2020-2021 University Bulletin

This Bulletin includes a description of undergraduate and graduate policies and programs at the University of Missouri-St. Louis for 2020-2021. All statements in this publication concerning regulations, fees, curricula, or other matters are subject to change without notice. They are not to be regarded as offers to contract.

The University of Missouri – St. Louis is accredited by the Higher Learning Commission. This accreditation applies to all baccalaureate, masters, and doctoral levels. UMSL earned full Reaffirmation of Accreditation following the November 2018 comprehensive site visit and according to the final HLC report, “... provided a convincing argument with sufficient data to demonstrate it adheres to federal compliance guidelines and that it meets all HLC core components, and therefore all criteria for accreditation.”

The policies of the University of Missouri-St. Louis comply with the provisions under those laws that forbid discrimination on the basis of race, color, sex, national origin, religion, age, handicap, or veteran status in any program or activity of the University (CRR 600.010-600.020).

Bulletins for the past ten years are posted in the archives section of this site. Older versions are available in campus advising offices and Academic Affairs. Program requirements are also available to students through Degree Audit Reports (DARS), which are available online or from an academic adviser, who will assist in the interpretation of the audit.

The University of Missouri-St. Louis is one of four campuses that constitute the University of Missouri. Established in Columbia in 1839 on the ideals of Thomas Jefferson, the University of Missouri became a land-grant institution upon passage of the Morrill Act by Congress in 1862.

When the University of Missouri System was organized in 1963, the St. Louis campus was the only one that started as an entirely new university. The University of Missouri-St. Louis began as a consequence of the national movement to create public universities in metropolitan centers. UMSL was designed to educate the area's professionals through research, coursework, and hands-on experiences in the region's businesses, schools, hospitals, agencies, and arts organizations.

According to the campus's history, The Emerging University: The University of Missouri-St Louis, 1963-1983, faculty were hired from prestigious universities with a vision of creating a university where graduates would be able to confront urban issues through research, critical thinking, and creativity. More than traditional workforce development, these leaders' vision for UMSL was to educate students for lifelong learning, which would produce good citizens and effective leaders in the region's organizations. That legacy continues because those early leaders created a culture of faculty excellence that persists today.

Since the doors of the old Administration Building opened on a golf course more than 50 years ago, UMSL has grown to encompass 470 acres in St. Louis County and has a mix of modern and historic academic buildings. The campus is now St. Louis's largest university in the number of students and is the third largest in the state.

The campus takes pride in the success of its students, faculty, and staff and highlights of these successes are posted regularly on the UMSL home page. Detailed information about the university is also available on the About UMSL site and the Student Consumer Information site. Student achievement data can be found on the College Portrait.

The University of Missouri St. Louis is the metropolitan, land-grant, research institution serving the most diverse and economically important region in Missouri.

Mission
We transform lives.

Vision
The University of Missouri St. Louis will be a beacon of hope, a force for good, and a leader in the pursuit of excellence in education, impactful research and community service. We boldly assert that education is for everyone who is willing and able to seek it out. We honor the duties inherent in our land-grant beginnings by positioning ourselves as partners in the search for knowledge, progress and positive change for ourselves, our communities, our world.

Faculty Senate and University Assembly
The Faculty Senate has primary responsibility for making educational policy decisions to create a rigorous, innovative, student-oriented environment for learning, research, and community service. The Senate and University Assembly together and through their committees advise the chancellor and other senior administrators on matters related to students, faculty and staff.

The Faculty Senate includes a faculty member from each department and approximately 10 at-large faculty members, as well as three administrators who are non-voting members. The University Assembly consists of the elected members of the Senate, five administrators, student representatives, and staff members. Non-voting members consist of vice chancellors and vice provosts not already included, deans of all colleges, the dean of libraries, and the president of the Student Government Association. The Faculty Senate meets monthly between September and May and the Assembly meets in alternate months during the year. Information about the Faculty Senate and University Assembly are available on the Senate's web site.

Staff Association
The University of Missouri—St. Louis Staff Association is a body formed to consider, to recommend, and to take such other actions as are properly related to the common concerns and best interest of those personnel at the University of Missouri-St. Louis. The Staff Association fosters a spirit of unity and cooperation among all employees of the University of Missouri-St. Louis, to consider methods and means by which employment conditions may be improved and the operating efficiency of the University of Missouri-St. Louis increased; to receive and consider matters concerning working conditions of membership; to make such recommendations that it deems appropriate, and to provide a means of communicating problems of mutual concern between the Staff Association and the University of Missouri-St. Louis administration. Representatives of the Staff Association serve as voting members of University Assembly committees.

Student Government Association
The Student Government Association (SGA) of the University of Missouri St. Louis, housed in 366 Millennium Student Center, 314-516-5105, is the student governance body at UMSL. SGA is comprised of elected student representatives and a general assembly which includes representatives.
from all recognized student organizations. The purpose of the SGA is to represent student concerns at every level of governance within the university. This is done by ensuring adequate and capable student representation within the University Assembly, the policymaking and governance body of the university.

Undergraduate Study

Undergraduate Study

This section describes academic policies and requirements for students enrolled as an undergraduate and University requirements for undergraduate academic programs.

Campus Testing Centers

The Testing Center is administratively housed in the Center for Teaching and Learning. The Testing Center manages exams for students and faculty that are paper-based, online, and those requiring a variety of accommodations. Appointments are required for all exams. Institutional exams (e.g., Major Field Test, Math Placement, ACT Residual) are administered through the Testing Center, as well as various standardized exams. The Testing Center main office is located in JC Penney Room 93, with additional computer-based stations in JC Penney Room 94.

Assessment

The University of Missouri has been directed by the Board of Curators to assess the outcomes of your university education. To this end, two types of assessment are required: A test of general educational development given to a sample of incoming freshmen and graduating seniors who represent the university; and a test or project, specified by the major department, given to graduating seniors.

For its continuous quality improvements, the University also conducts periodic surveys of student engagement. As alumni, graduates are encouraged to participate in assessment by completing questionnaires sent to them by the University or major department/college.

Credit Hours

All candidates for baccalaureate degrees must complete a minimum of 120 semester hours. At least 45 of these hours must be courses numbered 2000 or above (or comparable courses transferred). Students must maintain a minimum 2.0 grade point average overall, as well as in their area of specialization. Students seeking two degrees must meet all degree and residency requirements of each degree.

Academic Residence

Students must be in residence for at least 24 of the last 30 hours of graded credit (exclusive of courses graded on a satisfactory/unsatisfactory basis), except under unusual circumstances, to be decided by the dean.

General Education

Students must successfully complete the General Education requirements of the University, the school or college in which they are enrolled, and the specific requirements of their area of specialization. For more information about the University’s requirements go to the General Education Program (p. 51) section of the bulletin.

Math and English Proficiency Requirement

Students who have not satisfied the Math and English proficiency requirement by the end of their first semester at UMSL will receive an advising hold and must meet with an Academic Advisor to register in these gateway courses in order for the hold to be removed.

Junior-Level Writing

A Junior-Level writing course with a grade of C- or above is required for all undergraduate degrees. The following courses will meet the requirement:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 3090</td>
<td>Turning the Kaleidoscope: How We Look at Texts</td>
</tr>
<tr>
<td>ENGL 3100</td>
<td>Junior-Level Writing</td>
</tr>
<tr>
<td>ENGL 3110</td>
<td>Junior-Level Writing for International Students</td>
</tr>
<tr>
<td>ENGL 3120</td>

<tr>
<td>ENGL 3130</td>
<td>Technical Writing</td>
</tr>
<tr>
<td>ENGL 3160</td>
<td>Writing in the Sciences</td>
</tr>
<tr>
<td>HONORS 3100</td>
<td>Honors Advanced Composition: Writing The City</td>
</tr>
<tr>
<td>HONORS 3120</td>
<td>Honors Business Writing</td>
</tr>
</tbody>
</table>

Cultural Diversity Requirement

To expand cultural awareness, students in some academic units may be required to complete a course that emphasizes Asian, African, Middle Eastern, Latin American, Pacific aboriginal, Native American, or a comparable culture. Courses that satisfy this requirement involve substantial material independent of the cultures’ interactions with European cultures. If a course focuses on one facet of a culture, it must treat the topic within the context of the culture as a whole. This requirement may be met by one of the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTHRO 1011</td>
<td>Introduction to Cultural Anthropology (MOTR ANTH 201)</td>

Civics Exam Requirement

Per Senate Bill 807 (2018):

Any student entering a public institution of higher education for the first time after July 2019 who is pursuing an associate’s or bachelor’s degree from such institution shall successfully pass an examination on the provisions and principles of American civics with a score of seventy percent or greater as a condition of graduation from such institution. The examination shall be known as the “Missouri Higher Education Civics Achievement Examination (MHECAE).

Graduation

To better assist students and confirm graduation eligibility, it is required that students notify their academic unit of their intended graduation date by officially applying to graduate through the self-service student center in MyView. Step by step instructions can be found here:

http://www.umsl.edu/registration/students/graduation.html

This will allow the advisors to begin the degree check process and approve the student for graduation.

- The application for graduation process initiates the degree-check process.
- It is recommended that students complete the application for graduation one year in advance to ensure all requirements will be met. (Note: certain colleges may require the one year prior completion date – check with your advisor to be sure). The application for graduation process should be completed based on college specific deadlines.
- In order to graduate in any given semester, students must apply prior to the deadline for that semester:
  - Fall term: October 1
  - Spring term: March 1
  - Summer term June 1
- The process to apply will be cut off at that time and if the student has not yet completed the steps to apply for graduation, the diploma will then be awarded the following semester. (In extreme circumstances,
a student may appeal their case to the dean’s office if the deadlines have passed).

Changes to anticipated graduation date
- Students who need to alter their graduation plans must notify their academic unit and re-submit the application for graduation process through self-service on MyView.
- The semester and other information listed when re-submitting the new application for graduation process will be used to replace the information previously submitted.
- All deadlines for the new semester of graduation apply to applicants who are altering their semester of graduation.

Final Grades
To assure graduating at the end of a specific semester, all work for that semester and any delayed grades from previous semesters must be completed with the grades sent to the Office of the Registrar no later than the official date for submission of final semester grades.

Graduation, commencement, diplomas and honors
- Graduation refers to the process of completing a degree and takes place three times per year at UMSL: at the end of each Spring, Summer, and Fall semester.
- Commencement refers to the ceremony celebrating graduation and occurs twice per year at the end of the Fall and Spring semesters. (Students graduating in summer may participate in either the following Fall ceremony or the prior Spring ceremony). Commencement is optional and participating in commencement does not mean that a student has graduated
- Diplomas are a ceremonial document indicating the degree a student earned. The transcript is the official academic record.

Declaring a Major
A student’s first major, or undeclared major status, is determined by his or her application for admission.

While applying, students are typically not certain about the requirements for a major at UMSL. Students are encouraged to explore majors through professors, advisors, the Career Center, and co-curricular activities during their first semester at UMSL.

Students who have not declared a major at 60 credit hours (junior status) will receive an advising hold and must declare a major with an academic unit before this hold is removed. Transfer students arriving at UMSL with 60 or more credit hours will receive an advising hold preventing them from registering for their second semester until they have declared a major. They can declare a major by following the procedures for a change of major outlined below.

Exploratory Pathways for Undeclared Major Status
Students who apply with Undeclared Major Status are required to choose an Exploratory Pathway. Exploratory Pathways are designed for students to explore different majors while maintaining a plan for graduation.

The following Exploratory Pathways are offered:

Business and Geopolitics
The Business and Geopolitics Pathway focuses on markets, trade, and political issues. Students will be exposed to majors that examine domestic and international economic developments, the role that corporations and politics play in global issues, as well as the impact of non-profit agencies to help bring assistance to those in need.

Creativity and Design
The Creativity and Design Pathway focuses on artistic and innovative perspectives. Students in this pathway tend to be self-starters who plan to create their own path towards a meaningful career in any number of occupations.

Education and Social Change
The Education and Social Change Pathway focuses on improving society at the grassroots-level. Students will be exposed to majors that prepare educators (both in and out of classroom settings), uncover social issues and assist those in need.

The Human Experience
The Human Experience Pathway focuses on components of human society and culture. Students will be exposed to majors that examine historical events and their impact on contemporary issues, study similarities and differences of people from other countries, and/or write creative stories or essays. Students in this pathway can expect to explore how to process and document aspects of being a person in the world today.

The Interconnected World
The Interconnected World Pathway focuses on global issues and concepts. Students will be exposed to majors that examine interconnections between countries and cultures that have developed due to international travel, trade, technological innovations.

Mathematics and Scientific Research
The Mathematics and Scientific Research Pathway exposes students to majors that examine natural sciences and prepare them for research in a variety of scientific fields. Students interested in health sciences may also consider this Pathway.

Technology and Innovation
The Technology and Innovation Pathway focuses on technology and the role it plays in society. Students will be exposed to majors that are directly associated with technology in a variety of capacities including research, application, and business. Those interested in these majors should also be prepared for an emphasis in mathematics.

Change of Major
To change academic majors, students should consult the advising office of the new major to determine their eligibility and which courses they have already completed apply toward the new major. Students must then follow the major change procedures as outlined by the registrar.

Course Schedules
The Schedule of Courses contains the specific courses offered each semester with their meeting times and locations. This schedule is available online.
Course schedules are generally published by mid-March for the fall semester, mid-October for the spring semester, and mid-December for the summer semester.

The university reserves the right to cancel without notice any course listed in the Bulletin or the Schedule of Courses for any semester or to withdraw any course that that does not have adequate enrollment.

Registration

Newly admitted/re-admitted students are eligible to register after the close of the pre-registration period for Fall and Spring semesters. All students enrolling in Summer semesters register during the same registration period. Enrollment dates, Semester Calendars, and courses offerings can be found online at the Registration website.

Registering for Classes: Currently Enrolled Students

Currently enrolled students are given the opportunity to preregister, by appointment, before new or returning students during Fall and Spring semesters. Pre-registration appointment times are sent to students’ university email and can also be found by logging into MyView.

Registering for Classes: Former Students

Former UMSL students who have not been enrolled for a year must submit a reenrollment application.

Priority Registration

Student athletes and military-connected students are eligible for priority registration and may enroll on the first day that registration begins. Military-connected students include veterans, those currently serving in the military, Reserves, or National Guard, and other students that are using a VA or DoD program to fund their education. Student athletes are members of any NCAA intercollegiate sport team at UMSL.

Registration Cancellation

Students who have enrolled but do not wish to attend the university may cancel their registration any time before the first day of the semester. Students must complete a withdrawal survey online. Cancellations may be processed at the Office of the Registrar.

Students may withdraw from school beginning the first day of classes. The refund schedule for withdrawals after class work begins can be found on the Cashier’s Office website. Students who are withdrawing must complete a withdrawal survey. Withdrawals may be processed at the Office of the Registrar.

Prerequisites for a Course

Students are expected to review all courses when registering for them to assure that they meet all prerequisites. When the prerequisites include courses, a minimum grade of C- is required to meet the prerequisite. Only the department offering the course with the prerequisite can make an exception to this requirement. A course with an ‘academic standing’ prerequisite—for example, ‘senior standing’—requires that students have the class standing stated, in the example, only seniors can take that class.

Prior Learning Assessment

UMSL offers superior students options to enhance or accelerate their academic programs through credit by assessment. Students may earn college credit by demonstrating sufficient knowledge of proficiency in a certain area. The Registrar’s Office provides detailed information regarding the specific assessments accepted and scores required. Students may earn up to 30 semester hours of credit through the following options:

**Advanced Placement**

Advanced Placement (AP) examinations may count for UMSL degree credit if the exams and scores are acceptable. (Note: UMSL awards credit for specific scores on certain Advanced Placement exams that are administered by the College Board, not simply for enrollment in advanced placement courses at the high school level. In order to receive AP credit, students must have official AP score reports sent to UMSL directly from the College Board. Credit cannot be determined from high school or previous college transcripts.)

**International Baccalaureate**

International Baccalaureate (IB) examinations are tests taken as the culmination of a special high school study program. Several of the Higher Level exams count for credit if the score earned is a 5 or higher.

**College Level Examination Program**

College Level Examination Program (CLEP) exams are acceptable for credit in certain areas of study. UMSL accepts only the CLEP Subject Exams. Not all subjects are accepted. Credit is not given for any CLEP General examination. No CLEP Subject Exam may be taken in the final 30 hours of coursework leading to a degree.

**Credit by Departmental Assessment**

Credit by Departmental Assessment may be earned if a student has previous knowledge or proficiency in an area of study and arranges to complete a departmentally administered formal assessment. If a department chooses to offer credit by assessment, the department must provide an assessment that measures the same level of proficiency as is required to earn credit for enrollment in the course. Frequently this is the final exam for the course. Before taking a departmental assessment, students must register in the Registration and Records office and obtain a Credit by Departmental Assessment form.

**Fees**

Consult the Cashier’s website for fee information when attempting credit by departmental assessment.

**Eligibility**

Eligibility for credit by departmental assessment requires:

1. Enrollment at UMSL in the semester in which the assessment is administered
2. No enrollment in the course that is the subject of the assessment during the last three terms.
3. Achievement of a grade of C or above on the assessment in order to receive credit.

**Course Load**

A normal fulltime semester course load is 15 semester credit hours. Minimum fulltime enrollment is 12 hours each semester, fall, spring, and summer. Students who have demonstrated the ability to carry more than 18 hours may do so with the approval of their dean.
Adding Courses

Students may add courses during the first week of a sixteen-week semester. Students with specific academic holds may be required to obtain approval from their advisor to change their schedule. Students may not add courses without instructor approval after the first week of class of a sixteen-week semester, the first four days of class of an eight-week session, or the first three days of class of a four-week session. Students are responsible for any content or assignments missed if they add a course after it has already met.

Dropping Courses

Courses may be dropped in MyView, without faculty approval and without receiving a grade, through the fourth week of classes of a sixteen-week semester, the second week of classes of an eight-week session and the first week of classes of a four-week session. Students with specific academic holds may be required to obtain approval from their advisor to change their schedule. Semester and session calendars posted on the registrar's website include specific deadline dates for dropping courses. Students who officially drop any of their classes may have fees reassessed and/or refunded based on the current fee reassessment schedule posted on the cashier's website. Courses dropped during this period will not appear on transcripts.

From the 5th week to the end of the 8th week of a sixteen-week semester, students may continue to drop courses in MyView without instructor approval. A grade of "EX" (excused) will be issued on the transcript. Refer to the calendar posted on the registrar's website for summer or winter session withdrawal deadlines. From the 9th week to the end of the 12th week dropping courses will require instructor approval. Students receiving approval to drop during this period will be issued either an EX, or "EX-F" (excused but failing) if the student was failing at the time of dropping. The EX and EX-F grades will be posted to transcripts, but neither one will be used in calculating the GPA. Students who wish to withdraw after the end of the 12th week must provide documentation of exigent circumstance and receive both the instructor's permission and approval of the dean.

Dropping or withdrawing from a course may adversely impact scholarships, financial aid, and progress toward graduation. Students are strongly urged to discuss these possibilities with the financial aid office and their academic advisors before dropping or withdrawing.

Students registered in a course in which they fail to meet a minimal level of participation as deemed by the instructor will be issued a grade of "FN" (Failure, Non-participation). The FN grade indicates that the student is not regularly attending class or is making little or no attempts on assignments or activities and may be violating the terms of financial assistance. This grade is equivalent to an F for GPA calculations.

Section Changing

Section changing is normally completed during the first week of a regular semester, the first four days of an eight-week session and the first three days of a four-week session. Approvals may not be necessary during this time. However, after the first week of a regular semester, the first four days of an eight-week session, and the first three days of a four-week session, a section change form must be obtained from the department or dean's office. The signature of both instructors is required. The form is to be submitted to the Registration Office, 269 Millennium Student Center.

Withdrawing from the University after Classes Begin

Students are required to complete the necessary procedures to officially withdraw from the University including completing the withdrawal survey and the drop process for all classes in which they are enrolled. Students may withdraw without receiving grades, through the fourth week of classes of a sixteen-week semester, the second week of classes of an eight-week session and the first week of classes of a four-week session. Students who officially drop any of their classes may have fees reassessed and/or refunded based on the current fee reassessment schedule posted on the cashier's website. Courses of students that withdraw during this period will not appear on transcripts.

From the 5th week to the end of the 8th week of a sixteen-week semester, students that withdraw from the university will be issued a grade of "EX" (excused) for each of their courses on the transcript. From the 9th week to the end of the 12th week withdrawal will require instructor approval for each course. Students receiving approval to withdraw during this period will be issued either an EX, or "EX-F" (excused but failing) if the student was failing at the time of dropping. The EX and EX-F grades will be posted to transcripts, but neither one will be used in calculating the GPA. Students who wish to withdraw after the end of the 12th week must provide documentation of exigent circumstance and receive both the instructor's permission and approval of the dean.

Withdrawing from a course may adversely impact scholarships, financial aid, and progress toward graduation. Students are strongly urged to discuss these possibilities with the financial aid office and their academic advisors before withdrawing.

No partial credit is granted to students who withdraw from school during any semester or otherwise fail to complete the work required for full course credit. Students who stop attending classes without officially withdrawing from the university are issued an F or an FN grade. Both F and FN grades are counted in computing grade point averages. Fall, spring, and summer session calendars list specific withdrawal dates.

Repeating Courses.

Students may not repeat for grade point average or credit hour purposes courses in which grades of F, A-, A, A+, B+, B, B-, B-, C, C+, or C- have been earned. Subsequent grades in such a course that is repeated will not be included in the GPA calculations. The course hours will be counted only once in calculating hours toward a degree.

Grade Modification

When the grade received in an initial attempt in an undergraduate course taken at UMSL, or any University of Missouri System institution, is a C-, D+, D, D-, F, or FN, the grade may be replaced in the calculation of the GPA by the grade received in a second or subsequent attempt of the same course at UMSL. All grades received in second and subsequent attempts will be included in GPA calculations. All attempts of a given course will appear on the official transcript with the grade(s) earned. The transcript will have an explanation that states that the GPA is calculated using all grades earned in a course except the initial attempt when a course has been repeated and grade modified.

Note: Grade modification is not automatic. After completing the second or subsequent attempt of the course to be modified, students must process the necessary paperwork with an academic adviser in the academic unit in which the student is currently enrolled.
The University of Missouri-St Louis will also honor undergraduate grade modifications completed on other University of Missouri campuses and officially transferred in. This will be effective for any transcripts received on or after July 1, 2020.

**Academic Probation and Suspension**

Students whose campus cumulative grade point average falls below 2.0 will be placed on University Academic Probation. Notification of probationary status will be sent to students each fall and spring term from the Office of Academic Affairs. Students placed on academic probation are restricted to a maximum of 12 credits for the following semester and required to meet with an academic advisor. Students placed on academic probation may also be required to participate in programs designed to help them return to good academic standing. Students whose campus cumulative GPA falls under 2.0 after serving two semesters on probation (not necessarily consecutive) will be suspended from the university. Students should consult with their respective dean's office for additional information.

Students who earn a grade point average of 0.0 in their first semester at UMSL will be suspended.

Students who are suspended from the university are not eligible to enroll in courses or receive financial aid at UMSL for at least one full academic calendar year. Students suspended from one school or college within the university shall not be admitted to any other school or college until they are eligible for readmission to the university. In order for suspended students to be considered for readmission to the university they must successfully complete at least one semester at an accredited post-secondary institution.

**Attendance**

Students are expected to attend class regularly, and, in accordance with the UMSL Bylaws, faculty may establish penalties for excessive absences. Students absent for more than three successive classes may be reported to the dean. Students should tell their dean's office of an extended absence. An absence known in advance should be reported to the instructors of courses that will be missed. Makeup of examinations or work missed is allowed at the instructor's discretion. Students excused from class for valid reasons by their deans shall be permitted, if possible, to make up work missed; the dean must have notified the instructor in writing.

**Auditor**

Students may enroll as auditors in any course with the prior consent of the instructor and dean of the college in which the auditors desire to be registered. They may be dropped from the course when, in the judgment of the instructor and dean, their record justifies such action. Auditors are charged full fees and receive no academic credit.

**Course Numbering**

Each course bears a distinguishing number that identifies it within the department or academic unit and indicates, broadly, the expected level of students taking the course. To understand the course level, refer to the following guidelines:

<table>
<thead>
<tr>
<th>Course Numbers</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>1-999</td>
<td>Courses that do not count toward the minimum requirements for any degree.</td>
</tr>
</tbody>
</table>

**Lower Division:**

- **1000-1999**
  - Courses open to undergraduate students, primarily focused toward freshmen; courses count toward the minimum for given degrees.

- **2000-2999**
  - Courses open to undergraduate students, primarily focused toward sophomores; courses count toward the minimum for given degrees.

**Upper Division:**

- **3000-3999**
  - Courses open to undergraduate students, primarily focused toward junior; courses count toward the minimum for given degrees.

- **4000-4999**
  - Courses open to undergraduate and graduate students, primarily focused toward seniors; courses count toward the minimum for given undergraduate degrees; depending on the specific program, courses may count for a given graduate degree.

**Graduate:**

- **5000-5999**
  - Graduate courses; also open to post-baccalaureate educator certification candidates and undergraduate seniors with permission from the Dean of the Graduate School. Courses count toward the minimum for given graduate degrees.

- **6000-6999**
  - Graduate courses open to master's degree and doctoral students. Courses count toward the minimum for given graduate degrees.

- **7000-7999**
  - Graduate courses open to doctoral students and master's degree students with special permission. Courses count toward the minimum for specific graduate degrees.

**Optometry:**

- **8000-8999**
  - Courses open to optometry degree seeking students.

**Credit Hours**

The university credit unit is the semester hour, which represents a subject pursued one period weekly for one semester of approximately 16 weeks or for a total of approximately 16 periods for one term. Generally, a course valued at three semester hours meets for three periods weekly for one semester, a twocredit course two periods a week for a semester, and so on. Normally, the lecture or recitation period is 50 minutes long and the laboratory period one hour and 50 minutes.

The number of credit hours is listed as units in the online Schedule of Courses. If the credit is variable (to be determined in consultation with the instructor) it is shown by minimum and maximum units, such as Research...
The grading system available to all faculty at UMSL consists of:

**Grading System**

Once in calculating hours toward a degree. The course hours will be counted only earned. Subsequent grades in such a course that is repeated will not be courses in which grades of A, A-, B+, B, B-, C+, or C have been earned. Students may not repeat for grade point average or credit hour purposes A faculty member who gives an in-class final examination may give this examination only on the day and at the time designated in the official final examination schedule. A majority vote of the students to the contrary does not change this policy.

A student may submit a written request for a change in the scheduled time of the final examination for a limited number of documented hardship reasons. These reasons include, but are not limited to, being scheduled to take more than two examinations on the same day, illness, military obligations, and religious practices. Except for emergencies, this request should be presented directly to the instructor at least two weeks before classes conclude. If the request is denied, the student may request additional consideration from the chairperson/area coordinator/program director and, if denied, to the dean of the college sponsoring the course.

**Repeating Courses.**

Students may not repeat for grade point average or credit hour purposes courses in which grades of A, A-, B+, B, B-, C+, or C have been earned. Subsequent grades in such a course that is repeated will not be included in the GPA calculations. The course hours will be counted only once in calculating hours toward a degree.

**Final Examinations.**

The period designated for final examinations is an important component of the academic term. It provides faculty with a final opportunity to evaluate student learning and attainment of course objectives. Faculty members are encouraged to meet with students during the final examination period.

A faculty member who gives an in-class final examination may give this examination only on the day and at the time designated in the official final examination schedule. A majority vote of the students to the contrary does not change this policy.

A student may submit a written request for a change in the scheduled time of the final examination for a limited number of documented hardship reasons. These reasons include, but are not limited to, being scheduled to take more than two examinations on the same day, illness, military obligations, and religious practices. Except for emergencies, this request should be presented directly to the instructor at least two weeks before classes conclude. If the request is denied, the student may request additional consideration from the chairperson/area coordinator/program director and, if denied, to the dean of the college sponsoring the course.

**Grading System**

The grading system available to all faculty at UMSL consists of:

<table>
<thead>
<tr>
<th>Letter Grade</th>
<th>Ranking</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.0</td>
</tr>
<tr>
<td>A-</td>
<td>3.7</td>
</tr>
<tr>
<td>B+</td>
<td>3.3</td>
</tr>
<tr>
<td>B</td>
<td>3.0</td>
</tr>
<tr>
<td>B-</td>
<td>2.7</td>
</tr>
<tr>
<td>C+</td>
<td>2.3</td>
</tr>
<tr>
<td>C</td>
<td>2.0</td>
</tr>
<tr>
<td>C-</td>
<td>1.7</td>
</tr>
<tr>
<td>D+</td>
<td>1.3</td>
</tr>
<tr>
<td>D</td>
<td>1.0</td>
</tr>
<tr>
<td>D-</td>
<td>0.7</td>
</tr>
<tr>

<tr>
<td>DL</td>
<td>Delayed</td>
</tr>
<tr>
<td>FN</td>
<td>Failure/Non Participation</td>
</tr>
</tbody>
</table>

Faculty have full discretion in using full-letter grades, plus/minus grades, or any combination of full-letter and plus/minus grades. The student's grade point average is computed by dividing the total quality points (number of credit hours for a course, multiplied by the grade value received) by the number of hours taken (excluding grade modified hours). Students at UMSL may have three separate Grade Point Averages. The first is the Campus GPA, which is computed by dividing the quality points earned from the grades of each course taken through UMSL by the total course hours attempted at UMSL. Students who have attended any of the other three universities within the University of Missouri System will also have a System GPA, which is computed by dividing the quality points earned from every course taken from a campus within the UM System. In addition, transfer students from outside the UM System will also have a transfer GPA, which is computed from all courses the student has taken outside the UMSL campus or the UM System. It is calculated by dividing the quality points of all courses by the hours attempted.

Unless a specific request is made through the Registrar's Office, the University of Missouri System does not distribute grade reports to students via postal mail. Final course grades can be obtained electronically by any of the following methods:

To access grades through the My Gateway system, students must know Single Sign On (SSO) ID and password, available through MyGateway.

Students may also view their grades on MyView, by following this path: Self Service > Student Center > Grade Tab under Academic History; select semester.

Students may request a printed copy of the grade report at no charge. Once requested, the grade report will be mailed to the official address of record. Requests may be made by mail, a University e-mail account, fax, or in person; contact information is available at the Registration website.

**Delayed Grade**

A student whose work is incomplete at the end of any semester and who has, in the instructor's judgment, sufficient reasons for failing to complete the work, may, with the approval of the instructor, be assigned a delayed grade. If an instructor does not report a grade to the registrar within one semester the grade automatically becomes F. The dean may, in unusual circumstances, extend this time limitation (summer session is not counted as a semester).

**Failure/Non participation**

When students do not complete any graded assignments but do not officially withdraw from the course or the university, instructors may assign an FN. The F for Non-Participation cannot be changed to a grade and will be treated in GPA calculations as an F.

**Satisfactory/Unsatisfactory Option**

Undergraduate students may take up to 18 credit hours on a satisfactory/unsatisfactory (S/U) grading basis. This includes courses taken as electives or those that satisfy general education requirements. Most courses required for a specific degree may not be taken on a satisfactory/unsatisfactory basis. Academic departments may designate other courses within their jurisdiction that may not be taken under the option.

A satisfactory grade “S” is recorded when an instructor assigns the grade of A, A-, B+, B-, C+, C or C-, and has no numerical value in computing students' cumulative grade point average; however, it does satisfy credit-hour-for-graduation requirements. An unsatisfactory grade “U” is recorded when an instructor assigns the grades of D+, D, D-, or F.
A course assigned a “U” grade will not satisfy credit hours for graduation. Grades will be recorded on transcripts as S or U

Students register for courses in the normal manner and may exercise the satisfactory/unsatisfactory option before the end of the first four weeks of a regular semester (or the first two weeks of a summer session). Requests for this option are made through the appropriate dean’s office. Instructors are not informed of students taking courses on a satisfactory/unsatisfactory basis until submitting course grades.

Audit
Audit has no numerical value in computing students’ cumulative grade point average, nor does it satisfy any credit-hour graduation requirements.

Grade Modification
When the grade received in an initial attempt in an undergraduate course taken at UMSL, or any University of Missouri System institution, is a C-, D+, D, D-, F, or FN, the grade may be replaced in the calculation of the GPA by the grade received in a second or subsequent attempt of the same course at UMSL. All grades received in second and subsequent attempts will be included in GPA calculations. All attempts of a given course will appear on the official transcript with the grade(s) earned. The transcript will have an explanation that states that the GPA is calculated using all grades earned in a course except the initial attempt when a course has been repeated and grade modified.

Note: Grade modification is not automatic. After completing the second or subsequent attempt of the course to be modified, students must process the necessary paperwork with an academic adviser in the academic unit in which the student is currently enrolled.

The University of Missouri-St Louis will also honor undergraduate grade modifications completed on other University of Missouri campuses and officially transferred in. This will be effective for any transcripts received on or after July 1, 2020.

Academic Renewal
Academic Renewal allows all courses, credits, and grades during specific term(s) to be excluded from the GPA calculation. The courses will remain on the permanent academic record but the record will be annotated so that it is readily evident that no credits earned during those excluded terms, even if satisfactory, will apply towards units for graduation. Students seeking their first degree who return to UMSL after an absence of at least 12 months may apply for Academic Renewal for semesters completed prior to their absence after re-admission and successful completion of 12 credit hours at a 2.0 GPA or better. Recipients of Academic Renewals are not eligible for Latin Honors or academic awards. Applications for Academic Renewal must be completed with an academic advisor and will require evidence of likelihood of future academic success to receive dean’s approval. A student may be granted Academic Renewal only once in their academic career at UMSL.

The implementation of this policy will follow the general procedures listed below. Students must apply for the renewal and demonstrate academic success in twelve credit hours before the renewal is granted.

Non-enrolled students:
1. Students not enrolled will have to discuss Academic Renewal with an academic advisor and may apply for Academic Renewal in the dean’s office of the college of students’ major or College of Arts & Science for those undeclared.
2. Students should follow normal procedures for re-admission. Students denied re-admission, but eligible for academic renewal, should discuss their case with an enrollment advisor.
3. Students may be accepted for re-admission on probationary status.
4. After earning 12 credit hours in their major or in required classes with at least a 2.0 GPA, students complete the Academic Renewal process by requesting approval of the dean or designee.

Enrolled students:
1. Continuing students may initiate the Academic Renewal process by conferring with their advisor about the impact of the process on their graduation plans.
2. Implications of Academic Renewal on financial aid should also be discussed with Financial Aid office staff.
3. Should continuing students wish to pursue the Academic Renewal process, they may apply in the dean’s office of the college of students’ major or College of Arts & Science for those undeclared.

Dean’s List
At the end of each semester the College of Arts and Sciences, College of Business Administration, College of Education, College of Fine Arts and Communication, and College of Nursing send letters of commendation to undergraduates completing at least nine hours of graded courses with grade point averages of 3.2 or above for the semester. In addition, each college and school, on an annual basis, sends letters of commendation to part-time undergraduate students who have earned a 3.2 grade point average or above in at least nine but not more than 17 graded hours during the fall and spring semesters combined.

Degree with Distinction in Research, Scholarship or Creativity in the Arts
Guidelines:
A degree with distinction in research, scholarship or creativity in the arts is an honor that recognizes a student for outstanding accomplishments in research and/or other creative endeavors. Students majoring in any undergraduate degree program that have obtained a minimum of 75 credits, have begun research, scholarship or creative endeavors of exceptional quality, have a minimum GPA of 3.5, and have a faculty mentor may apply for candidacy during their final year before graduation. Candidates must produce a novel body of work that includes publication-quality research data from which to generate a senior thesis or a body of artistic accomplishments that can be displayed and/or presented (exhibitions, recitals, software demonstrations, etc.) as part of an exhibition or performance. Candidates may use research or accomplishments obtained through Independent Research or Study courses, fellowships, internships, and voluntary work toward the degree with distinction. Candidates must present and successfully defend their body of original work, project, or senior thesis to a faculty review committee.

The faculty review committee will consist of the faculty mentor and at least two faculty members who work within a relevant field of study and are qualified to examine the candidate’s body of work. Mentors will identify at least two faculty members who are an appropriate fit and are willing to serve on the committee. These recommendations should be included on the application for candidacy. Interested students must submit an application for candidacy to their departmental chairperson or program director at least one semester before graduation, and the candidates must successfully defend or present their work no later than six weeks before
the end of the semester in which they graduate. The specific criteria for achieving this distinction will be provided by each department or program.

Students awarded the Distinction designation will have such an acknowledgment placed on their transcript and their degree and will be so recognized at graduation.

Sequence for completion:
1. Find an UMSL faculty mentor willing to guide or accommodate you through your specific creative works. For some disciplines, potential mentors may require students to enroll in independent research or independent studies courses.
2. Begin or continue your research or creative works.
3. Apply for candidacy once you have earned 75 credit hours.
4. Fulfill the requirements for your discipline’s senior thesis (if required by your discipline).
5. Maintain a GPA of 3.5 or higher.
6. Defend your thesis or body of work and submit the Preliminary Approval for the Degree with Distinction form to your College Dean no later than 6 weeks prior to commencement.
7. Graduate with a Degree With Distinction.

**Latin Honors**

To graduate with Latin honors, students must have attended UMSL for at least 56 graded hours and must meet the following qualifications based on the college in which a student’s major is housed: a GPA in the top 3% for summa cum laude; a GPA in the next top 5% for magna cum laude; a GPA in the next top 12% for cum laude. Ranking of GPAs is based on a five-year rolling average of all GPAs for the College in which the student’s major is housed. Qualifying GPAs are determined each academic year based on a five-year rolling average of all GPAs for graduates of the college in which the student’s major is housed. Specific Latin honors GPA cutoffs for each college are posted under ‘General Information’ or ‘Undergraduate Study’ in the Bulletin listing for that college. If a student has the necessary GPA at UMSL to qualify for Latin honors but has fewer than 56 graded hours at UMSL, all credit hours and the associated grades earned within the UM System will be included when the total credit hours earned in the UM System are at least 80 graded hours. In determining one’s eligibility for Latin honors, all UM System graded hours will be considered, including the original grade in each grade-modified course.

No Latin honor higher than that which is consistent with the UM System grade point average will be awarded. All honors must be recommended by the student’s major department. Students who have been found to have committed an act or acts of academic dishonesty as verified by Academic Affairs are not eligible for a Latin Honor.

Each College may add additional qualifications on the awarding of Latin Honors such as community service, capstone course completion (including approved relevant thesis), original research or scholarship, etc. Each College will submit their plans for the qualifications for Latin Honors to the appropriate shared governance body for approval before their plan becomes active.

**Office of National Scholarship Information**

The mission of the Office of National Scholarship Information (ONSI) at the University of Missouri-St Louis is to provide campus wide access to merit-based scholarship information and opportunities. The most well-known of these merit-based scholarships include the Rhodes, British Marshall, Goldwater, Udall, Truman, and Fulbright, although numerous other prestigious, and often unique, opportunities exist for outstanding students. For further information, contact the Honors College at (314) 516-5243.

**Admission**

Admission policies and procedures vary according to each applicant’s educational goals and prior educational experiences. This section contains information for First-Time Freshmen, Transfer Students, Returning UMSL Students, Visiting Students, Non-Degree Students, and UMSL Express for senior citizens. The Office of Admissions website contains links to applications for all categories of applicants.

**Admission for First-Time Freshmen**

The University of Missouri System has a uniform policy for admission of freshman students to its four campuses. The procedure for regular admission from high school is based on high school class rank, performance on a standardized college aptitude test, and required high school units.

**Application Procedures**

Students applying as first-time freshmen (i.e., students applying directly from high school) need to submit the following:

1. A completed Undergraduate Application
   - Application information available from the Office of Admissions website, by phone 314-516-5451, email admissions@umsl.edu, or in person (351 Millennium Student Center). Students may also apply using the Common Application. Search for ‘University of Missouri-St Louis’.
2. Application Fee of $35.00 ($40.00 for international students) may be paid by:
   - A check or money order made payable to UMSL
   - A credit card during the online application procedure
   - Cash, check, or credit card by appearing in person at the Office of Admissions in 351 Millennium Student Center.
3. High School Transcript and Class Rank.
   - A transcript must be sent directly from your high school to the UMSL Office of Admissions. The transcript should indicate class rank (for schools that rank), all coursework, and, when available, date of graduation. College aptitude test scores are required and may be submitted via this transcript or directly from the testing agency
   - Students from Non-Ranking High Schools:
     Students applying for Undergraduate Admission who attend high schools that do not rank will be evaluated on a combination of high school grade point average in the required core courses and standardized test scores.
4. College Aptitude Test
   - Freshman admission requires that a test score be submitted from one of the following:
     - American College Testing Program (ACT):
       The ACT is administered at many locations across the country. Information is available from http://www.actstudent.org/, or your high school counselor. The ACT School Code for UMSL is 2383.
     - Scholastic Aptitude Test (SAT):
       The SAT is administered at many locations across the country. Testing information is available on the Collegeboard website. The SAT School Code for UMSL is 6889.
When to Apply
Qualified applicants are admitted and notified by letter of their admission in the order that completed applications are received. Applications for the upcoming Fall semester are processed beginning September 1 on the basis of six or more high school semesters.

Admission Requirements
Any high school graduate may be admitted with evidence indicating he or she meets the following requirements:

At least 17 units of credit (One unit=one year in class) as follows:

- English: Four units. Two units emphasizing composition or writing skills. One of the remaining two units may be in speech or debate
- Mathematics: Four units (Algebra 1 and higher)
- Science: Three units not including general science, one of the three units must be a laboratory course
- Social Studies: Three units
- Fine Arts: One unit
- Foreign Language: Two units of a single foreign language
- Math and foreign language units may be accepted from middle/junior high school.

In addition to the 17-unit requirement, each applicant will be evaluated on high school rank and test score (ACT or SAT). Applicants with an ACT composite score of 24 or higher, SAT Total (CR+M) of 1160 or higher, will be admitted without regard to class rank.

If the ACT Composite score is between 17 to 23, SAT Total (Critical Reading and Math scores) is between 820 to 1080, or the redesigned SAT of 1160 or higher, will be admitted without regard to class rank.

In addition to the 17-unit requirement, each applicant will be evaluated on high school rank and test score (ACT or SAT). Applicants with an ACT composite score of 24 or higher, SAT Total (CR+M) of 1090 or higher, or redesigned SAT of 1160 or higher, will be admitted without regard to class rank.

Additional factors considered for admission may include:

- Completion of a rigorous college preparatory curriculum
- Evidence of hardship or unusual circumstances that hindered academic performance
- Significant work experience and/or family responsibilities
- Improvement over time in high school academic record.

Students who fall short of the admission criteria have the option to submit a letter of appeal to address one or more of the factors above. The appeal letter should be addressed to the Admissions Appeals Committee, and additional letters of support are encouraged from teachers, counselors, or principals.

For additional information regarding admission requirements, contact the Office of Admissions at 314-516-5451 or by e-mail at admissions@umsl.edu.

Acceptance
Upon graduation, applicants must submit a final high school transcript indicating their class rank (if available) and graduation date (sent directly from the high school). First-time freshmen are required to take the ALEKS placement assessment in mathematics.

Advanced Standing for Entering Freshmen
UMSL grants credit hours to entering freshmen who, through their performance on College Board Advanced Placement Tests and faculty-administered tests, demonstrate proficiency in certain college-level courses such as biology, chemistry, English, foreign languages, history, mathematics, political science, and physics. For further information and applications, contact College Board Placement AP Services by phone (888) 225-5427 or email apexams@info.collegeboard.org. The score-reporting institution code number for the University of Missouri-St. Louis is 6889. College Board will send the scores directly to the Director of Admissions.

Dual Credit
Accredited programs such as the Advanced Credit Program at the University of Missouri-St. Louis enable qualified high school juniors and seniors the opportunity to earn college credits while completing high school. Further information about the Advanced Credit Program may be obtained online or by calling 314-516-7005.

Dual High School/University Enrollment
Superior high school students may be admitted in a special student category to take one or more university courses on campus during their junior or senior years of high school or during the summers. Students must submit a dual enrollment application and a recommendation from the counselor or principal. Students are admitted on the evidence of academic excellence. Admission is limited and governed by available space, and students must meet the prerequisites for the course or courses selected.
After reviewing the Dual Enrollment website, students or counselors may contact the College of Arts and Sciences at 314-516-5501 for more information.

College Level Examination Program
Applicants may earn advanced credit through the College Level Examination Program (CLEP). CLEP offers subject examinations for credit in specific areas. These examinations can be taken any time, provided the student has not taken a college credit course in the test area. Consultation with an UMSL advisor is highly recommended before taking an exam. CLEP tests are given in the Campus Testing Center by appointment only. Contact the Campus Testing Center at 314-516-6396, in person in 93 JCP, or through their website.

Credit for Military Service
Credit may be allowed for service training programs conducted by the various Armed Forces branches. The American Council of Education’s recommendations in A Guide to the Evaluation of Educational Experiences in the Armed Services generally serve as a basis for granting such credit. To count toward a degree, the credit granted must be appropriate to the student's curriculum.

For more information, please visit http://www.umsl.edu/veterans/admissions-checklist/Military-Academic-Credit.html.

Probationary Admission
It may be possible for applicants who do not meet the regular admission standards to be admitted on a trial basis. Applicants who do not meet minimum admission requirements can submit a letter of appeal to request probationary admission. The Admission Appeals Committee reviews each letter of appeal and makes decisions on a case-by-case basis.

High School Equivalency Applicants
Individuals may seek admission on the basis of passing the High School Equivalency (HiSET) test, formerly the General Education Development (GED) test, with a minimum HiSET score of 75 and a minimum of 15 in each of the five subsets; Language Arts-Reading, Language Arts-Writing, Mathematics, Science, and Social Studies or a GED score of 170 or higher if taken after January 1, 2014 (minimum 2500 for tests taken between January 1, 2002 and January 1, 2014; minimum score of 250 required for tests taken prior to January 1, 2002).

In addition, the following must be submitted:
• A completed Undergraduate Application
• A $35 non-refundable Application Fee ($40 for international students)
• ACT composite score of at least 24 or SAT Composite of at least 1090
• A high school transcript if ACT/SAT scores are included on the transcript.

Home-Schooled Students
UMSL welcomes home-schooled students. To be admitted for undergraduate admission, home-schooled applicants must present the following:
• A completed Undergraduate Application (available online)
• A $35 non-refundable Application Fee ($40 for international students)
• ACT Composite score of 17-23 or SAT Composite of 820-1090 or redesigned SAT of 900-1150
• A copy of course of study or transcript reflecting all coursework and grades earned, as well as a statement and date of graduation or completion.

If the home-schooled applicant has not completed all units required for graduation (completion), a test-score report of the High School Equivalency (HiSET) test, formerly the General Education Development (GED) test, with a minimum HiSET score of 75 and a minimum of 15 in each of the five subsets; Language Arts-Reading, Language Arts-Writing, Mathematics, Science, and Social Studies or a GED score of 2500 (for tests taken after January 1, 2002); minimum score of 250 required for tests taken prior to January 1, 2002).

Transfer Students
A student is considered for admission as a transfer student, if they completed college credits after graduation from high school or the equivalent. UMSL awards credit in transfer for undergraduate courses completed at colleges and universities accredited by regional accrediting associations recognized by the United States Department of Education (USDE).

A transferring student who has completed fewer than 24 transferable credit hours must apply under the procedures for admission as a first-time college student with the additional requirement that they submit official transcripts from all college-level courses attempted at previous institutions that document at least a 2.3 cumulative GPA.

Students transferring from other colleges and universities with at least 24 transferable credit hours must submit the following information:
• A completed online Undergraduate Application
• A $35 non-refundable Application Fee ($40 for international students)
• Official transcripts from all colleges/universities attended.

All credentials submitted for admission become the property of the University.

Suspended and Dismissed Transfer Students
It is the practice of the Office of Admissions at the University of Missouri-St. Louis to uphold any suspension or dismissal decision offered to a student from another institution. Students suspended will be required to sit out for one year from the date of suspension before enrolling in UMSL.
In addition, students must still meet the minimum admission requirements of a 2.3 GPA. A student may need to attend another institution in order to increase his/her GPA. Students who have been dismissed from another institution may not enroll at the University.

Students who have been dismissed from a specific college or school within another institution will need to show proof that they are eligible to enroll and/or are back in good standing at the previous institution in order to enroll with UMSL.

Additionally, students who are suspended/dismissed from another UM institution shall not be admissible until after one year from the date of the suspension/dismissal. Even though a student is removed from suspension, the student must still meet the minimum admission requirements of a 2.3 GPA.

Missouri State Transfer Agreement
Although transfer students should be aware that requirements for degrees vary from institution to institution, some transferred credits may not apply to UMSL programs. UMSL has attempted to minimize the loss of credits by
adhering to the Missouri Coordinating Board of Higher Education (CBHE) Articulation Agreement. The agreement outlines statewide undergraduate general education requirements that satisfy the general requirements for students transferring into UMSL and students transferring out of UMSL to other public universities in the state.

UMSL requires mathematics and writing proficiency beyond the general requirements in the CBHE Statement. Please refer to the General Education requirements for details.

Transfer Credit

The articulation agreement among public institutions within the state of Missouri governs transfer of credit to UMSL from colleges and universities within the state of Missouri. These guidelines also apply to students transferring to UMSL from schools located outside Missouri. Advanced standing in the form of credit hours may be allowed for work satisfactorily completed in another public or private college or university of recognized standing located in the state of Missouri, as long as the work satisfies the requirements of the student’s major.

The transcript at each institution includes all courses attempted. Grades of D or better earned in college-level work at an accredited or approved institution of higher education should receive full credit when transferred to UMSL. The University, however, will treat all grades on courses attempted on the same basis as that of a UMSL student. For example, if a program requires a UMSL student to repeat a specified course having earned a D grade, a transfer student will also be required to repeat the same course if it carries a D grade.

To maximize transfer credits from community colleges, UMSL has transfer guides and articulation agreements with area colleges. Should community college students have any question about the transferability of courses not in the articulation agreement, they should contact the appropriate Admission professional, preferably prior to taking a course.

Advanced Standing

Advanced standing includes credit by examination, examination that may or may not appear on a transfer student’s transcripts, including College Board Advanced Placement (AP), the College-Level Examination Program (CLEP), International Baccalaureate (IB), and Defense Activity for Non-Traditional Education Support (DANTES). It also includes credit by portfolio review (Bachelor of Fine Arts only). These lower-division credits may not apply at the senior level. For examination credit, students should submit appropriate verification documents to the Office of Admissions before their first semester at UMSL. Students interested in the portfolio review should contact the Art Department. Early attention to these matters is essential to avoid unnecessary course work or repeats that can lead to loss of credit. If examinations are completed at a later date, verification documents should be submitted as soon as they are available.

Shortly after all official transcripts and other verifications are on file, students’ previous academic records are evaluated to determine which courses are applicable, and students receive a written report of the results. Degree checks determining whether courses meet a specific degree requirement and whether courses are accepted as a part of the student’s academic major are made in the office of the appropriate dean or advisor. Should there be any question concerning applicability of any courses, students should discuss this with that advisor.

Associate Degree Transfers from Community Colleges

A student admitted to the university and holding an associate degree (2.0 GPA or higher) applicable toward the baccalaureate degree will be accepted in junior standing. Students fulfilling the general education requirements outlined by the Missouri Coordinating Board of Higher Education and certified by the sending institution will have met the lower division general education requirements at UMSL. Students with AA degrees from Missouri institutions that include a CBHE approved general education core may transfer more than 64 credit hours for lower division courses. Any additional lower division course credits above 64 credit hours must be applicable to the baccalaureate degree or must be a prerequisite for an upper division course in the major. However, this does not exempt the student from meeting specialized lower-division degree requirements of specific departments. Courses completed in the associate degree program are evaluated for application to specific degree requirements by the same criteria used for transfer students from other colleges and universities.

Transfers within the University of Missouri System

Students must be in good standing at another campus of the University of Missouri to be eligible for admission. Students not in good standing will not be admissible until after one year from the date of the suspension-dismissal. Students must meet the minimum admission requirements of a 2.3 GPA.

Any course that leads to an undergraduate degree or fulfills a general education requirement on any campus of the University of Missouri shall be accepted in transfer toward the same degree on any campus of the university offering that degree or toward the general education requirements.

When courses transferred from the UM system have no direct equivalent at UMSL, they will be transferred as elective credits at the same level as they are numbered and count toward the 120-credit hour minimum required for graduation as long as a passing grade was received and as long as they are numbered above 1000 (or above 100 for institutions using a three-digit system). All other credit hour and residency requirements still apply. Courses transferred without a direct equivalent course at UMSL will not count toward a major, minor, or certificate unless approved by the respective department or program.

Grades, including D and F grades, and honor points earned in courses from the University of Missouri system will also transfer and will be included in the cumulative grade point averages. Unresolved problems related to transferability of credit may be appealed to the office of the appropriate dean.

Students within the last 30 hours of graduation may take a limited number of courses at another campus in the UM system, provided the last 15 hours are taken at UMSL and the work is approved by their respective dean and department.

Metropolitan Rate

All undergraduate domestic students who live in the state of Illinois will pay the equivalent to the in-state rate. Undergraduate applications from students who live in Illinois are reviewed for eligibility automatically. No additional application is required.
Graduate applicants who are residents of the state of Illinois will pay the equivalent to the in-state rate. No additional application is required.

For more information visit http://www.umsl.edu/admissions/costs/metro.html.

**Midwest Student Exchange**

The Midwest Student Exchange Program is an initiative designed by the Midwestern Higher Education Commission to increase interstate educational opportunities for students in its member states. The program enables residents of Illinois, Indiana, Kansas, Minnesota, Missouri, Ohio, Nebraska, North Dakota, and Wisconsin to enroll in the institutions and specified programs located outside their home state at reduced tuition levels. Contact Admissions for more information.

**Admission of International Students**

Prospective international students living outside the United States and students currently in the United States on a visa should contact International Admissions for information about applying to the university. Applicants will be expected to supply official original secondary and college/university transcripts from all schools attended as well as other official original documents. International students must also pay a $40 application fee. International students whose native language is not English are required to submit scores from an internationally accepted standardized English proficiency examination before a decision is made on admission. For more information and a list of accepted exams, please visit the International Admissions website.

Since 1998, all students in F-1 and J-1 status have been required to purchase an insurance policy with coverage for illness and accidents, billed to the student’s UMSL account. For details contact:

**Office of International Student and Scholar Services**

362 Social Sciences Building
One University Boulevard
St. Louis, MO 63121-4400
Phone: 314-516-5229
Email: intadmission@umsl.edu
global.umsl.edu/admissions

* Students holding F, J and M visas are not eligible for Missouri in-state tuition. As of July 30, 2017 new rules as the changes may allow students on other visa types to be considered a Missouri resident for fee purposes. Please visit the Office of the Registrar website for more information.

**Returning UMSL Students**

Students wishing to return to the University will be required to complete a returning student application and provide official transcripts from other colleges and universities attended since last enrolled as a UMSL student. Students returning must have a minimum 2.0 cumulative GPA. Students who have below a 2.0 GPA from UMSL will be required to work with the Office of Student Retention Services.

The returning student application is available on-line, in person at 351 Millennium Student Center, or by calling the Office of Admissions at 314-516-5451.

**Admission for Students Not Seeking an UMSL Degree**

**Visiting Students**

A visiting student is one who has completed at least one semester at another institution and plans to return to that college or university after attending UMSL. To qualify as a visiting student, applicants must be an actively enrolled student at another college or university. Visiting student applications are available on-line. No application fee required. Transcripts are not required for visiting students. At the end of the session, students must request that their grades be reported by transcript to their respective schools. Financial aid is not available for visiting students.

**Non-Degree-Seeking Students**

A non-degree-seeking student is someone interested in taking classes but not wanting a degree from UMSL. Often these are students who have degrees but want to take additional undergraduate classes for personal or professional development. To become a non-degree-seeking student, applicants complete the application for admission and mark ‘non-degree-seeking.’ No application fee is required.

Students wishing to become degree-seeking must meet the minimum transfer student requirements of 24 transferable, college-credit hours at a 2.3 GPA. Students may not switch from non-degree to degree-seeking after the first four weeks of the semester.

The non-degree application is available on-line, in person at 351 Millennium Student Center, or by calling 314-516-5451. Financial aid is not available for non-degree seeking students.

**UMSL Express**

UMSL Express provides Missouri’s senior citizens (65 and older) easy access to undergraduate courses without limit on an audit (not for credit) space-available basis. Graduate courses are not available through this program. Students are subject to: non-refundable $25 registration fee, a parking fee, and course-related fees. Former UMSL Express students who reapply for the program must again pay the registration fee. UMSL Express applicants may obtain a registration form on-line, in person at 269 Millennium Student Center, or by calling 314-516-5545. Students should complete and return the form with proof of age to the Office of the Registrar on the day before classes are scheduled to begin.
### 4 Year Plan of Study

By graduating in four years, students can reduce tuition costs and accelerate entry into the job market or advanced education compared to students who take longer to graduate.

To assist students in creating their own personal four-year academic plan, templates are provided for all BA, BFA, BM, BS, BSN, and BSW programs on the tabs above.

Through careful planning with an academic advisor, students can complement their undergraduate degree with minors or certificates and experiences such as study abroad, internships, and service learning.

Learning Outcomes

Learning outcomes are statements that describe the knowledge, skills, and attitudes that graduates will achieve after successfully completing a learning experience or program.

UMSL’s fundamental purpose is to educate and graduate diverse students as they seek different and better lives. Our academic programs emphasize student growth through research, internship opportunities, and one-on-one attention. Our award-winning faculty propels many of our academic programs to be ranked among the best in the nation.

This web page links you to the expected student learning outcomes for each academic program at UMSL. To see the expected learning outcomes for any academic program, select the college and then the department and program and the institutional outcomes are below.

UMSL Institutional Outcomes

Critical Thinking
Engagement, Inclusion, Innovation, Success, Trust
UMSL Graduates will integrate multiple perspectives when using reason, evidence, and context to formulate questions, increase knowledge and reason effectively and ethically.

Creative Thinking
Engagement, Inclusion, Innovation, Success
UMSL graduates will create new and worthwhile ideas, work creatively with others, and demonstrate originality and inventiveness in creative work and research.

Communication
Engagement, Inclusion, Innovation, Success
Graduates will be able to communicate effectively and engage with others constructively across contexts in oral, written, visual and electronic formats.

Diversity
Access, Engagement, Inclusion, Innovation, Success
UMSL Graduates will understand and have the ability to view individual and social behavior/society from a variety of perspectives, recognize and respect difference, and conceptualize and critically articulate the complexities of difference and experience.

Information Literacy
Engagement, Inclusion, Innovation, Success
UMSL Graduates will be able to access, critically examine, and responsibly use written, oral, visual, and numerical information to be informed citizens in the interconnected global community.

Integrative Thinking
Engagement, Inclusion, Innovation, Success, Trust
UMSL Graduates will promote community engagement or civic action to benefit the public good and integrate relevant experience, breadth of study, and focused disciplinary expertise to strengthen personal and professional growth.

Quantitative Analysis
Engagement, Inclusion, Innovation, Success
UMSL Graduates will demonstrate critical thinking and quantitative reasoning skills and the use of symbolic systems to understand aspects of the properties and relationships of relevant quantifiable concepts of academic disciplines and everyday life.

Learning Outcomes, College of Arts & Sciences

Actuarial Science
• Bachelor of Science (p. 311)

Actuarial Studies
• Undergraduate Certificate (p. 313)

Anthropology
• Bachelor of Science (p. 318)

Learning Outcomes, Pierre Laclede Honors College

• Two-Year Certificate (p. 473)
• Four-Year Certificate (p. 474)
Graduate Study

The Graduate Faculty sets Graduate School policies in the Bulletin. Students should be aware that their programs might have rules and policies that are above these minimum university-wide requirements.

Course Schedules

The Schedule of Courses contains the specific courses offered each semester with their meeting times and locations. This schedule is available online.

Course schedules are generally published in mid-March for the fall semester, mid-October for the spring semester, and mid-January for the summer semester.

The university reserves the right to cancel without notice any course listed in the Bulletin or the Schedule of Courses for any semester or to withdraw any course that does not have adequate enrollment.

Registration

Newly admitted/re-admitted students are eligible to register after the close of the pre-registration period. Enrollment dates, Semester Calendars, and courses offerings can be found online at the Registration website.

Registering for Classes: Currently Enrolled Students

Currently enrolled students are given the opportunity to preregister, by appointment, before new or returning students. Pre-registration appointment times are sent to students’ university email and can also be found by logging into MyView.

Registering for Classes: Former Students

Former UMSL students who have not been enrolled for a year must submit a reenrollment application.

Registration Cancellation

Students who have enrolled but do not wish to attend the university may cancel their registration any time before the first day of the semester. Students must complete a withdrawal survey online. Cancellations may be processed at the Office of the Registrar.

Students may withdraw from school beginning the first day of classes. The refund schedule for withdrawals after class work begins can be found on the Cashier's Office website. Students who are withdrawing must complete a withdrawal survey. Withdrawals may be processed at the Office of the Registrar.

Prerequisites for a Course

Students are expected to review all courses when registering for them to assure that they meet all prerequisites. When the prerequisites include courses, a minimum grade of B- is required to meet the prerequisite. Only the department offering the course with the prerequisite can make an exception to this requirement. A course with an 'academic standing' prerequisite—for example, 'senior standing'—requires that students have the class standing stated, in the example, only seniors can take that class.

Section Changing

Section changing is normally completed during the first week of a regular semester, the first four days of an eight-week session and the first three days of a four-week session. Approvals may not be necessary during this time. However, after the first week of a regular semester, the first four days of an eight-week session, and the first three days of a four-week session, a section change form must be obtained from the department or dean's office. The signature of both instructors is required. The form is to be submitted to the Registration Office, 269 Millennium Student Center.

Attendance

Students are expected to attend class regularly, and, in accordance with the UMSL Bylaws, faculty may establish penalties for excessive absences. Students absent for more than three successive classes may be reported to the dean. Students should tell their dean's office of an extended absence. An absence known in advance should be reported to the instructors of courses that will be missed. Makeup of examinations or work missed is allowed at the instructor's discretion. Students excused from class for valid reasons by their deans shall be permitted, if possible, to make up work missed; the dean must have notified the instructor in writing.

Auditor

Students may enroll as auditors in any course with the prior consent of the instructor and dean of the college in which the auditors desire to be registered. They may be dropped from the course when, in the judgment of the instructor and dean, their record justifies such action. Auditors are charged full fees and receive no academic credit.

Admissions

The University of Missouri-St. Louis admits qualified individuals to study for graduate degrees and certificates. Students with a bachelor's degree or the equivalent from an accredited college or university may apply for admission to the Graduate School. Applicants may be denied admission if:

1. they do not meet admission standards,
2. there are no available openings, or
3. applications are incomplete at the time of the decision.

Application procedures are described on the Graduate School's Web site. To receive graduate credit at the University of Missouri-St. Louis, students must have been admitted to the Graduate School as a Degree-seeking, Graduate Certificate, or Non-Degree seeking (or Lifelong Learner) student before registering for classes.

Degree-Seeking or Graduate Certificate Students

Applicants for a degree or graduate certificate program at the University of Missouri-St. Louis submit an application, official transcript documenting the baccalaureate degree and all other prior coursework, scores from examinations required by the program, and other evidence of academic and professional preparation required by the program. Such evidence may include standardized test results, letters of recommendation, transcripts of all academic work attempted, and writing samples.

When there are openings for new students, applicants are normally admitted given official evidence of:
1. a baccalaureate or advanced degree from an accredited institution of higher education,
2. an undergraduate grade point average (GPA) and major field GPA of at least 2.75,
3. an acceptable score on each requisite examination, and
4. satisfactory additional materials required by the particular program.

The dean of the Graduate School makes the final decision on applications, based on recommendations from the program.

Non-Degree-Seeking Student

Applicants may seek status as Non-Degree-seeking graduate students if they are visiting students, they do not intend to pursue a degree, or they want to participate in graduate workshops or institutes. Applicants must provide an official transcript showing completion of a baccalaureate or higher degree, with a GPA of at least 2.5.

The dean of the Graduate School admits Non-Degree-seeking students only upon recommendation of the program.

A Non-Degree student must maintain a GPA of at least 3.00.

Course work completed by Non-Degree students is not regarded as work toward a degree program. Therefore, Non-Degree students are not eligible for federal financial aid. Should a Non-Degree student apply for Degree-Seeking status and be admitted to the program the maximum hours of Non-Degree status work that can be applied to a degree program is nine semester hours. A Non-Degree student wishing to take more than nine hours may be allowed to do so contingent upon departmental recommendation. No credits taken as Non-Degree status may count as part of the residence requirement for a degree.

Non-Degree Education Certification students are exempt from the nine-hour limitation on non-degree courses because they take courses for State Department of Education certification. However, all other conditions regarding admission and registration that apply to Non-Degree students apply to Education Certification students.

Students wishing to change from Non-Degree to Degree-seeking must submit a new graduate application for review and approval by the program and the dean of the Graduate School.

Graduate Study for Lifelong Learning

Lifelong learners often want to take graduate courses without enrolling in a specific program. They may want to prepare for admission to a graduate degree program at UMSL or elsewhere, explore a new discipline, take courses, workshops, or institutes for career advancement, or simply undertake personal enrichment experiences. Status as a Non-Degree Graduate Lifelong Learner, or graduate post-baccalaureate, allows students such flexibility. A Non-Degree Graduate Lifelong Learner has access not only to some graduate and undergraduate classes but also UMSL’s libraries, laboratories, recreational facilities, etc.

Since graduate programs may limit the availability of their courses to students without full admission to their program, prospective Non-Degree Graduate Lifelong Learner should check the Bulletin for course prerequisites. The graduate program director in which they wish to take courses can give prospective students more information. Programs and directors are listed online.

The Non-Degree Graduate Lifelong Learner program is administered by the Graduate School, which normally seeks approval from the unit before admitting students.

If a Non-Degree Graduate Lifelong Learner is later accepted to a graduate program, up to 12 hours of credit taken as a non-degree graduate student may be applied to a graduate degree or certificate program upon approval of the faculty in that program. Again, communication with the program director is critical.

Applicants who submit a transcript documenting a baccalaureate degree or its equivalent from a U.S. university or a university in which instruction is in the English language may be admitted to UMSL as Non-Degree Graduate Lifelong Learner.

International students residing in the United States who do not satisfy the above requirement and are seeking admission as a Non-Degree Graduate Lifelong Learner must provide the transcript and the same evidence of proficiency in English as required for international graduate admissions.

Non-Degree Graduate Lifelong Learners pay graduate educational tuition and fees regardless of whether they take graduate or undergraduate courses.

Non-degree graduate students are not eligible to receive veteran’s benefits or to hold campus-sponsored assistantships. Federal financial aid may be available to some non-degree students for preparatory coursework such as teacher certification; information is available in the financial aid office.

Like all graduate students, Non-Degree Graduate Lifelong Learner must maintain a 3.0 GPA. If the cumulative GPA is less than 3.0, the student will be given one automatic probationary semester. If, after one semester of probation, the student’s cumulative GPA does not reach 3.0, the student may be granted a second probationary semester only upon approval of the Dean of the Graduate School. (Summer sessions are not counted as probationary semesters.) If the student fails to achieve a cumulative GPA of 3.0 following the second probationary semester, the student will be made ineligible to enroll as a non-degree or degree-seeking graduate student.

If at any time a student’s term or cumulative GPA falls below 2.0, the Non-Degree Graduate Lifelong Learner will be made ineligible to enroll as a non-degree or degree-seeking graduate student.

Inter-University Graduate Exchange Students

Inter-University Graduate Exchange students are Washington University and St. Louis University students who enroll on their home campus for UMSL courses not offered on their own campus.

Degree-seeking graduate students at UMSL may also participate in these programs if their advisors and the Graduate School approve their requests. Certain restrictions apply.

Unclassified Students

Students who are not qualified for admission to the Graduate School may be considered for undergraduate admission to UMSL as Unclassified Students by applying as an undergraduate non-degree student. Unclassified Students are considered Post-baccalaureate undergraduates, are not admitted to the Graduate School, may not take graduate-level courses, and do not receive graduate credit. Credits earned by an Unclassified Student may not later be considered as graduate credits should the student subsequently be admitted to the Graduate School.
Enrollment in Off-Campus and Continuing Education Courses

Students who have been admitted to the Graduate School may enroll in off-campus graduate courses without further application.

Students with a baccalaureate degree who have not been admitted to the Graduate School must be approved for admission as a Non-Degree graduate student to take Continuing Education courses for graduate credit.

Admission of International Students

International students must meet all requirements for admission to the Graduate School. In addition, international students whose native language is not English and who have spent less than two of the last three years in an English-speaking country are required to submit scores from an internationally accepted standardized examination before a decision is made on admission. International Admissions information is available from the Office of International Student and Scholar Services. Phone 314-516-5229; Fax 314-516-5636; e-mail: iss@umsl.edu.

Teaching assistantships will be awarded only to students with demonstrated oral English proficiency. Normally international teaching assistants may not teach during their first semester on campus.

When it is not possible for a student to take the required examination for reasons beyond personal convenience, the program to which the student has applied may develop alternate ways for that particular student to demonstrate English language competence prior to admission. The admitting department and Graduate School must approve such alternative metrics.

Some programs may require applicants from other countries shall to provide a course by course report from a professional evaluation organizations in the United States. All students shall provide a statement of their financial situation and of the anticipated form of support for the period of graduate study.

All students in F-1 and J-1 status are required to purchase an insurance policy with coverage for illness and accidents, billed to the student’s UMSL account. For details contact:

International Admissions
362 Social Sciences Building
One University Boulevard
St. Louis, MO 63121-4400
Phone: 1-314-516-5229
Email: intadmission@umsl.edu
http://global.umsl.edu/admissions

Students holding F, J and M visas are not eligible for Missouri in-state tuition. As of July 30, 2017 new rules as the changes may allow students on other visa types to be considered a Missouri resident for fee purposes. Please visit the Office of the Registrar website for more information.

Enrollment

Students who have been admitted to the Graduate School may enroll in classes in any term within one calendar year after admission. New students are strongly urged to seek advising before registering. If an advisor is not assigned, then the graduate director in the program should be the student's first contact in the department. A current list of graduate program directors is found on the Programs page of the Graduate School website.

To remain in good standing, most students must enroll for at least one term each calendar year. Students not meeting this enrollment requirement will become inactive and be required to reapply. Information on re-enrollment requirements is on the Graduate School Website. If students reapply and are readmitted, then they will be subject to all regulations in effect at the time of readmission.

Doctoral study is an exception to the normal enrollment requirement. After they achieve candidacy, doctoral students must enroll each fall and spring semester until the degree is completed.

International students on student visas must enroll fulltime for each fall and spring semester.

Final Semester Graduate Exam Fee

Graduate students pursuing a research-based thesis or dissertation must enroll in the semester in which they graduate, typically in research credit. If they have completed required course work, thesis, or dissertation credits, then they must enroll in the Graduate Exam. Non-thesis Master's students are not required to be enrolled in coursework or in the Graduate Exam in the semester in which they graduate if they have previously completed all required course work.

Fulltime Study

The minimal fulltime course load is nine credit hours for a regular semester and/or the eight-week summer session.

Graduate Equivalent Hours

In calculating credit hours for full-time enrollment, students may seek approval for the following semester hour equivalents:

1. Three equivalency hours for holding a 0.5 FTE Graduate Teaching Assistantship or Graduate Research Assistantship; up to two equivalency hours for appointments between 0.25 and 0.49 FTE.

2. Three equivalency hours in the semester the student is preparing for comprehensive examinations. This semester hour equivalency is allowed for a maximum of two semesters.

3. Up to eight equivalency hours for thesis master's students in their final term if (a) all required coursework is either completed or in progress and (b) they are enrolled in at least one hour of thesis research. Should the student fail to graduate, they may receive equivalency credits for one additional term with the approval of their thesis advisor, the Graduate Program Director, and the Dean. No master's student may receive thesis equivalency credits for more than two terms, including summer.

4. Eight equivalency hours after achieving candidacy. This semester-hour equivalency is allowed until the eight-year time limit has expired.

5. Participation in approved required out-of-class experiences in specific programs. Please see Procedures for a current list.

Overloads

During the regular semester, students may not enroll in more than 12 hours. Normally no more than three credit hours may be taken in any four-week period.

Heavier than normal loads may be permitted by the graduate dean, upon recommendation by the program director, for a) students whose cumulative UMSL GPA is substantially above the program average; and b) students in good academic standing for whom an overload of one
course will permit them to graduate during the term in which the overload is taken. Students are normally not allowed to take an overload in their first semester in Graduate School.

**Degree Program Plans**

It is expected that graduate students will consult regularly with their advisors to plan a course of study that ensures timely completion of the requirements.

At least one-half of the credits for master's, educational specialist, and doctoral degree plans must be from 5000-level courses and above.

Within the major department, students normally may not take a 3000-level course for graduate credit. However, outside the department, a 3000-level course may be taken for graduate credit with the approval of students' advisors. Advisors must seek approval from the instructor, who may assign additional work commensurate with graduate status.

Courses numbered from 0 to 2999 may not be taken for graduate credit. No course applied to an undergraduate degree may be allowed in that student's graduate degree.

**Credit for Courses Taken Prior to Enrolling in a Graduate Program at UMSL**

Transfer credit shall be granted only for approved graduate courses for which a grade of at least B-, or equivalent, was achieved from an accredited institution.

Degree credit may be allowed for up to three credit hours for institutes, workshops, clinics, and Continuing Education courses only if offered by an appropriately accredited institution of higher education. Only such courses that award a letter grade may be applied to a graduate degree.

Students may transfer up to 18 hours of work on a Graduate Certificate Program Plan to a Master's or Doctoral Program Plan, if the program offering the degree approves the transfer.

**Credit for Courses Taken at Other Universities After Enrolling in a Graduate Program at UMSL**

Graduate students admitted to UMSL must petition in advance to take courses at another institution and apply the credit toward a graduate degree at UMSL.

With prior approval, regularly admitted graduate students are permitted to take a course not offered by UMSL at Washington University, St. Louis University, or Southern Illinois University-Edwardsville.

**Time Limitation**

The maximum time allowed for completion of a master's or educational specialist degree is six years after the first course enrollment. Graduate work completed outside these time periods may not be included in the degree program except under extraordinary circumstances and then only after recommendation from the graduate program for approval by the dean of the Graduate School. An exception to the time limitation may be approved in advance with an authorized leave of absence.

**Leave of Absence**

Graduate students who are forced to interrupt their studies for a period of one or more years should request a leave of absence from the university. In consultation with their advisors, students shall define the program modifications that the leave of absence requires. Requests must indicate the reason for leaving and the expected date of return to the university. Approval of the dean of the Graduate School is required.

The leave of absence is designed to suspend the requirement for continuous enrollment. It does not affect the maximum time limitation set for a degree program unless a specific exception is approved.

**Undergraduate Enrollment in 5000-Level Courses**

Under special circumstances undergraduate students in good standing at UMSL may enroll in 5000-level courses for undergraduate credit. Approvals from the advisor, department chairperson, academic dean, and dean of the Graduate School are required. In rare cases, students subsequently admitted to the Graduate School may petition for graduate credit for 5000-level courses that they took as undergraduates, as long as those courses were not applied to their undergraduate degrees.

**Dual Enrollment for Senior Undergraduates**

With the approval of the divisional and graduate deans, seniors who have a 3.0 cumulative g.p.a. and are within 15 hours of completing graduation requirements for the first bachelor's degree may dually enroll as an undergraduate and a non-degree graduate student and earn up to six semester hours of graduate credit. For students in education, the 15 hours to complete graduation requirements do not include the hours required to complete undergraduate student teaching.

Courses taken while dually enrolled may not be counted for both undergraduate and graduate degree requirements. Consult with divisional deans for additional requirements. 2+3 students are not eligible for dual enrollment.

**Preregistration**

Enrolled students may preregister for the next term during regular preregistration periods. Registration is not complete until all university fees are paid.

**Petitioning Into or Out of a Course**

Students must receive the approval of their adviser and the course instructor to enroll in or withdraw from a course after registration.

**Entering a Course in Progress**

Students wishing to enter a course in progress must have the approval of the instructor and their adviser. Only under exceptional circumstances may students enter courses after the first week of the semester.

**Dropping a Course**

Courses may be dropped in MyView, without faculty approval and without receiving a grade, through the fourth week of classes of a sixteen-week
semester, the second week of classes of an eight-week session and
the first week of classes of a four-week session. Students with specific
academic holds may be required to obtain approval from their advisor
to change their schedule. Semester and session calendars posted
on the registrar’s website include specific deadline dates for dropping
courses. Students who officially drop any of their classes may have fees
reassessed and/or refunded based on the current fee reassessment
schedule posted on the cashier’s website. Courses dropped during this
period will not appear on transcripts.

From the 5th week to the end of the 8th week of a sixteen-week semester,
students may continue to drop courses in MyView without instructor
approval. A grade of “EX” (excused) will be issued on the transcript. Refer
to the calendar posted on the registrar’s website for summer or winter
session withdrawal deadlines. From the 9th week to the end of the 12th
week dropping courses will require instructor approval. Students receiving
approval to drop during this period will be issued either an EX, or “EX-
F” (excused but failing) if the student was failing at the time of dropping.
The EX and EX-F grades will be posted to transcripts, but neither one will
be used in calculating the GPA. Students who wish to withdraw after the
end of the 12th week must provide documentation of exigent circumstance
and receive both the instructor’s permission and approval of the dean.

Dropping or withdrawing from a course may adversely impact
scholarships, financial aid, and progress toward graduation. Students are
strongly urged to discuss these possibilities with the financial aid office and
their academic advisors before dropping or withdrawing.

Students registered in a course in which they fail to meet a minimal
level of participation as deemed by the instructor will be issued a grade
of “FN” (Failure, Non-participation). The FN grade indicates that the
student is not regularly attending class or is making little or no attempts
on assignments or activities and may be violating the terms of financial
assistance. This grade is equivalent to an F for GPA calculations.

Transcripts
The registrar will furnish transcripts of credits to a student upon written
request. Transcripts are furnished to students’ parents or guardians or
other parties or institutions only if students have filed written consent with
the registrar. There is a charge per transcript. UMSL students or alumni
transferring to another University of Missouri campus may ask the UMSL
Director of Admissions to furnish a transcript to the appropriate Office of
Graduate Admissions.

Requests for transcripts by organizations either financially supporting a
student or with fee compensation programs are not honored unless the student has filed a consent form with the registrar, authorizing the release
of such records.

Transcripts are not issued to or for students who have financial obligations
to the university until those obligations are paid in full.

Probation
Failure to make adequate progress jeopardizes students’ potential to
complete the degree as well as their financial aid. To provide students
notice of inadequate progress at the end of each semester, graduate
students with a cumulative GPA below 3.0 will be placed on probation.
A program may also place a student on probation if faculty regard the
student’s progress as unsatisfactory. The Graduate School will inform
students of their probation, with copies sent to the graduate director of the
program, the Graduate Admissions Office, and the Financial Aid Office.

If at the end of the probationary semester the cumulative GPA is at least
3.0 and the student is making adequate progress toward the degree, then
the probationary status is removed.

Dismissal
Upon recommendation of the program director, the Graduate School may
dismiss any graduate student who does not make adequate progress.
A student who is on probation for more than two semesters during his/her program of study will be dismissed, unless the dean of the Graduate
School approves an exception request for continuation from the program
director. The Graduate School is responsible for notifying students,
with copies sent to the graduate director of the program, the Graduate

Course Policies
Course Numbering
Each course bears a distinguishing number that identifies it within the
department or academic unit and indicates, broadly, the expected level of
students taking the course. To understand the course level, refer to the
following guidelines:

Course Numbers
Explanation
1-999
Courses that do not count toward the minimum requirements for any
degree.

Lower Division:
1000-1999
Courses open to undergraduate students, primarily focused toward
freshmen; courses count toward the minimum for given degrees.

2000-2999
Courses open to undergraduate students, primarily focused toward
sophomores; courses count toward the minimum for given degrees

Upper Division:
3000-3999
Courses open to undergraduate students, primarily focused toward junior;
courses count toward the minimum for given degrees.

4000-4999
Courses open to undergraduate and graduate students, primarily
focused toward seniors; courses count toward the minimum for given
undergraduate degrees; depending on the specific program, courses may
count for a given graduate degree.

Graduate:
5000-5999
Graduate courses; also open to post-baccalaureate educator certification
candidates and undergraduate seniors with permission from the Dean
of the Graduate School. Courses count toward the minimum for given
graduate degrees.
Graduate courses open to master’s degree and doctoral students. Courses count toward the minimum for given graduate degrees.

Graduate courses open to doctoral students and master’s degree students with special permission. Courses count toward the minimum for specific graduate degrees.

Optometry:

Courses open to optometry degree seeking students.

