 3055 and NURSE 3065. This course covers
theoretical knowledge and skill to promote the mental health of patients
across the lifespan. Common and complex mental health disorders
affecting individuals, families, and communities are examined. Students
will learn and apply therapeutic communication techniques with patients
experiencing mental health disorders. Ethical, moral, and legal issues
in mental health nursing practice are addressed. Didactic and clinical
components are included.

NURSE 3080 Academic Lab for Nursing: 0 semester hours

Prerequisites: Concurrent enrollment in any of the following courses: NURSE 3020, NURSE 3030, NURSE 3060, NURSE 4020, NURSE 4050, NURSE 4060, or NURSE 4065. This course includes a variety of student success strategies, initiatives, and services to enhance the nursing student experience and foster academic achievement.

NURSE 3090 Community-Based Clinical Education II: 1 semester hour

Prerequisites: NURSE 3025. This seminar course is designed for second-semester clinical nursing students to build on their previous community service-learning experiences. Theories will be introduced from nursing, public, and community health. Students will be expected to successfully complete 20 hours of in-person service experience with a community organization. Based on agency placement, students will be expected to develop health education and health promotion materials in the form of written and oral presentations throughout the experience. Students will also be expected to complete self-reflective exercises as well as online discussions to debrief and synthesize learning.

NURSE 3206 Adult Health Nursing II: 5 semester hours

Prerequisites: All 3100 level nursing courses, NURSE 3205, and PSYCH 2268. This course focuses on the nursing care of the adult experiencing selected pathophysiological processes affecting body regulatory mechanisms. These mechanisms are related to endocrine, sensory-perceptual, gynecological, and genitourinary functions. Emphasis is placed on health restoration, maintenance and support as well as the continued development of the nurse-client relationship, critical thinking processes, and research-based nursing practice. This course includes classroom and clinical activities in a variety of settings.

NURSE 3350 Nursing of Adults II: 5 semester hours

Prerequisites: NURSE 3120, NURSE 3121. This course focuses on the nursing care of the adult experiencing complex pathophysiologic processes affecting body regulatory mechanisms. These mechanisms are related to endocrine, neurological, musculoskeletal, gastrointestinal, sensory-perceptual, male reproductive and genitourinary problems. This course also incorporates relevant concepts of pathophysiology and pharmacology related to these conditions. Emphasis is placed on health promotion and restoration, maintenance and support, as well as the continued development of the nurse-client relationship, critical thinking and evidence-based nursing practice across the adult life span. NURSE 3350 and NURSE 3351 are co-requisites to be taken together in an 8-week period.

NURSE 3351 Clinical Nursing of Adults II: 3 semester hours

Prerequisites: Co-requisite with NURSE 3350. This course focuses on the nursing care of adults in the lab, clinical agency and simulation environments. Utilizing an integrated approach, complex psychomotor skills and assessment techniques for adult clients are mastered in patients with musculoskeletal problems, endocrine alterations, renal/genitourinary problems, sensory-perceptual problems, and liver problems. Clinical reasoning is developed and applied in order to provide safe and effective nursing care to adult clients with complex problems across the health/illness continuum. NURSE 3350 and NURSE 3351 are co-requisites to be taken together in an 8-week period.

NURSE 3360 Maternal-Child Nursing: 5 semester hours

Prerequisites: PSYCH 2268, NURSE 3120, NURSE 3121. This course focuses on women's reproductive health, childbearing and child-rearing families, as well as the health and illness of children from conception through adolescence. There is an emphasis on family dynamics, growth and development, and communication with children and their families. Health care policy and systems are incorporated as they relate to diverse populations. NURSE 3360 and NURSE 3361 are co-requisites to be taken together in an 8-week period.

NURSE 3361 Clinical Maternal-Child Nursing: 3 semester hoursPrerequisites: Co-requisite with NURSE 3360. Health promotion, protection, restoration, and maintenance for the mother-child and family care are addressed in experiences that include nursing skills lab, hospital agency and a variety of community settings. NURSE 3360 and NURSE 3361 are co-requisites to be taken together in an 8-week period.

NURSE 3807 Research and Evidence-Based Nursing Practice: 3 semester hours

Prerequisites: NURSE 3799 (or equivalent) and NURSE 3817. This course prepares nurses to provide evidence-based care to patients among the rapid advances in the science and technology of healthcare. This course provides a basic understanding of how evidence is developed, including the research process, clinical judgment, interprofessional perspectives, and patient preference as applied to nursing practice. Students will learn a systematic method to evaluate and apply research findings and other evidence in designing and implementing nursing care that is multidimensional, high quality, and cost-effective.

NURSE 3817 Introduction to Health and Nursing Informatics: 3 semester hours

This online laboratory course establishes competency in fundamental information management and computer technology skills. It enables students to use existing information systems and available information to manage nursing practice. Students critically evaluate technology, information, and its sources; use decision support systems designed for clinical decision making; and focus on the representation of nursing data, information, and knowledge.

NURSE 3873 Guided Study in Nursing: 1-3 semester hours

This course is an in-depth independent study of selected topics in nursing under the guidance of a specific instructor. No more than six hours may be taken under this option.

NURSE 3900 Role of the Baccalaureate-Prepared Nurse: 3 semester hours

Prerequisite: Admission to the College of Nursing's RN to BSN Program. This course provides an overview of the expanded expectations of the baccalaureate prepared nurse in today's changing healthcare climate. The role of the baccalaureate prepared nurse in influencing health care delivery, healthcare systems, and health outcomes of individuals, families, and communities will be explored.

NURSE 3910 Nursing Theory for Population Health: 3 semester hours

Prerequisites: Admission to the College of Nursing's RN to BSN Program. This course explores the principles of population health, focusing on the nurse's role in promoting health within diverse communities. Students will examine goals such as improving quality of care, healthcare access, health outcomes, and cost management. The course emphasizes the significance of social determinants of health and prepares students to address health disparities, advocate for vulnerable populations, and implement evidence-based interventions.

NURSE 3920 Health Assessment for the Professional Nurse: 3 semester hours

Prerequisite: Admission to the College of Nursing's RN to BSN Program. This course is designed to enhance the assessment skills of the registered nurse acquired from previous nursing education experiences. Emphasizing a competency-based approach, students will explore evidence-based practice, practical application of nursing assessments techniques, and clinical reasoning to collect and interpret subjective and objective assessment data that contribute to improved health outcomes.

NURSE 3930 Nursing Research and Evidence-Based Practice for the Professional Nurse: 3 semester hours

Prerequisite: Admission to the College of Nursing's RN to BSN Program. This course prepares nurses to provide evidence-based nursing care to patients among the rapid advances in the science and technology of healthcare. This course provides a basic understanding of how evidence is developed, including the research process, clinical judgment, interprofessional perspectives, and patient preference as applied to nursing practice. Students will learn a systematic method to evaluate and apply research findings and other evidence in designing and implementing nursing care that is multidimensional, high quality, and cost-effective.

NURSE 3940 Leadership and Management for Professional Nursing: 3 semester hours

Prerequisites: Admission to the College of Nursing's RN to BSN Program. This course prepares the nurse to coordinate and manage client care in diverse health care settings. The use of information systems and data to guide management decisions will be emphasized. Leadership and management concepts, issues, and functions as applied to the role of the professional nurse in delivering culturally competent, safe, and quality care will be examined.

NURSE 4010 Concepts of Caring for Adults II: 5 semester hours

Prerequisites: NURSE 3050, NURSE 3060, and NURSE 3070. This course focuses on the application of nursing care of the adult patient experiencing selected pathophysiological processes affecting body regulatory mechanisms across the illness and wellness continuum. Emphasis is placed on health restoration, maintenance and support of acute illness as well as the continued development of the nurse-client relationship, critical thinking processes, research-based nursing practice and use of technology. A focus on care collaboration, communication, quality of care, health care ethics and legal implications is provided. This course includes lecture and active learning, in addition to a clinical portion. Completion of 90 clinical hours.

NURSE 4015 Professional Nursing Adult and Elder Care II: 5 semester hours

Prerequisites: NURSE 3055 and NURSE 3065. This course covers nursing care of adult and elder patients including healthy aging and maintenance of functional capacity. Content addresses common physiologic, psychological, and social changes, challenges, and adaptations affecting adult and elder populations. Strategies for health promotion and disease management are addressed in the care of adult and elder patients experiencing genitourinary, gastrointestinal, neurological, endocrine, musculoskeletal, health restoration, and/or sensory-perceptual alterations. Pathophysiologic processes of organ systems are explored. Didactic and clinical components are included.

NURSE 4020 Concepts of Caring for Women and the Childbearing Family: 4 semester hours

Prerequisites: NURSE 3050, NURSE 3060, and NURSE 3070. This course applies health and illness continuum concepts related to the care of the woman, gravid mother, newborn, and growing family. This course builds on knowledge developed in previous coursework. Concurrent enrollment in NURSE 4030 is required. Students will complete 45 clinical hours.

NURSE 4030 Concepts of Caring for Children and Families: 4 semester hours

Prerequisites: NURSE 3050, NURSE 3060, and NURSE 3070. This course focuses on the pediatric health and illness continuum with an emphasis on family dynamics, growth and development, and communication with children and their families. Nursing concepts include safety, community, cultural congruence, education, collaboration, environmental health, and ethics. Concurrent enrollment in NURSE 4020 is required. Students will complete 45 clinical hours.

NURSE 4035 Nursing Care of Children: Infancy to Adolescence: 4 semester hours

Prerequisites: NURSE 3075 and NURSE 4015. This course covers pediatric health promotion and disease management with an emphasis on integration of the concepts of communication and growth and development to provide primary, secondary, and tertiary levels of prevention for children and their families. Nursing care of pediatric patients experiencing acute and chronic illness are examined. Didactic and clinical components are included.

NURSE 4040 Community-Based Clinical Education III: 1 semester hour

Prerequisites: NURSE 3090. This seminar course is designed for the third-semester clinical student to synthesize and apply concepts of community-based clinical education utilizing a project focus process, building on knowledge gained from Level I and Level II. Students will begin to synthesize their agency placement and the role that it plays in health promotion, the levels of disease prevention, environmental health, professional nursing roles, and interprofessional collaboration in various community settings. Emphasis is on health promotion, risk reduction, and disease management across the lifespan. Students will be expected to successfully complete an additional 20 hours of service experience with the same community organization, self-reflective exercises as well as online discussions to debrief and synthesize learning.