Credit Hours

The university credit unit is the semester hour, which represents a subject pursued one period weekly for one semester of approximately 16 weeks or for a total of approximately 16 periods for one term. Generally, a course valued at three semester hours meets for three periods weekly for one semester, a twocredit course two periods a week for a semester, and so on. Normally, the lecture or recitation period is 50 minutes long and the laboratory period one hour and 50 minutes.

The number of credit hours is listed as units in the online Schedule of Courses. If the credit is variable (to be determined in consultation with the instructor) it is shown by minimum and maximum units, such as Research 1 – 3 units. In the Bulletin, credit hours are included in parentheses after each course title e.g., Research (2-8).

Examinations

Examinations may be given only at regular class meeting times or as designated by the Senate Committee on Curriculum and Instruction.

Final Examinations.

The period designated for final examinations is an important component of the academic term. It provides faculty with a final opportunity to evaluate student learning and attainment of course objectives. Faculty members are encouraged to meet with students during the final examination period.

A faculty member who gives an in-class final examination may give this examination only on the day and at the time designated in the official final examination schedule. A majority vote of the students to the contrary does not change this policy.

A student may submit a written request for a change in the scheduled time of the final examination for a limited number of documented hardship reasons. These reasons include, but are not limited to, being scheduled to take more than two examinations on the same day, illness, military obligations, and religious practices. Except for emergencies, this request should be presented directly to the instructor at least two weeks before classes conclude. If the request is denied, the student may request additional consideration from the chairperson/area coordinator/program director and, if denied, to the dean of the college sponsoring the course.

Repeating Courses.

Students may not repeat for grade point average or credit hour purposes courses in which grades of A, A--, B+, B, B--, C+, or C have been earned. Subsequent grades in such a course that is repeated will not be included in the GPA calculations. The course hours will be counted only once in calculating hours toward a degree.

Academic Policies

Grades

Faculty teaching graduate courses have complete discretion in assigning grades.

Point assignments for grades are as follows:

- A = 4.0
- A- = 3.7
- B+ = 3.3
- B = 3.0
- B- = 2.7
- C+ = 2.3
- C = 2.0
- C- = 1.7
- F = 0
- FN = 0
- EX = Excused
- F-EX = Excused but failing
- DL = Delayed
- S/U = A or B equivalent

The satisfactory/unsatisfactory (S/U) option is not normally available in courses for graduate credit. S/U grades may be given only for internship, practica, project, and research courses as requested by a school or college, with prior approval from the Graduate Council. Courses on the S/U grading system will carry no points toward calculation of the grade point average. A Satisfactory grade is defined as a grade of at least B-.

Students who stop attending classes without officially dropping courses receive grades of F or FN, depending on the amount of work completed. Students may enter courses as auditors but may not change from audit to credit or credit to audit after the first week of class. Auditors are charged full fees and receive no academic credit.

Delayed Grades

Delayed grades may be given when a student's work is of passing quality but is incomplete because of circumstances beyond the student's control. Delayed grades must be removed within two regular semesters (excluding summer) after the time recorded or they automatically become F grades. In such cases, course instructors may subsequently change F grades to other grades when all work has been completed. A student may not graduate with any delayed grades on their transcript except in research courses required for a subsequent degree.

Failure/Non participation

When students do not complete any graded assignments but do not officially withdraw from the course or the university, instructors may assign an FN. The F for Non-Participation cannot be changed to a grade and will be treated in GPA calculations as an F.
Graduate Grade Appeals

In case of disputes regarding grades, graduate students shall follow the university Grade Appeal Process by first contacting the Department Chair. The policy is available on the Academic Affairs' Website.

Grade Point Average (GPA)

UMSL calculates three types of GPA. At the end of each semester, the Term GPA is calculated on the courses attempted that semester. The Cumulative GPA on the transcript comprises all courses taken at UMSL for graduate credit, including courses that may not be a part of the degree program or certificate. The degree program or certificate GPA includes only the grades of those used to meet degree/certificate requirements for that program. The cumulative and degree or certificate program GPA must be at least 3.0 for a student to receive a graduate degree or certificate.

Any course work transferred from other universities, including other UM campuses, will not be included in any GPA calculation.

Course Replacement

A student who fails to earn a cumulative GPA of 3.0 may request a recalculation of the cumulative GPA by substituting additional appropriate course work for courses in which a 3.0 was not earned. A maximum of two courses may be replaced during the entire graduate career at the University of Missouri-St. Louis, and all courses and grades remain on the student’s record. The dean may approve the substitution if recommended by the graduate director of the student’s program.

Once a student has completed a master’s degree or certificate of advanced study, a final average for that degree or certificate is computed and cannot be modified. For that reason, courses for any graduate degree or certificate awarded may not be repeated, and no final GPA is affected by any subsequent coursework completed at UMSL.

Repeating courses may affect financial aid; applicants for Course Replacement are advised to contact the Financial Aid Office prior to applying for the replacement.

Course Replacement is not available for admission considerations or during a probationary or restricted admission period.

Master's Degree Requirements

Admission

Faculty in each master’s degree program determine any eligibility standards beyond the minimum for admission to the Graduate School.

Enrollment

All master's degree students shall be enrolled for credit for access to university resources, including advisement, data gathering, or examinations.

Full-time status for all graduate students is defined as at least nine credit hours of course work. Individual programs may require higher enrollments.

Credit Requirements

A minimum of 30 semester hours of graduate credit is required for all master’s degree programs. Specific programs may require a greater number of hours.

Residence Requirement

The final two-thirds of the courses in a master's degree program must be completed at UMSL.

Time Limitation

All courses included in a master's degree program, whether taken at UMSL or at another institution, shall have been completed within six years after enrollment in the first course.

Credit From a Certificate Program

Students who have completed course credits in certificate programs may transfer those credits into a master's degree program with the program's consent, as long as the credits fall within the time limitation set for master's degrees. If the master's degree is in a different program from that awarding the certificate, then no more than one-third of the credits from the certificate program may apply to the master’s degree. Multi-disciplinary programs may seek programmatic exceptions to this limit when the program undergoes the approval process.

2+3 Programs

Students who are granted Formal Admission to a recognized 2+3 program at UMSL are admitted to the Graduate School prior to the completion of their UMSL undergraduate program. These students must complete all the normal requirements for their Master’s degree. All the coursework used to satisfy the requirements for the Master’s degree must be taken while in graduate status.

Provisional 2+3 students who are still undergraduates can petition to take up to 6 hrs of 4000/5000/6000 level courses for graduate credit, and these credits may be used to satisfy Master’s degree requirements. The petition must be filed at the beginning of the term. Students may not petition retroactively to use courses already completed as an undergraduate to meet the requirements of the Master’s degree.

The number of graduate credit hours that may be applied to the undergraduate degree of a 2+3 student shall be determined by the undergraduate department.

The bachelors and master's degrees must be awarded simultaneously at the end of the 2+3 program. Graduate students who formally withdraw from the 2+3 program may apply for their Bachelor’s degree. However, the advantage of dual credit is forfeited. No course applied to the Bachelor’s degree may be included in any future graduate degree program.

Dual Master's Degrees

With approval of the program and the Graduate School, students who have completed one master’s degree may transfer appropriate credits to a second master’s degree program. The number of transferable credits may not exceed one-third of the credit hours required by the second program. Subsequent transfers of the same courses to a third degree are not permitted.

With approval of the programs involved and the Graduate School, students may simultaneously pursue two master's degrees under the following conditions:

1. No more than one-third of the credit hours required by either program may be applied to both programs;
2. Students must obtain approval of both programs before completing 12
   hours in either program.

Multi-disciplinary programs may seek programmatic exceptions to the
one-third limit when the program undergoes the approval process by
addressing specific allowable transfers between those two degree
programs.

**Master's Degree for Doctoral Students**

Doctoral students may receive a master's degree in their program for
work they have completed toward to a doctoral degree. The program
establishes the requirements for such a master's degree. However, the
requirements should, in principle, be similar to those for master's degrees
offered by the program.

Doctoral and educational specialist students may also receive a master's
degree for work they have completed toward to a doctoral or Ed.S. degree
in another program provided:

1. they apply no more than two-thirds of the master's degree courses to
   their doctoral degree program;
2. they have been admitted to the master's degree program; and
3. they have obtained the approval of the advisors from both programs
   and from the Graduate School.

Credit from the master's degree must constitute less than half the total
credits required for the doctorate.

Multi-disciplinary programs may seek programmatic exceptions to these
limits when the program undergoes the approval process.

**The Master's Degree Program**

Master's degree students must meet with an advisor within the first
semester of the program to design a program plan that meets program
requirements and the students' interests.

To receive the master's degree, students who have met all degree
requirements shall apply for graduation by filing an M-4 Graduation
Application, which will include the student's Degree Program, no later than
the graduation deadline in the semester in which they plan to graduate.

**Comprehensive Examination, Scholarly Paper, or Exit Project**

Each unit requiring a comprehensive examination for the master's degree
informs the Graduate School of (a) the number of times the unit will allow
its students to take a comprehensive examination, and (b) the period of
time that the unit will allow between the first and final attempt to pass the
examination.

Units recommend Graduate Faculty members to serve on committees for
capstone projects. The Graduate Dean shall review and may appoint the
committee.

Graduate Program Directors recommend at least two Graduate Faculty
members to serve on committees for capstone projects and examinations.
The Graduate Dean shall review and appoint the committee.

Programs that offer alternatives or requirements for capstone projects or
examinations are expected to post procedures that have been approved
by the department. Graduate program directors shall inform the Graduate
School when the department initiates or changes their procedures.

The chairperson of the capstone committee is responsible for verifying
that the final project or examination is acceptable to the committee and
the Graduate Dean by submitting current Graduate School forms for
documenting those approvals. It is the responsibility of the committee
chair to grade the project/examination.

**Master's Thesis**

The Master's Thesis Committee shall consist of at least three members
of the Graduate Faculty who can contribute their expertise to the thesis
study. The committee chair and at least one other member shall be faculty
in the department offering the degree. The Graduate Dean shall review
and approve the committee membership and any changes in membership.

The thesis must be written on a subject approved by the candidate's thesis
committee and must be the candidate's own work. The reuse of text from
previous papers authored or co-authored by the student shall be evaluated
by the committee prior to the thesis defense. In the thesis, the student
must clearly and explicitly identify all reused text and the original source(s)
of that text. If the source documents involve co-authors other than the
student and the faculty advisor, the thesis must include a description of the
individual contributions of each co-author of the original study. A copy of
the source documents must be provided to thesis committee members and
the Graduate School. Departments may choose to adopt a uniform policy
on the acceptability of reused text for a specific degree program.

Regardless of the extent of any reuse of text, the thesis must maintain a
uniform and consistent formatting style throughout. In matters of style and
documentation, the custom of the discipline shall be followed. The student
must document permission to reuse any copyrighted material.

The final defense of the thesis is normally open to the public unless the
thesis chair requests that the dean of the Graduate School permit a
closed meeting on the basis of an embargoed study. Deliberations among
committee members may be closed at the discretion of the chair. After
deliberating on the defense of the thesis, the Master's Thesis Committee
shall vote on whether the defense was successful. The defense shall be
deemed unsuccessful if there are two negative votes, even if outnumbered
by positive votes. An abstention will be considered a negative vote. A
student failing the defense shall have the opportunity for one additional
presentation before the same committee. The Master's Thesis Committee
shall determine the timing and format of the subsequent defense. The
Master's Thesis Committee makes the final decision on the defense,
whether pass or fail, and reports the results to the Graduate Program
Director, who informs the Graduate School no later than two days after the
defense.

Master's degree students shall disseminate the thesis according to
current Graduate School procedures. The final copy of the thesis must
be typed according to current Graduate School requirements. To be
accepted by the Graduate School, the copy must be legible, neat, and
paginated correctly. An abstract is required. Students must submit to
the dean of the Graduate School one copy of the thesis by the posted
university deadline, normally six weeks before the end of the term in
which graduation is sought. The chairperson of the thesis committee is
responsible for verifying that the final draft of the thesis is acceptable
to the thesis committee and the Graduate Dean by following current
Graduate School procedures for documenting those approvals. The chair
of the thesis committee shall determine the grade for the thesis.
Educational Specialist Degree Requirements

Admission
Each educational specialist degree program shall determine any eligibility standards beyond the minimum for admission to Graduate School.

Enrollment
All educational specialist degree students shall be enrolled for credit for access to university resources, including advisement, data gathering, or examinations.

Credit Requirements
A minimum of 60 semester hours of graduate credit is required for all educational specialist degree programs. Individual programs may require a greater number of hours.

Residence Requirement
Normally, at least one half of the courses in an educational specialist degree program must be completed at UMSL.

Time Limitation
All courses included in an educational specialist degree program, whether taken at UMSL or at another institution, shall have been completed within six years after enrollment in the first course.

When educational specialist students have earned a master's degree at any institution, appropriate credits may be applied toward meeting the requirement for the specialist degree, subject to program approval. Such credits shall constitute less than half of the total credits required for the educational specialist degree. Credit for courses taken for a master's degree is exempt from the six-year time limitation.

Filing the Degree Program Plan
An educational specialist degree student enrolled shall file an approved program plan with the Graduate School. The S-4 must be filed by the posted deadline of the final semester in the program. Students may petition the dean of the Graduate School to change the degree program after it has been filed.

Comprehensive Examination, Scholarly Paper, or Exit Project
Each program requiring a comprehensive examination for the specialist degree informs the Graduate School of:

1. the number of times the program will allow its students to take a comprehensive examination, and
2. the period of time that the program will allow between the first and final attempt to pass the examination.

Programs recommend Graduate Faculty members to serve on committees for capstone projects. The graduate dean shall review and may appoint the committee.

Doctoral Degree Requirements

Admission
Each doctoral degree program may determine eligibility standards beyond the minimum for admission to the Graduate School.

Credit Requirements
A minimum of 60 semester hours of graduate credit is required in every doctoral degree program. Programs may require a greater number of hours for their programs, and individual students may be required to take additional hours.

Enrollment
Full-time status is defined as nine credit hours per semester. Programs may require higher enrollments than this. After students achieve candidacy and complete the residence requirement, they must remain enrolled during fall and spring semesters until they complete the degree. Failure to register in any regular semester will result in termination from the Graduate School. If students so terminated decide to reapply and if they are readmitted, then they will be subject to all regulations in effect at the time of readmission, and will be required to enroll for at least one credit hour for each semester since their last enrollment.

When doctoral students are enrolled for research credit, the credit amount may vary, but the student must register for all work required, and the credit total may exceed the minimum requirements.

Classification of Doctoral Students
There are two stages in doctoral degree work:

• A pre-candidate is a student who has requirements to fulfill in addition to the dissertation, including course work, and/or comprehensive examinations.
• A candidate is a student who has met all degree requirements except the completion of the dissertation.

Time Limitation
The maximum amount of time allowed for completion of a doctoral degree is eight years after the first course enrollment.

The maximum of 12 hours of graduate credit completed as a post-master's degree student prior to admission to a doctoral program may apply toward a doctoral degree. Inclusion of such course work is subject to program approval and must have been completed within eight years of the time the doctoral degree is awarded. Exceptions to this regulation must be justified.
on academically defensible grounds and approved by the graduate dean prior to filing the program plan.

When doctoral students have earned a master's degree at any institution, appropriate credits may be applied toward meeting the requirement for the doctoral degree, subject to program approval. Such credits shall constitute less than half of the total credits required for the doctorate. For example, for a doctoral degree requiring 90 hours of work beyond the bachelor's degree, no more than 44 credits from a master's degree may apply to the doctoral degree. Credit for courses taken for a master's degree is exempt from the doctoral program's eight-year time limitation.

**Residence Requirement**
The majority of credits used to satisfy requirements for a doctoral degree must be completed at UMSL. The residence requirement may be satisfied with dissertation credit hours, graduate institutes, and credit courses taken through Continuing Education, as well as regular courses.

Students who enter the Ed.D. or Ph.D. in Education degree programs with an Education Specialist (Ed.S.) degree from an accredited university, or with an Advanced Certificate approved by the Missouri Department of Elementary and Secondary Education, may satisfy the residence requirement by completing one-third of the required credits at UMSL.

Residency normally requires that doctoral students successfully complete a minimum of 15 hours over two consecutive terms, which may include summer. The dean of the Graduate School may grant exceptions upon recommendation by the program.

**Comprehensive Examinations**
Each program will determine the number of times a comprehensive examination may be taken by a student. The department or college must file with the Graduate School a statement specifying:

1. the number of times the program will allow its students to take a comprehensive examination, and
2. the maximum and/or minimum period of time the program will allow between the first and final attempt to pass the comprehensive examination.

The Comprehensive Examination Committee consists of no fewer than three members of the UMSL graduate faculty appointed by the graduate dean upon recommendation of the program.

An oral examination may not substitute for the standard written portion.

**Advisors**
Upon entering the program, each doctoral student will have an assigned program advisor who is a member of the Graduate Faculty [D2]. As early as possible in a doctoral student's program, but no later than when the student achieves candidacy, the program will recommend, in consultation with the student, a doctoral dissertation advisor.

**Application for Candidacy**
Doctoral students may apply for candidacy [D3] after passing all required comprehensive and language examinations, written or oral, and successfully completing all course work. The program director approves the application and forwards it to the dean of the Graduate School for final approval.

**Doctoral Dissertation Committee**
The Doctoral Dissertation Committee shall consist of at least four members of the Graduate Faculty who can contribute their expertise to the dissertation study. The committee chair and at least one other member of the committee must be faculty in the Department offering the degree. A recognized scholar from outside the university may serve as a member upon the recommendation of the unit and approval of the Graduate Dean, but the external scholar may not chair the committee. The Graduate Dean shall approve the committee membership and changes in the committee membership [D4].

**Doctoral Dissertation**
All doctoral degrees require a dissertation as a final component of the program. The dissertation must be written on a subject approved by the candidate's doctoral dissertation committee, must embody the results of original and significant research and must be the candidate's own work.

**Text Reuse**
The reuse of text will be evaluated by the members of the faculty committee that approves the document. Each committee member, as part of the decision to approve or disapprove the document, will decide whether the reuse presented in the document is acceptable. Departments may choose to adopt a uniform policy on the acceptability of reused text for a specific degree program. In the document, the student must clearly and explicitly identify all reused text and the original source(s) of that text. A copy of the source documents must be provided to the committee members and the Graduate School. Reuse is strictly limited to text from papers authored or co-authored by the student. The student must document permission to reuse any copyrighted material. If the source documents involve co-authors other than the student and the faculty advisor, the document must include a description of the individual contributions of each co-author of the original study. Regardless of the extent of any reuse of text, the dissertation must maintain a uniform and consistent formatting style throughout.

**Dissertation Proposal**
Before a student may conduct substantial research for the dissertation the committee must approve a proposal after a formal defense. The student submits the approved proposal for review and approval by the dean of the Graduate School [D5].

An approved dissertation proposal in no way implies a contract between the university and the student. Depending on the outcome of the research, the dissertation may require substantially more work than anticipated when the proposal was approved. The termination of a line of research and the adoption of a substantially new dissertation project requires the preparation, formal defense, and acceptance by the Graduate School of a new dissertation proposal.

**Preliminary Approval**
One copy of the dissertation, certified as complete and provisionally acceptable to the committee, shall be submitted to the graduate dean at least six weeks prior to commencement - [D6] and [D9]. The Dean of the Graduate School may seek advice and make suggestions to the committee about content and style before approving the dissertation.

**Defense of Dissertation**
Normally the approved Doctoral Dissertation Committee serves as the Oral Defense of Dissertation Committee. The graduate dean may appoint one additional qualified voting member to the Defense of Dissertation
Committee from the Graduate Faculty within the University of Missouri System.

After deliberating on the oral defense of the dissertation, the Defense of Dissertation Committee votes on whether the defense was successful. The defense shall be deemed unsuccessful if there are two negative votes, even if outnumbered by positive votes. An abstention will be considered a negative vote. A student failing an oral defense shall have the opportunity for one additional defense before the same committee. The Defense of Dissertation Committee shall determine the timing and format of the subsequent defense.

Final examinations are open to the public. The decision of the Defense of Dissertation Committee is final. The report of the final examination is due to the Graduate School no later than two days after the examination.

Dissertation Abstracts
Two different abstracts are required. The publishing company requires an abstract of a maximum of 350 words that is published with the announcement of the dissertation defense. The abstract forming the second page of the dissertation should be no more than 600 words.

Dissertation Format
Original copies of the dissertation must be typed on good quality paper, and they must be legible and neat in order to be accepted by the Graduate School. Only high quality copies are acceptable with the following margins throughout: left margin, 1 1/2 inches; top, bottom, and right margins, 1 inch.

In matter of style and documentation, the custom of the discipline shall be followed.

Official Copies of Dissertation
The chairperson of the dissertation committee is responsible for verifying that all the changes suggested by the graduate dean and the dissertation committee have been incorporated in the final draft of the dissertation or have been discussed further with the graduate dean or the committee.

Students disseminate the dissertation according to current Graduate School procedures.

Professional Doctorates
At the University of Missouri-St. Louis, professional doctoral degrees are rigorous and practice oriented. Professional doctorate students’ academic work focuses on scholarly responses to societal needs within professional contexts. Faculty advisors in professional doctorate programs may be scholar-practitioners who are approved as Professional/Special Appointment Graduate Faculty as well as regular UMSL Graduate Faculty. Both types of graduate faculty may assume all graduate faculty roles throughout the professional doctoral program.

Admission to the Professional Doctorate
Each professional doctoral degree program may determine eligibility standards beyond the minimum for admission to the Graduate School with the exception that professional doctoral programs may admit exceptional undergraduate students before their baccalaureate is awarded.

Professional Doctorate Credit Requirements
Each professional doctoral degree program may determine the minimum hours of graduate credit required for the degree program based on professional and/or accreditation/licensing standards.

Professional Doctorate Enrollment
Full-time status is defined as nine credit hours per semester. Units may require higher enrollments than this.

After students achieve candidacy and complete the residence requirement, they must remain enrolled during fall and spring semesters until the degree is completed. Failure to register in any regular semester will normally result in termination from the Graduate School. If students so terminated decide to reapply, and if they are readmitted, they will be subject to all regulations in effect at the time of readmission and will be required to enroll for at least one credit hour in each semester since their last enrollment.

When professional doctoral students are enrolled for capstone credit, the credit amount may vary, but the student must register for all work required, and the credit total may exceed the minimum requirements.

Classification of Doctoral Students
There are two stages in a student’s doctoral degree work:

1. A pre-candidate is a student who has requirements to fulfill in addition to the capstone project, including course work, clinical experiences, and/or threshold examinations.

2. A candidate is a student who has met all degree requirements except the completion of the capstone project and any clinical or fieldwork required as a part of the capstone project.

Professional Doctorate Time Limitation
The maximum amount of time allowed to complete a doctoral degree is eight years after enrollment in the first course. Professional doctoral students who enter with any previous graduate degree or certificate may apply appropriate credits toward the professional doctoral degree, subject to program approval. Credit for courses taken for an advanced degree or post-master’s graduate certificate is exempt from the eight-year time limit.

Professional Doctorate Residency Requirement
Residency normally requires that doctoral students successfully complete a minimum of 15 hours at UMSL over three consecutive terms, which may include summer. The Dean of the Graduate School may grant exceptions upon recommendation by the program.

Students who enter the EdD degree program with an Education Specialist (Ed.S.) degree from an accredited university, or with an Advanced Certificate approved by the Missouri Department of Elementary and Secondary Education, may satisfy the residency requirement by completing one-third of the required credits at UMSL.

Students who enter the DNP degree programs with an MSN degree from an accredited university may satisfy the residency requirement by completing 33 graduate credits in Nursing as part of the DNP degree.

Residency normally requires that doctoral students successfully complete a minimum of 15 hours over three consecutive terms, which may include summer. The Dean of the Graduate School may grant exceptions upon recommendation by the program.

Professional Doctorate Threshold Examinations
Each program will determine the type of comprehensive, qualifying, or other threshold examination that is appropriate for the discipline.
Units also specify the number of times a student may take a threshold examination and the maximum and/or minimum period of time allowed between the first and final attempt to pass the examination. The program must file information about the requirements with the Graduate School. An oral examination may not substitute for the standard written portion.

The Examination Committee will consist of no fewer than three members of the Graduate Faculty, including Professional/Special Appointment Graduate Faculty appointed by the Graduate Dean upon recommendation by the unit.

Advisors for the Professional Doctorate

Upon entering the program, each doctoral student shall have an assigned advisor who is a member of the Graduate Faculty, including Professional/Special Appointment Graduate Faculty. As early as possible in a doctoral student's program, but no later than when the student achieves candidacy, the unit shall recommend, in consultation with the student, an advisor for the capstone project.

Application for Candidacy

Doctoral students may apply for candidacy after passing all threshold requirements and successfully completing all course work.

Committee for the Capstone Project

The Committee for the Capstone Project shall consist of at least three members of the Graduate Faculty, including Professional/Special Appointment Graduate Faculty, who can contribute their expertise to the study. A recognized practitioner from outside the university may serve as one of those members upon the recommendation of the unit and approval of the Graduate Dean, but the external member may not chair the committee. The Graduate Dean shall approve the committee membership and changes in committee membership upon recommendation from the program. Duties of Members. All members of the Committee for the Capstone Project are involved intimately and participate actively in the activities of the doctoral student at all the stages of the student's career at UMSL, except, perhaps, the threshold examination. This committee normally also serves as the Oral Defense Committee.

Capstone Project

At the University of Missouri-St. Louis, all professional doctoral degrees require a capstone project. The project must address a subject approved by the candidate's committee; have a significant grounding in clinical, translational, or engaged scholarship; and be the candidate's own work. Programs may permit collaborative capstone projects, but students must be able to document their original contributions to collaborative projects.

Programs must submit to the Graduate School and make available for students information about the capstone project (e.g., scholarly paper, dissertation-in-practice, etc.) and all requirements expected for the project to be judged successful.

Text Reuse: The reuse of text will be evaluated by the members of the faculty committee that approves the document. Each committee member, as part of the decision to approve or disapprove the document, will decide whether the reuse presented in the document is acceptable. Departments may choose to adopt a uniform policy on the acceptability of reused text for a specific degree program. In the document, the student must clearly and explicitly identify all reused text and the original source(s) of that text. A copy of the source documents must be provided to the committee members and the Graduate School. Reuse is strictly limited to text from papers authored or co-authored by the student. The student must document permission to reuse any copyrighted material. If the source documents involve co-authors other than the student and the faculty advisor, the document must include a description of the individual contributions of each coauthor of the original study. Regardless of the extent of any reuse of text, the dissertation must maintain a uniform and consistent formatting style throughout.

Professional Doctorate Capstone Project Proposal

Before students may begin substantial work on the capstone project, the committee must have approved a proposal after a formal defense. To schedule the defense, students must have approval from appropriate compliance committees (e.g., Human Subjects, etc.). Students submit the approved proposal to the Graduate School for review and approval by the Dean of the Graduate School.

An approved proposal does not imply a contract between the university and the student. For example, the project may require substantially more work than anticipated when the proposal was approved. The termination of a line of inquiry and the adoption of a substantially new capstone project requires the preparation, formal defense, and acceptance by the Graduate School of a new proposal.

Preliminary Approval of the Capstone Project

One copy of the final capstone project, certified as complete and provisionally acceptable to the committee, shall be submitted to the Graduate Dean at least six weeks prior to commencement. The Dean of the Graduate School may seek advice and make suggestions to the committee about content and style before approving the project.

Oral Defense of the Capstone Project

After deliberating on the oral defense of the project, the Committee for the Capstone Project votes on whether the defense was successful. The defense shall be deemed unsuccessful if there are two negative votes, even if outnumbered by positive votes. An abstention will be considered a negative vote. A student failing an oral defense shall have the opportunity for one additional defense before the same committee. The committee shall determine the timing and format of a subsequent defense.

Capstone examinations are open to the public, although committee deliberations normally take place privately. The decision of the Committee for the Capstone Project is final. The report of the final examination is due to the Graduate School no later than two days after the examination.

Capstone Project Abstracts

Capstone Projects are normally disseminated as PhD dissertations and require two different abstracts. The abstract forming the second page of the Capstone Project report should be no more than 600 words. UMSL’s partner for publishing scholarly projects (currently Proquest) requires an abstract of a maximum of 350 words, which is included with the campus announcement of the defense of the Capstone Project. Upon recommendation by the program, the Graduate Dean may approve exceptions to this method of dissemination.

Format of the Capstone Project

In matters of style and documentation, the custom of the discipline shall be followed. The final copy of the Capstone Project must be legible and appropriate for publication when submitted to the Graduate School. Only high quality electronic submissions are acceptable with the following margins throughout: left margin, 1 1/2 inches; top, bottom, and right
margins, 1 inch. Upon recommendation by the unit, the Graduate Dean may approve exceptions to this method of dissemination.

**Official Copies of the Capstone Project**

The chair of the Committee for the Capstone Project is responsible for verifying that all the changes suggested by the committee and the Graduate Dean have either been incorporated in the final draft of the project or have been discussed further with the Graduate Dean or the committee.

Students shall disseminate the Capstone Project according to current Graduate School procedures for theses and dissertations unless an exception is approved.

**Graduate Certificate Program Requirements**

**Admission**

Each graduate certificate program may determine eligibility standards beyond the minimum for admission to and enrollment in the Graduate School.

**Credit Requirements**

The requirements, including the minimum number of credit hours, for certificates vary among graduate certificate programs. Please visit the web site or contact the program director for more information for the certificate program of interest. All graduate credit earned at UMSL for a graduate certificate that also fulfills the requirements for a MS or doctorate degree may be applied to that degree upon approval of the program director. At least two-thirds of the credit hours for the certificate must be completed in residence at UMSL.

**Filing the Program Plan**

A graduate student enrolled in a certificate program is required to file a certificate program plan with the Graduate School before completing the first two-thirds of the number of hours required in the program. Changes made in a certificate program plan after it has been filed must be submitted to the Graduate School.
General Education Requirements

At the University of Missouri-St. Louis, General Education affords both freshmen and transfer students the opportunity to develop and apply intellectual tools and to acquire a breadth of knowledge necessary to succeed in a rapidly changing, technology-driven, and diverse world. The UMSL Core and Explore curriculum challenges students to investigate various disciplines as potential majors and prepares them for success in major fields of study. It provides foundational knowledge in the basic competencies of Valuing, Managing Information, Communicating, and Higher-Order Thinking.

UMSL CORE & EXPLORE

- Native students (those with less than 11 hours of college credit from another institution, excluding any dual enrollment credit earned in HS)
- Students who plan to complete their degree at UMSL
- Transfer students in professional degree programs:
  - BS, Actuarial Science
  - BS, Accounting
  - BS, Education
  - BS, Nursing
  - BS, Engineering
  - BSW, Social Work
- General transfer students may opt in to this program

MISSOURI CORE 42

The core transfer curriculum, known as CORE 42, is a statewide framework for general education that was implemented in the 2018-2019 academic year by all public two- and four-year institutions of higher education in the State of Missouri. CORE 42 provides a common framework that allows transfer students to fulfill general education requirements at any participating institution by completing courses with MOTR designations. Except for transfer students pursuing professional degrees, those who complete all CORE 42 requirements will have satisfied the general education requirements of UMSL. Students who partially completed CORE 42 at another institution may finish the remaining requirements to satisfy the general education requirements of UMSL.

- Transfer students (those with 11+ hours of college credit from another institution, excluding any dual enrollment credit earned in HS)
  - Students who plan to transfer and complete their studies at an institution other than UMSL
  - Students with transcripted MOTR courses not seeking a professional degree
  - Native students may not opt in to this program

UMSL Core and Explore

General Education Program

Students must successfully complete the requirements of the University, the school or college in which they are enrolled, and the specific requirements of their area of specialization. Described below are the General Education requirements for all degrees. Students may consult the University Bulletin or their degree audit (DARS) report for recommended general education courses in their major.

At the University of Missouri-St. Louis, General Education affords both freshmen and transfer students the opportunity to develop and apply intellectual tools and to acquire a breadth of knowledge necessary in our challenging, technological, and diverse world. This curriculum also challenges students to investigate various disciplines as potential majors, and it prepares them for success in major fields of study. The program complies fully with the Missouri Coordinating Board of Higher Education Guidelines on Transfer and Articulation (June 2000).

Application of Policy to Freshmen

All students in Missouri public universities must complete the requirements of a General Education Plan totaling 42 credit hours in order to earn a baccalaureate degree.

Application of Policy to Transfer Students

Transfer policies describe which courses may apply to UMSL’s General Education requirements. In general, students who transfer to UMSL with an Associate of Arts (AA) degree from an accredited Missouri institution and other approved institutions are considered to have completed all General Education requirements.

Students transferring with fewer than 42 hours or from a non-participating institution and not participating in the Missouri Transfer CORE 42 program will have their transcripts evaluated on a course-by-course basis. All students must earn a C- or higher in their First Year Writing and Math Proficiency coursework to be eligible to graduate from UMSL. Additionally, UMSL has a Junior-Level Writing requirement beyond the General Education requirement and the school or college in which they are enrolled may also have a Cultural Diversity requirement.

Transfer courses that meet the requirements of the Core courses or courses that are designated as General Education courses in the Humanities and Fine Arts, the Social Sciences, and the Math and Life/Natural Sciences areas at peer institutions and institutions with whom UMSL has an articulation agreement are considered transferable to UMSL’s General Education requirements.

Credit associated with developmental/remedial coursework are not considered transferable to UMSL’s General Education requirements.

Application of Policy to Students Who Started Prior to Fall 2015

Students who earned 24 or more semester hours of credit* at any accredited post-secondary institutions(s) before the start of the fall 2015 semester may meet the General Education requirements stipulated in the UMSL 2014-2015 Bulletin or elect to complete the current General Education Plan described below. Students who earned 24 or more semester hours of credit* at any accredited post-secondary institutions(s) before the start of the fall 2002 semester may also meet the General Education requirements stipulated in the UMSL 2001-2002 Bulletin.

Application of Policy to Students Who Started Prior to Fall 2015

Students who earned 24 or more semester hours of credit* at any accredited post-secondary institutions(s) before the start of the fall 2015 semester may meet the General Education requirements stipulated in the UMSL 2014-2015 Bulletin or elect to complete the current General Education Plan described below. Students who earned 24 or more semester hours of credit* at any accredited post-secondary institutions(s) before the start of the fall 2002 semester may also meet the General Education requirements stipulated in the UMSL 2001-2002 Bulletin.

*Only credit that is transferable to UMSL is applicable
General Education Requirements

General Education at UMSL is comprised of 1000-2000 level courses that provide foundational knowledge in a broad range of subjects critical to the future success of our students. It is divided into two categories: General Education Core courses, which are applicable in all disciplines, and General Education Explore courses, which emphasize breadth of study. The following definitions clarify what is required for a course to be considered for listing as either a core or explore option in the General Education curriculum.

Core Areas:
- First Year Writing
- Math Proficiency
- Communication Proficiency
- Information Literacy
- American History or Government

Explore Areas:
- Humanities and Fine Arts
- Social Sciences
- Math and Life/Natural Sciences

Core Area Descriptions

First Year Writing (3 hours): Students will develop college-level rhetorical knowledge and critical thinking, reading, and writing skills, including process skills and knowledge of conventions.

First-Year Writing courses are defined as those which develop students' ability to:
- analyze contexts and audiences and then act on that analysis in comprehending and creating texts
- analyze, synthesize, interpret, and evaluate ideas, information, situations, and texts
- use multiple strategies, or composing processes, to conceptualize, develop, and finalize projects
- involve multiple assessments of writing in multiple formats
- understand, analyze, and negotiate conventions (usage, spelling, citation as well as organizational frameworks, content, document design, and style) for purpose, audience, and genre, understanding that genres evolve in response to changes in material conditions and composing technologies and attending carefully to emergent conventions

The First Year Writing requirement must be satisfied before the student completes 24 hours of course work. Students should be able to write with thoughtfulness, clarity, coherence, and persuasiveness (CBHE General Education, June 2000). Proficiency can be met through earning a C- or higher in one of the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 1100</td>
<td>First-Year Writing (MOTR ENGL 200)</td>
<td>3</td>
</tr>
<tr>
<td>ENGL 1110</td>
<td>First-Year Writing for International Students</td>
<td>3</td>
</tr>
<tr>
<td>HIST 1111</td>
<td>Reacting to the Past</td>
<td>4</td>
</tr>
</tbody>
</table>

Mathematics (3 hours): Students will gain critical thinking and quantitative reasoning skills, and the use of symbolic systems to understand the properties and relationships of relevant quantifiable concepts.

Pathways mathematics courses are defined as those which:
- involve sets and logic which is essential to critical thinking and process learning
- treat aspects of financial mathematics as it is both exemplary of mathematical thinking and immediately relevant to students
- discuss concepts of probability and statistics which involves important interpretive critical reasoning skills
- consider geometric concepts which involve abstract reasoning and spatial skills
- proficiency in the basic mathematical skills

Proficiency in the basic mathematical skills area must be satisfied before the student completes 24 hours of course work. Proficiency can be obtained by completing, with a grade of C- or higher, a college degree credit mathematics course, or by earning a score of at least 51% on the ALEKS Exam in a proctored environment. Students who fulfill their math proficiency requirement in this manner must take an additional General Education course in order to have a total of 42 credit hours of General Education courses.

Mathematics courses that the University offers that satisfy mathematics proficiency are courses at the 1000 level or above. Proficiency can be met through earning a C- or better in one of the following (or higher level) courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 1020</td>
<td>Contemporary Mathematics (MOTR MATH 120)</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1021</td>
<td>Choice and Chance</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1025</td>
<td>Geometry in the Real World</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1026</td>
<td>The Music of Math</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1030</td>
<td>College Algebra (MOTR MATH 130)</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1045</td>
<td>PreCalculus (MOTR MATH 150)</td>
<td>5</td>
</tr>
</tbody>
</table>

Math courses at the 1000 level below MATH 1030 are designed as terminal mathematics courses for students who do not plan to take calculus.

MATH 1030 or MATH 1045 is required for all students who want to go on to calculus. (Note: MATH 1035 is also required for students that take MATH 1030 and want to take MATH 1800.)

ALEKS math placement scores used to satisfy prerequisites are valid for approximately 11 months. For exact dates, go to http://www.umsl.edu/~campustesting/mathplacement.html. Also, ALEKS math placement scores that are used to satisfy prerequisites for courses below MATH 1800 do not need to be obtained in a proctored environment.

Information about the ALEKS math placement test is available on the University’s homepage at http://www.umsl.edu/~campustesting/mathplacement.html.

**Communication (3 hours):** Students will become proficient in verbal communication, enhance their ability to analyze and use communication effectively, and engage with others constructively across contexts.

Communication courses are defined as those which:

- are based in the English language and assume conversational fluency
- emphasize verbal communication over other forms
- involve analytical and practical skill-building in oral communication
- require multiple assessments or evaluations of oral communication skills

The Communication Proficiency requirement may be met through one of the following courses:

- **COMM 1030** Interpersonal Communication I (MOTR COMM 120) 3
- **COMM 1040** Introduction to Public Speaking (MOTR COMM 110) 3
- **COMM 1042** Reacting to the Past: Communication 3
- **COMM 2230** Small Group Communication (MOTR COMM 125) 3
- **COMM 2240** Persuasive Communication 3
- **EDUC 2222** Interpretation: Connecting Audiences and Meaning 3
- **HONORS 2001** Topics in Communication Proficiency 3
- **HONORS 2010** Inquiries in The Humanities (Media Literacy only) 3
- **HONORS 2030** Inquiries in the Social and Behavioral Sciences (Evaluating the Media: A Theoretical Approach only) 3
- **INFSYS 1800** Computers and Information Systems 3
- **INFSYS 2800** Information Systems Concepts and Applications 3
- **MATH 1105** Basic Probability and Statistics 3
- **MATH 1320** Introduction to Probability and Statistics 3
- **MATH 1320** Introduction to Probability and Statistics 3
- **MEDIA ST 1065** Internet Media 3
- **PHIL 2280** Minds, Brains, and Machines 3
- **PSYCH 2201** Psychological Statistics 4
- **PSYCH 2219** Research Methods in Psychological Science 3
- **SOC 2280** Technology and Society 3

Additional courses that may meet this requirement:

1. A course designated as a Verbal Communication course in transfer
2. Future courses, or specific sections of future topics courses, as approved by the General Education Committee

**Information Literacy (3 hours):** Students will become literate in accessing and analyzing information to further learning inside and outside the classroom and to become fully aware participants in the interconnected global community.

Information Literacy courses are defined as those which:

- focus on the analysis and evaluation of information for objective accuracy, valid use, or appropriate construction
- use contemporary technologies to research, retrieve, synthesize, construct, or present information as needed for academic disciplines
- provide foundational skills that can be applied to any major or discipline
- require multiple assessments and evaluations of information sources for objectivity, accuracy, validity, etc.

The Information Literacy requirement may be met through one of the following courses:

- **ATM SCI 1002** Earth Climate Studies 3
- **CMP SCI 1012** Learning to Program Using Virtual Worlds 3
- **CMP SCI 1250** Introduction to Computing 3
- **CHEM 2223** Quantitative Analysis in Chemistry 3
- **CRIMIN 2210** Research Methods in Criminology and Criminal Justice 3
- **CRIMIN 2220** Statistical Analysis in Criminology and Criminal Justice 4
- **ED TECH 2230** Information Literacy 3
- **EDUC 2002** Social Entrepreneurship 3
- **ENGL 2110** Information Literacy 3
- **HONORS 1130** Western Traditions: Social and Behavioral Sciences (Science Vs Pseudo-science in Archaeology only) 3
- **HONORS 2002** Topics in Information Literacy 3
- **HONORS 2010** Inquiries in The Humanities (Media Literacy only) 3
- **HONORS 2020** Inquiries in the Social and Behavioral Sciences (Evaluating the Media: A Theoretical Approach only) 3
- **INFSYS 1800** Computers and Information Systems 3
- **INFSYS 2800** Information Systems Concepts and Applications 3
- **MATH 1105** Basic Probability and Statistics 3
- **MATH 1310** Elementary Statistical Methods 3
- **MATH 1320** Introduction to Probability and Statistics 3
- **MEDIA ST 1065** Internet Media 3
- **PHIL 2280** Minds, Brains, and Machines 3
- **PSYCH 2201** Psychological Statistics 4
- **PSYCH 2219** Research Methods in Psychological Science 3
- **SOC 2280** Technology and Society 3

1. Proficiency may be earned through placement test. Students who fulfill their information literacy through a placement test must take an additional General Education course in order to have a total of 42 credit hours of General Education courses.

Additional courses that may meet this requirement:

1. A course designated as an Information Literacy course in Transfer
2. Future courses, or specific sections of future topics courses, as approved by the General Education Committee

**American History and Government (3 hours):** Students will understand important facets of American history and its governmental structures from colonization to present day.

American History and Government courses are defined as those which:
• explore significant events in the history of American civilization from colonization to present day
• delineate major social movements in American history (e.g., suffrage, prohibition, civil rights)
• emphasize the structures of American government such as criminal, economic, legal, political, social, and military policies
• require multiple assessments and evaluations to demonstrate knowledge of specific events or policies and their consequences potential implications

Students must satisfactorily complete a course or courses in American history or government taken at UMSL or at other colleges or universities in Missouri. Transfer students should check with the Dean's Office of their division to determine if they have fulfilled this requirement.

The American History and Government Requirement may be met through one of the following courses:

<table>

Humanities and Fine Arts (9 hours): Students will have a deeper knowledge of the human experience and creative expression through visual and performing arts.

Humanities and Fine Arts Explore courses are defined as those which:
• focus on helping students understand, analyze, and explore human thought/actions and creation.
• provide critical/foundational discipline-specific skills that contribute to personal growth and well-being
• encourage a sense of connection to our shared and diverse pasts and to our contemporaries
• promote living in and contributing to various communities

These criteria must be evident in syllabus, assignments, and/or grading rubrics if the department/discipline is not identified as a Fine Art or as Humanities/Humanistic Studies in the NCES Classification of Instructional Programs (CIP).

This requirement is satisfied by completing 9 hours of coursework at the 1000 or 2000 level selected from at least two of the following areas: Art, Art History, English, Foreign Languages (FGN LANG), History, Music (EN PER and M H L T), Philosophy, Theater, and Entrepreneurship, Interdisciplinary, Gender Studies and Honors courses with the Humanities or Fine Arts designation; and transfer courses designated as Humanities and Fine Arts general education courses at peer institutions and institutions with whom UMSL has an articulation agreement.

Social Sciences (9 hours): Students will understand and have the ability to view individual and social behavior/society from a variety of perspectives utilizing scientific methods.

Social Sciences Explore courses are defined as those which:
• the principle focus is on human society, including individual behavior and social relationships based on scientific principles
• reflect foundational, discipline specific knowledge that informs the human condition
• use multiple assessments of content knowledge within the social science framework

These criteria must be evident in syllabus, assignments, and/or grading rubrics if the department/discipline is not identified as a Social Science in the NCES Classification of Instructional Programs (CIP).

This requirement is satisfied by completing 9 hours of coursework at the 1000 or 2000 level selected from at least two of the following areas: Accounting, Anthropology, Business Administration, Communication, Criminology and Criminal Justice, Economics, Educational Psychology, Entrepreneurship, Finance, Geography, Media Studies, Political Science, Psychology, Social Work, Sociology, Sport Management; and Interdisciplinary, Gender Studies, and Honors courses with the Social Sciences designation; and transfer courses designated as Social Sciences general education courses at peer institutions and institutions with whom UMSL has an articulation agreement.

Mathematics and Life/Natural Sciences (9 hours): Students will expand mathematical abilities and have an understanding of the branches of science that deal with living things and the physical world.

Explore Area Descriptions

Courses used to fulfill core area requirements may not be applied to the explore area requirements.
Mathematics and Life/Natural Sciences Explore courses are defined as those which:

- emphasize mathematical concepts and/or use scientific methods to understand the physical world
- use multiple assessments of computational and/or content knowledge within the mathematical and life/natural sciences framework

These criteria must be evident in syllabus, assignments, and/or grading rubrics if the department/discipline is not identified as a Mathematics and Statistics, Biological and Biomedical Sciences, or Physical Sciences in the NCES Classification of Instructional Programs (CIP).

This requirement is satisfied by completing 9 hours of coursework at the 1000 or 2000 level selected from at least two of the following areas: Astronomy, Atmospheric Science, Biology, Chemistry, Computer Science, Geology, Information Systems and Technology, Mathematics, Physics; and Interdisciplinary and Honors courses with the Mathematics and Life/Natural Sciences designation; and transfer courses designated as Mathematics and Life/Natural Sciences general education courses at peer institutions and institutions with whom UMSL has an articulation agreement.

Note: Gender Studies and Military and Veterans Studies courses that are cross-listed with disciplinary designations at the 1000 and 2000 levels may also be used to fulfill the explore area requirements.

Learning Outcomes

CORE

First Year Writing
After successfully completing the First-Year Writing requirement:

- After successfully completing the First-Year Writing requirement, students will be able to:
  - analyze contexts and audiences and then act on that analysis in comprehending and creating texts
  - analyze, synthesize, interpret, and evaluate ideas, information, situations, and texts
  - use multiple strategies, or composing processes, to conceptualize, develop, and finalize projects
  - analyze and negotiate conventions (usage, spelling, citation as well as organizational frameworks, content, document design, and style) for purpose, audience, and genre, understanding that genres evolve in response to changes in material conditions and composing technologies and attending carefully to emergent conventions

Mathematics Proficiency
After successfully completing the Mathematics requirement, students will be able to:

- identify the ways in which mathematics occurs broadly in various fields (e.g., art, architecture, botany and music)
- evaluate in an informed manner various aspects of financial matters (e.g., mortgages, loans and investments)
- organize, analyze and interpret data arising in multiple formats (e.g., graphs, charts, diagrams as they arise within various contexts)

- make judgments and draw appropriate conclusions checking for logical consistency, while recognizing the limits of this analysis

Communication Proficiency
After successfully completing the Communication requirement students will be able to:

- analyze and evaluate their own and others’ oral expression
- create and clearly deliver oral presentations to targeted audiences employing effective syntax, vocabulary, grammar, and mechanics
- tailor messaging to diverse audiences to achieve a given purpose
- communicate effectively in groups by listening, reflecting, and responding appropriately and in context

Information Literacy
After successfully completing the Information Literacy requirement, students will be able to:

- effectively define the scope and purpose of a project
- use appropriate tools and contemporary technologies to access information through effective, well-designed search strategies
- identify relevant, reliable sources of information
- critically analyze and evaluate the accuracy, validity and potential bias of information
- organize, synthesize and communicate information from a variety of sources with clarity and depth

American History and Government
After successfully completing the American History and Government requirement, students will be able to:

- describe how the underlying principles of the Constitutions of the United States and the state of Missouri shape American society
- identify the various structures of American government
- examine events and social movements and the ways they impact interpretation of American history

EXPLORE

Fine Arts and Humanities
Upon completion of the required credit hours in this category, students will be able to:

- explain the ways in which humanistic and/or creative expression throughout the ages reflect the culture and values of its time and place
- analyze the ways in which both change and continuity have affected human experience
- identify the relationships among ideas, text, and/or creative works and their cultural and historical contexts
- frame a comparative context to critically assess the ideas, forces, and values that have created the modern world

Social Sciences
Upon completion of the required credit hours in this category, students will be able to:

- critically analyze how individuals are influenced by social institutions, structures, and processes and how these may contribute to diverse perspectives
• identify theory and qualitative or quantitative evidence to examine individual, social, and/or cultural phenomena
• identify and critique ethical positions or arguments based on research in the social and behavioral sciences

Mathematics and Life/Natural Sciences

Upon completion of the required credit hours in this category, students will be able to:
• analyze and evaluate a scientific hypothesis or technical process
• use basic scientific language and processes and be able to distinguish between scientific and non-scientific explanations
• use mathematical concepts and/or symbolic representations together with scientific methods to understand the physical or natural world
• solve problems using mathematical, statistical, computational or symbolic methods

Missouri Core 42

CORE 42 Transfer Curriculum

The CORE 42 Transfer Curriculum is a block of at least 42 credit hours that will transfer as equivalent credit at all Missouri public colleges and universities.

Students who complete the CORE 42 curriculum will meet the general education requirements for most liberal arts and sciences degrees at all public higher education institutions in the state. General education requirements for some degrees – including education, engineering and nursing – differ due to professional licensing and other requirements.

To complete the curriculum, students must earn a minimum number of credit hours in five knowledge areas:

• Mathematical sciences – three credit hours
• Natural sciences – seven credit hours, including a course with a lab
• Humanities and fine arts – nine credit hours from at least two disciplines
• Social and behavioral sciences – nine credit hours from at least two disciplines, including a civics course
• Written and oral communications – nine credit hours (six in written communications and three in oral communications)

Credits earned beyond the minimum in each knowledge area count toward the 42-hour minimum.

MOTR Course Equivalencies

Courses designated with a Missouri Transfer (MOTR) course number, guarantees the one-to-one transfer of these courses among all Missouri public institutions of higher education. UMSL courses can be found on the knowledge area tabs above.

For more information about CORE 42 and MOTR Course Equivalencies, visit https://dhe.mo.gov/core42.php.

College of Arts and Sciences

General Information

The College offers a wide range of accredited baccalaureate, master’s and doctoral degrees and multi-disciplinary certificates. Details about each degree may be found in the programs section of this bulletin.

- Actuarial Science (B.S. (p. 311), Certificate (p. 313))
- Anthropology (B.A. (p. 318))
- Biochemistry & Biotechnology (B.S. (p. 322), M.S. (p. 325))
- Biology (B.A. (p. 326), B.S. (p. 329), M.S. (p. 335), Ph.D. with emphases in Cell and Molecular Biology (p. 337) and Evolution and Systematics (p. 339))
- Chemistry and Biochemistry (B.A (p. 366), B.S. (p. 368), M.S. (p. 371), Ph.D. (p. 373))
- Child Advocacy Studies (Certificate (p. 375))
- Communication (B.A. (p. 379), Certificates in Health Communication (p. 467) and Media Production (p. 507))
- Computer Science (B.S. (p. 388), M.S. (p. 390), Ph.D. (p. 490), Certificates in Artificial Intelligence; Graduate (p. 321) and Undergraduate (p. 321), Computer Programming (p. 387), Computer Programming Education (p. 387), Internet & Web (p. 483) and Mobile Apps & Ubiquitous Computing; Graduate (p. 508) and Undergraduate (p. 508))
- Computing Technology (B.S (p. 391))
- Criminology and Criminal Justice (B.S. (p. 400), M.A (p. 402), Ph.D. (p. 403))
- Cybersecurity (B.S. (p. 405), M.S. (p. 410), Certificate (p. 408))
- Economics (B.A. (p. 419), B.S. (p. 420) M.A. (p. 422))
- Gender Studies (Graduate (p. 464) and Undergraduate Certificates (p. 465))
- History (B.A. (p. 467), M.A. (p. 470), Graduate Certificates in Museums, Heritage & Public History (p. 518) and History Education (p. 470))
- Interdisciplinary Studies (B.I.S. (p. 480))
- International Relations (B.A. (p. 481))
- Liberal Studies (B.L.S. (p. 486))
- Mathematics (B.A. (p. 494), B.S. (p. 497), M.A. (p. 503), Ph.D. (p. 491), Certificate in Data Science (p. 413))
- Modern Languages (B.A. with emphases in French (p. 511), Japanese (p. 514), Spanish (p. 516) and Dual Language Professional (p. 509))
- Music (B.A. (p. 519), B.M. (p. 532) with emphases in Elective Studies in Business (p. 521), Jazz Studies (p. 523), Music Composition (p. 525), Music Education (p. 527), Music Theory (p. 530), and Performance (p. 532))
- Organizational Leadership (B.A. (p. 564))
- Philosophy (B.A. (p. 565), M.A. (p. 567))
- Physics and Astronomy (B.A. (p. 570), B.S. (p. 576), M.S. (p. 579), Ph.D. (p. 579))
- Political Science (B.A. (p. 580), M.A. (p. 582), Ph.D. (p. 583))
- Public Policy and Administration (B.S.P.A (p. 593), M.P.P.A. (p. 597))
- Psychology (B.A. (p. 585), B.S (p. 587), M.A. (p. 588), Ph.D. in Behavioral Neuroscience (p. 590) and Clinical Community Psychology (p. 591) Certificate in Neuroscience (p. 537))
- Sociology (B.A. (p. 627), B.S. (p. 630))
- Studio Art (B.F.A. in Graphic Design (p. 640), Studio Practice (p. 642) or Art Education (p. 639))

The College of Arts and Sciences consists of the following departments, each offering work in specific undergraduate degree programs: Anthropology and Archaeology, Art and Design, Biology, Chemistry and Biochemistry, Communication and Media, Computer Science, Criminology and Criminal Justice, Economics, English, History, Language and Cultural Studies, Mathematics and Statistics, Music, Philosophy, Physics and Astronomy, Political Science, Psychological Sciences, and Sociology.

Graduate study degree programs, administered through the Graduate School, are also offered in the following departments of the College of Arts and Sciences: Biochemistry and Biotechnology, Biology, Chemistry, Criminology and Criminal Justice, Computer Science, Economics, English, History, Mathematics and Statistics, Physics and Astronomy, Philosophy, Political Science, and Psychological Sciences.

Requirements for Undergraduate Study

All majors in the College of Arts and Sciences, including Bachelor of Liberal Studies, must meet the following requirements:

- Requirements of their chosen baccalaureate degree (i.e., B.A., B.S., etc.) in accordance with the policies of the College of Arts and Sciences, explained below.
- Requirements of the department for their selected major or interdisciplinary program.
- Requirements for the University’s general education (p. 51) & university requirements.
- Completion of INTDSC 1003 University Studies for all students admitted to UMSL with fewer than 24 academic credit hours.

Detailed information concerning all degree requirements can be found by visiting the Marcus Allen Advising Center.

Academic Policies

Grade Requirements

To graduate, all majors in the college must satisfy one of the following grade point options:

- Have a minimum UMSL campus grade point average of 2.0 and have met all other grade point restrictions for the degree or program.

Cultural Diversity Requirement

To expand cultural awareness, students in some academic units may be required to complete a course that emphasizes Asian, African, Middle Eastern, Latin American, Pacific aboriginal, Native American, or a comparable culture. Courses that satisfy this requirement involve substantial material independent of the cultures’ interactions with European cultures. If a course focuses on one facet of a culture, it must treat the topic within the context of the culture as a whole. A list of courses...
which satisfy this requirement can be found in the Undergraduate Study Graduation Requirements (p. 19) section of this Bulletin.

Residency Requirements
Transfer students must complete at least 30 of the last 36 hours of their degree program in residence at the University of Missouri-St. Louis.

Unless otherwise specified, a transfer student must complete 12 hours of graded work at UMSL at the 2000 level or above within the minimum number of hours required for each major.

Unless otherwise specified, a transfer student must complete at least six hours of graded work at UMSL at the 2000 level or above within the minimum number of hours required for each minor. Students should consult the minor department for specific residency and grade requirements.

Specific Baccalaureate Degree Requirements

Course Requirements
After fulfilling the general education and specific major degree requirements, students are to take the remaining hours required to complete the bachelor's degree from courses (which the appropriate department has evaluated as being of university-level quality) from one or more of the following areas or their university-quality equivalents at other institutions: Anthropology/Archaeology, Art (appreciation, history, studio), Astronomy, Biology, Chemistry, Communication, Criminology and Criminal Justice, Economics, English, Geology, History, Mathematics/Computer Science, Media Studies, Modern Languages (French, Japanese, Spanish), Music (appreciation, history, performance), Philosophy, Physics, Political Science, Psychology, Social Work, Sociology, Theatre, Business, Education, Engineering, or Interdisciplinary. Other areas or courses not listed require approval by the chair of the student's department.

Bachelor of Arts (B.A.)
All B.A. degree candidates must successfully complete a curriculum which includes a departmental major or an approved interdisciplinary field. A major must include at least 30 credit hours but no more than 45 hours. The College offers the B.A. degree in anthropology, biology, chemistry, economics, English, history, mathematics, modern languages, philosophy, physics, political science, psychology, and sociology.

Foreign Language Requirement
Candidates for the B.A. degree are required to complete 13 credit hours or the equivalent in proficiency in one foreign language. Foreign language guidelines are as follows:

1. Students entering with no high school language units must enroll in Language 1 or may enroll in the 2115 series (see section 4).
2. Students with the degree of proficiency equivalent to 13 hours of college-level work in French, German or Spanish may obtain exemption by passing the department's placement exam. The specific dates for the exam are posted on-line or may be obtained from Languages and Cultures at 314-516-6240.
3. Native speakers of language other than English may meet the foreign language requirement by presenting a transcript from a university or secondary school of their native country. The department will certify native speakers of those languages which are taught at the university.

Those who are proficient in other languages must submit certification of competence to the college.

4. Language 2115 A, B, C (Intensive) will satisfy the foreign language requirement. Aptitude testing is required prior to enrollment. For more information, call the Department of Languages and Cultures at 314-516-6240
5. Students may not repeat, for either credit or quality points, an elementary course if they have already completed a higher-level course for which the elementary course, or its equivalent, is a prerequisite.

Applied Music and Studio Art
Students not majoring in music may count no more than eight hours in music ensemble performance (EN PER 1400, EN PER 1410, EN PER 1500, EN PER 1520, etc). Students in the college not majoring in studio art may count any number of studio art hours toward a degree in the college. This includes transfer credit.

Bachelor of Science (B.S.)
The College offers the B.S. degree in mathematics, biochemistry and biotechnology, biology, chemistry, biochemistry, computer science, criminology and criminal justice, economics, physics (with emphasis in applied physics, astrophysics, engineering physics, or optical biophysics), and sociology. The requirements are generally the same as for the B.A. degree with the following exceptions:

1. More credit hours in the major discipline may be counted toward satisfying the 120 hours needed for graduation. See departmental degree requirements for information.
2. Not all departments require foreign language proficiency. See departmental degree requirements for information.

Bachelor of Liberal Studies (BLS)
(See Interdisciplinary Programs (p. 131) for complete description)

Bachelor of Interdisciplinary Studies (BIS)
(See Interdisciplinary Programs (p. 131) for complete description)

Bachelor of Science in Public Policy and Administration (B.S.P.A.)
The B.S.P.A. degree program is administered through the Political Science Department and offers two emphasis areas. Public Administration emphasizes management in the public and nonprofit sectors. Public Policy allows focus on a particular policy area with attention to analytic training and research skills.

Bachelor of Fine Arts (B.F.A.)
The College offers the B.F.A. degree in studio art. A foreign language is not required. Students choosing an emphasis in drawing, graphic design, painting, photography, printmaking or general fine arts must take at least 75 credit hours in studio art (including 30 hours in the foundation art program). Students seeking K-12 art teacher certification take a minimum of 50 credit hours in studio art (including 30 hours in the foundation art program) and must fulfill the General Education Requirements in both the College of Education and the College of Arts and Sciences.
Bachelor of Music (B.M.)
The College offers the B.M. degree in music education, performance and with elective studies in business. The requirements are the same as for the B.A. degree with the addition of music education courses for music majors seeking state teacher certification. Although foreign language proficiency is not required, foreign language study is required for applied voice students.

Minors
A number of minors is available at UMSL. Some are offered by individual departments, while others are interdisciplinary in nature and involve several departments. The requirements for the various minors are listed in either the departmental or interdisciplinary sections of this Bulletin.

Special Programs
Certificate Programs
Graduate and undergraduate certificate programs are offered in Child Advocacy Studies, Cybersecurity, Data Science, Entrepreneurship, Gender Studies, Health Communication, Internet and Web, Media Production, Mobile and Ubiquitous Computing, and Technical Writing.

International Studies Certificate
In cooperation with International Studies and Programs and other Colleges, the College offers certificate programs in African, East Asian, European, International, and Latin American studies. The College also cooperates in offering the International Business Certificate.

Departmental Honors
Majors in the following departments may pursue departmental honors: biology, chemistry, economics, English, history, modern languages, and political science. Majors in criminology and criminal justice may pursue placement on the chair’s list.

Cooperative Education and Internship Programs
Cooperative education and internship programs are available for students seeking career-related employment while enrolled in school. These programs afford Arts and Sciences students an opportunity to gain practical experience. Co-ops and internships are administered through Career Services, 278 Millennium Student Center.

College of Arts and Sciences Extension
Credit courses are offered at off-campus locations through the College of Arts and Sciences. These courses are open to UMSL students and qualify for regular academic credit toward degrees in the college.

Latin Honors Requirements
In accordance with the University’s Latin Honors policy (p. 26), candidates graduating from the College of Arts and Sciences in the 2020-2021 Academic Year must meet the following GPA qualifications:

<table>
<thead>
<tr>
<th>Honors Level</th>

Anthropology and Archaeology

General Information
Anthropologists take a broad approach to understanding the diversity of human biology, culture, and language in the past and present. We teach students how to see their culture and the cultures of others more clearly, and how to work with the underlying humanity that unifies us all.

Anthropologists draw and build up knowledge from the social, biological, and physical sciences as well as the humanities. They are typically trained in one of four subfields: archaeology, biological/physical anthropology, linguistic anthropology, and sociocultural anthropology. Anthropologists consider the past to see how human groups lived hundreds or thousands of years ago. They research what makes up our biological bodies, genetics, diet and health. They want to know what people think is important, try to understand how people interact in social relationships, and look at the many ways people dress, organize their settlements, get their food, and communicate in different cultures.

Anthropologists teach how cultures evolve and the role of individuals and groups in the invention and perpetuation of cultural beliefs, behaviors, symbols, and systems. They have accumulated in-depth knowledge of hundreds of cultures and use this knowledge to understand better our own cultural beliefs, actions, and institutions, as well as those of people from other cultures. As the science of cultures, anthropology brings a powerful perspective to the understanding of the emerging global order and offers solutions to current human problems. Cross-cultural and evolutionary insights and knowledge help us envision how we can incorporate vast human diversity into a unified world order of peace, prosperity, justice, and opportunity.

Degrees and Areas of Concentration

BA in Anthropology
Bachelor of Arts in Anthropology focuses on applied, methodological, and theoretical skills. Faculty members are involved in regional and global research that encompasses studies in gender and sexuality, body culture and sports, food and diet, health care, human variation, culture diversity principles, the origins of democracy, war, mythology and more.

Students may join faculty in excavations of local archaeological sites or a Bronze Age Mycenaean palace in Greece. The program maintains an archaeology lab and library with one of the largest collections of artifacts from eastern Missouri. Students can study Forensic Anthropology and work with the program’s collection of 19th century skeletal remains. Opportunities exist for students to pursue diverse research experiences on a vast range of topics on human actions, beliefs and organization and intern with local organizations.

Minor in Anthropology
The minor in anthropology is designed to offer students a flexible introduction to the fundamentals of the discipline to complement their major field of study. A minor is advisable for anyone planning a career with intercultural or international dimensions, where knowledge of cultural systems, environments, values, and symbols is useful.
Minor in Global Health and Social Medicine

This interdisciplinary minor is ideal for students seeking to make a difference in improving health and wellbeing, locally and globally. It is a path to better understand the cultural and social contexts in which they will practice medicine and make them more well-rounded health care providers.

Student Experience

Students may work closely with faculty in designing their personal course of study and carrying out their own research projects in any of the above fields of study. Students have presented research results at professional meetings, in published papers, and at government and community agencies for use in planning and development. Students are encouraged to participate in the program's network of internships, providing an opportunity to practice newly acquired skills. As a capstone experience, all students, under faculty supervision, complete a significant independent research project, culminating in written and oral reports to the department students and faculty. The program encourages study abroad and has scholarship funds to assist. There is an active Association of Student Anthropologists that sponsors speakers and social activities.

Paid undergraduate positions are available on a competitive basis to anthropology majors as teaching assistants and faculty research assistants.

Career Outlook

The world needs anthropologists. The B.A. in Anthropology equips the student for employment in almost any area in which a bachelor's degree is sufficient and a sensitivity to cultural values and diversity is important. Graduates have found employment as university professors and lawyers and in archaeology research programs, urban development, planning programs, health care delivery, human services, business, government service, teaching, computer systems design, and university administration. Anthropology is excellent preparation for graduate and professional training in administration, the helping professions, development work, law, environmental studies, international and human resource areas of business, and in many other areas, depending upon individual interests. Many UMSL anthropology graduates have gone on to advanced training in master's, doctoral, and professional programs in respected universities around the country. For more career information, contact the program at 314-516-6020 for an appointment to talk with an appropriate faculty member or to request an information packet.

Anthropology Minor (p. 320)

Certificates

Global Health and Social Medicine Undergraduate Certificate (p. 467)

Courses

ANTHRO 1005 Introduction to Biological Anthropology: 4 semester hours
Topics include evolutionary theory and its development, the evolution/creationist debate, Mendelian & population genetics, the evolutionary place of humans within the animal kingdom, anatomical and behavioral characteristics of primates, fossilization, primate evolution, the human evolutionary fossil record, biological variability in modern humans, race as a biological concept, and applied biological anthropology. In addition to 3 hours of lecture, 1 hour per week is spent in lab classifying ancient human fossils, observing monkeys and apes at the zoo, and doing other projects. Satisfies the Natural Science and Mathematics (SM) breadth of study requirement.

ANTHRO 1011 Introduction to Cultural Anthropology (MOTR ANTH 201): 3 semester hours
Cultural anthropology is the study of human beings as creatures and creators of society. This course is an introduction to that study which aims to demonstrate how the basic concepts and techniques developed by cultural anthropologists help us to understand societies of various degrees of complexity, including our own. We will consider topics such as language, kinship, gender, ethnicity, economics, politics, religion, and social change in a broad comparative framework. Major goals are an increased awareness of the social and cultural dimensions of human experience, the diversity and flexibility of human cultures, and processes of intercultural communication and conflict. This course satisfies the Cultural Diversity requirement.

ANTHRO 1019 Introduction to Archaeology: 3 semester hours
Archaeology is a subfield of anthropology that studies past human societies from their material remains. Explores the development of archaeology as a scientific discipline. Archaeological methods and theories will be explained using case studies from the continents of Africa, Asia, Australia, Europe and the Americas. This course satisfies the Cultural Diversity requirement.

ANTHRO 1021 The Body in Culture: 3 semester hours
This course will compare uses of the body as a social signifier in Western and non-Western cultures. It will explore how culture shapes the images, uses and meanings of the human body. It concentrates on different historical and beliefs in five areas: how the body works; sex and gender; eating manners and food; pain and punishment; beauty and bodily mutilation. This course satisfies the Cultural Diversity requirement.

ANTHRO 1025 World Cultures: 3 semester hours
An ethnographic survey of the major culture areas of the world (Africa, North and South America, Europe and Oceania). This course satisfies the Cultural Diversity requirement.

ANTHRO 1030 Democracy and War: 3 semester hours
Using the world's first democracy in ancient Greece as a case study, this course will address questions about the origins of democracy, the key elements of a successful democratic government, the mechanisms by which democratic and non-democratic states go to war, the manner in which they cope with war and the psychological effects of war on warriors and civilian populations that will help us learn how our own democracy works and affects our lives.
ANTHRO 1033 World Archaeology: 3 semester hours
Discusses some of the greatest discoveries in archaeology from prehistoric cultures to ancient civilizations of Africa, Asia, Australia, Europe and the Americas. Archaeological examples may include early human origins at Olduvai Gorge in Tanzania, the pyramids of ancient Egypt, the Maya and Aztec of Mexico, the rise of civilization in Mesopotamia, England's Stonehenge, the Roman city of Pompeii, upper Paleolithic cave paintings in France and Spain, and American Indian pueblos of the Southwest. This introductory course is designed for non-anthropology majors, or for those who are considering the major. This course satisfies the Cultural Diversity requirement.

ANTHRO 1034 Introduction to Ancient Egypt and Its Civilization: 3 semester hours
Same as HIST 1034. This course will survey ancient Egyptian history and culture from predynastic times to Greco-Roman rule, roughly 3000 BCE to 30 BCE. Students will discuss archaeological sites, mummification, religion, architecture, texts, and more. Through comparing ancient Egyptian culture with our own, students will explore what has changed in the world and what has endured for millennia.

ANTHRO 1037 The Wonders of Greece: Introduction to Greek History and Culture: 3 semester hours
Same as HIST 1037. Our democracy and culture have been heavily influenced by Greek civilization. This course will introduce students to the culture and civilization of Greece in order to provide a better understanding of our own society. The course will cover the political and military history, art, literature, philosophy, and science of Greece from prehistoric to modern times, with special emphasis on Greek civilization's enduring democratic and cultural ideals. The course will include screening of films and use of online resources.

ANTHRO 1041 Sex and Gender Across Cultures: 3 semester hours
This course considers womanhood, manhood, third genders, and sexuality in a broad cross-cultural perspective. The focus of the course is on the diverse cultural logics that separate females, males, and sometimes third genders into different groups in different societies, with the male group usually being the more prestigious one. Focusing on the indigenous non-Western cultures, this course examines gender roles and sexuality within the broader cultural contexts of ritual and symbolism, family, marriage and kinship, economy, politics, and public life. This course will help students understand what it is like to be male or female in non-Western cultures. This course satisfies the Cultural Diversity Requirement.

ANTHRO 1091 Introductory Topics in Anthropology: 3 semester hours
This course features special and current topics at the introductory level in the areas of social, cultural and physical anthropology and archaeology. The course examines the basic concepts and provides an understanding of the development of new trends and areas of study in the field of Anthropology. Topics will focus on the comparative study of non-Western cultures such as ecological practices in tribal societies; religious practices in prehistoric cultures; the roles of women across cultures; etc. Topics may vary and the course may be repeated provided topic is different. This course satisfies the Cultural Diversity requirement.

ANTHRO 1095 Brief Overview of the Four Fields of Anthropology: 1 semester hour
Through the use of videos, readings, and the online course management system, this course provides a brief overview of the four traditional fields of anthropology: biological, archaeological, cultural, and linguistic anthropology. This course is designed for video instruction and offers minimal direct interaction with the instructor.

ANTHRO 1271 Food and Drink: Anthropological Perspective: 3 semester hours
This course explores the social and cultural aspects of foods and drinks. Topics may include the origins of food production; the evolution of diets, foods, and productions systems around the world; the interrelationships between food and identity, gender, race, and class; food and globalization; food politics and food justice movements; water scarcity; and the push for a sustainable future. This course satisfies the Cultural Diversity requirement.

ANTHRO 2003 Careers in Health and Medicine: 1 semester hour
Same as INTDSC 2003, GERON 2003, SOC 2003. In this course, students will learn about occupations in such fields as medicine, the allied health professions, health non-profit organizations, and global healthcare delivery. Students will understand the education and skills necessary for various careers and for application to medical, professional, and graduate schools, and will become familiar with majors, certificates and minors that are available at UMSL. They will learn about employment opportunities in the healthcare industry in the St. Louis metropolitan area, and will be introduced to members of the local community who give guest lectures. Students will gain practical experience by shadowing a healthcare professional in their job.

ANTHRO 2035 Ancient Greek Civilization and Culture: 3 semester hours
A survey of the history, language, literature, art, science, and philosophy of the ancient Greeks from prehistory to the Roman conquest. It covers the glamorous Minoan-Mycenaean civilization, the rise of classical Greek civilization and the golden age, the history of the city states such as Athens and Sparta, and the Hellenistic period under Alexander the Great and his descendants. Examines the nature of the ancient Greek language, surveys literary classics such as the Iliad and the Odyssey, and describes the archaeology of Greek myths based on the ongoing UM-St. Louis archaeological project in Greece. Discusses the rise of humanism, the ancient Olympic Games, and the legacy of ancient Greece in Western civilization.

ANTHRO 2100 Languages and World View: 3 semester hours
Same as FGN LANG 2100 and SOC 2200. Prerequisites: Completion of two semesters of one foreign language at the college level. This course investigates the extent to which peoples' linguistic and cultural background informs their understanding of the world. Experts on a variety of major Western and non-Western languages will introduce students to differences in ideas about time, space, human relationships, and other issues based on language. The course will also analyze common cultural misunderstandings among native speakers of English and speakers of other languages.

ANTHRO 2101 Girl Cultures: 3 semester hours
Same as HIST 2120. This course explores themes of identity and gender construction, media representation, and cultural production found in a spectrum of historic and modern international and US girl cultures. 1950s British Teddy Girls, 1970s Japanese Takarokozoku, 1990s American Riot Grrls, 2000s Mexican American Cholas, and other girl cultures teach us about the many strategies teens and young women use to construct their own forms of identity through music, language, zines, fashion, and other diverse activities. This course satisfies the Cultural Diversity requirement.
ANTHRO 2104 Medicine in Culture and History: 3 semester hours
Students will explore the diverse beliefs and practices related to anatomy, disease, sexual reproduction, gender, sport, and food. Western biomedicine will be compared with traditional Chinese medicine and other non-Western traditions such as shamanic, Native American, Tibetan, and Ayurvedic systems. The clash between traditional and modern medical systems will also be examined. This course satisfies the Cultural Diversity Requirement.

ANTHRO 2105 Human Variation: 3 semester hours
This course will look at the variation that exists within our own species, both between and within populations. It will investigate the evolutionary and genetic basis of human variation, as well as its diversity, adaptive significance, and distribution. Topics covered will include: body shape and physiology, blood groups, susceptibility to disease, and skin color. It will survey historical attempts to classify humans into different 'races'; assess definitions of race as a solely cultural construct; and critique attempts to link race, intelligence and performance.

ANTHRO 2109 Archaeological Field School: 3-6 semester hours
Prerequisites: Consent of instructor. Introduction to field methods in archaeology and to the techniques of recording, storing, analyzing, and reporting archaeological findings. Experience is gained through participation in a field research project including excavation and survey projects. Emphasis is placed upon research design and implementation and upon the use of archaeological data in describing and explaining human behavior.

ANTHRO 2111 Cultures of East Asia: 3 semester hours
An ethnographic and historical survey of the various people of East Asia including Japan, China, North and South Korea, Hong Kong and Macau. Includes an examination of the varying cultural and social developments within and through the historical, geographical, and cultural environments. This course satisfies the Cultural Diversity requirement.

ANTHRO 2117 Greek History and Culture: 3 semester hours
Same as HIST 2117. Greek civilization has had a deep impact on contemporary society in art; social; political; and economic organization; philosophy; law; medicine; and science. This course covers major aspects of Greek history and culture from antiquity to the present. It considers the major political and military events of Greek history, as well as important aspects of Greek culture, including sports and the history of the Olympic Games, literature, philosophy, and mythology.

ANTHRO 2120 Native Peoples of North America: 3 semester hours
A survey of Native Peoples of North America including the prehistory, ethnographic and linguistic groupings, social organization, and cultural systems of these cultures.

ANTHRO 2124 Introduction to Contemporary African Cultures: 3 semester hours
This introductory course focuses on multiple representations within contemporary African cultures and societies. Students have an opportunity to study and learn about African cultural expressions in belief systems, gender constructions, nationality and ethnicity, socioeconomic class systems, politics, environmental challenges, and cultural adaptations and change. This course satisfies the Cultural Diversity requirement.

ANTHRO 2132 Archaeology of North America: 3 semester hours
Examines the archaeological record of human developments throughout prehistoric North America. Topics of discussion include the origins of human culture in America, the processes of prehistoric cultural development in the different regions of the continent, and archaeological approaches to explaining the behavior of North America's prehistoric inhabitants. Satisfies the Cultural Diversity requirement.

ANTHRO 2134 Archaeology of The Inca, Aztec, and Maya: 3 semester hours
Provides an overview of human social and cultural developments in Mesoamerica and Andean South America from the first settlements over 20,000 years ago to the Spanish conquest. Focuses on events leading to and including the establishment of Classic Mayan and Aztec societies, and discusses changes that led to what was perhaps the largest nation on earth for its time, the Inca. This course satisfies the Cultural Diversity requirement.

ANTHRO 2150 Zombies, Vampires, and Monsters: The Supernatural in Popular Culture: 3 semester hours
Beliefs in the unseen world are universal. Zombies, vampires, and monsters are all elements of the supernatural in popular culture that we can analyze to discover deeper meanings about what it means to be human. This course will also cover magic, witchcraft, ghosts, possession, exorcism, and other beliefs and practices that reveal the views that humans have about their place in the world. This course will use anthropological concepts to make the familiar strange, and the strange familiar.

ANTHRO 2191 Special Topics in Non-Western Culture: 3 semester hours
This course focuses on a specific non-western culture, or geographically related groups of cultures. Ethnographic and/or archaeological cultures are chosen and their ecological economic, social, religious, cosmological, political, ethnic, linguistic and other cultural domains are examined. Students are exposed to basic concepts and knowledge for understanding diverse cultures in their historical and/or contemporary contexts of development and relationship. Topics will vary. Satisfies Cultural Diversity Requirement.

ANTHRO 2192 Anthropological Perspectives on Western Culture: 3 semester hours
This course focuses on a specific Western culture or geographically related group of cultures utilizing ethnographic and/or archaeological sources. Ecological, economic, social, political, ethnic, religious, linguistic and cultural domains will be examined. Students are exposed to basic anthropological concepts for understanding diverse cultures in their historical and/or contemporary contexts. Topics will vary.

ANTHRO 2232 Analysis of Archaeological Artifacts: 3 semester hours
Prerequisites: ANTHRO 1019 or ANTHRO 2109 or consent of instructor. This course teaches the methods and techniques for analyzing the artifacts from an archaeological dig. Students learn to process, analyze, and interpret ceramics, stone tools, plant and animal debris according to form, design, use wear, and associations. This analysis will form the basis of interpretations about human behaviors and cultural and temporal affiliations. The student will prepare a report of the examined collection.

ANTHRO 2420 Maiko, Maids, and Masako: Women in Japanese Cultural History: 3 semester hours
Same as HIST 2420. This course offers perspectives on famous Japanese women who have captured the public eye at various historical junctures. Students will learn to critically assess representations of these mythological, religious, occupational, and subcultural figures, as well as their linkage to notions of nationhood and modernity. This course satisfies the cultural diversity requirement.
ANTHRO 2425 Food and Drink in Japan: A Cultural History: 3 semester hours
Same as HIST 2425. This course explores food and drink as core aspects of intimate and public life in Japan and as key elements of nationalism. It examines distinct class, ethnic, and regional dimensions of food and drink that have their own unique histories. Students will learn how food and drink encode a spectrum of historical meanings as well as great cultural hybridity. This course satisfies the Cultural Diversity requirement.

ANTHRO 2430 Ghosts, Goblins, and Godzillas: 3 semester hours
Same as HIST 2430. This course explores the spirits, ghouls, and animal tricksters who populate the historic and modern Japanese imagination. Students will learn about the supernatural beings, and the exceptional humans who interact with or control them, who are found in centuries of Japanese religion, folklore, literature, and art, and are also frequent themes in modern art, film, anime and manga. This course satisfies the Cultural Diversity requirement.