NURSE 4045 Nursing Care of the Childbearing Patient-Family System: 4 semester hours

Prerequisites: NURSE 3075 and NURSE 4015. This course covers theoretical basis and clinical skills necessary to provide quality care to patient/family systems during the childbearing/child-rearing stages of life with an emphasis on family and system theories. Didactic and clinical components are included.

NURSE 4050 Concepts of Community Focused Care: 5 semester hours

Prerequisites: NURSE 4010, NURSE 4020, and NURSE 4030. This course includes a variety of experiences to prepare the student to assess the health care needs in diverse community settings and develop interventions to meet those needs. Student will complete 90 clinical hours. Concurrent enrollment in NURSE 4060 and NURSE 4065 is required.

NURSE 4060 Synthesis of Concepts in Professional Nursing: 4 semester hours

Prerequisites: NURSE 4010, NURSE 4020, and NURSE 4030. This course will focus on the synthesis of previous nursing concepts and general education courses with the goal of preparing the student for entry into professional nursing practice. Areas of study are selected from across the lifespan, including diverse populations in a variety of healthcare systems. This course builds upon knowledge developed in previous coursework. Concurrent enrollment in NURSE 4050 and NURSE 4065 is required.

NURSE 4065 Synthesis of Professional Practice Immersion Clinical: 4 semester hours

Prerequisites: NURSE 4010, NURSE 4020, and NURSE 4030. This clinical course includes a variety of experiences to prepare the student nurse to lead, coordinate, and manage client care in diverse health care settings. This course includes evidence-based strategies. Areas of practice are selected from across the lifespan, including diverse populations in a variety of health care systems. Students will complete 180 clinical hours. Concurrent enrollment in NURSE 4050 and NURSE 4060 is required.

NURSE 4075 Global Health Immersion: 3 semester hours

Prerequisite: Consent of instructor. This is an international healthcare trip that will include a full immersion experience into a foreign culture with emphasis on the analysis of healthcare systems and social determinants of health. Core coursework may include basic foreign language skills, a review of historical and cultural concepts relevant to the country, and application of medical/nursing treatment options. This course may be taken twice for credit.

NURSE 4105 Professional Nursing Leadership and Synthesis: 8 semester hours

Prerequisites: NURSE 4035 and NURSE 4045. This course is a leadership practicum experience which reflects synthesis of cognitive and affective skills acquired in the Accelerated BSN program. Areas of study are selected from across the lifespan, including diverse populations in a variety of healthcare systems. Didactic and clinical components are included.

NURSE 4125 Community Nursing and Public Health: 5 semester hours

Prerequisites: NURSE 4035 and NURSE 4045. This course is a synthesis of community and public health nursing that prepares students to apply, promote, and protect the health of patients, families, communities, and populations. Global perspectives on health equity, policy, and diversity are explored. Didactic and clinical components are included.

NURSE 4135 Evidence-Based Practice: Integration of Research in Professional Nursing: 2 semester hours

Prerequisites: Admission to the Accelerated BSN Program. This course is designed to provide a foundational theoretical review of evidence-based practice in the nursing profession. Students synthesize knowledge and skill from the natural and behavioral sciences, humanities, and nursing in order to understand the research process and its relevance in guiding nursing practice and improving patient care. Emphasis is placed on identifying and using research evidence in clinical decision making.

NURSE 4531 Clinical Leadership Development and Professional Nursing Practice: 4 semester hours

Prerequisites: NURSE 4530. This clinical course includes a variety of experiences to prepare the student nurse to lead, coordinate, and manage client care in diverse health care settings. This course includes research-based strategies utilized for health promotion and protection, health restoration, maintenance, and support. Areas of study are selected from across the lifespan, including diverse populations in a variety of health care systems.

NURSE 4720 Perioperative Nursing: 2 semester hours

Prerequisites: NURSE 3050 and NURSE 3070. Provides experiences in preoperative, intraoperative, and postoperative settings. Includes a clinical component.

NURSE 4723 Nurse Externship: 3 semester hours

Prerequisites: NURSE 4010, NURSE 4020, NURSE 4030, senior standing and 3.0 GPA (4.0 scale). This course provides the opportunity to apply theoretical and conceptual knowledge and skills in a structured clinical environment under the guidance of a mentor.

NURSE 4730 Nursing Care at the End of Life: 2 semester hours
Prerequisites: NURSE 3050, NURSE 3060, and NURSE 3070. This
course focuses on the nursing care of terminally ill patients and their
families. Topics explored will include the impact of personal values and
beliefs about death, physiology of end stage disease processes, symptom
assessment and management, psychosocial and spiritual support,
consideration in special patient populations, societal issues and trends
in end of life care, ethical considerations in caring for the dying patient,
grief and bereavement processes, and the role nursing in end of life care
across settings.

NURSE 4741 Advanced Nursing Assessment and Management of Clients with Cardiac Dysrhythmias: 2 semester hours

Prerequisites: NURSE 3050 and NURSE 3070. Focuses on advanced nursing assessment and management of clients with cardiac rhythm problems and conduction disturbances. Includes a clinical component.

NURSE 4900 Ethics and Values in Population Health: 3 semester hours

Prerequisites: Admission to the RN to BSN program. This course introduces the impact of values and ethical issues on professional nursing practice and population health. Emphasis is on values clarification, ethical theories and principles, ethical decision-making, and professional ethical standards. Ethical issues affecting nursing practice and the delivery of care will be explored.