ANTHRO 3209 Forensic Anthropology: 4 semester hours
Same as CRIMIN 3209. Prerequisites: ANTHRO 1005, or BIOL 1102, or junior standing, or consent of instructor. Students learn basic dental and skeletal anatomy and the methods used by biological anthropologists and archaeologists to collect and analyze human skeletal remains, including how to determine age and sex of skeletal remains, identify ethnic markers, determine stature and handedness, and identify the presence of trauma and/or pathology. Also covers the role of the forensic anthropologist in crime scene investigations and human rights issues. In the weekly lab section students will have an opportunity for hands-on application of techniques to analyze skeletal remains.

ANTHRO 3212 Medical Anthropology: 3 semester hours
Same as GERON 3212 and SOC 3212. Prerequisites: ANTHRO 1011 or GERON 2170 or PSYCH 1003 or SOC 1010 or consent of instructor or program director. An examination of the growing interaction between anthropology and medicine, and the increasing use of anthropologists in medical and health-care settings. In addition to teaching current theory in medical anthropology, the course focuses on anthropologically-based skills essential to those working in health-related fields.

ANTHRO 3214 Writing Systems of the World: 3 semester hours
Same as HIST 3214. This course studies the writing systems from around the world leads to appreciation for one of humankind’s most important technological inventions. Students will explore the origins and development of writing systems over time, the linguistic classification of writing, and the transmission of writing across languages and cultures. This course satisfies the Cultural Diversity requirement.

ANTHRO 3215 Aging Across Cultures: 3 semester hours
Same as GERON 3215. Prerequisites: ANTHRO 1011 or PSYCH 1003 or SOC 1010, or consent of instructor. This course examines the wide ranging variability in the roles of older people across different cultures and the effects these have on older people, their families, and their societies.

ANTHRO 3218 Visual and Material Culture of Japan: 3 semester hours
Same as HIST 3218. This course offers students the opportunity to research Japanese visual genres and material artifacts, from the iconography of Buddhism and fifteenth century pottery to postwar political cartoons, advertising posters, and etiquette comics. Students will discover how artifacts and images provide a means for communicating cultural meaning, while also reflecting aesthetics, humor, and cultural norms. This course satisfies the Cultural Diversity requirement.

ANTHRO 3220 Quantitative Data Analysis in Social Science Research: 3 semester hours
Same as SOC 3220. Prerequisites: SOC 1010 or ANTHRO 1011 and MATH 1030 (or higher). This course covers issues and techniques of statistical analysis relevant to quantitative sociological research, such as elementary probability, measurements of central tendency and dispersion, measures of relationships including linear regression and correlation, inferential and nonparametric statistics. The course includes an introduction to computer-based statistical analysis.

ANTHRO 3228 People and Plants: 3 semester hours
Prerequisites: ANTHRO 1011 or ANTHRO 1019 or consent of instructor. This course is designed to introduce students to complex relationships between people and plants. We will focus on how plants are perceived, managed, and used across human societies. Topics span the ages and include collection of wild plants and 'Stone Age' diets; the origins of agriculture in ancient Egypt, Mesopotamia, China, and the Americas; the development of crops and GMOs; industrial agriculture; organic gardening; and the wilderness-to-table movement. While emphasis will be on food plants, we will also discuss the use of plants as medicines, cosmetics, dyes, and construction materials.

ANTHRO 3235 Women in Subsaharan Africa: A Contemporary Perspective: 3 semester hours
Prerequisites: ANTHRO 1011, or introductory course in another social science, or consent of instructor. Examines important traditional concerns of anthropologists such as the nature of kinship obligation and privilege; gender as a basis for the division of labor; social organization for formal and informal networks; and ritual and ceremony. In addition we look closely at the changing role of African women, as related by African women testing the very limits of what is ‘socially and culturally acceptable.’ The roles women continue to play in politics, comprehensive development (i.e. cultural and economic), and evolving social structures are reviewed to gain an understanding of the historical and contemporary mandates for their social action. This course satisfies the Cultural Diversity requirement.

ANTHRO 3241 Myths and Monuments: 3 semester hours
This course will provide an overview of Greek myths and legends, as well as their reception in architecture, the visual arts, and literature. Particular emphasis will be given to: 1) the theology and the creation myths of the Greeks and how these relate to the Bible; 2) heroic myths from the Trojan War to Atlantis, and their historicity; 3) famous monuments, works of art, and texts from Greek and world literature, that advance our understanding of Greek myths and the culture that created them.

ANTHRO 3243 Marriage, Family, and Kinship: 3 semester hours
Same as SOC 3243 and GS 3243. Prerequisites: ANTHRO 1019, SOC 1010, or consent of the instructor. This course will examine the construction of kinship systems, marriages, families and other forms of intimate relationships from anthropological and sociological perspectives. The cross-cultural structure of this class will incorporate global case studies, including U.S. and European marriage and family structures. Students will have the opportunity to explore topics including love, dating, cohabitation, kinship calculation, alternative lifestyles, and divorce.

ANTHRO 3244 Religion, Magic and Science: 3 semester hours
Prerequisites: ANTHRO 1011, or introductory course in another social science, or consent of instructor. A consideration of the roles of religion, magic, and science in culture and social organization.
ANTHRO 3246 Medicine and Disease in the Ancient World: 3 semester hours
Prerequisites: ANTHRO 1005 or consent of the instructor. This course explores medicine and disease through case studies from civilizations of the ancient world such as Egypt, Greece, and Peru. Students will discuss how these cultures conceptualized disease, and, in turn, how they contended with illness. This course addresses different ways of identifying disease through medical texts, art, and human remains.

ANTHRO 3255 Oral History and Urban Culture in St. Louis: 3 semester hours
Prerequisites: ANTHRO 1011 or instructor's consent. This course involves students in background research and active fieldwork in urban anthropology within the metropolitan area. The focus will be on learning and applying oral history techniques in the city of St. Louis and its neighborhood. They will learn fieldwork methodologies and how to conduct social, cultural, and historical research in preparation for fieldwork. This includes learning to research, conduct, and process interviews. They will also learn to work in teams to construct a group project to be presented to the class.

ANTHRO 3290 Advanced Topics in Archaeology: 3 semester hours
Prerequisites: ANTHRO 1019, or consent of instructor. Selected topics in archeology with a strong theoretical and methodological approach. Requires substantial reading and writing. May be repeated with consent of department.

ANTHRO 3291 Current Issues in Anthropology: 3 semester hours
Prerequisites: ANTHRO 1011, or introductory course in another social science, or consent of instructor. Selected topics in social, cultural and physical anthropology, with emphasis on current issues and trends in the field of anthropology. May be repeated provided topic is different.

ANTHRO 4000 Ethnographic Field Research Methods: 3 semester hours
Prerequisites: ANTHRO 1011, SOC 1010, or consent of instructor. Ethnographic field research is the basis of cultural anthropological inquiry. This course emphasizes hands-on training in the collection and analysis of ethnographic data, including participant observation, taking and managing field notes, key informant interviewing, content analysis and the preparation of ethnographic field reports.

ANTHRO 4005 Special Research Methods in Cultural Anthropology: 1-3 semester hours
Prerequisites: ANTHRO 1011 or consent of instructor. Advanced instruction in specialized technical and analytical skills and methods used to conduct research in cultural anthropology. May be repeated provided the topic is different.

ANTHRO 4015 Data Analytics in the Social Sciences: 3 semester hours
Same as SOC 4015. Prerequisites: MATH 1020 or higher. This course integrates traditional statistical methods with new software and original datasets relevant to students of the social sciences. Students will learn to load, clean, and describe datasets using common software packages and programming languages employed in data science and data analytics. Students will also learn basic descriptive and inferential statistics as well as the visualization tools to successfully graph outputs and present findings. Students with no background in statistics, data analytics, or programming are welcome in the course.

ANTHRO 4021 Anthropology of Current World Issues: 3 semester hours
Prerequisites: ANTHRO 1011. This course enhances your understanding of world issues by using an anthropological lens. Students will learn about human adaptations and rationalities, and the way in which anthropology can shed new perspectives on current world issues including ethics, food and water crises, and racial, ethnic, and gender disparities.

ANTHRO 4100 Field Methods in Archaeology: 3 semester hours
Prerequisites: ANTHRO 1019 or consent of instructor. Advanced instruction in archaeological field methods including techniques of recording, storing, analyzing, and reporting archaeological findings. Experience is gained through participation in excavations and/or surveys. Emphasis is placed upon research design and implementation and the use of archaeological data in describing and explaining human behavior.

ANTHRO 4105 Special Research Methods in Archaeology: 1-3 semester hours
Prerequisites: ANTHRO 1019 or consent of instructor. Advanced instruction in specialized technical and analytical skills and methods used to conduct research in archaeology. May be repeated provided the topic is different.

ANTHRO 4200 Field Methods in Biological Anthropology: 3 semester hours
Prerequisites: ANTHRO 1005 or consent of instructor. Course material is based on human skeletal biology and bioarchaeology. The course focuses on 1) training a biological anthropologist; 2) bibliographic research; 3) research methods including skeletal pathology, geographic morphological variants, and developmental changes; 4) giving academic presentations and writing research reports. Students are required to conduct self-directed research on human skeletal remains.

ANTHRO 4205 Special Research Methods in Biological Anthropology: 1-3 semester hours
Prerequisites: ANTHRO 1005 or consent of instructor. Advanced instruction in specialized technical and analytical skills and methods used to conduct research in biological anthropology. May be repeated provided the topic is different.

ANTHRO 4307 Community Based Research in Anthropology: 3 semester hours
Prerequisites: Junior standing, ANTHRO 1011, ANTHRO 3202, and completion of junior-level writing requirement. An advanced course in qualitative/ethnographic modes of inquiry, building on research and analytical skills learned in previous courses. Some quantitative methods may supplement the research when appropriate. Students experience the process of discovery, representation, presentation, and justification based on fieldwork and/or archival research. The focus is on applying anthropological knowledge to practical issues faced by communities and institutions in the St. Louis area. May be repeated provided the topic is repeated.

ANTHRO 4310 Laboratory Methods in Archaeology: 3 semester hours
Prerequisites: ANTHRO 1019, SOC 3220 or equivalent, or consent of instructor. An advanced laboratory analysis and curation methods class. The emphases are 1) mastery of general lab methods and procedures, and 2) development of independent analysis skills in one or more specialty areas such as lithics, ceramics, computer graphics, statistical methods, paleoethnobotany, experimental analysis, and soils.
ANTHRO 4314 The Archaeology of Death: 3 semester hours  
Prerequisites: ANTHRO 1005 or consent of the instructor. This course will survey some of the different ways people have buried their dead over time. Using archaeology as their foundation, students will explore what burials can tell us about culture and society. During field trips to local cemeteries, they will study current perceptions of death and future archaeological records. Students will conduct demographic analysis of both local and global cemeteries to help them understand the relationships between death, burial, and aging.

ANTHRO 4315 Anthropology Past, Present, and Future: 3 semester hours  
Prerequisites: Senior standing, one of the following method courses: ANTHRO 4000, ANTHRO 4100, ANTHRO 4200, and consent of the instructor. The capstone course for anthropology majors, ideally to be taken in the final semester of the senior year. In this course, students will 1) explore where anthropology has come from and where it may be going; 2) discuss a series of topics that can be addressed from the perspectives of different subfields by examining different theoretical positions, methods, and types of data; 3) learn to apply the knowledge and skills gained in previous courses to their future, professional careers. Final senior exit projects will be presented orally to Anthropology faculty members.

ANTHRO 4316 Senior Research Project: 3 semester hours  
Prerequisites: Senior standing and consent of the instructor. For undergraduates who have excelled in their coursework and wish to conduct original research. Students will work with a faculty member with expertise relevant to the research topic. This course offers students the opportunity to build upon strong research, analytic and writing skills. Completion of this course will result in the writing of a thesis, publication of an article, presentation at a professional meeting, or other work that exemplifies high achievement.

ANTHRO 4325 Internship in Cultural Anthropology: 1-3 semester hours  
Prerequisite: Recommendation of major advisor. Internship in Anthropology is a supervised field experience in an appropriate public or private institution, business, or government office. Cultural Anthropology internships are aimed at providing students with opportunities to learn to apply their knowledge of social and cultural process and diversity to practical situations in the market place of ideas, goods, and services. Specific placements will be selected to match student’s interests and career goals.

ANTHRO 4326 Internship in Archaeology: 1-6 semester hours  
Prerequisite: Recommendation of major advisor. Students will be assigned an internship on recommendation of their advisor. Internships will consist of a period of study, observation, and training in an appropriate public or private institution, business, or government office. Archaeology internships are aimed at providing students with opportunities to work with professional archaeologists in public and private research environments including laboratories and curation centers. Specific placements will be selected to match student’s interests and career goals.

ANTHRO 4328 Internship in Museum Studies: 1-3 semester hours  
Prerequisite: Recommendation of major advisor. Students will be assigned an internship on recommendation of their advisor. Internships will consist of a period of study, observation, and training in an appropriate museum or other exhibition oriented institution. Museum internships are aimed at providing students with opportunities to work with professional museologists to learn skills relating to areas such as exhibition, curation, public programming, research, and publication. Specific placements will be selected to match student’s interests and career goals.

ANTHRO 4329 Internship in Biological Anthropology: 1-3 semester hours  
Prerequisite: Recommendation of major advisor. This course is an internship that consists of a period of study, observation and training in an appropriate institution, lab, or research setting related to forensics, primate behavior and biology, human genetics, population, environmental policy, and other domains related to biological anthropology. Students will be assigned an internship on recommendation of their advisor. This course may be repeated for a maximum of 6 credit hours.

ANTHRO 4350 Special Study: 1-3 semester hours  
Prerequisite: Consent of instructor. Independent study through readings, reports, or field research. No student may take more than a cumulative total of 6 hours of Special Study.

ANTHRO 5440 Sociocultural Aspects of Aging: 3 semester hours  
Same as GERON 5440. Prerequisites: Graduate status or consent of the instructor or program director. Focuses on the variety of solutions encountered in different sociocultural contexts for dealing with the problems, challenges and opportunities of growing old. It is organized around topics that are of concern to both anthropology and social gerontology: the status of the aged, intergenerational relations, aging in modernizing societies, ethnic dimensions of aging in complex societies, health in later life, death and dying. Both in-depth case studies and cross-cultural comparisons are examined in an effort to arrive at a culturally informed assessment of factors affecting aging and the aged in the United States.

ANTHRO 5592 The History of the Visual Arts in American Museums: 3 semester hours  
Same as HIST 5592 and ART HS 5592. Prerequisites: Graduate standing and consent of instructor. This course is an introduction to selected topics in the history of museology, focusing on art and anthropology museums as sites for the interpretations of art and culture, and as contested meeting grounds for various views of history and culture.

ANTHRO 6138 Museum Studies Master’s Project: 5 semester hours  
Same as ART HS 6038 and HIST 6138. Prerequisites: Consent of Director of Museum Studies Program. Research and writing/exhibit development on a selected topic.

Art and Design

General Information

Degrees and Areas of Concentration

The department offers course work leading toward the Bachelor of Fine Arts in Studio Art with emphases in General Fine Arts, Graphic Design and Art Education.

The B.F.A. in Studio Art consists of a foundation art program and an emphasis area in the following: art education, graphic design, and general fine arts. UMSL has transfer agreements with many local and regional community colleges. For information regarding our agreements, please contact the Office of Transfer Services at transferservices@umsl.edu or 314-516-5162.

The Bachelor of Fine Arts Degree in Studio Art has the following learning outcomes:

- to develop visual and verbal responses to visual phenomena, and organize perceptions and conceptualizations both rationally and intuitively;
• to become familiar with the major achievements in the history of art and design, including the works and intentions of leading artists and designers in the past and present;
• to develop the capacity to identify and/or solve problems within a variety of physical, technological, social, and cultural contexts;
• to understand and evaluate contemporary thinking about art or design;
• to become familiar with and develop competence in a number of art or design techniques;
• to make valid assessments of quality and effectiveness in design projects and works of art, especially their own.

To support its teaching and research objectives, the department maintains an extensive and expanding collection of digital images. The collection includes examples of painting, sculpture, architecture, photography and decorative arts, and is under the supervision of a professional visual resource curator, who is available for special assistance to staff and students.

Art history courses can be applied toward minors in Anthropology, American Studies, Classical Studies, Philosophy, and Urban Studies, or certificates in Studies in Religions, Women’s and Gender Studies, Photographic Studies and African Studies.

**Gallery 210**

Gallery 210, located in Building 7, 44 East Drive, offers visual arts programming of regional, national, and international importance. The gallery’s exhibitions and related arts programming have enjoyed a long and distinguished history of service to the university and to the St. Louis community. Gallery activities are supervised by a professional gallery director.

**Gallery FAB**

Located in the Fine Arts Building, Gallery FAB exhibits a range of work by artists of regional and national significance. The exhibitions are curated by members of the Studio Art Faculty and complement the teaching emphases of the Fine Arts program.

**Scholarships/Internships**

Several scholarships are available on a competitive basis within the department, including the Art Department/Barbara St Cyr Scholarship, the William T. Isbell Jr. Scholarship, the Aronson Scholarship, the Marie Larkin Scholarship in Art Education, and the Hilda and Roy Bergmann Scholarship for Art. The department also sponsors a variety of internships with local arts institutions, including the Saint Louis Art Museum, Contemporary Art Museum St. Louis, Paul ArtSpace, and Laumeier Sculpture Park.

**Ferring Travel Study Program**

Each year, student majors in their junior and senior year may apply for the competitive Ferring Travel Study Program, which allows students to travel for free to major art centers in the US, including New York, Chicago, and Los Angeles.

**Career Outlook**

Study in art history broadens and enriches a general education, offering insight into the visual, architectural, and cultural artifacts left by earlier, as well as modern, civilizations. Art history graduates have found career opportunities in teaching, museums, galleries, libraries, historical societies, sales and auction houses, the legal professions, historic preservation, and arts administration.

Students with degrees in studio art find careers in teaching, advertising, public relations, graphic design, illustration, film and video production, arts administration, art restoration, product and industrial design, framing, and commercial photography.

With over 300 art teachers in the greater St. Louis region alone, there is a demand for art teachers statewide each year.

Students in each major receive professional practice development with a new attention paid to entrepreneurial skills.

**Faculty Overview**

The Department of Art and Design has a diverse faculty actively engaged in the production of art, its historical and critical evaluation, and the training of art educators. The department prides itself on its commitments to high standards of teaching and sound research achievements. Individual faculty have been cited for their teaching excellence. Art history faculty members have written books, articles, and critical reviews, and regularly participate in national and international conferences. Art and Design Faculty exhibit nationally and internationally in group and solo shows, juried and invited exhibitions; they also curate exhibitions and maintain a high level of professional practice.

**Programs**

**Degrees**

**Studio Art, Bachelor of Fine Arts**

**Emphasis Areas:**
- Graphic Design (p. 640)
- Art Education (p. 639)
- Studio Practice (p. 642)

**Minors**

History of Art and Visual Culture (p. 472)

Studio Art (p. 643)

**Art Education Courses**

**ART ED 2179 Visual Art Activities for Elementary School: 3 semester hours**

Students will explore the purpose of visual arts in school settings and will encounter various media and materials through hands-on art experiences. Discussion of social, cultural, and historical influences on creative works will be encountered. Course content highlights the integration of visual art in teaching elementary subjects and emphasizes the role of art-making and imaginative experiences in child development. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ART ED 3328 Art Education: Theory to Practice: 3 semester hours**

Prerequisites: Completion of Level I requirements and Foundation Art Program; concurrent enrollment in ART ED 4260 is required. Development and application of concepts related to comprehensive art education and standards-based curriculum in art education, with an examination of current theories, trends, publications, and on-line resources in the field.
ART ED 4260 Art Museum as Teaching Resource: 3 semester hours
Prerequisites: Completion of Level I requirements, 9 hours of ART HS, and completion of Foundation Art Program; concurrent enrollment in ART ED 3328 is required. Students will learn how to strengthen K-12 Art Education by utilizing the collections and resources of the St. Louis Art Museum. A variety of teaching approaches and learning activities for galleries and classrooms will be employed, focusing on art from around the world and throughout history.

ART ED 4273 Curriculum and Methods of Teaching Art: 3 semester hours
Prerequisites: ART ED 3328 and completion of, or concurrent enrollment in, ED PSY 3312, SPEC ED 3318, or TCH ED 4391. A study of the scope and sequence of art education in the school curriculum, with emphasis on the preparation, selection, organization and application of materials and methods of instruction and assessment. Attention is also given to learning the research tools of the scholar in the field of art education. Not available for graduate credit.

ART ED 4290 Special Study in Art Education: 1-6 semester hours
Prerequisites: Junior, senior, or graduate standing and consent of instructor. Independent study through readings, reports, field research, or special projects. May be repeated for credit, up to a maximum of 6 credit hours.

ART ED 5228 Foundation and Classroom Application of Art Education: 2 semester hours
Prerequisites: Graduate standing, admission to the Teacher Education Program, a passing score on the Missouri Content Exam (MoCA) in Art on file, and consent of instructor; concurrent enrollment in ART ED 5260 is required. Development, application, and research of concepts related to comprehensive art education and standards-based curriculum in art education, with an in-depth examination of current theories, trends, publications, and on-line resources in the field.

ART ED 5260 Museum Collections in the K-12 Curriculum: 2 semester hours
Prerequisites: Graduate standing. Students will research the value and application of utilizing the collections and resources of the St. Louis Art Museum to strengthen K-12 education. A variety of research-based teaching strategies and learning activities for galleries and classrooms will be employed; a broad cultural perspective and historical understanding of art will be used.

ART ED 5273 Advanced Methods and Curriculum Development of Teaching Art: 2 semester hours
Prerequisites: ART ED 5260 and ART ED 5228. An in-depth study of the scope and sequence of art education in the school curriculum, highlighting the preparation, selection, organization and application of materials and methods of instruction and assessment. Emphasis is placed on learning the research tools of the scholar in the field of art education and the role of the teacher as researcher on curriculum development.

ART ED 5334 Topics in Contemporary Art Education: 3 semester hours
Prerequisites: Graduate standing or permission of instructor. Intensive study for advanced students and art teachers, emphasizing specialized techniques and innovative concepts. Topics to be announced. May be repeated for credit, up to a maximum of 12 credit hours.

ART ED 5588 Museum Education and Visitor Research: 3 semester hours
Prerequisites: Consent of Director of Museum Studies Program. Development and operation of museum educational programs: learning theory; program design; relationships with exhibit development; programming for children and adults. Visitor research: theoretical foundations; research design; impact on programming and strategic planning.

ART ED 5590 Special Study in Art Education: 1-6 semester hours
Prerequisite: Graduate standing and consent of instructor. Independent study through readings, reports, field research, or special projects. May be repeated for credit.

Art History Courses

ART HS 1100 Introduction to Western Art (MOTR ARTS 100): 3 semester hours
An introduction to major historical movements in Western art.

ART HS 1120 Global Art and Visual Culture (MOTR ARTS 101): 3 semester hours
This course explores transcultural perspectives in Art History. Students will be introduced to creative visual traditions from across the globe. The course examines themes such as death and the afterlife, religious practice, visual persuasion, and design aesthetic in historical Europe, Africa, Asia, the Indigenous Americas and Oceania. This course satisfies the Cultural Diversity requirement.

ART HS 1140 Indigenous Arts of the Americas: 3 semester hours
This course surveys the indigenous arts of the Americas from precontact through the present. Cultures to be covered may include Iroquois and Ojibway of the Northeast; Navajo and Pueblo of the Southwest; Kwagulith and Gitxsan of the Northwest Coast; and Inuit from the Arctic. The relationship of art to religion, philosophy, politics, and social life will be explored. This course satisfies the Cultural Diversity requirement.

ART HS 1150 Introduction to the Art and Visual Cultures of Africa: 3 semester hours
This course surveys major art forms of Africa and the African Diaspora. It addresses traditional media, such as architecture, masquerade, regalia, sculpture, metalwork, ceramics, and textiles, as well as contemporary sculpture, painting, photography, and performance. This course satisfies the Cultural Diversity requirement.

ART HS 1160 Introduction to the Art and Visual Cultures of Asia: 3 semester hours
This course surveys major achievements in architecture, sculpture, and painting of India, China, Japan, and Southeast Asia, with an emphasis on religious, historical, and social context of the arts. This course satisfies the Cultural Diversity requirement.

ART HS 1190 Ideas in the History of Art and Visual Culture: 3 semester hours
Prerequisites: ART HS 1100 or consent of instructor. This course studies selected works of art, with attention to the social and cultural factors surrounding their creation.

ART HS 2211 Art and Archaeology of The Ancient World: 3 semester hours
Prerequisite: ART HS 1100. A survey of art in Egypt, the ancient Near East, Greece, and Rome, beginning in the Neolithic era (8000-4000 BC) and ending with the Barbarian invasions of Italy in the fifth century A.D. The major highlights of architecture and city planning, sculpture, painting, pottery, and the minor arts will be covered.
ART HS 2212 Greek Art and Archaeology: 3 semester hours
General survey or material culture in the Aegean basin, beginning with the Bronze Age (Third Millennium B.C.) and terminating in the late Hellenistic period (Second Century B.C.). For the Hellenistic period the course will trace Greek developments and influences outside of the Aegean, for example in Italy and in Egypt.

ART HS 2225 Medieval Art: 3 semester hours
A survey of the art and architecture of the Mediterranean World and northern Europe from late antiquity to the late Gothic period (300-1300 A.D.). Focus on new styles and subject matter in painting, sculpture and architecture.

ART HS 2235 Renaissance and Baroque Art: 3 semester hours
Prerequisites: ART HS 1100 or consent of instructor. This course is an introduction to art and architecture in Europe from the fifteenth through the seventeenth centuries.

ART HS 2250 Rococo to Realism: 3 semester hours
Prerequisites: ART HS 1100 or consent of the instructor. This course is an introduction to selected European artists and artworks from c. 1720 to 1860.

ART HS 2261 History of Graphic Design: 3 semester hours
This course examines the rapport of word, image, artist, client, and viewer that is unique to the genres of book arts and graphic design as studied in their historical and contemporary contexts.

ART HS 2265 History of Photography: 3 semester hours
Prerequisite: ART HS 1100 or consent of instructor. A study of photography: its historical development, an examination of it as an art medium, and its influence on the development of modern art.

ART HS 2270 Art of the United States: 3 semester hours
Prerequisites: ART HS 1100 or consent of instructor. This course is an overview of art and architecture in the United States from the colonial era through the twentieth century.

ART HS 2275 History of Illustration: 3 semester hours
Prerequisites: ART HS 1100 or consent of instructor. This course will analyze the work of artists who specialized in illustration for prints, books, newspapers, magazines, and advertisements, emphasizing the 19th and 20th centuries in the United States. The course will cover topics such as idealizations of the American West and changing roles of women in society, as well as iconic characters and images that continue to inspire artists today.

ART HS 2280 Modern to Contemporary Art: 3 semester hours
Prerequisite: ART HS 1100 or consent of the instructor. This course presents an overview of avant-garde modern art in Europe and the United States from the mid-nineteenth century to the contemporary era. It explores traditional media such as painting and sculpture as well as newer forms such as performance and installation art in the context of changing ideas about art's traditions, social functions, and philosophical concerns.

ART HS 2291 Issues and Ideas in the History of Art and Visual Culture: 3 semester hours
Prerequisites: ART HS 1100 or permission of instructor. This course is an intensive studies of a few selected works from various eras and cultures, with special attention to the particular social and cultural factors surrounding their creation. This course may be repeated for credit with the permission of an advisor as long as the topic different.

ART HS 3350 Studies in Design: 3 semester hours
Prerequisites: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. The course examines selected topics in the history of design, and may include genres such as architecture, material culture, or graphic design. May be repeated for credit with a different topic, for a maximum of 6 credit hours.

ART HS 3387 Professional Internship: 1-6 semester hours
Prerequisites: Minimum of two 2000-level courses in art history and ENGL 3100 and consent of instructor. The internship provides experience in museums, historical societies, galleries, design firms, or visual resource collections. Students will assist in the diverse duties associated with the day-to-day functions of the institution, under the joint direction of a faculty advisor and a supervisor at the institution. Course requirements may include readings, research assignments, and/or a paper. This course may be counted for art history or studio art credit with the department's consent.

ART HS 3389 Visual Resources Management: 1-3 semester hours
Prerequisites: Minimum of two 2000-level courses in Art History, ENGL 3100, and consent of instructor. A hands-on course in the Department of Art and History's media center that will cover collection development and management as well as technical and theoretical issues in the visual resources profession.

ART HS 3390 Special Study: 1-4 semester hours
Prerequisite: Junior or senior standing. Consent of instructor and Art History advisor. Independent study through readings, reports or field research. May be repeated one time with consent of Art History advisor. May not be used for internship credit.

ART HS 3395 Selected Themes in the History of Art and Visual Culture: 3 semester hours
Prerequisites: Two 2000-level ART HS courses or consent of instructor. This course is a study of a selected topic in visual culture. It may be repeated for credit with a different topic.

ART HS 4400 Topics in the History of Art and Visual Culture: 3 semester hours
Prerequisites: One 3000-level ART HS course or consent of instructor. This course is the study of a selected topic in the history of art and visual culture. It may be repeated for credit with a different topic.

ART HS 4455 Topics in Modern Art: 3 semester hours
Prerequisites: ART HS 2280 and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. Intensive study of selected topics in art of the nineteenth and/or twentieth centuries. May be repeated for credit with permission of instructor and advisor.

ART HS 4490 Special Study: 1-4 semester hours
Prerequisite: Junior or senior standing, consent of instructor and Art History advisor. Independent study through readings, reports, or field research. May be repeated one time with consent of Art History advisor. May not be used for internship credit.

ART HS 4495 Senior Seminar: Methods of Art History: 3 semester hours
Prerequisite: ART HS 3395, ENGL 3100 and senior standing in Art History or consent of instructor. An advanced class in the methods of art historical analysis. Theoretical perspectives will include connoisseurship, style, iconography, social history, and others.

ART HS 5590 Special Study in Art History: 1-6 semester hours
Prerequisites: Graduate standing and consent of instructor. Independent study through readings, reports, discussions, and/or special projects. May be repeated for credit with consent of instructor.
ART HS 5592 The History of The Visual Arts in American Museums: 3 semester hours
Same as ANTHRO 5592 and HIST 5592. Prerequisites: Graduate standing and consent of instructor. This course is an introduction to selected topics in the history of museology, focusing on art and anthropology museums as sites for the interpretations of art and culture, and as contested meeting grounds for various views of history and culture.

ART HS 5593 Museum Management and Curatorial Practice: 3 semester hours
Prerequisites: Consent of the instructor and graduate standing. Museum Management and Curatorial Practice is designed to give students overlapping theoretical and practical experience that will be useful after entry into the museum profession. While exhibitions are at the core of the museum mission, it takes a broad range of skills from different team members to bring shows to fruition. The course provides students with grounded knowledge on how to curate an exhibition for their museum and understand all the elements that serve the mission-driven goals for that institution, and the obligation to uphold best practices as established by the American Alliance of Museums [AAM] and the Association of Art Museum Directors [AAMD] that provide guidance for the field. Students will become familiar with the different types of roles and functions that make museums run (although staffing levels will vary based on the size and budget of the organization), including: executive management, advancement, marketing, curatorial, collections management, education, and others (e.g., archivist, librarian, security, maintenance, groundskeeping, restaurant staff, parking).

ART HS 6038 Museum Studies Master's Project: 5 semester hours
Same as ANTHRO 6138 and HIST 6138. Prerequisites: Consent of Director of Museum Studies Program. Research and writing/exhibit development on a selected topic.

Studio Art Courses

ST ART 1020 Expanded Artforms: 3 semester hours
A practical and theoretical exploration of contemporary art practices organized around structured assignments that will explore various modes of working in art. This course is designed to assist studio students in developing a personal, non-medium specific approach to art making and problem solving. Lab fee required. Basic computer lab equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 1130 Ceramics II: 3 semester hours
Prerequisite: ST ART 1030. A continuation of ST ART 1030. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 1140 Drawing I (MOTR PERF 105D): 3 semester hours
An introduction to drawing through the study of figure, object, and environment. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 1142 Figure Drawing I: 3 semester hours
Basic studies of the human form and anatomy from the model in a variety of drawing media. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 1143 Figure Drawing II: 3 semester hours
Prerequisite: ST ART 1142. Continuation of Figure Drawing I. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 1150 2D Design: Surface: 3 semester hours
This course uses tactile and digital methods to introduce students to imaging in black and white, color, and principles of 2D pictorial space. Using a variety of media, students will explore and understand the foundations of visual thinking. A lab fee is required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 1151 3D Design: Space: 3 semester hours
Prerequisites: ST ART 1150 or consent of instructor. This course introduces students to the fundamentals and technical principles of working three dimensionally. Students will experiment with a number of construction methods and materials used to create, represent, respond to, and reflect on form and space. A lab fee is required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 1181 Painting II: 3 semester hours
Prerequisite: ST ART 1180 or consent of instructor. Continuation of basic studio problems in painting media. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 1210 Graphic Design I: 3 semester hours
Prerequisite: None. Introduction to graphic design with an emphasis on fundamentals of space, emotion, shape, form, and concept. Projects in design, layout and typography will be addressed. The course is recommended to be taken concurrently with ST ART 1150, Design I. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 1220 Graphic Design II: 3 semester hours
Prerequisites: ST ART 1150 and ST ART 1210. Continuing introduction to graphic design, focusing on developing concepts and design process, typographic systems and layout systems. The course is recommended to be taken concurrently with ST ART 2220, Computer Design I. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 2160 Photography II: 3 semester hours
Prerequisite: ST ART 1060. An introduction to the techniques and aesthetics of black and white photography and the darkroom. Students must provide a film camera with adjustable speeds and aperture. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 2210 Typography: 3 semester hours
Prerequisites: ST ART 1220 or consent of instructor. Course intends to instill a sense of responsibility relative to typographic and production design, while developing the student’s capacity for critical thinking and general typographic rules, visual hierarchy of typographic elements, classical typographic tradition, book design, awareness of typographic aesthetic.

ST ART 2212 Image Making for Graphic Design: 3 semester hours
Prerequisites: ST ART 1220 or consent of instructor. This course teaches skills of making images and custom type for use in visual communication. Topics covered include a survey of traditional and experimental illustration techniques with an emphasis on creation of original imagery. The class will discuss how hand images are further developed and combined on the computer for use in design. Creativity, discovery, and craft are highly emphasized. Lab fee required.
ST ART 2220 Computer Design I: 3 semester hours  
Prerequisites: ST ART 1150 and ST ART 2205, concurrent enrollment in ST ART 3305 recommended. This course introduces students to the use of computer graphics for the creation of artwork applicable to the graphic design industry. A lab fee is required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 2221 Computer Design II: 3 semester hours  
Prerequisite: ST ART 2220. Designed to familiarize students with the methods processes, software, and computer functions used in graphic design and illustration. The course is recommended to be taken concurrently with ST ART 3310. Graphic Design III. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 2230 Drawing II: 3 semester hours  
Prerequisites: ST ART 1140 or consent of the instructor. This course facilitates the development of drawing skills though continued observation and problems of invention. Student will explore and use varied drawing materials and techniques including graphite, charcoal, conte crayon, and inks. A lab fee is required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 2235 Comics and Cartoon Illustration: 3 semester hours  
This is a course in creating and appreciating the world of comics and cartoons. Students will investigate and learn the tools and techniques for creating cartoons and cartoon illustrations to create their own cartoons through the use of traditional media and computers. While designed for beginners, experienced artists will be encouraged to perfect their personal styles. The class will create and print its own comic book. A lab fee is required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 2240 Drawing III: 3 semester hours  
Prerequisites: ST ART 1140 and ST ART 1141. This course offers studio problems designed to further the development of drawing skills in various media. Limited color will also be introduced. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 2245 Painting I: 3 semester hours  
Prerequisites: ST ART 1140 and ST ART 1150, or consent of instructor. This course is an introduction to the use of oil and/or acrylic painting media. Students will address studio problems to develop technical and expressive skills on various surfaces. A lab fee is required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 2252 Printmaking I: 3 semester hours  
Prerequisites: ST ART 1150 and ST ART 2230, or consent of instructor. This course provides an introduction to printmaking techniques, materials, and theories. The course will include work in a variety of print materials. A lab fee is required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 2260 Photography I: 3 semester hours  
This course is an introduction to the techniques and aesthetics of digital photography, along with photo editing software and printing techniques. Students must provide a digital camera. A lab fee is required. Basic computer lab equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 2263 Digital Color Process: 3 semester hours  
Prerequisites: ST ART 1060. An extended study in the process of digital printing. The class will help students refine their techniques using digital color management and explore various techniques to assure the closest relationship between the image on the monitor and the resulting print. Hands-on training with different digital printers, digital media and scanning techniques will be offered. This class will involve both learning exercises and the creation of original computer-aided photographic art. Lab fee required. Students must provide a digital camera. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 2269 Commercial Application in Photo: Photojournalism, Documentary, and Public Relations Photography: 3 semester hours  
Prerequisite: ST ART 2263 or consent of instructor. Exploration of issues and applications within the field of photojournalism, documentary, and public relations photography. The class will concentrate on a variety of photographic applications focusing on news and editorial imagemaking, as well as training the student in public relations assignments. This class will involve both learning exercises and the creation of original computer-aided photographic art. Students must provide a digital camera. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 2270 Ceramics I: 3 semester hours  
This course is an introduction to the basic methods and theory of ceramics including work with hand-built construction, wheel techniques and glazing. A lab fee is required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 2271 Printmaking II: 3 semester hours  
Prerequisite: ST ART 1170 or consent of instructor. A continuation of ST ART 1170. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 2273 Printmaking: Etching: 3 semester hours  
Prerequisites: ST ART 1150 and ST ART 1141 or consent of instructor. An introduction to printmaking skills and theory of contemporary etching practices. Development of skills and aesthetic judgements in the media using non-toxic etching processes. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 2275 Sculpture I: 3 semester hours  
This course is an introduction to traditional and contemporary materials, aesthetics, and theories of three-dimensional art. A lab fee is required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 2278 Introduction to Fibers and Textiles: 3 semester hours  
This course provides an exploration of a variety of on- and off-loom weaving and other fiber and textile media and techniques. A lab fee is required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.
ST ART 2280 Painting III: 3 semester hours
Prerequisite: ST ART 1181 or consent of instructor. Advanced studio problems in painting media. Attention paid to individual development of theory, expression, and technique. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 2283 Watercolor Painting: 3 semester hours
Prerequisites: ST ART 1150 and ST ART 1141. Beginning problems in watercolor painting. Includes the study of traditional and contemporary approaches to color, color techniques, and treatment of papers. May be repeated for credit. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 2285 Entrepreneurship for the Visual Arts: 3 semester hours
Prerequisites: ST ART 1150 or consent of the instructor. In this course, students will explore ways of establishing, promoting, and sustaining a creative practice. The basics of arts entrepreneurship, which may include marketing, branding, portfolio development, valuing work, and routes to market, are investigated through case studies and practice.

ST ART 2290 Special Study: 1-10 semester hours
Prerequisites: Junior/Senior standing and consent of department and instructor. Independent study through readings, reports or field research. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 3074 Special Topics in Studio Art: 3 semester hours
Prerequisites: Minimum completion of 18 hours in Studio Art. Selected topics in studio studies. May be repeated for credit with a change of topic. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 3260 Photography III: 3 semester hours
Prerequisite: ST ART 2160. An exploration into contemporary theories and trends in photography. Advanced projects, portfolios and techniques will be expected from those enrolled. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 3310 Graphic Design III: 3 semester hours
Prerequisite: ST ART 1220 and ST ART 2220. Advanced studio problems to further the understanding of design and its relationship to typographic elements, illustration, and communication. The course will encourage both conceptual and technical development of the designer. The course is recommended to be taken concurrently with ST ART 2221, Computer Design II. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 3311 Graphic Design IV: 3 semester hours
Prerequisite: ST ART 3310 and ST ART 2221. Further studio problems in the graphic arts. The course is recommended to be taken concurrently with ST ART 2210, Typography. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 3312 Advanced Topics in Graphic Design: 3 semester hours
Prerequisites: ST ART 3311 or permission of instructor. Studies of selected topics, which will vary. May be repeated for credit with a different topic, for a maximum of 9 credit hours. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 3313 Introduction to Motion: 3 semester hours
Prerequisites: ST ART 2220 and basic knowledge of Photoshop and Illustrator. This course explores the fundamentals of motion design for the graphic designer. Students will learn the basics of animating, using After Effects software. A lab fee is required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 3317 Art of 3D Animation II: 3 semester hours
Prerequisites: ST ART 3316. In this production course, students will work on advanced techniques of animation and the mechanics of spatial graphics software, and will study the storytelling and visual techniques central to creating a successful animated presentation. Each student will produce an animated video presentation during the class. A lab fee is required. Basic computer lab equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 3323 Fundamentals of Researching User Experience: 3 semester hours
Prerequisites: ST ART 3322. In this course, students will discover in greater detail the methods for researching user experiences within interactive systems. This will include basic tools like interviews, surveys, and usability studies. The course will demonstrate how to translate user research into personas, use-case scenarios, and functional requirements for software and other uses, such as implementation in marketing and product design. Course work will include readings, research papers, and user research. A lab fee is required. Basic equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 3350 Studio Art Internship: 1-6 semester hours
Prerequisites: Junior/Senior standing in studio art and consent of the faculty advisor. The internship provides experience in design firms, professional art studios, or comparable settings. Students will assist professionals in the diverse duties associated with studio art activities. Course assignments may include research assignments and/or reports to be reviewed by the faculty advisor and/or supervisor. May be repeated for credit, up to a maximum of 6 credit hours.

ST ART 3352 Printmaking: Screenprinting: 3 semester hours
Prerequisites: ST ART 2252 or consent of instructor. This course provides an introduction to the techniques, methods, and aesthetics of screenprinting. Studio problems involving uses and approaches will be emphasized. A lab fee is required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 3354 Printmaking: Lithography: 3 semester hours
Prerequisites: ST ART 2252 or consent of instructor. This course provides an introduction to printmaking skills and theory in stone and plate lithography and examines studio problems in the use of materials and equipment. Attention will be given to students' individual development. A lab fee is required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 3366 Commercial Applications in Photography: 3 semester hours
Prerequisites: ST ART 3362 or consent of instructor. This course explores issues and applications within the field of photography. Techniques of lighting, posing, and studio equipment are discussed. This class involves both learning exercises and the creation of original computer-aided photographic art. Students must provide a digital camera. A lab fee is required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.
**ST ART 3372 Advanced Lithography: 3 semester hours**
Prerequisite: ST ART 1173. Continuing problems in lithography with problems in black and white, photolithography, and/or color. May be repeated for credit. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3382 Advanced 2D Practices: 3 semester hours**
Prerequisites: ST ART 1150 and two 2000 level courses in 2D art practice. This course will afford students the opportunity to continue to explore and develop advanced technical and conceptual strategies in two-dimensional media. This course may be offered with varying themes, and may be repeated for credit with a different topic. A lab fee is required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 3383 Advanced Problems in Graphic Design I: 3 semester hours**
Prerequisite: ST ART 3311 and ST ART 2210. This course is focused on professional-level art and portfolio production. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 3384 Advanced Problems in Graphic Design II: 3 semester hours**
Prerequisite: ST ART 3383. A continuation of ST ART 3383. The course includes the preparation of a faculty-reviewed portfolio. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 3385 Advanced 3D Practices: 3 semester hours**
Prerequisites: ST ART 1151 and two 2000 level courses in studio art, one of which must be in 3D practice. This course will afford students the opportunity to continue to explore and develop advanced technical and conceptual strategies in three-dimensional media. This course may be offered with varying themes, and may be repeated for credit with a different topic. A lab fee is required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 3390 Special Study: 1-10 semester hours**
Prerequisite: Junior/senior standing and consent of department chairperson and instructor. Independent study through readings, reports, or field research. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 4495 Senior Studio Seminar: 3 semester hours**
Prerequisites: Senior standing and ST ART 3381, ST ART 3341, ST ART 3392 or ST ART 3371. Weekly critiques and discussions of technical and professional issues. Will instruct students in methods of portfolio display, documentation, gallery representation, grant writing, and professional preparation. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies. Offered only during Fall Semester.

**ST ART 4496 Senior Studio Seminar: 3 semester hours**
Prerequisites: Senior standing and ST ART 4495. Weekly critiques and discussions of technical and professional issues. Will instruct students in methods of portfolio display, documentation, gallery representation, grant writing, and professional preparation. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies. Offered only during Winter Semester.

**ST ART 4497 Senior Seminar in Graphic Design I: 3 semester hours**
Prerequisites: Senior standing and ST ART 3384. Students must pass the junior portfolio review. Weekly critiques and discussions of technical and professional issues. Will instruct students in the methods of professional preparation. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

**ST ART 4498 Senior Seminar in Graphic Design II: 3 semester hours**
Prerequisites: ST ART 4497. Continuation of ST ART 4497. Will instruct students in the methods of professional preparation. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

**ST ART 5590 Special Study: 1-6 semester hours**
Prerequisites: Graduate standing and consent of instructor. Independent study through art making, readings, reports, or field research. Studio Art fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies. May be retaken for credit with consent of instructor.

---

### Biochemistry and Biotechnology

#### General Information

**Degrees**

Biochemistry and Biotechnology provides academic programs leading to the undergraduate B.S. degree or the graduate M.S. degree in Biochemistry and Biotechnology. These degrees are offered in cooperation with the Department of Biology and the Department of Chemistry and Biochemistry. Faculty members in this program are engaged in teaching and research in areas such as biochemistry, genetics, molecular biology, and cell biology. Majors have the opportunity through coursework, laboratories, seminars, and research experience to develop the knowledge and skills necessary to enter the workforce or to go on with further graduate education.

#### Career Outlook

The emerging Biotechnology sector is increasing the regional and national demand for workers with significant training in molecular biology, biochemistry, and genetics. The St. Louis metropolitan area has long been a major center for biochemistry and biotechnology, and in the past decade it has become a national hub for life sciences research and development activity. A degree in Biochemistry and Biotechnology provides students with the training they need to become part of the broad biotechnology and life sciences industries.

- Biochemistry and Biotechnology BS (p. 322)
- Biochemistry and Biotechnology BS/MS Dual Degree Program (p. 324)
- Biochemistry and Biotechnology MS (p. 325)
- Biochemistry and Biotechnology MS, Professional Emphasis (p. 325)
### BIOL 1831 Introductory Biology: From Molecules to Organisms (MOTR BIOL 150L): 5 semester hours
Prerequisites: A minimum of high school chemistry and MATH 1030; ENGL 1100 or equivalent (may be taken concurrently). Required for students intending to major in biology or take specified biology courses at the 2000 level or above. This course presents and introduction to some of the principles of biology and scientific methodology applied to the molecular/ cellular through organ system levels of organization. Topics include: cell structure, metabolism, reproduction, heredity and major physiological processes regulated by organ systems. Three hours of lecture, three and one half hours of lab, and one hour of discussion per week.

### BIOL 2012 Genetics: 3 semester hours
Prerequisites: BIOL 1831 (majors must also take BIOL 1821) MATH 1030, and CHEM 1111 or (CHEM 1081 plus CHEM 1091). Fundamental principles of inheritance, including classical genetic theory as well as recent advances in the molecular basis of heredity. Three hours of lecture per week. Fulfills Science/Math requirement.

### BIOL 2013 Genetics Laboratory: 2 semester hours
Prerequisites: Concurrent registration in BIOL 2012, or consent of instructor. Laboratory to accompany BIOL 2012. Three and one-half hours of organized laboratory time per week. Students may need to return to the laboratory at unscheduled times to complete some exercises.

### BIOL 2482 Microbiology: 3 semester hours
Prerequisites: BIOL 1831 (majors must also take BIOL 1821), MATH 1030, and CHEM 1111. Study of microorganisms, their metabolism, genetics, and their interaction with other forms of life. Three hours of lecture per week.

### BIOL 2483 Microbiology Laboratory: 2 semester hours
Prerequisite: BIOL 2482 (may be taken concurrently). Experimental studies and procedures of microbiological techniques. Three and one-half hours of organized laboratory time per week. Students will need to return to the laboratory at unscheduled times to complete some exercises.

### BIOL 3622 Cell Biology: 3 semester hours
Prerequisites: BIOL 1831, BIOL 2012, CHEM 1121, and MATH 1030. This course examines the organization and basic processes of cells including tissues, organelles, glycolysis, respiration, photosynthesis, trafficking, cytoskeleton, signal transduction, and cell division.

### BIOL 3699 Undergraduate Internship in Biotechnology: 1-4 semester hours
Prerequisites: BIOL 1821, BIOL 1831, and CHEM 1111 and CHEM 1121 and consent of instructor. Concurrent enrollment in CHEM 2612 or higher is strongly encouraged. A 2.5 GPA and enrollment in the undergraduate Biotechnology Certificate Program is required. Internship will consist of a period of observation, experimentation and on-the-job training in a biotechnology laboratory. The laboratory may be industrial or academic. Credit will be determined by the number of hours a student works each week and in consultation between the intern's supervisor and instructor. Internship assignments will be commensurate with the education and experience of the student. Two credits may be used to fulfill the lab requirement.

### BIOL 4442 Developmental Biology: 3 semester hours
Prerequisites: BIOL 2012 and BIOL 3622. A study of the basic principles that shape the embryonic and post-embryonic development of animals with an emphasis on the underlying cellular and molecular mechanisms. Specific topics include fertilization, determination of cell fate and differentiation, cell migration, establishment of the body plan, formation of selected organs and organ systems, stem cells, and limb regeneration. Environmental influences on development and the impact of developmental biology on modern medicine are also discussed. Three hours of lecture/discussion per week. Students may not receive credit for both BIOL 4442 and BIOL 6442.

### BIOL 4550 Bacterial Pathogenesis: 3 semester hours
Prerequisites: BIOL 2012 and BIOL 2482. Examination of the strategies bacterial pathogens use to infect animals. Topics include host immune responses to infection, bacterial virulence factors, regulation of bacterial virulence, and the cellular and molecular approaches used to study host-parasite interactions. Three hours of lecture per week. Students may not receive credit for both BIOL 4550 and BIOL 6550.

### BIOL 4602 Molecular Biology: 3 semester hours
Prerequisites: BIOL 2012 and CHEM 2612. This course is a survey of the principles of molecular biology, with emphasis on understanding the genetic regulation of DNA, RNA, and protein synthesis and function in eukaryotic cells.

### BIOL 4608 Synthetic Biology: 3 semester hours
Prerequisites: BIOL 2012, BIOL 2482. A study of the molecular biology of microbial cells, in the context of synthetic biological systems. Topics include DNA replication, transcription, translation, gene regulation and protein structure as well as aspects of genetic engineering as they apply to the construction of novel biological systems. Following an introduction to the design of biological parts used in synthetic biology, students read, discuss and present recent journal articles in order to learn about current advances and applications of synthetic biology. Three hours of lecture per week. Students may not receive credit for BIOL 4608 and BIOL 6608.

### BIOL 4614 Biotechnology Laboratory I: 4 semester hours
Prerequisites: BIOL 2012 or consent of instructor. An introduction to and the fundamental concepts that underlie the field of biotechnology. Both the basic principles of molecular biology and hands-on experience with the techniques of the field will be addressed through lectures, discussions, and a series of laboratory exercises. Two hours of lecture and four hours of laboratory per week. Fulfills a laboratory requirement only: may not be used to fulfill the higher level (4000-5000) lecture course requirement for the B.A. or B.S. degree in biology. Students may not receive credit for BIOL 4614 and a comparable biotechnology course from another institution.

### BIOL 4615 Biotechnology Laboratory II: 4 semester hours
Prerequisites: BIOL 4614 and either BIOL 4602 or BIOL 4612, or consent of instructor. An in-depth look at theory and practice of biotechnology. Lectures and discussion will examine the underlying principles, and laboratory exercises will present hands-on experience with current techniques. One hour of lecture and six hours of laboratory per week. Fulfills a laboratory requirement only: may not be used to fulfill the higher level (4000-5000) lecture course requirement for the B.A. or B.S. degree in biology. Students may not receive credit for BIOL 4615 and BIOL 6615.
BIOL 4622 Cellular Basis of Disease: 3 semester hours
Prerequisites: BIOL 3622. A study of the structural organization and processes of eukaryotic cells, focusing on how defects in cellular function lead to genetic diseases and cancer. Topics of discussion may include membrane dynamics, intracellular trafficking, signal transduction, and the cell cycle. Three hours of lecture per week. Students may not receive credit for both BIOL 4622 and BIOL 6622.

BIOL 4632 Nucleic Acid Structure and Function: 3 semester hours
Prerequisites: BIOL 2012 and BIOL 4712 or equivalent, or consent of instructor. A comprehensive view of the structural properties of DNA and RNA that promote molecular interactions and biological function. Topics will include the physical properties of nucleic acids, the formation and biological importance of higher order structures, RNA enzymatic activities, nucleic acid-protein interactions, and RNA metabolism. Three hours of lecture per week. Students may not receive credit for both BIOL 4632 and BIOL 6632.

BIOL 4642 Plant Molecular Biology and Biotechnology: 3 semester hours
Prerequisites: BIOL 2012, BIOL 3622. This course will introduce molecular biology principles that govern plant growth, development, and responses to stress. This course integrates the experimental approaches of genetics, molecular biology, and biochemistry, with a specific focus on biotechnology techniques and applications. Students may not receive credit for both BIOL 4642 and BIOL 6642.

BIOL 4652 Virology: 3 semester hours
Prerequisite: BIOL 2012 and BIOL 3622. This first half of the course entails a comparative study of the structure, replication, and molecular biology of viruses. The second half of the course focuses on the pathogenesis, control, and evolution of animal viruses. Three hours of lecture per week. Students may not receive credit for both BIOL 4652 and BIOL 6652.

BIOL 4662 Human Pathology: 3 semester hours
Prerequisites: BIOL 3622 or consent of the instructor. A study of disease processes as they affect the human body. The course will examine both the proximate causes and underlying mechanisms of disease. Specific conditions will be used to illustrate application of clinical approaches in determining the origin, development, and effects of a disease.

BIOL 4797 Biochemistry and Biotechnology Seminar: 1 semester hour
Same as CHEM 4797. Prerequisites: Senior standing in the Biochemistry and Biotechnology program and consent of faculty advisor. This course will focus on selected publications related to biochemistry and biotechnology from both refereed journals and news sources. Students are expected to participate in discussions and to prepare oral and written presentations. Completion of the Major Field Achievement Test in Biochemistry & Biotechnology is a course requirement. May not be taken for graduate credit.

BIOL 4822 Introduction to Neuroscience: 3 semester hours
Prerequisite: BIOL 3802 or consent of instructor. The study of nervous systems, featuring the cellular bases of initiation and conduction of the impulse, synaptic transmission, and the network integrative function of invertebrate and vertebrate nervous systems. This course emphasizes the multidisciplinary nature of the neurosciences, including anatomical, physiological and molecular approaches to understanding neural function. Three hours of lecture per week.

BIOL 4842 Immunobiology: 3 semester hours
Prerequisite: BIOL 3622 and CHEM 2612. The fundamental principles and concepts of immunology and immunochemistry. Emphasis on the relation of immunological phenomena to biological phenomena and biological problems. Three hours lecture per week.

BIOL 4905 Research: 1-3 semester hours
Prerequisites: Consent of faculty research advisor. Research in an area selected by the student in consultation with and under the direct supervision of an UMSL biology faculty research advisor. Research opportunities are subject to availability and must be approved in advance of beginning research. The project may include the reading of pertinent literature, laboratory or field experience, including keeping of a logbook, and a summary paper and a presentation, all based on an average 8 hours per week per credit during a 15 week semester at the discretion of the instructor. Credit arranged. Course may be repeated for a total of up to 5 credit hours. A maximum of one lab requirement may be satisfied using any two BIOL 4905 credits. Additional credits may be applied toward the total biology hours required for the biology BA or BS. May not be taken for graduate credit.

BIOL 4920 Selected Topics in Biology: 3 semester hours
Prerequisites: Junior standing and consent of instructor. The topic for this course will vary each semester. Topics offered for the following semester will be posted in the departmental office. This course may be repeated once if the topic is different.

BIOL 5069 Topics in Cellular and Molecular Biology: 1 semester hour
Prerequisite: Graduate standing or consent of instructor. Presentation and discussion of student and faculty research projects and/or current research articles in molecular, cellular and developmental biology. May be repeated. Course graded on a satisfactory/unsatisfactory basis.

BIOL 5436 Applied Bioinformatics: 3 semester hours
Prerequisites: BIOL 4712 or BIOL 4602 or consent of instructor. This course provides a survey of the various computational approaches that can be used to solve biological problems. Specific attention will be focused on biological databases and methods for using and interpreting database information, sequence alignments, functional genomics, structure prediction, high-throughput analyses, and proteomics. Three hours of lecture per week.

BIOL 5798 Practicum in Science in Business: 1-2 semester hours
Same As CHEM 5798. Prerequisites: Graduate standing and enrollment in a Professional Science emphasis in Chemistry, Biochemistry & Biotechnology, or Biology. Students will integrate and apply their scientific expertise to a practical, business-related problem. The course will emphasize interdisciplinary team-work as well as both written and oral communication skills.

BIOL 5799 Internship in Sciences in Business: 1-2 semester hours
Same As CHEM 5799. Prerequisites: Graduate standing and enrollment in a Professional Science emphasis area in Chemistry, Biochemistry & Biotechnology, or Biology. The internship will consist of a period of on-the-job training at a local company. Credit hours will be determined by the number of hours the student works each week and in consultation between the intern's supervisor and the course instructor. Internship assignments will be commensurate with the education and experience of the student, with an emphasis on work at the interface between the scientific and business components of the company. A written report describing the internship project is required.
BIOL 6550 Advanced Bacterial Pathogenesis: 3 semester hours
Prerequisites: BIOL 2012 and BIOL 2482. Examination of the strategies bacterial pathogens use to infect animals. Topics include host immune responses to infection, bacterial virulence factors, regulation of bacterial virulence, and the cellular and molecular approaches used to study host-parasite interactions. Students may not receive credit for both BIOL 6550 and BIOL 4550. Students will be required to give an oral presentation and/or write an extra paper on a topic relevant to the course. Three hours of lecture per week.

BIOL 6602 Advanced Molecular Biology: 3 semester hours
Prerequisites: BIOL 2012 and CHEM 2612, or consent of instructor. This course covers advanced principles of molecular biology, with an emphasis on primary literature. Students may be required to give an oral presentation and/or write papers on a topic relevant to the course. Students may not receive graduate credit for both BIOL 4602 and BIOL 6602.

BIOL 6608 Advanced Synthetic Biology: 3 semester hours
Prerequisites: BIOL 2012, BIOL 2482. A study of the molecular biology of microbial cells, in the context of synthetic biological systems. Topics include DNA replication, transcription, translation, gene regulation and protein structure as well as aspects of genetic engineering as they apply to the construction of novel biological systems. Following an introduction to the design of biological parts used in synthetic biology, students read, discuss and present recent journal articles in order to learn about current advances and applications of synthetic biology. Three hours of lecture per week. Students may not receive credit for both BIOL 4608 and BIOL 6608.

BIOL 6615 Advanced Biotechnology Laboratory II: 4 semester hours
Prerequisites: BIOL 4614 and either BIOL 4602 or BIOL 4612, or consent of instructor. An in-depth look at the theory and practice of biotechnology. Lectures and discussion will examine the underlying principles, and laboratory exercises will present hands-on experience with current techniques. One hour of lecture and six hours of laboratory per week. Students will be required to give an oral presentation and/or write an extra paper on a topic relevant to the course. Students may not receive credit for both BIOL 6615 and BIOL 4615 or any course previously called Techniques in Molecular Biology or Advanced Techniques in Molecular Biology.

BIOL 6622 Advanced Cellular Basis of Disease: 3 semester hours
Prerequisites: BIOL 3622, or consent of instructor. A study of the structural organization and processes of eukaryotic cells, focusing on how defects in cellular function lead to genetic diseases and cancer. Topics of discussion may include membrane dynamics, intracellular trafficking, signal transduction, and the cell cycle. Three hours of lecture per week. Students may not receive credit for both BIOL 6622 and BIOL 4622.

BIOL 6632 Advanced Nucleic Acid Structure and Function: 3 semester hours
Prerequisites: BIOL 2012 and BIOL 4712 or equivalent, or consent of instructor. A comprehensive view of the structural properties of DNA and RNA that promote molecular interactions & biological function. Topics will include the physical properties of nucleic acids, the formation and biological importance of higher order structures, RNA enzymatic activities, nucleic acid-protein interactions, and RNA metabolism. Three hours of lecture and one hour of discussion per week. Students may not receive credit for both BIOL 4632 and BIOL 6632.

BIOL 6642 Advanced Plant Biology and Biotechnology: 3 semester hours
Prerequisites: Graduate standing. This course will introduce molecular biology principles that govern plant growth, development, and responses to stress. This course integrates the experimental approaches of genetics, molecular biology, and biochemistry with a specific focus on biotechnology techniques and applications. Student may not receive credit for both BIOL 4642 and BIOL 6642.

BIOL 6652 Advanced Virology: 3 semester hours
Prerequisites: BIOL 2012, BIOL 3622, and graduate standing. This first half of the course entails a comparative study of the structure, replication, and molecular biology of viruses. The second half of the course focuses on the pathogenesis, control, and evolution of animal viruses. Three hours of lecture, one hour of discussion or seminar per week. Students may not receive credit for both BIOL 4652 and BIOL 6652.

BIOL 6699 Graduate Internship in Biotechnology: 1-4 semester hours
Prerequisites: Graduate standing and enrollment in graduate Biotechnology Certificate Program. 6 credit hours maximum (maximum of 8 combined credit hours of BIOL 6905 and internship) Internship will consist of period of observation, experimentation and on-the-job training in biotechnology laboratory. The laboratory may be industrial or academic. Credit will be determined by the number of hours the student works each week and in consultation between the intern's supervisor and the instructor. Internship assignments will be commensurate with the education and experience of the student.

CHEM 1111 Introductory Chemistry I (MOTR CHEM 150L): 5 semester hours
Prerequisites: MATH 1030 (or a score of 26 or higher on either the Math ACT or the Missouri Math Placement Test) and MATH 1035 (MATH 1035 may be taken concurrently). Presents an introduction to the fundamental laws and theories of chemistry. Laboratory experiments are designed to demonstrate some aspects of qualitative and quantitative analysis and to develop skills in laboratory procedures. Chemistry majors may not include both CHEM 1011 and CHEM 1111 in the 120 hours required for graduation. Three hours of lecture, one and one-half hours of workshop, and three hours of laboratory per week.

CHEM 1121 Introductory Chemistry II: 5 semester hours
Prerequisites: CHEM 1111 or advanced placement. Lecture and laboratory are a continuation of CHEM 1111. Three hours of lecture, one and one-half hours of workshop and three hours laboratory per week.

CHEM 2223 Quantitative Analysis in Chemistry: 3 semester hours
Prerequisites: CHEM 1121. This course covers basic analytical chemistry theory and techniques, principles of experimental error analysis, and the application of statistics to data treatment. A significant proportion of the laboratory experiments emphasize quantification of unknown samples.
CHEM 2612 Organic Chemistry I: 3 semester hours
Prerequisite: CHEM 1121 (may be taken concurrently). An introduction to the structure, properties, synthesis, and reactions of aliphatic and aromatic carbon compounds. Three hours of lecture per week.

CHEM 2622 Organic Chemistry II: 3 semester hours
Prerequisite: CHEM 2612. A systematic study of organic reactions and their mechanisms; organic synthetic methods. Three hours of lecture per week.

CHEM 2633 Organic Chemistry Laboratory: 2 semester hours
Prerequisite: CHEM 2612. An introduction to laboratory techniques and procedures of synthetic organic chemistry including analysis of organic compounds. One hour of lecture and four and one-half hours of laboratory per week.

CHEM 3643 Advanced Organic Chemistry Laboratory: 2 semester hours
Prerequisites: CHEM 2223, CHEM 2622, CHEM 2633, and CHEM 3022 (may be taken concurrently). Identification of organic compounds by classical and spectroscopic methods; advanced techniques in synthesis and separation of organic compounds. One hour of lecture and four and one-half hours of laboratory per week. Not for graduate credit.

CHEM 3905 Chemical Research: 1-10 semester hours
Prerequisite: Consent of instructor. Independent laboratory and library study, in conjunction with faculty member, of fundamental problems in chemistry. A written report describing the research is required.

CHEM 4302 Survey of Physical Chemistry with Applications to the Life Sciences: 3 semester hours
Prerequisites: CHEM 2612 and MATH 1800 or MATH 1100, and PHYSICS 1012. This course covers the principles of physical chemistry with applications to the life sciences. Topics will include thermodynamics, equilibria, kinetics, and spectroscopy. This course will be taught simultaneously with CHEM 3302, but students in CHEM 4302 will have additional assignments or projects. No student may receive credit for both CHEM 3302 and CHEM 4302. No student may receive credit for both 4302 and 5302.

CHEM 4712 Biochemistry: 3 semester hours
Same as BIOL 4712. Prerequisites: CHEM 2612 and either BIOL 1831 or CHEM 2622. Examines the chemistry and function of cell constituents, and the interaction and conversions of intracellular substances. Students may not receive credit for both BIOL 4712 and CHEM 4712.

CHEM 4722 Advanced Biochemistry: 3 semester hours
Prerequisite: CHEM 4712. This course covers selected advanced topics in the chemistry of life processes. Students may not receive credit for both CHEM 4722 and CHEM 5722.

CHEM 4733 Biochemistry Laboratory: 2 semester hours
Prerequisites: CHEM 4712 (may be taken concurrently), and CHEM 2223. Laboratory study of biochemical processes in cellular and subcellular systems with emphasis on the isolation and purification of proteins (enzymes) and the characterization of catalytic properties. One hour of lecture and four and one-half hours of laboratory per week.

CHEM 4772 Physical Biochemistry: 3 semester hours
Prerequisites: CHEM 3312 or CHEM 4712 or BIOL 4712. This course is designed to acquaint students with concepts and methods in biophysical chemistry. Topics that will be discussed include protein and DNA structures, forces involved in protein folding and conformational stability, protein-DNA interactions, methods for characterization and separation of macromolecules, and biological spectroscopy. Students may not receive credit for both CHEM 4772 and CHEM 5772.

CHEM 4797 Biochemistry and Biotechnology Seminar: 1 semester hour
Same as CHEM 4797. Prerequisites: Senior standing in the Biochemistry and Biotechnology program and consent of faculty advisor. This course will focus on selected publications related to biochemistry and biotechnology from both refereed journals and news sources. Students are expected to participate in discussions and to prepare oral and written presentations. Completion of the Major Field Achievement Test in Biochemistry & Biotechnology is a course requirement. May not be taken for graduate credit.

CHEM 4814 Special Topics in Chemistry: 1-10 semester hours
A reading and seminar course in selected advanced topics.

CHEM 4897 Seminar in Chemistry: 2 semester hours
Prerequisites: CHEM 3022 and senior standing. This course will provide students with the opportunity to listen to talks presented by students, faculty, and invited speakers. Students must complete a comprehensive examination before the end of the course. Chemistry majors should enroll during the semester in which they intend to graduate, or during their next-to-last semester before graduation.

CHEM 5394 Special Topics in Physical Chemistry: 1-3 semester hours
Prerequisite: Consent of instructor. The topic for this course may change from semester to semester, and more than one course or topic can be offered in a given semester. The course may be taken more than once for credit provided that the topic is different in each case. The course can have more than one instructor.

CHEM 5396 Directed Readings in Physical Chemistry: 1-3 semester hours
Prerequisites: Consent of Physical Chemistry Faculty. A series of readings of monographs, review papers, and/or research publications for a particular student directed at providing that student with appropriate background preparation for experimental or theoretical Ph.D.-level research in an area of physical chemistry. The particular readings will be selected by the physical chemistry staff. Potential topics include but are not limited to advances in Electrochemistry, Surface Chemistry, Thermodynamics, Molecular Spectroscopy, Quantitative Absorption Spectroscopy using new Methodologies, Applications of Group Theory in Spectroscopy, and Computational Chemistry. Assessment may be in various forms including by assignments and seminars. Students may take this course more than once for credit through the particular topic must be different in each case.

CHEM 5494 Special Topics in Inorganic Chemistry: 1-3 semester hours
Prerequisite: Consent of instructor. The topic for this course may change from semester to semester, and more than one course or topic can be offered in a given semester. The course may be taken more than once for credit provided that the topic is different in each case. The course can have more than one instructor.

CHEM 5594 Special Topics in Organic Chemistry: 1-3 semester hours
Prerequisite: Consent of instructor. The topic for this course may change from semester to semester, and more than one course or topic can be offered in a given semester. The course may be taken more than once for credit provided that the topic is different in each case. The course can have more than one instructor.

CHEM 5694 Special Topics in Biotechnology: 1-3 semester hours
Prerequisite: Consent of instructor. The topic for this course may change from semester to semester, and more than one course or topic can be offered in a given semester. The course may be taken more than once for credit provided that the topic is different in each case. The course can have more than one instructor.
CHEM 5774 Bioinformatics: 3 semester hours
Prerequisites: CHEM 4712 or equivalent. This course introduces modern approaches in bioinformatics and computational biochemistry. Topics to be covered include a survey of biological databases, predictions from protein and DNA sequences, sequence alignment and sequence database searches, building phylogenetic trees, three-dimensional protein structure prediction, molecular modeling and simulation, and computational genomics. Additional independent study work is required. Students may not receive credit for both CHEM 4774 and CHEM 5774.

CHEM 5794 Special Topics in Biochemistry: 1-3 semester hours
Prerequisites: Consent of instructor. The topic for this course may change from semester to semester, and more than one course or topic can be offered in a given semester. The course may be taken more than once for credit provided that the topic is different in each case. The course can have more than one instructor.

CHEM 5798 Practicum in Science in Business: 1-2 semester hours
Same as: BIOL 5798. Prerequisites: Graduate standing and enrollment in a Professional Science emphasis in Chemistry, Biochemistry & Biotechnology, or Biology. Students will integrate and apply their scientific expertise to a practical, business-related problem. The course will emphasize interdisciplinary team-work as well as written and oral communication skills.

CHEM 5799 Internship in Science in Business: 1-2 semester hours
Same as: BIOL 5799. Prerequisites: Graduate standing and enrollment in a Professional Science emphasis area in Chemistry, Biochemistry & Biotechnology, or Biology. The internship will consist of period of on-the-job training at a local company. Credit hours will be determined by the number of hours the student works each week and in consultation between the intern’s supervisor and the course instructor. Internship assignments will be commensurate with the education and experience of the student, with an emphasis on work at the interface between the scientific and business components of the company. A written report describing the internship project is required.

CHEM 6787 Problem Seminar in Biochemistry: 1 semester hour
Prerequisite: Consent of the biochemistry staff. Problems from the current literature, presentations and discussions by faculty, students and visiting scientists. Ph.D. students may take more than once for credit. Up to three credits may be applied to the M.S. degree program.

CHEM 6897 Chemistry Colloquium: 1 semester hour
Presentation of papers by students, faculty and invited speakers. One hour per week.

CHEM 6905 Graduate Research in Chemistry: 1-10 semester hours

Minor in Biology
Students majoring in another discipline may earn a minor in biology by completing a prescribed course of study. Unique programs can be developed to coordinate with special career objectives.

Departmental Honors
The Department of Biology offers an Honors Program to train students in conducting research in areas of biological research currently under study in the Department.

Graduate Studies
The Department of Biology offers graduate work leading to the M.S. and Ph.D. degrees in biology. Graduate students will normally work toward an M.S. or Ph.D. degree in two broad areas of biology: a) cellular, molecular, and developmental biology, or b) ecology, evolution, and systematics. Students in the M.S. and Ph.D. programs also have the opportunity to do their graduate work in collaboration with scientists at the Missouri Botanical Garden, the Donald Danforth Plant Science Center, or the Saint Louis Zoo through cooperative graduate programs.

Facilities
Department facilities include research and teaching laboratories, environmental chambers, greenhouses, and a large array of supporting modern research instrumentation. Graduate research can be pursued using facilities of the Missouri Botanical Garden, the Donald Danforth Plant Science Center, or the Saint Louis Zoo. Several sites within an hour of campus are suitable for regional field studies, including state parks, wildlife conservation areas, the Shaw Nature Reserve, and Washington University’s Tyson Research Center. UMSL is a member of the St. Louis University Research Station Consortium that operates Lay and Reis Field Stations in Missouri and is also a member of the Organization for Tropical Studies, which operates three field stations in Costa Rica. CEIBA Biological Centre in Guyana has hosted several UMSL courses and student researchers. Student researchers work independently at research stations throughout the tropics.

Cooperative Programs
The department participates in a cooperative consortium program in biology with Washington University, Saint Louis University, Southern Illinois University-Edwardsville, and the Missouri Botanical Garden.

Program Objectives and Career Prospects
The degree program at the baccalaureate level is designed to prepare the student for further professional training in areas such as medicine, dentistry, veterinary medicine, optometry, plant science, conservation, and related areas or for further graduate training in research in biology.

The Undergraduate Certificates in Biotechnology and Conservation Biology are for majors interested in careers in biotechnology and associated areas and in conservation, respectively.

The Master of Science program is an extension of the undergraduate program and provides the research-oriented training and education necessary for students to enter doctoral programs in biology and develops professional biologist qualified to function in responsible technical positions. It also trains students to become effective secondary school and junior college biology teachers.
The Graduate Certificates in Biotechnology and in Tropical Biology and Conservation provide professional training in the areas of biotechnology and conservation.

The Ph.D. program prepares students to be research biologists in academics or other professional fields in ecology, evolution and systematic and cellular and molecular biology. Employment opportunities are available in college or university research and teaching, in government and public institutions such as museums, botanical gardens and conservation organizations, and in industry.

**Degrees**

Biology BA (p. 326)
Biology BS (p. 329)
Biology BS/MS Dual Degree Program (p. 334)
Biology MS (p. 335)
- Cell and Molecular Biology Emphasis (p. 335)
- Ecology Evolution and Systematics Emphasis (p. 336)
- Professional Science in Cellular and Molecular Biology Emphasis (p. 337)

Biology PhD
- Cell and Molecular Biology Emphasis (p. 337)
- Ecology, Evolution and Systematics Emphasis (p. 339)

**Minors**

Biology Minor (p. 334)
Environmental Studies Minor (p. 461)

**Certificates**

Biotechnology Graduate Certificate (p. 340)
Global Biodiversity Conservation and Leadership Graduate Certificate (p. 466)

**Courses**

**BIOL 1010 Introduction to Student Research: 1-3 semester hours**
Prerequisites: Minimum of four semesters of high school science and math courses and consent of the instructor. This course provides high school students an opportunity to develop individual research projects under faculty mentorship. It includes interdisciplinary lectures, demonstrations, seminars, and project guidance. Evaluation will be based on written and oral presentation of the research project and student portfolio.

**BIOL 1012 General Biology (MOTR BIOL 100): 3 semester hours**
Emphasis on fundamental principles of biology. BIOL 1012 can be applied toward fulfillment of the general education requirement in science. BIOL 1012 does not satisfy the prerequisite requirements in other courses in biology at the 2000 level or above. Students who plan to pursue a career in medicine or one of the medical-oriented professions should enroll in BIOL 1831 rather than BIOL 1012.

**BIOL 1013 General Biology Laboratory: 1 semester hour**
Prerequisite: BIOL 1012 (may be taken concurrently). This Laboratory course accompanies BIOL 1012. BIOL 1013 can be used to fulfill the general education requirements in a laboratory science. BIOL 1013 does not meet the prerequisite requirements for other courses in biology. Two and one-half hours of laboratory per week.

**BIOL 1020 Introduction to the Biology Major: 1 semester hour**
Prerequisites: Biology major or consent of the instructor. This course is an orientation to the field of biology for majors and for students who are considering declaring the major. This course introduces students to concepts, skills, and practices that are essential for success as a Biology major and must be completed by all freshman and transfer Biology majors during their first semester of study at UMSL.

**BIOL 1031 Laboratory: 1 semester hour**
Prerequisite: BIOL 1012. BIOL 1031 can be used to fulfill the general education requirements in a laboratory science. BIOL 1013 does not meet the prerequisite requirements for other courses in biology. Two and one-half hours of laboratory per week.

**BIOL 1102 Human Biology (MOTR LIFS 150): 3 semester hours**
Lectures and readings concerned with the reproduction, development, genetics, functional anatomy, behavior, ecology, and evolution of the human species. Three hours lecture per week. Fulfills Science/Math requirement.

**BIOL 1110 Nutrition in Health: 3 semester hours**
This course studies dietary nutrients essential for health, proper selection of foods to provide them and current issues affecting them.

**BIOL 1131 Human Physiology and Anatomy I: 4 semester hours**
Prerequisites: BIOL 1012 or equivalent or consent of instructor. This course covers the basic aspects of the structure of the healthy human body and how it functions. Special emphasis is on how the human body adapts itself to its environment and how changes affect physiological activities. Three hours lecture and two hours laboratory per week.

**BIOL 1141 Human Physiology and Anatomy II: 4 semester hours**
Prerequisite: BIOL 1131. A continuation of BIOL 1131. A study of the basic aspects of human physiology and anatomy. Three hours lecture and two hours laboratory per week.

**BIOL 1162 General Microbiology: 3 semester hours**
Prerequisite: BIOL 1012 or its equivalent. A survey of microbiology structure, genetics, and physiology. Special emphasis will be placed on the transmission and control of such organisms as it relates to the maintenance of human health. Three hours of lecture per week.

**BIOL 1202 Environmental Biology: 3 semester hours**
An examination of the biological basis of current environmental problems, with emphasis upon resources, energy, pollution and conservation. Three hours lecture per week. Fulfills Science/Math requirement.

**BIOL 1212 Applied Environmental Sciences: 4 semester hours**
In a combined lecture/laboratory setting, students will get hands-on experience collecting and testing environmental samples for abiotic factors such as contaminants, and experimentally assessing the impact of those contaminants on the biological communities contained within the samples. Important approaches include global positioning and information technologies, microscopy, microbiological techniques, genomics, and quantitative analytical measures for assessing the physical, biological and chemical properties of collected samples.

**BIOL 1800 Introduction to the Biology Major: 1 semester hour**
Prerequisites: Biology major or consent of the instructor. This course is an orientation to the field of biology for majors and for students who are considering declaring the major. This course introduces students to concepts, skills, and practices that are essential for success as a Biology major and must be completed by all freshman and transfer Biology majors during their first semester of study at UMSL.

**BIOL 1821 Introductory Biology: Organisms and the Environment (MOTR BIOL 150): 5 semester hours**
Prerequisites: A minimum of high school chemistry, ENGL 1100 or equivalent (may be taken concurrently), and placement into college algebra or higher. Required for students intending to major in biology or take specified biology courses at the 2000 level or above. This course presents an introduction to some of the principles of biology and scientific methodology applied to the organism and supraorganism levels of biology. Topics to be covered include: ecology, evolution, diversity, and population biology. Three hours of lecture and one hour of discussion per week.
BIOL 1831 Introductory Biology: From Molecules to Organisms (MOTR BIOL 150L): 5 semester hours
Prerequisites: A minimum of high school chemistry and MATH 1030; ENGL 1100 or equivalent (may be taken concurrently). Required for students intending to major in biology or take specified biology courses at the 2000 level or above. This course presents and introduction to some of the principles of biology and scientific methodology applied to the molecular/cellular through organ system levels of organization. Topics include: cell structure, metabolism, reproduction, heredity and major physiological processes regulated by organ systems. Three hours of lecture, three and one half hours of lab, and one hour of discussion per week.

BIOL 1920 Introductory Topics in Biology: 1-5 semester hours
Prerequisites: Consent of Instructor. The topics will vary each semester. See online course schedule for topics. Credit arranged. May be taken more than once for credit if topics are different. The applicability toward a Biology degree is dependent on the topic.

BIOL 1999 Evolution for Everyone: 3 semester hours
Evolution for Everyone explores the development of our current understanding by examining modern and ancient controversies, and by studying major processes by which change occurs. Lectures will present overviews and many examples on topics in history, mechanisms, and outcome of evolutionary change, and students will participate in classroom and online discussions based on readings, computer exercises, and data collection and analysis. Course may not be applied towards major in Biology. Not eligible for credit with BIOL 3302 (Introduction to Evolution) required for Biology majors.

BIOL 2010 Introduction to Inquiry Approaches to STEM Education (STEP I): 1 semester hour
Same as CHEM 2010, PHYSICS 2010, MATH 2010, and SEC ED 2010. Prerequisites: Concurrent enrollment BIOL 1821, BIOL 1831, CHEM 1111, CHEM 1121, PHYSICS 2111, PHYSICS 2112, MATH 1800, or MATH 1900 or have a declared STEM major. Students who want to explore teaching careers become familiar with lesson plan development by writing, teaching and observing lessons in a local school class. Students build and practice inquiry-based lesson design skills and become familiar with and practice classroom management in the school setting. As a result of the STEP I experiences students should be able to decide whether to continue to explore teaching as a career and ultimately finishing the remainder of the WE TEACH MO curriculum leading to teacher certification. The classroom observations and teaching represent a major field component and requires at least one two hour block of free time during the school day once a week.