NURSE 4910 Health Policy for the Professional Nurse: 3 semester hours

Prerequisites: Admission to the College of Nursing's RN to BSN Program. This course familiarizes the professional nurse with health care policy and how it impacts the delivery of health care. The role of the nurse in influencing health outcomes and improving health care for populations through the policy process will be explored.

NURSE 4911 Community and Population Health Synthesis: 6 semester hours

Prerequisites: Admission to the RN to BSN Program and RN Licensure. This practicum course focuses on community-based application and synthesis of professional nursing roles and responsibilities across a continuum of health care settings, with selected populations determined to be at risk for a variety of health-related problems. Students integrate and apply curricular concepts such as health policy, epidemiology, health promotion strategies, and evidence-based practice in planning care for a select population.

NURSE 6075 Advanced Global Health Immersion: 3 semester hours

Prerequisites: Consent of the instructor and graduate standing. This is an international healthcare trip that will include a full immersion experience into a foreign culture with emphasis on the analysis of healthcare systems and social determinants of health. Core coursework may include basic foreign language skills, a review of historical and cultural concepts relevant to the country, and application of medical/nursing treatment options. This course may be taken twice for credit.

NURSE 6111 Healthcare Systems: 3 semester hours

Prerequisites: Graduate standing. This course introduces the historical development, current structure, and projected transformation of the U.S. healthcare system. It also provides the student with an understanding of the complex nature of the healthcare sector.

NURSE 6130 Research, Interventions and Evidence-Based Practice: 3 semester hours

Prerequisites: Graduate standing. This course examines the processes and evaluation components of evidence-based practice, including the identification of significant clinical problems, evaluation of evidence underlying competing interventions, the effectiveness of interventions, and implementation and evaluation of health promotion and therapeutic interventions that improve the quality of care or health outcomes for individuals, groups, and populations. Students will develop the skills to critically analyze the scientific literature foundational to implementing evidence-based practice projects.

NURSE 6424 Social Determinants of Health for Underserved Populations: 3 semester hours

Prerequisites: Graduate standing. This course examines the health and well-being of underserved populations through the lens of the social determinants of health. The course will explore responses to social factors that adversely influence vulnerability and health behaviors.

NURSE 6518 Pathophysiology for Advanced Nursing Practice: 3 semester hours

Prerequisites: Graduate standing. This course prepares the student to interpret changes in physiology that result in symptoms indicative of illness by a systematic examination of disease processes. The graduate student will compare and contrast differential diagnoses within physiological systems of sub-cellular and cellular origin, as well as biochemical and anatomical changes across the life span.

NURSE 6520 Pharmacology for Advanced Nursing Practice: 3 semester hours

Prerequisites: NURSE 6518. This course in clinical pharmacotherapeutics builds on a student's prior knowledge of drug classifications, actions, interactions, and adverse drug reactions. The major focus of the course is the pharmacotherapeutic use of medications for primary healthcare management by advanced practice nurses. Emphasis is placed on clinical critical thinking processes used to prescribe drugs in the management of specific illnesses. The laws and regulations for advanced practice nurse prescriptive authority will be addressed. Emphases include pharmacodynamics, pharmacokinetics, pharmacotherapeutics, health-related information, medication compliance, and issues that pertain to the prescribing of medications in advanced nursing practice.

NURSE 6521 Healthcare Finance: 3 semester hours

Prerequisites: Graduate admission. This course analyzes various financial sectors of the healthcare system. Analyses of the financial and economic structures for providers, health insurance organizations, pharmaceutical industries, not-for-profit, and federally-funded clinics will occur.

NURSE 6524 Health Assessment for Advanced Nursing Practice: 3 semester hours

Prerequisites: NURSE 6518. This course examines from a local, state, national, and global perspective the health and well-being of underserved populations through the lens of the social determinants of health. Students will explore responses to social factors that adversely influence vulnerabilityand behavior. Students will study the impact of poverty, racism, incarceration, biases, stigma, social interactions influencing vulnerability, and access to care on health. The analysis of community health indicators, health disparities, and healthcare trends impacting underserved populations are fundamentals of this course.

NURSE 6530 Introduction to Diagnostic Reasoning: 3 semester hours
Prerequisites: NURSE 6518, NURSE 6520, and NURSE 6524. This
course provides an introduction to the interpretation and appropriate
use of diagnostic measures for advanced practice nurses in primary
care settings. Special attention is paid to laboratory, radiographic, and
diagnostic testing. In addition, clinical opportunities will provide clinical
interventional skills for advanced practice nursing. An on-campus
immersive learning experience is required for this course.

NURSE 6721 Foundations of Psychiatric Mental Health: 3 semester hours

Prerequisites: NURSE 6518, NURSE 6520, NURSE 6524. This course provides a foundation for students to assume advanced practice nursing roles in health promotion, disease prevention, diagnosis, and management of psychiatric health and mental illness across the lifespan and within the family context. A foundation for an integrative practice, including psychiatric interviewing, psychotherapy, neurobiology, and psychopharmacology for the management of psychiatric conditions will be developed.

NURSE 6722 Foundations of Adolescent and Geriatric Health: 3 semester hours

Prerequisites: NURSE 6518, NURSE 6520, NURSE 6524. This course provides a foundation for students to assume an advanced practice nursing role in the care of adolescent and geriatric populations. Therapeutic strategies to address adolescent and geriatric health promotion, preventative care and the most common health conditions managed in these populations in primary care practice will be developed.