BIOL 2011 Designing Inquiry-Based STEM Experiences (STEP II): 1 semester hour

BIOL 2012 Genetics: 3 semester hours
Prerequisites: BIOL 1831 (majors must also take BIOL 1821) MATH 1030, and CHEM 1111 or (CHEM 1081 plus CHEM 1091). Fundamental principles of inheritance, including classical genetic theory as well as recent advances in the molecular basis of heredity. Three hours of lecture per week. Fulfills Science/Math requirement.

BIOL 2013 Genetics Laboratory: 2 semester hours
Prerequisites: Concurrent registration in BIOL 2012, or consent of instructor. Laboratory to accompany BIOL 2012. Three and one-half hours of organized laboratory time per week. Students may need to return to the laboratory at unscheduled times to complete some exercises.

BIOL 2102 Ecology: 3 semester hours
Prerequisites: BIOL 1821 and BIOL 1831. This course examines the relationships between living organisms and their environment.

BIOL 2103 Ecology Laboratory: 2 semester hours
Prerequisites: BIOL 2102 (may be taken concurrently); a general statistics course is strongly recommended. This laboratory course analyzes environmental factors influencing the abundance and distribution of living organisms. Some classes will be held at field sites in and around St. Louis.

BIOL 2402 Vertebrate Anatomy: 3 semester hours
Prerequisites: BIOL 1821 and BIOL 1831. Development, structure, function, interrelationships, and zoogeography of vertebrate animals with particular attention to phylogenetic aspects. Three hours of lecture per week. Fulfills Science/Math requirement.

BIOL 2403 Vertebrate Anatomy Laboratory: 2 semester hours
Prerequisites: BIOL 2402 (may be taken concurrently). Laboratory to accompany BIOL 2402. Morphological analysis and systematic survey of major vertebrate groups. Overview of the vertebrate life forms and their adaptations to habitats and resources. Three and one-half hours of laboratory per week.

BIOL 2482 Microbiology: 3 semester hours
Prerequisites: BIOL 1831 (majors must also take BIOL 1821), MATH 1030, and CHEM 1111. Study of microorganisms, their metabolism, genetics, and their interaction with other forms of life. Three hours of lecture per week.

BIOL 2483 Microbiology Laboratory: 2 semester hours
Prerequisites: BIOL 2482 (may be taken concurrently). Experimental studies and procedures of microbiological techniques. Three and one-half hours of organized laboratory time per week. Students will need to return to the laboratory at unscheduled times to complete some exercises.

BIOL 2501 Biology of Plants: 5 semester hours
Prerequisites: BIOL 1821 and BIOL 1831. A general discussion of the plant groups from algae through angiosperms. Plant morphology, physiology, reproduction and ecology will be discussed in lecture (three hours per week). The laboratory (three and one half hours per week) involves examination of representatives of the plant kingdom and experimentation in plant physiology and genetics. Fulfills both a lecture and laboratory requirement.

BIOL 2920 Contemporary Topics in Biology: 1-5 semester hours
Prerequisites: Consent of Instructor. The topics will vary each semester. See course schedule online for topics. Credit arranged. May be taken more than once for credit if topics are different.

BIOL 3001 Experiential Practicum in Biosciences: 1 semester hour
Prerequisites: Consent of Biology Curriculum Committee. Credit for off-campus bioscience projects providing extraordinary student experience and service to a community in need.

BIOL 3102 Animal Behavior: 3 semester hours
Prerequisites: BIOL 1821 and BIOL 1831. The study of invertebrate and vertebrate behavior, including neurophysiological, hormonal, developmental, genetic, ecological and evolutionary aspects of behavior; behavior interactions within and between populations. Three hours of lecture per week.
BIOL 3103 Animal Behavior Laboratory: 2 semester hours  
Prerequisites: BIOL 3102 (may be taken concurrently). Observational and experimental studies of animal behavior in the field and laboratory. Three and one-half hours of formal laboratory time per week, but additional time may be required for independent projects. Some activities involve field trips or trips to the St. Louis Zoo.

BIOL 3202 Conservation Biology: 3 semester hours  
Prerequisites: BIOL 1821 and BIOL 1831. Introduction to the principles and theories of conservation biology. Course topics include biodiversity, extinctions, population modeling, habitat fragmentation, conservation area management, restoration ecology, and social science elements of conservation strategies. Class sessions will include lectures, discussions, and simulation exercises. Three hours of lecture per week.

BIOL 3203 Conservation Biology Laboratory: 2 semester hours  
Prerequisite: BIOL 3202 (recommended to be taken concurrently). Laboratory to accompany BIOL 3202. Laboratory will include computer simulations of conservation problems using existing software, 2-3 field trips to local conservation projects, and field interviews with governmental and nongovernmental agencies. Three and one-half hours of laboratory per week.

BIOL 3302 Evolution: 3 semester hours  
Prerequisites: BIOL 1821, BIOL 1831, BIOL 2012, and MATH 1030. This course covers the theory, events, and processes of organic evolution.

BIOL 3622 Cell Biology: 3 semester hours  
Prerequisites: BIOL 1831, BIOL 2012, CHEM 1121, and MATH 1030. This course examines the organization and basic processes of cells including tissues, organelles, glycolysis, respiration, photosynthesis, trafficking, cytoskeleton, signal transduction, and cell division.

BIOL 3631 Histology and Microtechniques: 5 semester hours  
Prerequisites: BIOL 1831 (majors must also take BIOL 1821), BIOL 3622 recommended. The basic principles of histology. A survey of basic tissues and organ systems. Techniques associated with preparation of animal tissues for light microscopic studies. Three hours of lecture and 3 1/2 hours of laboratory per week. (Additional lab hours arranged). Fulfills both a lecture and a laboratory requirement.

BIOL 3699 Undergraduate Internship in Biotechnology: 1-4 semester hours  
Prerequisites: BIOL 1821, BIOL 1831, and CHEM 1111 and CHEM 1121 and consent of instructor. Concurrent enrollment in CHEM 2612 or higher is strongly encouraged. A 2.5 GPA and enrollment in the undergraduate Biotechnology Certificate Program is required. Internship will consist of a period of observation, experimentation and on-the-job training in a biotechnology laboratory. The laboratory may be industrial or academic. Credit will be determined by the number of hours a student works each week and in consultation between the intern's supervisor and instructor. Internship assignments will be commensurate with the education and experience of the student. Two credits may be used to fulfill the lab requirement.

BIOL 3802 Vertebrate Physiology: 3 semester hours  
Prerequisites: BIOL 1821 and BIOL 1831 and CHEM 1111 or CHEM 1081 plus CHEM 1091. Basic functional aspects of organ systems in relation to the physiochemical properties of protoplasm. Three hours lecture per week. Fulfills Science/Math requirement.

BIOL 3803 Vertebrate Physiology Lab: 2 semester hours  
Prerequisite: BIOL 3802 (may be taken concurrently). Instrumental and experimental studies in physiology. Three and one-half hours laboratory per week.

BIOL 3920 Special Topics in Biology: 1-5 semester hours  
Prerequisites: Consent of instructor. The topics will vary each semester. See course schedule online for topics. Credit arranged. May be taken more than once for credit if topics are different.

BIOL 4102 Behavioral Ecology: 3 semester hours  
Prerequisite: BIOL 3102 (BIOL 3302 recommended). The evolution and ecology of animal behavior. Topics include the theoretical framework for making predictions, foraging, decision making, sensory ecology, sexual selection, mating systems, sociality and groups, cooperation, signal use and communication. Three hours of lecture per week. Students may not receive credit for both BIOL 4102 and BIOL 6102.

BIOL 4122 Biometry: 3 semester hours  
Prerequisites: MATH 1030 and a minimum of 15 hours in biology. Reviews descriptive, analytical, and experimental methods useful for the statistical study of biological phenomena. Students will develop the skills needed to better appreciate and evaluate the published literature, as well as the ability to design their own research programs. Topics include: the collection and summarization of biological observations; development, design, and testing of hypothesis; analysis and presentation of data. Three hours of lecture per week. Fulfills the statistics requirement for the B.A. or B.S. degree in biology.

BIOL 4182 Population Biology: 3 semester hours  
Prerequisite: BIOL 2102 and BIOL 2012 (BIOL 3302 recommended). Introduces concepts and mathematical models of population ecology and population genetics. By integrating the ecology and genetics of populations, the course goal is to understand the processes that contribute to microevolution of populations. Topics include: demography, metapopulation biology, natural selection, migration, gene flow, and genetic drift. Three hours of lecture per week. Students may not receive credit for both BIOL 4182 and BIOL 6182.

BIOL 4192 Applications of Geographic Information Systems: 5 semester hours  
Prerequisites: BIOL 2102, BIOL 4122 or equivalent, and consent of instructor. Geographic Information Systems (GIS) are sophisticated computer-based systems for analysis, capture, presentation, and maintenance of geographically referenced data. This course provides a foundation in using GIS for spatial analysis. Although biological examples are primarily used, examples from a range of disciplines are employed to emphasize the use of GIS as a tool to support analysis and decision-making. Students will have hands-on use of GIS software during each session. An independent research project applying the spatial analysis tools learned in GIS to biological research will be required. Five hours of combined lecture and computer operations, plus 2-3 hours of open lab per week. Fulfills both a lecture and a laboratory requirement. Students may not receive credit for both BIOL 4192 and BIOL 6192.

BIOL 4192 Tropical Ecology and Conservation: 3 semester hours  
Prerequisite: BIOL 2102, BIOL 4182, BIOL 5192, or equivalent. This course will cover research areas in tropical population, community and ecosystem ecology, with emphasis on inter-species and environment-organism interactions, population control factors, and genetic structure of populations. Topics include the current status and causes of tropical habitat destruction, ongoing attempts to manage those habitats, and development of strategies leading to sustained use of non-renewable resources. Three hours of lecture per week. Students may not receive credit for both BIOL 4222 and BIOL 6222.
BIOL 4245 Field Biology: 3 semester hours
Prerequisite: Three biology courses and consent of instructor. Intensive study of the flora and fauna of selected natural areas of North America, including an extended field trip. Details of the field trip and course schedule will be posted in the Biology department preceding registration for the term in which the course will be offered. Students will be required to pay costs of travel and of the field trip. This is a laboratory course appropriate for advanced undergraduates and non-thesis Master of Science students.

BIOL 4270 Global Climate Change: 3 semester hours
Prerequisites: BIOL 3302 or consent of instructor. Topics included are fundamental physical, meteorological, and biological circumstances of global climate change, as well as predictions of its future effects on biological diversity, including humans, and how those estimates are made. In addition, basic environmental economics and politics of climate change at local and global levels will be included. The course will be taught as a series of lectures and discussions led by guest experts in each of the subdisciplines covered. Students may not receive credit for both BIOL 4270 and BIOL 6270.

BIOL 4299 Practicum in Conservation: 2 semester hours
Prerequisites: BIOL 3202 and consent of instructor. This course is generally restricted to students officially enrolled in the Certificate Program in Conservation Biology. The course provides practical experience with conservation or environmental agencies. Specific placement will be selected according to student’s interests and career goals as well as availability of agency openings. Course requirements include practical experience and final report on practicum experience.

BIOL 4402 Ornithology: 3 semester hours
Prerequisites: BIOL 2102 and junior standing. Introduction to avian biology and ecology. Material to be covered will include basic adaptations of anatomy, physiology, and behavior of birds. There will be a strong emphasis on avian ecology and conservation. Specific topics will include flight, reproductive behavior, migration, foraging behavior, community structure, and current conservation concerns. The diversity of birds will be emphasized through comparisons between temperate and tropical regions. Three hours of lecture per week.

BIOL 4403 Ornithology Laboratory: 2 semester hours
Prerequisites: BIOL 4402 (may be taken concurrently), or consent of instructor. This course will introduce students to methods of identifying and studying birds. Labs will almost entirely be comprised of field trips to local areas and will emphasize diversity of birds, adaptions shown by different groups, and means of identification, particularly of birds found in Missouri. Field projects will focus on techniques for censusing birds, sampling foraging behavior, and studying habitat selection. Indoor periods will cover internal and external anatomy of birds. Slides and field trips to the St Louis Zoo will be used to survey the diversity of birds worldwide. Three and one-half hours of laboratory per week. Longer (e.g., Saturday) field trips will be made when appropriate.

BIOL 4422 Entomology: 3 semester hours
Prerequisites: BIOL 1821, BIOL 1831, 9 additional hours of biology and upper-division standing. Development, structure, function, behavior and ecology of insects, including a systematic survey of the orders of Insecta. Three hours of lecture per week.

BIOL 4423 Entomology Laboratory: 2 semester hours
Prerequisites: BIOL 4422 (may be taken concurrently). Laboratory to accompany BIOL 4422. Studies of the morphology, physiology, and behavior of insects to give a sampling of biological studies of the class Insecta. Formation of a collection of insects, comprising a systematic survey of orders and principal families, will be an integral part of the course and will require additional time beyond the official lab hours. Three and one-half hours of lab per week.

BIOL 4442 Developmental Biology: 3 semester hours
Prerequisites: BIOL 2012 and BIOL 3622. A study of the basic principles that shape the embryonic and post-embryonic development of animals with an emphasis on the underlying cellular and molecular mechanisms. Specific topics include fertilization, determination of cell fate and differentiation, cell migration, establishment of the body plan, formation of selected organs and organ systems, stem cells, and limb regeneration. Environmental influences on development and the impact of developmental biology on modern medicine are also discussed. Three hours of lecture/discussion per week. Students may not receive credit for both BIOL 4442 and BIOL 6442.

BIOL 4501 Flowering Plant Families: Phylogeny and Diversification: 5 semester hours
Prerequisites: BIOL 1821, BIOL 1831 and junior standing or consent of instructor. Focusing on the flowering plant families of North America, the aim of the course is to give an understanding of their phylogeny and diversification. Student will also gain an understanding of plant morphology and anatomy, a basis for further developing their knowledge of plants. Three hours of lecture and three to four hours of laboratory per week. Students may need to return to the laboratory at unscheduled times.

BIOL 4502 Evolution of Cognition: 3 semester hours
Prerequisites: BIOL 3102 or consent of instructor; BIOL 3302 and PSYCH 2211 are strongly recommended. The evolutionary ecology of animal cognitive abilities. Topics include learning, memory, perception, navigation, and communication from an evolutionary perspective. The focus is on cognitive abilities as adaptations, which have evolved to solve specific environmental problems. Topics include empirical methods for assessing cognitive ability, experimental design, theoretical approaches for generating predictions, and the parsimonious interpretation of data. Two hours of lecture and one hour of discussion per week.

BIOL 4550 Bacterial Pathogenesis: 3 semester hours
Prerequisites: BIOL 2012 and BIOL 2482. Examination of the strategies bacterial pathogens use to infect animals. Topics include host immune responses to infection, bacterial virulence factors, regulation of bacterial virulence, and the cellular and molecular approaches used to study host-parasite interactions. Three hours of lecture per week. Students may not receive credit for both BIOL 4550 and BIOL 6550.

BIOL 4602 Molecular Biology: 3 semester hours
Prerequisites: BIOL 2012 and CHEM 2612. This course is a survey of the principles of molecular biology, with emphasis on understanding the genetic regulation of DNA, RNA, and protein synthesis and function in eukaryotic cells.
Prerequisites: BIOL 2012, BIOL 2482. A study of the molecular biology of microbial cells, in the context of synthetic biological systems. Topics include DNA replication, transcription, translation, gene regulation and protein structure as well as aspects of genetic engineering as they apply to the construction of novel biological systems. Following an introduction to the design of biological parts used in synthetic biology, students read, discuss and present recent journal articles in order to learn about current advances and applications of synthetic biology. Three hours of lecture per week. Students may not receive credit for BIOL 4608 and BIOL 6608.

BIOL 4614 Biotechnology Laboratory I: 4 semester hours
Prerequisites: BIOL 2012 or consent of instructor. An introduction to the fundamental concepts that underlie the field of biotechnology. Both the basic principles of molecular biology and hand-on experience with the techniques of the field will be addressed through lectures, discussions, and a series of laboratory exercises. Two hours of lecture and four hours of laboratory per week. Fulfills a laboratory requirement only; may not be used to fulfill the higher level (4000-5000) lecture course requirement for the B.A. or B.S. degree in biology. Students may not receive credit for BIOL 4614 and a comparable biotechnology course from another institution.

BIOL 4615 Biotechnology Laboratory II: 4 semester hours
Prerequisites: BIOL 4614 and either BIOL 4602 or BIOL 4612, or consent of instructor. An in-depth look at theory and practice of biotechnology. Lectures and discussion will examine the underlying principles, and laboratory exercises will present hands-on experience with current techniques. One hour of lecture and six hours of laboratory per week. Fulfills a laboratory requirement only; may not be used to fulfill the higher level (4000-5000) lecture course requirement for the B.A. or B.S. degree in biology. Students may not receive credit for BIOL 4615 and BIOL 6615.

BIOL 4622 Cellular Basis of Disease: 3 semester hours
Prerequisites: BIOL 4622. A study of the structural organization and processes of eukaryotic cells, focusing on how defects in cellular function lead to genetic diseases and cancer. Topics of discussion may include membrane dynamics, intracellular trafficking, signal transduction, and the cell cycle. Three hours of lecture per week. Students may not receive credit for both BIOL 4622 and BIOL 6622.

BIOL 4632 Nucleic Acid Structure and Function: 3 semester hours
Prerequisites: BIOL 2012 and BIOL 4712 or equivalent, or consent of instructor. A comprehensive view of the structural properties of DNA and RNA that promote molecular interactions and biological function. Topics will include the physical properties of nucleic acids, the formation and biological importance of higher order structures, RNA enzymatic activities, nucleic acid-protein interactions, and RNA metabolism. Three hours of lecture per week. Students may not receive credit for both BIOL 4632 and BIOL 6632.

BIOL 4642 Plant Molecular Biology and Biotechnology: 3 semester hours
Prerequisites: BIOL 2012, BIOL 3622. This course will introduce molecular biology principles that govern plant growth, development, and responses to stress. This course integrates the experimental approaches of genetics, molecular biology, and biochemistry, with a specific focus on biotechnology techniques and applications. Students may not receive credit for both BIOL 4642 and BIOL 6642.

BIOL 4652 Virology: 3 semester hours
Prerequisite: BIOL 2012 and BIOL 3622. This first half of the course entails a comparative study of the structure, replication, and molecular biology of viruses. The second half of the course focuses on the pathogenesis, control, and evolution of animal viruses. Three hours of lecture per week. Students may not receive credit for both BIOL 4652 and BIOL 6652.

BIOL 4662 Human Pathology: 3 semester hours
Prerequisites: BIOL 3622 or consent of the instructor. A study of disease processes as they affect the human body. The course will examine both the proximate causes and underlying mechanisms of disease. Specific conditions will be used to illustrate application of clinical approaches in determining the origin, development, and effects of a disease.

BIOL 4712 Biochemistry: 3 semester hours
Same as: CHEM 4712. Prerequisites: CHEM 2612 and either BIOL 1831 or CHEM 2622. Examines the chemistry and function of cell constituents, and the interaction and conversions of intracellular substances. Students may not receive credit for both BIOL 4712 and CHEM 4712.

BIOL 4713 Techniques in Biochemistry: 2 semester hours
Prerequisites: BIOL 4712 or CHEM 4712 (may be taken concurrently). Laboratory activities introducing fundamental qualitative and quantitative biochemical techniques. Student evaluation will be based on laboratory participation, student laboratory reports, and written examinations. Three and one-half hours of organized laboratory time per week. Students may need to return to the laboratory at unscheduled times to complete some experiments.

BIOL 4797 Biochemistry and Biotechnology Seminar: 1 semester hour
Same as CHEM 4797. Prerequisites: Senior standing in the Biochemistry and Biotechnology program and consent of faculty advisor. This course will focus on selected publications related to biochemistry and biotechnology from both refereed journals and news sources. Students are expected to participate in discussions and to prepare oral and written presentations. Completion of the Major Field Achievement Test in Biochemistry & Biotechnology is a course requirement. May not be taken for graduate credit.

BIOL 4822 Introduction to Neuroscience: 3 semester hours
Prerequisite: BIOL 3802 or consent of instructor. The study of nervous systems, featuring the cellular bases of initiation and conduction of impulse, synaptic transmission, and the network integrative function of invertebrate and vertebrate nervous systems. This course emphasizes the multidisciplinary nature of the neurosciences, including anatomical, physiological and molecular approaches to understanding neural function. Three hours of lecture per week.

BIOL 4842 Immunobiology: 3 semester hours
Prerequisite: BIOL 3622 and CHEM 2612. The fundamental principles and concepts of immunology and immunochemistry. Emphasis on the relation of immunological phenomena to biological phenomena and biological problems. Three hours lecture per week.

BIOL 4889 Senior Seminar: 2 semester hours
Prerequisites: BIOL 1821, BIOL 1831, BIOL 2012, and BIOL 3302, with a total of at least 30 credits in Biology and the consent of your assigned Biology Advisor. Oral and written presentation by students of selected scientific papers or articles. Students are expected to participate in discussions of oral presentations by other students. May not be taken for graduate credit.
BIOL 4905 Research: 1-3 semester hours
Prerequisites: Consent of faculty research advisor. Research in an area selected by the student in consultation with and under the direct supervision of an UMSL biology faculty research adviser. Research opportunities are subject to availability and must be approved in advance of beginning research. The project may include the reading of pertinent literature, laboratory or field experience, including keeping of a labbook, and a summary paper and a presentation, all based on an average 8 hours per week per credit during a 15 week semester at the discretion of the instructor. Credit arranged. Course may be repeated for a total of up to 5 credit hours. A maximum of one lab requirement may be satisfied using any two BIOL 4905 credits. Additional credits may be applied toward the total biology hours required for the biology BA or BS. May not be taken for graduate credit.

BIOL 4915 Biology Internship: 1-3 semester hours
Prerequisites: Consent of faculty research advisor; generally restricted to junior and senior standing. Research in an area selected by the student to be conducted off-campus in a lab of a professional researcher or faculty person (the internship mentor) other than those in UMSL Biology. Research opportunities are subject to availability and must be approved in advance of beginning research by an UMSL biology faculty liaison and the internship mentor. The project normally includes the reading of pertinent literature, laboratory or field experience, including keeping of a labbook, and a summary paper and a presentation, all based on an average 8 hours per week per credit during a 15 week semester. Credit arranged. This course and BIOL 4905 may be repeated in any combination for a total of up to 5 credit hours. A maximum of one lab requirement may be satisfied using any two BIOL 4905 and/or BIOL 4915 credits. Additional credits may be applied toward the total biology hours required for the biology BA or BS.

BIOL 4920 Selected Topics in Biology: 3 semester hours
Prerequisites: Junior standing and consent of instructor. The topic for this course will vary each semester. Topics offered for the following semester will be posted in the departmental office. This course may be repeated once if the topic is different.

BIOL 5012 Advanced Genetics: 3 semester hours
Prerequisites: BIOL 2012 or consent of instructor. This course explores advanced topics in the study of genetics, including advanced principles of inheritance, classical genetic theory, advances in understanding the nature of genetic material, and the molecular basis of heredity. Variation between individuals and populations will be considered to emphasize the effects of genetics on both medical and evolutionary questions. A particular focus will be placed on identifying, analyzing, and communicating findings from recent primary literature.

BIOL 5059 Topics in Ecology, Evolution, and Systematics: 1 semester hour
Prerequisites: Graduate Standing. Presentation and discussion of faculty and student current research projects in behavior, ecology, evolution, and systematics. May be repeated.

BIOL 5069 Topics in Cellular and Molecular Biology: 1 semester hour
Prerequisite: Graduate standing or consent of instructor. Presentation and discussion of student and faculty research projects and/or current research articles in molecular, cellular and developmental biology. May be repeated. Course graded on a satisfactory/unsatisfactory basis.

BIOL 5079 Topics in Floristic Taxonomy: 1 semester hour
Prerequisite: BIOL 2501 or equivalent, and graduate standing. Seminar course in systematics of higher plants, arranged in the Cronquist sequence of families, covering morphology, anatomy, palynology, biogeography, chemosystematics, cytology, and other aspects of plant classification and phylogenetics. Given at the Missouri Botanical Garden. One hour per week.

BIOL 5089 Topics in Animal Behavior: 1 semester hour
Prerequisites: Graduate standing. Presentation and discussion of current research articles and/or student and faculty research projects in animal behavior, including ecology, evolution, genetics, and mechanisms of behavior. May be repeated.

BIOL 5099 Biology Colloquium: 1 semester hour
Prerequisites: Graduate standing. Attendance is required for the Biology weekly seminar series, consisting of research presentations by department faculty and invited speakers. Class sessions will include discussion of scientific research and presentation practices.

BIOL 5123 Advanced Tropical Resource Ecology Field Studies: 2 semester hours
Prerequisites: BIOL 5122 (may be taken concurrently). The field component to the lecture and seminar course. Examines the patterns of use and exploitation of resources in the topics by humans in the context of the theories of behavioral ecology. Two weeks of intensive field research and lectures in Guyana, South America during the second and third weeks of Summer Session I (trip costs to be borne by the student). Students may not receive credit for both BIOL 3123 and BIOL 5123. Offered in odd numbered years.

BIOL 5177 Graduate Research Writing Workshop in Biology: 1 semester hour
Prerequisites: Graduate standing. This hands-on course is designed to give Biology graduate students practical assistance and advice on writing, including grant proposal content and organization, writing succinctly but clearly, and editing. The course format will include both informational lectures with discussions and working sessions focused on writing and critiquing drafts. Students are recommended to begin the class ready to write at least one aim of a grant or thesis proposal. Course is graded on a satisfactory/unsatisfactory basis.

BIOL 5178 Introduction to Graduate Research in Biology: 1 semester hour
Prerequisites: Graduate standing or consent of instructor. A discussion-based class to introduce new PhD and thesis MS students to the Biology department, graduate school, and best research practices.

BIOL 5179 Ethical Issues in Biology: 1 semester hour
Prerequisites: Graduate Standing. Using readings and discussions, students will explore ethical issues in Biology in both professional and social realms. Professional topics include authorship, grants accounting, and academic misconduct; social topics include ethical foundations of basic and applied science, government regulation of science, environmental and individual protection, and current issues. Course graded on a satisfactory/unsatisfactory basis.

BIOL 5192 Community Ecology: 3 semester hours
Prerequisites: Graduate standing and either BIOL 2102 and BIOL 4182 or an equivalent course. Studies of structure and organization of natural communities stressing the abundance and distribution of species, the regulation of species diversity, and the evolution of demographic parameters in populations.
BIOL 5302 Advanced Evolution: 3 semester hours
Prerequisites: BIOL 3302 or graduate standing. Explores advanced topics in the study of adaptation and the origin of species. Covers phenomena both within populations (e.g. natural selection, sexual selection, and molecular evolution) and between populations (e.g. speciation, coevolution, competition, gene flow, biogeography, and comparative phylogenetics), with a particular focus on recent primary literature.

BIOL 5312 Theory of Systematics: 3 semester hours
Prerequisites: BIOL 1821, BIOL 1831 and at least one course beyond the introductory level dealing with animal, plant, or microbial diversity (such as BIOL 2482, BIOL 2501, BIOL 2402, BIOL 4482, BIOL 4501, BIOL 4402, BIOL 4422) or consent of instructor. Course investigates the theory of classification, phylogenetic analysis, systematic biology, and their relation to systematic practice. Will cover goals and schools of systematics, characters and homology, analysis of molecular and morphological data and underlying assumptions, species concepts, classification, naming, and the connections between evolutionary biology and systematics. The course is appropriate for upper level undergraduates & graduate students in all disciplines, animal, plant, and microbial, as an introduction to systematic methods. Three hours of lecture per week.

BIOL 5436 Applied Bioinformatics: 3 semester hours
Prerequisites: BIOL 4712 or BIOL 4602 or consent of instructor. This course provides a survey of the various computational approaches that can be used to solve biological problems. Specific attention will be focused on biological databases and methods for using and interpreting database information, sequence alignments, functional genomics, structure prediction, high-throughput analyses, and proteomics. Three hours of lecture per week.

BIOL 5798 Practicum in Science in Business: 1-2 semester hours
Same As CHEM 5798. Prerequisites: Graduate standing in a Professional Science emphasis in Chemistry, Biochemistry & Biotechnology, or Biology. Students will integrate and apply their scientific expertise to a practical, business-related problem. The course will emphasize interdisciplinary teamwork as well as both written and oral communication skills.

BIOL 5799 Internship in Sciences in Business: 1-2 semester hours
Same As CHEM 5799. Prerequisites: Graduate standing and enrollment in a Professional Science emphasis area in Chemistry, Biochemistry & Biotechnology, or Biology. The internship will consist of a period of on-the-job training at a local company. Credit hours will be determined by the number of hours the student works each week and in consultation between the intern's supervisor and the course instructor. Internship assignments will be commensurate with the education and experience of the student, with an emphasis on work at the interface between the scientific and business components of the company. A written report describing the internship project is required.

BIOL 6102 Advanced Topics in Behavioral Ecology: 3 semester hours
Prerequisite: BIOL 3102 (BIOL 3302 is recommended). The evolution and ecology of animal behavior. Topics include the theoretical framework for making predictions, foraging, decision making, sensory ecology, sexual selection, mating systems, sociality and groups, cooperation, and signal use and communication. Three hours of lecture per week. Assignments will include a heavy emphasis on theory and modeling approaches to behavioral ecology. Students may not receive credit for both BIOL 4102 and BIOL 6102.

BIOL 6182 Advanced Population Biology: 3 semester hours
Prerequisites: BIOL 2012 (BIOL 3302 recommended). Introduces concepts and mathematical models of population ecology and population genetics. By integrating the ecology and genetics of population, the course goal is to understand the processes that contribute to microevolution of populations. Topics include: demography, metapopulation biology, natural selection, migration, gene flow, and genetic drift. A discussion section will focus on mathematical elements of population biology models. Three hours of discussion per week. Students may not receive credit for both BIOL 4182 and BIOL 6182.

BIOL 6192 Applications of Geographic Information Systems: 5 semester hours
Prerequisites: BIOL 2102, BIOL 4122 or equivalent, and consent of instructor. Geographic Information Systems (GIS) are sophisticated computer-based systems for analysis, capture, presentation, and maintenance of geographically referenced data. This course provides a foundation in using GIS for spatial analysis. Although biological examples are primarily used, examples from a range of disciplines are employed to emphasize the use of GIS as a tool to support analysis and decision-making. Students will have hands-on use of GIS software using Windows 2000/NT based workstations during each session. An independent research project applying the spatial analysis tools learned in GIS to biological research will be required. Five hours of combined lecture and computer operations, plus 2-3 hours of open lab per week.

BIOL 6222 Advanced Tropical Ecology and Conservation: 3 semester hours
Prerequisite: BIOL 2102, BIOL 4182, or BIOL 5192, or their equivalent. This course will cover research areas in tropical population, community and ecosystem ecology, with emphasis on inter-species and environment-organism interactions, population control factors, and genetic structure of populations. Topics include the current status and causes of tropical habitat destruction, ongoing attempts to manage those habitats, and development of strategies leading to sustained use of non-renewable resources. A research proposal designed to investigate a current topic in tropical ecology will be required. Students may not receive credit for BIOL 4222 and BIOL 6222. Three hours of lecture per week.

BIOL 6250 Public Policy of Conservation and Sustainable Development: 3 semester hours
Same as POL SCI 6452. Prerequisite: Graduate standing in Biology or Political Science and consent of instructor. Prior course in ecology recommended. This course will introduce the student to concepts and techniques for formulating, implementing, and analyzing public policy with an emphasis on environmental concerns, conservation, and sustainable development. The course will be team taught by a political scientist and a biologist. Course materials will include case studies that demonstrate the special problems of environmental policymaking in developing and developed economies.

BIOL 6270 Advanced Global Climate Change: 3 semester hours
Prerequisites: Graduate Standing or permission of the instructor. We will cover the fundamental physical, meteorological, and biological circumstances of global climate change, as well as predictions of its future effects on biological diversity, including humans, and how those estimates are made. We will also cover basic environmental economics and politics of climate change at local and global levels. The course will be taught as a series of lectures and discussions led by guest experts in each of the subdisciplines covered. Students may not receive credit for both BIOL 4270 and BIOL 6270.
**BIOL 6299 Internship in Conservation Biology:** 1-4 semester hours
Prerequisite: BIOL 6250 or BIOL 6212 and consent of the director of graduate studies in biology. Internships will consist of a period of study, observation and on-the-job training at a conservation or environmental agency. Specific placements will be selected according to student's interests and career goals. Internships may vary from 2 weeks to 4 months in duration.

**BIOL 6442 Advanced Developmental Biology:** 3 semester hours
Prerequisites: BIOL 2012 and BIOL 3622. A study of the basic principles that shape the embryonic and post-embryonic development of animals with an emphasis on the underlying cellular and molecular mechanisms. Specific topics include fertilization, determination of cell fate and differentiation, cell migration, establishment of the body plan, formation of selected organs and organ systems, stem cells, and limb regeneration. Environmental influences on development and the impact of developmental biology on modern medicine are also discussed. Three hours of lecture/discussion per week. Students may not receive credit for both BIOL 4442 and BIOL 6442.

**BIOL 6502 Advanced Evolution of Cognition:** 3 semester hours
Prerequisites: BIOL 3102 and BIOL 3302, or consent of instructor; PSYCH 2211 strongly recommended. The evolutionary ecology of animal cognitive abilities. Topics include learning, memory, perception, navigation, and communication from an evolutionary perspective. The focus is on cognitive abilities as adaptations, which have evolved to solve specific environmental problems. Topics include empirical methods for assessing cognitive ability, experimental design, theoretical approaches for generating predictions, and the parsimonious interpretation of data. Two hours of lecture and one hour of discussion per week. Students may not receive credit for both BIOL 4502 and BIOL 6502.

**BIOL 6550 Advanced Bacterial Pathogenesis:** 3 semester hours
Prerequisites: BIOL 2012 and BIOL 2482. Examination of the strategies bacterial pathogens use to infect animals. Topics include host immune responses to infection, bacterial virulence factors, regulation of bacterial virulence, and the cellular and molecular approaches used to study host-parasite interactions. Students may not receive credit for both BIOL 6550 and BIOL 4550. Students will be required to give an oral presentation and/or write an extra paper on a topic relevant to the course. Three hours of lecture per week.

**BIOL 6602 Advanced Molecular Biology:** 3 semester hours
Prerequisites: BIOL 2012 and CHEM 2612, or consent of instructor. This course covers advanced principles of molecular biology, with an emphasis on primary literature. Students may be required to give an oral presentation and/or write papers on a topic relevant to the course. Students may not receive graduate credit for both BIOL 4602 and BIOL 6602.

**BIOL 6608 Advanced Synthetic Biology:** 3 semester hours
Prerequisites: BIOL 2012, BIOL 2482. A study of the molecular biology of microbial cells, in the context of synthetic biological systems. Topics include DNA replication, transcription, translation, gene regulation and protein structure as well as aspects of genetic engineering as they apply to the construction of novel biological systems. Following an introduction to the design of biological parts used in synthetic biology, students read, discuss and present recent journal articles in order to learn about current advances and applications of synthetic biology. Three hours of lecture per week. Students may not receive credit for both BIOL 4608 and BIOL 6608.

**BIOL 6615 Advanced Biotechnology Laboratory II:** 4 semester hours
Prerequisites: BIOL 4614 and either BIOL 4602 or BIOL 4612, or consent of instructor. An in-depth look at the theory and practice of biotechnology. Lectures and discussion will examine the underlying principles, and laboratory exercises will present hands-on experience with current techniques. One hour of lecture and six hours of laboratory per week. Students will be required to give an oral presentation and/or write an extra paper on a topic relevant to the course. Students may not receive credit for both BIOL 6615 and BIOL 4615 or any course previously called Techniques in Molecular Biology or Advanced Techniques in Molecular Biology.

**BIOL 6618 Practical Next-Generation Sequencing:** 3 semester hours
Prerequisites: Consent of instructor. This is a laboratory course in practical next-generation sequencing. Roughly one-half of the course will focus on bench-top methods for generating sequencing libraries from total RNA as well as the use of next-generation sequencing instruments. The second half of the course will focus on computational methods for analyzing sequencing data, including data visualization and coding.

**BIOL 6622 Advanced Cellular Basis of Disease:** 3 semester hours
Prerequisites: BIOL 3622, or consent of instructor. A study of the structural organization and processes of eukaryotic cells, focusing on how defects in cellular function lead to genetic diseases and cancer. Topics of discussion may include membrane dynamics, intracellular trafficking, signal transduction, and the cell cycle. Three hours of lecture per week. Students may not receive credit for both BIOL 6622 and BIOL 4622.

**BIOL 6632 Advanced Nucleic Acid Structure and Function:** 3 semester hours
Prerequisites: BIOL 2012 and BIOL 4712 or equivalent, or consent of instructor. A comprehensive view of the structural properties of DNA and RNA that promote molecular interactions & biological function. Topics will include the physical properties of nucleic acids, the formation and biological importance of higher order structures, RNA enzymatic activities, nucleic acid-protein interactions, and RNA metabolism. Three hours of lecture and one hour of discussion per week. Students may not receive credit for both BIOL 4632 and BIOL 6632.

**BIOL 6642 Advanced Plant Biology and Biotechnology:** 3 semester hours
Prerequisites: Graduate standing. This course will introduce molecular biology principles that govern plant growth, development, and responses to stress. This course integrates the experimental approaches of genetics, molecular biology, and biochemistry, with a specific focus on biotechnology techniques and applications. Student may not receive credit for both BIOL 4642 and BIOL 6642.

**BIOL 6652 Advanced Virology:** 3 semester hours
Prerequisites: BIOL 2012, BIOL 3622, and graduate standing. This first half of the course entails a comparative study of the structure, replication, and molecular biology of viruses. The second half of the course focuses on the pathogenesis, control, and evolution of animal viruses. Three hours of lecture, one hour of discussion or seminar per week. Students may not receive credit for both BIOL 4652 and BIOL 6652.
BIOL 6699 Graduate Internship in Biotechnology: 1-4 semester hours  
Prerequisites: Graduate standing and enrollment in graduate  
Biotechnology Certificate Program. 6 credit hours maximum (maximum  
of 8 combined credit hours of BIOL 6905 and internship) Internship  
will consist of period of observation, experimentation and on-the-job  
training in biotechnology laboratory. The laboratory may be industrial  
of academic. Credit will be determined by the number of hours the student  
works each week and in consultation between the intern's supervisor  
and the instructor. Internship assignments will be commensurate with the  
education and experience of the student.

BIOL 6889 Graduate Seminar: 2 semester hours  
Presentation and discussion of various research problems in biology.  
Graduate student exposure to the seminar process.

BIOL 6905 Graduate Research in Biology: 1-10 semester hours  
Research in area selected by student in consultation with faculty  
members.

BIOL 6915 Graduate Research Practicum: 1-2 semester hours  
Prerequisite: Consent of instructor. This course is designed for graduate  
students wishing to pursue research experience in an area outside their  
dissertation topic. The project can be techniques-oriented or focused on  
a specific research question. The credit hours will depend on the time  
commitment to the project as decided by the supervisory faculty member.

BIOL 6920 Advanced Topics in Biology: 1-5 semester hours  
Prerequisites: Graduate standing. In-depth studies of selected topics in  
contemporary biology. May be repeated.

Chemistry and Biochemistry

General Information

Degrees and Areas of Concentration

The Department of Chemistry and Biochemistry offers courses leading to  
the following baccalaureate degrees:

- B.A. in Chemistry
- B.S. in Chemistry (with a Chemistry or Biochemistry Option)  
- B.S. Ed. in Secondary Education with Emphasis in Chemistry (in  
  cooperation with the College of Education)  
- B.A. or B.S. in Chemistry with Master’s Level Coursework for  
  Secondary Teacher Certification (in cooperation with the College of  
  Education)

The department is accredited by the American Chemical Society. Students  
completing the B.S. degree (chemistry or biochemistry option) are certified  
by the American Chemical Society. The B.S. degree is the professional  
degree in chemistry, and students who earn the B.S. degree are well  
prepared for a career in the chemical industry or for graduate work in  
chemistry. The department provides opportunities for undergraduates to  
become involved in ongoing research projects.

The department also offers graduate work leading to the M.S. or Ph.D.  
degree in chemistry with most graduate courses being scheduled in the  
evening. A student may earn a M.S. degree with or without a thesis.  
The non-thesis option provides a convenient way for students who are  
employed full-time to earn an advanced degree. The department also  
offers a non-thesis M.S. with a professional science emphasis. This option  
includes 9 credit hours of business courses and an internship practicum.

Research leading to a M.S. thesis or Ph.D. dissertation may be conducted  
in one of four emphasis areas, namely, inorganic chemistry, organic  
chemistry, physical chemistry, or biochemistry. The nature of the graduate  
program allows each student to receive individualized attention from his/  
her research mentor, and to develop hands-on experience with major  
instrumentation in the department.

Fellowships, Scholarships and Awards

The following scholarships, fellowships and awards are available to  
chemistry majors:

- The John J. Taylor Scholarship is given to a full-time student with high  
  financial need, pursuing a chemistry degree and currently enrolled  
  either of junior or senior status.
- The Friends and Alumni Scholarship is given to a full-time student with  
  high financial need and pursuing a chemistry degree.
- The Monsanto Scholarship in Biochemistry and Biotechnology  
  is open to full-time Sophomore, Junior or Senior students at the  
  University pursuing a Bachelor of Science degree in Biochemistry and  
  Biotechnology.
- William and Erma Cooke Chemistry Scholarships are given annually  
  to outstanding full-time chemistry majors who are at least sophomores  
  and have financial need.
- The Lawrence Barton Scholarship is awarded to a junior, preferably a  
  first generation college student.
- The Barbara Willis Brown Scholarship for Women in Chemistry is  
  given annually to a female chemistry major who is at least 25 years of  
  age. The student is encouraged to enroll in undergraduate research  
  (CHEM 3905), however research is not requirement for this award.  
  Student financial need is a consideration.
- The Eric G. Brunngraber Memorial Scholarship is given to a  
  chemistry major based on GPA, statement of research interests, and  
  performance in completed course work.
- Aid to Education Scholarships are given to junior or senior chemistry  
  majors annually. Faculty select awardees on the basis of merit.
- The Gary S. and Kathy A. Jacob Endowed Scholarship is awarded to  
  a full-time undergraduate student interested in pursuing a degree in  
  Chemistry and Biochemistry or in Biochemistry and Biotechnology.
- The M. Thomas Jones Fellowship is given each semester to the  
  graduate student who is deemed by his/her peers to have presented  
  the best research seminar.
- The Graduate Research Accomplishment Prize is given annually. The  
  recipient is chosen based on his/her publications, presentations at  
  professional meetings, and seminars given at UMSL.
- Alumni Graduate Research Fellowships are available for summer  
  study for selected chemistry graduate students.
- Charles W. Armbruster Scholarship: These scholarships are awarded  
  to outstanding transfer students. The recipients are selected on the  
  basis of need and merit and they must be enrolled in at least 9 credit  
  hours.
- Hal and Mary Harris Endowed Scholarship in Chemistry: Recipients  
  must be juniors seeking a degree in chemistry with a minimum GPA of  
  3.0 and enrolled in a minimum of 12 credit hours.
- Stephen S. Lawrence Endowed Scholarship in Chemistry: Recipients  
  will be junior or senior chemistry majors who demonstrate financial  
  need, are enrolled in a minimum of 9 credit hours and maintain a  
  cumulative GPA of at least 2.8. Awardees will have demonstrated  
  a good record of departmental citizenship which may include tutoring,  
  teaching, activity in the chemistry club, or other departmental volunteer  
  activities.
Several undergraduate awards are given each year to outstanding students. The Chemical Rubber Company Introductory Chemistry Award is given to the outstanding student in introductory chemistry. The Outstanding Sophomore Chemistry Major award is made to the top sophomore chemistry student. The American Chemical Society Division of Analytical Chemistry Award is given to the outstanding student in analytical chemistry. Similarly awards are given to the top students in Inorganic, Organic and Physical Chemistry. The American Chemical Society-St. Louis Section, Outstanding Junior Chemistry Major Award is given to the outstanding junior chemistry major, and the outstanding senior receives the Alan F. Berndt Outstanding Senior Award.

**Departmental Honors**

The Department of Chemistry and Biochemistry will award departmental honors to those B.A. and B.S. degree candidates in chemistry with an overall grade point average of 3.2. They must also successfully complete CHEM 3905, Chemical Research, and must present an acceptable thesis.

**Career Outlook**

The St. Louis metropolitan area has long been a major center for industrial chemistry, and in the past decade it has become a focus for the establishment of life sciences research and development. A bachelor’s degree in chemistry provides a student with the professional training needed to play a part in this ever-changing industry.

A major in chemistry provides excellent preprofessional training in the health sciences, and a double major in chemistry and biology is often chosen by premedical and predental students and those interested in graduate work in biochemistry and biology. A minor in chemistry provides the minimum qualification and training for a position as a laboratory technician in industry, hospital laboratories, etc.

A Master’s degree in chemistry is often required for further advancement in the chemical industry, whereas a doctoral degree opens the door to many opportunities, including careers in the academic world, industrial research and development, and in government laboratories.

**Degrees**

Chemistry BA (p. 366)
Chemistry BS (p. 368)
Chemistry MS (p. 371)

**Courses**

**CHEM 1000 Chemistry: The Central Science: 1 semester hour**

This course introduces chemistry majors to the broad nature of the chemical enterprise, including career areas for chemists, trends in chemistry related opportunities in research and industry, and provides an overview of the relevance of chemistry as a discipline. The course reviews the chemistry curriculum and the role of chemistry as a central science and includes presentations from selected current faculty and departmental alumni about research opportunities and other resources within the department. The course is required of all chemistry majors, and is to be taken no later than their second semester of enrollment as a chemistry major at UMSL.

**CHEM 1011 Chemistry in the Environment: 3 semester hours**

This course examines the role of chemistry in the environment and the application of chemistry to our understanding of society. The focus of the course will be the relationship between chemistry and the world around us including topics such as the chemistry of air, global climate change, water and energy. The course is designed for non-science, non-engineering and non-allied health majors and can be used to fulfill a general education requirement for undergraduate degrees. The course consists of two hours of lecture per week and, on alternate weeks, one hour of discussion or two hours of laboratory.

**CHEM 1021 Beer Brewing: Chemical and Biochemical Principles: 3 semester hours**

This course examines the process of beer brewing as it relates to general topics of chemistry, biochemistry and biology. Each aspect of the brewing process will be examined in detail and the underlying scientific principles identified and discussed. The course is designed for non-science, non-engineering and non-allied health majors and can be used to fulfill a general education requirement for undergraduate degrees. The course consists of two hours of lecture and three hours of lab per week.

**CHEM 1022 Principles of Fermentation Science: 3 semester hours**

Prerequisites: CHEM 1021 or a 3 credit-hour 1000 level science course or consent of instructor. This course is designed primarily for students that want to gain insight into the fermentation process from the initial ingredients to the final product. Students will be engaged in analysis of ingredients, impact on the process and evaluation of various styles of beer. Laboratory evaluation will include analysis of water, hops, carbohydrates, alcohol content and sensory science. The course consists of two hours of lecture and three hours of lab per week.
CHEM 1052 Chemistry for the Health Professions (MOTR CHEM 100): 4 semester hours
An introduction to general, nuclear, structural organic, organic reactions and biochemistry. This course is designed primarily for students in nursing and related health professions, and should not be taken by students majoring in the physical or biological sciences. Chemistry majors may include neither CHEM 1052 or CHEM 1062 in the 120 hours required for graduation. Four hours of lecture per week.

CHEM 1062 Organic and Biochem for the Health Professions: 2 semester hours
Prerequisites: Any college Chemistry course. An introduction to organic reactions and biochemistry. CHEM 1062 is offered during the second half of the semester. Four hours of lecture per week.

CHEM 1081 Introductory Chemistry I-A (MOTR CHEM 100): 3 semester hours
Prerequisites: MATH 1030 (or a score of 26 or higher on either the Math ACT or the Math Placement Test). This course is designed for students who want to have an in depth understanding of introductory concepts in Chemistry. CHEM 1081 covers the topics taught in the first half of CHEM 1111 but at a slower pace, thus allowing students time to fully integrate the concepts and thereby build a stronger foundation for their subsequent Chemistry courses. CHEM 1081 consists of the first half of CHEM 1111 (excluding laboratory experiments), whereas CHEM 1091 covers all the laboratory experiments and second half of lecture part of CHEM 1111. Three hours of lecture or workshop per week.

CHEM 1091 Introductory Chemistry I-B (MOTR CHEM 150L): 3 semester hours
Prerequisites: CHEM 1081. CHEM 1091 is the completion of CHEM 1111 for students who have completed CHEM 1081. The laboratory portion of this course will start at the beginning of the semester. The lecture part of the course starts in mid-semester and students join an ongoing CHEM 1111 class. Students who completed CHEM 1081 must complete CHEM 1091 to be considered as having completed the equivalent of CHEM 1111. Three hours of lecture and one and one half hours of workshop during the second half of the semester, and three hours of laboratory per week during the entire semester.

CHEM 1111 Introductory Chemistry I (MOTR CHEM 150L): 5 semester hours
Prerequisite: MATH 1030 (or a score of 26 or higher on either the Math ACT or the Missouri Math Placement Test) and MATH 1035 (MATH 1035 may be taken concurrently). Presents an introduction to the fundamental laws and theories of chemistry. Laboratory experiments are designed to demonstrate some aspects of qualitative and quantitative analysis and to develop skills in laboratory procedures. Chemistry majors may not include both CHEM 1011 and CHEM 1111 in the 120 hours required for graduation. Three hours of lecture, one and one-half hours of workshop, and three hours of laboratory per week.

CHEM 1111A CHEM 1111A-Introductory Chemistry 1 - Modular Format: 1 semester hour
Prerequisites: MATH 1030 (or a score equivalent to completion of MATH 1030 on the UMSL mathematics placement assessment). These courses (1111A-1111L) are identical in content to CHEM 1111 but are offered in a modular format. Each credit hour deals with the lecture or laboratory material covered in CHEM 1111. Completion of all five modules with a grade in each of C- or above is equivalent to completion of CHEM 1111. CHEM 1111A covers the first quarter of lecture material covered in CHEM 1111.

CHEM 1111B CHEM 1111B-Introductory Chemistry 1 - Modular Format: 1 semester hour
Prerequisites: CHEM 1111A. Concurrent registration with CHEM 1111A is permitted. CHEM 1111B covers the second quarter of lecture material covered in CHEM 1111.

CHEM 1111C CHEM 1111C-Introductory Chemistry 1 - Modular Format: 1 semester hour
Prerequisites: CHEM 1111B. Concurrent registration with CHEM 1111B is permitted. CHEM 1111C covers the third quarter of lecture material covered in CHEM 1111.

CHEM 1111D CHEM 1111D-Introductory Chemistry 1 - Modular Format: 1 semester hour
Prerequisites: CHEM 1111C. Concurrent registration with CHEM 1111C is permitted. CHEM 1111D covers the final quarter of lecture material covered in CHEM 1111.

CHEM 1111L CHEM 1111L-Introductory Chemistry 1 - Modular Format: 1 semester hour
Prerequisites: CHEM 1111D. Concurrent registration with CHEM 1111D is permitted. CHEM 1111L covers laboratory portion of CHEM 1111.

CHEM 1121 Introductory Chemistry II: 5 semester hours
Prerequisite: CHEM 1111 or advanced placement. Lecture and laboratory are a continuation of CHEM 1111. Three hours of lecture, one and one-half hours of workshop and three hours laboratory per week.

CHEM 1134 Special Topics in Introductory Chemistry: 1-5 semester hours
Prerequisite: Consent of instructor. A lecture and/or laboratory course to assist transfer students to complete the equivalent of CHEM 1111 and CHEM 1121. Students enrolling in this course should contact the instructor prior to the first day of class for guidelines on course requirements, to choose a lab or workshop section, and to request enrollment in the course website.

CHEM 2010 Introduction to Inquiry Approaches to STEM Education (STEP I): 1 semester hour
Same as BIOL 2010, PHYSICS 2010, MATH 2010, and SEC ED 2010. Prerequisites: Concurrent enrollment BIOL 1821, BIOL 1831, CHEM 1111, CHEM 1121, PHYSICS 2111, PHYSICS 2112, MATH 1800, or MATH 1900 or have a declared STEM major. Students who want to explore teaching careers become familiar with lesson plan development by writing, teaching and observing lessons in a local school class. Students build and practice inquiry-based lesson design skills and become familiar with and practice classroom management in the school setting. As a result of the STEP I experiences students should be able to decide whether to continue to explore teaching as a career and ultimately finishing the remainder of the WE TEACH MO curriculum leading to teacher certification. The classroom observations and teaching represent a major field component and requires at least one two hour block of free time during the school day once a week.

CHEM 2011 Designing Inquiry-Based STEM Experiences (STEP II): 1 semester hour
Same as BIOL 2110, PHYSICS 2111, MATH 2111, and SEC ED 2110. Prerequisites: BIOL 2111, CHEM 2111, PHYSICS 2112, MATH 1800, or MATH 1900 or have a declared STEM major. Students explore teaching careers, become familiar with STEM school setting through observing and discussing the school environment and by developing and teaching inquiry-based lessons.
CHEM 2223 Quantitative Analysis in Chemistry: 3 semester hours
Prerequisites: CHEM 1121. This course covers basic analytical chemistry theory and techniques, principles of experimental error analysis, and the application of statistics to data treatment. A significant proportion of the laboratory experiments emphasize quantification of unknown samples.

CHEM 2612 Organic Chemistry I: 3 semester hours
Prerequisite: CHEM 1121 (may be taken concurrently). An introduction to the structure, properties, synthesis, and reactions of aliphatic and aromatic carbon compounds. Three hours of lecture per week.

CHEM 2622 Organic Chemistry II: 3 semester hours
Prerequisite: CHEM 2612. A systematic study of organic reactions and their mechanisms; organic synthetic methods. Three hours of lecture per week.

CHEM 2633 Organic Chemistry Laboratory: 2 semester hours
Prerequisite: CHEM 2612. An introduction to laboratory techniques and procedures of synthetic organic chemistry including analysis of organic compounds. One hour of lecture and four and one-half hours of laboratory per week.

CHEM 3022 Introduction to Chemical Literature: 1 semester hour
Prerequisites: CHEM 2622 (CHEM 2622 may be taken concurrently). This course will familiarize the student with the literature of chemistry and its use. One hour of lecture per week.

CHEM 3302 Physical Chemistry for The Life Sciences: 3 semester hours
Prerequisites: CHEM 2612 and MATH 1800 or MATH 1100, and PHYSICS 1012. Principles and applications of physical chemistry appropriate to students pursuing degree programs in the life sciences. Topics will include thermodynamics, equilibria, kinetics, and spectroscopy. This course is intended for undergraduates seeking the B.S. degree in Biochemistry and Biotechnology and does not fulfill the physical chemistry requirement for other Chemistry B.A. and B.S. degree programs.

CHEM 3312 Physical Chemistry I: Thermodynamics and Kinetics: 3 semester hours
Prerequisites: CHEM 1121 and MATH 2000 (MATH 2000 may be taken concurrently), and PHYSICS 2111. This course discusses the principles of physical chemistry, focusing on thermodynamics, theory of gases, phase equilibria, solution behavior, and kinetics.

CHEM 3322 Physical Chemistry II: Quantum Chemistry and Spectroscopy: 3 semester hours
Prerequisites: CHEM 1121, MATH 2000 and PHYSICS 2111. This course discusses the principles of physical chemistry, focusing on atomic and molecular structure, spectroscopy, and quantum mechanics.

CHEM 3333 Physical Chemistry Laboratory I: 2 semester hours
Prerequisites: CHEM 2223 and CHEM 3312 (CHEM 3312 may be taken concurrently). This course involves experiments designed to illustrate principles introduced in CHEM 3312.

CHEM 3412 Basic Inorganic Chemistry: 3 semester hours
Prerequisite: CHEM 1121. This course reviews the principles of atomic structure and studies covalent and ionic bonding. Topics include properties of the elements and synthesis, reactions and bonding aspects of important main group and transition metal compounds. Two hours lecture per week.

CHEM 3643 Advanced Organic Chemistry Laboratory: 2 semester hours
Prerequisites: CHEM 2223, CHEM 2622, CHEM 2633, and CHEM 3022 (may be taken concurrently). Identification of organic compounds by classical and spectroscopic methods; advanced techniques in synthesis and separation of organic compounds. One hour of lecture and four and one-half hours of laboratory per week. Not for graduate credit.

CHEM 3905 Chemical Research: 1-10 semester hours
Prerequisite: Consent of instructor. Independent laboratory and library study, in conjunction with faculty member, of fundamental problems in chemistry. A written report describing the research is required.

CHEM 4212 Instrumental Analysis: 3 semester hours
Prerequisites: CHEM 3312 and CHEM 3322. This course studies the principles and applications of modern methods of instrumental analysis for analytical chemistry measurements. Topics may be selected from the areas of electrochemistry, absorption and emission spectroscopy, chromatography, mass spectrometry, surface analysis, and nuclear magnetic resonance.

CHEM 4233 Laboratory in Instrumental Analysis: 2 semester hours
Prerequisites: CHEM 4212, CHEM 3333. Experiments designed to illustrate the principles and practices of instrumental analysis, involving the use of modern instrumentation in analytical chemistry applications. One hour of discussion and four and one-half hours of laboratory per week.

CHEM 4302 Survey of Physical Chemistry with Applications to the Life Sciences: 3 semester hours
Prerequisites: CHEM 2612 and MATH 1800 or MATH 1100, and PHYSICS 1012. This course covers the principles of physical chemistry with applications to the life sciences. Topics will include thermodynamics, equilibria, kinetics, and spectroscopy. This course will be taught simultaneously with CHEM 3302, but students in CHEM 4302 will have additional assignments or projects. No student may receive credit for both CHEM 3302 and CHEM 4302. No student may receive credit for both CHEM 4302 and 5302.

CHEM 4343 Physical Chemistry Laboratory II: 2 semester hours
Prerequisites: CHEM 2223 and CHEM 3322 (CHEM 3322 may be taken concurrently). This course involves experiments designed to illustrate principles introduced in CHEM 3322.

CHEM 4412 Advanced Inorganic Chemistry: 3 semester hours
Prerequisites: CHEM 3322 (may be taken concurrently), CHEM 3412, and CHEM 2622. This course introduces the chemistry of the elements, including atomic and molecular structure, acids and bases, the chemistry of the solid state, and main group and transition metal chemistry. Three hours of lecture per week. Students may not receive credit for both CHEM 4412 and CHEM 5412.

CHEM 4433 Inorganic Chemistry Laboratory: 2 semester hours
Prerequisites: CHEM 3333, CHEM 3643, and CHEM 4412 (CHEM 3643 may be taken concurrently). The more sophisticated techniques of physical and analytical chemistry will be used to study inorganic compounds and their reactions. One hour of lecture and four and one half hours of laboratory per week. Not for graduate credit.

CHEM 4612 Introduction to Macromolecular, Supramolecular, and Nanoscale Chemistry: 1 semester hour
Prerequisites: CHEM 2622, CHEM 3412, and CHEM 3312. This course introduces students to macromolecular, supramolecular, and nanoscale chemistry. Structure, synthesis and/or preparation, characterization, and physical properties of these systems will be introduced. May not be taken for graduate credit.

CHEM 4712 Biochemistry: 3 semester hours
Same as BIOL 4712. Prerequisites: CHEM 2612 and either BIOL 1831 or CHEM 2622. Examines the chemistry and function of cell constituents, and the interaction and conversions of intracellular substances. Students may not receive credit for both BIOL 4712 and CHEM 4712.
CHEM 4722 Advanced Biochemistry: 3 semester hours
Prerequisite: CHEM 4712. This course covers selected advanced topics in the chemistry of life processes. Students may not receive credit for both CHEM 4722 and CHEM 5722.

CHEM 4733 Biochemistry Laboratory: 2 semester hours
Prerequisites: CHEM 4712 (may be taken concurrently), and CHEM 2223. Laboratory study of biochemical processes in cellular and subcellular systems with emphasis on the isolation and purification of proteins (enzymes) and the characterization of catalytic properties. One hour of lecture and four and one-half hours of laboratory per week.

CHEM 4772 Physical Biochemistry: 3 semester hours
Prerequisites: CHEM 3312 or CHEM 4712 or BIOL 4712. This course is designed to acquaint students with concepts and methods in biophysical chemistry. Topics that will be discussed include protein and DNA structures, forces involved in protein folding and conformational stability, protein-DNA interactions, methods for characterization and separation of macromolecules, and biological spectroscopy. Students may not receive credit for both CHEM 4772 and CHEM 5772.

CHEM 4774 Introduction to Bioinformatics: 3 semester hours
Prerequisites: CHEM 4712 or equivalent. This course introduces modern approaches in bioinformatics and computational biochemistry. Topics covered include a survey of biological databases, predictions from protein and DNA sequences, sequence alignment and sequence database searches, building phylogenetic trees, three-dimensional protein structure prediction, molecular modeling and simulation, and computational genomics. Students may not receive credit for both CHEM 4774 and CHEM 5774.

CHEM 4797 Biochemistry and Biotechnology Seminar: 1 semester hour
Same as CHEM 4797. Prerequisites: Senior standing in the Biochemistry and Biotechnology program and consent of faculty advisor. This course will focus on selected publications related to biochemistry and biotechnology from both refereed journals and news sources. Students are expected to participate in discussions and to prepare oral and written presentations. Completion of the Major Field Achievement Test in Biochemistry & Biotechnology is a course requirement. May not be taken for graduate credit.

CHEM 4814 Special Topics in Chemistry: 1-10 semester hours
A reading and seminar course in selected advanced topics.

CHEM 4897 Seminar in Chemistry: 2 semester hours
Prerequisites: CHEM 3022 and senior standing. This course will provide students with the opportunity to listen to talks presented by students, faculty, and invited speakers. Students must complete a comprehensive examination before the end of the course. Chemistry majors should enroll during the semester in which they intend to graduate, or during their next-to-last semester before graduation.

CHEM 5302 Foundations of Physical Chemistry: 3 semester hours
Prerequisites: Consent of instructor. A survey of fundamental and advanced topics in physical chemistry including thermodynamics, kinetics, quantum chemistry, and spectroscopy. Three hours of lecture per week. Additional independent study work is required. Students may not receive credit for both CHEM 4302 and CHEM 5302.

CHEM 5394 Special Topics in Physical Chemistry: 1-3 semester hours
Prerequisite: Consent of instructor. The topic for this course may change from semester to semester, and more than one course or topic can be offered in a given semester. The course may be taken more than once for credit provided that the topic is different in each case. The course can have more than one instructor.

CHEM 5396 Directed Readings in Physical Chemistry: 1-3 semester hours
Prerequisites: Consent of Physical Chemistry Faculty. A series of readings of monographs, review papers, and/or research publications for a particular student directed at providing that student with appropriate background preparation for experimental or theoretical Ph.D.-level research in an area of physical chemistry. The particular readings will be selected by the physical chemistry staff. Potential topics include but are not limited to advances in Electrochemistry, Surface Chemistry, Thermodynamics, Molecular Spectroscopy, Quantitative Absorption Spectroscopy using new Methodologies, Applications of Group Theory in Spectroscopy, and Computational Chemistry. Assessment may be in various forms including by assignments and seminars. Students may take this course more than once for credit through the particular topic must be different in each case.

CHEM 5412 Advanced Graduate Inorganic Chemistry: 3 semester hours
Prerequisites: Graduate standing and consent of instructor. An introduction to the chemistry of the elements, including atomic and molecular structure, acids and bases, the chemistry of the solid state, and main group and transition metal chemistry. Additional independent study work is required. Three hours of lecture per week. Students may not receive credit for both CHEM 4412 and CHEM 5412.

CHEM 5422 Coordination Chemistry: 3 semester hours
Prerequisite: CHEM 4412 or an equivalent course. Chemistry of the coordination compounds of the transition metals including such topics as kinetics and mechanisms of reaction, stereochemistry, ligand field theory, stability and electronic spectra. Three hours of lecture per week.

CHEM 5462 Organometallic Chemistry of the Transition Elements: 3 semester hours
Prerequisites: CHEM 4412 or an equivalent course. A study of transition metal compounds containing metal-carbon bonds and related metal-element bonds, including their synthesis, structure and bonding, and reactions. Applications in organic synthesis and catalysis will also be presented. Three hours of lecture per week.

CHEM 5494 Special Topics in Inorganic Chemistry: 1-3 semester hours
Prerequisite: Consent of instructor. The topic for this course may change from semester to semester, and more than one course or topic can be offered in a given semester. The course may be taken more than once for credit provided that the topic is different in each case. The course can have more than one instructor.

CHEM 5602 Advanced Organic Chemistry I - Physical Organic: 3 semester hours
Prerequisites: CHEM 2622 and CHEM 3322. Mechanism and theory of organic chemistry. Topics to include kinetics, transition state theory, reaction intermediates, and stereochemical analysis. Three hours of lecture per week.
CHEM 5612 Advanced Organic Chemistry II - Reactions And Synthesis: 3 semester hours
Prerequisite: CHEM 2622. This course will examine a variety of organic transformations typically utilized in organic synthesis. Topics will include carbon-carbon bond formation, pericyclic reactions, oxidation, reduction, and functional group interconversions. Mechanism and stereochemistry will be emphasized. Three hours of lecture per week.

CHEM 5652 Spectroscopic Identification of Organic Compounds: 3 semester hours
Prerequisites: Graduate standing or CHEM 3643. An applied approach to the use of spectroscopic techniques in organic chemistry. Topics to include integrated applications of infrared and Raman spectroscopy, $^{13}$C and $^1$H nuclear magnetic resonance spectroscopy and mass spectroscopy for the purpose of elucidating the structure and dynamics of organic compounds. Three hours of lecture per week.

CHEM 5694 Special Topics in Organic Chemistry: 1-3 semester hours
Prerequisite: Consent of instructor. The topic for this course may change from semester to semester, and more than one course or topic can be offered in a given semester. The course may be taken more than once for credit provided that the topic is different in each case. The course can have more than one instructor.

CHEM 5722 Advanced Graduate Biochemistry: 3 semester hours
Prerequisites: CHEM 4712 or BIOL 4712. Selected advanced topics in the chemistry of life processes. Three hours of lecture per week. Students may not receive credit for both CHEM 4722 and CHEM 5722.

CHEM 5772 Advanced Physical Biochemistry: 3 semester hours
Prerequisites: CHEM 3312 or CHEM 4712 or BIOL 4712. Designed to acquaint students with concepts and methods in biophysical chemistry. Topics that will be discussed include protein and DNA structures, forces involved in protein folding and conformational stability, protein-DNA interactions, methods for characterization and separation of macromolecules, and biological spectroscopy. Three hours of lecture per week. Students may not receive credit for both CHEM 4772 and CHEM 5772.

CHEM 5774 Bioinformatics: 3 semester hours
Prerequisites: CHEM 4712 or equivalent. This course introduces modern approaches in bioinformatics and computational biochemistry. Topics to be covered include a survey of biological databases, predictions from protein and DNA sequences, sequence alignment and sequence database searches, building phylogenetic trees, three-dimensional protein structure prediction, molecular modeling and simulation, and computational genomics. Additional independent study work is required. Students may not receive credit for both CHEM 4774 and CHEM 5774.

CHEM 5794 Special Topics in Biochemistry: 1-3 semester hours
Prerequisite: Consent of instructor. The topic for this course may change from semester to semester, and more than one course or topic can be offered in a given semester. The course may be taken more than once for credit provided that the topic is different in each case. The course can have more than one instructor.

CHEM 5798 Practicum in Science in Business: 1-2 semester hours
Same as: BIOL 5798. Prerequisites: Graduate standing and enrollment in a Professional Science emphasis in Chemistry, Biochemistry & Biotechnology, or Biology. Students will integrate and apply their scientific expertise to a practical, business-related problem. The course will emphasize interdisciplinary team-work as well as both written and oral communication skills.

CHEM 5799 Internship in Science in Business: 1-2 semester hours
Same as: BIOL 5799. Prerequisites: Graduate standing and enrollment in a Professional Science emphasis area in Chemistry, Biochemistry & Biotechnology, or Biology. The internship will consist of period of on-the-job training at a local company. Credit hours will be determined by the number of hours the student works each week and in consultation between the intern's supervisor and the course instructor. Internship assignments will be commensurate with the education and experience of the student, with an emphasis on work at the interface between the scientific and business components of the company. A written report describing the internship project is required.

CHEM 6487 Problem Seminar in Inorganic Chemistry: 1 semester hour
Prerequisite: Consent of the inorganic chemistry staff. Problems from the current literature, presentations and discussions by faculty, students and visiting scientists. Ph.D. students may take more than once for credit. Up to three credits may be applied to the M.S. degree program.

CHEM 6687 Problem Seminar in Organic Chemistry: 1-3 semester hours
Prerequisite: Consent of the organic chemistry staff. Problems from the current literature, presentations and discussions by faculty, students and visiting scientists. Ph.D. students may take more than once for credit. Up to three credits may be applied to the M.S. degree programs.

CHEM 6787 Problem Seminar in Biochemistry: 1 semester hour
Prerequisite: Consent of the biochemistry staff. Problems from the current literature, presentations and discussions by faculty, students and visiting scientists. Ph.D. students may take more than once for credit. Up to three credits may be applied to the M.S. degree program.

CHEM 6812 Introduction to Graduate Study in Chemistry: 1 semester hour
Prerequisite: Consent of Graduate Advisor. Topics to be covered include: techniques of teaching of chemistry in colleges and universities, methods of instruction and evaluation; role and responsibilities of the Graduate Teaching Assistant in laboratory instruction; safety in the undergraduate laboratory, safety practices, emergency procedures; selection of a research project and thesis advisor.

CHEM 6822 Introduction to Graduate Research in Chemistry: 1 semester hour
Prerequisite: Consent of instructor. Topics to include: safety in the research laboratory, safety practices, emergency procedures, hazardous materials, waste disposal, radiation safety; research ethics, chemistry information retrieval, computer assisted information retrieval, types of databases, searching bibliographic data bases.

CHEM 6832 Strategies for Independent Research Proposal Development: 1 semester hour
Prerequisites: CHEM 6822 and Consent of Graduate Advisor. Topics include: strategies for identification of research topics in chemistry and biochemistry, techniques for database literature search, critical analysis of existing research knowledge, introduction to standard grant proposal formats, technical aspects in preparation of a research plan and accompanying sections, use of bibliographical software, and overview and practice of the peer review process.

CHEM 6887 Graduate Student Seminar in Chemistry: 1 semester hour
Prerequisites: Graduate standing. Scientific presentations by students. One hour per week.

CHEM 6897 Chemistry Colloquium: 1 semester hour
Presentation of papers by students, faculty and invited speakers. One hour per week.
CHEM 6905 Graduate Research in Chemistry: 1-10 semester hours

Communication and Media

General Information
The Department of Communication and Media reflects an area of study informed by art and science. Under the rubric of Communication, students explore the construction, delivery, and perception of purposeful messages and their consequences. Whether the intent is to inform, influence, or entertain, students use research and theory to improve effectiveness and achieve outcomes in interpersonal and mass-mediated messaging. In addition, students will find a creative outlet in Media, which focuses on the production of content and its critical and cultural significance. It encompasses the aesthetics of audio and visual media in all its forms. Students learn contemporary and historical concepts in a global context. Importantly, students can hone practical skills ranging from conceptual development to camerawork and post-production editing. Whether students want to work on a public health campaign to reduce risky behaviors or a documentary designed to educate, Communication and Media offers excellent preparation for rapidly changing world.

The Bachelor of Arts in Communication
The B.A. in Communication is a flexible degree program that allows the student to tailor their curriculum to meet specific interests and needs while simultaneously providing a strong foundation in the major specializations of the discipline. Students who seek this degree will, upon completion, understand how to communicate competently and effectively in a variety of contexts and mediums. In addition, students will develop a strong foundation in the principles underlying effective communication. Finally, students will demonstrate their competence through the internship and practicum requirements. Students may complete either a general communication degree or they may select one of four different emphasis areas as a focus for their studies: Interpersonal Communication, Mass Communication, Applied Visual Communication, or Strategic Communication.

Certificate in Health Communication
The Certificate in Health Communication will assist students looking to specialize in a growing field, learn valuable skills for the job market, and get hands-on experience in health organizations that will translate into jobs.

Certificate in Media Production
The Certificate in Media Production provides a sequence of courses designed to develop multi-channel and multimedia skill sets that can be used by students to record, edit, and produce media for artistic, personal, or commercial applications. Students will develop a portfolio of work that will reflect both independent and client-centered content. Students who complete the Certificate in Media Production will develop the knowledge and skills needed to be competitive in a rapidly changing media environment.

Certificate in Public Relations
The public relations certificate at UMSL builds professionals with expertise in crafting messages, promoting public images and handling a crisis. It prepares students for success as they pursue a career in communication and public relations. The curriculum includes hands-on learning and real-world experiences designed to adhere to the requirements set forth by the Public Relations Society of America.

Other Certificate Programs
In addition to these offerings, the department supports a number of other interdisciplinary certificate programs. For more information, see Certificate Programs and Interdisciplinary Studies (p. 131).

Master of Arts in Communication
The M.A. in Communication is designed to offer a convenient, high-quality graduate education to students with a variety of interests and professional goals. For individuals who are interested in pursuing a doctorate in communication, we provide first-class preparation that can make students competitive at even the most prestigious institutions. Our graduate faculty come from top-ranked universities, and are closely involved with mainstream scholarship and innovative research. For students who intend to apply communication knowledge and skills in the workplace, the practical and theoretical knowledge woven throughout the curriculum can facilitate the achievement of a broad range of personal and professional goals. We offer the opportunity to tailor students’ programs of study to meet their interests and objectives. In addition, our graduate program offers workforce development to major corporations and organizations in the greater St. Louis area, providing an effective and economic alternative to an internal training and development infrastructure.

Degrees
Communication BA (p. 379)
• Applied Visual Communication (p. 380)
• Interpersonal Communication (p. 382)
• Mass Communication (p. 383)
• Strategic Communication (p. 384)

Media Studies BS (p. 507)
Communication MA (p. 386)

Minors
Communication Minor (p. 387)
Media Studies Minor (p. 508)

Certificates
Health Communication Undergraduate Certificate (p. 467)
Media Production Undergraduate Certificate (p. 507)
Public Relations Undergraduate Certificate (p. 604)
ACP in Instructional Communication Graduate Certificate (p. 311)

Communication Courses
COMM 1000 Effective Communication for College: 3 semester hours
A communication by objective approach is used to introduce students to effective communication in a college environment. Emphasis is placed on preparing and delivering effective messages whether written or spoken, formal or informal, digital or hardcopy.

COMM 1030 Interpersonal Communication I (MOTR COMM 120): 3 semester hours
Introduction to the theories of interpersonal communication. Emphasis on basic principles involved in one-to-one interactions.
COMM 1040 Introduction to Public Speaking (MOTR COMM 110): 3 semester hours
Theories and techniques of organization, argumentation, persuasion and delivery in public speaking.

COMM 1041 Presentational Speaking: 3 semester hours
Theories and techniques of presenting information in various contexts, formats, and settings. Emphasis is placed on strategic coordination for message effectiveness in a team-based environment.

COMM 1042 Reacting to the Past: Communication: 3 semester hours
This course consists of a series of historical simulations built around key moments and texts from the past. In each simulation, students are assigned a role and develop that character. It offers students a rigorous academic experience in which they conduct historical research and speak extensively. Because this course requires extensive public speaking, it fulfills the core general education requirement for Communication Proficiency.

COMM 1050 Introduction to Mass Communication: 3 semester hours
Introduction to oral, print, and electronic media of communication, including emerging digital formats. The course covers the major theories of mass communication effects as well as the social, organizational, economic, political, and technological factors that shape the creation and reception of mass media messages.

COMM 1150 Introduction to Public Relations: 3 semester hours
This course provides an introduction to contemporary persuasive social science principles, processes, and issues involved in the management of communications between an organization and its publics. An emphasis on ethics, law, and professional standards is highlighted.

COMM 1369 Introduction to Health Communication: 3 semester hours
This course introduces the concept of health communication through interpersonal, organizational, and mass media health contexts. Topics may include patient-provider communication, issues of diversity and culture, social support, health entertainment, marketing, HR and PR in health, and careers in health communication.

COMM 1950 Finding an Internship in Communication and Media Fields: 1 semester hour
This course equips Communication majors with the necessary skills to secure an internship or practicum that aligns with their long-term, post-graduation goals. Students will identify internships relevant to their coursework and career goals, create resumes, write cover letters, develop interviewing skills, and more. The concepts of this course prepare students to secure an internship or practicum for the following semester.

COMM 2230 Small Group Communication (MOTR COMM 125): 3 semester hours
Development of communication skills needed in small group decision-making. Application of these skills in contemporary problems.

COMM 2231 Communication in the Organization: 3 semester hours
Course integrates communication theories applicable to the structure and function of organizations. The effect of communication variables on departmental interface, member satisfaction and motivation, leadership and subordinate styles, and perception of the organization by the external environment.

COMM 2235 Professional Communication: 3 semester hours
This course seeks to prepare students to develop and apply the practical communication and self-development skills needed to excel in academic and workplace settings. Topics may include self- and relationship management, communicating effectively in professional settings, and career planning. Students will also become familiar with specific careers in the field of communication and media.

COMM 2240 Persuasive Communication: 3 semester hours
A study of persuasive communication including theories, techniques, forms, functions, applications, potential and limitations for individual and organizations. Insights from both classical rhetoric and contemporary communication theory.

COMM 2332 Intercultural Communication: 3 semester hours
This course examines culture as a variable in both interpersonal and collective communicative situations. There is emphasis placed upon opportunities and problems arising from similarities or differences in communication patterns, processes, and codes among various cultural groups.

COMM 3130 Communication in Family, Dating, and Marriage: 3 semester hours
Prerequisite: COMM 1030. This course examines dating, courtship, and marriage relationships. It focuses on exploring the history and contemporary issues associated with intimate relationships.

COMM 3150 Crisis, Disaster, and Risk Communication: 3 semester hours
Prerequisites: Junior standing or consent of instructor. Course will focus on three specialized areas within public relations: communication methods and infrastructure in relation to large-scale disaster management; organizational crisis communication; and public communication regarding environmental, chemical and other public risk issues.

COMM 3330 Research Methods in Communication I: 3 semester hours
Introduction to the fundamental tools of quantitative research in communication. Focus of the course is on reading and comprehending communication research reports rather than conducting quantitative research.

COMM 3337 Male/Female Communication: 3 semester hours
Prerequisite: Junior standing or consent of instructor. This course explores the influence of gender upon contemporary American communication behavior. Topics include semantic and syntactic variations in male and female speech, gender-role development as process and product of communication, analysis of communication patterns and barriers within gender groups. Mass, public, interpersonal, and dyadic communication contexts are considered.

COMM 3355 Dangerous Messages: 3 semester hours
Prerequisites: Junior standing or consent of instructor. This course examines how communication can be used to promote as well as inhibit societal and individual well-being. Topics include alcohol and tobacco, drugs, sexual behavior, and others pertaining to health and risky behaviors. Stereotyping, diversity in media ownership and content, hate speech, and other topics with implications for the health of citizens individually and as a people may also be covered.

COMM 3368 Advanced Health Communication: 3 semester hours
Prerequisites: COMM 1369 or consent of instructor. This course focuses on how to use communication to promote health across interpersonal, organizational, and mass media contexts. Topics may include crisis communication, health interventions and campaigns, and social marketing among others.

COMM 3370 Social Media in Public Relations: 3 semester hours
Prerequisites: COMM 1150 or MEDIA ST 1100 or consent of instructor. The course presents an overview of how to use social media and blogging in contemporary public relations. Students will also learn how to evaluate and create a social media plan.
COMM 3395 Special Topics in Communication: 3 semester hours
In-depth study of topics pertaining to current research in the department. May be repeated up to six credit hours if topic is different.

COMM 4100 Communication Campaigns: 3 semester hours
Prerequisites: COMM 1150, COMM 2180 and junior standing, or consent of instructor. This course focuses on the design, analysis, and implementation of mass communication-based information campaigns by integrating research and theory from interpersonal communication, mass communication, and public relations. It provides an advanced study of an organization's public relations needs and includes researching the situation, analyzing audiences, and preparing strategic plans for approved clients.

COMM 4199 Applied Strategic Communication: 3-6 semester hours
Prerequisites: Senior standing and consent of instructor; enrollment limited to PR certificate students. This course allows students to gain advanced, practical work experience emphasizing strategic communication skills within a discipline-relevant organization. Work must be done under supervision of a working professional in the field and in consultation with a faculty member. Proposed sites must be approved by the department. This course may be repeated for a maximum of 6 credit hours.

COMM 4360 Applied Health Communication: 3 semester hours
Prerequisites: Senior standing with at least 12 hours of course work in Communication, consent of instructor; enrollment limited to health communication certificate students. Advanced practical work experience emphasizing communicating skills within a health organization. Experiences may include organizational and promotional activities, mass communication, public relations, research and writing, strategic communication, or training and development, all with a health communication focus. Internships are off-campus and proposed sites must be approved by the department. Work must be done under supervision of a working professional in the field, and in consultation with a faculty member.

COMM 4500 Seminar in Fundamental Communication Theory: 3 semester hours
Prerequisites: Senior standing. This course introduces students to the theoretical, methodological, and philosophy of science issues in the discipline of communication. It includes general, micro, contextual, and interdisciplinary (symbiotic) communication theories.

COMM 4600 Seminar in Fundamental Organizational Communication Theory: 3 semester hours
Prerequisites: COMM 2231 and senior standing. This course examines the function of communication in the workplace. Students will learn to evaluate, adapt, and apply various research-supported frameworks for understanding organizational communication and communication processes in organizations. Interpersonal sensitivity, communication skills, and ethical values within organizations are also examined.

COMM 4650 Seminar in Fundamental Interpersonal Communication Theory: 3 semester hours
Prerequisites: COMM 1030 and one 3000-level course from the Interpersonal Communication Emphasis Area. This course examines the theories and research pertaining to interpersonal communication. It introduces students to fundamental theoretical writings and current research literature in the field. They will evaluate, adapt, and apply research findings on several interpersonal communication topics, including information management in interpersonal contexts, relational uncertainty in interpersonal communication, deception detection, new technologies, and dating.

COMM 4700 Seminar in Fundamental Mass Communication Theory: 3 semester hours
Prerequisites: COMM 1050 and at least three credit hours of 3000-level courses from the Mass Communication Emphasis Area. This course examines the theories and research pertaining to media industries, content, and users. It introduces students to the fundamental theoretical writings and current research literature in the field. Students will evaluate, adapt, and apply research findings in mass communication topics such as the impact of technology on media content and usage patterns, media effects on society and on individuals, media representation patterns, and the reasons users select particular types of content.

COMM 4900 Directed Readings: 3 semester hours
Prerequisite: Consent of instructor. Supervised independent study focused on discipline-relevant content that expands on concepts and theories presented in communication courses. May be repeated for credit.

COMM 4905 Directed Readings in Health Communication: 3 semester hours
Prerequisites: Consent of instructor. Supervised independent study focused on discipline-relevant content in health communication that expands on concepts and theories presented in health communication courses. May be repeated once for credit.

COMM 4910 Supervised Research: 1-3 semester hours
Prerequisites: Consent of instructor. Supervised field, laboratory, or survey research experience that includes activities such as data collection, literature searches, qualitative or quantitative data analysis, survey or experiment administration, and other research related activities. May be repeated with consent of department.

COMM 4915 Supervised Research in Health Communication: 1-3 semester hours
Prerequisites: Consent of instructor. Supervised field, laboratory, or survey research experience in the area of health communication. Includes activities such as data collection, literature searches, qualitative or quantitative data analysis, survey or experiment administration, and other research related activities. May be repeated for up to 6 credit hours total with consent of department.

COMM 4920 Practicum in Applied Communication: 1-3 semester hours
Prerequisite: Junior standing, at least 12 hours of course work in Communication, and consent of instructor; open to Communication majors/minors. Practicum work experience with any discipline-relevant unit at UMSL including, but not limited to: the offices of students affairs, public relations, and research administration; the school newspaper or radio station; and intra-departmental activities. Work must be done on campus, under supervision of a working professional in the field, and in consultation with a faculty member. Repeatable, but no more than six hours total credit may be earned in practicum courses toward the 36-hour minimum required for the degree.
COMM 4950 Internship in Applied Communication: 3-6 semester hours
Prerequisites: Senior standing with at least 12 hours of course work in Communication, consent of instructor; open to communication majors only. Advanced practical work experience emphasizing communication skills with any discipline-relevant entity. Experiences may include organizational and promotional activities, mass communication, public relations, research and writing, strategic communication, or training and development. Internships are off-campus and proposed sites must be approved by the department. Work must be done under supervision of a working professional in the field, and in consultation with a faculty member. Repeatable, but nor more than six hours total credit may be earned in internship courses toward the 35-hour minimum required for the degree.

COMM 5050 ACP - Special Topics: 3-6 semester hours
Prerequisites: COMM 5000, COMM 5010, and COMM 5020, special consent. This rotating topic course focuses on developing knowledge of communication theory and research applicable to the context of teaching public speaking and debate. Topics may include such issues as nonverbal communication, conflict communication, and argumentation, among others. Designed for teachers seeking certification to teach the Communication Department's advanced credit program. May be repeated for a maximum of 6 credit hours.

COMM 6510 Advanced Communication Research Methods I: 3 semester hours
Prerequisites: Graduate standing. Concerns the logic and forms of communication inquiry including an examination of various communication research and evaluation methods and their theoretical frameworks. Topics include communication research strategy and methodology, scientific process, derivation and test of hypotheses, methods of research design. Provides and orientation to graduate research including proposal development for thesis, internship and paper requirements, and includes a theory-based research project of the student's choice. Required of all graduate communication students.

COMM 6500 Seminar in Communication Theory: 3 semester hours
Prerequisite: Graduate standing. Examination of the theoretical, methodological, and philosophy of science issues in the discipline of communication. Examines general, micro, contextual, and interdisciplinary (symbiotic) communication theories. Required of all graduate communication students.
**COMM 6920 Practicum in Computer-Mediated Communication: 1-3 semester hours**
Prerequisites: Graduate standing and consent of program director. Applied practice or research in collaboration with a faculty member.

**COMM 6950 Graduate Internship: 3-6 semester hours**
Prerequisites: Graduate standing and approval of graduate coordinator. Individual on-site internship in organizational or mass communication. May be repeated.

**COMM 6960 Thesis Research and Preparation: 1-10 semester hours**
Prerequisites: Graduate standing and consent of instructor. Individual research for and preparation of the graduate thesis.

### Media Studies Courses

**MEDIA ST 1065 Internet Media: 3 semester hours**
This studio course will cover the principles of media design as they apply to the interactive world of the web. Sensitivity to the visual elements of online interfaces will be developed through analysis of the changing nature of communication technologies. Students will conceive and create their own web-based media projects.

**MEDIA ST 1070 Introduction to Cinema: 3 semester hours**
Same as THEATR 1070. This course provides an overview of American cinema from the early beginnings of D.W. Griffith and his contemporaries to the present day. The course will discuss both the Hollywood studio system and today's independent movement. Genre, film theory, criticism, and aesthetics are also covered.

**MEDIA ST 1100 Introduction to Advertising: 3 semester hours**
An introduction to the history, rhetoric, and aesthetics of Advertising. A basic understanding of industry issues and key areas such as account management, research, strategy, creative, media, and production.

**MEDIA ST 1110 Introduction to Broadcasting and Digital Media: 3 semester hours**
This course provides an introduction to the broadcasting and digital media industries. It also addresses topics including history, government regulations, technological changes, and social implications.

**MEDIA ST 1198 Practicum in Media Studies: 1-6 semester hours**
Prerequisites: Consent of instructor. Open to Media Studies majors or minors only; not open to students who have delayed grades outstanding. Practical work in a field related to media studies supervised by a faculty member. This course may be repeated for up to 20 credit hours.

**MEDIA ST 2080 Advertising Copywriting: 3 semester hours**
Same as ENGL 2080. To give students a hands-on approach for writing advertising material for print and broadcast against tight deadlines in a professional setting.

**MEDIA ST 2113 Media Production I: 3 semester hours**
Study of the basic theories and practice of remote video production. Producing and directing in the field will be examined and practiced. The course will focus on technical and aesthetic aspects of cinematic production. Lab arranged.

**MEDIA ST 2111 Introduction to Digital Multimedia Production: 3 semester hours**
Students will explore different state-of-the-art digital multimedia applications, including audio, video, and computer generated graphics, that are presently used in television, radio, CD, DVD, and online presentation. Current media related software such as QuickTime, Window Media, and Flash multimedia creation will be demonstrated and utilized to develop skill sets in those areas.

**MEDIA ST 2225 Live Events Media: 3 semester hours**
Techniques and aesthetics of recording live video events. Course will include practical application training for single- and multi-camera shoots of concerts, lectures, theatre, dance, weddings, and other special events.

**MEDIA ST 2235 Media Theory: 3 semester hours**
Prerequisite: COMM 1050. This course presents a theory-based explanation of the relationship between mass media and society. The topics covered include agenda-setting, violence and television, and other current issues from a critical perspective.

**MEDIA ST 3025 Current Issues in Strategic Communication: 3 semester hours**
Prerequisites: MEDIA ST 1100 or COMM 1150, junior standing or consent of instructor. The course covers current trends, topics, and controversies in advertising, public relations, and related fields. Students will analyze, evaluate, and critique current topics in group discussions. Students are expected to help select and research the topics as well as lead discussion with the support from the instructor.

**MEDIA ST 3113 Media Production II: 3 semester hours**
Prerequisite: MEDIA ST 2113. Advanced study of the skills needed to create media packages. The class will provide students with a continuation of practical training in camera operations, directing, producing, switching, audio mixing, and lighting, as well as more advanced post production techniques. Lab arranged.

**MEDIA ST 3150 Feature Writing: 3 semester hours**
Same as ENGL 3150. Prerequisites: ENGL 1100 or equivalent. Study of freelance and staff-written magazine or newspaper feature articles. Emphasis on relationship between types of publication and article content, research methods, and writing style. Frequent short assignments - journal entries, interviews, library projects, article critiques, and market reports - lead to production of full-length feature articles. May not be taken on the satisfactory/unsatisfactory option. The course counts toward the English Certificate in Writing.

**MEDIA ST 3201 Narratives from the Forever Wars: 3 semester hours**
Same as MVS 3201 and ENGL 3201. This course studies literature and film written by and about those who served in the wars in Iraq and Afghanistan, with particular interest in how veterans as individuals are represented in it.

**MEDIA ST 3260 Design for Stage and Screen: 3 semester hours**
Same as THEATR 3260. Prerequisites: Consent of instructor. This course surveys the professional theories and practices used in the field of design for stage and screen. It emphasizes a digital design process and collaboration.

**MEDIA ST 3261 Lighting for Stage and Screen: 3 semester hours**
Prerequisite: Consent of instructor. This course surveys the theories and techniques used in digital lighting design and production for the stage and screen. It emphasizes professional practices and applications of lighting for both stage and screen.
MEDIA ST 3310 Video Production II: 3 semester hours
Prerequisite: MEDIA ST 2210. Study of advanced theories of media production. Refinement of production principles learned in MEDIA ST 2210. Exploration of complex program formats, and advanced non-linear editing techniques. Lab arranged.

MEDIA ST 3313 Advanced Video Editing: 3 semester hours
Prerequisites: Six (6) hours of television production. Study of advanced non-linear editing techniques, animation, and advanced graphics development. Exploration of state of the art editing formats. Lab arranged.

MEDIA ST 3318 Advanced Independent Video Production: 3 semester hours
Prerequisites: MEDIA ST 2210. This course will enable students to plan, script, shoot and edit advanced independent video productions for exhibition and competitive formats. Emphasis will be placed upon auteur conceptualization, production, and direction. May be repeated for up to a total of 6 credit hours.

MEDIA ST 3338 Advertising Technique: 3 semester hours
Same as MKTG 3738. Prerequisites: MEDIA ST 1100 or MKTG 3700 or consent of instructor. Techniques for creating advertising messages and campaigns to reach target audiences. Focus on the process of persuasion, importance of advertising in modern economics, rationale for company advertisement, evaluation of advertising effectiveness, and assessment of advertising myths and truths. Practical application of messages and campaigns will be stressed.

MEDIA ST 3355 Media Law and Regulation: 3 semester hours
Prerequisites: COMM 1050 or MEDIA ST 1110. This course addresses laws affecting the mass media. The topics covered include problems and issues in legal regulation of media content, ownership, access, and accountability as well as industry self-regulation and the influence of citizens’ organizations.

MEDIA ST 3356 Global Media Systems and Trends: 3 semester hours
This course will survey major theories, global trends, and key stakeholders in the field of mass and digital media. It addresses issues regarding the transnational and transcultural flow of media content and communication technologies. Topics include the historical context and cultural implications of globalization, patterns of international media flow, and the roles of transnational media and communication organizations.

MEDIA ST 3398 Internship in Media Studies: 3-6 semester hours
Prerequisites: Senior standing; consent of instructor; open to Media Studies majors only; not open to students who have any delayed grades. Practical work at an off-campus agency, supervised by a professional in consultation with a faculty member. This course may be repeated for up to 20 credit hours.

MEDIA ST 3990 Directed Readings in Media Studies: 3 semester hours
Prerequisites: Consent of instructor; not open to students who have any delayed grades. Supervised independent study involving readings, conferences, papers, in one of the department’s disciplines: advertising, radio, television, film, or journalism.

MEDIA ST 4040 Special Topics in Media Studies: 1-6 semester hours
Prerequisites: Junior, senior, or graduate standing and consent of instructor. Special topics with subject matter dealing with current issues, (theoretical or applied), in the discipline of media studies. Since the topics of MEDIA ST 4040 may change from semester to semester, the course may be repeated for up to 12 credit hours.

MEDIA ST 4400 Senior Project: 3-6 semester hours
Prerequisites: Senior status and consent of instructor. The capstone experience requires seniors to produce an original research project, a representative portfolio, or an intrinsic case study, which exemplifies their undergraduate study. Students will present their work to the instructor supervising the course, as well as program related-faculty. Repeatable up to 6 credit hours.

Computer Science

General Information

Degrees and Areas of Concentration

The Department of Computer Science offers numerous undergraduate and graduate degrees, as well as minors and certificates.

At the undergraduate level, we offer the following degree programs

- B.S. (Bachelor of Science) in Computer Science
- B.S. in Computing Technology
- B.S. in Cybersecurity, Computer Science emphasis, a joint interdisciplinary degree with the Department of Information Systems and Technology

Other undergraduate programs include a minor in Computer Science; certificates in Artificial Intelligence, Computer Programming, Computer Programming Education, Internet and Web, and Mobile Apps and Computing; interdisciplinary certificates in Data Science with the Department of Mathematics and Statistics, and in Cybersecurity with the Department of Information Systems and Technology.

At the graduate level, we offer the following degree programs

- M.S. (Master of Science) in Computer Science
- M.S. in Cybersecurity, Computer Science emphasis, a joint interdisciplinary degree with the Department of Information Systems and Technology
- Ph.D. (Doctor of Philosophy) in Mathematical and Computational Sciences, Computer Science option, a joint degree with the Department of Mathematics and Statistics

Other graduate programs include certificates in Artificial Intelligence, Mobile Apps and Computing, and interdisciplinary certificate in Cybersecurity with the Department of Information Systems and Technology.

Undergraduate Programs Overview

The B.S. in Computer Science combines traditional computer science studies, with its depth and breadth, with practical exposure to a wide variety of tools and technologies. This program is designed for those interested in software and computer systems. It provides students a solid foundation in computing and mathematics, and facilitates specializations offered through electives and certificates such as Artificial Intelligence, Cybersecurity, Data Science, Mobile Apps and Computing, and Internet and Web. In addition, students are prepared for working in groups and technical reading and writing. Students completing this degree have gained professional and ethical perspectives and are well prepared for a challenging career or further graduate studies in Computer Science.

The B.S. in Computing Technology is designed for those interested in broad and deep computing education but without some traditional advanced courses. This program is designed for students who want
to focus on technologies and transition to fulfilling careers. Students completing this degree can find in-demand careers in many related areas such as cybersecurity, networks, internet programming, software and mobile apps development, data science, AI, graphics, or pursue additional graduate studies.

The joint Interdisciplinary B.S. in Cybersecurity is designed for students who wish to pursue high-demand work roles such as cybersecurity specialist, cyber defense analyst, cyber defense incident responder, information security analyst, vulnerability assessment analyst, security architect, among a variety of other entry to mid-level cybersecurity and computing related fields. The Computer Science emphasis focuses on more technical aspects of the field. The entire program can be completed in the evening or online.

The Certificate in Artificial Intelligence is designed to provide skills and training necessary to start or progress in the growing areas of AI, with a range of electives to focus more specifically in one’s desired direction of study.

The Certificate in Computer Programming is designed to provide quick, yet broad training in technologies leading to secure and interesting careers in computer programming or education.

The Certificate in Computer Programming Education is designed to serve secondary school science teachers, with training provided to enable the implementation of a range of computer programming related courses in their schools.

The Certificate in Internet and Web is designed to provide broad training in technologies related to the Internet and Web, with flexibility allowing a student to satisfy specific interests.

The Certificate in Mobile Apps and Computing is designed to provide training in technologies and framework for mobile apps and computing.

The joint Certificate in Cybersecurity is designed to help students from all backgrounds achieve a foundation in cybersecurity. It provides students the flexibility to focus on technical and/or managerial aspects of computer software, network, and information security.

The joint Certificate in Data Science is designed to provide computing and statistical foundations for work with big data and data analytics.

**Dual Program**

The Department offers a dual degree program for students with strong academic records. The B.S./M.S. dual degree program in computer science is designed to provide an opportunity for strong undergraduate majors to start earning graduate credit before actually completing their undergraduate degree and to shorten, or accelerate, the time required as students to earn their graduate degrees.

**Graduate Programs Overview**

The M.S. degree in Computer Science has three different options to choose from, offering a wide range of career opportunities. One of the options allows students to take courses in a very specific area and earn a graduate certificate. All graduates will have a broad computing background and will be exposed to a wide range of technologies. They will also be prepared for team work, independent research, and technical reporting and presentations.

The joint interdisciplinary M.S. in Cybersecurity is designed for graduates to pursue high-demand work roles such as cybersecurity specialist, cyber defense analyst, cyber defense incident responder, information security analyst, vulnerability assessment analyst, security architect, among a variety of other entry to mid-level cybersecurity and computing related fields. The Computer Science emphasis focuses on more technical aspects of the field.

The joint Ph.D. program in Mathematical and Computational Sciences has an option in Computer Science. Students choosing the computer science option will develop a breadth of abilities in the core areas of computer science at the graduate level. They will gain a depth of ability in contemporary research in their chosen sub-field of Computer Science, and will be able to pursue independent research in their area of specialization.

The joint Certificate in Artificial Intelligence is designed to provide skills and training necessary to start or progress in the growing areas of AI, with a range of electives to focus more specifically in one’s desired direction of study.

The joint Certificate in Cybersecurity is designed to help students from all backgrounds achieve a foundation in cybersecurity. It provides students the flexibility to focus on technical and/or managerial aspects of computer software, network, and information security.

The joint Certificate in Data Science is designed to provide computing and statistical foundations for work with big data and data analytics.

**Career Outlook**

A degree in a computing related field prepares well-motivated students for interesting careers. Our graduates find positions in industry, government, and education. The demand for individuals well trained in computer science, computing technology, and cybersecurity is greater than the available supply.

Graduates in all degrees from UMSL are located throughout the country, and they also have a strong local presence. They have careers in banking, health care, engineering and manufacturing, law, finance, public service, management, and actuarial management. Many are working in areas such as systems management, information systems and data management, scientific computing, and scientific positions in the armed services. Others have careers in education, especially at secondary and higher levels.

**Department Scholarships**

The Department of Computer Science offers many merit and need based scholarships available to department majors.

The Alumni Scholarship is a monetary award for outstanding undergraduate students open to all junior and senior department majors.

The Edward Z. Andalafte Memorial Scholarship is a monetary award for outstanding undergraduate department majors at the sophomore level or higher.

The Computer Science Scholarship is a monetary award for outstanding computer science majors with preference given to freshman and
sophomore students. Applicants must have a grade point average of 3.5 or higher in courses taken in the department.

The Boeing Company Scholars Program in Computer Science is a monetary award for full-time (at least 12 hours) upper-level undergraduate students in computer science. Recipients must have a minimum GPA of 3.2 and must maintain a GPA of 3.0. Preference will be given to traditionally underrepresented populations.

**Degrees**

- Computer Science BS (p. 388)
- Computing Technology BS (p. 391)
- Cybersecurity BS, Computer Science Emphasis (p. 405)
- Computer Science BS/MS Dual Degree Program (p. 389)
- Computer Science MS (p. 390)
- Cybersecurity MS, Computer Science Emphasis (p. 410)
- Mathematical and Computational Science PhD, Computer Science Emphasis (p. 490)

**Minors**

- Computer Science Minor (p. 390)

**Undergraduate Certificates**

- Artificial Intelligence Undergraduate Certificate (p. 321)
- Computer Programming Undergraduate Certificate (p. 387)
- Computer Programming Education Undergraduate Certificate (p. 321)
- Internet and Web Undergraduate Certificate (p. 483)
- Mobile Apps and Computing Undergraduate Certificate (p. 508)

**Graduate Certificates**

- Artificial Intelligence Graduate Certificate (p. 321)
- Mobile Apps and Computing Graduate Certificate (p. 508)

**Affiliated Interdisciplinary Programs**

- Cybersecurity Undergraduate Certificate
- Data Science Undergraduate Certificate (p. 413)
- Cybersecurity Graduate Certificate

**Courses**

**CMP SCI 1000 Computer Science Experiences: 1 semester hour**

This course is for recently declared undergraduate students majoring in Computer Science or Computing Technology. Topics may include resources that are available on campus and in the department, career opportunities, choosing the right degree, and exploration of concepts, skills and practices that are essential for successful careers. This course should be taken by freshmen and transfers within the first two semesters of declaring the major.

**CMP SCI 1011 Introduction to the Internet and World Wide Web: 3 semester hours**

Intended for any student wishing to utilize the Internet and World Wide Web more effectively. Topics include networking basics, the Internet and World Wide Web, browsers, search engines, Web Services, utilities, tools, online privacy and security. Students will learn to develop a personal web page using skills acquired in the course.

**CMP SCI 1012 Learning to Program Using Virtual Worlds: 3 semester hours**

Introduces modern programming principles without requiring the knowledge of a traditional programming language. Instead, this course utilizes a novel graphical approach that enables the student to create, populate, and manipulate virtual 3-dimensional worlds which resemble video games. The development of these worlds allows students to gain direct experience and skills in using computers to solve problems. Students will create worlds of varying complexity.

**CMP SCI 1250 Introduction to Computing: 3 semester hours**

Prerequisites: MATH 1030 with a B- or better, or MATH 1045 with B- or better, or MATH 1100 (can be taken concurrently), or MATH 1800 (can be taken concurrently), or a 70% on the proctored UMSL Math Placement obtained at most one year prior to enrollment in this course. This course provides an introduction to the concepts of computation, problem solving, and computer systems. It covers topics such as, fundamental programming constructs, basic data types, and modularization using a modern high level language. Problem solving skills are developed through a progression of programming projects.

**CMP SCI 2250 Programming and Data Structures: 3 semester hours**

Prerequisite: CMP SCI 1250. Continuation of CMP SCI 1250. Discusses properties and implementation of abstract data types such as lists, trees, stacks and queues. Introduces procedural and class abstraction, basic program architecture, use of interfaces, modular programming, and file processing.

**CMP SCI 2261 Object-Oriented Programming: 3 semester hours**

Prerequisite: CMP SCI 2250. Introduces object-oriented concepts, terminology, and notation (UML) using Java. Covers encapsulation, classes, objects, inheritance, and the use of class libraries. Additional topics may include graphical user interfaces, applets, and related tools and technologies.

**CMP SCI 2700 Computer Organization and Architecture: 3 semester hours**

Prerequisites: CMP SCI 2250 (can be taken concurrently). This course introduces details of computer systems from architectural and organizational points of view. It covers data representation, basic digital logic circuits, memory types and hierarchies, I/O and storage devices, CPU architectures such as RISC, CISC, parallel, and multi-core.

**CMP SCI 2750 System Programming and Tools: 3 semester hours**

Prerequisites: CMP SCI 2250 and CMP SCI 2700 (CMP SCI 2700 can be taken concurrently). This course covers systems programming, scripting, libraries, utilities, and development tools. Additional programming topics include piping, binary files, exception handling, command-line arguments and symbolic debugging. This course also explores tools available in the Unix/Linux environments.
**CMP SCI 3010 Web Programming:** 3 semester hours  
Prerequisites: CMP SCI 2261 (can be taken concurrently) or INFSYS 3806. This course provides a comprehensive overview of website development using prevalent LAMP stack architecture. Students will create well-structured, easily maintained, standards-compliant, accessible client-side code (HTML, CSS, JavaScript) in addition to server-side code (PHP and Python). Client-server computing projects are a course requirement. Students leave the course knowing how client-side code, server-side code, web servers, and databases function together.

**CMP SCI 3130 Design and Analysis of Algorithms:** 3 semester hours  
Prerequisites: CMP SCI 2250, MATH 1320, and MATH 3000. This course addresses the design and analysis of fundamental algorithms in computer science. Studies basic sorting algorithms, priority queues, order statistics, search trees, and hash tables. Analysis techniques may involve time and space complexity analysis of both iterative and recursive algorithms, analysis of algorithm correctness, and amortized complexity analysis. Additional topics may include data compression, string manipulation, greedy algorithms, dynamic programming, and graph traversal.

**CMP SCI 3200 .NET Framework:** 3 semester hours  
Prerequisites: CMP SCI 3010. This course introduces the .NET framework and related languages and technologies. Topics will include Visual Studio and C# for OOP and web applications. Additional topics may include ASP.NET with MVC, data access, and windows communication.

**CMP SCI 3410 Video Game Design and Development:** 3 semester hours  
Prerequisites: CMP SCI 2261. This course covers major aspects of the design and development of video games, including world/level design, game UI design, game character design, game engine programming, 2D/3D modeling and rendering, game physics and animation. This is a project-based course in which students learn to apply acquired knowledge and skills to building a video game in a team environment.

**CMP SCI 3702 Introduction to Cyber Threats and Defense:** 3 semester hours  
Prerequisites: CMP SCI 2250. This course introduces the importance of cybersecurity and covers its various components. Topics may include different types of malware, phishing, password attacks, spoofing, efficient encryption algorithms, firewalls, intrusion prevention/detection systems, and honeypots. Credit cannot be granted for both CMP SCI 3702 and CMP SCI 5702.

**CMP SCI 3780 Software Security:** 3 semester hours  
Prerequisites: CMP SCI 2261, CMP SCI 2750, and CMP SCI 3010. This course introduces the basic software security principles and pitfalls, including topics such as buffer, integer and string problems, runtime errors, SQL and command injection. Additional topics may include data protection, secure file access, password and network security.

**CMP SCI 3990 Undergraduate Internship:** 1-3 semester hours  
Prerequisites: Consent of instructor. This course is a computer science internship that provides a student field experience in an organization related to the profession. To be enrolled, students must be employed in an internship or co-op program and find an instructor to supervise the experience. Internship activities may vary by site, but will often require end-of-semester reporting. Typically 1 credit can be earned for about 100 work hours. A maximum of 3 credit hours of CMP SCI 3990 can be counted as major electives and a maximum of 6 credit hours of CMP SCI 3990 and CMP SCI 4880 combined can be counted as major electives.

**CMP SCI 4010 Advanced Web Development with Java:** 3 semester hours  
Prerequisites: CMP SCI 3010 and either CMP SCI 2261 or INFSYS 3806; or graduate standing. This course covers more advanced Java topics, along with related concepts and technologies for Web development. Topics may include database connectivity, multi threading, security, networking, MVC pattern, testing and source control for Java applications, and server-side topics such as servlets and web servers.

**CMP SCI 4011 Web Development with Advanced JavaScript:** 3 semester hours  
Prerequisites: CMP SCI 3010. This course provides a comprehensive overview of website development using the modern MEAN (MongoDB, Express.js, Angular, Node.js) stack architecture. Students will create web applications that make use of today's modern JavaScript engine. Other topics may include React, Sass (Syntactically awesome style sheets), and Pug template engine.

**CMP SCI 4012 Introduction to Enterprise Web Development:** 3 semester hours  
Prerequisites: CMP SCI 4010. This course covers design and implementation issues for enterprise web development, and some popular advanced technologies. Topics include MVC and persistence frameworks, such as Spring and Hibernate. Other topics may include Java Web services, EJB, messaging standards such as JMS, and Java EE design patterns. Students will develop enterprise-level web application projects. Credit cannot be earned for both CMP SCI 4012 and CMP SCI 5012.

**CMP SCI 4020 Introduction to Android Apps: Android Fundamentals:** 3 semester hours  
Prerequisites: CMP SCI 2261. This course covers the fundamental programming principles, software architecture, and user experience considerations underlying handheld software applications and their development environments. The course involves in-depth, hands-on examples that are implemented on the Android Platform, along with discussions of security. Credit can not be granted for both CMP SCI 4020 and CMP SCI 5020.

**CMP SCI 4030 Introduction to Intelligent Web:** 3 semester hours  
Prerequisites: CMP SCI 3010 and CMP SCI 3130. This course covers the application of artificial intelligence and other modern techniques to help construct, navigate, and experience the Web. Topics may include retrieval models, classification, mining, association, topology, and indexing algorithms such as PageRank and HITS. Credit cannot be earned for both CMP SCI 4030 and CMP SCI 5030.

**CMP SCI 4200 Python for Scientific Computing and Data Science:** 3 semester hours  
Prerequisites: CMP SCI 1250 and (MATH 1100 or MATH 1800) and (ANTHRO/SOC 3220 or BIOL 4122 or CRIMIN 2220 or ECON 3100 or MATH 1320 or POL SCI 3000 or PSYCH 2201). This course covers programming using the Python language and related libraries. The course explores problem solving using Python’s support of procedural, object-oriented, and functional approaches to programming. Topics may include NumPy arrays, visualization, Pandas DataFrames, and selected functions from statistical and scientific packages.
**CMP SCI 4220 Introduction to iOS Programming and Apps: 3 semester hours**
Prerequisites: CMP SCI 2261 or INFSYS 3806 or graduate standing. This course will use Swift for building iOS apps. It also introduces Xcode, Interface Builder, basic design patterns like MVC and delegation, and core libraries for Swift and iOS. Additional topics may include network communication, data persistence, basic animation, and mapping. This is a project-oriented class that will require significant use of a Mac with Xcode installed.

**CMP SCI 4222 IOS Apps: 3 semester hours**
Prerequisites: CMP SCI 4220 or consent of the instructor. This course focuses on building more sophisticated iOS apps. May include networking such as web services, Bluetooth and wifi connectivity, graphics and animation in 2-d and 3-d, autolayouts, OpenGL, advanced data sources such as plist and core data, source control and unit testing. May also discuss security topics. Credit not granted for both CMP SCI 4222 and CMP SCI 5222.

**CMP SCI 4250 Programming Languages: 3 semester hours**
Prerequisites: CMP SCI 2261 and CMP SCI 3010, or graduate standing. This course studies the principles, approaches, and trade-offs in modern programming languages, including a comparative study of syntax, semantics, and pragmatics. It also examines major programming paradigms: object-oriented, imperative, functional and logic.

**CMP SCI 4280 Program Translation Project: 3 semester hours**
Prerequisites: CMP SCI 2700, CMP SCI 2750, CMP SCI 3130, and CMP SCI 4250, or graduate standing. This course uses program translation as an example of a complex task, and focuses on managing and developing solutions for such complex programming tasks using modular incremental development and testing while applying proper standards. Translation topics may include finite automata, BNF, language semantics, and various translation models.

**CMP SCI 4300 Introduction to Artificial Intelligence: 3 semester hours**
Prerequisites: CMP SCI 3130. This course provides an introduction to artificial intelligence. The list of topics may include search, planning, knowledge-based reasoning, probabilistic inference, machine learning, natural language processing, and practical applications. Credit cannot be granted for both CMP SCI 4300 and CMP SCI 5300.

**CMP SCI 4320 Introduction to Evolutionary Computation: 3 semester hours**
Prerequisites: CMP SCI 2261, CMP SCI 2750 and CMP SCI 3130. This course introduces the concepts of nature-inspired problem solving with artificial evolution using selection, crossover, mutation and inheritance. It discusses applications of evolutionary algorithms, overviews the existing models and instances, and analyzes specific instances such as genetic algorithms, evolutionary programming, evolution strategies, and genetic programming. Credit not granted for both CMP SCI 4320 and CMP SCI 5320.

**CMP SCI 4340 Introduction to Machine Learning: 3 semester hours**
Prerequisites: CMP SCI 4342, or CMP SCI 2261 and CMP SCI 3130, or consent of instructor. This course provides an introduction to machine learning principles, algorithms and applications. Topics may include computational learning theory, VC Dimension, generalization, classification, regression, regularization, validation, and reinforcement learning. Credit cannot be granted for both CMP SCI 4340 and CMP SCI 5340.

**CMP SCI 4342 Introduction to Data Mining: 3 semester hours**
Prerequisites: CMP SCI 4200, or CMP SCI 2261 and CMP SCI 3130. This course provides an introduction to data mining principles, algorithms, and applications. Topics may include data preprocessing, data transformation, similarity and dissimilarity measures, data representation, classification techniques, association analysis, cluster analysis, and anomaly detection. Credit cannot be granted for both CMP SCI 4342 and CMP SCI 5342.

**CMP SCI 4370 Introduction to Biological Data Science: 3 semester hours**
Prerequisites: CMP SCI 3130 or consent of instructor. This course provides an introduction into several key areas of biological data science, with a focus upon genetic data. Relevant background topics in genetics, current issues, and a variety of available resources will be explored. Upon successful completion of this course, the student will be able to evaluate algorithms for analyzing genetic data, including assessments of sources of errors and analysis of time and space complexity; address shortcomings in existing approaches; and implement efficient and effective software for exposing information hidden in genetic data. Credit cannot be granted for both CMP SCI 4370 and CMP SCI 5370.

**CMP SCI 4390 Introduction to Deep Learning: 3 semester hours**
Prerequisites: CMP SCI 3130 or consent of instructor. This course introduces mathematical foundations for deep learning, and follows with practical applications using selected domains such as image classification or protein predictions. It also covers dense neural networks, convolutional neural networks, recurrent neural networks, and other state-of-the-art networks. Credit cannot be granted for both CMP SCI 4390 and CMP SCI 5390.

**CMP SCI 4410 Introduction to Computer Graphics: 3 semester hours**
Prerequisites: CMP SCI 2250 and MATH 2490. This course covers the theoretical foundation and algorithms for computer graphics. Students learn the basics of graphics programming for modeling, rendering, and animation of 2D and 3D objects, using standard graphics API. A brief discussion of special graphics hardware, such as GPU, may be included. Credit cannot be granted for both CMP SCI 4410 and CMP SCI 5410.

**CMP SCI 4420 Introduction to Digital Image Processing and Computer Vision: 3 semester hours**
Prerequisites: MATH 1900, MATH 2450, CMP SCI 2750, and CMP SCI 3130. This course focuses on image analysis and visual perception. Students learn data structures and algorithms for image processing, region and texture analysis, image filtering, edge detection, contour following, and image enhancement in both spatial and frequency domain. Other topics may include color processing, coding for storage, retrieval, transmission, and image restoration. Credit cannot be granted for both CMP SCI 4420 and CMP SCI 5420.

**CMP SCI 4500 Introduction to the Software Profession: 3 semester hours**
Prerequisites: CMP SCI 2261, CMP SCI 3010, and MATH 3000. This course focuses on software development and on the skills required for success in the software profession. Topics related to software development may include software process, models and views, software architectures, documentation, and testing strategies. Topics related to the profession may include ethics, licensing, copyright, trademarks, and professional conduct. Individual and group projects, research, and presentations may be required in this capstone course.
**CMP SCI 4520 Introduction to Object-Oriented Analysis and Design: 3 semester hours**
Prerequisites: CMP SCI 2261 and CMP SCI 3130. This course covers object-oriented development, using UML and following an agile process. It discusses elements of analysis, requirements, design, implementation and deployment, such as use cases, static and dynamic models, patterns, and frameworks. This course includes a semester long project. Credit not granted for both CMP SCI 4520 and CMP SCI 5520.

**CMP SCI 4610 Database Management Systems: 3 semester hours**
Prerequisites: CMP SCI 3010 and MATH 3000; or graduate standing. This course focuses on database theory and applications, with emphasis on the relational model. Topics include database design, modeling, file systems, indexing, integrity constraints, relational algebra, normalization, transaction processing, and concurrency control. Students are exposed to emerging DBMS technologies and applications. Several programming projects will be required using a popular SQL server.

**CMP SCI 4700 Computer Forensics: 3 semester hours**
Prerequisites: CMP SCI 2750 and CMP SCI 3010; or graduate standing. This course explores topics and methodologies for examining digital evidence, along with some principles of the investigative process. Includes memory, file system, operating system, network, and mobile device forensics. This course addresses both theory and hands-on aspects for conducting digital forensic examinations.

**CMP SCI 4730 Computer Networks and Communications: 3 semester hours**
Prerequisites: CMP SCI 2750 and MATH 1320, or graduate standing. The course provides an understanding of computer network fundamentals, design, management and security through the layered Internet architecture and the TCP/IP protocol stack. The topics may include common networking techniques and protocols, as well as more advanced concepts like cloud computing, software-defined networks, and virtual network functions.

**CMP SCI 4732 Introduction to Cryptography for Computer Security: 3 semester hours**
Prerequisites: MATH 1100 or MATH 1800 or consent of instructor. This course provides an introduction to cryptography as it applies to computer security. It describes modern cryptographic systems and potential attacks on against these systems. Topics may include both symmetric and asymmetric encryption algorithms, authentication, key exchange protocols, onion networks and blockchain technology, as well as potential attacks on these systems. Credit cannot be granted for more than one of CMP SCI 4732, CMP SCI 4780, and CMP SCI 5732.

**CMP SCI 4740 Introduction to High Performance Computing: 3 semester hours**
Prerequisites: CMP SCI 2750 and CMP SCI 3130. This course introduces algorithms for multiprocessor and multi-core architectures. Students learn the models of modern parallel computation and techniques to take advantage of parallel architectures for distributed and shared memory multi-processor architectures. Credit not granted for both CMP SCI 4740 and CMP SCI 5740.

**CMP SCI 4750 Introduction to Cloud Computing: 3 semester hours**
Prerequisites: CMP SCI 2750. This course provides an introduction to development and deployment of applications in the cloud space. Touches on different aspects of cloud computing such as IaaS, PaaS, and SaaS. Includes significant discussion on legal and security aspects of clouds in the marketplace. May also include public, private, and hybrid clouds, and Internet of Things. Credit not granted for both CMP SCI 4750 and CMP SCI 5750.

**CMP SCI 4760 Operating Systems: 3 semester hours**
Prerequisites: CMP SCI 2750 and CMP SCI 3130; or graduate standing. This course covers the structure of a generic operating system, considering in detail the algorithms for interprocess communication, process scheduling, resource management, memory management, file systems, and device management. It presents examples from contemporary operating systems and requires practical projects implemented within a modern operating system or simulator environment.

**CMP SCI 4782 Information Security: 3 semester hours**
Prerequisites: CMP SCI 2750 and, CMP SCI 3702 or INFSYS 3848, or consent of instructor. This course provides an overview of the cybersecurity profession and the various domains associated with it. Students will be introduced to various information risk management concepts and how it is interconnected to cybersecurity. A broad range of cybersecurity domains will be discussed along with practical applications of information risk management. Additional topics may include labs in select cybersecurity domains. Credit can not be granted for both CMP SCI 4782 and CMP SCI 5782.

**CMP SCI 4792 Introduction to Mobile Computing, Networking, and Security: 3 semester hours**
Prerequisites: CMP SCI 2750 and, CMP SCI 3702 OR INFSYS 3848, or consent of instructor. This course introduces fundamental concepts of mobile wireless networks, mobile edge computing, and security measures at the edge. It discusses challenges related to mobile edge computing systems in general and may include topics such as crowdsourcing/ crowdsensing systems, Quality of Experience (QoE) in real-time mobile services, Internet of Things, scalability, secure and verifiable computing, and vehicular and autonomous driving networks. Credit not granted for both CMP SCI 4792 and CMP SCI 5792.

**CMP SCI 4794 Introduction to Security of IoT Systems: 3 semester hours**
Prerequisites: CMP SCI 4730 or graduate standing. This course provides an overview of the Internet of Things (IoT) systems. It covers the IoT reference architecture, integrated IoT security architecture, major threats and vulnerabilities with the IoT devices and edge cloud, and defense mechanisms. It includes hands-on labs on both the vulnerabilities and defense of the systems. Credit cannot be granted for both CMP SCI 4794 and CMP SCI 5794.

**CMP SCI 4880 Individual Studies in Computer Science: 1-3 semester hours**
Prerequisites: Consent of instructor. This course allows a student to pursue individual studies under the supervision of a faculty member. Topics may include learning new technology, software development, or participation in research activities. Students must arrangements for an instructor to supervise their work. A maximum of 6 credit hours of CMP SCI 3990 and CMP SCI 4880 combined can be counted as major electives.
CMP SCI 4890 Topics in Computer Science: 3 semester hours
Prerequisites: Consent of the Instructor. This course covers a special topic in computer science to be determined by recent developments in the field and the interests of the instructor. This course may be taken for credit more than once so long as the topic discussed in each semester is different.

CMP SCI 5012 Enterprise Web Development: 3 semester hours
Prerequisites: CMP SCI 4010 or consent of instructor. Covers design and implementation issues for enterprise web development, and some popular advanced technologies. Topics include MVC and persistence frameworks, such as Spring and Hibernate. Other topics may include Java Web services, EJB, messaging standards such as JMS, and Java EE design patterns. Students will develop enterprise-level web application projects. Credit cannot be earned for both CMP SCI 4012 and CMP SCI 5012.

CMP SCI 5020 Android Apps: Android Fundamentals: 3 semester hours
Prerequisite: Graduate standing. This course covers fundamental programming principles, including software architecture and user experience considerations, which underlie handheld software applications and their development environments. The course involves in-depth, hands-on examples that are implemented on the Android Platform, along with discussions of security. Credit is not granted for both CMP SCI 4020 and CMP SCI 5020.

CMP SCI 5030 Intelligent Web: 3 semester hours
Prerequisite: Graduate standing. This course covers the application of artificial intelligence and other modern techniques to help construct, navigate, and experience the Web. Topics may include retrieval models, classification, mining, association, topology, and indexing algorithms such as PageRank and HITS. Credit cannot be earned for both CMP SCI 4030 and CMP SCI 5030.

CMP SCI 5130 Advanced Data Structures and Algorithms: 3 semester hours
Prerequisites: Graduate standing in Computer Science. This course covers the design of efficient data structures and algorithms, as well as an advanced analysis of the time and space complexities of iterative and recursive algorithms. Students will learn a variety of techniques including dynamic programming, greedy algorithms, various graph algorithms, and NP-completeness and approximation algorithms.

CMP SCI 5222 Advanced iOS Apps: 3 semester hours
Prerequisites: CMP SCI 4220 or consent of instructor. Focuses on building sophisticated apps using iOS. Will cover recent developments in networking such as web services, Bluetooth and wifi connectivity, graphics and animation in 2-d and 3-d, autolayouts, OpenGL, advanced data sources such as plist and core data, source control and unit testing. May also discuss security topics. Credit not granted for both CMP SCI 4222 and CMP SCI 5222.

CMP SCI 5300 Artificial Intelligence: 3 semester hours
Prerequisites: Graduate standing. This course provides an introduction to artificial intelligence. The list of topics may include search, planning, knowledge-based reasoning, probabilistic inference, machine learning, natural language processing, and practical applications. Credit cannot be granted for both CMP SCI 4300 and CMP SCI 5300.

CMP SCI 5320 Evolutionary Computation: 3 semester hours
Prerequisites: Graduate standing in Computer Science. This course introduces the concepts of nature-inspired problem solving with artificial evolution using selection, crossover, mutation and inheritance. It discusses applications of evolutionary algorithms, overviews the existing models and instances, and analyzes specific instances such as genetic algorithms, evolutionary programming, evolution strategies, and genetic programming. Credit not granted for both CMP SCI 4320 and CMP SCI 5320.

CMP SCI 5340 Machine Learning: 3 semester hours
Prerequisites: Graduate standing in Computer Science/Cybersecurity (Computer Science option) or CMP SCI 4342 or CMP SCI 5342 or consent of the instructor. This course provides an introduction to machine learning principles, algorithms and applications. Topics may include computational learning theory, VC dimensions, generalization, classification, regression, regularization, validation, and reinforcement learning. Credit cannot be granted for both CMP SCI 4340 and CMP SCI 5340.

CMP SCI 5342 Data Mining: 3 semester hours
Prerequisites: Graduate standing in Computer Science/Cybersecurity (Computer Science option) or consent of the instructor. This course provides an introduction to data-mining principles, algorithms, and applications. Topics may include data preprocessing, data transformation, similarity and dissimilarity measures, data representation, classification techniques, association analysis, cluster analysis, and anomaly detection. Credit cannot be granted for both CMP SCI 4342 and CMP SCI 5342.

CMP SCI 5370 Biological Data Science: 3 semester hours
Prerequisites: Graduate standing in Computer Science or consent of instructor. This course provides an introduction into several key areas of biological data science, with a focus upon genetic data. Relevant background topics in genetics, current issues, and a variety of available resources will be explored. Upon successful completion of this course, the student will be able to evaluate algorithms for analyzing genetic data, including assessments of sources of errors and analysis of time and space complexity; address shortcomings in existing approaches; and implement efficient and effective software for exposing information hidden in genetic data. Credit cannot be granted for both CMP SCI 4370 and CMP SCI 5370.

CMP SCI 5390 Deep Learning: 3 semester hours
Prerequisites: Graduate standing in Computer Science. This course reviews a typical machine learning recipe, mathematical foundations for deep learning, and provides an introduction to deep learning. Topics include dense neural networks, convolutional neural networks, and recurrent neural networks. The course will cover building, training, and using deep neural networks for solving various machine learning problems like image classification and protein contact prediction. Credit cannot be granted for both CMP SCI 4390 and CMP SCI 5390.

CMP SCI 5410 Computer Graphics: 3 semester hours
Prerequisites: Graduate standing in Computer Science. This course covers the theoretical foundation and algorithms of computer graphics. Students learn the basics of graphics programming for modeling, rendering, and animation of 2D and 3D objects, using standard graphics API. A brief discussion of special graphics hardware, such as GPU, may be included. Credit cannot be granted for both CMP SCI 4410 and CMP SCI 5410.
CMP SCI 5420 Digital Image Processing and Computer Vision: 3 semester hours
Prerequisites: Graduate standing in Computer Science. This course focuses on image analysis and visual perception. Students will learn development models such as waterfall, prototyping and incremental/iterative, covers requirements analysis, effort and cost estimation, covers structured and object-oriented design of software. Discusses verification/validation, quality assurance, software reliability, testing methods, maintenance, documentation, project management and personnel costs. This course includes a semester long project starting with requirements and culminating with deployment. Credit is not given for both CMP SCI 4520 and CMP SCI 5520.

CMP SCI 5500 Software Engineering: 3 semester hours
Prerequisite: Graduate standing. Introduces software engineering as a discipline, discusses stages of the software life cycle, compares development models such as waterfall, prototyping and incremental/iterative, covers requirements analysis, effort and cost estimation, compares structured and object-oriented analysis and design methods. Discusses verification/validation, quality assurance, software reliability, testing methods, maintenance, documentation, project management and team structure, metrics, and available tools.

CMP SCI 5520 Object Oriented Analysis and Design: 3 semester hours
Prerequisite: Graduate Standing in Computer Science. This course covers object-oriented development, illustrated with a visual modeling language and following an agile process. Discusses elements of analysis, requirements, design, implementation, and deployment such as use cases, static and dynamic diagrams, patterns, and frameworks. This course includes a semester long project starting with requirements and culminating with deployment. Credit is not granted for both CMP SCI 4520 and CMP SCI 5520.

CMP SCI 5620 Intelligent Information Retrieval: 3 semester hours
Prerequisites: CMP SCI 4300 or CMP SCI 5300. This course studies techniques for analysis of information by statistical, syntactical, and logical methods. Topics related to multimedia information are also discussed.

CMP SCI 5700 Computer Systems: 3 semester hours
Prerequisite: Graduate standing in Computer Science. This course focuses on parallel computing architectures, including RISC, pipelining, vector processing, SIMD, MIMD, and array processing. It introduces different memory and I/O subsystems, hardware description languages, and it demonstrates performance enhancement using different architectures studied.

CMP SCI 5702 Cyber Threats and Defense: 3 semester hours
Prerequisites: Graduate standing. This course introduces the importance of cybersecurity and covers its various components. Topics may include different types of malware, phishing, password attacks, spoofing, efficient encryption algorithms, firewalls, intrusion prevention/detection systems, and honeypots. Credit is not granted for both CMP SCI 3702 and CMP SCI 5702.

CMP SCI 5732 Cryptography for Computer Security: 3 semester hours
Prerequisites: Graduate standing. This course provides an introduction to cryptography as it applies to computer security. It describes cryptographic code-making and code-breaking, and how they are integrated within larger security systems. Topics include symmetric encryption algorithms like AES, asymmetric encryption using prime number factorization and elliptic curves, message authentication codes, key exchange protocols and attacks on all these systems. Additional topics may include onion networks and blockchain technology, as well as possible attacks on those systems. Credit is not granted for more than one of CMP SCI 4732, CMP SCI 4780, and CMP SCI 5732.

CMP SCI 5740 High Performance Computing: 3 semester hours
Prerequisite: Graduate Standing in Computer Science. This course introduces algorithms for multiprocessor and multi-core architectures. Students learn the models of modern parallel computation and techniques to take advantage of parallel architectures for distributed and shared memory multi-processor architectures. Credit is not granted for both CMP SCI 4740 and CMP SCI 5740.

CMP SCI 5750 Cloud Computing: 3 semester hours
Prerequisites: Graduate standing. Provides an introduction to development and deployment of applications in the cloud space. Touches on different aspects of cloud computing such as IaaS, PaaS, and SaaS. Includes significant discussion on legal and security aspects of clouds in the marketplace. May also include public, private, and hybrid clouds, and Internet of Things. Credit is not granted for both CMP SCI 4750 and CMP SCI 5750.

CMP SCI 5782 Advanced Information Security: 3 semester hours
Prerequisites: CMP SCI 5702 or INFSYS 6828 or consent of instructor. This course provides an overview of the cybersecurity profession and the various domains associated with it. Students will be introduced to various information risk management concepts and how they are interconnected to cybersecurity. A broad range of cybersecurity domains will be discussed along with their practical applications in information risk management. Additional topics may include labs in select cybersecurity domains to further the learning process. Credit is not granted for both CMP SCI 4782 and CMP SCI 5782.

CMP SCI 5792 Mobile Computing, Networking, and Security: 3 semester hours
Prerequisites: CMP SCI 5702 or INFSYS 6828 or consent of instructor. This course introduces fundamental concepts of mobile wireless networks, mobile edge computing, and security measures at the edge. It discusses challenges related to mobile edge computing systems in general and may include topics such as crowdsourcing/crowdsensing systems, Quality of Experience (QoE) in real-time mobile services, Internet of Things, scalability, secure and verifiable computing, and vehicular and autonomous driving networks. Credit is not granted for both CMP SCI 4792 and CMP SCI 5792.

CMP SCI 5794 Security of IoT Systems: 3 semester hours
Prerequisites: CMP SCI 4730 or consent of the department. This course covers the cutting-edge techniques on the emerging edge cloud and wireless/mobile Internet of Things (IoT) systems. It covers the IoT reference architecture, integrated IoT security architecture, major threats and vulnerabilities with the IoT devices and edge cloud, and defense mechanisms. It includes hands-on labs on both the vulnerabilities and defense of the systems. Credit is not granted for both CMP SCI 4794 and CMP SCI 5794.

CMP SCI 5870 Computer Science Seminar: 1-3 semester hours
Prerequisites: Graduate standing. This is a seminar on various topics. Substantial student reading and participation is expected. It may be taken more than once for credit with the consent of the department.

CMP SCI 5880 Computer Science Independent Project: 1-3 semester hours
Prerequisites: Graduate standing and consent of instructor. This course offers the student an opportunity to work on a supervised project, individually or in a group. A maximum of 6 hours can be counted toward the M.S. in Computer Science program from a combination of CMP SCI 5880, CMP SCI 5900, and CMP SCI 6900.
**CMP SCI 5888 Cybersecurity Capstone:** 3 semester hours  
Prerequisites: INFSYS 6828 and one of either INFSYS 6858 or CMP SCI 5782. This course provides students an opportunity to participate in the full cybersecurity lifecycle in an applied setting using a project-based approach. Students from technical and non-technical backgrounds will work together in teams. Major tasks may include creating an information security management plan, conducting risk assessments, implementing technical and administrative controls to mitigate information security risks, and managing security operations with a focus on incident detection and response. Students may work on projects through an actual organization and demonstrate application of knowledge gained through all prior courses in the degree program. This course must be taken the last semester prior to graduation. Cannot receive credit for CMP SCI 5888 and INFSYS 6888.

**CMP SCI 5890 Topics in Computer Science:** 1-3 semester hours  
Prerequisites: Graduate standing. This course offers various topics not offered on a regular basis. This course may be taken for credit more than once so long as the topic discussed in each semester is different.

**CMP SCI 5900 Graduate Internship in Computer Science:** 1-3 semester hours  
Prerequisites: Consent of instructor. This course is an internship that provides a student field experience in an organization related to the profession. To be enrolled, students must be employed in an internship or co-op program. If an instructor is not named, the student must find an instructor to supervise the internship. Internship activities may vary by site, but will require some reporting. Typically, 1 credit can be earned for about 100 work hours. Only up to 3 hours total can be counted toward the M.S. in Computer Science program, and at most 6 hours can be counted from a combination of CMP SCI 5880, CMP SCI 5900, and CMP SCI 6900.

**CMP SCI 5900 Graduate Internship in Computer Science:** 1-3 semester hours  
Prerequisites: Consent of instructor. This course is an internship that provides a student field experience in an organization related to the profession. To be enrolled, students must be employed in an internship or co-op program. If an instructor is not named, the student must find an instructor to supervise the internship. Internship activities may vary by site, but will require some reporting. Typically, 1 credit can be earned for about 100 work hours. Only up to 3 hours total can be counted toward the M.S. in Computer Science program, and at most 6 hours can be counted from a combination of CMP SCI 5880, CMP SCI 5900, and CMP SCI 6900.

**CMP SCI 6320 Advances in Evolutionary Computation:** 3 semester hours  
Prerequisites: CMP SCI 5320. This course focuses on some advanced topics in genetic and evolutionary computation (both theory and applications). Topics may include genetic algorithm variants, intelligent metaheuristics, evolutionary machine learning, differential evolution, swarm intelligence, learning classifier systems, and Markov models. A substantial part of the course will be based on selected topics from recent literature. This is a project-based course, with the project typically involving literature search and conducting and reporting research. Projects may involve developing specific applications or implementing a specific model.

**CMP SCI 6340 Genetic Programming:** 3 semester hours  
Prerequisites: CMP SCI 5320. This course provides an in-depth exploration of Genetic programming, including advanced concepts such as scalability, evolution of modularity and regularity, and constrained evolution with CGP, STGP, or CFG-based GP. It may be reading, research, or application oriented.

**CMP SCI 6410 Topics in Computer Graphics:** 3 semester hours  
Prerequisites: CMP SCI 4410 or CMP SCI 5410. This course covers various aspects of advanced graphics techniques, such as geometric modeling, rendering, shading, texturing, and computer animation. The course provides an in-depth study of recent advanced topics in computer graphics.

**CMP SCI 6420 Topics In Image Processing and Computer Vision:** 3 semester hours  
Prerequisites: CMP SCI 5420. This course covers new developments in digital image processing, computer vision, and multimedia. Topics to be covered may include image databases, object tracking, and large-scale data visualization.

**CMP SCI 6900 Thesis in Computer Science:** 1-6 semester hours  
Prerequisites: Completion of at least 12 graduate credits and approval of research topic by thesis advisor. This course is designed for students intending to pursue a thesis as part of their M.S. in Computer Science program. A maximum of 6 hours can be counted toward the program from a combination of CMP SCI 5880, CMP SCI 5900, and CMP SCI 6900.

**CMP SCI 7990 Ph.D. Dissertation Research in Computer Science:** 1-9 semester hours  
Prerequisites: Completion of comprehensive examinations. This course is used to pursue research work for a Ph.D. dissertation under the supervision of a faculty advisor. This course is available only to the students pursuing a Ph.D. under the Computer Science option.

---

**Criminology and Criminal Justice**

**General Information**

**Degrees and Areas of Concentration**

The department offers courses leading to the Bachelor of Science, the Master of Arts, the 2+3 Bachelor of Science and Master of Arts program, and Ph.D. in criminology and criminal justice.

**Cooperative Programs**

Faculty members in the Criminology and Criminal Justice department work with the Center for International Studies. Workshops, projects, credit courses, and other social services are brought to the criminal justice community.

**Internships**

Majors are strongly encouraged to participate in CRIMIN 3280 Internship in Criminal Justice and Criminal Justice, during their junior or senior year. The internship affords students the opportunity to gain experience in a criminal justice agency under the joint supervision of agency personnel and criminology and criminal justice faculty.

**Minor in Criminology and Criminal Justice**

The minor gives recognition to those students from other major areas who find that criminology and criminal justice courses fit their academic or professional needs and/or interests.

**Certificate in Criminology and Criminal Justice**

The certificate in Criminology and Criminal Justice is designed to provide students information about criminal behavior and the criminal justice system to advance current careers, prepare for new career paths, or earn valuable credit toward a Bachelor’s degree. The certificate will offer information to gain a solid foundation in career relevant topics that include: policing, security, victim services, juvenile justice, law, social services, and corrections.

**Chair’s List**

Each year, faculty members nominate undergraduates who have done outstanding work in one or more of their courses to the department’s Chair’s List. In addition to being nominated by a faculty member, the student must meet a cumulative grade-point average threshold for placement on the Chair’s List. The list is featured on the department’s website, and the Dean of Arts and Sciences is notified of their accomplishment.
Career Outlook

The orientation of the criminology and criminal justice faculty and of the degree program prepares the graduate to work professionally for local, state, and federal agencies concerned with maintaining public safety by the prevention of crime and apprehension and rehabilitation of offenders. The B.S. in criminology and criminal justice is also advantageous for careers with various social agencies, especially those connected with the juvenile court system, probation and parole, and local police. Many students use the B.S. in criminology and criminal justice as preparation for law school.

The interdisciplinary curricula unify a body of knowledge from criminology, social science, law, public administration, and corrections, and provide the student with an understanding of the assumptions, values, and processes of the system of justice. Many pre-law students choose criminology and criminal justice as an undergraduate major because of the excellent preparation offered for law school. An internship program is offered for college credit. The liaison, supervision, and experience with public agencies that form an integral part of this program help the student arrive at a career decision.

Degrees

Criminology and Criminal Justice BS (p. 400)

Criminology and Criminal Justice BS/MA Dual Degree Program (p. 401)

Criminology and Criminal Justice MA (p. 402)

Criminology and Criminal Justice PhD (p. 403)

Minor

Criminology and Criminal Justice Minor (p. 403)

Certificate

Criminology and Criminal Justice Undergraduate Certificate (p. 403)

Courses

CRIMIN 1100 Introduction to Criminology and Criminal Justice: 3 semester hours
Introduction to the basic concepts and approaches in the study of criminology and criminal justice. The major components of the criminal justice system are examined.

CRIMIN 1101 Crime and Criminal Justice Today: 1-2 semester hours
This course provides students insight into crime and the criminal justice system in contemporary America. All students, whether enrolled for one or two hours, will complete the same core course requirements. Those students enrolled for two hours will complete additional course work as outlined in the course syllabus.

CRIMIN 1110 Theories of Crime: 3 semester hours
This course provides an introduction to major theoretical approaches to the study of crime and justice.

CRIMIN 1120 Criminal Law: 3 semester hours
This course provides an analysis of substantive criminal law, evidence, and judicial procedure.

CRIMIN 1150 Violence in America: 3 semester hours
Prerequisites: CRIMIN 1100 or consent of instructor. Overview of patterns and correlates of violence in America. Emphasis on the variety of forms of violent crimes, such as murder, assault, robbery, rape, and gang violence. Includes an examination of violence as a response to lawbreaking.

CRIMIN 1200 Foundations of Law: An Introduction to Legal Studies: 3 semester hours
Same as POL SCI 1200. As a broad liberal-arts approach to the study of law, this course is designed to familiarize students with legal ideas, legal reasoning, and legal processes. It also provides comparative and historical perspectives on law that will help explain legal diversity and legal change. Finally, it offers opportunities to explore some of the persistent issues in law and legal theory: for example, issues about the sources of law, the responsibilities of the legal profession, or the relative merits of the adversary system.

CRIMIN 2130 Criminal Justice Policy: 3 semester hours
This course provides an introduction to criminal justice policy making, planning, and implementation.

CRIMIN 2180 Alcohol, Drugs and Society: 3 semester hours
Same as SOC 2180. Prerequisite: SOC 1010 or PSYCH 1003. This course examines the medical, legal and social aspects of alcohol and drug use. Medical aspects considered include treatment approaches and the role of Physicians in controlling such behavior. In the legal realm, past and present alcohol and drug laws are explored. Cultural and social influences on alcohol and drug use are discussed.

CRIMIN 2210 Research Methods in Criminology and Criminal Justice: 3 semester hours
This course provides an examination of basic methods of research design, measurement, and data collection in criminology and criminal justice.

CRIMIN 2220 Statistical Analysis in Criminology and Criminal Justice: 4 semester hours
Prerequisites: CRIMIN 2210 (may be taken concurrently) and the university math proficiency requirement. This course is an introduction to techniques of quantitative data analysis. Both descriptive and inferential statistics are applied to problems in criminology and criminal justice. Includes a one hour lab.

CRIMIN 2240 Policing: 3 semester hours
This course provides an overview of current and historical perspectives on the function of American policing. There is emphasis on the management of police organizations and relationships with the community.

CRIMIN 2250 Courts: 3 semester hours
This course provides an overview of current and historical perspectives on the function of the American courts. There is emphasis on the dynamics of courthouse justice, with special attention placed on the roles of the prosecutors, judges, defense attorneys, defendants, victims, and jurors regarding the decisions that impact the adjudication process.

CRIMIN 2251 Youth Gangs: 3 semester hours
This course provides an overview of research and policy concerning youth gangs. Definitional and methodological issues are examined, along with both qualitative and quantitative research. Topics may include the causes of gangs and gang involvement with focus on variations by race, gender, time period, and geography.

CRIMIN 2252 Crime and Punishment: 3 semester hours
Same as PHIL 2252. This course will address fundamental conceptual, ethical, and moral issues that arise in the context of the legal system. Topics may include punishment, pre-trial detention, the death penalty, acquittal of persons who are legally guilty, plea bargaining, moral obligation to obey the law, and laws restricting civil liberties.

CRIMIN 2260 Corrections: 3 semester hours
This course provides an examination of correctional philosophies and practices. There is emphasis on the history of corrections, the formal and informal organization of correctional facilities, inmate rights, and correctional alternatives.
CRIMIN 3043 History of Crime and Justice: 3 semester hours
Same as HIST 3043. Prerequisites: Junior standing or consent of instructor. The analysis development, and change in philosophies and responses to crime. Emphasis on major forms and definitions of crime, the emergence of modern policing, the birth of the prison and the juvenile court.

CRIMIN 3209 Forensic Anthropology: 4 semester hours
Same as ANTHRO 3209. Prerequisites: ANTHRO 1005 or BIOL 1102 or consent of instructor. Students learn basic human dental and skeletal anatomy and the methods used by biological anthropologists and archaeologists to collect and analyze human skeletal remains, including how to age and sex skeletal remains, identify ethnic markers, determine stature and handedness, and identify the presence of trauma and/or pathology. Also covers the role of the forensic anthropologist in crime scene investigations and human rights issues. In the weekly lab section students will have an opportunity for hands-on application of techniques to skeletal remains.

CRIMIN 3230 Crime Prevention: 3 semester hours
Prerequisites: ENGL 3100 (may be taken concurrently) or consent of instructor. This course provides an examination of situational, social, and legislative approaches to the prevention of crime and delinquency. There is emphasis on theories, implementation, and consequences of these approaches.

CRIMIN 3270 Juvenile Justice and Delinquency: 3 semester hours
Prerequisites: ENGL 3100 (may be taken concurrently) or consent of instructor. This course provides an examination of formal and informal responses to juvenile delinquency. There is emphasis on theories of delinquency and the decision-making processes of police, court and probation officials.

CRIMIN 3280 Internship in Criminology and Criminal Justice: 3 semester hours
Prerequisites: Junior standing. This course consists of an internship in a criminal justice setting under faculty supervision. It may be repeated for a maximum of six credit hours.

CRIMIN 3290 Special Readings: 1-6 semester hours
Prerequisite: Consent of instructor. Individualized study, under regular faculty supervision, designed to meet particular educational needs of selected students.

CRIMIN 3305 Crime and Justice in a Globalized World: 3 semester hours
Prerequisites: ENGL 3100 (may be taken concurrently) or consent of instructor. This course will provide an analysis of crime and criminal justice systems in selected cultures around the world. It will emphasize the ways in which various cultures define and respond to criminal behavior. It fulfills the CRIMIN diversity requirement.

CRIMIN 3310 Computers in Criminal Justice: 3 semester hours
Prerequisites: ENGL 3100 (may be taken concurrently) or consent of instructor. This course will critically examine computer crime, cyber-criminology, and the ways in which technology and the Internet facilitate criminal and deviant behavior. Discussion will focus on the types of crime using computer technology, theories addressing digital criminals, and an overview of the criminal justice response to these issues.

CRIMIN 3320 The Death Penalty: 3 semester hours
Prerequisite: CRIMIN 1100. An examination of the history, application, and attitudes toward the death penalty.

CRIMIN 3330 Corporate, Organizational, and White Collar Crime: 3 semester hours
Prerequisites: ENGL 3100 (may be taken concurrently) or consent of instructor. This course will critically examine how technological innovations have changed both the mechanisms of crime commission as well as opportunities for computer crime. New techniques, new offenders, and new victims of computer crime will be explored. The mechanisms of computer crime prevention and control utilized in the criminal justice system by the police, the courts, and corrections will be addressed. Discussions will focus on how technology creates new ways of thinking about crime, criminals, and criminality.

CRIMIN 3345 Constitutional Law and the Criminal Justice System: 3 semester hours
Prerequisites: ENGL 3100 (may be taken concurrently) or consent of instructor. This course provides an analysis of the objectives of criminal law regarding the United States Constitution. It emphasizes the rights of persons suspected or convicted of crime within the institutional settings of the police, courts, and corrections.

CRIMIN 4300 Communities and Crime: 3 semester hours
Same as SOC 4300. Prerequisites: ENGL 3100 (may be taken concurrently) or consent of instructor. This course provides an analysis of the sources, consequences, and control of crime within communities. There is emphasis on social and ecological theories of crime, and on population instability, family structure, and the concentration of poverty as causes of crime.

CRIMIN 4320 Forms of Criminal Behavior: 3 semester hours
Same as SOC 4320. Prerequisites: ENGL 3100 (may be taken concurrently) or consent of instructor. This course provides an examination of major types of criminal behavior including violent, property, public order, and organizational offenses. There is emphasis on theories of and responses to these crimes.

CRIMIN 4325 Gender, Crime, and Justice: 3 semester hours
Same as SOC 4325 and GS 4325. Prerequisites: ENGL 3100 (may be taken concurrently) or consent of instructor. This course provides an analysis of the role of gender in crime and in the justice system. There is emphasis on gender differences in crime commission, criminal processing, and the employment of women in criminal justice agencies. Fulfills CRIMIN diversity requirement.

CRIMIN 4330 Violence Against Women: 3 semester hours
Same as GS 4330. Prerequisites: ENGL 3100 (may be taken concurrently) or consent of instructor. This course examines the nature, extent, causes, and consequences of various types of violence against women, including rape, sexual assault, stalking, and intimate partner violence. Criminal justice policy and practice regarding violence against women are also examined.

CRIMIN 4335 Probation and Parole: 3 semester hours
Prerequisites: ENGL 3100 (may be taken concurrently) or consent of instructor. This course provides an analysis of alternatives to incarceration and postincarceration supervision. There is emphasis on diversion, restitution, and community reintegration.

CRIMIN 4340 Race, Crime, and Justice: 3 semester hours
Same as SOC 4340. Prerequisites: ENGL 3100 (may be taken concurrently) or consent of instructor. This course provides an analysis of the involvement of racial minorities in crime and the criminal justice system. There is emphasis on group differences in offending, processing, victimization, and employment in criminal justice agencies. Fulfills CRIMIN diversity requirement.
CRIMIN 4345 War Crimes, Genocide, and Justice in the 20th and 21st Centuries: 3 semester hours
Same as SOC 4345, POL SCI 4345, MVS 4345. Prerequisite: ENGL 3100. This course provides advanced undergraduate and Master's level students a comprehensive overview of the subject of war crimes, crimes against humanity, genocide and legal responses to these crimes in the modern era. The goal of this course is to engage students in sustained, critical thought about these issues and to foster a deeper understanding of both the causes and consequences—legal, social and human—of these egregious crimes.

CRIMIN 4350 Victimology: 3 semester hours
Prerequisites: ENGL 3100 (may be taken concurrently) or consent of instructor. This course provides an analysis of major perspectives on victimization. There is emphasis on patterns of victimization, the role of victims in the generation of crime, and the experience of the victim in the criminal justice system.

CRIMIN 4360 Sociology of Law: 3 semester hours
Same as SOC 4362. Prerequisites: CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100, or consent of instructor. The interaction of legal, political and social forces in the US is explored. Course examines historical developments in law and politics in the US, including law and economics, crime policy, socioeconomic inequality, race relations, and state sanctioned punishment. The course considers how America's federalist structure shapes law, politics and social relations. Examines how legal and political institutions establish and shape power relations between social groups.

CRIMIN 4370 Crime, Justice, and the Media: 3 semester hours
Prerequisites: ENGL 3100. This course provides a fresh take on issues of crime and justice through the exploration of media, such as The Wire, and its role in shaping the public's perception of crime and justice. Students will learn to synthesize ideas and perspectives about crime and justice as well as critically assess popular media images of crime.

CRIMIN 4380 Special Topics in Criminology and Criminal Justice: 3 semester hours
Prerequisites: ENGL 3100, which may be taken concurrently, or consent of instructor. This course provides an in-depth study of a selected topic in criminology and criminal justice. This course may be repeated for credit if the topic differs.

CRIMIN 4390 Seminar in Criminology and Criminal Justice: 3 semester hours
Prerequisites: CRIMIN 2210, CRIMIN 2220, and ENGL 3100, or consent of instructor. In this capstone course, students demonstrate the ability to work independently, integrating theory and research in criminology and criminal justice in a major paper supervised by the instructor.

CRIMIN 4487 Philosophy of Law: 3 semester hours
Same as PHIL 4487. Prerequisites: CRIMIN 1100 and 3 hours of philosophy and/or consent of instructor. An intensive study of recent philosophical debate about such issues as the authority of law, legal equality and justice, legal responsibility, self-determination and privacy, and legal punishment.

CRIMIN 5415 Foundations of Criminological Theory: 3 semester hours
Prerequisites: Graduate standing and consent of instructor. Examination of the history of criminological thought incorporating the major works of such theorists as Bentham, Beccaria, Marx, Durkheim, Lombroso, Sutherland and Merton.

CRIMIN 5533 Philosophy of Law: 3 semester hours
Same as PHIL 5533. Prerequisite: Graduate standing or consent of instructor. Examination of origins of law and the basis for legal obligation. Specific consideration of the justification of punishment, morality and law, and legal reasoning.

CRIMIN 6400 Proseminar: 3 semester hours
Prerequisite: Graduate standing. (Must be taken in the first Semester). A critical examination of theoretical, methodological and policy issues in criminology and criminal justice. Focus is on the nature of crime, policing, pretrial processes, adjudication and corrections.

CRIMIN 6405 Methods: 3 semester hours
Prerequisite: Graduate standing and consent of instructor. Examination of basic methods for research design and data collection. Topics include participant observation and interviewing, survey research, aggregate data analysis, and experimental design.

CRIMIN 6410 Statistical Applications in Criminology and Criminal Justice: 3 semester hours
Prerequisite: CRIMIN 6405. Examination of elementary principles of quantitative analysis and their application to crime and justice problems. Topics include univariate, bivariate and multivariate procedures for discrete and continuous data, and a comprehensive introduction to ordinary least squares regression.

CRIMIN 6420 Contemporary Criminal Theories: 3 semester hours
Prerequisite:CRIMIN 5415. Examination of contemporary explanations of crime and criminal justice. Theories covered include strain, control, cultural, labeling, conflict, as well as more recent attempts at theoretical integration and multidisciplinary integration.

CRIMIN 6422 Law Courts, and Public Policy: 3 semester hours
Same as POL SCI 6422. Prerequisite: Graduate Standing. An analysis of the role of courts as policymaking institutions and the law as policy. We will explore the role of judges as policymakers, consider the attributes of courts, (both trial and appellate), that make them appropriate yet limited targets for advocates of reform, and the implementation and impact of court decisions. We will consider recent examples of judicial involvement in state and national policymaking. In addition, we will examine the role of lawyers and interest groups in selecting litigation rather than alternative political processes for policy change.

CRIMIN 6430 Law and Social Control: 3 semester hours
Prerequisites: Graduate standing and consent of instructor. Examination of the relationship between law and other social institutions, the values and interests that are expressed in law and shaped by legal structures and processes, and law as an instrument of public policy, social control and social change. Same as Sociology 5461.

CRIMIN 6436 Comparative Criminology: 3 semester hours
Prerequisite: Graduate Standing. Examination of crime and criminal justice systems in world perspective.

CRIMIN 6440 Nature of Crime: 3 semester hours
Prerequisite: Graduate standing or consent of instructor. Examination of patterns and correlates of crime at the individual, situational, and aggregate levels. Topics include definitions of crime, offending topologies, and criminal careers.

CRIMIN 6441 Juvenile Delinquency: 3 semester hours
Prerequisite: Graduate standing or consent of instructor. Examination of youth crime and juvenile offenders. Topics include definitions of juvenile crime, and theories of juvenile crime causation in the U.S.
CRIMIN 6442 Communities and Crime: 3 semester hours
Prerequisite: Graduate standing or consent of instructor. Examination of the trends and sources of crime and social disorder across communities. The course emphasizes relationships among crime, neighborhood change, neighborhood responses to crime, and public policies.

CRIMIN 6443 Violent Crime: 3 semester hours
Prerequisite: Graduate standing or consent of instructor. Examination of the sources and patterns of violent offending across time and space. Topics include conceptions and typologies of violent crimes and offenders, victim-offender relationships, and efforts to predict and control violent offending.

CRIMIN 6448 Victimization: 3 semester hours
Prerequisite: Graduate standing or consent of instructor. Examination of the risks and consequences of crime for its victims. Issues considered include victim-offender relationships, characteristics of victims, the nature of the injuries they experience and criminal justice procedures that involve them.

CRIMIN 6450 Criminal Justice Process and Policy: 3 semester hours
Prerequisite: Graduate standing. An analysis of criminal justice as a network of decisions and complex organizations. Topics include sources of criminal justice policy, policy agendas, implementation and evaluation.

CRIMIN 6452 The Police: 3 semester hours
Prerequisite: Graduate standing or consent of instructor. Historical, social and political analysis of policing in America. Examination of federal, state, county and municipal agencies.

CRIMIN 6454 Corrections: 3 semester hours
Prerequisite: Graduate standing or consent of instructor. Examination of the history, forms, and functions of correctional philosophies, institutions, programs and policies. Topics include the structure and functions of prisons and jails, community corrections, intermediate sanctions, and the growth of correctional control in modern society.

CRIMIN 6465 Qualitative Research Design: 3 semester hours
Prerequisites: CRIMIN 6405. Examination of participant observation and informant and respondent interviewing. Topics include gaining access, sampling, data collection and analysis, and legal and ethical concerns.

CRIMIN 6470 Quantitative Research Design: 3 semester hours
Prerequisites: CRIM 6405, CRIM 6410, and CRIM 6480. Examination of experimental, longitudinal, and cross-sectional designs. Sources of data, sampling procedures, operational definitions, and issues of reliability are also discussed.

CRIMIN 6471 Evaluating Criminal Justice Interventions: 3 semester hours
Prerequisites: CRIM 6405 and CRIM 6410. This course examines a broad range of interventions designed to prevent crime or improve some aspect of the criminal justice system. The validity of reliability, and feasibility of differing intervention designs are addressed. Several major criminal justice evaluations are discussed.

CRIMIN 6480 Multivariate Statistics in Criminology: 3 semester hours
Prerequisites: CRIM 6405 and CRIM 6410. Introduction to the general linear model with applications to multivariate problems in criminal justice and criminology. Topics include advanced ordinary least squares, causal modeling, time series analysis, simultaneous equations, and analysis of limited dependent variables.

CRIMIN 6485 Directed Readings/Research in Criminology and Criminal Justice: 1-6 semester hours
Prerequisite: Consent of instructor. Directed reading and research, under faculty supervision, designed to meet particular educational needs of selected students.

CRIMIN 6495 Internship in Criminology and Criminal Justice: 3 semester hours
Prerequisite: Graduate standing or consent of instructor. Supervised placements with criminal justice agencies. Designed primarily for students with limited field experience.

CRIMIN 6498 M A Thesis Research: 1-6 semester hours
Prerequisite: Graduate standing and consent of instructor.

CRIMIN 6550 Seminar in Criminology and Criminal Justice: 3 semester hours
Prerequisites: Graduate standing and CRIMIN 5415, CRIMIN 6400, and CRIMIN 6405 or consent of the instructor. Research and policy approaches to the study of criminology and criminal justice. Class may be repeated for credit when the subject matter is different.

CRIMIN 7499 Ph.D. Dissertation Research: 1-6 semester hours
To be arranged.

Economics

Undergraduate Programs Overview

Bachelor of Arts (B.A.) in Economics
The B.A. in Economics is more ‘liberal arts’ in its focus than the B.S. degree. The B.A. degree requires completion of the BA foreign language requirement of the College of Arts and Sciences.

Bachelor of Science (B.S.) in Economics
The B.S. in Economics provides more in-depth development of the analytical and quantitative skills used in economic analysis. Students are required to complete calculus, econometrics, and additional quantitative coursework. The B.S. also offers very strong students the option of pursing the Dual B.S./M.A. program.

B.S./M.A. Dual Degree Program in Economics
The B.S./M.A. ("2+3") dual degree program in Economics is an accelerated program that allows students to complete a B.S. and a M.A. in Economics in five years. The program is targeted at students who are comfortable with mathematics and have demonstrated success in undergraduate-level quantitative and analytical economics courses.

Bachelor of Science (B.S.) in Actuarial Science
Principles of Microeconomics, Principles of Macroeconomics, as well as a couple of quantitative courses offered by the department are part of the B.S. in Actuarial Science program. In addition, the Principles courses fulfill the VEE requirements in Economics. These courses have received approval of the Society of Actuaries (SOA). For more information see the Actuarial Science undergraduate program (p. 311).

Minor in Economics
The Department offers a minor in Economics to students who want to develop some knowledge in this field but wish to major in another discipline.

Certificate in Applied Econometrics and Data Analysis
This Certificate is designed to prepare students to perform applied econometric analysis in a variety of professional settings: banks, telecomm companies, consulting firms, etc. BS students can further
distinguish themselves with this Certificate, which can be combined with the BS, the MA, or completed as a freestanding certificate.

**Certificate in Actuarial Studies**

Principles of Microeconomics, Principles of Macroeconomics help satisfy the prerequisites for the Certificate in Actuarial Studies and help fulfill the VEE requirements in Economics. These courses have received approval of the Society of Actuaries (SOA). For more information on the Certificate in Actuarial Studies, see the Actuarial Science undergraduate program (p. 311).

**Courses in Geography**

The department offers a number of courses in geography, both online and on campus.

**Resources**

A valuable campus resource available to economics students is the Economic Resources Center (ERC). The ERC serves as a University Computer lab, study, and meeting space. The ERC also provides peer tutors for undergraduate economics courses (especially for Principles of Microeconomics and Principles of Macroeconomics).

**Graduate Programs Overview**

**Master of Arts (M.A.) in Economics**

The M.A. in Economics is specifically designed for those seeking to work as professional economists. Students acquire knowledge and a versatile set of skills that are highly valued in the workplace. The M.A. program has an excellent track record in job placement and placement in top Ph.D. programs. A unique feature of the program is the large number of applied econometrics and quantitative courses offered. The program can accommodate prospective full-time students as well as those who wish to study part-time. Classes are small, and student-faculty interaction is encouraged.

**About the Faculty**

The economics faculty considers research an integral part of good teaching. Research projects in recent years have dealt with energy, public choice, industrial organization, property rights, wage discrimination, urban economic development, health economics, economics of science, economics of gender, poverty and welfare, economics of culture, and government regulations.