NURSE 6723 Foundations of Pediatric Health: 3 semester hours
Prerequisites: NURSE 6518, NURSE 6520, NURSE 6524. This course
provides a foundation for students to assume advanced practice nursing
roles in health promotion, disease prevention, diagnosis and management
of health and illness in newborn, infant, child and adolescent populations
within the family context. Therapeutic strategies about pediatric preventive
care, behavioral health, common pediatric office-based procedures,
pediatric prescribing practices, and the most common health problems
managed in pediatric primary care will be developed.

NURSE 6724 Foundations of Women's Health: 3 semester hours
Prerequisites: NURSE 6518, NURSE 6520, NURSE 6524. This course
provides a foundation for students to assume an advanced practice
nursing role in health promotion, disease prevention, health maintenance,
and the diagnosis and management of common conditions affecting
women across the lifespan. Emphasis is placed on clinical assessment
and decision making related to primary care management of reproductive
growth and development, common acute and chronic primary health
conditions, and behavioral health in gender-related populations.

NURSE 6737 Psychiatric Mental Health I: 4 semester hours

Prerequisites: NURSE 6721. This course builds upon the concepts of advanced pathophysiology, advanced pharmacology, advanced physical assessment, and the Foundations of Psychiatric Mental Health course to understand the advanced practice nursing role in psychopharmacology when caring for individuals with a mental health disorder across the lifespan and within the family context. Students will learn the time course of neurodevelopment, the relationship between genes, environment, and

NURSE 6738 Psychiatric Mental Health II: 4 semester hours

behavior, along with the neurobiology of psychiatric illness.

Prerequisites: NURSE 6737. This course builds on the concepts learned in Psychiatric Mental Health I to further investigate the role of the psychiatric health mental nurse practitioner for the restoration and promotion of mental health. Students will synthesize previously learned strategies into the assessment, diagnosis, and holistic management of individuals with complex mental health needs, including the application of different psychotherapy treatment modalities. Students will gain experience delivering psychotherapy in the provision of patient care within the defined psychiatric mental health nurse practitioner scope of practice.

NURSE 6739 Adult Health I: 4 semester hours

Prerequisites: NURSE 6722 or NURSE 6723. This course prepares students to assume an advanced practice nursing role when caring for adults across the lifespan within a family context. Strategies for the assessment, diagnosis, and holistic management of common acute, chronic, and behavioral health conditions addressed in a primary care setting for adults will be developed.

NURSE 6740 Adult Health II: 4 semester hours

Prerequisites: NURSE 6739. This course prepares students to assume an advanced practice nursing role in caring for adults across the lifespan within a family context. Strategies for the assessment, diagnosis, and holistic management of common acute, chronic, and reproductive health conditions addressed in a primary care setting will be developed.

NURSE 6743 Pediatric Health I: Acute and Chronic Care: 4 semester hours

Prerequisites: NURSE 6723. This course prepares students for the advanced practice nursing role when caring for infants, children, and adolescent populations within the family context. Strategies for the assessment, diagnosis, and holistic management of common episodic complaints and chronic condition management in pediatric primary and acute care settings will be developed.

NURSE 6744 Pediatric Health II: Comprehensive Primary Care: 4 semester hours

Prerequisites: NURSE 6743. This course prepares students for the role of the advanced practice nurse in the pediatric primary care setting and in the promotion of child health. Strategies for the assessment, diagnosis and holistic management of children with complex health needs in providing effective health promotion and health care services will be developed.

NURSE 6745 Pediatric Health II: Complex Acute Care: 4 semester hours

Prerequisites: NURSE 6743. This course prepares students for the role of pediatric nurse practitioner in restoring a child's health when complex illness or injury occurs in the acute care setting. Strategies for assessing, diagnosing, and holistically managing children with complex health needs will be developed.

NURSE 6746 Women's Health I: 4 semester hours

Prerequisites: NURSE 6724. This course prepares students to assume roles in the advanced nursing care of women considering related gender issues across the lifespan with an emphasis on common acute and chronic gynecologic conditions. Strategies for the diagnosis and holistic management of common acute and chronic gynecologic health problems in gender-related populations will be developed.

NURSE 6747 Women's Health II: 4 semester hours

Prerequisites: NURSE 6746. This course prepares students to assume roles in the advanced nursing care of women with an emphasis on reproductive healthcare. Strategies for the diagnosis and holistic management of complex reproductive health conditions including preconception, obstetrical, and postpartum care as well as family planning and infertility will be developed.

NURSE 6870 Special Topics in Advanced Practice Nursing: 1-3 semester hours

Prerequisites: Consent of instructor. Explore special topics for the advanced practice nurse in the areas of research, theory, education and administration. No more than three hours shall be applied toward the degree. This course is for graduate DNP or PhD levels.

NURSE 6875 Special Study in Graduate Nursing: 1-3 semester hoursPrerequisites: Graduate standing or consent of instructor. In-depth study of selected topics in nursing under the guidance of a specific instructor. No more than three hours may be applied to the master's program of study.