**Career Outlook in Economics**

Nearly every decision that a person, business, or government makes falls under the purview of economic analysis. In economics course work, students learn to think analytically and apply their knowledge to a broad range of topics and problems. These skills are highly valuable in our ever changing economy, as well as in everyday life. For this reason, those with economics degrees are in high demand in a wide number of occupations, whether in business or government. In addition, economics majors are especially sought after by law schools, M.B.A. programs and, of course, graduate programs in economics. Job prospects for those with economics degrees at both the undergraduate and graduate levels are expected to remain strong over the next decade. For additional information on the undergraduate program, contact the Director of Undergraduate Studies 516-5306 or 314-516-5353. Regarding the graduate program, contact the Director of Graduate Studies at 516-5553. Additional information is also available at the Department of Economics website.

**Degrees**

Economics BA (p. 419)  
Economics BS (p. 420)  
Economics BS/MA Dual Degree Program (p. 421)  
Economics MA (p. 422)  
Economics MA, Business Economics Emphasis (p. 423)

**Minor**

Economics Minor (p. 423)

**Certificate**

Applied Econometrics and Data Analysis Undergraduate Certificate (p. 320)

**Affiliated Interdisciplinary Programs**

Acutarial Science BS (p. 311)  
Actuarial Studies Undergraduate Certificate (p. 413)  
Data Science Undergraduate Certificate (p. 413)

**Economics Courses**

*ECON 1000 Economics in Everyday Life (MOTR ECON 100): 3 semester hours*

This course is an introduction to economic concepts, analysis, and issues for non-majors. ECON 1000 does not substitute for ECON 1001 or ECON 1002. Students who have already completed ECON 1001 or ECON 1002 may not take ECON 1000 for credit.

*ECON 1001 Principles of Microeconomics (MOTR ECON 102): 3 semester hours*

Prerequisite: MATH 1030. Introduction to the determinants of household demand, production and cost, and market prices. Applies the principles of individual decision-making behavior to understanding goods, services and resource markets.

*ECON 1002 Principles of Macroeconomics (MOTR ECON 101): 3 semester hours*

Prerequisite: MATH 1030 and ECON 1001. Introduction to the determination of levels of and changes in aggregate income, output, employment and prices. Applies economic principles of choice to the formulation and achievement of public policies that affect national employment, income distribution, and economic growth.

*ECON 1005 Family Economics and Household Development: 3 semester hours*

Provides social service professionals that work with low income individuals and families with an understanding of the principles of personal financial management. Case studies are used to apply course content and to develop training strategies for clients to improve household financial management. The role of financial institutions and government policies as well as their impact on low income families is also examined. Resources to use with clients will be identified. ECON 1005 does not count toward a major or minor in Economics.
ECON 1052 Microeconomics for the School Curriculum: 3 semester hours
Analysis of market forces, with emphasis on business firms, households, and productive-factor markets, price determination and resource allocation. Special reference to topics included in elementary and secondary school social science curricula. ECON 1052 may not be used by Economics majors to meet degree requirements.

ECON 1900 Introductory Topics in Economics: 3 semester hours
This course provides an analysis of an introductory economic topic. May be repeated for credit when topic varies.

ECON 2010 The Business Firm: History, Theory, and Policy: 3 semester hours
Prerequisites: ECON 1000 or ECON 1001 or consent of instructor. This course presents a history of the development of modern business firms and examines the evolution of the economic theory of the firm. Special attention is paid to the role that firms play in fostering social and economic development. The ultimate objective of the course will be to provide students with a deeper understanding of firms so they can make better policy decisions as firm owners, managers, lawmakers, regulators, and voters.

ECON 2800 History of American Economic Development: 3 semester hours
Same as HIST 2800. Prerequisites: ECON 1000 or ECON 1001 or consent of instructor. Uses economic concepts to explain historical developments in the American economy, beginning with the hunter-gatherers who crossed the Bering land bridge around 12,000 BC. Main topics include the Native American economies, European exploration and conquest, the colonial economies, indentured servitude, the American Revolution, the US Constitution, westward expansion, transportation, the Industrial Revolution, state banking and free banking, slavery, the Civil War, post-bellum agriculture, the rise of big business and anti trust, banking panics, the Federal Reserve Act, the First and Second World Wars, the New Deal, and the growth of government in the postwar economy.

ECON 3001 Intermediate Microeconomics: 3 semester hours
Prerequisite: MATH 1030 and ECON 1001. Analysis of prices in terms of equilibrium of the business firm and consumer demand in markets of varying degrees of competition.

ECON 3002 Intermediate Macroeconomics: 3 semester hours
Prerequisites: MATH 1030, ECON 1001, and ECON 1002. This course examines national income and expenditure and the forces determining the level of economic activity. Special emphasis is placed on the theory of income determination and its application to public policy.

ECON 3003 Game Theory and Strategic Decision Making: 3 semester hours
Prerequisites: ECON 1001. When the best course of action depends on the decisions made by others, strategy becomes important. Game theory provides the tools for analyzing such strategic decision making. Strategic behavior is analyzed in terms of the context of business, logic, biology, war, government, politics, and everyday life. A wide variety of in-class experiments are used to illustrate key concepts.

ECON 3100 Economic Data and Statistics: 3 semester hours
Prerequisite: MATH 1030, ECON 1001, and ECON 1002. This course is an introduction to economic data sources, data interpretation, and statistical inference as used in economic analysis. It emphasizes the testing of economic hypotheses and the development and estimation of economic models. Students will be introduced to statistical software used in economics.

ECON 3200 Money, Banking and Monetary Theory: 3 semester hours
Prerequisites: ECON 1001 and ECON 1002. Factors influencing bank reserves and the money supply. Ability of the Federal Reserve System and the Treasury to control these factors. Introduction to monetary theory: integration of monetary phenomena with national income theory. Analysis of current policy issues.

ECON 3300 International Economic Analysis: 3 semester hours
Prerequisite: ECON 1001. Introduction to the theories of international trade and factor movements including determinants of trade, the effects of trade on sectors and on overall economic performance, trade restrictions, and balance of payments and exchange rates. Discussion of current institutions and economic developments in the global economy.

ECON 3400 Labor Economics: 3 semester hours
Prerequisites: ECON 1001. Examines the labor market in the economy, considers the theories of labor supply, labor demand, and market determination of wages. Other topics include noncompetitive markets, international labor markets, the theory of human capital, compensating wage differentials, labor market discrimination, unions and collective bargaining, unemployment, and poverty and the distribution of income.

ECON 3500 The Economics of Government Spending and Taxation: 3 semester hours
Prerequisites: MATH 1030 and ECON 1001. Analysis of the role of government expenditures and taxation. Topics include: (1) analysis of public goods and externalities, models of collective choice, elements of benefit-cost analysis the theory of bureaucracy, governments as agents in markets; and (2) analysis of the economic role of governments, subsidies and taxes in the federal system, criteria for tax evaluation, the nature of tax legislation, private decision making under different tax institutions, and government borrowing.

ECON 3600 Market Structure, Strategy, and Pricing: 3 semester hours
Prerequisite: ECON 1001. A theoretical and empirical analysis of the actions of firms under alternative forms of market organization. The role of economies of scale, product differentiation, mergers, and advertising in affecting industry structure and the impact of the resulting industry structure on pricing, output, promotion, and technology decisions of firms.

ECON 3610 Economics of Sports, Gaming, and Gambling: 3 semester hours
Prerequisite: ECON 1001. This course focuses on applications of fundamental economic principles to the world of sports, gaming, and gambling. It analyzes incentives present in sports and the rise of e-sports. Legal and illegal gambling are analyzed in regard to their effect on the local economy and impact of legalized gambling on sports. In addition to professional sports, NCAA, Olympic, and sports popular around the world are explored.

ECON 3620 Economics of Sports, Gaming, and Gambling: 3 semester hours
Prerequisites: ECON 1001 and ECON 1002. Analysis of a selected economic topic. The topic selected will vary from semester to semester. This course may be taken for credit more than once so long as the topic discussed in each semester is different.

ECON 4030 Managerial Economics: 3 semester hours
Prerequisites: ECON 3001; MATH 1800 or MATH 1100 recommended. Application of microeconomic theory to decision-making process in the business firm. Topics include pricing and profit strategy, cost analysis, decision making under uncertainty, technology, innovation, and productivity growth, and the structure and organization of firms. Problem-solving and case-study approach used.
ECON 4040 Booms and Busts in the Economy: Data and Theory: 3 semester hours
Prerequisites: ECON 3002 and ECON 3100. This course focuses on the empirical regularities in macroeconomics commonly referred to as the business cycle. Students explore the variability and co-movements of aggregate economic variables and consider alternative theoretical explanations of these phenomena.

ECON 4100 Introduction to Econometrics: 4 semester hours
Prerequisites: ECON 1001 and ECON 1002; ECON 3100 or MATH 1320 or SCMA 3300; MATH 1800 or MATH 1100. An introduction to quantitative analysis of economic behavior. The ordinary least squares technique and the assumptions underlying it are developed. Methods designed to detect and correct for the violations of these assumptions are examined. Special emphasis is given to the practical application of the procedures discussed through the use of computer exercises.

ECON 4110 Applied Econometrics: 4 semester hours
Prerequisites: ECON 4100 or equivalent. Concepts, techniques, & advanced applications of econometrics. Emphasis on developing a critical understanding of the appropriateness and limitations of a variety of state-of-the-art techniques used to model economic or political processes. Topics will include joint tests of hypotheses, estimation of lagged effects, models of qualitative choice, simultaneous systems, and outlier diagnostics. This course includes laboratory work in quantitative economic analysis.

ECON 4120 Time Series Econometrics for Economics and Finance: 4 semester hours
Prerequisites: ECON 4100 or equivalent and a solid foundation in statistics. Introduction to application of econometric methods to timeseries data. Emphasis on model specification as it appears to macroeconomic or financial data. Topics include: Stationary and non-stationary time-series, seasonality, random walks, unit roots, Dickey-Fuller tests, cointegration, ARCH/GARCH models, and general to specific modeling (ADLs). Specific applications to macro-economics, international economics and/or financial markets.

ECON 4130 Business and Economic Forecasting: 4 semester hours
Prerequisites: ECON 4100 or equivalent. Alternative forecasting methodologies for economic time series will be analyzed and discussed. The focus of the course will be: (1) the development of time-series (ARIMA) models and their application to forecasting; (2) the use of standard econometric models for forecasting; and (3) evaluation and comparison of these methods and the conditions under which each is the appropriate methodology. This course includes laboratory work in quantitative economic analysis.

ECON 4150 Mathematical Economics: 3 semester hours
Prerequisites: MATH 1800 or MATH 1100, ECON 3001. This course uses calculus and other mathematical tools to analyze economic phenomena. In addition to exploring techniques used to solve unconstrained and constrained optimization problems, the course also examines how matrix algebra is used in economic modeling. This course allows students to mathematically analyze economic models which receive graphical treatment in lower level courses. Students may not receive credit for both ECON 4150 and ECON 5150.

ECON 4160 Geospatial Analysis in the Social Sciences: 3 semester hours
Prerequisites: Junior standing. ECON 1001 or consent of instructor. Analysis of geospatial data relating to a variety of social phenomena using geographic information systems (GIS) software. Students will learn how geospatial analysis can be integrated into research projects and presentations (e.g., creating maps to present and analyze social, political, and economic data). Students will also learn how criminal activity, economic activity, voting patterns and other social behavior are spatially correlated with demographic data. As a culminating project, students will learn how to apply GIS techniques, including but not limited to sophisticated spatial modeling of social behavior.

ECON 4170 Fundamentals of Cost-Benefit Analysis: 3 semester hours
Prerequisites: ECON 3001 or equivalent. The purpose of this course is to provide a systemic and rigorous way of thinking about the measurement of benefits and costs when evaluating public projects, programs or regulations. Cost-benefit analysis has wide application, including: environmental resource use, highway construction projects, safety regulations, taxation of cigarettes, and investment in higher education. Given the prevalence of cost-benefit analysis in government budgetary processes, this course will develop critical appraisal skills to evaluate the appropriateness of these analyses.

ECON 4210 Financial Markets And Institutions: 3 semester hours
Prerequisite: ECON 3200. Demand, supply and flow of funds in the macrofinancial system, including money, capital, futures and foreign exchange markets. Examines types and historical development of domestic and international financial intermediaries operations within these markets, decision-making within individual intermediaries, their regulatory environment, and how their portfolio decisions affect flows of funds in the financial system.

ECON 4450 Natural Resource Economics: 3 semester hours
Prerequisites: ECON 1001 or consent of instructor; Junior standing. The relationship between human activity and the world's natural resources requires choices. This course uses an economics perspective to study these choices. This perspective uses the view of the environment as an asset for its starting point. Issues concerning the optimal and sustainable use of natural resources are examined in this context. Special emphasis is given to potential policy responses to environmental problems.

ECON 4900 Advanced Topics in Economic Analysis: 3 semester hours
Prerequisite: ECON 3001 or ECON 3002 or consent of instructor. Study of a specific topic in Economics that may vary from semester to semester. May be taken for credit more than once if the topics are different.

ECON 4980 Special Readings: 1-6 semester hours
Prerequisite: Consent of instructor; grade point of 3.0 or higher in Economics. Unscheduled, independent directed readings on topics mutually acceptable to student and instructor. Maximum credit limited to six hours.

ECON 4990 Internship in Applied Economics: 2-6 semester hours
Prerequisites: ECON 3001, junior standing and consent of instructor. Independent study involving work with an appropriate private firm or public agency. A maximum of six hours may be earned, only three of which may be applied to the Economics major.
ECON 4995 *Internship in Actuarial Science: 1-3 semester hours*  
Same as MATH 4995. Prerequisites: Junior standing and consent of program director. Supervised off-campus training in a private or public sector position in which the student applies the knowledge and skills learned in their actuarial science coursework. The internship is monitored by a faculty member and the student must provide a written report at the end of the project. This course may be repeated for a maximum of 6 credit hours.

ECON 5001 *Microeconomic Analysis: 3 semester hours*  
Prerequisites: ECON 3001 or BUS AD 5001; ECON 3002 or BUS AD 5002; ECON 4150. Aggregate economic theory, including analysis of the determinants of income, output, employment, and prices. Employment and price-level effects of consumer and investment demand, the money supply and interest rates, and government policies.

ECON 5002 *Macroeconomic Analysis: 3 semester hours*  
Prerequisites: ECON 3200; ECON 3001 or BUS AD 5001; ECON 3002 or BUS AD 5002; and ECON 4150. Aggregate economic theory, including analysis of the determinants of income, output, employment, and prices. Employment and price-level effects of consumer and investment demand, the money supply and interest rates, and government policies.

ECON 5052 *Microeconomics for the School Curriculum: 1-3 semester hours*  
Prerequisites: Bachelor’s degree from an accredited institution or consent of instructor. Analysis of market forces, with emphasis on business firms, households, productive factor markets, price determination and resource allocation. Special reference to topics included in the elementary and secondary school social science curricula.

ECON 5055 *Economic Issues for School Curriculum: 1-3 semester hours*  
Prerequisite: Junior standing and consent of instructor. An analysis of selected economic issues appropriate to instruction in secondary and elementary schools. May be taken more than once for credit provided the topic of the course is different each time. May not normally be used by economics majors to meet degree requirements.

ECON 5100 *Econometric Theory and Methods: 3 semester hours*  
Prerequisites: ECON 3001 or BUS AD 5001; ECON 3002 or BUS AD 5002; ECON 4100; ECON 4150 or equivalent. A rigorous review of statistical models and methods relevant to the estimation and testing of economic relationships. Emphasis on the theoretical underpinnings of techniques commonly used for multivariate regression analysis and hypothesis testing. Topics include ordinary least squares, generalized least squares, and instrumental variables estimation.

ECON 5101 *Topics in Applied Econometrics: 3 semester hours*  
Prerequisites: ECON 4100, or ECON 5100 or SCMA 5300. Concepts and application of advanced econometric techniques. Students will develop a thorough understanding of the appropriateness and application of a variety of state-of-the art techniques. Topics will include specification tests, polynomial distributed lags, discrete choice, pooled time-series cross-section, simultaneous equations and outlier detection.

ECON 5120 *Advanced Topics in Time Series Econometrics: 3 semester hours*  
Prerequisites: ECON 4100 or equivalent and a solid foundation in statistics. Application of econometric methods to time-series data. Emphasis on model specification as it applies to macroeconomic or financial data. Advanced topics include: Stationary and nonstationary time-series, seasonality, random walks, unit roots, Dickey-Fuller tests, cointegration, ARCH/GARCH models, and general to specific modeling (ADLs). Specific applications to macro-economics, international economics and/or financial markets.

ECON 5130 *Advanced Topics in Business and Economic Forecasting: 3 semester hours*  
Prerequisites: ECON 3001 or BUS AD 5001; ECON 3002 or BUS AD 5002; ECON 4150; ECON 4100 or SCMA 5300. This course develops the alternative techniques which are used to forecast economic time series. Each forecasting technique will be evaluated in terms of its theoretical soundness and predictive track record. Students will also learn to use these techniques to differentiate among competing economic models.

ECON 5150 *Mathematical Methods for Economics: 3 semester hours*  
Prerequisites: MATH 1100 or MATH 1800, ECON 3001. This course presents the mathematics used in economics at an advanced level. Subjects covered include multivariate calculus, linear algebra, comparative statics, and unconstrained and constrained optimization. Emphasis is placed on the interpretation of mathematical results in economic terms. Students may not receive credit for both ECON 4150 and ECON 5150. This course may not be used by Economics students to meet M.A. degree requirements.

ECON 5200 *Monetary Theory and Policy: 3 semester hours*  
Prerequisites: ECON 3200; ECON 3001 or BUS AD 5001; ECON 3002 or BUS AD 5002; and ECON 4150. An examination of how monetary policy has affected the economy in the past and how it can improve economic performance in the future. Topics include: the origins of money, money supply, money demand, the determinants of real and nominal interest rates, the term structure of interest rates, the impact of discretionary monetary policy on the domestic economy and foreign exchange markets, and the domestic economy and foreign exchange markets, and the relationship between monetary policy and federal government deficits.

ECON 5210 *Financial Markets: 3 semester hours*  
Prerequisites: ECON 3001 or BUS AD 5001; ECON 3002, and ECON 3200. Demand, supply, and flow of funds in allocating credit and distributing risk in the macrofinancial system. The saving investment process, the rationale for financial markets, and the role of financial intermediaries are studied within the framework of the flow of funds accounts. Special attention is given to the operation of money, capital, futures, and foreign financial markets and the impact of public policy on the structure and performance of financial markets.

ECON 5300 *International Trade: 3 semester hours*  
Prerequisites: ECON 3001 or BUS AD 5001. Survey of the modern theories of international trade and their applications including factor endowments and other, trade restrictions, foreign investment, trade and economic development, and balance of payments and exchange rates. Discussion of current institutions and economic developments in the global economy.

ECON 5301 *International Monetary Analysis: 3 semester hours*  
Prerequisites: ECON 3200 and ECON 3002 or BUS AD 5002. Application of macroeconomic theory to the international monetary system. Topics include the balance of payments, exchange rates, international linkages, world inflation, capital flows, and the gold standard.

ECON 5400 *Labor Economics: Theory and Public Policy: 3 semester hours*  
Prerequisites: ECON 3001 or BUS AD 5001. This course examines labor supply, labor demand, and market determination of wages. Topics covered include the effect of technological change on employment, trends in labor force participation, the impact of government taxes and transfers on labor supply, poverty, and its economic consequences, the human capital model and its implications for investment in education and on-the-job training, and theories of economic discrimination and empirical measurement issues. Throughout the course, current public policy debates are examined using the theoretical models developed.
**ECON 5550 Economics for Public Policy Analysis:** 3 semester hours  
Prerequisite: Graduate standing. This course focuses on the role of the government in the economy, with particular attention paid to the way government affects the allocation of resources and the distribution of income. This course covers microeconomic principles and key economic concepts used in public policy analysis. Practical application of theoretical concepts is emphasized. This course may not be used by Economics students to meet M.A. degree requirements.

**ECON 5980 Advanced Topics in Economic Analysis:** 3 semester hours  
Prerequisite: Consent of the instructor. Study of a specific economics topic, which may vary from semester to semester. May be taken more than once if the topic is different.

**ECON 5980 Directed Readings:** 1-6 semester hours  
Prerequisite: Consent of the instructor. Independent study through readings, reports, research projects, and conferences.

**Geography Courses**

**GEOG 1001 Introduction to Geography (MOTR GEOG 101):** 3 semester hours  
An introduction to geography as a social science. The identification and explanation of order in the human landscape. A survey of the social, political, economic, and psychological factors which influence geographic patterns.

**GEOG 1002 World Regions (MOTR GEOG 101):** 3 semester hours  
Survey of the major regions of the world. Designed to give the student an awareness of the character of each of these major regions through the interrelationships of the various attributes of place. Each semester the geographic perspective will be applied in greater depth to one significant country such as Afghanistan, Iraq, or North Korea.

**GEOG 2001 Cultural Geography:** 3 semester hours  
This course examines the effect of geography on culture and cultural groups. Essential to the geographic perspective is identifying the effect on cultures of the current trend toward increasing globalization. Topics include language, religion, attitudes, and the effect of technology. The major goals are to increase awareness of the diversity of human cultures and to prepare students for a world of increasing intercultural communication and conflict. Satisfies cultural diversity.

**GEOG 4900 Advanced Readings in Geography:** 3 semester hours  
Prerequisite: Consent of instructor. This course will provide a more in-depth analysis of the various factors which influence geographic patterns employing methods appropriate to graduate level instruction. The topic selected will vary from semester to semester. This course may be taken for credit more than once as long as the topic discussed in each semester is different.

**English**

**General Information**

**Degrees and Areas of Concentration**

The English department offers or participates in offering the B.A. in English, the B.A. in English with certification for secondary teaching, and the B.S. in secondary education with an emphasis area in English. The department also offers a minor in English. Additionally, students with any major in the university may earn a Certificate in Writing so that they may demonstrate evidence of training in creative, journalistic, or technical writing.

The department has a graduate program leading to the Master of Arts degree. Students may pursue a literature track where they acquire a broad coverage in British and American writers or a writing track where half of the course work deals with composition and writing theory. The department also offers the Master of Fine Arts in creative writing, in which half of the courses are writing workshops and independent writing projects. In addition, the department of English participates in a Graduate Certificate in the Teaching of Writing.

**Departmental Honors**

Candidates for departmental honors in English must achieve a 3.2 average in English at graduation and complete an undergraduate or graduate seminar in English, the final paper for which must be acceptable to the instructor as an honors thesis.

**Career Outlook**

In addition to traditional employment as teachers at the primary, secondary, and community-college levels, recent UMSL graduates in English are working in journalism, editing, advertising, public relations, and other fields that place a premium upon creation and interpretation of the written word. Numerous recent English majors have successfully entered law school.

**Degrees**

English BA (p. 456)

English MA (p. 458)

Creative Writing MFA (p. 398)

**Minor**

English Minor (p. 459)

**Certificates**

Technical Writing Undergraduate Certificate (p. 646)

Teaching of Writing Graduate Certificate (p. 645)

**Courses**

**ENGL 1030 Beginning Creative Writing:** 3 semester hours  
This course introduces students to the building blocks of creative writing and the writing workshop classroom. Students will explore how creative writers decide what material is best suited for a story, an essay, or a poem. Pairing creativity with critical thinking, the course offers basic writing practice and familiarizes students with primary concepts and techniques of craft (e.g., narrative, point-of-view, voice and style, character development, setting, imagery, and figurative language).

**ENGL 1100 First-Year Writing (MOTR ENGL 200):** 3 semester hours  
Integrates critical reading, writing, and thinking skills and studies actual writing practices. Sequenced reading and writing assignments build cumulatively to more complex assignments. Includes formal and informal writing, drafting and revising, editing for correctness, synthesizing source material, and documenting sources accurately. Fulfills 3 hours of the General Education requirement for Communicating Skills. Does not count toward the major in English.
ENGL 1110 First-Year Writing for International Students: 3 semester hours
Prerequisite: Essay proficiency test or a TOFEL score of 500 or above. Designed for any student whose first language is not English. Integrates critical reading, writing, and thinking skills and studies actual writing practices. Sequenced reading and writing assignments build cumulatively to more complex assignments. Includes formal and informal writing, drafting and revising, editing for correctness, synthesizing source material, and documenting sources accurately. Special attention given to verb tenses, idioms, articles, and syntax. Does not count toward the major in English. Substitutes for ENGL 1100 in all university requirements.

ENGL 1120 Introduction to Literature (MOTR LITR 100): 3 semester hours
The student is introduced to the various literary types, including poetry, drama, fiction, and the essay.

ENGL 1170 American Literary Masterpieces: 3 semester hours
An introduction to major authors, works, and themes in American Literature from the nineteenth century to the present.

ENGL 1710 Native American Literature: 3 semester hours
The course surveys the literature of American Indians from its oral tradition of myth, legend, song and oratory through its modern forms. The course satisfies the ethnic literature requirement for Missouri state certification in secondary education and the cultural diversity requirement.

ENGL 1800 Reading Life: 3 semester hours
This course teaches college-level reading in the Humanities. The course primarily covers written texts, but may also include various genres in music, television and film, and theater. The course may be counted towards the major or minor in English.

ENGL 1950 Topics in Literature: 3 semester hours
This course will introduce the student to selected literary topics and/or genres. Each semester the department will announce topics and course content. Topics such as alienation, justice, and the absurd, and genres such as science fiction and contemporary drama are typical possibilities.

ENGL 2020 Introduction to Creative Writing: 3 semester hours
Prerequisites: ENGL 1100 or equivalent. This course is a creative writing survey and workshop focusing on the study of three genres-short fiction, poetry, and creative nonfiction. Students learn primary concepts and techniques of craft, including narrative, voice, character, setting, imagery, metaphor, point-of-view. Students will explore literary conventions specific to each genre, as well as universal qualities that make all writing effective for an audience. The course requires three different kinds of writing: brief analytic essays, open-ended exploratory exercises, and carefully-revised original work. This course fulfills the core requirement in Creative Writing and counts toward the Certificate in Writing.

ENGL 2030 Poetry Writing Jumpstart: 3 semester hours
Prerequisites: ENGL 1100 or equivalent. This course provides new poets, would-be poets, and curious non-poets with exercises, experiments, and activities to explore two questions: what is a poem, and how does one get written? Students will read published poems and examine their use of imagery, metaphor, form, and other techniques, and experiment with those techniques in their own writing. This course satisfies the English core requirement for the Creative Writing area and counts toward the Certificate in Writing.

ENGL 2040 Fiction Writing Jumpstart: 3 semester hours
Prerequisites: ENGL 1100 or equivalent. This course provides exercises, discussions, models, and practice for discovering short stories and the many ways to tell them. Students will read published short stories to learn how other writers have worked with point of view, distance, voice, plot, dialogue, setting, and characterization. Students will also write exercises and stories for workshop critique. Students who have taken ENGL 2060 may not take ENGL 2040 for credit. This course fulfills the English core requirement for the Creative Writing area and counts toward the Certificate in Writing.

ENGL 2080 Advertising Copywriting: 3 semester hours
Same as MEDIA ST 2080. To give students a hands-on approach for writing advertising material for print and broadcast against tight deadlines in a professional setting.

ENGL 2110 Information Literacy: 3 semester hours
Designed especially for humanities and fine arts majors, this course introduces students to the main components of information literacy, including digital, web, and media literacies as well as library databases. Students work with both digital and print materials to find, evaluate, and synthesize information while applying the critical thinking habits of questioning and reasoning. Frequent writing and multimedia assignments will provide practice in using various technologies to assemble and to share information.

ENGL 2120 Topics in Writing: 3 semester hours
Prerequisite: ENGL 1100 or equivalent, or consent of instructor. This course will introduce the student to writing in specific areas. Possible topics are argumentation, reading and writing about public affairs, sports reporting and writing, and writing about science. A student may repeat the course once when topics are different. The course counts toward the Certificate in Writing.

ENGL 2125 Introduction to Technical Communication (MOTR ENGL 110): 3 semester hours
This course introduces students to the role of the professional technical communicator in business and industry. Students will explore methods of developing technical documents, including critical analysis, information design, and rhetorical expression.

ENGL 2160 Introduction to American Studies: 3 semester hours
Same as HIST 2160. This course introduces students to the multidisciplinary nature of American Studies and is a required course for those who wish to complete the minor in American Studies. It reviews the discipline from its origins in the 1930s, and it introduces students to St Louis' rich resources for American Studies.

ENGL 2330 Poetry: The Greatest Hits: 3 semester hours
This course examines a selection of the most important poems written in English. Students will study poems to understand both their literary elements-form, metaphor, theme, and so on-and their cultural/historical context. Through a careful examination of poetry, students will sharpen their ability to read, discuss, and write about literary texts. This course satisfies the core curriculum requirement for the Literature in English area.

ENGL 2340 Introduction to Drama: 3 semester hours
A close study of major dramatic works in various modes, to introduce the student to the forms and techniques of dramatic literature.
ENGL 2360 Hey, Have You Read ______?: 3 semester hours
Prerequisites: ENGL 1100 or equivalent, or consent of instructor. This course introduces students to approaches to reading literature in the 21st century. The course can focus on a specialty area, such as a genre, time period, or nationality, or on a theme transcending several specialty areas. Students will learn to read closely and begin to look at literature through various theoretical or cultural lenses. This course satisfies the English core requirement for the Literature in English area.

ENGL 2370 Drama: The Greatest Hits: 3 semester hours
Prerequisites: ENGL 1100 or equivalent, or consent of instructor. This course introduces students to some of history's most famous dramas both as literary forms and as cultural expressions. Plays will therefore be considered for themselves-for their genre, structure, and language-as well as for their social function, in an effort to better understand the complex communal values, settings, and crises which produced them. Students will read and discuss a wide variety of well-known plays from ancient Greece and Rome, the early modern English stage, and modern and contemporary culture. This course satisfies the English core requirement for the Literature in English area.

ENGL 2400 Rhetorical Ways with Words: 3 semester hours
Prerequisites: ENGL 1100 or equivalent. This course focuses on the diverse purposes and uses of language and writing, encouraging students to consider these functions beyond solely academic and literary realms. Specifically, students will investigate how language and writing are connected to identity, power, community, and knowledge creation. To accomplish these broad goals, students will read critical scholarship from a variety of related disciplines. They may practice field-specific methods of inquiry and/or investigate local, regional, individual rhetorical and language practices and engage in print and/or multimodal composition. This course satisfies the English core requirement for the Language and Writing Studies area.

ENGL 2410 Literate Lives: 3 semester hours
Prerequisites: ENGL 1100 or equivalent. This course raises definitional and exploratory questions: What is literacy? How does it change across time? Who has access to it? How can literacy both empower and marginalize people? To explore these complex questions, students will investigate the ways in which contemporary practices of literacy-reading, writing, listening, speaking, digital composing, and critical thinking-function in the lives of individuals, communities, and cultures. Students will interrogate current definitions of literacy, study scholarship about literacy, explore literacy myths, and reflect on how their own literate lives have been shaped. They may engage in field work and interact with local literacy communities. This course satisfies the core curriculum requirement for the Language and Writing Studies area.

ENGL 2810 Traditional Grammar: 3 semester hours
An introduction to the terms and concepts of traditional grammar, beginning with functions of the noun and forms of the verb in simple sentences, moving to more complex structures such as subordinate clauses and verbal phrases, and ending with the application of this material to issues of Standard English.

ENGL 2830 Introduction to English Language Variety: 3 semester hours
Prerequisites: ENGL 1100 or equivalent. This course introduces students to the intersections of language and culture, including some of the many dialects of English. Students will learn about the social dimensions of language variation: why people from different cultural groups and regions use different versions of English, how they define themselves based on vocabulary, accent, and phrasing, and how these aspects of language change over time. This course satisfies the English core requirement for the Language and Writing Studies area.

ENGL 3030 Improving on the Blank Page: Writing Poetry: 3 semester hours
Prerequisite: ENGL 1100 or the equivalent or consent of instructor. This course digs into questions of form and technique in poetry. Students will study and practice form, prosody, figurative language, and other techniques for (to borrow from Chilean poet Nicanor Parra) improving on the blank page. This course may be repeated once for a total of 6 credit hours. It counts toward the Certificate in Creative Writing.

ENGL 3040 Lying to Tell a Truth: Writing Fiction: 3 semester hours
Prerequisite: ENGL 2040 or ENGL 2060 or the equivalent or consent of instructor. This course examines and provides examples of characterization, dialogue, point-of-view, distance, weight, plot, setting, and more. Students will read published short stories, and discuss the idea of writing as discovery and exploration, that writers work out of curiosity and bewilderment and tell lies to arrive at a truth.

ENGL 3090 Turning the Kaleidoscope: How We Look at Texts: 3 semester hours
Prerequisites: ENGL 1100 or equivalent and 56 credit hours. This course introduces the use of literary theory in reading and writing about literary texts. Students learn and practice conventions of writing in English studies, basic literary research, and MLA documentation. Strongly recommended for English majors specializing in literature or anticipating graduate study in English. May not be taken on satisfactory/unsatisfactory basis. Counts towards the Certificate in Writing.

ENGL 3100 Junior-Level Writing: 3 semester hours
Prerequisites: ENGL 1100 or equivalent (3-6 credit hours) and 56 credit hours. This course enhances analytical, communicative, persuasive, and explanatory capabilities in contemporary American English. It emphasizes academic reading, writing, research, and documentation. It fulfills the university's junior-level writing requirement and counts towards the Writing Certificate.

ENGL 3110 Junior-Level Writing for International Students: 3 semester hours
Prerequisites: ENGL 1110 or equivalent (3-6 credit hours) and 56 credit hours. This course enhances analytical, communicative, persuasive, and explanatory capabilities in contemporary American English. It focuses on the conventions of academic reading, writing, research, and documentation. It fulfills the university's junior-level writing requirement and counts towards the Certificate in Writing.

ENGL 3120 Business Writing: 3 semester hours
Prerequisites: ENGL 1100 or equivalent (3-6 hours) and 56 credit hours. This course further develops the experienced writer's style and analytical capabilities to the level of sophistication necessary for business and professional settings. Writing assignments may include business correspondence, reports, resumes, proposals, analyses, presentations, marketing, promotional, and multi-modal materials, discussion postings and blogs, articles for in-house publications, and research and documentation. The course fulfills the University’s junior-level writing requirement and may not be taken on a satisfactory/unsatisfactory basis.
**ENGL 3130 Technical Writing: 3 semester hours**
Prerequisites: ENGL 1100 or equivalent (3-6 hours) and 56 credit hours. This course introduces students to the major elements of industrial technical writing. Writing assignments include technical definitions, abstracts and summaries, mechanism descriptions, instructions, process analyses, technical reports and proposals. The course includes an introduction to research methods and documentation. This course fulfills the University's junior-level writing requirement and may not be taken on the satisfactory/unsatisfactory option.

**ENGL 3150 Feature Writing: 3 semester hours**
Same as MEDIA ST 3150. Prerequisite: ENGL 1100 or equivalent. Study of freelance and staff-written magazine or newspaper feature articles. Emphasis on relationship between types of publication and article content, research methods, and writing style. Frequent short assignments -- journal entries, interviews, library projects, article critiques, and market reports -- lead to production of full-length feature articles. May not be taken on the S/U option. The course counts toward the Certificate in Writing.

**ENGL 3160 Writing in the Sciences: 3 semester hours**
Prerequisites: ENGL 1100 or equivalent (3-6 hours) and 56 credit hours. This course is designed to teach students how to write effectively in the sciences. Writing assignments include short reports, proposals and a major project; projects may include a research or analytical report, a formal proposal or a procedures/instructions manual. The course includes an introduction to research methods and documentation. This course fulfills the University's junior-level writing requirement and may not be taken on the satisfactory/unsatisfactory option.

**ENGL 3200 Composing Disability: 3 semester hours**
Prerequisites: ENGL 1100 or equivalent. This course offers students an understanding of disability as a complex and crucial part of the world and human experience. Students will approach disability as a matter of identity, language, writing, power, education, politics, literature, art, and more. More specifically, they will read disability studies critical theory, literary works, and personal narratives; create accessible multimodal projects; engage in scholarly and/or community-based research; and candidly discuss assumptions about disability. Through this work, students will assess the value and effect of different ways of thinking about disability and understand the core concepts of disability studies and its emergence as a field.

**ENGL 3201 Narratives from the Forever Wars: 3 semester hours**
Same as MEDIA ST 3201 and MVS 3201. This course studies literature and film written by and about those who served in the wars in Iraq and Afghanistan, with particular interest in how veterans as individuals are represented in it.

**ENGL 3280 Public Relations Writing: 3 semester hours**
Prerequisite: ENGL 3100 or equivalent. An introduction to the process of planning, producing, and evaluating written public relations messages. Writing assignments include media releases, letters, memos, position papers, background papers, brochures, and reports and proposals.

**ENGL 3310 English Literature Before 1790: 3 semester hours**
Prerequisite: ENGL 1100 or equivalent. This course examines the development of English literature from the Middle Ages through the eighteenth century. Students will be introduced to major literary movements and themes through the reading and analysis of representative works of selected major authors. This course fulfills the British Literature requirement for the major.

**ENGL 3320 British Literature in the Long 19th Century: 3 semester hours**
Prerequisite: ENGL 1100 or equivalent. This course meets the requirement for one 3000 level course in British literature. It surveys the arc of British literature from about 1790 into the early 20th century: the Romantic, Victorian, and Modernist eras.

**ENGL 3330 Reformers, Revolutionaries, and Romantics in the British Romantic Era: 3 semester hours**
Prerequisites: ENGL 1100 or equivalent. Students read poetry and prose by several major writers of the British Romantic period. This course meets the requirement for one 3000 level course in British literature.

**ENGL 3340 Full Speed Ahead! Literature in the Dizzying Victorian Era: 3 semester hours**
Prerequisites: ENGL 1100 or equivalent. Students read poetry, essays, and fiction by major writers from the Victorian era of British literature. This course meets the requirement for one 3000 level course in British literature.

**ENGL 3350 Slouching Toward Chaos: the Early 20th Century in British Literature: 3 semester hours**
Prerequisites: ENGL 1100 or equivalent. Students read poetry, drama, and fiction by major writers of the Modernist era of British literature. This course meets the requirement for one 3000 level course in British literature.

**ENGL 3500 Special Studies: 1-3 semester hours**
Prerequisite: A course in a field of study that is approved by the department. Individual work, with conferences adjusted to needs of the student. May not be used to meet specific English department distribution requirements. May be repeated for a maximum total of four hours credit.

**ENGL 3510 World Literature Before 1650: 3 semester hours**
Prerequisite: ENGL 1100. This course surveys World Literature from the earliest times to 1650. Students will examine diverse literary works in a variety of genres and voices. The course will include literary works from diverse traditions throughout the world, excluding literature from the United States and England.

**ENGL 3520 World Literature After 1650: 3 semester hours**
Prerequisites: ENGL 1100. This course surveys World Literature from 1650 to the present. Students will examine diverse literary works in a variety of genres and voices. The course will include literary works from diverse traditions throughout the world.

**ENGL 3530 Contemporary World Literature: 3 semester hours**
Prerequisites: ENGL 1100 or equivalent. This course covers selected World Literature from the 20th and 21st centuries with emphasis on non-European literatures. This course may include works from Europe, Latin American, the Middle East, Africa, and Asia; it excludes literature from the United States and England.

**ENGL 3710 American Literature Before 1865: 3 semester hours**
Prerequisites: ENGL 1100 or equivalent. This course features representative selections from American authors from the early seventeenth century to the Civil War. This course fulfills the American Literature requirement for the major.
ENGL 3720 American Literature After 1865: 3 semester hours
Prerequisites: ENGL 1100 or equivalent. This course examines dramatic upheavals in society that have engendered continuous innovation in American literature since 1865. It will look closely at a variety of individual authors motivated by these artistic, cultural, political, and psychological disturbances; we will also pay close attention to specific literary movements, from Naturalism to Transrealism, energized by these societal changes. This course fulfills the American Literature requirement for the major.

ENGL 3800 Topics in Women and Literature: 3 semester hours
An examination of the role of women in literature, either as figures in literary works or as writers. Specific topics to vary from semester to semester. Since the topics of ENGL 3800 may change each semester, the course may be repeated for credit if the topics are substantially different.

ENGL 4030 Contemporary Critical Theory: 3 semester hours
This course is to acquaint students with a range of critical methodologies that have gained currency since the 1960's; topics may include formalist, structuralist, post-structuralist, Marxist, reader-response, psychoanalytic, feminist, cognitive, and evolutionary approaches to literature and culture.

ENGL 4060 Adolescent Literature: 3 semester hours
The course will expose students to the large variety of quality adolescent literature available for reading and study in middle and high school classes. It will also examine the relevance of a variety of issues to the reading and teaching of adolescent literature, among them: reader response; theory and practice; multi-culturalism; literacy; the relation of adolescent literature to "classic" literature the role of adolescent literature in interdisciplinary studies; adolescent literature as an incentive to extracurricular reading.

ENGL 4080 The Truth about Fiction: Biological Reality and Imaginary Lives: 3 semester hours
Prerequisites: ENGL 3100 or equivalent (may be taken concurrently). This course presupposes that works of literature center on the main phases, motives, and social relationships in the human life cycle, for instance, survival, growing up, establishing an identity, becoming part of a community, mating, parenting and family life, conflicts between communities, imaginative culture (religion, ideology, the arts), growing old, and dying. Readings include literary works along with psychological studies and literary theory and criticism that draw on biologically grounded research on human behavior.

ENGL 4130 A Machine Made of Words: Writing Your Best Poems: 3 semester hours
Prerequisites: ENGL 3100 or equivalent. This course examines in more detail the ways in which poets construct machines from words—that is, the way that the words of a poem provide its verbal, emotional, and intellectual energy. Through the examination and discussion of both contemporary published poetry and the work of students in the class, students will consider the question: how do poems use language to make sense of (or to defamiliarize) the world and our experience of it? The course counts toward the Certificate in Writing.

ENGL 4140 Polishing Your Stories: Producing a Publishable Short Story: 3 semester hours
Prerequisites: ENGL 3100 or equivalent. This course gives student writers tools and practice in re-thinking and rewriting their stories. It is for students who are serious about writing stories that can be published in litmag, Bellerive, or other journals. Students will produce drafts for workshop critique and will rewrite them producing at least one that is polished enough for publication. The course counts toward the certificate in Writing.

ENGL 4150 Creative Non-Fiction: 3 semester hours
Prerequisites: ENGL 3100 or equivalent. This course will examine the aesthetic and technical concerns of the writer of creative non-fiction. Students will read published essays and write their own to submit for workshop. This course counts toward the Certificate in Writing.

ENGL 4160 Special Topics in Writing: 3 semester hours
Prerequisites: ENGL 3100 or equivalent. Special topics in writing that are not covered in other 400-level English courses. Since the topics of ENGL 4160 may change each semester, the course may be repeated for credit if the topics are substantially different.

ENGL 4180 Novel Beginnings: 3 semester hours
Prerequisites: ENGL 3100 or equivalent. This course teaches students to engage the reader when writing a Sci-fi / Fantasy / Thriller / Young Adult / Literary novel. Students will work on getting the balance right, on creating a compelling event, dimensional characters, an engaging plot, a setting that feels real, and a point-of-view strategy. Students learn about key ingredients that make a novel beginning interesting to a reader and present their novel beginnings in a workshop format for revision.

ENGL 4260 Chaucer: 3 semester hours
The course concentrates on the poetry of Geoffrey Chaucer, including the Canterbury Tales, early poetic works, and the Troilus and Criseyde. All readings are in the original Middle English.

ENGL 4270 Medieval English Literature: 3 semester hours
A survey of old and middle English literature from Beowulf to Malory's Morte d'Arthur, exclusive of Chaucer. All works are read in modern English translations.

ENGL 4360 Shakespeare's Friends and Rivals: 3 semester hours
Prerequisites: Junior standing or consent of instructor. This course studies the professional London stage from the 1580s to the 1620s with particular emphasis on the drama of Shakespeare's contemporaries. Though Shakespeare will not be the focus in this course, connections with his works will be discussed. Students will learn the conventions of dramatic genres and how to situate plays in their historical, cultural, and literary contexts. They will also explore how playwrights responded to the theater market in which they exhibited their dramatic wares and the extent to which they saw one another as rivals or collaborators.

ENGL 4370 Shakespeare: Tragedies and Romances: 3 semester hours
Prerequisites: Junior standing or consent of instructor. This course explores Shakespeare's tragedies and romances, with particular attention to their genre as well as their relation to the cultural issues of Shakespeare's time. Students will learn to see Shakespeare as a dramatic craftsman and explore the question of his contribution to English literature: whether he saw himself as an innovator or inheritor of well-known stories from the classical tradition, Britain's chronicle histories, scripture, and legend. Shakespeare's narrative poems as well as modern film adaptations may also be featured.

ENGL 4380 Shakespeare: Comedies and Histories: 3 semester hours
Prerequisites: Junior standing or consent of instructor. This course explores Shakespeare's comedies and histories, with particular attention to their genre as well as their relation to the cultural issues of Shakespeare's time, above all the place of women and the importance of marriage and male friendship. Students will learn how Shakespeare's plays explore the rights of citizens and perhaps challenge accepted notions of political power. Students will also uncover Shakespeare's debt to ancient and contemporary forms of comedy as well as his innovative contributions to that dramatic form. The sonnets as well as modern film adaptations may also be brought into the discussion of these questions.
ENGL 4450 The Eighteenth-Century English Novel: 3 semester hours
The origins and early development of the English novel, from Defoe to Jane Austen.

ENGL 4540 The Nineteenth-Century English Novel: 3 semester hours
Novels of the Romantic and Victorian periods, from Austen to George Eliot.

ENGL 4550 Novels into Films: The Nineteenth Century: 3 semester hours
Prerequisites: ENGL 3090, ENGL 3320. Novels by Austen, Eliot, Wilde, Hardy, and others read in themselves and as interpreted in film. Comparisons of the representational and aesthetic techniques available to novels and film.

ENGL 4580 Literature of the Late Nineteenth and Early Twentieth Centuries: 3 semester hours
Literature of the period between 1870 and the First World War, including works by writers such as Hardy, Conrad, James, Wilde, Stevenson, Shaw, Jefferies, and Wells.

ENGL 4610 Selected Major American Writers I: 3 semester hours
American literature of the nineteenth century: Emerson, Thoreau, Hawthorne, Melville, Whitman and others.

ENGL 4620 Selected Major American Writers II: 3 semester hours
American literature of the late nineteenth and early twentieth centuries: Dickinson, James, Twain, Cather, Frost, Dreiser and others.

ENGL 4650 Modern American Fiction: 3 semester hours
The novel and short story in America since World War I. There may be some attention to British and continental influences.

ENGL 4740 Poetry Since World War II: 3 semester hours
Reading and analysis of contemporary poetry.

ENGL 4750 Modern British Fiction: 3 semester hours
Critical reading and analysis of British fiction of the twentieth century. There may be some attention to American and continental influences.

ENGL 4770 Modern Poetry: 3 semester hours
Critical reading and analysis of poetry of the late nineteenth and early twentieth centuries. Yeats, Eliot, Frost, Williams and others.

ENGL 4790 Rhetoric and Social Justice: 3 semester hours
Prerequisites: ENGL 3100 or equivalent. This course introduces students to rhetoric as integral to language, communication, and meaning-making. Students will read rhetorical history and contemporary scholarship and theory; apply theories to various scenarios and artifacts; and become more thoughtful practitioners of rhetoric in their own lives. Specifically, the course introduces rhetoric through the lens of social justice, offering students an opportunity to use rhetorical theories and methods to better understand current social events, activist movements, practices of civic engagement, and corresponding media representations.

ENGL 4800 Introduction to English Linguistics: 3 semester hours
Prerequisites: ENGL 3100 or equivalent. This course presents a survey of linguistics with emphasis on what the field reveals about the English language. Topics include the sounds of language, grammar, writing systems, language acquisition, language in society, language history, dialects, and usage.

ENGL 4810 Descriptive English Grammar: 3 semester hours
Prerequisites: ENGL 3100 or equivalent; ENGL 2810 or passing grade on English-Education Test of Basic Grammar. This course presents a descriptive study of modern English morphology and syntax (grammar) from the perspectives of traditional, structural, and transformational grammar.

ENGL 4820 History of the English Language: 3 semester hours
Prerequisites: ENGL 3100 or equivalent. A historical survey of the English language from its Indo-European roots through Old and Middle English to the present. Topics include changes in sound, meaning, and grammar, as well as developments in American English, including regional and social dialects.

ENGL 4830 English Sociolinguistics: 3 semester hours
Prerequisites: ENGL 3100 or equivalent. This course presents a survey of topics in sociolinguistics, the study of the relation between language and society, with some emphasis on language variation in English. The course offers both quantitative and qualitative approaches to topics such as social dialectology, variationist and third-wave sociolinguistics, ethnography of communication, and language in relation to education, ethnicity, gender, and sexuality.

ENGL 4850 Topics in the Teaching of Writing: 1-3 semester hours
Same as TCH ED 5850. Prerequisites: ENGL 3100 or equivalent. Special topics in the practice of and pedagogy of writing designed for in-service teachers. Topics may include writing at specific grade levels, writing/reading workshops, writing in urban settings, writing across the curriculum, action research, new technology, classroom and district-level assessment. May be repeated once for credit if topics differ. Counts toward Certificate in Writing.

ENGL 4860 Editing and the Production Process: 3 semester hours
Prerequisites: ENGL 3100 or equivalent; ENGL 2810 or ENGL 4810. This course provides students an opportunity to perform professional-level copyediting and proofreading, navigate several industry-standard publishing style manuals, understand the basic stages of the book production process and editorial roles at various stages during that process, and recognize and question trends in the practice and execution (media, format) of copyediting. This course counts toward the Professional, Creative, and Technical Writing Certificates.

ENGL 4864 Technical Editing: 3 semester hours
Prerequisites: ENGL 1100 or equivalent (3-6 hours) and junior standing. This course covers the principles and practices of technical editing, including usability, audience analysis, contextual editing, the conventions of scientific and technical communication, and the role of the editor in document development and publication. Students will also learn standard practices of copy editing and the use of style guides.

ENGL 4865 Content Strategy: 3 semester hours
Prerequisites: ENGL 1100 or equivalent (3-6 hours) and junior standing. This course examines the practice of technical communication in content management system (CMS) environments and covers such subjects as single sourcing, topic-based writing, and adaptive content. Students will learn how to perform a content audit, engage in content modeling, create content templates, and use Framemaker or a similar tool to structure content.

ENGL 4866 Help Authoring: 3 semester hours
Prerequisites: ENGL 1100 or equivalent (3-6 hours) and junior standing. This course addresses the technological and rhetorical skills necessary for creating effective online help systems, including context-sensitive help for computer applications.

ENGL 4867 Proposal Writing: 3 semester hours
Prerequisites: ENGL 1100 or equivalent (3-6 hours) and junior standing. This course familiarizes students with many aspects of writing proposals for various purposes in academic, professional, and public spheres. It offers students opportunities to write documents to promote their academic, professional, or personal goals or those of their organization(s).
ENGL 4869 Usability Studies: 3 semester hours
Prerequisites: ENGL 1100 or equivalent (3-6 hours) and junior standing. This course addresses the methods used by technical communicators to evaluate usability. It focuses on methods used to evaluate human interaction with communication tools and students will learn how to make products more suitable for human use.

ENGL 4870 Advanced Business and Technical Writing: 3 semester hours
Prerequisites: ENGL 3100 or its equivalent as judged by the instructor. An advanced, project-oriented course to produce substantial, multifaceted business and technical writing projects. These might include reports, manuals, proposals, Web projects, computer documentation, or other advanced written assignments. These projects demonstrate the ability to handle complex assignments requiring initiative, independent work, and professional-level writing skills.

ENGL 4871 Publishing: Writers, Editors, and Readers: 3 semester hours
Prerequisites: ENGL 3120, ENGL 3130; or equivalent. Students will explore how the technological revolution has changed the way writers write, editors edit, and readers read. Topics covered will include the social and political implications of these technological advances in book, magazine, and online publishing. We will discuss how the roles of editors and writers have changed. Students will develop a semester writing or editing project that emerges out of this exploration. This course is for writers interested in having their work published and for anyone interested in working in the publishing field. This course counts toward the Professional, Creative, and Technical Writing Certificates.

ENGL 4872 Technical Presentations: 3 semester hours
Prerequisites: ENGL 3120, ENGL 3130, or equivalent. Students learn about different kinds of presentations given in professional contexts and the technologies used to produce them. They will learn to create powerful presentations that make memorable presentations. The course is asynchronous and 100% online, and is designed for graduate students preparing papers for conferences, and for technical and business professionals presenting to their bosses, colleagues, and clients. This course counts toward the Professional and Technical Writing Certificate.

ENGL 4874 International Dimensions of Technical Communication: 3 semester hours
Prerequisites: ENGL 1100 or equivalent (3-6 hours) and junior standing. This course examines complexities of communication of technical information worldwide. It includes topics such as graphics, icons, symbols; user interface design; intercultural communication.

ENGL 4876 Research Methods in Technical Communication: 3 semester hours
Prerequisites: ENGL 1100 or equivalent (3-6 hours) and junior standing. This course addresses essential research methods in technical communication, including audience analysis, interviewing techniques, working with subject matter experts, and experimental research design.

ENGL 4877 Writing in Social Media: 3 semester hours
Prerequisites: ENGL 1100 or equivalent (3-6 hours) and junior standing. This course will address theory and practice of communication through social media. It will emphasize the role of social media in industry.

ENGL 4880 Writing for Teachers: 3 semester hours
Same as SEC ED 4880. Prerequisite: ENGL 3090 or junior level English. Writing for Teachers is an English-education course that supports writing across the curriculum for both pre-service English and content area teachers. Teacher candidates learn writing theories and literacy strategies to help their future students construct meaning from their discipline. The course works best for those who are completing level II or beginning level III education courses. The course counts toward the Certificate in Writing.

ENGL 4890 Writing Internship: 3 semester hours
Prerequisites: ENGL 3100 or its equivalent as judged by the instructor. Course limited to students who are completing certificates in writing. May be taken concurrently with the final course in the certificate sequence. Students work in a supervised internship to complete professional writing assignments. Special consent form required.

ENGL 4892 Independent Writing Project: 3 semester hours
Prerequisites: ENGL 3100 or equivalent as judged by instructor. Course limited to students who are completing their certificates in writing. May be taken concurrently with the final course in the certificate sequence. Students work individually with an instructor to complete an extensive creative writing or critical analysis writing project. This course is available on a limited basis only with the approval of the Coordinator and faculty sponsor. Special consent form is required.

ENGL 4895 Editing ‘Litmag: 3 semester hours
Prerequisites: ENGL 3100 or equivalent and at least two creative writing courses. Course is primarily for students nearing the end of their certificates in writing. Students in this course create ‘Litmag’; the UM-St. Louis student literary magazine. Students will call for submissions; they will read and select work to be published; and they will produce the magazine, dealing with issues like format, budget, proofreading, print run, advertising, distribution, and publicity. The course is offered only in the spring and culminates with the publication of ‘Litmag’ in late April.

ENGL 4925 The Short Story in World Literature: 3 semester hours
Students will read a wide variety of short fiction, from very brief pieces to novellas, including stories from all over the world and from several different centuries either in translation or in the original English. The course will also cover short theoretical works on narrative and critical commentaries on some of the fiction.

ENGL 4932 Female Gothic: 3 semester hours
Same as GS 4932. The course examines the historical development of the female gothic, a genre which employs narrative strategies for expressing fears and desires associated with female experience. From the late 18th century to the present, we will trace the persistence of the Gothic vision in fiction and film.

ENGL 4950 Special Topics In Literature: 3 semester hours
Special topics in literature that are not covered in other 4000-level English courses. Since the topics of ENGL 4950 may change each semester, the course may be repeated for credit if the topics are substantially different.

ENGL 5000 Introduction to Graduate Study in English: 3 semester hours
A course designed to prepare students for the professional study of English. The course will both familiarize students with basic bibliographic tools and scholarly methods and introduce them to issues that are of current critical interest to those engaged in the advanced study of literature. These issues include gender, textuality, reader-response, multiculturalism, feminism, psychoanalysis, cultural studies, literary history and the relationship of literature to philosophy, history, and science. Must be taken within the first twelve hours of graduate study.
ENGL 5100 Graduate Workshop in Poetry: 3 semester hours
Prerequisites: Open to students in the creative writing program and to others with permission of instructor. Consists of a writing workshop in which the poetry written by the students enrolled in the course is discussed and analyzed by the instructor and members of the class. Students taking this course will be expected to write original poetry throughout the course. May be repeated for maximum graduate credit of fifteen (15) hours.

ENGL 5110 Graduate Workshop in Fiction: 3 semester hours
Prerequisites: Open to students in the creative writing program and to others with permission of instructor. Consists of a writing workshop in which the fiction (short stories or chapters of a novel) written by the students enrolled in the course is discussed and analyzed by the instructor and members of the class. Students taking this course will be expected to write original fiction throughout the course. May be repeated for maximum graduate credit of fifteen (15) hours.

ENGL 5170 Techniques, Methods, and Effects in Fiction Writing: 3 semester hours
Prerequisite: Open to students in the MFA program and to others with consent of the instructor. This course analyzes the technical choices made by important contemporary fiction writers in the areas of point of view, tone, setting, form, and plot structure, and it examines the effects of those choices. Close consideration is given to fictional techniques that contribute to a story's characterization, tension, interest, reliability, drama, irony, and humor. The course is primarily for creative writers.

ENGL 5180 Form and Theory of Poetry: 3 semester hours
Prerequisites: Open to students in the MFA Program and other graduate students with consent of instructor. This course explores various aspects of traditional and contemporary poetry. The student will gain an understanding of formal poetry-rhyme and meter-as well as of traditional types of poetry, for example, the lyric and the narrative. Throughout the course, an emphasis will be maintained on free verse and a greater understanding of its practice. Students will read selectively in the poetry, theory, and critical approaches of various periods, for example, the romantic and the modern, and within various movements, such as the symbolist or confessional.

ENGL 5190 Literary Journal Editing: 3 semester hours
Prerequisites: Open to students in the MFA program who have had at least two graduate writing workshops and to others with consent of the instructor. In this course students serve as the first readers of all submissions to the university's literary magazine, Natural Bridge. Students will read and evaluate poems, short stories, and essays and recommend a body of work to the editorial board of the magazine. The editorial board will then consider the class consensus in its final selection of material for publication. In addition to the primary task of editorial selection, students will also be involved in the productions of an issue of the magazine. May be repeated for maximum graduate credit of nine hours.

ENGL 5200 MFA Readings: 3 semester hours
Prerequisites: Open to students in the MFA program and to others with consent of the instructor. This is an independent reading course. In consultation with an MFA faculty member, students choose works from the MFA Reading List and read them with the goal of broadening and sharpening their technical skills as writers. Students ordinarily choose works in one genre: poetry, the short story, or the novel. Each week the student reads and reports on at least one work. The course may be taken only once.

ENGL 5250 Studies in Middle English Literature: 3 semester hours
Special topics in English literature before 1500.

ENGL 5300 Renaissance Literature: 3 semester hours
Special topics in English literature from 1500 to 1660.

ENGL 5400 Eighteenth Century Literature: 3 semester hours
Studies in Augustan poetry and prose, including drama and fiction, with emphasis on background and major figures.

ENGL 5500 Nineteenth Century Literature: 3 semester hours
Special topics in English romanticism, in Victorian life and thought, and in the development of the novel and of poetry between 1797 and 1914.

ENGL 5600 American Literature Before 1900: 3 semester hours
Selected American writers or topics from the colonial period to 1900.

ENGL 5700 Twentieth-Century American Literature: 3 semester hours
Selected American writers or topics from 1900 to the present.

ENGL 5750 Twentieth-Century British Literature: 3 semester hours
Selected British and Commonwealth writers of the twentieth century.

ENGL 5800 Modern Linguistics: 3 semester hours
Prerequisite: A study of selected topics in the structure of the English language, combining readings in current linguistics publications with original research.

ENGL 5840 Theories of Writing: 3 semester hours
An analysis of major modern theories in composition.

ENGL 5850 Studies in Composition: 3 semester hours
The study of special topics in composition. Topics may include history of composition, psychology of writing, reader response theory, etc.

ENGL 5860 Writing/Reading Theory: 3 semester hours
This course studies the parallel evolution of reading and writing theory and pedagogy. Topics include the influence of psycholinguistics and reader-response theory and the link between reading and writing theory and instruction.

ENGL 5880 Writing in the Content Areas: 3 semester hours
Same as TCH ED 5880. Prerequisites: Graduate standing. This course emphasizes the importance of integrating writing instruction in classrooms across subject areas. Theories of writing and writing instruction will be explored, and students will discuss how to put the theories into practice in their classrooms. Students will learn to explore their own writing process while learning strategies that will help them to teach writing rather than just assign writing. The course examines the tools pre-service and in-service teachers will need to work with diverse learning communities, to utilize best practice in the teaching of writing, and to use writing as a tool for student learning in any content area. Students in this class will be held to professional writing and speaking standards. The course counts toward the Certificate in Writing.

ENGL 5910 Studies In Poetry: 3 semester hours
Study of a few selected British and American novelists.

ENGL 5920 Studies in Fiction: 3 semester hours
Study of a few selected British and American novelists and short story writers.

ENGL 5940 Seminar in Gender and Literature: 3 semester hours
Same as GS 5940. Gender studies in literature of different periods, types, and genres; satisfies area requirement (1-6) appropriate to its period, national literature, and genre.

ENGL 5950 Seminar in Special Topics: 1-3 semester hours
Special topics which are not covered in other graduate-level English courses.

ENGL 5970 Independent Reading: 1-3 semester hours
Directed study in areas of English for which courses are not available.
ENGL 6000 Thesis: 1-6 semester hours
Prerequisite: 3.5 graduate GPA. Thesis research and writing on a selected topic in English studies. May be taken over two semesters, three (3) hours each semester.

ENGL 6880 Gateway Writing Project: 6 semester hours
Same as TCH ED 6880. Prerequisite: Graduate standing. An intensive course in the writing process and the writing curriculum, designed for experienced teachers. Readings of current theory and research will be related to participants’ experience as writers and as teachers. May be repeated for credit, but no more than 6 hours may be applied toward the M.Ed. Counts toward the Graduate Certificate in Teaching Writing.

ENGL 6890 Seminar in Professional Writing for Teachers: 3 semester hours
Same as TCH ED 6890. Prerequisites: TCH ED 6880 and consent of instructor. Capstone seminar for the Graduate Certificate in the Teaching of Writing. Participants will pursue the dual role of writer/writing teacher by designing individual projects with one of these emphases: (1) research writing based on a classroom inquiry into the teaching of writing; (2) expository and creative writing based on an inquiry into the teacher’s own evolution as a writer.

History
General Information

Degrees and Areas of Concentration

Students and Faculty in the History Department are curious and creative. We ask big questions about the past to understand the present and build the future. Faculty members bring diverse backgrounds, experiences, and expertise to the courses we offer in African, African American, European, Latin American, Japanese, World, and United States history from ancient to modern times. Our students go on to thrive in a wide range of careers: business, museums and public history, education, libraries, law, management and more.

The department offers the B.A. in history, and, in cooperation with the College of Education, the B.S. Ed. in Secondary Education with Emphasis in History and Social Studies and the B.A. in History with Secondary Social Studies Teacher Certification. Students can complete the History major and minor online. Faculty collaborations on campus and in the community make the History Department a starting place for interdisciplinary certificates and minors in African and African American Studies, American Studies, Latina/Latino Studies, and Religious Studies.

Students can access internship and research opportunities through our partnerships with museums, archives, schools, and cultural organizations. Majors and minors build their skills in writing, research, communication, and analysis, and enjoy small, advanced level classes, ensuring they receive individual attention from faculty committed to their intellectual and professional development.

At the graduate level, the department offers an M.A. in History and an M.A. in Museums, Heritage, and Public History. The department also offers a graduate certificate in History Education and a graduate certificate in Museums, Heritage and Public History. These certificates can be taken by itself or in conjunction with the M.A. in History or M.Ed. in Secondary Education.

Bachelor of Liberal Studies Option:

A minor in history may be combined with a minor in another discipline and a capstone to form a Bachelor of Liberal Studies. The relevant capstones are either HIST 4999 or any HIST 4142/HIST 4143 level course. Since students taking HIST 4999 must have taken HIST 3199, it is suggested such students use this class to satisfy the Logic and Methodology requirement. Students can use the same course to satisfy the Logic and Methodology requirement of both minors, but cannot use the same science courses. Also, a Bachelor of Liberal Studies program is easily combined, in turn, with a major in any science as a double major. Employers appreciate this pathway as it provides graduates with a deeper historical and conceptual understanding of the science(s) he or she is studying.

Career Outlook for B. A. and M. A. graduates

Study and research in history sharpens organizational and writing skills important to success in a variety of fields. Professionals in business, education, law, banking, libraries, and foreign service all find it relevant to their careers. Interest in local history has created employment opportunities in museum, archival, and preservation work that are growing faster than the norm. History alumni in a wide variety of fields are as conscious of and appreciative of their training in history as those who have chosen it as a profession. For more information on the national outlook for history majors, see American Historical Association’s Career Resources.

Courses

HIST 1000 Introductory Topics in History: 3 semester hours
This course covers various special topics in history to be determined by the field, availability of instructors and interest of students. The course may be repeated for credit with the consent of the instructor.

HIST 1001 American Civilization to 1865 (MOTR HIST 101): 3 semester hours
This course considers the development of the Americas and the United States from the pre-Columbian era to the Civil War, with emphasis on the ideas and institutions that shaped U.S. Americans’ experiences. Students will work with primary sources and additional materials to deepen understanding of the relationship between the U.S. and the world. Assignments further develop students’ written communication skills. Course fulfills American History and Government General Education requirement.
HIST 1002 American Civilization 1865 to Present (MOTR HIST 102): 3 semester hours
This course examines the development of the modern United States from Reconstruction through the present. It considers the ideas, institutions, economic and social changes that shaped Americans’ experiences. Students work with primary sources and additional materials to deepen understanding of the relationship between the U.S. and the world. The course further develops students’ written communication skills. Course fulfills the American History and Government General Education requirement.

HIST 1003 African American History: 3 semester hours
This course will selectively survey the experiences of African Americans from the period of the Trans-Atlantic slave trade to the late twentieth century. Topics may include the development of the slave trade and the institutionalization of slavery, slave culture and resistance, the role of African Americans during the Civil War and Reconstruction period, the rise of segregation and the disfranchisement of African Americans, the Depression and WWII eras, and recent protest movements. Course fulfills American History and Government General Education Requirement.

HIST 1007 Introduction to African and African American Studies: 3 semester hours
This course draws from history, literature, sociology, art, and economics to survey the impact of African migrations on the Americas. It highlights the movements, conditions, and experiences that have shaped the development of African American history, culture, and society. Course fulfills American History and Government General Education Requirement.

HIST 1010 U.S. Business History: 3 semester hours
This course explores key developments in the business and economic history of America from the founding to the present. It offers foundational knowledge of the history of American business, connecting it to key issues in American history.

HIST 1030 Ancient Greece and the Roman Empire: 3 semester hours
This course surveys the history of ancient Greece and Rome in the context of the larger Mediterranean world. Topics may include politics and economy, war and society, and culture. The chronological span is from the establishment of the Minoan and Mycenaean civilizations (2000-1500 BCE) to the fall of the Western Roman Empire in the fifth century CE.

HIST 1031 From the Middle Ages to the Age of Revolutions (MOTR WCIV 101): 3 semester hours
This course covers the development of western European societies and traditions from the fall of the Western Roman Empire in the fifth century CE, through the Middle Ages to the Renaissance, and the Enlightenment to the end of the French Revolution in 1799. Themes may include politics and economy, war and society, and culture.

HIST 1032 Topics in European Civilization: 1715 to the Present (MOTR WCIV 102): 3 semester hours
This course covers the development of western European societies and traditions from 1715 to the present. Themes may include politics and economy, war and society, and culture.

HIST 1034 Introduction to Ancient Egypt and Its Civilization: 3 semester hours
Same as ANTHRO 1034. This course will survey ancient Egyptian history and culture from predynastic times to Greco-Roman rule, roughly 3000 BCE to 30 BCE. Students will discuss archaeological sites, mummification, religion, architecture, texts, and more. Through comparing ancient Egyptian culture with our own, students will explore what has changed in the world and what has endured for millennia.

HIST 1037 The Wonders of Greece: Introduction to Greek History and Culture: 3 semester hours
Same as ANTHRO 1037. Our democracy and culture have been heavily influenced by Greek civilization. This course will introduce students to the culture and civilization of Greece in order to provide a better understanding of our own society. The course will cover the political and military history, art, literature, philosophy, and science of Greece from prehistoric to modern times, with special emphasis on Greek civilization’s enduring democratic and cultural ideals. The course will include screening of films and use of online resources.

HIST 1041 East Asian Civilization: 3 semester hours
The development of Asian civilization from earliest times to the Manchu conquest.

HIST 1043 Topics in East Asian History and Culture: 3 semester hours
This course introduces students to historical and cultural issues in different areas of East Asia, especially Japan, Korea, and China. Topics may include a survey of history, as well as more specialized areas of politics, culture, literature, art, gender or more contemporary issues. The regional emphasis is determined by the instructor. It may be taken more than once, provided the course topic is different.

HIST 1062 Modern Africa: From Colonies to Nations: 3 semester hours
This course uses film, fiction, music, and historical sources to explore the history of twentieth century Africa, focusing on African experiences of the colonial and postcolonial periods.

HIST 1075 World History to 1500: 3 semester hours
A survey of the history of humankind to 1500 including the beginnings of civilization Mesopotamia, Africa, Asia and the Americas, the rise of Classical civilizations and the development of major transnational social, economic, political and religious networks.

HIST 1076 World History Since 1500: 3 semester hours
A survey of the history of humankind since 1500, emphasizing the growing interdependency of regional economic, political, and social systems. Topics will include imperialism, industrialization, and globalization.

HIST 1111 Reacting to the Past: 4 semester hours
Reacting to the Past is a series of historical simulations built around key moments and texts from the past. In each simulation, students are assigned a role and develop that character. The course offers students a rigorous academic experience in which they conduct historical research, speak, and write extensively. Because this course requires extensive writing, it fulfills the requirement for Freshman Composition.

HIST 1901 Capitalism in American History: 3 semester hours
Same as POL SCI 1901. This course offers students the opportunity to approach America’s political economy with tools different from those offered by more quantitative economic constructs. Students will analyze market processes through a three dimensional approach that focuses not just on market competition but also on relationships of command-the exercise of power in firms, among nations, and between social groups-and on processes of historical change from the late colonial era through the twentieth century.

HIST 1999 Big History: From the Big Bang to the Present: 3 semester hours
Same as INTDSC 1999. An introduction to the humanities, social science, and science disciplines through a sweeping overview of natural and human history from the Big Bang to the present. Course will include lectures from faculty in various Arts and Sciences units, films, and group discussions.
HIST 2000 Selected Topics in History: 3 semester hours
This course covers various special topics in history to be determined by the field, availability of instructors and interest of students. The course may be repeated for credit with the consent of the instructor.

HIST 2002 Introduction to Latinx Studies: 3 semester hours
This course introduces the experiences and conditions of U.S. Latinx of Caribbean, Latin American, and, especially, Mexican descent. Students will examine how people from Hispanic- and Indo-America are both incorporated into American culture, history, and occupational life and often marginalized as either outsiders or foreigners. The course studies how historical forces push and pull people from Latin America to the United States, where they create new U.S. ethnic, racial and local identities. Using films, novels/memoirs, music, and art as windows, students will identify patterns of identity formation, ethnic culture, community politics, labor struggles, and social mobility, and will map the heterogeneous mosaic of American Latin and Caribbean migrations and communities.

HIST 2004 The Civil War Era: Slavery, Emancipation, and the Greater Reconstruction: 3 semester hours
Prerequisites: Sophomore standing or consent of instructor. This course examines one of the most significant experiences in U.S. history across three chronological units: American slavery and debates over it; historical explanations for U.S. slavery’s demise; and the broader meaning and legacies of the Civil War and Reconstruction. Students pay particular attention to Civil War St. Louis. This is a hands-on course with field trips and community engagement. Course fulfills the American History and Government General Education Requirement.

HIST 2005 Becoming Modern America: From the Gilded Age to the Great Depression: 3 semester hours
Prerequisites: Sophomore Standing or consent of the instructor. This course explores the economic, political, cultural, and social transformations of the emerging industrial United States from 1877 through the Great Depression of the 1930s. Students will use historical sources, such as memoirs, film, images, newspapers, literature, and historians’ accounts to consider how the United States changed during these crucial decades. This course fulfills the American History and Government General Education requirement.

HIST 2008 History of St. Louis: 3 semester hours
Prerequisites: Sophomore standing or the consent of the instructor. This course will provide an overview of the history of the St. Louis metropolitan region. Topics may include the St. Louis region before the Europeans, forces leading to the founding of the city, St. Louis as an ‘urban frontier,’ the Age of Steam on water and rail, the questions of slavery and the Civil War, St. Louis in the Gilded Age, the World’s Fair, early efforts at city planning, impact of the automobile, St. Louis during the Depression and World War II, post-war suburbanization, urban renewal, and 21st century prospects. This is an experiential course requiring field trips and community engagement.

HIST 2017 African American History: From Civil Rights to Black Power: 3 semester hours
Prerequisites: Sophomore standing or consent of instructor. This seminar focuses on the activities, ideas, movement centers, and personalities that created the Civil Rights and Black Power movements in the U.S. from the 1950s through the 1970s. Some familiarity with the broad contours of U.S. History is presupposed. Special attention will be devoted to the roles of the African American masses, college students, and women, and to the points of conflict, cooperation, and intersection between African America and the larger American society.

HIST 2020 Women and Social Movements in U.S. History: 3 semester hours
Same as GS 2020. Prerequisites: Sophomore standing or consent of the instructor. This course explores the role of women in social movements that transformed the United States during the nineteenth and twentieth centuries. It asks broad questions about how ideas, experiences, and laws regarding gender and sexuality have shaped ordinary people’s lives, as well as U.S. institutions, and have been touchstones for social change movements. It considers abolitionism, suffrage, progressive reforms, labor, civil rights, and second wave feminism, among other movements.

HIST 2021 War and Violence in Modern Times: 3 semester hours
Same as MVS 2021. Prerequisites: Sophomore standing or consent of the instructor. This course examines the connections between warfare and resistance, gangs and poverty, and state and non-state officials as enactors of violence. It explores the effects of war and violence on the poor in Brazil and the United States, prisoners of war in Asia, and resistance fighters in Latin America and northern Africa. Students will watch films/short videos, read academic and newspaper articles, and listen to short podcasts to grapple with the issues underlying structures of violence.

HIST 2025 U.S. Foreign Relations and Military History: 3 semester hours
Same as MVS 2025. This course surveys the development of American land, sea, air, space, and cyber power from the start of the colonial era to the present, with an emphasis on the interrelationship between U.S. foreign and military policies and between diplomacy and force.

HIST 2026 Baseball and the Making of Modern America: 3 semester hours
This course uses the lens of baseball to aid in the development of a deeper understanding of the United States. It explores how social, cultural, economic, and political forces shaping the U.S. after the Civil War were reflected in the national past time. In the study of key trends and events in baseball history, students will learn how broader themes in U.S. history, such as industrialization and urbanization, race and ethnicity, imperialism, war, gender, and business impacted and were influenced by the sport.

HIST 2028 Sex, Drugs, and Rock ‘n Roll: The 1960s in Song, Fashion, Dating, and Protest: 3 semester hours
Prerequisites: Sophomore standing or consent of the instructor. This course examines the turbulent 1960s and the period’s identification with sex, drugs, and rock ‘n roll by looking historically at drugs, music, and changes in gender roles. It uses these histories to explore the cultural and political movements of the 1960s (1955 through 1973)-civil rights, black power, new left, antiwar, and feminist movements-long with the emergence of the counterculture, hallucinogenic drugs, the sexual revolution, and the whole hip scene. The class is discussion-based. There is a mid-term exam and several assignments, including a class presentation and papers on readings, music, and movies.

HIST 2030 U.S. Immigration: 1790 to the 21st Century: 3 semester hours
This course examines the history of free and forced newcomers to the U.S. and the laws that shaped their ability to immigrate. It looks at the conditions that newcomers faced and their subsequent struggles for political, social, and economic rights and freedoms. It explores the legal foundations that grounded the admission of certain newcomers and the exclusion or marginalization of others.
HIST 2050 Introduction to Public History: 3 semester hours
This course introduces students to the foundations, theory, and practice of public history, which is the study of whose history is preserved, remembered, and celebrated in American society. It explores how everyday people engage with history, the diverse venues in which history is presented and produced, and the efforts public historians must make in order to respectfully represent the histories of underrepresented groups. Students will acquire a knowledge about the practices of public history and its professional opportunities, as well as the challenges faced by public historians today.

HIST 2066 Women and Gender in African History: 3 semester hours
Same as GS 2066. Using documentaries, popular culture, graphic histories, and more conventional sources, this course explores the history of Africa, highlighting African women's lives, experiences, and agency, and questioning the application of Western concepts of gender to an African setting.

HIST 2067 African History through Fiction and Film: 3 semester hours
Prerequisites: Sophomore standing or consent of the instructor. This course will examine modern African history with literature and film, focusing on works that have poignantly captured important events in African history such as slavery, colonialism, and independence.

HIST 2068 Alding Africa: 3 semester hours
This course examines the history of economic development on the African continent. Students will learn about the local and the international encounters that development has fostered; they will explore how Africans have experienced and reformulated development in different contexts and time periods; and they will study the changing international policies on development, which have deeply shaped the lives of Africans. This course satisfies the Cultural Diversity requirement.

HIST 2082 Christianity: From Jesus to Martin Luther: 3 semester hours
This course orients students in the scholarship about the Christian Church in the Western tradition as an institution. Open discussion is encouraged, and all traditions will be respected in the interest of expanding our knowledge of the past as well as communities today.

HIST 2083 Europe in Early Middle Ages: Paganism to Christianity: 3 semester hours
Prerequisite: Sophomore standing or consent of the instructor. The end of the Roman Empire as a universal entity; the successor states of the Mediterranean and Northern Europe; the emergence of a Western Christendom under the Franks; the development of feudal states; the Gregorian reforms; the Crusades; the revival of education and learning in the twelfth century.

HIST 2084 Crusades and Plagues: Europe in the High and Late Middle Ages: 3 semester hours
Prerequisite: Sophomore standing or consent of the instructor. Medieval society at its political, economic, and intellectual zenith; the crisis of the later Middle Ages; the Papal schism and the development of national particular churches within Catholicism; and the rise of estate institutions.

HIST 2085 Medieval England: From Arthur to Richard III: 3 semester hours
Prerequisite: Sophomore standing or consent of the instructor. A brief summary of the Anglo-Saxon heritage and the impact of the Norman Conquest, followed by an investigation of the institutional, social, and legal evolution of the realm of England. English development will be viewed in its European context.

HIST 2100 Careers with a History Degree: 1 semester hour
This course is an orientation to career opportunities for history majors. It is recommended for majors and minors and is open to students who are considering the field. It explores careers directly related to history and other sectors for which the degree is valuable, including business, law, education, communication and more. Students engage in activities that help them to identify their professional goals, network in the region, and become familiar with internships, minors, and certificates that enhance their degree.

HIST 2102 Introduction to Gender Studies: 3 semester hours
Same as GS 2102, SOC WK 2102, POL SCI 2102, and SOC 2102. This core class is required for all Gender Studies Certificate earners. This class introduces students to cultural, political and historical issues that shape gender. Through a variety of disciplinary perspectives in the humanities, social sciences, and natural sciences, the course familiarizes students with diverse female and male experiences and gendered power relationships.

HIST 2112 Democracy, Freedom, and Equality: Historical Role Playing Games: 3 semester hours
This course uses historical game simulations built around key moments and texts from the past that explore issues of democracy, freedom, and equality in the U.S. In each simulation, students are assigned a role and develop their character for game sessions. The course offers students a rigorous academic experience in which they conduct historical research, work collaboratively, speak, and write extensively. It can be repeated with different historical topics and games.

HIST 2117 Greek History and Culture: 3 semester hours
Same as ANTHRO 2117. Greek civilization has had a deep impact on contemporary society in art, social, political, and economic organization; philosophy; law; medicine; and science. This course covers major aspects of Greek history and culture from antiquity to the present. It considers the major political and military events of Greek History, as well as important aspects of Greek culture, including sports and the history of the Olympic Games, literature, philosophy, and mythology.

HIST 2120 Global Girl Cultures: 3 semester hours
Same as ANTHRO 2101. This course explores themes of identity and gender construction, media representation, and cultural production found in a spectrum of historic and modern international and US girl cultures. 1950s British Teddy Girls, 1970s Japanese Takanokozoku, 1990s American Riot Grrrls, 2000s Mexican American Cholas, and other girl cultures teach us about the many strategies teens and young women use to construct their own forms of identity through music, language, zines, fashion, and other diverse activities. This course satisfies the Cultural Diversity requirement.

HIST 2160 Introduction to American Studies: 3 semester hours
Same as ENGL 2160. Prerequisite: Sophomore standing or consent of the instructor. This course introduces students to the multidisciplinary nature of American Studies and is a required course for those who wish to complete the minor in American Studies. It reviews the discipline from its origins in the 1930s, and it introduces students to St Louis’ rich resources for American Studies.

HIST 2185 Introduction to Religious Studies: 3 semester hours
Same as PHIL 2185. This course introduces students to the interdisciplinary study of religion. With an emphasis on research methods and perennial philosophical and historical topics, students will develop tools for investigating the various dimensions of worldview and gain exposure to many different religious traditions.
HIST 2420 Maiko, Maids, and Masako: Women in Japanese Cultural History: 3 semester hours
Same as ANTHRO 2420. This course offers perspectives on famous Japanese women who have captured the public eye at various historical junctures. Students will learn to critically assess representations of these mythological, religious, occupational, and subcultural figures, as well as their linkage to notions of nationhood and modernity. This course satisfies the cultural diversity requirement.

HIST 2425 Food and Drink in Japan: A Cultural History: 3 semester hours
Same as ANTHRO 2425. This course explores food and drink as core aspects of intimate and public life in Japan and as key elements of nationalism. It examines distinct class, ethnic, and regional dimensions of food and drink that have their own unique histories. Students will learn how food and drink encode a spectrum of historical meanings as well as great cultural hybridity. This course satisfies the Cultural Diversity requirement.

HIST 2430 Ghosts, Goblins, and Godzilla: 3 semester hours
Same as ANTHRO 2430. This course explores the spirits, ghouls, and animal tricksters who populate the historic and modern Japanese imagination. Students will learn about the supernatural beings, and the exceptional humans who interact with or control them, who are found in centuries of Japanese religion, folklore, literature, and art, and are also frequent themes in modern art, film, anime and manga. This course satisfies the Cultural Diversity requirement.

HIST 2800 History of American Economic Development: 3 semester hours
Same as ECON 2800. Prerequisites: ECON 1000 or ECON 1001 or consent of instructor. Uses economic concepts to explain historical developments in the American economy, beginning with the hunter gatherers who crossed the Bering land bridge around 12,000 BC. Main topics include the Native American economies, European exploration and conquest, the colonial economies, indentured servitude, the American Revolution, the US Constitution, westward expansion, transportation, the Industrial Revolution, state banking and free banking, slavery, the Civil War, post-bellum agriculture, the rise of big business and antitrust, banking panics, the Federal Reserve Act, the First and Second World Wars, the New Deal, and the growth of government in postwar economy.

HIST 3000 Special Topics in History: 3 semester hours
Prerequisite: Junior standing or consent of instructor. This course covers various special topics in history to be determined by the field, availability of instructors and interest of students. The course may be repeated for credit with the consent of the instructor.

HIST 3032 Modern China: From the Decline of the Qing Empire to the Global Age: 3 semester hours
Prerequisite: Junior Standing or consent of instructor. The economic, social, and political development of modern China.

HIST 3035 Gender and Sexuality in Modern U.S. History: 3 semester hours
This course will examine how gender has been historically constructed in the United States during the 20th and 21st centuries. It considers how women and men have understood their place in society, what social and cultural forces informed their understandings, and how these concepts changed over time. Students will critically engage with the categories of gender and sexuality as historical and cultural productions within the context of 20th century US politics, culture, and social movements.

HIST 3043 History of Crime and Justice: 3 semester hours
Same as CRIMIN 3043. Prerequisites: Junior standing or consent of instructor. The analysis, development, and change in philosophies and responses to crime. Emphasis on major forms and definitions of crime, the emergence of modern policing, the birth of the prison, and the juvenile court system.

HIST 3065 From Ivory to Oil: Mining and Extraction in African History: 3 semester hours
Prerequisites: Sophomore standing or consent of the instructor. This course focuses on mining and its effects on economic and human development in twentieth century Africa. It examines specific case studies, which may include oil, diamonds, uranium, copper, and ivory to understand how African states and economies have been affected by valuable resources.

HIST 3092 War and Upheaval in Europe, 1900-1950: 3 semester hours
Prerequisites: Junior standing or consent of the instructor. This course is a social, political, economic, and cultural survey of Europe during the era of two world wars. Topics may include the 'Belle Epoque,' the cataclysm of World War I, peace treaties, the rise of communism and fascist states, the Great Depression and collapse of democracy, World War II, the Holocaust, and the efforts at a postwar settlement.

HIST 3093 Europe in Peace and Prosperity, 1950-Present: 3 semester hours
Prerequisites: Junior standing or consent of instructor. This course surveys the main social, economic, political, military, and cultural trends in Europe from the end of World War II. Topics may include the postwar settlement, the development of the social welfare state, the establishment, development, and collapse of communism, and the various phases of the European Union.

HIST 3199 Introduction to Historical Inquiry: 4 semester hours
Prerequisites: ENGL 3100 (may be taken concurrently). This course is designed to develop historical thinking and research skills. Students will read historical sources, exploring the rhetoric of history, identifying perspectives in historical sources, and the process of formulating historical questions, and building research plans. Other topics covered may include proper citation procedures and historiography. The course is writing intensive and will involve primary source research at libraries and archives.

HIST 3214 Writing Systems of the World: 3 semester hours
Same as ANTHRO 3214. This course studies the writing systems from around the world leads to appreciation for one of humankind's most important technological inventions. Students will explore the origins and development of writing systems over time, the linguistic classification of writing, and the transmission of writing across languages and cultures. This course satisfies the Cultural Diversity requirement.

HIST 3218 Visual and Material Culture of Japan: 3 semester hours
Same as ANTHRO 3218. This course offers students the opportunity to research Japanese visual genres and material artifacts, from the iconography of Buddhism and fifteenth century pottery to postwar political cartoons, advertising posters, and etiquette comics. Students will discover how artifacts and images provide a means for communicating cultural meaning, while also reflecting aesthetics, humor, and cultural norms. This course satisfies the Cultural Diversity requirement.

HIST 3219 Introduction to Historical Inquiry: 4 semester hours
Prerequisites: ENGL 3100 (may be taken concurrently). This course is designed to develop historical thinking and research skills. Students will read historical sources, exploring the rhetoric of history, identifying perspectives in historical sources, and the process of formulating historical questions, and building research plans. Other topics covered may include proper citation procedures and historiography. The course is writing intensive and will involve primary source research at libraries and archives.

HIST 3218 Visual and Material Culture of Japan: 3 semester hours
Same as ANTHRO 3218. This course offers students the opportunity to research Japanese visual genres and material artifacts, from the iconography of Buddhism and fifteenth century pottery to postwar political cartoons, advertising posters, and etiquette comics. Students will discover how artifacts and images provide a means for communicating cultural meaning, while also reflecting aesthetics, humor, and cultural norms. This course satisfies the Cultural Diversity requirement.

HIST 3999 Internship: 3 semester hours
Prerequisites: Consent of supervising instructor and institution offering the internship. This supervised practicum in a museum, historical agency, or other institution offers an opportunity for hands-on experience in public history. Contact the History Department undergraduate advisor for information on arranging an internship.
HIST 4001 Special Readings: 1-10 semester hours
Prerequisite: Consent of the instructor. Independent study through readings, reports and conferences.

HIST 4002 Collaborative Research: 3 semester hours
Prerequisite: Consent of instructor. Faculty-student collaboration on a research project designed to lead toward the publication of a jointly-authored article. The faculty member will direct the research.

HIST 4014 World History for the Secondary Classroom: 3 semester hours
Prerequisites: TCH ED 3310 or consent of the instructor. This course is required for Social Studies certification. It adapts the themes and subject matter of World History to the secondary classroom and trains teachers in techniques particularly designed to maximize the use of primary sources, foster critical inquiry, and encourage knowledge of subject matter. This course cannot be counted towards the minimum 33-hour history major requirement, but does count towards the 45 hour maximum and for Social Studies Certification.

HIST 4142 Inquiries in U.S. History: 3 semester hours
Prerequisites: HIST 2999. This course will develop historical thinking and writing skills through investigation in topics in National History.

HIST 4143 Inquiries in World History: 3 semester hours
Prerequisites: HIST 2999. This course will develop historical thinking and writing skills through investigation in topics in World History.

HIST 4999 Senior Seminar: 5 semester hours
Prerequisites: HIST 3199, presentation of three examples of formal written work submitted in prior upper-division courses in history, and consent of department. This course studies in historical methodology and historiography. Directed readings, research, and writing leading to the production of an original piece of historical scholarship. An exit interview is required. This course is required for majors seeking Degree with Distinction. It may not be taken for graduate credit.

HIST 5000 Advanced Selected Topics in History: 3 semester hours
Prerequisite: Graduate standing. Special topics in history. The course may be repeated for credit with consent of the instructor.

HIST 5142 Advanced Inquiries in U.S. History: 3 semester hours
Prerequisite: Graduate standing. This course will develop historical thinking and writing skills through investigation in topics in United States history.

HIST 5143 Advanced Inquiries in World History: 3 semester hours
Prerequisite: Graduate standing. This course will develop historical thinking and writing skills through investigation in topics in World history.

HIST 5592 The History of the Visual Arts in American Museums: 3 semester hours
Same as ANTHRO 5592 and ART HS 5592. Prerequisites: Graduate standing and consent of instructor. This course is an introduction to selected topics in the history of museology, focusing on art and anthropology museums as sites for the interpretations of art and culture, and as contested meeting grounds for various views of history and culture.

HIST 6000 The Historian’s Craft: 3 semester hours
Prerequisites: Graduate standing. This course will introduce incoming students to graduate work, both in the field of history generally and to the M.A. program at UM-St Louis in particular. It will familiarize them with the fields of historical study and the UMSL faculty who teach them, protocols of the profession, and methodologies of historical research, writing, and analysis. It will also help students learn about and prepare for careers outside the academy and/or Ph.D. programs in the field. Students may be required to attend colloquia off campus.

HIST 6001 Introduction to Public History and Cultural Heritage: 3 semester hours
Prerequisites: Graduate standing or consent of instructor. This seminar will introduce students to the theory and practice of public history and cultural heritage. Readings will acquaint students with these fields of study and offer commentary on a variety of strategies for making the past relevant for contemporary audiences.

HIST 6002 Material Culture in Historical Context: 3 semester hours
Prerequisites: Graduate standing and consent of instructor. This course will present various theoretical and methodological approaches to the study of material culture. It will explore how the interpretation of objects has contributed to the understanding (or misunderstanding) of past and present cultures. The course will also examine contemporary museum practice in the display of material culture. Students will be expected to make on-site observations at different types of local museums, and will conduct research into a category of material culture that appeals to their individual interests.

HIST 6003 Economics of Museums and Heritage: 3 semester hours
Prerequisites: Graduate standing and consent of the instructor. This course introduces students to the financial history of museums and heritage, explores debates about economic strategies for museums and heritage, and empowers museum professionals to work effectively with the chief financial/administrative officer of their museum or heritage site. Topics include: government policies toward museums and heritage, the economics of blockbuster exhibitions, debates concerning collections as an economic resource for museums and cities, daily financial management, best practices for using financial resources to achieve institutional mission and priorities, long-term strategic planning, the history and development of public-private partnerships, cultural philanthropy and donations.

HIST 6004 Writing for Museums: 3 semester hours
Prerequisites: Graduate standing and consent of Museum Studies program director. This course will develop skills for professionals working in museum settings who need to communicate effectively with multiple audiences through various platforms. Topics will include writing for proposals, object descriptions, interpretive texts, and digital storytelling.

HIST 6014 World History for the Secondary School Classroom: 3-6 semester hours
Prerequisites: Graduate standing or consent of instructor. The intent of this course is to adapt the themes and subject matter of World history to the secondary classroom and to train teachers in the methodology of the Socratic symposium, techniques designed to maximize the use of sources, foster critical inquiry, and encourage knowledge of subject matter. Particular emphasis will be placed on defining the broad and connecting themes of World history, on expanding bibliography, and on methods for choosing primary sources for use in an interactive classroom.

HIST 6115 Historical Thinking in Research and Practice: 3 semester hours
Same as TCH ED 6115. Prerequisites: Graduate Standing or consent of instructor. In this hands-on course, students examine current research and effective teaching strategies that facilitate historical thinking while also broadening content knowledge. Students further design, implement, and assess educational materials and practices that foster historical thinking, reading, and writing.
HIST 6116 Historical Thinking in Theory and Practice II: 3 semester hours
Same as TCH ED 6116. Prerequisites: HIST 6115 / TCH ED 6115 or consent of instructor. Building upon HIST 6115 / TCH ED 6115, this course emphasizes the design, implementation, and assessment of teaching materials and practices that foster historical thinking and reading. In this hands-on, action research course, students will focus on their own teaching materials and practices to improve their capacity to teach and assess students’ historical thinking.

HIST 6121 Directed Readings: 1-3 semester hours
Prerequisites: Consent of a member of the Doctoral Faculty. Directed research at the graduate level.

HIST 6122 Collaborative Research: 3-6 semester hours
Prerequisites: Graduate Standing and consent of instructor. Faculty-student collaboration on a research project designed to lead toward the publication of a jointly-authored article. The faculty member will direct the research.

HIST 6123 Thesis Seminar: 1-6 semester hours
Prerequisites: Graduate standing and consent of instructor. Thesis research and writing on a selected topic in history.

HIST 6124 Graduate Internship: 3 semester hours
Prerequisites: Consent of supervising instructor and institution offering the internship. Supervised practicum in a museum, historical agency, and other institution offering an opportunity for hands-on experience in public history.

HIST 6125 Practicum in Public History and Cultural Heritage: 3 semester hours
Prerequisites: Graduate standing or consent of instructor. In collaboration with a designated community partner, students will research and interpret the past for contemporary audiences. The course will combine traditional classroom sessions with hands-on training.

HIST 6126 Museum Studies Internship: 1-4 semester hours
Prerequisites: Graduate standing and consent of instructor. Professionally-supervised work experience in a museum setting. Requires a minimum of 50 hours of on-site attendance per credit hour and submission of a final paper.

HIST 6127 Museums and Communities: 3 semester hours
Prerequisites: Graduate standing and consent of the Director of Museum Studies. As museums and heritage institutions have sought to attract new audiences, they have tried to re-present their collections with new stories, address topics of concern to the denizens of their cities, and provide a broader range of programming than ever before. This course considers how to identify community characteristics and needs, create entry points for multiple audiences at museums, and build strong, long-term relationships with local partners. We consider difficult histories, conflict, and strategies to create space for diverse perspectives; the role of communications technologies in soliciting participation and promoting dialogue; and networks and the organizational skills for community development. Students will examine case studies of community-based museum programming, and develop an engagement strategy around an exhibit.

HIST 6129 Emerging Museum Practices: 3 semester hours
Prerequisites: Graduate students in Museum Studies or Public History or consent of the Director of Museum Studies. This course examines emerging trends and models in the museum field. The museum’s educational role in society is quickly changing. Learning is not only more collaborative but also more accessible beyond the walls of the museum. Through readings, activities, and exercises, students will explore the mechanics of partnerships with cultural organizations, creative individuals, and the local community, while considering how museums should function in society today. We will examine interdisciplinary programming via collaboration with the creative class; creating social/participatory experiences; making collections personally relevant to audiences; and engaging in the sharing city. We pay particular attention to the museum’s responsibility to civic duty and sustainable practices.

HIST 6131 Museum Origins and Evolution: 3 semester hours
Prerequisites: Consent of Director of Museum Studies Program. This course traces the social and cultural history of museums from their origins in curiosity cabinets, princely collections, freak shows, and exhibitions, through their late 19th and early 20th century institutionalization, to present-day developments such as blockbuster exhibitions, community collaborations, masterpiece architecture, and the spread of museal and heritage institutions around the globe. Topics include colonialism, modernity, and the production of taxonomical knowledge; museums and nationalism; theories of culture, patrimony, and ownership; manufacture, marketing, and museums; the relationships between museums and academia; identity politics and culture wars; community-based initiatives; and virtual and digital museum spaces.

HIST 6132 Digital Video for Museums and Community History: 3 semester hours
Prerequisites: Consent of Director of Museum Studies Program. This course covers basic production and post-production in digital video, and examines how digital video has been and can be used for community history projects and museum installations. Students will learn basics of shooting, lighting, sound, scripting, and non-linear editing; interviewing and observational footage; and produce a series of documentary shorts. Readings will include the special characteristics of the cinematic medium and case studies of digital video for community-based research, advocacy, and museum audiences.

HIST 6133 Museums and History in the Digital Age: 3 semester hours
This course introduces and explores the key issues, analyses, critical debates, opportunities and potential drawbacks for museums and public historians using digital media to engage with communities. Students will gain facility in implementing digital strategies for museum and public history initiatives, including how to plan, manage, and assess the success of media projects.

HIST 6134 History Curatorship: 3 semester hours
Prerequisites: Graduate standing and consent of instructor. Principles and practices of curatorship, with a focus on historical collections. Curatorial responsibilities for object care. Role of curator in exhibit research, design, and implementation. Issues of inclusivity and shared authority. Historical shifts in curatorial practice, collecting, and museum missions.

HIST 6136 Museum Studies Master’s Project: 5 semester hours
Same as ART HS 6038 and ANTHRO 6138. Prerequisites: Consent of Director of Museum Studies Program. Research and writing/exhibit development on a selected topic.
**Interdisciplinary Programs**

The university offers a number of interdisciplinary programs and courses. These programs combine course offerings from several departments so the subject is examined from a multidisciplinary approach. While most persons who earn certificates do so in the process of completing their undergraduate degree, non-degree seeking students may complete a certificate. Below are links to the descriptions of these interdisciplinary offerings:

**Degrees**

- Actuarial Science BS (p. 311)
- Biochemistry and Biotechnology BS (p. 322)
- Cybersecurity BS
  - Computer Science Emphasis (p. 405)
  - Information Systems Emphasis (p. 407)
- Interdisciplinary Studies BIS (p. 480)
- Liberal Studies BLS (p. 486)
- Organizational Leadership BA (p. 564)

**Certificates**

- Child Advocacy Studies Undergraduate Certificate (p. 375)
- Cybersecurity Undergraduate Certificate (p. 412)
- Entrepreneurship Undergraduate Certificate (p. 460)
- Gender Studies Undergraduate Certificate (p. 465)

**Minors**

- American Studies Minor (p. 317)
- Child Advocacy Studies Minor (p. 375)
- Latina/Latino Studies Minor (p. 485)
- Urban Studies Minor (p. 649)
- Environmental Studies Minor (p. 461)

**Courses**

**INTDSC 1000 Special Topics: 3 semester hours**
Topics may vary from semester to semester, however, they will all focus in the cultural heritage of Great Britain with material taken from art, theater, literature, and selected topics in philosophy.

**INTDSC 1003 University Studies: 1 semester hour**
This course, required of all new freshmen in the College of Arts and Sciences, is designed to assist students in making the transition to the university experience and to UMSL by giving students the knowledge and skills needed to succeed as a scholar. The course will also familiarize students with the relationship between their education and their career and personal goals, and will assist in developing positive connections with faculty, staff, and peers at UMSL. Students will learn about faculty expectations, support services, and student life, as well as academic disciplines. The course counts toward the 120 credit hours needed for graduation.

**INTDSC 1004 SUCCEED Special Topics: 1-3 semester hours**
Prerequisites: By consent of SUCCEED director. This course is designed to assist students in the SUCCEED program make the transition to the university experience and to UMSL. This course gives students in SUCCEED the opportunity to be co-enrolled in courses that meet their interests and abilities through a mutual agreement between SUCCEED staff and UMSL course instructors regarding enrollment and student expectations.

**INTDSC 1010 Information Research and Student Success: 1 semester hour**
Students will use online library resources to learn search techniques for different types of information. Course content will be delivered through interactive, online tutorials and short, informative videos. Students will develop an understanding of academic research that will set a foundation for critical thinking skills. The course will help students in practical ways, such as for researching term papers, but also in more abstract ways, such as exposing them to the world of scholarship and academic knowledge.

**INTDSC 1011 Introduction to Disability Studies: 3 semester hours**
This course introduces the theory and scholarship of the interdisciplinary field of Disability Studies. Disability will be addressed as a matter of identity, culture, language, writing, power, education, politics, literature, art, and more.
**INTDSC 1012 History of Disability: 3 semester hours**
This course explores the history of disability from various perspectives, moving from antiquity to present day. Perspectives will include: the individual, society at large, the family, sexuality and disability, educational systems, and legal and ethical issues. Students will explore how these perspectives can drive public policy and service delivery systems. Students will gain knowledge and a foundational understanding of current legislation, Independent Living Philosophy, advocacy, empowerment, and self-empowerment that will enable them to create an organized and efficient independent living plan.

**INTDSC 1030 Language and Communicative Arts Across the Disciplines: 3 semester hours**
This course is designed to advance the academic skills of university-level students. This course consists of listening to academic lectures across the disciplines: reading texts and articles to supplement lectures; writing summaries, essays and responses to exam questions; understanding and editing grammar and sentence structure; phonetics and word stress patterns; presentation skills; and advancing skills in note-taking, critical thinking, and comprehension of advanced college-level vocabulary of various fields of study.

**INTDSC 1500 Prior Learning Assessment Portfolio Preparation: 1 semester hour**
Prerequisites: Consent of the faculty coordinator for the BA in Organizational Leadership. This course is designed to help students identify areas of learning they may want to have evaluated for college-level equivalency. It will also guide students through the preparation and compilation of components that will be required for the evaluation of a portfolio of prior learning. This course is required for students to apply for Prior Learning Assessment (PLA) via portfolio review.

**INTDSC 1700 Major and Career Exploration: 1 semester hour**
This course is designed to provide students with the opportunity to learn and explore various majors and career paths within a structured setting. Both informative and interactive, the course will provide students with the opportunity to learn broadly about college majors and their relationship to the ‘world of work,’ while also researching specifically the options they are interested in pursuing. The course seeks to assist students with answering two questions, ‘What do I want to study?’ and ‘How do I want to make a life for myself (and family)?’ Components of the course will also educate students about the current and projected employment market, and how to further research pertinent career information.

**INTDSC 1999 Big History: From the Big Bang to the Present: 3 semester hours**
Same as HIST 1999. An introduction to the humanities, social science, and science disciplines through a sweeping overview of natural and human history from the Big Bang to the present. Course will include lectures from faculty in various Arts and Sciences units, films, and group discussions.

**INTDSC 2001 Introduction to Organizational Leadership: 3 semester hours**
This course will survey current research and case studies of leadership with a strong focus on self-awareness and introspection as drivers of organizational leadership success. It will invite students to consider leadership as a process more than a product.

**INTDSC 2003 Careers in Health and Medicine: 1 semester hour**
Same as ANTHRO 2003, GERON 2003, SOC 2003. In this course, students will learn about occupations in such fields as medicine, the allied health professions, health non-profit organizations, and global healthcare delivery. Students will understand the education and skills necessary for various careers and for application to medical, professional, and graduate schools, and will become familiar with majors, certificates and minors that are available at UMSL. They will learn about employment opportunities in the healthcare industry in the St. Louis metropolitan area, and will be introduced to members of the local community who give guest lectures. Students will gain practical experience by shadowing a healthcare professional in their job.

**INTDSC 3010 Peer Mentoring: 1-3 semester hours**
Prerequisites: Consent of instructor. The objective of this interdisciplinary course is to prepare and support undergraduate students working across campus as learning assistants, tutors, peer mentors, student leaders, etc. The course will support the development of general pedagogical knowledge of active learning, leadership and facilitation skills, and effective communication and listening skills, that they will use to facilitate learning in settings where students are working collaboratively, reviewing course content, or receiving supplemental instruction to guide their success. This course may be repeated for up to 6 credit hours.

**INTDSC 4001 Organizational Leadership Capstone: 3 semester hours**
Prerequisites: INTDSC 2001. This course will help students achieve and demonstrate proficiency in organizational leadership. Students will apply insights gained from previous coursework into individual and group projects that identify and address real-world leadership challenges.

**Language and Cultural Studies**

**General Information**

**Degrees and Areas of Concentration**

Language and Cultural Studies offers courses in French, Japanese, and Spanish, as well as a Dual Language Professional option, leading to the B.A. in Modern Language degree, and an emphasis in each of these languages for students seeking the B.S. Ed. in Secondary Education as well as the B.A. in Modern Language with Master’s Level Coursework for Secondary Teacher Certification. In addition, the program offers courses in English for Academic Purposes, Chinese, and German.

Minors may also be earned in the department. For details, see the specific requirements which appear later in this section.

**Study Abroad**

Language students who have been at the University of Missouri-St. Louis at least one semester and have studied the language for at least one year may receive credits for formal study abroad. Students must present a list of language course descriptions from the institution abroad to receive prior consent of the department, and must present a transcript for evaluation upon return to receive credit for those courses. Exchange programs are available with many universities in foreign countries. For information, please contact the Study Abroad Office at http://www.umsl.edu/services/abroad/.

**Alumni Scholarship**

Qualified junior and senior language majors may apply for the Modern Language Alumni Scholarship, which is renewable each year on a
competitive basis. For information, please contact Student Financial Aid at http://www.umsl.edu/services/finaid/.

**Marcus Allen Memorial Scholarship**
Qualified students of French may apply for the Marcus Allen Memorial Scholarship which is awarded on a competitive basis and must be used within one semester of the award. For information, please contact Student Financial Aid.

**Baldini Family Scholarship**
Qualified full-time students pursuing a Modern Language degree with teacher certification may apply for this scholarship which is awarded on a competitive basis and must be used within one semester of the award. For information, please contact Student Financial Aid.

**Community College Scholarship**
Qualified community college students may apply for the Modern Language Community College Scholarship to be used for educational fees toward enrollment in third semester or higher courses in French, German, Japanese, or Spanish. This scholarship must be used within one semester of the award. For information, please contact Student Financial Aid.

**German Scholarship**
Students of German may apply for the German Scholarship. Funds may be used toward educational fees for German courses or toward study abroad in a German-speaking country. For information, please contact Student Financial Aid.

**Allen B. and Helen S. Shopmaker Spanish Scholarship**
Qualified full-time students pursuing a Modern Language degree with a concentration in Spanish may apply for this scholarship. For information, please contact Student Financial Aid.

**Departmental Honors**
Candidates for departmental honors in Modern Languages must meet the following requirements:

1. Achieve a GPA of 3.5 in the major for all hours attempted beyond the first two semesters. (Language Courses 1001 and 1002).
2. Maintain an overall GPA of 3.0.

**Degrees**
Modern Language BA, Dual Language Emphasis Professional (p. 509)
Modern Language BA, Japanese Emphasis (p. 514)
Modern Language BA, Spanish Emphasis (p. 516)
Modern Language BA, French Emphasis (p. 511)

**Minors**
French Minor (p. 463)
Japanese Minor (p. 484)
Spanish Minor (p. 634)
Modern Languages Minor (p. 518)

**Courses**
Courses offered by the department can be found at the links below:

Arabic (ARABIC)
Chinese (CHINESE)
English for Academic Purposes (EAP)
Foreign Language - Other (FGN LANG)
French (FRENCH)
German (GERMAN)
Japanese (JAPAN)
Spanish (SPANISH)

**Mathematics and Statistics**

**General Information**
Studying mathematics allows one to develop critical thinking and technical problem-solving skills widely applicable to many career paths. Consequently, a degree or minor in mathematics can be a boon to one's career opportunities in addition to being a worthwhile academic endeavor on its own.

**Degrees and Areas of Concentration**
The Department of Mathematics and Statistics offers numerous undergraduate degree programs, graduate degree programs, minors, and certificates.

Our undergraduate degrees include a Bachelor of Arts (B.A.) in Mathematics, a Bachelor of Science (B.S.) in Mathematics, a B.S. in Mathematics with an emphasis in Data Science, and a B.S. in Mathematics with an emphasis in Fiscal Mathematics. With the departments of Economics and Accounting, we offer an interdisciplinary B.S. in Actuarial Science. In cooperation with the College of Education, we offer the Bachelor of Secondary Education (B.S.Ed.) in Secondary Education with an emphasis in Mathematics and the B.A. or B.S. in Mathematics with master’s level coursework for secondary teacher certification.

The department offers a minor in Mathematics, a minor in Statistics, an interdisciplinary Certificate in Actuarial Studies, and an interdisciplinary Certificate in Data Science.

At the graduate level, the department offers a Master of Arts (M.A.) degree in Mathematics with an emphasis in Mathematics or Data Science, a Doctor of Philosophy (Ph.D.) in Mathematical and Computational Sciences – with options in Mathematics, and Statistics.

**Undergraduate Programs Overview**
The program leading to the B.A. in Mathematics provides a broad grounding in different areas of mathematics, giving students a well-rounded education.

The programs leading to our various B.S. degrees allow students to develop a deep and substantial background in mathematics sufficient to produce graduates who can work in areas requiring applied mathematical techniques and tools. These B.S. degrees are structured to provide students the opportunity to explore their interests within the various degree programs.
The B.S. in Actuarial Science is designed to produce graduates who are well prepared for an entry-level career in the actuarial profession.

The B.S.Ed. in Secondary Education with an emphasis in mathematics introduces students to those branches of mathematics most relevant to the teaching of secondary school mathematics.

The Certificate in Data Science is designed to provide computing and statistical foundations for work with big data and data analytics.

The Certificate in Actuarial Studies is designed to help prepare students for entry-level employment in the actuarial profession.

**Dual Program**

The Department offers a dual Bachelor's and Master's degree program in mathematics for students with strong academic records. The dual degree program in mathematics is designed to provide an opportunity for strong undergraduate majors to start earning graduate work credit before actually completing their undergraduate degree, thus accelerating their education.

**Graduate Programs Overview**

Students pursuing the M.A. degree in Mathematics may choose the traditional track of M.A. in either pure or applied mathematics or the track in data science.

The data science track of our M.A. degree is the only graduate program in data science available at UMSL, and it is designed for students preparing to work in industry as data scientists. These graduates will acquire a solid foundation in statistics and computational skills with emphasis on applications to data science.

The traditional track is ideal for students interested in honing their technical problem solving and critical thinking skills while simultaneously pursuing the beauty inherent in a deeper understanding of mathematics. This degree is also well suited for those preparing to teach at the high school or junior college level. Those who concentrate on applied courses in the traditional track build a foundation for the application of mathematics in industry and the continuation of their education in the Ph.D. program in mathematical and computational sciences. Our graduates with the traditional track will have abilities in the basic areas of mathematics, and a breadth of knowledge in core subjects at the graduate level.

The Ph.D. program in Mathematical and Computational Sciences is designed to provide the highest level of academic study and research in mathematical and computational sciences. The goal is to produce highly qualified professionals for teaching and research positions in the academic world, as well as equivalent positions in industry and government. The demand for these professionals continues to exceed the current production and is expected to remain so for the foreseeable future.

Students may enroll in any of these graduate programs on a part-time basis, and with proper scheduling all can be completed in the evening.

**Career Outlook**

A degree in mathematics prepares well-motivated students for interesting careers. Our graduates find positions in industry, government, and education. The demand for individuals well trained in statistics, data science, and mathematics is greater than the available supply. In addition, a number of graduates in mathematics have elected careers in business, law and other related fields where they find logical and analytical skills valuable.

Graduates in mathematics from UMSL are located throughout the country, and they also have a strong local presence. They have careers in banking, health care, engineering and manufacturing, law, finance, public service, management, and actuarial management. Many are working in areas such as systems management, information systems and data management, scientific computing, cryptography, and scientific positions in the armed services. Others have careers in education, especially at secondary and higher levels.

**Department Scholarships**

The Department of Mathematics and Statistics offers many merit-based and need-based scholarships available to undergraduate department majors.

The Alumni Scholarship is awarded to outstanding undergraduate students and is open to all junior and senior department majors.

The Edward Z. Andalafte Memorial Scholarship is awarded to outstanding undergraduate department majors at the sophomore level or higher.

The Raymond and Thelma Balbes Scholarship in Mathematics is awarded to students at the sophomore level or higher who are pursuing a degree in mathematics, have an overall GPA of at least 3.0 and a GPA of at least 3.2 in mathematics and who have completed three semesters of calculus.

The Joseph M. and Mary A. Vogl Scholarship in Mathematics is a need based monetary award for undergraduate department majors.

**Degrees**

- Mathematics BA (p. 494)
- Mathematics BS (p. 497)
  - Data Science Emphasis (p. 499)
  - Fiscal Mathematics Emphasis (p. 501)
- Mathematics BA or BS/MA Dual Degree Program (p. 496)
- Mathematics MA (p. 503)
  - Data Science Emphasis (p. 504)
- Mathematical and Computational Science PhD
  - Mathematics Emphasis (p. 491)
  - Statistics Emphasis (p. 493)

**Minors**

- Mathematics Minor (p. 505)
- Statistics Minor (p. 638)

**Affiliated Interdisciplinary Programs**

- Actuarial Science BS (p. 311)
- Actuarial Studies Undergraduate Certificate (p. 313)
- Data Science Undergraduate Certificate (p. 413)
Courses

**MATH 0005 Intermediate Algebra: 3 semester hours**
Prerequisites: A satisfactory score on the UMSL Math Placement Examination, obtained at most one year prior to enrollment in this course. Prepares students for college level mathematics courses. Covers systems of linear equations and inequalities, polynomials, rational expressions, exponents, quadratic equations, graphing linear and quadratic functions. This course carries no credit towards any baccalaureate degree.

**MATH 1020 Contemporary Mathematics (MOTR MATH 120): 3 semester hours**
Prerequisites: A satisfactory score on the UMSL Math Placement Examination, obtained at most one year prior to enrollment in this course. Presents methods of problem solving, centering on problems and questions which arise naturally in everyday life. May include aspects of algebra and geometry, the mathematics of finance, probability and statistics, exponential growth, and other topics chosen from traditional and contemporary mathematics which do not employ the calculus. Designed for students who do not plan to take calculus and may not be used as a prerequisite for other mathematics courses. Credit will not be granted for MATH 1020 if credit has been granted for MATH 1310, MATH 1800, MATH 1100, MATH 1102, or MATH 1105. Concurrent enrollment in MATH 1020 and any of these courses is not permitted. This course fulfills the University's general education mathematics proficiency requirement.

**MATH 1021 Choice and Chance: 3 semester hours**
Same as PHIL 1021. Prerequisites: A satisfactory score on the UMSL Math Placement Examination, obtained at most one year prior to enrollment in this course. This course provides an introduction to inductive logic and the theory of probability in an organized and systematic way, so as to give students tools for more effective decision-making. We will introduce the probability calculus, basic concepts of utility theory, decision theory and different approaches to understanding probability. This course is designed to be accessible to students of all levels. This course fulfills the University's general education mathematics proficiency requirement.

**MATH 1025 Geometry in the Real World: 3 semester hours**
Prerequisites: A satisfactory score on the UMSL Math Placement Examination, obtained at most one year prior to enrollment in this course. Presents topics in geometry designed to enrich the student's understanding of mathematics. Geometry as it applies to the physical world and such fields as art, music, nature, motion, architecture and city planning will be examined. This course is designed to be accessible to students of all levels. This course fulfills the University's general education mathematics proficiency requirement.

**MATH 1026 The Music of Math: 3 semester hours**
Prerequisites: A satisfactory score on the UMSL Math Placement Examination, obtained at most one year prior to enrollment in this course. This course presents topics in mathematics as they relate to music. Fundamental concepts of music such as intervals, scales, chords, tuning will be explored by developing an understanding of their mathematical underpinnings. An ability to read music in treble and bass clef is strongly recommended. Satisfies the general education mathematics proficiency requirement.

**MATH 1030 College Algebra (MOTR MATH 130): 3 semester hours**
Prerequisites: A satisfactory score on the UMSL Math Placement Examination, obtained at most one year prior to enrollment in this course, or approval of the department. This is a foundational course in math. Topics may include factoring, complex numbers, rational exponents, simplifying rational functions, functions and their graphs, transformations, inverse functions, solving linear and nonlinear equations and inequalities, polynomial functions, inverse functions, logarithms, exponentials, solutions to systems of linear and nonlinear equations, systems of inequalities, matrices, and rates of change. This course fulfills the University's general education mathematics proficiency requirement.

**MATH 1035 Trigonometry: 2 semester hours**
Prerequisites: MATH 1030 or MATH 1040, or concurrent registration in either of these two courses, or a satisfactory score on the UMSL Math Placement Examination, obtained at most one year prior to enrollment in this course. A study of the trigonometric and inverse trigonometric functions with emphasis on trigonometric identities and equations.

**MATH 1045 PreCalculus (MOTR MATH 150): 5 semester hours**
Prerequisites: A satisfactory score on the UMSL Math Placement Examination, obtained at most one year prior to enrollment in this course. This course covers topics including factoring, simplifying rational functions, functions and their graphs, solving linear and nonlinear equations, polynomial functions, inverse functions, the binomial theorem, logarithms, exponentials, solutions to systems of equations using matrices, solutions to nonlinear systems of equations, and sequences. Students will also study trigonometric and inverse trigonometric functions with emphasis on trigonometric identities and equations. This course is intended for students planning to take MATH 1800 and fulfills the University's general education mathematics proficiency requirement.

**MATH 1100 Basic Calculus: 3 semester hours**
Prerequisites: MATH 1030 or MATH 1040 or MATH 1045 or a satisfactory score on the UMSL ALEKS Placement Examination, obtained at most one year prior to enrollment in this course. This course introduces plane analytic geometry and basic differential and integral calculus with applications to various areas. No credit for Mathematics majors. Credit not granted for both MATH 1800 and MATH 1100.

**MATH 1102 Finite Mathematics: 3 semester hours**
Prerequisites: MATH 1030 or MATH 1040 or MATH 1045 or a satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. This course introduces logic and set theory, partitions and counting problems, elementary probability theory, stochastic processes, Markov chains, vectors and matrices, linear programming, and game theory.

**MATH 1105 Basic Probability and Statistics: 3 semester hours**
Prerequisites: MATH 1030 or MATH 1040 or MATH 1045 or a satisfactory score on the UMSL Math Placement Examination, obtained at most one year prior to enrollment in this course or consent of the department. This course is an introduction to probability and statistics. Topics may include the concept of probability and its properties, descriptive statistics, discrete and continuous random variables, expected value, distribution functions, the central limit theorem, random sampling, and sampling distributions. Credit will not be granted for more than one of MATH 1310, MATH 1320, and MATH 1105.
MATH 1150 Structure of Mathematical Systems I: 3 semester hours  
Prerequisites: 45 hours of college credit and a satisfactory score on the UMSL Math Placement Examination, obtained at most one year prior to enrollment in this course OR successful compleion of MATH 1030 no more than 2 years prior to enrollment in this course. This course examines topics including problem solving, patterns, sets, numeration systems, whole numbers and operations, positive rational numbers and operations, and an introduction to variables and equations, with an emphasis placed on using multiple techniques for each of the aforementioned topics.

MATH 1310 Elementary Statistical Methods: 3 semester hours  
Prerequisites: MATH 1030 or MATH 1040 or MATH 1045 or a satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. An introduction to the basic tools and elementary methods of statistics, such as testing of hypotheses, analysis of variance, method of least squares, and time series. A student may not receive credit for more than one of MATH 1310, MATH 1320, and MATH 1105.

MATH 1320 Introduction to Probability and Statistics: 3 semester hours  
Prerequisites: MATH 1030 or MATH 1040 or MATH 1045 or consent of the department. The course will cover basic concepts and methods in probability and statistics. Topics include descriptive statistics, probabilities of events, random variables and their distributions, sampling distributions, estimation of population parameters, confidence intervals and hypothesis testing for population means and population proportions, chi-square tests. A student may not receive credit for more than one of MATH 1310, MATH 1320 and MATH 1105.

MATH 1800 Analytic Geometry and Calculus I: 5 semester hours  
Prerequisites: MATH 1030 and MATH 1035, or MATH 1040 and MATH 1035, or MATH 1045, or a satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course, or approval of the department. This course provides an introduction to differential and integral calculus. Topics include limits, derivatives, related rates, Newton's method, the Mean-Value Theorem, Max-Min problems, the integral, the Fundamental Theorem of Integral Calculus, areas, volumes, and average values.

MATH 1900 Analytic Geometry and Calculus II: 5 semester hours  
Prerequisite: MATH 1800. Topics include conic sections, rotation of axes, polar coordinates, exponential and logarithmic functions, inverse (trigonometric) functions, integration techniques, applications of the integral (including mass, moments, arc length, and hydrostatic pressure), parametric equations, infinite series, power and Taylor series.

MATH 2000 Analytic Geometry and Calculus III: 5 semester hours  
Prerequisite: MATH 1900. Topics include vectors, cylindrical and spherical coordinates, vector-valued functions, arc length and curvature, functions of several variables, partial and directional derivatives, gradients, extrema, Lagrange multipliers, multiple integrals, change of variables, surface area, vector fields, Stokes' Theorem.

MATH 2010 Introduction to Inquiry Approaches to STEM Education (STEP I): 1 semester hour  
Same as CHEM 2010, PHYSICS 2010, BIOL 2010, and SEC ED 2010. Prerequisites: Concurrent enrollment BIOL 1821, BIOL 1831, CHEM 1111, CHEM 1121, PHYSICS 2111, PHYSICS 2112, MATH 1800, or MATH 1900 or have a declared STEM major. Students who want to explore teaching careers become familiar with lesson plan development by writing, teaching and observing lessons in a local school class. Students build and practice inquiry-based lesson design skills and become familiar with and practice classroom management in the school setting. As a result of the STEP I experiences students should be able to decide whether to continue to explore teaching as a career and ultimately finishing the remainder of the WE TEACH MO curriculum leading to teacher certification. The classroom observations and teaching represent a major field component and requires at least one two hour block of free time during the school day once a week.

MATH 2020 Introduction to Differential Equations: 3 semester hours  
Prerequisite: MATH 2000. Topics will be chosen from: linear differential equations, equations with constant coefficients, laplace transforms, power series solutions, systems of ordinary differential equations.

MATH 2300 Introduction to Discrete Structures: 3 semester hours  
Prerequisites: MATH 1100 or MATH 1800, and CMP SCI 1250. This course treats fundamental mathematical concepts in discrete structures useful for computer science. Topics include logic, sets, equivalence relations and partitions, functions, elementary number theory, cardinality, basic combinatorial methods, trees and graphs.

MATH 2450 Elementary Linear Algebra: 3 semester hours  
Prerequisite: MATH 1100 or MATH 1900. An introduction to linear algebra. Topics will include complex numbers, geometric vectors in two and three dimensions and their linear transformations, the algebra of matrices, determinants, solutions of systems of equations, eigenvalues and eigenvectors.

MATH 2510 Structure of Mathematical Systems II: 3 semester hours  
Prerequisites: MATH 1150. Topics include an introduction to probability, statistics, and displays of data; a study of elementary geometry, including points, lines, planes, angles, properties of triangles, properties of quadrilaterals, other 2- and 3-dimensional shapes; similarity; measurement and conversions; Pythagorean Theorem; perimeter; area; surface area, and volume. This course does not apply towards the elective requirements for any of the majors, minors or related areas in mathematics and statistics.
MATH 3000 Discrete Structures: 3 semester hours
Prerequisites: MATH 1800 or MATH 1100, and CMP SCI 1250 or equivalent. This course introduces fundamental concepts and important data structures in Discrete Mathematics and serves as an important foundation for subsequent courses in Computer Science. It provides a formal system on which mathematical reasoning is based, and various problem-solving strategies with emphasis on the algorithmic approach (both iterative and recursive). Topics include logic, sets, functions and relations; methods of proof, including mathematical induction; elements of number theory; order of growth and basic analysis of algorithms efficiency; recurrence relations; basic counting methods; graphs and trees. This course does not apply towards the elective requirements for any of the majors, minors or related areas in mathematics and statistics.

MATH 3250 Foundations of Mathematics: 3 semester hours
Prerequisites: MATH 1900 and CMP SCI 1250. The course will focus on developing an understanding of proofs and rigorous mathematical reasoning. Topics will include logic, sets, relations, functions, number theory, and counting methods.

MATH 3320 Applied Statistics: 3 semester hours
Prerequisites: MATH 1320. The course will cover topics including multiple regression, analysis of variance, generalized linear models, and applications of these methods. Using R for statistical analysis will be part of the course.

MATH 3520 Structure of Mathematical Systems III: 3 semester hours
Prerequisites: MATH 2510. Topics from MATH 1150 and MATH 2510 are continued. Other topics include integers and the real number system, relations and functions, coordinate system and linear equations, congruence, geometric constructions, geometric proofs, isometries, tessellations, and trigonometry. This course does not apply towards the elective requirements for any of the majors, minors or related areas in mathematics and statistics.

MATH 4005 Exploratory Data Analysis with R: 3 semester hours
Prerequisites: (MATH 1100 or MATH 1800) and (ANTHRO 3220 /SOC 3220 or BIOL 4122 or CRIMIN 2220 or ECON 3100 or MATH 1320 or POL SCI 3000 or PSYCH 2201). This course covers data analysis methods with R. It introduces the basic goals and techniques of the data science process, methods of characterizing and visualizing data and building predictive and inferential models. R will be introduced at the beginning of the class and then used throughout the rest of the class.

MATH 4010 Financial Mathematics I: 3 semester hours
Prerequisites: MATH 1900 or MATH 1100, and MATH 1320 or SCMA 3300 (or equivalents). This course introduces the theory of interest, annuities (certain), annuities with differing pay periods, amortization schedules, and sinking funds.

MATH 4020 Financial Mathematics II: 3 semester hours
Prerequisite: MATH 4010. This course introduces the premium-discount formula for bonds, bond amortization, term structure of interest rates, and pricing theory for options.

MATH 4030 Applied Mathematics I: 3 semester hours
Prerequisite: MATH 2020 and MATH 2450. Topics chosen from Fourier series, special functions, partial differential equations, and boundary value problems.

MATH 4060 Applied Differential Equations: 3 semester hours
Prerequisites: MATH 2020 and MATH 2450. The study of ordinary differential equations and partial differential equations is continued with applications in such areas as physics, engineering and biology.

MATH 4070 Introduction to Nonlinear Optimization: 3 semester hours
Prerequisites: MATH 1320, MATH 2000, MATH 2450 and (MATH 3000 or MATH 3250). This course will introduce the theory, methods, and applications of nonlinear optimization. It will cover convex functions, convex analysis, linear and quadratic programs, semidefinite programming and other optimization problems. Topics may include duality theory, algorithms of descent method, Newton’s method and interior-point methods, and applications to signal processing, statistics and other fields will be covered. Credit cannot be earned for both MATH 4070 and MATH 5070.

MATH 4080 Introduction to Scientific Computation: 3 semester hours
Prerequisites: MATH 2000 and MATH 2450. This course will introduce fundamental algorithms in numerical linear algebra, matrix factorizations including SVD and QR, direct and iterative methods for solving linear systems, least squares problems and eigenvalue problems. Other topics covered will be chosen from numerical integration and differentiation, iterative methods for ODEs and PDEs, Discrete Fourier transform and FFT, spline smoothing and kernel smoothing. Credit cannot be earned for both MATH 4080 and MATH 5080.

MATH 4090 Introduction to High-dimensional Data Analysis: 3 semester hours
Prerequisites: MATH 1320, MATH 2000 and MATH 2450. This course introduces several advanced classical and modern techniques for modeling and analysis of high-dimensional datasets with low-dimensional structures. The topics covered in this course include principal component analysis, factor analysis, clustering-based methods, and sparse and low-rank recovery theory and algorithms. Credit cannot be earned for both MATH 4090 and MATH 5090.

MATH 4100 Real Analysis I: 3 semester hours
Prerequisites: MATH 3250, or CMP SCI 3130, or consent of instructor. This course provides an introduction to real analysis in one variable. Topics include the real number system, limits, continuity, differentiability, and sequences and series of functions.

MATH 4160 Complex Analysis I: 3 semester hours
Prerequisites: MATH 2000 or consent of the instructor. This course introduces complex numbers and their geometrical representation, point sets, analytic functions of a complex variable, complex integration, Taylor and Laurent series, residue theorem, and conformal mapping.

MATH 4200 Mathematical Statistics I: 3 semester hours
Prerequisites: MATH 1320 and MATH 2000. Introduction to the theory of probability and statistics using concepts and methods of calculus.

MATH 4210 Mathematical Statistics II: 3 semester hours
Prerequisites: MATH 1320, MATH 2000 and MATH 2450. This course will cover topics including estimation, hypothesis testing, NeymanPearson Theorem, likelihood ratio tests, introduction of inferential theorems and computation methods on fundamental Bayesian modeling and analysis of high-dimensional datasets with low-dimensional structures. The topics covered in this course include principal component analysis, factor analysis, clustering-based methods, and sparse and low-rank recovery theory and algorithms. Credit cannot be earned for both MATH 4090 and MATH 5090.

MATH 4220 Bayesian Statistical Methods: 3 semester hours
Prerequisites: MATH 2000 and MATH 2450. This course introduces Bayesian methods in data analysis and inference, including prior and posterior distributions, Bayesian computation, Markov Chain Monte Carlo (MCMC) methods, and applications in signal processing, statistics and other fields will be covered. Credit cannot be earned for both MATH 4070 and MATH 5070.

MATH 4300 Discrete Mathematics: 3 semester hours
Prerequisites: MATH 1900 and CMP SCI 1250. This course will introduce the theory, methods, and applications of discrete mathematics. It will cover topics such as graph theory, logic, set theory, and algebra. Credit cannot be earned for both MATH 4070 and MATH 5070.
MATH 4225 Introduction to Statistical Computing: 3 semester hours
Prerequisites: MATH 1320, MATH 2000 and MATH 2450. This course will introduce fundamental algorithms in Monte Carlo methods: random variable generation, Monte Carlo integration, Monte Carlo optimization, Markov chain Monte Carlo, Metropolis-Hastings algorithm, Gibbs sampler, Langevin algorithms and Hamilton Monte Carlo, perfect, iterated and sequential importance sampling. Other topics covered may include particle systems, hidden Markov models, parallel and cloud computing. Credit cannot be earned for both MATH 4225 and MATH 5225.

MATH 4230 Numerical Analysis I: 3 semester hours
Prerequisites: MATH 2020, MATH 2450, and the ability to program in an upper-level language. Solutions of equations, interpolation and approximation numerical differentiation and integration, and numerical solutions of initial value problems in ordinary differential equations. Selected algorithms will be programmed for solution on computers.

MATH 4250 Introduction to Statistical Methods in Learning and Modeling: 3 semester hours
Prerequisites: MATH 1320, MATH 2450, and either MATH 3250 or CMP SCI 3130; or consent of instructor. This course focuses on topics selected from probability and statistics to be determined by the interests of the instructor.

MATH 4260 Introduction to Stochastic Processes: 3 semester hours

MATH 4350 Theory of Numbers: 3 semester hours
Prerequisites: MATH 2450 and either MATH 3000 or MATH 3250; or consent of instructor. This course examines the properties of integers, multiplicative functions, congruences, primitive roots, and quadratic residues.

MATH 4390 Topics in Probability and Statistics: 3 semester hours
Prerequisites: Consent of instructor. A seminar on special topics in probability and statistics to be determined by the interests of the instructor. May be repeated for credit provided different topics are studied.

MATH 4400 Introduction to Abstract Algebra I: 3 semester hours
Prerequisites: MATH 2450 and either MATH 3250 or CMP SCI 3130; or consent of instructor. This course introduces groups, rings, and fields, with an emphasis on groups and rings.

MATH 4450 Linear Algebra: 3 semester hours
Prerequisites: MATH 2450 and either MATH 3250 or CMP SCI 3130; or consent of instructor. This course focuses on topics selected from vector spaces, bases, linear transformations, matrices, canonical forms, eigenvalues, hermitian and unitary matrices, inner product spaces, and quadratic forms.

MATH 4460 Introduction to Coding Theory: 3 semester hours
Prerequisites: MATH 2450 and either MATH 3000 or MATH 3250. This course is an introductory course in coding theory. Topics may include linear codes, generator and parity check matrices, dual codes, weight and distance, encoding and decoding, and the Sphere Packing Bound; various examples of codes like the Hamming codes, Golay codes, binary Reed-Muller codes, and the hexacode; Shannon's theorem for the binary symmetric channel, upper and lower bounds on the size of linear and nonlinear codes; constructions and properties of finite fields, basic theory of cyclic codes; concepts of idempotent generator, generator polynomial, zeros of a code, and defining sets, special families of BCH and Reed-Solomon cyclic codes as well as generalized Reed-Solomon codes. Credit cannot be granted for both MATH 4460 and MATH 5460.

MATH 4500 Special Readings: 1-10 semester hours
Prerequisites: 6 credit hours at the Math 4000 level and consent of the instructor. Advanced topics in Mathematics. May be repeated for credit if the topic differs.

MATH 4550 Combinatorics: 3 semester hours
Prerequisites: MATH 2450 and either MATH 3000 or MATH 3250; or consent of instructor. This course introduces advanced counting methods including the use of generating functions for the solution of recurrences and difference equations. Additional topics may include: graphs and trees, combinatorial designs, combinatorial games, error-correcting codes, and finite-state machines.

MATH 4580 Mathematical Logic: 3 semester hours
Prerequisites: MATH 2450 and one of MATH 3250, CMP SCI 3130, or PHIL 4460; or consent of instructor. This course focuses on a study of the logic of mathematics by the axiomatic method, with a development of the propositional calculus and restricted predicate calculus emphasizing its application to the foundations of mathematics.

MATH 4660 Foundations of Geometry: 3 semester hours
Prerequisites: MATH 2450 and either MATH 3250 or CMP SCI 3130; or consent of instructor. This course focuses on a development of portions of Euclidean geometry from a selected set of axioms, including a discussion of consistency, independence, categoricity, and completeness of the axioms.

MATH 4670 Introduction to Non-Euclidean Geometry: 3 semester hours
Prerequisites: MATH 2450 and either MATH 3250 or CMP SCI 3130; or consent of instructor. This course focuses on a summary of the history of the non-Euclidean geometries and a study of hyperbolic plane geometry.

MATH 4800 Introduction to Topology: 3 semester hours
Prerequisites: MATH 2000 and either MATH 3250 or CMP SCI 3130; or consent of instructor. This course focuses on the study of topological spaces, including the concepts of limit, continuity, connectedness, compactness, etc. Special emphasis is placed on, and examples taken from, the space of real numbers.

MATH 4890 Topics in Mathematics: 3 semester hours
Prerequisite: Consent of instructor.

MATH 4995 Internship in Actuarial Science: 1-3 semester hours
Same as ECON 4995. Prerequisites: Junior standing and consent of program director. Supervised off-campus training in a private or public sector position in which the student applies the knowledge and skills learned in their actuarial science coursework. The internship is monitored by a faculty member and the student must provide a written report at the end of the project. This course may be repeated for a maximum of 6 credit hours.
MATH 5060 Computational Harmonic Analysis: 3 semester hours
Prerequisites: MATH 4030, MATH 4100 and MATH 4450. The course covers the basics of Fourier analysis and wavelet analysis. Topics include Fourier transforms and series, discrete Fourier transform, discrete cosine transform and their fast computational schemes, fast wavelet transform, and the lifting scheme. Additional topics include industrial standards for image compression and several aspects of signal processing.

MATH 5070 Nonlinear Optimization: 3 semester hours
Prerequisites: Graduate standing. This course will introduce the theory, methods, and applications of nonlinear optimization. It will cover convex functions, convex analysis, linear and quadratic programs, semidefinite programming and other optimization problems. Topics chosen from duality theory, algorithms of descent method, Newton's method and interior-point methods, and applications to signal processing, statistics and other fields will be covered. Topics are identical to MATH 4070 but material is covered at a greater depth and additional projects/assignments are required. Credit cannot be earned for both MATH 4070 and MATH 5070.

MATH 5080 Scientific Computation: 3 semester hours
Prerequisites: Graduate standing. This course will introduce fundamental algorithms in numerical linear algebra, matrix factorizations including SVD and QR, direct and iterative methods for solving linear systems, least squares problems and eigenvalue problems. Other topics covered will be chosen from numerical integration and differentiation, iterative methods for ODE's and PDE's, Discrete Fourier transform and FFT, spline smoothing and kernel smoothing. Topics are identical to MATH 4080 but material is covered at a greater depth and additional projects/assignments are required. Credit cannot be earned for both MATH 4080 and MATH 5080.

MATH 5090 High-dimensional Data Analysis: 3 semester hours
Prerequisites: Graduate standing. This course introduces several advanced classical and modern techniques for modeling and analysis of high-dimensional datasets with low-dimensional structures. The methods covered in this course include principal component analysis, factor analysis, clustering-based methods, and sparse and low-rank recovery theory and algorithms. Topics are identical to MATH 4090 but material is covered at a greater depth and additional projects/assignments are required. Credit cannot be earned for both MATH 4090 and MATH 5090.

MATH 5100 Real Analysis II: 3 semester hours
Prerequisites: MATH 4100. Introduction to measure and integration. Topics include the Riemann-Stieltjes integral, Lebesgue measure, measurable functions, the Lebesgue integral, Radon-Nikodym and Fubini theorems and the basics of Lp-spaces.

MATH 5140 Set Theory and Metric Spaces: 3 semester hours
Prerequisites: MATH 4100 or consent of instructor. Naive set theory, cardinal arithmetic, ordinal numbers, the axiom of choice and equivalents, metric spaces, convergence, continuity, compactness, contraction principals and applications. Construction of completions and examples like real numbers and p-adic numbers. Other topics could include the Stone-Weierstrass theorem and metrizability theorems.

MATH 5160 Complex Analysis II: 3 semester hours
Prerequisites: MATH 4160 and either MATH 4100 or MATH 4800. A second course in complex analysis, emphasizing the theory of analytic functions, and including various topics like the Riemann mapping theorem, normal families, analytic continuation, representations of analytic functions, and elliptic functions.

MATH 5225 Statistical Computing: 3 semester hours
Prerequisites: Graduate standing. This course will introduce fundamental algorithms in Monte Carlo methods: random variable generation, Monte Carlo integration, Monte Carlo optimization, Markov chain Monte Carlo, Metropolis-Hastings algorithm, Gibbs sampler, Langevin algorithms and Hamilton Monte Carlo, perfect, iterated and sequential importance sampling. Other topics covered may include particle systems, hidden Markov models, parallel and cloud computing. Topics are identical to MATH 4085 but material is covered at a greater depth and additional projects/assignments are required. Credit cannot be earned for both MATH 4225 and MATH 5225.

MATH 5250 Statistical Methods in Learning and Modeling: 3 semester hours
Prerequisites: Graduate standing. This course will introduce basic statistical principles and methods for modeling, inference, prediction and classification. The topics will be chosen from linear regression, basis expansion methods, kernel smoothing methods, model regularization, nonparametric methods, and model selection and assessment. Topics are identical to MATH 4250 but material is covered at a greater depth and additional projects/assignments are required. Credit cannot be earned for both MATH 4250 and MATH 5250.

MATH 5320 Topics in Statistics and its Applications: 3 semester hours
Prerequisites: MATH 4210 or consent of instructor. The course studies classical and recently developed statistical procedures selected from areas including multivariate analysis, linear and non-linear models, nonparametric methods, and statistical learning. Emphasis is on applications of the procedures.

MATH 5460 Coding Theory: 3 semester hours
Prerequisites: Graduate standing. This course is an introductory course in coding theory. Topics may include linear codes, generator and parity check matrices, dual codes, weight and distance, encoding and decoding, and the Sphere Packing Bound; various examples of codes like the Hamming codes, Golay codes, binary Reed–Muller codes, and the hexacode; Shannon's theorem for the binary symmetric channel, upper and lower bounds on the size of linear and nonlinear codes; constructions and properties of finite fields, basic theory of cyclic codes; concepts of idempotent generator, generator polynomial, zeros of a code, and defining sets, special families of BCH and Reed–Solomon cyclic codes as well as generalized Reed–Solomon codes. Topics are identical to MATH 4460 but material is covered at a greater depth and additional projects/assignments are required. Credit cannot be granted for both MATH 4460 and MATH 5460.

MATH 5500 Directed Readings: 1-6 semester hours
Prerequisite: Consent of instructor. Independent readings at an advanced level.

MATH 5550 Topics in Advanced Math for the Teacher: 3 semester hours
Prerequisite: Consent of instructor. This course will look at various topics in Algebra, Analysis, and Geometry that will deepen a teacher's understanding of the Mathematics of the precollegiate curriculum. It can be taken more than once for credit.

MATH 5600 Topics in Computation: 3 semester hours
Prerequisite: Consent of instructor. The course will cover various advanced topics in computation, and can be taken more than once for credit. Examples of such topics are: computer graphics, computer architecture, theories of language, analysis of operating systems, numerical geometry and computer aided design, etc.
Music

General Information

Degrees and Areas of Concentration

The Department of Music offers programs of study leading to the B.M. degrees in Music Education (and state teaching certification in grades K-12); Music Performance; Music Composition; Music Theory; Music with Elective Studies in business; and the B.A. degree in music.

Instruction in piano, organ, voice, and all band and orchestral instruments is given by full-time faculty and adjunct faculty who are also professional musicians. Some are members of the St. Louis Symphony Orchestra. Faculty recitals are regularly scheduled.

Music Minors

Minors in music and jazz studies are available.

Faculty

Music faculty members have received recognition for distinguished achievements in conducting, composition, and performance. The faculty is also recognized for high-profile research in musicology, music theory, and music education.

MATH 5700 Topics in Applied Mathematics: 3 semester hours
Prerequisite: Consent of instructor. The course will cover various advanced topics on applied mathematics, and can be taken more than once for credit. Examples of such topics are: fast transforms, digital filters, etc.

MATH 5710 Topics in Analysis: 3 semester hours
Prerequisites: MATH 5100 or consent of instructor. Topics selected from the areas of Fourier analysis, harmonic analysis, functional analysis, special functions, generalized functions, and partial differential equations. May be taken more than once for credit with consent of department.

MATH 5770 Advanced Topics in Nonlinear Optimization: 3 semester hours
Prerequisites: MATH 4070 or MATH 5070; or consent of the instructor. Topics chosen from theory and algorithms of Lagrange multipliers, algorithms for solving variational inequalities, forward-backward splitting algorithms and proximal alternating minimization algorithm for non-convex optimization problems.

MATH 5820 Topics in Algebra: 3 semester hours
Prerequisite: Consent of instructor. Topics selected from the theory of groups, rings, fields, algebras and other algebraic systems. May be taken more than once for credit with consent of department.

MATH 5890 Advanced Topics in Mathematics: 3 semester hours
Prerequisites: Consent of the instructor. The course will cover various advanced topics in mathematics, statistics, or data science. May be taken more than once if the topic differs.

MATH 6900 Masters Thesis: 1-6 semester hours
Prerequisite: Consent of instructor. Thesis work under the supervision of a faculty member. The course is designed for those students intending to present a thesis as part of their M.A. program. Students who do not write a thesis cannot apply MATH 6900 to a degree.

MATH 7990 Ph.D. Dissertation Research: 1-9 semester hours
Prerequisites: Completion of comprehensive examinations. May be taken for no more than nine hours.

Career Outlook

A degree in music prepares students for careers in a wide range of specialties such as professional performance, teaching in public schools, holding positions in the music industry (e.g., recording, publishing, radio programming, manufacturing), or working as a musical entrepreneur carving out your own niche in the field. Additionally, employers in many fields outside of music take notice of applicants with music degrees because they understand that self-discipline, collaboration, creativity, and adaptability to new and unfamiliar scenarios are central to the work of musicians, and these skills transfer to non-musical areas in beneficial ways.

UMSL music graduates are highly sought-after in the job market, particularly in K-12 school music programs in Missouri and Illinois. Many others develop busy careers as professional performers and composers. Those graduates who choose to seek further study in music have been readily accepted into many of the nation’s top graduate programs. Others still are applying what they learned in their musical studies at UMSL in careers outside of music.

Additional information may be obtained by contacting the Department of Music: (314) 516-5980.

The Department of Music is accredited by the National Association of Schools of Music.
Students in Philosophy benefit from the unusually wide range of research interests of the faculty. They have written books and articles addressing not only the classical and traditional concerns of philosophy, but also contemporary controversies in the fields of law, psychology, sociology, political theory, biology, medical ethics, theology, logic, and philosophy of history as well. For their research in some of these areas, members have been awarded a number of national research grants, including fellowships from the National Science Foundation, the American Council of Learned Societies, and the National Endowment for the Humanities.

In keeping with this emphasis on diversity, the department is represented by scholars trained in widely different approaches to philosophy, such as the analytic tradition, Continental idealism and existentialism, Marxist dialectic, and Asian modes of thought.

Philosophy of Science and Technology (p. 568)

Courses

**PHIL 1021 Choice and Chance: 3 semester hours**
Same as MATH 1021. Prerequisites: A satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. This course provides an introduction to inductive logic and the theory of probability in an organized and systematic way, so as to give students tools for more effective decision-making. We will introduce the probability calculus, basic concepts of utility theory, decision theory and different approaches to understanding probability. This course is designed to be accessible to students of all levels. Satisfies mathematics proficiency.

**PHIL 1030 Present Moral Problems: 3 semester hours**
This course will explore a range of ethical dilemmas with an eye towards living the best life. How should I live? What actions are right and wrong? How should I treat myself and others? In this class, we will consider these and other issues by investigating practical problems in daily life including: human rights, the environment, hunger and poverty, war and violence, racial and ethnic discrimination, gender roles and marriage, abortion, and euthanasia.

**PHIL 1050 Existentialism and Phenomenology: 3 semester hours**
The course will cover classic works by philosophers and writers in the existential and phenomenological traditions. Topics include free will, existential crisis, despair, anxiety, faith, the death of God, the origin of morals, authentic life, as well as the structure and content of conscious experience.

**PHIL 1091 Great Philosophers: 3 semester hours**
This online course introduces philosophy through a survey and examination of the ideas of fifteen of the most important figures in the history of the subject. From Socrates to Nietzsche, the questions, answers, and lives of the great philosophers are explored in a multimedia context. This course does not satisfy any of the requirements for philosophy major or minor.
**PHIL 1110 Western Philosophy I: Antiquity to the Renaissance: 3 semester hours**

Lectures and discussions tracing the development of western philosophy from its beginnings among the pre-Socratics through the Middle Ages and Renaissance. Philosophical ideas will be examined in the cultural and historical context: the Greek city-state, the rise of Christianity, etc.

**PHIL 1111 Western Philosophy II: Descartes to the Present: 3 semester hours**

Lectures and discussions on the development of western philosophy from Descartes (1596-1650) to the present. Philosophical ideas will be examined with an eye to their historical and cultural setting: the rise of modern science, the industrial revolution, the rise of capitalism, etc.

**PHIL 1120 Asian Philosophy: 3 semester hours**

Critical study of selected philosophical classics of India and China. This course fulfills the cultural diversity requirement.

**PHIL 1125 Islamic Philosophy: 3 semester hours**

An introduction to Arabic philosophy in the Islamic classical period (roughly from the mid-ninth through the twelfth centuries). We consider the philosophical and theological background, and then examine the thought of such notable Islamic philosophers as al-Kindi, Ibn Sina, al-Ghazali, and Ibn Rushd. Topics treated typically include proofs for the existence of God, whether the world is eternal or had a beginning, the nature of the soul and whether it is immortal, and the distinction between essence and existence. This course fulfills the cultural diversity requirement.

**PHIL 1130 Approaches to Ethics (MOTR PHIL 102): 3 semester hours**

A study and discussion of representative topics in moral philosophy such as moral skepticism, moral objectivity, theories of obligation and value, evaluation of social institutions and the relation between morality and science. Traditional and contemporary writers will be considered.

**PHIL 1150 Introduction to Philosophy (MOTR PHIL 100): 3 semester hours**

A study and discussion of representative topics in philosophy such as free will and determinism, concepts of mind and body, the basis of value judgments, knowledge and belief, and the possibility of constructing a worldview.

**PHIL 1151 Love 101: 3 semester hours**

A critical review of what media personalities, philosophers, criminal justice experts, medical experts, neuroscientists, and psychologists have said about love and its place in our lives. Included will be such topics as the neuroscience of love, love across culture, love and commitment issues, marriage and the 'seven-year itch,' jealousy, domestic violence, and verbal abuse. Larger questions will include the role of love in the good life; the ethics of love; the psychological consequences of obsession, breakups and divorce; arranged marriages vs. freely chosen love; and the morality of laws that affect relationships between loving partners.

**PHIL 1159 Blind Spots: 3 semester hours**

This course provides a comprehensive introduction to cognitive biases, and to the strategies that can be used to address them. After an introductory unit devoted to the psychology of human reasoning, the course is structured around historical and contemporary case studies of particular biases, such as confirmation bias, negativity bias, and overconfidence.

**PHIL 1160 Critical Thinking (MOTR PHIL 101): 3 semester hours**

An introduction to the language and logical structure of arguments, the principles of sound reasoning, and application of these principles in a variety of contexts.

**PHIL 1180 Science vs. God: 3 semester hours**

This course examines whether religion and science are compatible, discusses the science-religion debate historically, and broaches philosophical issues surrounding belief, especially whether belief should be based in empirical evidence or in faith. Following these introductory course sessions, the class will discuss, in detail, topics in science and religion, including creation versus evolution; human nature (including abortion and stem cell research); the nature of sexuality and gender; the science of religion; morality; the environment from a religious perspective; meaningfulness in the universe; and finally, evidence for or against the afterlife, existence of a divinity, and divine providence.

**PHIL 1185 Philosophy of Religion: 3 semester hours**

A philosophical investigation of such problems as the nature of religious faith and experience, the relation of faith and reason, alternative concepts of deity and the problem of evil.

**PHIL 2185 Introduction to Religious Studies: 3 semester hours**

Same as HIST 2185. This course introduces students to the interdisciplinary study of religion. With an emphasis on research methods and perennial philosophical and historical topics, students will develop tools for investigating the various dimensions of worldview and gain exposure to many different religious traditions.

**PHIL 2249 Accounting Ethics: 3 semester hours**

Same as ACCTNG 2430. Prerequisites: ACCTNG 2400 and ACCTNG 2410 (may be taken concurrently). This course examines moral problems as they relate to the profession of accounting and the professional Codes of Conduct that govern the accounting profession. Students will apply the requirements of the Codes of Conduct to cases where ethical dilemmas or violations of professional standards may be present.

**PHIL 2251 Sexual Ethics: 3 semester hours**

A critical review of what philosophers, both classical and contemporary, have said about sexual experience and its place in our lives. Included will be such topics as sexual desire, sexual perversion, love and commitment, marriage and adultery, larger questions might include that role of sexual experience in the good life, issues of sexual privacy, and the morality of laws which regulate sexual activity.

**PHIL 2252 Crime and Punishment: 3 semester hours**

Same as CRIMIN 2252. This course will address fundamental conceptual, ethical, and moral issues that arise in the context of the legal system. Topics may include punishment, pre-trial detention, the death penalty, acquittal of persons who are legally guilty, plea bargaining, moral obligation to obey the law, and laws restricting civil liberties.

**PHIL 2253 Philosophy and Feminism: 3 semester hours**

Same as GS 2253. A critical examination of what various philosophers have said about issues of concern to women. Sample topics include oppression, racism, women's nature, femininity, marriage, motherhood, sexuality, pornography, the ethics of care.

**PHIL 2254 Business Ethics: 3 semester hours**

A critical survey from the perspective of moral theory of businesses and business practices. Topics vary but usually include some of the following: Whether the sole moral obligation of businesses is to make money; whether certain standard business practices, e.g., the creation of wants through advertising, are moral; whether businesses ought to be compelled, e.g., to protect the environment or participate in affirmative action programs.

**PHIL 2255 Environmental Ethics: 3 semester hours**

Examines such issues as the value of wilderness, our duties to animals and the natural world, pollution and development, environmental justice.
PHIL 2256 Bioethics: 3 semester hours
Same as GERON 2256. An examination of ethical issues in health care practice and clinical research and in public policies affecting health care. Topics include: abortion, euthanasia, health care, experimentation, informed consent and the right to health care.

PHIL 2257 Happiness and the Meaning of Life: 3 semester hours
This course is an accessible introduction to the historical and contemporary perspectives on happiness and the meaning of life in philosophy. It examines the nature of happiness by focusing on three major theories: happiness as pleasure, happiness as excellence and happiness as desire satisfaction. Other issues examined may include the relevance of virtue for happiness, the experience machine argument, the best way to pursue happiness as a personal or a policy goal, and other related topics.

PHIL 2258 Medicine, Values, and Society: 3 semester hours
Social, conceptual, and policy issues connected with medicine form the focus of the course. Topics may include: (1) role played by race & gender in design of research and distribution of care; (2) whether diseases are socially constructed categories reflecting the values of society; (3) development of social policies that offer universal access to health care; (4) the legitimacy of using psychotropic drugs to enhance life, rather than treat the disease. The course differs from Bioethics by emphasizing policy issues and their conceptual basis. Content of this course may vary.

PHIL 2259 Engineering Ethics: 3 semester hours
An examination of ethical issues in engineering using professional engineering codes as a starting point. The course will have a problem solving orientation, focusing on the analysis of particular cases. Actual high-profile cases such as the Challenger disaster will be considered, as well as hypothetical cases illustrating the more commonly encountered moral problems in engineering (such as accepting gifts from vendors). Topics include the engineer/manager relationship, engineers and the environment, honesty in engineering, and risk, safety, and liability.

PHIL 2280 Minds, Brains, and Machines: 3 semester hours
An introduction to basic philosophical issues in cognitive science. General topics include minds as computers; computers as minds, or the possibility of artificial intelligence that is truly intelligent; relationship between mental function and brain function. Some areas of current research, such as reasoning, vision, and emotion.

PHIL 2380 Ethics in Science: 3 semester hours
This course provides an overview of ethical issues in the practice of the sciences. Students will be introduced to basic concepts and theories of ethics and will apply them to contemporary and historical cases.

PHIL 3286 International Business Ethics: 3 semester hours
Same as INTL BUS 3286. The course will deal with moral issues that are raised by the increasing globalization of business. Apart from the general issue of whether this globalization is itself a good thing, we will discuss such issues as child labor, working conditions, safety standards, environmental policies, bribery and other 'corrupt' practices, respect for intellectual property, etc. Frequent short papers will be assigned.

PHIL 3301 Ancient Philosophy: 3 semester hours
Freshman admitted by consent of department. The principle philosophical doctrines of the ancient world, with special emphasis on the philosophies of Plato and Aristotle. Although there is no formal prerequisite, it is recommended that students have taken at least one other philosophy course.

PHIL 3302 Medieval Philosophy: 3 semester hours
A critical study of the important philosophies of the period from August to the Renaissance. Although there is no formal prerequisite, it is recommended that students have taken at least one other philosophy course.

PHIL 3303 Early Modern Philosophy: 3 semester hours
Principal figures in the development of rationalism, empiricism and skepticism in early modern Europe, from Descartes through Hume. Although there is no formal prerequisite, it is recommended that students have taken at least one other philosophy course.

PHIL 3304 19th and 20th Century Philosophy: 3 semester hours
This course covers major nineteenth and twentieth century philosophers. It may include such major figures as Hegel, Nietzsche, Mill, Pierce, James, Carnap, Wittgenstein, Russell and Sartre.

PHIL 3320 Topics in Applied Ethics: 3 semester hours
This course has variable content related to topics in applied ethics. Topics covered may include feminism, sexual ethics, environmental ethics, business ethics and bioethics. Philosophy majors should enroll in this course rather than any 2000-level applied ethics course. This course may be repeated for credit as long as the topic differs.

PHIL 3327 Race and Racism: 3 semester hours
This course will investigate the concepts of race and racism through an examination of metaphysical, psychological, ethical, and political problems associated with race.

PHIL 3340 Knowledge and Reality: 3 semester hours
This course introduces students to basic issues in contemporary metaphysics and theories of knowledge. Topics may include universals, causality, skepticism and truth.

PHIL 3360 Formal Logic: 3 semester hours
An introductory study of logical truth and deductive inference, with emphasis on the development and mastery of a formal system.

PHIL 3378 Philosophy of Mind: 3 semester hours
Prerequisites: Three hours of philosophy or consent of instructor. An introduction to philosophical issues pertaining to the mind. Topics may include how the mind relates to the body, how the mind represents the world, how the mind works, consciousness, and free will.

PHIL 3380 Philosophy of Science: 3 semester hours
An examination of science: what makes science special? Topics may include (but are not limited to): empiricism and of induction; paradigms and revolutions; explanation, causation and laws; realism versus instrumentalism; critiques of science such as those of feminism or postmodernism; and reductionism - ultimately is it all just physics?.

PHIL 4401 Plato: 3 semester hours
Prerequisites: Six hours of philosophy, a course in Ancient Philosophy recommended, graduate standing, or consent of instructor. A study of selected Platonic dialogues.

PHIL 4402 Aristotle: 3 semester hours
Prerequisites: Six hours of philosophy, a course in Ancient Philosophy recommended, graduate standing, or consent of instructor. A selective study of Aristotle's major works.

PHIL 4407 Kant: 3 semester hours
Prerequisites: Six hours of philosophy, PHIL 3304 or equivalent recommended, graduate standing or consent of instructor. A systematic study of the Critique of Pure Reason.
PHIL 4410 Topics and Figures in the History of Philosophy: 3 semester hours
Prerequisites: Nine hours of philosophy, graduate standing, or consent of instructor. In-depth examination of a particular topic, significant figure or philosophical movement from the history of philosophy. The philosopher or movement to be studied will be announced prior to registration. This is a variable content course and may be taken again for credit with the consent of the instructor and department chair.

PHIL 4420 Topics in Non-Western Philosophy: 3 semester hours
Prerequisites: PHIL 1120, graduate standing of consent of instructor. An extensive exploration of issues in some particular non-Western tradition (Islamic, Indian, or Chinese). This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

PHIL 4421 The Analytic Tradition: 3 semester hours
Prerequisites: Six hours of philosophy, graduate standing, or consent of instructor. PHIL 3305 and PHIL 3360 strongly recommended. Course studies in depth the development of analytic philosophy with a broad emphasis on its style and substance. Topics may include early writings that set the stage for this tradition (Frege, Moore, Russell), the basic texts of Logical Positivism (Carnap, Schlick, Neurath, Hempel), and later responses including reassessment of the doctrine, the revival of naturalism, and the “death” of philosophy (Wittgenstein, Quine, Sellars). This is a variable content course that may be taken again for credit with consent of the instructor and the department chair.

PHIL 4430 Social and Political Philosophy: 3 semester hours
Prerequisites: Six credit hours of philosophy required or consent of instructor. This course will cover several classic works of political theory, with a particular focus on the nature of justice, the proper extent of liberty, and social contract arguments for the legitimacy of state authority. Readings from Plato, Hobbes, Locke, Hume, Rousseau, Bentham, Mill, Marx and Rawls.

PHIL 4435 Classical Ethical Theory: 3 semester hours
Prerequisites: Six hours of philosophy, graduate standing, or consent of instructor. Significant contributions to moral philosophy from Plato and Aristotle to Bentham and Mill.

PHIL 4437 Metaethics: 3 semester hours
Prerequisites: Six credit hours of Philosophy. This course deals with questions regarding the foundations of ethics and the status of our ethical judgments about what's right and wrong, good and bad. The course will consider contemporary approaches to issues such as moral motivation, moral reasons, moral explanations, moral disagreement, moral knowledge, and moral supervenience, as well as various debates between realists and antirealists, and between cognitivists and expressivists.

PHIL 4438 Recent Ethical Theory: 3 semester hours
Prerequisites: Six hours of philosophy, graduate standing, or consent of instructor. A study of major contributions to twentieth-century ethics, including works by such writers as Moore, Dewey, Ross, Stevenson, Hare, and Rawls.

PHIL 4440 Theories of Knowledge: 3 semester hours
Prerequisites: Six hours of philosophy, graduate standing, or consent of instructor. An examination of concepts and problems involved in the characterization of knowledge. Specific topics will vary, but will usually include knowledge, belief, skepticism, evidence, certainty, perception, truth, and necessity.

PHIL 4445 Metaphysics: 3 semester hours
Prerequisites: Six hours of philosophy, graduate standing, or consent of instructor. An examination of selected metaphysical topics such as substance, universals, causality, necessity, space and time, free will, being, and identity.

PHIL 4450 Special Readings in Philosophy: 1-3 semester hours
Prerequisite: Consent of department. Independent study through readings, reports, and conferences. This is a content course and may be taken again up to a total of 6 credit hours with consent of instructor and department chair.

PHIL 4451 Special Topics in Philosophy: 3 semester hours
Prerequisites: Six hours of philosophy, graduate standing, or consent of instructor. A critical study of classical and/or contemporary contributions to a selected topic in philosophy. The topic to be considered will be announced prior to registration. This is a variable content course and can be taken again for credit with the consent of the instructor and the department chair.

PHIL 4458 Ethics and the Computer: 3 semester hours
Prerequisites: Six hours of coursework above the level of MATH 1030 in Math/Computer Science or at least six hours of philosophy or consent of instructor. An examination of ethical issues concerning the use of computers generally and software engineering in particular. Aims at developing awareness of these issues, and skills for ethical decision-making regarding them through careful, analytical methods. Typical issues include privacy, intellectual property, computer fraud, and others.