NURSE 6934 Leadership in Population Health and Healthcare Systems Residency I: 2-4 semester hours

Prerequisites: Consent of the instructor and graduate standing. This clinical course is designed to provide a theoretical and practical base for leadership development in population health and community health and organizational management. Emphasis is placed on clinical assessment and decision-making in the populations and community-level interventions to change health outcomes. The student is expected to clinically apply the concepts and theories discussed in class that address health disparities in underserved populations, infectious diseases, and community-level responses to chronic conditions. Clinical experiences are designed to enhance assessment and technical skills.

NURSE 6935 Leadership in Population Health and Healthcare Systems Residency II: 2-4 semester hours

Prerequisites: Consent of the instructor and graduate standing. This clinical course provides continued precepted experiences that allow students to develop the nurse practitioner role and clinical competencies within their specific emphasis area. Students integrate theory and clinical competencies to provide preventative care, health promotion, health education, health systems leadership, policy and evidence-based care populations.

NURSE 6954 Advanced Practice Nursing: Practicum I: 1-4 semester hours

Prerequisites: NURSE 6738, NURSE 6740, NURSE 6742, NURSE 6744, or NURSE 6747. This clinical course provides precepted experiences that allow students to continue to develop the nurse practitioner role and clinical competencies within their specific emphasis area. Students integrate theory and clinical competencies to provide preventative care, health promotion, health education and evidence-based care for acute, chronic and mental health conditions for individuals and families. An oncampus immersive learning experience is required for this course.

NURSE 6955 Advanced Practice Nursing: Practicum II: 1-4 semester hours

Prerequisites: NURSE 6954. This clinical course continues precepted experiences that allow students to develop the nurse practitioner role and clinical competencies within their specific emphasis area. Students integrate theory and clinical competencies to provide preventative care, health promotion, health education, and evidence-based care for acute, chronic, and mental health conditions for individuals and families. An oncampus immersive learning experience is required for this course.

NURSE 7200 State of the Science in Nursing Research and Practice: 3 semester hours

Prerequisites: Consent of Program Director. This course examines the state of scientific knowledge in nursing research and practice. Gaps in the nursing research and practice are identified. Interrelationships between nursing science and scientific developments in other disciplines from the perspectives of health outcomes, population health indices, and policy implications of scientific progress are analyzed. Advances in biophysiological, psychosocial, sociocultural, health systems, and health economics research and the implications for translation to improve nursing science and practice are analyzed.

NURSE 7211 Biostatistics I: 3 semester hours

Prerequisites: Graduate standing. This course provides a foundational understanding of the use of biostatics in conducting research. Types of data, data description, logic of sampling and test statistics, hypothesis testing, type 1 and type 2 errors, covariates and confounding variables, and clinical versus statistical significance are included. Opportunities will be provided to gain skills conducting statistical analysis using SPSS, interpreting the results of analytic processes, and applying the results to common health and illness examples encountered in research publications.

NURSE 7212 Biostatistics II: 3 semester hours

Prerequisites: NURSE 7211 or permission of the instructor. This course emphasizes applications of inferential statistics including analysis of variance, simple and multiple linear and logistic regression models, tests of mediation and moderation, and repeated measures and an introduction to longitudinal analyses. The analytic methods and applications will be framed within the health science research field with emphases placed on designing and conducting studies and appropriate analyses using the techniques described above.

NURSE 7213 Biostatistics III - Structural Equation Modeling: 3 semester hours

Prerequisites: NURSE 7211 Biostatistics I (or its equivalent), NURSE 7212 Biostatistics II (or its equivalent). This course serves as an introduction to structural equation modeling (SEM). The overall objective is to develop a solid conceptual and theoretical understanding and ability to use SEM and its extensions correctly and effectively in independent research. Topics include factor analysis, path analysis, and basic principles of model building. Applications and extensions of SEM, such as scale construction and validation, mediation and moderation, multi-group analyses, and latent growth modeling are also included. Students will have the opportunity to work on projects tailored to their research interests and needs.

NURSE 7215 Evidence-Based Practice for the DNP: 3 semester hoursPrerequisites: NURSE 6130 and NURSE 7260. This course examines the state of clinical inquiry and the implementation of evidence into practice.
The relationship between clinical questions and the critical appraisal and synthesis of research and literature is explored. Models for implementing and sustaining change based on the evidence are examined.

NURSE 7220 Leadership in Practice: 3 semester hours

Prerequisites: Graduate standing. This course explores various leadership theories, models, and issues that facilitate effective planning, implementation, and evaluation of healthcare initiatives within select healthcare systems. A course focus will be on the use of advanced communication skills and interprofessional collaboration to achieve optimal health outcomes and sustain positive change initiatives.

NURSE 7230 Epidemiology: 3 semester hours

Prerequisites: NURSE 7211. This course covers epidemiology, logistic modeling, and public health surveillance in primary healthcare. It provides an introduction into investigation of outbreaks. The course will enable the healthcare professional to develop a knowledge base to address issues of health and illness of a population.

NURSE 7240 Health Informatics: 3 semester hours

Prerequisites: Graduate standing. This course explores information systems and computer technologies that can improve the health of individuals, families, communities, and populations by optimizing information management and communication. Focus areas include the electronic medical record, technologies to improve patient safety, standards for privacy and security, tele-health systems to improve healthcare access to underserved populations, use of web-enhanced technologies for research translation, and strategies to provide data for decision making and evidence-based databases. Emphasis is placed on developing competence in technology use for the purpose of program evaluation, establishing healthcare quality, and improving healthcare delivery to diverse populations in complex healthcare settings.

NURSE 7251 Healthcare Economics: 3 semester hours

Prerequisites: Consent of Program Director. This course introduces the student to the basic economic concepts and analytical methods used to understand, analyze, and evaluate economic aspects across various sectors of the healthcare system including clinics, underserved and rural populations, the role of government in the delivery of healthcare services, and the economic aspects of healthcare reform. The course applies tools of analysis to the behavior of households, healthcare providers, health insurance organizations, pharmaceutical industries, and not-for-profit and federally-funded clinics.

NURSE 7260 Program Evaluation and Quality Management in Healthcare: 3 semester hours

Prerequisites: NURSE 7211 and NURSE 7230. This course introduces students to the principles and procedures for assessing the quality and effectiveness of programs, projects, and materials related to planned interventions and systems changes in health settings. An overview is provided of past and current strategies to define and assess the quality of healthcare delivery using tools required to examine, evaluate, and implement the key structures and processes of quality improvement programs in healthcare organizations. Practical applications that prepare the participants to use the theory and techniques of quality improvement in situations with complex clinical and managerial implications will be incorporated.

NURSE 7291 DNP Clinical Scholarship Project I: 2 semester hours
Prerequisites: NURSE 7215 and NURSE 7260. This course provides
opportunities for developing practice expertise into a systems-level
approach to creating change in a targeted population within a healthcare
or related environment. Students will develop their clinical scholarship
project proposal.

NURSE 7292 DNP Clinical Scholarship Project II: 2 semester hoursPrerequisites: NURSE 7291. This course provides opportunities to develop strategies to create change in a targeted population and complex healthcare environments. Students will implement evidence-based clinical scholarship projects to improve health outcomes.

NURSE 7293 DNP Clinical Scholarship Project III: 2 semester hoursPrerequisites: NURSE 7292. This course provides opportunities for the development of practice expertise to create change in a targeted population and complex healthcare environment. Students will complete their clinical scholarship project and make recommendations for future practice.

NURSE 7295 History of Pregnancy and Birth: 3 semester hoursPrerequisites: Graduate Admission. This course is a philosophical discourse on the experience of pregnancy and birthing through history.

NURSE 7403 Development of the Nurse Scientist: 3 semester hours
Prerequisite: Admission to doctoral study in nursing. This course
addresses the role of the PhD-prepared nurse as scientist, leader,
academician, and policy maker. Students will analyze strategies for
lifelong learning and development as nurse scientists and will explore
avenues for building their programs of scholarship, funding opportunities,
and contributing to nursing science in policy and clinical practice. Students
will examine ways to collaborate effectively in order to improve health care
and health outcomes.

NURSE 7443 Healthcare Policy and Economics: 3 semester hoursPrerequisites: Graduate admission. This course introduces the student to economic and healthcare policy concepts using analytical methods to understand and evaluate the impact across various sectors of the healthcare system. The historical context of healthcare policy is explored.

NURSE 7450 Social Justice in Nursing and Health Research: 3 semester hours

Prerequisites: NURSE 7481. This course provides a guided, in-depth exploration of the history, role, and application of social justice in nursing and other health research. Students will be introduced to concepts and theories related to social justice in research and will explore methodologies commonly used in research with a social justice orientation. As a class, students will apply a social justice approach to a problem area or population. Individually, students will examine their positions vis-à-vis social justice and will conduct a critical assessment of work in their topic of research from a social justice standpoint.

NURSE 7481 Development of Nursing Science and Theory: 3 semester hours

Prerequisite: Admission to PhD Program. This course focuses on the discipline of nursing, including the evolution of the state of scientific inquiry and knowledge development in nursing. The course includes the aims of nursing science, the nature of nursing knowledge and scientific theories, and a discussion of relationships among theory, research, method, and practice. Students engage in constructive dialogue as they begin to conceptualize nursing phenomena in their area of interest.

NURSE 7486 Research Residency: 3 semester hours

The course provides opportunities to apply research knowledge and skills in a directed research setting. This course will provide practical experience and the application of coursework to research as guided by faculty researchers.

NURSE 7488 Introduction to Qualitative Research Methodologies and Methods: 3 semester hours

Prerequisites: Admission to PhD or DNP programs. This course introduces qualitative research methodologies and methods useful to healthcare and related sciences. Emphasis is placed on theoretical and philosophical perspectives, selection of appropriate methodologies, data collection and analysis methods, and critique. An overview of traditional and emerging designs, strengths and limitations of various methodologies, and ethical concerns will be addressed.

NURSE 7490 Advanced Nursing Research Designs and Methods: 3 semester hours

Prerequisite: Admission to the PhD program. This course focuses on development of the research plan including issues in sampling, design, and implementation nursing research. Students will evaluate research methods to answer research questions in their area of interest. Content includes design and analysis issues affecting validity, examination of measurement techniques for assessing validity, reliability, structure of data collection instruments, and criteria for instrument selection. A research proposal will be prepared.

NURSE 7491 Advanced Nursing Theory Development and Validation: 3 semester hours

Prerequisite: Admission to PhD program. This course focuses on a systematic study of contemporary nursing science and related theories in knowledge development, and the application of theory construction and validation strategies to specific nursing phenomena of interest. Students create and critically examine theoretical frameworks and models, with emphasis placed on constructing and testing theoretical statements.

NURSE 7495 Mixed Methods Research in Health Care: 3 semester hours

Prerequisites: NURSE 7490, NURSE 7488; or consent of the instructor. Emphasis will be on merging methods and addressing epistemological and paradigmatic issues. The value and use of the mixed methods approach, philosophical assumptions, types of designs, and approaches to designing and conducting mixed methods research in health care related disciplines will be emphasized.

NURSE 7496 Seminar in Advanced Qualitative Research Methods: 3 semester hours

Prerequisites: NURSE 7488 or consent of the instructor. This course is designed to engage nurse researchers in the applied collection and analysis of qualitative data and the dissemination of qualitative findings. This course explores congruent systematic analyses/interpretations based upon a variety of philosophical and/or theoretical stances, which could include phenomenology, hermeneutics, ethnography, grounded theory, case study, participatory action research, critical theory or other post-colonial and feminist approaches, textual analysis, aesthetic inquiry and others. Dissemination of findings will be emphasized as well as issues related to data management, rigor, and funding of qualitative proposals. Contemporary approaches to multiple methodology studies and innovative designs will be addressed. Students will be encouraged to practically engage in a methodology of choice in depth.

NURSE 7497 Design, Implementation and Evaluation of Health Interventions: 3 semester hours

Prerequisites: NURSE 7490 or consent of the instructor. This course focuses on developing skills in designing, delivering, and evaluating evidence-based health interventions that integrate relevant theoretical, research, social determinants, and biobehavioral variables with salient cultural variables for targeted groups. The course includes the application of research skills and empirical foundation for advanced research intervention design and evaluation related to a focal area of research interest.

NURSE 7499 Dissertation Research: 1-12 semester hours

Prerequisite: All required course work; successful completion of comprehensive examination. Investigation of an advanced nature culminating in successful defense of dissertation. Continuous registration is required.

NURSE 7529 Special Topics in Qualitative Systematic Reviews: 3 semester hours

Prerequisites: NURSE 7488 or equivalent. This course examines and carries out elements of qualitative systematic reviews, such as topic/problem identification, data collection, and analysis. Students will gain an understanding of how to limit threats to validity and maximize generalizability.

NURSE 7870 Special Topics in Scientific Foundations of Research: 1-3 semester hours

Prerequisites: Consent of the instructor and graduate standing. Explore special topics related to PhD dissertation. This course can be a cognate, elective, or for students who are enrolling in one of the shared courses available through the UM-funded CARMA initiative (Collaborations for Advanced Research Methods and Analysis).

NURSE 7934 Leadership in Population Health and Healthcare Systems Residency III: 2-4 semester hours

Prerequisites: Consent of the instructor and graduate standing. This clinical course provides continued precepted experiences that allow students to develop the leadership and population-focused role and clinical competencies within their specific emphasis area. Students integrate theory and clinical competencies to population preventative care, healthcare, health promotion, health education, health systems leadership, policy, and evidence-based care populations.

NURSE 7954 Advanced Practice Nursing: Practicum III: 1-4 semester hours

Prerequisites: Completion of or concurrent enrollment in NURSE 6738, NURSE 6740, NURSE 6744, NURSE 6745, or NURSE 6747. This clinical course provides continued precepted experiences that allow students to develop leadership and population-focused roles and clinical competencies within their specific emphasis area. Students integrate theory and clinical competencies into population preventative care, healthcare, health promotion, health education, health systems leadership, policy, and evidence-based care populations. An on-campus immersive learning experience is required for this course.

NURSE 7955 Research Topics in Nursing and Health: Psychometrics: 3 semester hours

Prerequisites: Admission to the College of Nursing PhD Program. This course focuses on theoretical foundations of measurement, item construction, instrument design, item analysis, validity and reliability assessment. Basic methodologies and techniques for constructing, testing, and evaluating instruments will be discussed. This course is for students who are enrolling in one of the shared courses available through the UMfunded CARMA initiative (Collaborations for Advanced Research Methods and Analysis).

NURSE 7956 Participatory Approaches for Health and Health Systems: 3 semester hours

Prerequisites: Admission to the College of Nursing PhD Program. This course will focus on the use of participatory approaches for the design of health and health-system interventions. This course is for students who are enrolling in one of the shared courses available through the UM-funded CARMA initiative (Collaborations for Advanced Research Methods and Analysis).

NURSE 7957 Research Topics in Nursing and Health: Hierarchical Linear Modeling: 3 semester hours

Prerequisites: Admission to the College of Nursing PhD Program. This course is an extension of regression methods to situations where data has multiple layers of meaningful structure. It emphasizes ability to specify, evaluate, and estimate a multilevel model using SPSS and HLM. This course is for students who are enrolling in one of the shared courses available through the UM-funded CARMA initiative (Collaborations for Advanced Research Methods and Analysis).

NURSE 7959 Research Topics in Nursing & Health: Structural Equation Modeling: 3 semester hours

Prerequisites: Admission to the College of Nursing PhD Program. This course focuses on factor analysis, path analysis, basic principles of model building, as well as applications and extensions of SEM such as scale construction and validation, mediation and moderation, multi-group analyses, and latent growth modeling. This course is for students who are enrolling in one of the shared courses available through the UM-funded CARMA initiative (Collaborations for Advanced Research Methods and Analysis).