PHIL 4460 Advanced Formal Logic: 3 semester hours
Prerequisites: PHIL 3360, graduate standing, or consent of instructor. Rigorous study of major developments in contemporary logic. Emphasis is given to theoretical problems and some attention is devoted to philosophical issues arising from logic.

PHIL 4465 Theory of Decisions and Games: 3 semester hours
Same as POL SCI 4060. Prerequisites: Six hours of Philosophy and junior standing, or POL SCI 6401 (or the equivalent) or consent of the instructor. A study of rational decision-making, including games against nature, zero-sum games, and social choices. Topics will include the following: expected utility maximization, the Prisoner's Dilemma, Nash equilibria, Arrow's theorem on the impossibility of a social welfare function. Parts of the course are technical in nature; a prior course in mathematics (e.g., finite mathematics, calculus, statistics or an economics course with a mathematical component), symbolic logic, or some other course with comparable mathematical content.

PHIL 4474 Topics in Aesthetics: 3 semester hours
Prerequisites: PHIL 3374, graduate standing or consent of instructor. Selected topics, such as vision and representation, musical aesthetics, and recent theorists. This is a variable content course that may be taken again for credit with the approval of the instructor and the department chair.

PHIL 4478 Topics in Philosophy of Mind and Philosophy of Language: 3 semester hours
Prerequisites: PHIL 3378 or six hours of other philosophy courses or consent of instructor. This course is an examination of selected topics at the interface of philosophical and psychological research. This is a variable content course and can be taken again for credit with the consent of the instructor and the department chair.
PHIL 4479 Philosophy of Cognitive Science: 3 semester hours
Prerequisites: PHIL 3378 or PHIL 4478 or nine hours of other philosophy courses or consent of instructor. An exploration of the philosophical foundations of cognitive science, a cooperative effort of philosophers, cognitive psychologists, brain scientists, computer scientists, and others to understand the relationship between the mind and the brain.

PHIL 4480 Topics in Philosophy of Science: 3 semester hours
Prerequisites: Consent of the instructor. An advanced introduction to the philosophy of science for advanced undergraduates in philosophy and graduate and professional students. Topics covered include scientific method, confirmation, explanation, the nature of theories, scientific progress, science criticism, ethics in science, and science and religion.

PHIL 4487 Topics in Philosophy of Law: 3 semester hours
Same as CRIMIN 4487. Prerequisites: CRIMIN 1100 and three hours of philosophy, graduate standing, or consent of instructor. An intensive study of recent philosophical debate about such issues as the authority of law, legal equality and justice, legal responsibility, self-determination and privacy, and legal punishment. This is a variable content course and may be taken again for credit with consent of the instructor and the department chair.

PHIL 5000 Proseminar in Philosophy: 3 semester hours
Prerequisites: Graduate standing. Required of all entering Graduate Students in the Fall Semester of the first full year of residency. Topics vary. Other graduate students may take this course with the permission of the instructor and the director of Graduate Studies in Philosophy. Students will be expected to write papers, give presentations, and join in class discussion.

PHIL 5410 Seminar in Significant Figures in Philosophy: 3 semester hours
Prerequisites: Graduate standing. In depth study of the work of a single philosopher. The philosopher selected will be announced prior to registration. This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

PHIL 5478 Seminar in Philosophy of Mind: 3 semester hours
Prerequisites: Graduate standing. Topics may include functionalism and physicalism; representation and the nature of propositional attitudes such as belief, desire, and the various emotions; folk psychology and knowledge of other minds; introspection and knowledge of one's own mind; conscious and unconscious mental states and processes. This is a variable content course and may be taken again for credit with consent of the instructor and the department chair.

PHIL 5495 Thesis Research: 1-3 semester hours
Prerequisites: Graduate standing or consent of instructor. May be repeated once for credit with the consent of the instructor and the department chair.

PHIL 5521 Seminar in Analytic Philosophy: 3 semester hours
Prerequisites: Graduate standing or consent of instructor. Intensive study of selected topics, texts, or individuals in historical or contemporary analytic philosophy. Topics may include, but are not limited to, Frege semantics, Russell's theory of definite descriptions, logical positivism, Wittgenstein's philosophy of language, Quine on the analytic/synthetic distinction, Kripke's possible-world semantics, theories of propositions, the analysis of knowledge, contextualism in epistemology and language, relative semantics, epistemic two-dimensionalism, conceivability vs. possibility, three-dimensionalism vs. four-dimensionalism, presentism vs. eternalism, and applications of core concepts in other areas of philosophy. This is a variable content course and may be taken again for credit with consent of instructor and department chair.

PHIL 5530 Seminar in Social and Political Philosophy: 3 semester hours
An intensive study of contemporary philosophical debate about such issues as civil liberty, economic justice, political decision-making, and state authority. This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

PHIL 5533 Philosophy of Law: 3 semester hours
Same as CRIMIN 5533. Prerequisite: Graduate standing or consent of instructor. Examination of origins of law and the basis for legal obligation. Specific consideration of the justification of punishment, morality and law, and legal reasoning.

PHIL 5537 Seminar in Metaethics: 3 semester hours
Prerequisites: Graduate standing or consent of instructor. The course deals with questions regarding the foundations of ethics and the status of our ethical judgements about what's right and wrong, good and bad. The course will consider contemporary approaches to issues such as moral motivation, moral reasons, moral explanations, moral disagreement, moral knowledge, and moral supervenience, as well as various debates between realists and antirealists, and between cognitivists and expressivists.

PHIL 5538 Seminar in Ethical Theory: 3 semester hours
Prerequisites: Graduate standing or consent of the instructor. In this course we will seek to answer questions from normative ethics or metaethics, which may include: What do all morally wrong actions have in common? What does the word 'wrong' mean? How, if at all, can we verify moral judgements? Are any moral judgements valid for all societies? Do we always have good reason to be moral?

PHIL 5540 Seminar in Epistemology: 3 semester hours
Prerequisites: Graduate standing or consent of instructor. Close study of selected topics, texts, or individuals in epistemology. Topics may include (but are not limited to) theories of justification, naturalism in epistemology, and conceptions of knowledge. This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

PHIL 5545 Seminar in Metaphysics: 3 semester hours
Prerequisite: Graduate standing. Intensive study of a selected topic or problem area in metaphysics, e.g. mind-body identity, nature of the self, or conception of time. This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

PHIL 5551 Special Readings in Philosophy: 1-3 semester hours
Prerequisites: Graduate Standing, written consent of instructor. Independent study through readings, reports, and conferences. This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

PHIL 5560 Seminar in Logic: 3 semester hours
Prerequisites: Graduate standing. A focused study of topics in logic and/or its history. Representative topics include: Aristotelian logic, modal logic, the Godel incompleteness theorems, relevance logic, paraconsistent logic, free logic. This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

PHIL 5561 Graduate Formal Logic: 3 semester hours
Prerequisite: Graduate standing; permission of the department. A rigorous introduction to formal logic that includes sentential calculus, predicate logic, and completeness proofs. May be taken for graduate credit only with permission of the graduate advisor and chair.
PHIL 5579 Seminar in Philosophy of Cognitive Science: 3 semester hours
Prerequisites: Graduate standing. General topics include the role of computation in cognitive science, the merits of symbolic computation and connectionism, the aims and methods of artificial intelligence, and the relationship between cognitive science and our everyday understanding of people. Specific topics may include perception, reasoning, consciousness, language, emotion, and will. This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

PHIL 5580 Seminar in Philosophy of Science: 3 semester hours
Prerequisites: Graduate standing or consent of instructor. Focus is on recent issues and controversies. Topics may include: theories and observation, models of explanation, confirmation, realism and anti-realism, empiricism & naturalism, 'social construction' and feminist views of science. This is a variable content course and may be taken again with the consent of the instructor and the department chair.

Physics and Astronomy

General Information
The Department's faculty members have a diversity of interests and are active in various experimental and theoretical research areas. Students successfully completing this program will obtain an understanding of basic physics concepts, mathematical and problem-solving skills needed to solve basic physics problems, experimental skills in physics, astrophysics, or biophysics, and the ability to analyze and interpret scientific data and write scientific papers or reports.

Degrees and Areas of Concentration
The Department of Physics and Astronomy offers superb course work leading to the following baccalaureate degrees:

- B.A. in Physics
- B.S. in Physics with emphasis areas of
  - Astrophysics
  - Engineering Physics
  - General Physics
  - Biophysics
- B.A. or B.S. in Physics with Master's Level Coursework for Secondary Teacher Certification
- B.S. in Secondary Education with Emphasis in Physics.

The Department of Physics and Astronomy also offers the following graduate degree programs:

- Master of Science in Physics: The M.S. program combines a sound basis in the fundamental areas of classical and modern physics from both a theoretical and an applied perspective. The program is designed to enable students with undergraduate backgrounds in physics or other technical areas to further their professional development and maintain and improve their technical development. Students receiving a M.S. in physics will obtain an understanding of advanced physics concepts and mathematical and problem-solving skills needed to solve advanced physics problems. Students are strongly encouraged to be involved with faculty research programs that will develop experimental skills in physics, astrophysics, or biophysics as well as experience in analyzing and interpreting scientific data and the writing of scientific papers, reports, or theses. The writing of a thesis is optional.

- Ph.D. in Physics: The Ph.D. degree is offered in cooperation with the Missouri University of Science and Technology Physics Department. Students must satisfy the Missouri S&T admission standards, and the Missouri S&T Qualifying Exam in Physics is required of University of Missouri-St. Louis Ph.D. students. However, all course work and dissertation research may be completed while the student is in residence at UMSL. In addition to obtaining an understanding of advanced physics concepts and mathematical and problem-solving skills needed to solve advanced physics problems, Ph.D. students are expected to conduct independent scientific research in physics, astrophysics, or biophysics while learning to analyze and interpret scientific data and write scientific papers, reports, and a dissertation.

Fellowships and Scholarships
The Department of Physics and Astronomy offers a number of scholarships and awards.

- Physics & Astronomy Alumni Scholarship is available to new physics majors with outstanding ACT or SAT scores or continuing physics majors with outstanding academic records.
- The Richard D. Schwartz Scholarship is available to full-time junior/senior physics majors in good standing.
- The Don C. and Susan P. Winter Endowed Scholarship in Physics & Astronomy is available to physics majors with a minimum ACT score of 24 or who have a minimum GPA of 3.0.
- The Pierre Laclede/Physics & Astronomy Alumni Scholarship for undergraduate physics majors is available to physics majors who are also accepted into the Pierre Laclede Honors College.
- The Junior Alumni Award is awarded to physics majors who attain a 3.5 average or better in Physics 2111 and 2112. The award is given to the student in the semester they enroll in Physics 3200. Transfer students must take Physics 2112 on this campus to be eligible for this scholarship.
- The Senior Alumni Award is given to the outstanding physics major at the senior level with the highest GPA among the senior class.
- The Jeffrey Earl Award is given to an outstanding graduating senior every May.
- Undergraduate Research Awards are available for undergraduate physics majors who conduct a research project with a faculty mentor. Students receiving this award are required to enroll for at least one credit hour of Physics 3390 and present their research results at the campus Undergraduate Research Symposium in April.
- Teaching Assistantships with stipends may also be available to qualifying students to prepare them for the independent effort required in industry or graduate school.
- NASA Research Internships for the summer and academic year are available for students interested in astrophysics through the NASA/Missouri Space Grant Consortium.

Departmental Honors
The Department of Physics & Astronomy will award departmental honors to those B.A. and B.S. degree candidates in Physics with an overall grade point average of 3.2 or better. They must also successfully complete at least 3 credits of PHYS 3390 (Research).

Career Outlook
Many of our students have been successful in subsequent graduate studies in astrophysics and meteorology, as well as physics. Our alumni have pursued graduate studies and earned doctorate degrees
at institutions such as Cornell University, MIT, University of Wisconsin, University of Chicago and Washington University. Students who have elected for careers in industry are now working in a variety of settings for such firms as Emerson Electric, Hewlett Packard, IBM, Boeing and MEMC Electronic Materials (now SunEdison). Several former students are currently teaching physics in high schools around the St. Louis area.

**Degrees**

Physics, Bachelor of Arts (p. 570)

Physics, Bachelor of Science

  **Emphasis Areas:**
  - Astrophysics (p. 571)
  - Engineering Physics (p. 575)
  - General Physics (p. 576)
  - Biophysics (p. 573)

Physics, Master of Science (p. 579)

Physics, Doctor of Philosophy (p. 579)

**Minor**

Physics (p. 578)

**Other Affiliated Programs**

B.S. in Secondary Education with Emphasis in Physics. (p. 614)

**Astronomy Courses**

**ASTRON 1001 Cosmic Evolution Introductory Astronomy (MOTR ASTR 100): 3 semester hours**

This course presents an overview of astronomy from the planets to the Big Bang. Topics include the celestial motions, planets and the formation of the solar system, stars and stellar evolution, galaxies, and cosmology. Students will be introduced to the latest discoveries and how they affect our understanding of the universe.

**ASTRON 1001A Cosmic Evolution/Introduction Astronomy (MOTR ASTR 100): 3 semester hours**

Overview of astronomy, from the planets to the Big Bang. Topics include the celestial motions, planets and the formation of the solar system, stars and stellar evolution, galaxies, and cosmology. Students will be introduced to the latest discoveries and how they affect our understanding of the universe. Three classroom hours per week. Same as ASTRON 1001 without the laboratory.

**ASTRON 1001L Introductory Astronomy Laboratory: 1 semester hour**

Prerequisite: ASTRON 1001 (may be taken concurrently). An introductory Astronomy laboratory to accompany ASTRON 1001. The format is a 2-hour laboratory session per week to enhance lecture material.

**ASTRON 1011 Planets and Life in the Universe: 3 semester hours**

Man's concept of the solar system from Stonehenge to Einstein; geology and meteorology of the planets of our solar system, with particular attention to results from the space program; exobiology--study of the possibilities of life on other worlds and the best method of communicating with it. Three lecture hours per week.

**ASTRON 1012 The Violent Universe and the New Astronomy: 3 semester hours**

A nontechnical course focusing on recent results which larger telescopes and the space program have made available. Pulsars, x-ray stars, and black holes; radio astronomy, our galaxy, and interstellar molecules; exploding galaxies and quasars; origin of the expanding universe. Three lecture hours and one observing session per week.

**ASTRON 1050 Introduction to Astronomy I (MOTR ASTR 100): 3 semester hours**

Prerequisites: MATH 1030 and MATH 1035. A survey of the history of astronomy from the ancient times to present. Theories for the formation and evolution of the solar system and the general features of the solar system and planetary motions are discussed. The physical concept of gravity is presented. The detailed properties of the planets, comets, and asteroids are reviewed, concentrating on recent results from space missions.

**ASTRON 1051 Introduction to Astronomy II: 3 semester hours**

Prerequisites: MATH 1030 and MATH 1035. A survey of astronomy beyond the solar system. Topics include stars and stellar evolution, neutron stars, and black holes. The physical concept of light and the design of telescopes is discussed in detail. The structure of the Milky Way Galaxy and the large scale structure of the universe are explored. Dark matter, quasars, and active galactic nuclei are discussed in the context of theories for the formation and evolution of the universe. Course does not need to be taken in sequence with ASTRON 1050.

**ASTRON 4301 Astrophysics: 3 semester hours**

Prerequisite: PHYSICS 3231 or consent of instructor. A moderately technical introduction to astrophysics. Topics will include: physics of stellar interiors and atmospheres; interpretation of stellar spectra; stellar evolution; radio astronomy; and cosmology.

**ASTRON 4322 Observational Astronomy: 4 semester hours**

Prerequisites: ASTRON 1050, ASTRON 1051 and PHYSICS 3231. Tools of the astronomer: telescopes, spectroscopy, photoelectric photometry. Students will work on a number of projects which will enable them to develop expertise in obtaining, reducing, and analyzing astronomical observations. Student night observing will be an important part of the course. This course is primarily for persons who are astronomy or physics majors or who have some equivalent background.

**ASTRON 5322 Intermediate Observational Astronomy: 4 semester hours**

Prerequisites: ASTRON 1050, ASTRON 1051, and PHYSICS 3231; or graduate standing. This course covers the tools of the astronomer: telescopes, spectroscopy, photoelectric photometry. Students will work on a number of intermediate projects, which will enable them to develop expertise in obtaining, reducing, and analyzing astronomical observations. Student night observing will be an important part of this course. This course is primarily for astronomy or physics majors. Students may not receive credit for both ASTRON 4322 and ASTRON 5322.

**Atmospheric Science Courses**

**ATM SCI 1001 Elementary Meteorology: 3 semester hours**

Prerequisites: MATH 1020 or equivalent. This course covers atmospheric phenomena, weather, and climate. Topics include temperature, pressure, and moisture distributions in the atmosphere and dynamical effects such as radiation, stability, storms, and general circulation.
Physics Courses

**PHYSICS 1001 How Things Work (MOTR PHYS 100): 3 semester hours**
Can baseball players hit home runs more easily when the weather is hot and humid? This course provides a practical introduction to understanding common life experiences by using physical intuition and basic ideas of physics. Powerful scientific principles are demonstrated through topics ranging from airplane wings to compact disk players, from lightning strikes to lasers.

**PHYSICS 1011 Basic Physics I: 3 semester hours**
Prerequisites: MATH 1030 and MATH 1035 required, MATH 1100 or MATH 1800 strongly recommended, concurrent enrollment in PHYSICS 1011L recommended. This course is specifically designed for students in health and life sciences covering the topics in classical mechanics such as kinematics, Newton's laws, energy, momentum and oscillations. This course will not fulfill the PHYSICS 2111 requirement for physics, chemistry, and engineering majors.

**PHYSICS 1011L Basic Physics I Laboratory: 1 semester hour**
Prerequisite: PHYSICS 1011 (may be taken concurrently). This laboratory course accompanies PHYSICS 1011, which is specifically designed for students in health and life sciences covering topics in classical mechanics such as kinematics, Newton's laws, energy, momentum and oscillations.

**PHYSICS 1012 Basic Physics II: 3 semester hours**
Prerequisites: PHYSICS 1011, concurrent enrollment in PHYSICS 1012L recommended. This continuation of PHYSICS 1011 is specifically designed for students in health and life sciences covering electricity, magnetism, light, optics and waves. This course will not fulfill the PHYSICS 2112 requirement for physics, chemistry, and engineering majors.

**PHYSICS 1012L Basic Physics II Laboratory: 1 semester hour**
Prerequisites: PHYSICS 1012 (may be taken concurrently). This laboratory course accompanies PHYSICS 1012, which is specifically designed for students in health and life sciences, covering electricity, magnetism, light, optics and waves.

**PHYSICS 1099 Windows on Physics: 1 semester hour**
A seminar designed to introduce physics majors to research areas in physics and physics-related fields in the Department of Physics and Astronomy. In addition to fundamental areas of physics, the areas of astrophysics, biophysics, materials science, and nanotechnology will be included. Career opportunities for students with physics degrees will be discussed and the physics curriculum will be reviewed. The course meets weekly and is required of all physics majors and minors who are transfer students.

**PHYSICS 2010 Introduction to Inquiry Approaches to STEM Education (STEP I): 1 semester hour**
Same as CHEM 2010, BIOL 2010, MATH 2010, and SEC ED 2010. Prerequisites: Concurrent enrollment BIOL 1821, BIOL 1831, CHEM 1111, CHEM 1121, PHYSICS 2111, PHYSICS 2112, MATH 1800, or MATH 1900 or have a declared STEM major. Students who want to explore teaching careers become familiar with lesson plan development by writing, teaching and observing lessons in a local school class. Students build and practice inquiry-based lesson design skills and become familiar with and practice classroom management in the school setting. As a result of the STEP I experiences students should be able to decide whether to continue to explore teaching as a career and ultimately finishing the remainder of the WE TEACH MO curriculum leading to teacher certification. The classroom observations and teaching represent a major field component and requires at least one two hour block of free time during the school day once a week.

**PHYSICS 2011 Designing Inquiry-Based STEM Experiences (STEP II): 1 semester hour**

**PHYSICS 2111 Basic Physics: Mechanics and Heat: 4 semester hours**
Prerequisites: MATH 1900 (may be taken concurrently). This course introduces students to the phenomena, concepts, and laws of mechanics and heat for physics majors and students in other departments. Three classroom hours and one hour discussion per week.

**PHYSICS 2111L Mechanics and Heat Laboratory: 1 semester hour**
Prerequisites: PHYSICS 2111 (may be taken concurrently). This laboratory course accompanies PHYSICS 2111, which covers the phenomena, concepts, and laws of mechanics and heat.
PHYSICS 2112 Physics: Electricity, Magnetism, and Optics: 4 semester hours
Prerequisites: PHYSICS 2111 and MATH 2000 (MATH 2000 may be taken concurrently). This course provides a phenomenological introduction to the concepts and laws of electricity and magnetism, electromagnetic waves, optics and electrical circuits for physics majors and students in other departments. Three hours of lecture and one hour of discussion per week.

PHYSICS 2112L Electricity, Magnetism, and Optics Laboratory: 1 semester hour
Prerequisites: PHYSICS 2112 (may be taken concurrently). This laboratory course accompanies PHYSICS 2112, which covers the phenomena, concepts and laws of electricity and magnetism, electromagnetic waves, optics and electrical circuits.

PHYSICS 3200 Mathematical Methods of Theoretical Physics: 3 semester hours
Prerequisites: PHYSICS 2112 and MATH 2000. Mathematical techniques specifically used in the study of mechanics, electricity, magnetism, and quantum physics are developed in the context of various physical problems. Course includes the topics of vector calculus, coordinate systems, the Laplace equation and its solutions, elementary Fourier analysis, & complex variables. Applications to electrostatics, mechanics, and fluid dynamics are emphasized. Three hours of lecture per week.

PHYSICS 3221 Mechanics: 3 semester hours
Prerequisites: PHYSICS 3200 and MATH 2020 (MATH 2020 may be taken concurrently). Advanced course covering single and many particle dynamics, rigid-body dynamics, and oscillations. Variational principles and Hamiltonian formulations of mechanics are covered. Three hours of lecture per week.

PHYSICS 3223 Electricity and Magnetism: 3 semester hours
Prerequisites: PHYSICS 3200 and MATH 2020 (MATH 2020 may be taken concurrently). Advanced course covering the rigorous development, from basic laws, of Maxwell's equations for electromagnetic fields along with applications of these equations. Topics covered are electrostatics, mechanics, and fluid dynamics. Three hours of lecture per week.

PHYSICS 3231 Introduction to Modern Physics I: 3 semester hours
Prerequisites: PHYSICS 2111, PHYSICS 2112, and MATH 2020 (MATH 2020 may be taken concurrently) and PHYSICS 3200 strongly recommended. Photons and the wave nature of particles, wave mechanics, Schrödinger equation, with applications to atomic physics; and radiation; the physics of solids; elementary particles; special relativity; health physics. Three hours of lecture per week.

PHYSICS 3281 Directed Readings in Physics: 1-5 semester hours
Prerequisite: Consent of instructor. An independent study of special topics in physics. A paper may be required on an approved topic. Topics must be substantially different. Hours arranged.

PHYSICS 3390 Research: 1-10 semester hours
Prerequisite: Consent of department. Independent physics research projects arranged between student and instructor. Hours arranged.

PHYSICS 3404 Introduction to Nanotechnology: 3 semester hours
Prerequisites: PHYSICS 3231. This course presents a broad overview of the field of nanotechnology with an emphasis on physical phenomena involved with three main parts: Nanoscale Fabrication and Characterization (nano-lithography, self-assembly and self-organization, scanning probe microscopes); Nanomaterials and Nanostructures (low-dimensional materials, graphene, carbon nanotubes, quantum dots, nano-composites, etc); Select Applications (nanoscale and molecular electronics, nano-magnetism, nano-photronics, bio-inspired nano-materials). The goal is to lay a foundation for a research career in the rapidly growing area of nanotechnology and to enhance student's competitiveness in the job market.

PHYSICS 4305 Bayesian Data Analysis for the Sciences: 3 semester hours
Prerequisites: Consent of instructor. This is a cross-disciplinary course in two parts. Part one covers Bayesian inference as applied to data analysis in general, with a special focus on the mathematics of model-selection in the physical and life sciences. Part two concentrates specifically on the Bayesian use of log-probability (i.e. information) measures to track order-disorder transitions in thermodynamics, and to track the evolution of sub-system correlations (via both digital and analog means) in a wide variety of complex systems. Expect weekly empirical observation exercises, and opportunities for asynchronous as well as synchronous collaboration.

PHYSICS 4306 Nanoscience Practicals: 1-3 semester hours
Studies of Nanoscience characterization, synthesis, modeling techniques designed for clients of these tools, as well as for technical users interested in a current overview. Course consists of a set of 1/3 semester modules. Check with the instructor on more specialized modules, (e.g. on materials microscopy), if interested. Each module will cover instrumentation, current applications, weaknesses, and will involve lab visits for hands-on experience, weekly web interaction and classroom hours.

PHYSICS 4310 Modern Electronics: 3 semester hours
Prerequisite: PHYSICS 2112. This course is an integrated recitation/laboratory study of modern analog and digital electronics with emphasis on integrated circuits, which consist of active and passive electrical circuit elements integrated on a single semiconductor substrate. This course includes the study of the properties of the various specialized electronic devices that are constructed with integrated circuits along with a study of the various circuit elements. This course has four contact hours of lecture/laboratory per week.

PHYSICS 4311 Advanced Physics Laboratory I: 3 semester hours
Prerequisite: Advanced standing with at least nine completed hours of Physics at or above the 3000 level. Physics majors are introduced to the experimental techniques used in research. A student will choose and do several special problems during the semester. Six hours laboratory per week.

PHYSICS 4323 Modern Optics: 3 semester hours
Prerequisite: PHYSICS 3223. A study of modern optics including diffraction theory, polarization, light propagation in solids, quantum optics, and coherence.

PHYSICS 4331 Intro to Quantum Mechanics: 3 semester hours
Prerequisites: PHYSICS 3200 and PHYSICS 3231. Photons and the wave nature of particles; wave mechanics, Schroedinger equation, operator and matrix formulations, and Dirac notation; applications to single particle systems, atomic physics, and spectroscopy.

PHYSICS 4341 Thermal and Statistical Physics: 3 semester hours
Prerequisites: MATH 2000 and PHYSICS 3231. Introduction to statistical mechanics, classical thermodynamics, and kinetic theory.
PHYSICS 4343 Selected Topics in Physics I: 3 semester hours
Prerequisites: PHYSICS 3221, PHYSICS 3223, PHYSICS 3231, PHYSICS 4341. Topics include special phenomena for research areas such as physics of waves, biophysics, nonlinear physics, geophysical fluid dynamics and the atmospheric sciences treated by methods of advanced mechanics, electromagnetism, statistical mechanics, thermodynamics and quantum mechanics. Three hours of lecture per week.

PHYSICS 4347 Introduction to Biophysics: 3 semester hours
Prerequisites: PHYSICS 3231, BIOL 1821, and BIOL 1831; or permission of instructor. This course is an introduction to the application of physical principles to problems in biology. The course may cover topics such as molecular biophysics (e.g., ion transport, protein folding, molecular motors), collective dynamics and self-assembly of biological systems, nonlinear dynamics and electrophysiology in the heart and brain, and physics-based approaches to modeling gene networks and evolutionary dynamics. Students will complete a final project investigating a particular area of biophysics. Students may not receive credit for both PHYSICS 4347 and PHYSICS 5347.

PHYSICS 4350 Computational Physics: 3 semester hours
Prerequisites: PHYSICS 3221, PHYSICS 3223, PHYSICS 4331 and MATH 2450. This course explains how to solve physics-based problems using computational techniques. Mechanics, electrodynamics, and quantum physics problems are solved by (1) numerically solving ordinary and partial differential equations, (2) using Fourier analysis, and (3) solving eigenvalue problems.

PHYSICS 4351 Elementary Solid State Physics: 3 semester hours
Prerequisites: PHYSICS 431. Theoretical and experimental aspects of solid state physics, including one-dimensional band theory of solids; electron emission from metals and semiconductors; electrical and thermal conductivity of solids.

PHYSICS 4353 Physics of Fluids: 3 semester hours
Prerequisites: PHYSICS 3221, PHYSICS 3223, and PHYSICS 4341, or consent of instructor. Dynamical theory of gases and liquids. Course covers the mathematical development of physical fluid dynamics with contemporary applications.

PHYSICS 4358 Introduction to Global Geodynamics: 3 semester hours
Prerequisites: PHYSICS 3221 and PHYSICS 3223. This advanced course covers the development, from basic laws, of equations describing the many geodynamic processes underpinning geological modeling and geological data. Topics covered are paleomagnetism, plate tectonics, viscoelastic media, heat transfer, gravity, fluid mechanics, rheology, faulting, and geochronology.

PHYSICS 4370 Relativity and Cosmology: 3 semester hours
Prerequisites: PHYSICS 3221, PHYSICS 3223 and PHYSICS 3231. An introduction to Einstein’s general theory of relativity. Topics will include special relativity in the formalism of Minkowski’s four dimensional space-time, Principle of Equivalence, metric description of curved space, geodesic equation, Einstein Field Equation, black holes, and cosmology.

PHYSICS 4381 Directed Readings in Physics: 1-10 semester hours
Prerequisite: Consent of instructor. An independent study of special topics in physics for senior undergraduates or graduate students.

PHYSICS 5306 Advanced Nanoscience Practicals: 1-3 semester hours
Prerequisites: Graduate standing in physics or consent of instructor. Advanced studies of Nanoscience characterization, synthesis, and modeling techniques designed for clients of these tools, as well as for technical users interested in a current overview. The course consists of a set of 1/3 semester modules. Check with the instructor on more specialized modules, (e.g, on materials microscopy), if interested. Each module will cover instrumentation, current applications, and weaknesses and will involve lab visits for hands-on experience, weekly web interaction and classroom hours.

PHYSICS 5345 Nonlinear Dynamics and Stochastic Processes: 3 semester hours
Prerequisites: PHYSICS 3221 and PHYSICS 4341 and consent of instructor. Dynamical systems; theory of oscillations; introduction to bifurcation theory and chaos in dissipative systems with applications in physics and biology; introduction to stochastic processes with applications in physics, chemistry and biology; dynamics of nonlinear systems perturbed by noise; noise-induced phase transitions; linear and nonlinear time series analysis. Three classroom hours per week.

PHYSICS 5347 Intermediate Biophysics: 3 semester hours
Prerequisites: Graduate standing, PHYSICS 3231, BIOL 1821 and BIOL 1831 or permission of instructor. This course is applies physical principles to problems in biology. Topics may include molecular biophysics (e.g., ion transport, protein folding, molecular motors), collective dynamics and self-assembly of biological systems, nonlinear dynamics and electrophysiology in the heart and brain, and physics-based approaches to modeling gene networks and evolutionary dynamics. Students will complete a final project investigating a particular area of biophysics. Students will be expected to design projects containing a significant component of original research. Students may not receive credit for both PHYSICS 4347 and PHYSICS 5347.

PHYSICS 5350 Intermediate Computational Physics: 3 semester hours
Prerequisites: PHYSICS 3221, PHYSICS 3223, PHYSICS 4331 and MATH 2450; or graduate standing. This course explains how to solve physics-based, intermediate-level problems using computational techniques. Mechanics, electrodynamics, and quantum physics problems are solved by (1) numerically solving ordinary and partial differential equations, (2) using Fourier analysis, and (3) solving eigenvalue problems. Students may not receive credit for both PHYSICS 4350 and PHYSICS 5350.

PHYSICS 5353 Intermediate Physics of Fluids: 3 semester hours
Prerequisites: PHYSICS 3221, PHYSICS 3223, and PHYSICS 4341; or graduate standing. This course covers intermediate level dynamical theory of gases and liquids. This course examines mathematical fluid dynamics along with some contemporary applications. Students may not receive credit for both PHYSICS 4353 and PHYSICS 5353.

PHYSICS 5357 Fundamental Particles and Forces: 3 semester hours
Prerequisites: PHYSICS 3223, PHYSICS 3231, and PHYSICS 4331, may be taken concurrently Introduction to nuclear and particle physics. Nuclear phenomenology and models; high energy particle accelerators and detectors; phenomenology of strong, electromagnetic and weak interactions; symmetry principles; quark compositions of strongly interacting baryons and mesons; gauge theories and the standard model of particle interactions; grand unification.
PHYSICS 5358 Intermediate Global Geodynamics: 3 semester hours
Prerequisites: Graduate standing, PHYSICS 3221 and PHYSICS 3223 or permission of the Instructor. This course intermediate course covers the development of equations describing the many geodynamic processes underpinning geological modeling and geological data. Topics covered may include paleomagnetism, plate tectonics, viscoelastic media, heat transfer, gravity, fluid mechanics, rheology, faulting, and geochronology. Students will complete a final project investigating a particular area of geodynamics. Students will be expected to develop a more advanced project. Students may not receive credit for both PHYSICS 4538 and PHYSICS 5358.

PHYSICS 5370 Intermediate Relativity and Cosmology: 3 semester hours
Prerequisites: PHYSICS 3221, PHYSICS 3223, and PHYSICS 3231; or graduate standing. Topics will include special relativity in the formalism of Minkowski's four dimensional space-time, Principle of Equivalence, geodesic equation, Einstein Field Equation, black holes, and cosmology. Differential geometry from metric description to Riemann curvature tensor will be studied.

PHYSICS 5402 Introduction to Mathematical Physics: 3 semester hours
Prerequisites: Graduate standing in physics or consent of instructor. A course covering mathematical techniques as applied in advanced theoretical physics including generalized vector spaces and their dual spaces, linear operators and functionals, generalized functions, spectral decomposition of operators, tensor analysis, and complex variables. Three hours of lecture per week.

PHYSICS 5403 Principles of Mathematical Physics: 3 semester hours
Prerequisites: Graduate standing in physics or consent of instructor. Boundary value problems; Strum-Liouville theory and orthogonal functions; Green's function techniques; and introduction to group theory with emphasis on representations of Lie Algebras. Three hours of lecture per week.

PHYSICS 6300 Master's Thesis: 3 semester hours
Prerequisite: Consent of instructor. Thesis work under the supervision of a faculty member. The course is designed for those students intending to present a thesis as part of their M.S. program. Students who do not write a thesis cannot apply PHYSICS 6300 to a degree. This course transfers to the Cooperative Ph.D. program as three research credits.

PHYSICS 6400 Special Problems: 1-5 semester hours
Must have faculty mentor and approval of Department Chairperson. A study of special topics in physics for graduate students.

PHYSICS 6401 Special Topics: 1-4 semester hours
Prerequisite: Consent of instructor. This course is designed to give the department an opportunity to test a new course.

PHYSICS 6409 Theoretical Mechanics I: 3 semester hours
Prerequisite: PHYSICS 3221. Classical mechanics, methods of Newton, Lagrange, and Hamilton applied to motion of particles and rigid bodies, elasticity, hydrodynamics.

PHYSICS 6410 Seminar: 1-3 semester hours
Prerequisite: Approval of Department Chair. Discussion of current topics.

PHYSICS 6411 Electrodynamics I: 3 semester hours
Prerequisite: PHYSICS 3223. A rigorous development of the fundamentals of electromagnetic fields and waves. Electrostatics, magnetostatics, Maxwell's equations, Green's functions, boundary value problems, multipoles, conservation laws.

PHYSICS 6413 Statistical Mechanics: 3 semester hours
Prerequisite: PHYSICS 4331, PHYSICS 4341. A study of statistical ensembles; Maxwell-Boltzmann, Fermi-Dirac and Einstein-Bose distribution laws, application to some physical systems.

PHYSICS 6423 Electrodynamics II: 3 semester hours

PHYSICS 6461 Quantum Mechanics I: 3 semester hours
Prerequisite: PHYSICS 4331. A study of the Schroedinger wave equation, operators and matrices, perturbation theory, collision and scattering problems.

PHYSICS 6463 Quantum Mechanics II: 3 semester hours
Prerequisite: PHYSICS 6461. Continuation of PHYSICS 6461. To include such topics as Pauli Spin-Operator Theory, classification of atomic states, introduction to field quantization, and Dirac Electron Theory.

PHYSICS 6481 Physics of Solid State: 3 semester hours
Prerequisite: PHYSICS 6461. Crystal symmetry, point and space groups, lattice vibrations, phonons, one-electron model, Hartee-Fock approximation, elementary energy band theory, transport properties, the Boltzmann equation, introduction to superconductivity, semiconductors and magnetism.

PHYSICS 6490 Research: 1-10 semester hours
Prerequisite: Must have a faculty mentor and approval of the department chair. Investigations of an advanced nature leading to the preparation of a thesis or dissertation.

PHYSICS 6495 Continuous Registration: 1-6 semester hours
Doctoral candidates who have completed all requirements for the degree except the dissertation, and are away from the campus must continue to enroll for at least one hour of credit each registration period until the degree is completed. Failure to do so may invalidate the candidacy.

Political Science

General Information

Undergraduate Degrees and Areas of Concentration

The political science department offers undergraduate work leading to the B.A. degree in political science, B.A. degree in international relations, B.S. degree in public policy and administration, and, in cooperation with the College of Education, the B.A. in political science with teacher certification and the B.S. in education with an emphasis in social studies. (See College of Education section in this Bulletin for details.) Minors in political science are available to students who are majoring in another discipline and who have a special interest in law, government, politics, nonprofit, international relations, and public policy.

Principal areas of concentration include urban politics, American politics and behavior, international politics, comparative politics, public policy and administration, public law, and political theory. In many courses, emphasis is placed on the ways in which public policies are developed and administered. In addition to formal course work, internships are available in which the student can relate classroom learning to practical field experience.
Graduate Degrees

The political science department also offers graduate courses leading to the M.A. and Ph.D. in political science. The M.A. program in political science offers advanced education for those seeking careers in government, business, secondary education, community, or not-for-profit agencies. The principal foci of the 33-hour program are public administration and public policy analysis/evaluation in the local, state, national, and international areas. The flexibility of the general master's degree allows for individualized programs in urban politics, prelegal education, American national government, comparative politics, international relations, and political theory.

The Ph.D. program in political science emphasizes the study of theoretic, analytic, and substantive approaches to public policy. Core courses include research methods, normative and empirical theory, and policy processes and institutions. Doctoral candidates, in consultation with the faculty, develop a policy concentration, which can be interdisciplinary. Internships, when appropriate, may be a component. All successful doctoral candidates must complete a dissertation, which makes a significant contribution to knowledge in the field.

Most graduate classes are scheduled so those employed outside the university can participate in the programs on a part-time basis.

Special Interdisciplinary Degree

The Department of Political Science also offers a master's degree in public policy administration (MPPA) in cooperation with the Department of Economics in the College of Arts and Sciences and the College of Business Administration.

Cooperative Programs

Political science students may also study abroad, or obtain a Certificate in International Studies, European Studies, African Studies, East Asian Studies, Latin American Studies, Gender Studies, or Writing, in conjunction with their political science major. See Certificate Programs in this Bulletin.

Research in political science is encouraged for students at all levels. Assistance is available at UMSL's Public Policy Research Centers, International Studies and Programs. The department's membership in the Interuniversity Consortium for Political and Social Research provides access to a wide range of survey data on local-state-national, comparative, and international politics. In addition, extensive research opportunities are available within the metropolitan St. Louis area. Scholarships are available for qualified students; details can be obtained from the department office.

Faculty

Political science faculty are nationally known scholars in their respective fields, dedicated to high-quality teaching and education. Department faculty members have received distinctions such as the Curators' Research Award, Curators' Distinguished Teaching Professor Award, Presidential Award for Research and Creativity, Chancellor's Award for Research and Creativity, Chancellor's Award for Excellence in Teaching, Governor's Teaching Awards, Burlington Northern Faculty Achievement Award, Emerson Electric Excellence in Teaching Award and E. Desmond Lee Endowed Professor Award. They have received research grants from such prestigious agencies as the John F. Kennedy Library, the Ford Foundation, the MacArthur Foundation, the National Science Foundation, the German Marshall Fund, the United States Department of Education, the Fulbright Program, and the United States Institute for Peace. The faculty has published its research in more than 80 books and 400 articles in scholarly journals and is devoted to using its research findings to improve teaching.

In addition to helping students become more knowledgeable about politics and public policy, political science course work provides rich opportunities for students to develop a variety of practical skills--such as information-gathering and processing, analysis, research, decision making and oral and written communication--that are transferable to many career paths and job settings after graduation.

Undergraduate Degree Programs

Political Science BA (p. 580)
International Relations BA (p. 481)
Public Policy Administration BSPPA (p. 593)

• Public Administration Emphasis (p. 594)
• Public Policy Emphasis (p. 595)

Graduate Degree Programs

Political Science MA (p. 582)
Public Policy Administration MPPA (p. 597)

• Individualized Emphasis (p. 598)
• Local Government Management Emphasis (p. 599)
• Nonprofit Organization Management Emphasis (p. 601)
• Policy Research and Analysis Emphasis (p. 602)

Political Science PhD (p. 583)

2+3 Programs

Political Science BA/MA Dual Degree Program (p. 581)
Public Policy Administration BSPPA/MPPA Dual Degree Program (p. 596)

Minors

Political Science Minor (p. 583)
American Politics Minor (p. 316)
International and Comparative Politics Minor (p. 480)
International Relations Minor (p. 483)
Nonprofit Administration Minor (p. 538)
Public Administration Minor (p. 592)
Public Law Minor (p. 592)
Public Policy Minor (p. 603)
Urban Politics Minor (p. 649)
Women and Politics Minor (p. 463)

Graduate Certificates

Nonprofit Organization Management and Leadership Graduate Certificate (p. 538)
Local Government Management Graduate Certificate (p. 488)
Policy and Program Evaluation Graduate Certificate (p. 579)

Political Science Courses

POL SCI 1100 Introduction to American Politics (MOTR POSC 101): 3 semester hours
Introduction to basic concepts of government and politics with special reference to the United States, but including comparative material from other systems. Course fulfills the state requirement.
POL SCI 1200 Foundations of Law: An Introduction to Legal Studies: 3 semester hours
Same as CRIM 1200. As a broad liberal-arts approach to the study of law, this course is designed to familiarize students with legal ideas, legal reasoning, and legal processes. It also provides comparative and historical perspectives on law that will help explain legal diversity and legal change. Finally, it offers opportunities to explore some of the persistent issues in law and legal theory: for example, issues about the sources of law, the responsibilities of the legal profession, or the relative merits of the adversary system.

POL SCI 1450 Labor, Work, and Politics: 3 semester hours
This course explores the evolution of work in the United States, and how labor unions shaped and influenced society, politics, and the workplace. This course examines the role of workers, (past present and future) unions’ organizational structure, the role of collective bargaining, labor and the media, and labor's political and social campaigns.

POL SCI 1500 Introduction to Comparative Politics (MOTR POSC 202): 3 semester hours
This course introduces students to western and non-western systems. It examines similarities and differences in the basic political ideologies, structures, economies, social institutions, and governmental processes of developed and developing countries. It also provides frameworks for understanding the cultures of the world that are the basis for formal economic and political institutions. In addition, the course examines the role of non-state institutions, including trans-national ones, in shaping national policies. It uses case studies from Africa, Asia, Latin America, as well as Europe, to enhance student understanding of comparative politics. This course fulfills the cultural diversity requirement.

POL SCI 1800 World Politics (MOTR POSC 201): 3 semester hours
An introduction to the field of international relations, covering such topics as nationalism, power, foreign policymaking, diplomacy, war, terrorism, arms control and disarmament, economic interdependence, the regulation of conflict, and other aspects of politics among nations.

POL SCI 1820 Global Issues: 3 semester hours
A freshman and sophomore level course designed to introduce students to a range of global concerns, including population, hunger, trade, energy, and the environment. The worldwide implications of these and other problems will be considered, as well as their effects on local communities such as st louis.

POL SCI 1901 Capitalism in American History: 3 semester hours
Same as HIST 1901. This course offers students the opportunity to approach America’s political economy with tools different from those offered by more quantitative economic constructs. Students will analyze market processes through a three dimensional approach that focuses not just on market competition but also on relationships of command—the exercise of power in firms, among nations, and between social groups—and on processes of historical change from the late colonial era through the twentieth century.

POL SCI 2102 Introduction to Gender Studies: 3 semester hours
Same as SOC WK 2102, SOC 2102, GS 2102, HIST 2102. This core class is required for all Gender Studies Certificate earners. This class introduces students to cultural, political and historical issues that shape gender. Through a variety of disciplinary perspectives in the humanities, social sciences, and natural sciences, the course familiarizes students with diverse female and male experiences and gendered power relationships.

POL SCI 2260 Law, Politics and Society: 3 semester hours
Prerequisites: POL SCI 1100 or POL SCI 1200 or consent of instructor. This course examines the ways in which law in America connects with politics and society. The course will cover the litigation process, access to the courts, how and why individuals and groups bring litigation to pursue political and policy goals, and how lawyers, judges and other political actors use law to solve policy problems. Attention will be placed on current legal policy issues facing American society.

POL SCI 2280 Judicial Politics: 3 semester hours
Prerequisites: POL SCI 1100 or POL SCI 1200 or consent of instructor. This course is an examination of the American state and federal legal systems. Topics examined in this course include an analysis of the structure, organization and foundation of courts. Emphasis will be placed on the role of judges, attorneys, litigants, and interest groups in the judicial system. The objective of the course is to evaluate courts as political institutions and analyze the policy-making role of judges.

POL SCI 2290 Gender and the Law: 3 semester hours
Same as GS 2290. This course examines the ways in which laws and interpretations of the laws affect gender equality in the United States. Emphasizing how traditional roles impact both women and men historically and currently, the course highlights major pieces of legislation and court rulings related to employment, economics, education, sexual harassment, pornography, rape, reproductive rights, and domestic relations. The course stresses the impact of federal and state institutions and non-governmental influences on equality. It also addresses gender representation in the legal profession and its effect on judicial decisions. (This course satisfies State requirements in American History and Government).

POL SCI 2300 State Politics: 3 semester hours
Prerequisite: POL SCI 1100 or consent of instructor. An examination of contemporary state politics in the U.S. Covers social, economic and political determinants of policies; federal-state-local relations, elections, interest groups and participation; executive legislative and judicial institutions and processes, policies and their impact.

POL SCI 2320 African Americans and the Political System: 3 semester hours
Prerequisites: POL SCI 1100 or consent of instructor. Examination of the status of African Americans in the context of the American political system. The course will focus on a number of issues, including: attitudes of various publics toward racial concerns; nature of problems in specific policy areas (e.g., unemployment, school desegregation, housing, poverty); representation of African Americans in governmental institutions and the private sector; and the role of African American leadership and civil rights groups in the political process. Course fulfills the state requirement.

POL SCI 2330 The American Presidency: 3 semester hours
Prerequisite: POL SCI 1100 or consent of instructor. This course studies the constitutional, political, legislative, and administrative roles played by the American chief executive in the development of public policy.

POL SCI 2331 Congressional Politics: 3 semester hours
Prerequisites: POL SCI 1100 or consent of instructor. This course examines the Congress of the United States, its history and evolution, its contemporary politics, and its role in the national policy-making process. Topics may include candidate recruitment, campaigns and elections, representation, committees, legislative leadership, roles and norms, voting alignments, lobbyists and interest groups, oversight of administration, and House-Senate comparisons. The course may also introduce students to the role of Congress in foreign policy, economic policy, and social-welfare policy.
**POL SCI 2350 Introduction to Urban Politics: 3 semester hours**
Prerequisite: POL SCI 1100 or consent of instructor. Examination of structure and process of politics in the urban community, with emphasis on their relationships to community power structures.

**POL SCI 2370 The Politics of Identity and Social Justice: 3 semester hours**
Examines the meaning of social justice at the intersections of identities linked to race, ethnicity, class, gender, sexuality, age, ability, religion, and citizenship in the United States. We will dissect how the social construction of ‘difference’ within systems of power has resulted in social policies that marginalize some groups more than others. We will also discuss how oppression linked to delineations of difference can be challenged and socially reconstructed, and ultimately used as a source of political empowerment.

**POL SCI 2380 The Politics of Gender in the United States: 3 semester hours**
Same As GS 2380. Prerequisites: POL SCI 1100 or consent of instructor. This course examines the role of gender in political institutions, practices and policy in the United States, past for political equality, the relationship between gender and political participation, vote choice, and public opinion, and how legislative, executive, and judicial offices are gendered at the national, state, and local levels.

**POL SCI 2400 Public Administration: 3 semester hours**
Prerequisite: POL SCI 1100 or consent of instructor. Survey of Public Administration, with reference to organization, financial administration, personnel management, judicial control of the administrative process.

**POL SCI 2420 Introduction to Public Policy: 3 semester hours**
Prerequisite: POL SCI 1100 or consent of instructor. Study of differing approaches to understanding the public policy process. Course surveys the application of social science to public issues and problems.

**POL SCI 2430 Public and Nonprofit Organizational Behavior: 3 semester hours**
This course examines behavior in public and nonprofit organizations, including theory about how organizations work and how groups and individuals behave within organizations. Theories will be applied in an attempt to explain and predict behavior in an organizational context. Topics include motivation, leadership, goal complexity and ambiguity, organizational structure, culture, and communication in public and nonprofit organizations, as well as the relationship between public and private organizations.

**POL SCI 2450 Comparing Different Worlds: 3 semester hours**
This course focuses on the role of political institutions, economic structures and social groups in explaining differences in forms of government and levels of socio-economic development. It explores in detail one or more of these themes in cases drawn from developing and developed nations.

**POL SCI 2500 The Politics of European Union: 3 semester hours**
Prerequisite: POL SCI 1500 or consent of instructor. The European Union has become the driving force in European economic and social development. This course assesses the changing nature of national identity and national sovereignty in Europe. It compares and contrasts key public policies, (single market, welfare, migration, gender mainstreaming, ‘democratic deficits’), along with core EU actors and institutions, and includes participation in the annual Midwest Model EU.

**POL SCI 2530 Political Systems of South America: 3 semester hours**
Prerequisites: POL SCI 1500 or consent of instructor. An introduction to the study of the political systems of South America. Examination of the cultural context that has shaped the political, economic, and social development of states in the region. This course satisfies the Cultural Diversity requirement.

**POL SCI 2540 Political Systems of Mexico, Central America and the Caribbean: 3 semester hours**
Prerequisites: POL SCI 1500 or consent of instructor. An introduction to the study of the political systems of Mexico, Central America, and the Caribbean. Examination of the cultural context that has shaped the political, economic, and social development of these countries. This course satisfies the Cultural Diversity requirement.

**POL SCI 2550 Political Systems of Mexico, Central America and the Caribbean: 3 semester hours**
Same as MVS 2850. This simulation-driven course focuses on national security policies and the processes that put these policies into practice. It examines the elements that underpin national security policy and the processes employed by the US government for integrating and synchronizing those instruments in the pursuit of national security objectives.

**POL SCI 2551 National Security Policy and Practice: 3 semester hours**
This course satisfies the Cultural Diversity requirement.

**POL SCI 2560 Globalization: Prospects and Problems: 3 semester hours**
Globalization is a multidimensional construct, which calls for its study from a multidisciplinary perspective: i.e., economics, political science, history, and anthropology. The course will explore the forces undergirding economic globalization, as well as the factors that are giving rise to a global democratic dispensation. It will also examine previous forms of globalization including archaic globalization, proto-globalization, and modern globalization as well as so-called deviant globalization - the trade in illicit goods and services, which are also highly lucrative: e.g., human trafficking, prostitution, endangered species, narcotics, organ transplants, small arms, etc. Finally, the course will explore cultural globalization and the rise of a global ‘pop culture.’ The course will include a comparative analysis of the impacts of globalization in all of its manifestations on social groups (e.g., men and women, ethnic and racial minorities, young and old, classes), countries, and regions.

**POL SCI 2570 Political Systems of South America: 3 semester hours**
Prerequisites: POL SCI 1100 or consent of instructor. An introduction to the study of the political systems of South America. Examination of the cultural context that has shaped the political, economic, and social development of states in the region. This course satisfies the Cultural Diversity requirement.

**POL SCI 2580 21st Century International Relations: 3 semester hours**
This course will provide a foundation for an informed discourse on theoretical perspectives that shape rapidly changing relations among nations in the 21st century. Students will utilize international political theory to examine methodologies of conflict resolution, peacekeeping, diplomacy, foreign policymaking, international security, global trade and immigration, and also consider current and future impacts of digital technology and cyber security.

**POL SCI 2590 United States Foreign Policy: 3 semester hours**
Prerequisites: POL SCI 1100 or POL SCI 1500, or consent of Instructor. Examination of the factors influencing the formation and the execution of American foreign policy, with a focus on specific contemporary foreign policy issues.
POL SCI 2850 Gender, Power and International Politics: 3 semester hours
This course provides an overview of key topics on the intersection of gender and international politics, including the emergence of international norms, and laws associated with gendered rights, sexuality, masculinity, and intersectionality. In particular, the course examines: 1) the influence of global social media activism and transnational migrations on international policy-making; 2) transnational advocacy movements and the emergence of new international laws guaranteeing a spectrum of gender rights.

POL SCI 2860 Understanding Terrorism in the 21st Century: 3 semester hours
Same as MVS 2860. This course seeks to provide insight into the use of terrorism, as a means to achieve a political end, in our current globalized environment. It will review various facets of terrorism including societal disturbances that allow terrorist organizations to flourish, various types of domestic and international non-state actors that use terrorism, terrorism as the next generation of warfare, and the global response to the threat of terrorism. Students will exit the course with a more complete understanding of the multi-faceted threat terrorism poses to our increasingly globalized society.

POL SCI 2900 Studies in Political Science: 1-6 semester hours
Selected topics in political science.

POL SCI 3000 Political Analysis: 3 semester hours
Prerequisites: MATH 1020 or higher. This course provides an introduction to political analysis, emphasizing both the logic of inquiry and practical methods. Students will learn about the construction and evaluation of theories that relate to real-world politics. Students will also have an opportunity for hands-on experience with qualitative and quantitative methods including graphics, descriptive statistics, cross-tabular and correlational analysis, hypothesis testing, and computer applications.

POL SCI 3200 Constitutional Law: 3 semester hours
Prerequisites: POL SCI 1100 or POL SCI 1200 or consent of the instructor. This course examines major U.S. Supreme Court cases on the constitutional structure of American government. Topics covered may include judicial review, separation of powers, federal-state relations commerce clause, and economic liberties. The course explores how the Supreme Court has interpreted these constitutional conflicts in light of changing times and emerging issues.

POL SCI 3210 Civil Liberties: 3 semester hours
Prerequisites: POL SCI 1100 or POL SCI 1200 or consent of instructor. This course examines major U.S. Supreme Court cases in the areas of civil liberties and civil rights. Topics covered may include the incorporation of the Bill of Rights into the Fourteenth Amendment, freedom of religion, freedom of speech, freedom of the press, freedom of association, the right to protest, discrimination in the contexts of race, gender and sexual orientation, and the right to privacy. The course explores how the Supreme Court has interpreted these fundamental rights in light of changing times and emerging issues.

POL SCI 3220 Labor and Employment Law: 3 semester hours
This course examines the primary labor and employment laws that govern employment relationships in the United States. Topics may include laws that govern private-sector employment relationships, including the National Labor Relations Act, the Fair Labor Standards Act, the Family, and Medical Leave Act, and parallel issues found in state and other federal laws.

POL SCI 3260 The Supreme Court: 3 semester hours
Prerequisites: POL SCI 1100, or POL SCI 1200 or consent of the instructor. An examination of the role, function and assertion of power by the U.S. Supreme Court in our constitutional democracy. Topics include an historical overview of the Supreme court, the process of selecting Supreme Court Justices, life in the Court, Supreme Court decision making, Supreme Court policymaking, implementation and impact of Court decisions and the role of the Supreme Court as a national policymaker.

POL SCI 3330 Public Opinion and Political Participation: 3 semester hours
Prerequisite: POL SCI 1100 or consent of instructor. This course links Americans' political attitudes to their political participation (defined broadly) and explores how governmental institutions, the media, and social group affiliations affect political behavior. It also connects trends in public opinion and participation to the state of American democracy.

POL SCI 3350 Political Parties and Elections: 3 semester hours
Prerequisite: POL SCI 1100 or consent of instructor. Development, organization, functions, activities of major and minor political parties, pressure groups, election administration, especially in the United States.

POL SCI 3390 Studies in American Politics: 3 semester hours
Prerequisite: POL SCI 1100 or consent of instructor. Selected topics in American politics. May be repeated.

POL SCI 3420 Public and NonProfit Personnel Management: 3 semester hours
Prerequisite: POL SCI 1100, POL SCI 2400 or consent of instructor. A study of personnel practices in the public and nonprofit sectors, including recruitment, job development, labor relations, and administration of equal employment/affirmative action programs.

POL SCI 3430 Labor and Community Leadership: 3 semester hours
This course examines leadership development principles through the lens of labor and social action leadership. Topics may include a variety of leadership theories as well as the intersection of race, gender, and multiculturalism with leadership and the resultant challenges and opportunities within social organizations and labor unions.

POL SCI 3440 Public and NonProfit Budgeting: 3 semester hours
Prerequisite: POL SCI 1100, POL SCI 2400; or consent of instructor. Budgeting is the study of 'who gets what' and who pays for it. This course examines the administration and politics of federal, state, and local government budgets. Students gain experience in interpreting budget documents and making budget choices, using electronic and other resources.

POL SCI 3450 Urban Administration: 3 semester hours
Prerequisites: POL SCI 1100 or consent of instructor. Study of administrative machinery and practices of metropolitan government, how metropolitan areas organize themselves to provide services, how urban policies are made and implemented, how budgeting and personnel recruitment processes operate, and how these relate to urban policies.

POL SCI 3455 Metropolitan Planning: 3 semester hours
Prerequisites: POL SCI 1100, POL SCI 2400, or consent of instructor. Why do metropolitan areas look the way they do? How much of this was 'planned'? Can/should metropolitan development be planned? Who should decide, and how? This course will examine the political processes in metropolitan areas as they relate to planning. We will look at a series of urban plans and see what they have (and have not) accomplished, and look at a range of alternative views of how planning might be done.
POL SCI 3460 The Politics of Poverty and Welfare: 3 semester hours
Prerequisite: POL SCI 1100 or consent of instructor. An examination of the structure of income inequality in the U.S. and public policies designed to redistribute wealth and to treat poverty. The history of welfare programs, the growth of the welfare state, and attempts to cut social spending are closely examined.

POL SCI 3470 Negotiation, Collective Bargaining, and Dispute Resolution: 3 semester hours
This course explores the process of collective bargaining (contract negotiations). Topics include the origins of the laws that govern the process, terminology, and basic strategies. In this course, students will take a close look at the legal constraints on the process, the economic factors influencing the power dynamics, the strategies and techniques of bargaining, and the dispute resolution processes.

POL SCI 3480 Environmental Policy: 3 semester hours
Prerequisites: POL SCI 1100 or consent of instructor. This course examines the process of environmental policy-making and key environmental issues. Topics include national and international policies toward land, air, and water pollution; energy use; solid and toxic waste disposal; climate change; population; biodiversity; conservation; and sustainability.

POL SCI 3500 The Politics of the Middle East: International and National Dynamics: 3 semester hours
Prerequisite: POL SCI 1100, POL SCI 1500 or consent of instructor. Survey of political movements, governments, and international conflicts in the Middle East. Islam, nationalism, ideologies and economic systems will be studied. The effect of oil and the military will also be considered. This course fulfills the cultural diversity requirement.

POL SCI 3595 Studies in Comparative Politics: 3 semester hours
Prerequisites: POL SCI 1500 or consent of instructor. Selected topics in comparative politics. May be repeated.

POL SCI 3700 NonProfit Organizations and Public Policy: 3 semester hours
Prerequisites: POL SCI 1100; Recommended: POL SCI 2420. This course explores the roles of nonprofit organizations in public policy issues through citizen advocacy and political participation. The course begins with an overview of the scope of the nonprofit sector and then examines its political and legal foundations in the U.S. Theories about civic engagement and the rights of association are considered. Students will gain practical knowledge about direct and grassroots lobbying by nonprofit organizations. Discussion and analysis of actual advocacy campaigns carried out through nonprofit effort will be included. The course also investigates the formation of nonprofit political action committees (PACs) and other so-called 527 organizations, as well as ethical abuses of the nonprofit form for political purposes.

POL SCI 3710 NonProfits, Civil Society and Volunteerism: 3 semester hours
Prerequisites: POL SCI 1100 and junior standing. This course introduces basic concepts about the role of voluntary action in democratic society, especially in the context of organizations in the nonprofit sector. Theories of civil society and social capital are explored. Selected approaches to leadership are considered, in addition to the variety of motivations for giving time and resources to the pursuit of social and political change. Students will gain practical skill development in the recruitment, training and utilization of volunteers. Through study of recent case examples, students will develop an appreciation for the characteristics of effective leadership and strategic use of volunteers. In addition, the course includes an overview of new technologies that are being used by voluntary organizations to enlist participation and strengthen commitment of supporters.

POL SCI 3800 Media, Film, and International Politics: 3 semester hours
Prerequisites: Junior level standing or consent of instructor. This course engages students in critical analysis of the role of media, film, and popular culture in shaping international public opinion and policy. Using digital media, film, and interdisciplinary texts, students will analyze how international politics is an integral part of popular culture in shaping norms of wars of intervention, digital violence, and global migration. This course fulfills the cultural diversity requirement.

POL SCI 3830 International Political Economy: 3 semester hours
Prerequisite: POL SCI 1100, POL SCI 1500, or consent of instructor. This course provides an introduction to international political economy. In particular, it will focus on the politics of international trade, finance, and investment. It will analyze the relationships between developed and developing countries and it will assess the relative usefulness of alternative frameworks for studying international political economy.

POL SCI 3850 International Organizations and Global Problem-Solving: 3 semester hours
Prerequisite: POL SCI 1100, POL SCI 1200; or consent of the instructor. An introduction to the study of international organizations, this course focuses on relationships between nation-states and “nonstate” actors in world politics, including global intergovernmental organizations such as the United Nations and non-governmental organizations such as multinational corporations. Students examine the roles of international institutions in economic development, resource management, and control of violence across national boundaries.

POL SCI 3860 Studies in War and Peace: 3 semester hours
Prerequisite: POL SCI 1100, POL SCI 1500, or consent of instructor. Exploration, development, and testing of theories about the causes and consequences of war, peace, and conflict among nations. A broad range of literature on war and peace will be reviewed, and applied to crisis situations in the international system.

POL SCI 3880 Diaspora Politics, Transnational Remittances, and Global Citizenship: 3 semester hours
Prerequisites: Instructor consent. This course examines how new and old global diaspora(s) from Europe, Asia, Africa and Latin America shape international relations and global commerce and will examine the impact of evolving international laws dealing with immigration, global remittances, trans-border commerce and citizenship.

POL SCI 3890 Studies in International Relations: 3 semester hours
Prerequisite: POL SCI 1100, POL SCI 1500, or consent of instructor. Selected topics in international relations. May be repeated.
POL SCI 3900 Special Readings: 1-10 semester hours
Prerequisite: Consent of instructor. Independent study through readings, reports, and conferences. May be repeated.

POL SCI 3940 Public Affairs Internship: 1-6 semester hours
Prerequisite: Junior standing and consent of instructor. Independent study involving work with an appropriate public or private agency. A maximum of six credit hours may be earned.

POL SCI 4040 Survey Research Practicum in Political Science: 3 semester hours
Prerequisite: Junior standing and consent of the instructor. The execution of a sample survey, including establishing study objectives, sampling, questionnaire construction, interviewing, coding, data analysis, and presentation of results.

POL SCI 4060 Theory of Decisions and Games: 3 semester hours
Same as PHIL 4465. Prerequisites: Six hours of Philosophy and junior standing, or POL SCI 6401 (or the equivalent, or consent of the instructor). A study of rational decision-making, including games against nature, zero-sum games, and social choices. Topics will include the following: expected utility maximization, the Prisoner's Dilemma, Nash equilibria, and Arrow's theorem on the impossibility of a social welfare function. Parts of the course are technical in nature; a prior course in mathematics (e.g., finite mathematics, calculus, statistics or an economics course with a mathematical component), symbolic logic, or some other course with comparable mathematical content.

POL SCI 4090 American Government for the Secondary Classroom: 3 semester hours
Same as SEC ED 4090. Prerequisites: Admission to the Teacher Education Program. TCH ED 3310 or the consent of the instructor. Adapts the themes and subject matter of American Government to the secondary classroom and trains teachers in techniques particularly designed to maximize the use of primary sources, foster critical inquiry, and encourage knowledge of subject matter. Particular emphasis will be placed on defining the broad and connecting methods of inquiry for use in an interactive classroom. Can be counted towards the Political Science major requirement, but not the American Politics subgroup. Counts towards Social Studies certification. Not available for graduate credit.

POL SCI 4345 War Crimes, Genocide, and Justice in the 20th and 21st Centuries: 3 semester hours
Same as SOC 4345, CRIMIN 4345, and MVS 4345. Prerequisite: ENGL 3100. This course provides advanced undergraduate and Master's level students a comprehensive overview of the subject of war crimes, crimes against humanity, genocide and legal responses to these crimes in the modern era. The goal of this course is to engage students in sustained, critical thought about these issues and to foster a deeper understanding of both the causes and consequences—legal, social and human—of these egregious crimes.

POL SCI 4520 Mega-Cities and Diasporas: Understanding Global Migration: 3 semester hours
Prerequisites: POL SCI 1500 or consent of instructor. This course examines the causes, dynamics and effects of mega-city development and migrating diasporas in a variety of national settings. Case studies include cities based in Europe, South America, China, India, Turkey, and parts of Africa, fostering global awareness, as well as an understanding of the "interconnectedness" of politics, economics and climate change across the planet. This course fulfills the cultural diversity requirement.

POL SCI 4850 International Law: 3 semester hours
Prerequisite: POL SCI 1100, POL SCI 1500, or consent of instructor. Study of the international legal system, including the content and operation of the laws of war and peace, how law is created and enforced with regard to the oceans and other parts of the globe, and the relationship between international law and international politics.

POL SCI 4900 Topics in Political Science: 3 semester hours
Prerequisites: POL SCI 1100 or consent of instructor. Selected topics in Political Science.

POL SCI 4901 Designing Surveys to Study Human Behavior and Attitudes: 1-3 semester hours
Prerequisites: POL SCI 3000 or POL SCI 6401 or P P ADM 6010 or consent of instructor. The course allows students to apply research methods to designing a survey to study people's attitudes and behaviors with a focus on developing online surveys. The course may count toward an elective in the Policy Research and Analysis, Local Government Management, Non-Profit Management and Leadership, or Individualized Emphasis Areas for a Master of Public Policy Administration.

POL SCI 4950 Senior Seminar in Political Science: 3 semester hours
Prerequisites: POL SCI 3000 and senior standing. This course provides the integrative capstone experience required of all political science majors in their last year of coursework. The course emphasizes student-faculty interaction in a seminar format designed to engage upper-level students in a critical examination of a broad theme in political science, leading to the production of a major research paper. The course may be repeated for credit so long as the topic varies. This course is not available for graduate student credit.

POL SCI 6300 Leadership and Management in NonProfit Organizations: 3 semester hours
Same as P P ADM 6300 and SOC WK 6300. Prerequisites: Graduate standing required. Addresses the role and scope of the independent sector in the United States, as well as the leadership and management of nonprofit organizations within that sector. Topics include the economic and political scope of the independent sector, the role of volunteerism in a democratic society, and the role and scope of philanthropy. Topics in voluntary organization management and leadership include the dynamics, functions and membership structure of NPOs, especially staff-board and other volunteer relations; governance and management of NPOs; resource mobilization; and program development management and evaluation.

POL SCI 6401 Introduction to Policy Research: 3 semester hours
Procedures for testing explanations, including research design, principles of measurement, probability sampling, methods of data collection, and techniques for analyzing data.

POL SCI 6402 Intermediate Techniques in Policy Research: 3 semester hours
Prerequisite: Graduate standing and POL SCI 6401. Elementary distribution theory, statistical inference, and introduction to multiple regression. Emphasis on practical applications.

POL SCI 6403 Advanced Techniques in Policy Research: 3 semester hours
Prerequisite: Graduate standing and POL SCI 6402. Selected topics in policy research emphasizing forecasting, modeling and estimation.
**POL SCI 6404 Multi-Method Research Design: 3 semester hours**

Prerequisite: POL SCI 6403 or consent of instructor. Develops policy research skills that combine qualitative and quantitative social science tools and applies an appropriate mix of these tools to specific policy problems. Topics include alternative approaches to causal analysis, levels of analysis, triangulation from a variety of qualitative and quantitative research techniques, building contextual effects into multiple research projects, techniques for assessing alternative program theories and clarifying implicit assumptions, and meta-analysis of secondary data sources.

**POL SCI 6405 Directed Readings in Research Methods: 1-10 semester hours**

Independent study through readings, reports, research projects, and conferences.

**POL SCI 6410 Introduction to Policy Analysis: 3 semester hours**

Same as P P ADM 6000. Systematic development of a critical/analytic base for dealing with public policy.

**POL SCI 6415 Directed Readings and Research in Public Policy: 1-10 semester hours**

Same as P P ADM 6150. Prerequisite: Consent of instructor. Independent study through readings, reports, research projects, and conferences. May be repeated for credit, provided the subject matter is different.

**POL SCI 6418 Social and Economic Development Policy: 3 semester hours**

Same as SOC WK 6250. Prerequisites: SOC WK 5200 or equivalent, or consent of instructor. This course examines the economic and political urban processes that planners, policy makers, service organizations and advocates seek to influence. In this course students will develop skills in policy analysis and development. The course provides an introduction to three models of modern political economy, then seeks to deepen these broad analytic approaches by examining more recent policy developments in cities like St. Louis. This course also focuses on recent strategies to address issues such as employment, wages, housing, education, taxes and social services.

**POL SCI 6420 Proseminar in Public Law: 3 semester hours**

Study of judicial systems and processes (judges, courts, litigants, and juries) and evaluation of legal policies (Compliance, impact and deterrence).

**POL SCI 6422 Law, Courts and Public Policy: 3 semester hours**

Same as CRIM 6422. Prerequisites: Graduate standing. An analysis of the role of courts as policymaking institutions and the law as policy. We will explore the role of judges as policymakers, consider the attributes of courts, (both trial and appellate) that make them appropriate yet limited targets for advocates of reform, and the implementation and impact of court decisions. We will consider recent examples of judicial involvement in state and national policymaking. In addition, we will examine the role of lawyers and interest groups in selecting litigation rather than alternative political processes for policy change.

**POL SCI 6425 Directed Readings and Research in Public Law: 1-10 semester hours**

Independent study through readings, reports, research projects, and conferences.

**POL SCI 6430 Proseminar in American Politics: 3 semester hours**

Study of individual and group political behavior including socialization, participation, consensus formation, representation, legislative and judicial behavior.

**POL SCI 6431 Seminar in American Politics: 3 semester hours**

Research problems and design in American political process and behavior. May be repeated for credit when the subject matter is different.

**POL SCI 6435 Directed Readings and Research in American Politics: 1-10 semester hours**

Independent study through readings, reports, research projects, and conferences.

**POL SCI 6440 Public Administration: Theory & Practice: 3 semester hours**

Same as P P ADM 6400. The course examines major approaches to analyzing public policies and their administration with emphasis on the effects of administrative organization and procedures on policy decisions and their impact. Specific topics may include administrative accountability, inter-governmental relations, public private interaction, implementation processes, bureaucratic expertise, the legal environment of public administration, and public service and merit issue.

**POL SCI 6442 The Policy Process: 3 semester hours**

Prerequisite: Graduate standing. This course will examine how public policies are made in the United States. It will cover different theories of the policy process, including how political actors get the government to focus on certain problems, form coalitions to enact policies, and generate support for their implementation. Finally, the course will examine how well various policy models apply to different policy domains.

**POL SCI 6443 Health Care Policy: 3 semester hours**

Same as P P ADM 6430, GERON 6443, and SOC WK 6443. Prerequisites: Graduate Standing or consent of instructor. Survey course examining current issues in health policy that face the nation. Policies are placed in a historical context to show how issues have been influenced by different political and economic conditions. Secondary consequences and limitations of current trends in health policy are explored.

**POL SCI 6444 Seminar in Public Policy and Aging: 3 semester hours**

Same as GERON 6444 and P P ADM 6444. Prerequisites: Consent of instructor. The study of specialized issues and methods related to federal, state, and local policies that affect the elderly. Potential policy areas to be covered include: housing, taxation, mental health, transportation, etc. May be repeated for credit, provided the subject matter is different.

**POL SCI 6445 Directed Readings and Research in Public Administration: 1-10 semester hours**

Independent study through readings, reports, research projects, and conferences.

**POL SCI 6448 Political Economy and Public Policy: 3 semester hours**

Prerequisite: Graduate standing. This course examines political economy in its contemporary manifestations as public choice and as the study of the ways in which institutional power shapes economic policies and performance. The course explores the origins and major concepts of political economy, the institutions of economic policymaking and economic policies in the U. S. It emphasizes the consequences of budget constraints inflation, unemployment and sectoral decline on the design and administration of public programs at all levels of government.
POL SCI 6449 Human Resources in the Public Sector: 3 semester hours
Same as SOC WK 6449 and P P ADM 6490. This course presents an overview of personnel and labor relations in the public sector. It places particular emphasis on issues which are unique to the public sector, such as the merit system, the questions of representative bureaucracy, and the constraints of personnel in the nonprofit sector. Course topics may include personnel reforms in the federal sector, equal employment and affirmative action policies, testing, selection, hiring, comparable worth, job evaluation and labor relations, including grievance arbitration and collective bargaining.

POL SCI 6450 Proseminar in Comparative Politics: 3 semester hours
Classification and typology of political systems; structural-functional analysis; political culture, ideology, affiliation and participation; decision-making processes; political roles; organization of authority.

POL SCI 6451 Seminar in Comparative Politics: 3 semester hours
Research problems and design in comparative politics. May be repeated for credit when the subject matter is different.

POL SCI 6452 Public Policy of Conservation and Sustainable Development: 3 semester hours
Same as BIOL 6250. Prerequisites: Graduate standing in Political Science or Biology and consent of instructor. Prior course in ecology is recommended. This course will introduce the student to concepts and techniques for formulating, implementing, and analyzing public policy with an emphasis on environmental concerns, conservation, and sustainable development. The course will be team taught by a political scientist and a biologist. Course materials will include case studies that demonstrate the special problems of environmental policymaking in developing and developed economies.

POL SCI 6455 Directed Readings and Research in Comparative Politics: 1-10 semester hours
Independent study through readings, reports, research projects, and conferences.

POL SCI 6465 Directed Readings and Research in Political Theory: 1-10 semester hours
Independent study through readings, reports, research projects, and conferences.

POL SCI 6470 Proseminar in Urban Politics: 3 semester hours
Same as: P P ADM 6470. Examination of the relationship between the social, economic and political systems of urban areas. Urban political structure, patterns of influence, political participation and communication and political change. Special attention to problems of access to and control of urban political systems.

POL SCI 6471 Seminar in Urban Politics: 3 semester hours
Research problems and design in urban and regional politics. May be repeated for credit when the subject matter is different.

POL SCI 6475 Directed Readings and Research in Urban Politics: 1-10 semester hours
Independent study through readings, reports and conferences.

POL SCI 6480 Proseminar in International Relations: 3 semester hours
Examination of various approaches to the study of international politics and foreign policy, focusing on studies of conflict, decision-making, international political economy, and related topics. Included are realist, idealist, and Marxist perspectives.

POL SCI 6481 Seminar in International Relations: 3 semester hours
Research problems and design in international politics. May be repeated for credit when the subject matter is different.

POL SCI 6482 International Political Economy: 3 semester hours
Prerequisite: Graduate standing. This course will examine the theoretical and policy issues of international political economy. In particular, it will focus on the politics of international trade, finance and investment. It will also analyze the themes of interdependence, hegemony, and dependency, as well as consider relations between developed and developing countries. Finally, the relative usefulness of liberal, Realist and Marxist approaches to the study of international political economy will be weighed.

POL SCI 6485 Directed Readings and Research in International Relations: 1-10 semester hours
Independent study through readings, reports, research projects, and conferences.

POL SCI 6488 Studies in International Relations: 1-6 semester hours
Prerequisites: Graduate standing or permission of instructor. Selected topics in international studies. May be repeated for credit provided the topic of the course is different each time.

POL SCI 6490 Strategic and Program Planning for Nonprofit Organizations: 3 semester hours
Same as P P ADM 6550 and SOC WK 6491. Prerequisites: Graduate standing or consent of instructor. Strategic and program planning enable an organization to concentrate on efforts and set priorities guided by a mission, a vision, and an understanding of its environment. Focus is on preparing a strategic plan and a program plan for a nonprofit organization and analyzing an organization's ability to deliver goods and/or services to its constituents in today's economic, social and political climate.

POL SCI 6494 Thesis Research: 1-10 semester hours

POL SCI 6495 Internship: 1-6 semester hours
Independent study involving work with an appropriate public or private agency.

POL SCI 6499 Directed Dissertation Proposal Research: 3 semester hours
Prerequisites: Consent of instructor. Supervised study through readings and research leading to the preparation of a dissertation proposal plan. Open to doctoral students who have completed at least 42 hours of course work. The proposal plan will indicate the following: statement of research question, importance of the problem, literature review and research design.

POL SCI 7499 Dissertation Research: 1-10 semester hours

Public Policy Administration Courses

P P ADM 6000 Introduction to Policy Analysis: 3 semester hours
Same as POL SCI 6410. Systematic development of a critical/analytic base for dealing with public policy.

P P ADM 6010 Introduction to Policy Research: 3 semester hours
Same as POL SCI 6401. Procedures for testing explanations, including research design, principles of measurement, probability sampling, methods of data collection, and techniques for analyzing data.

P P ADM 6150 Directed Readings and Research in Public Policy: 1-10 semester hours
Same as POL SCI 6415. Prerequisite: Consent of instructor. Independent study through readings, reports, research projects, and conferences. May be repeated for credit, provided the subject matter is different.
P P ADM 6180 Governmental Budgeting and Financial Control: 3 semester hours
Same as BUS AD 5450. Prerequisite: ACCTNG 5400. A study of municipal and federal financial control and budgeting procedures with emphasis on public policy. The impact of financial control on top management decisions and the effect of budget strategies on the allocations of public funds.

P P ADM 6300 Leadership and Management in Nonprofit Organizations: 3 semester hours
Same as POL SCI 6300 and SOC WK 6300. Prerequisites: Graduate standing required. Addresses the role and scope of the independent sector in the United States, as well as the leadership and management of nonprofit organizations within that sector. Topics include the economic and political scope of the independent sector, the role of volunteerism in a democratic society, and the role and scope of philanthropy. Topics in voluntary organization management and leadership include the dynamics, functions and membership structure of NPOs, especially staff-board and other volunteer relations; governance and management of NPOs; resource mobilization; and program development management and evaluation.

P P ADM 6310 American Philanthropy and Nonprofit Resources Development: 3 semester hours
Same as SOC WK 6310. Prerequisites: Graduate standing required. This course addresses the history, philosophy, roles and scope of philanthropy in the United States, including its role in the nonprofit, voluntary sector. It further examines the contemporary forces which impact philanthropy and charitable giving, both by institutions and individuals. The course examines the effective planning and management of development programs (e.g., annual giving), fundraising vehicles (e.g., mail solicitations) and the fund raising process, from planning through donor relations.

P P ADM 6311 Staff Management Issues in Nonprofit Organizations: 1 semester hour
Same as SOC WK 6311. Prerequisites: Graduate standing required. This course addresses issues involved in managing staff in nonprofit organizations. The course will cover the following topics: fundamentals of staff supervision; balancing supervisory processes with counseling and coaching; selecting, hiring, evaluating, and terminating staff; legal issues that affect these processes.

P P ADM 6312 Legal Issues in Managing Nonprofit Organizations: 1 semester hour
Same as SOC WK 6312. Prerequisites: Graduate standing required. This course addresses legal issues involved in managing and governing nonprofit organizations. The course will cover the following topics: The Board as steward of the organization; Director and officer liability; tax laws concerning charitable giving; legal issues in managing staff and volunteers (e.g., hiring, evaluating, and terminating employees); Missouri nonprofit law.

P P ADM 6313 Financial Issues in Managing Nonprofit Organizations: 1 semester hour
Same as SOC WK 6313. Prerequisite: Graduate standing required. This course addresses financial issues involved in governing and managing nonprofit organizations. The course will cover the following topics: Cash flow analysis; budgeting; fund accounting; cost accounting (determining costs for programs and services); understanding and using standard financial statements, including balance sheets, cash flow statements, statements of activity, and operating and capital budgets.

P P ADM 6340 Seminar in City Administration: 3 semester hours
This course provides an overview of the working environment of a city administrator and is jointly sponsored by the local city managers association. Professional city personnel make presentations to the students on six major topics: political structure, organizational structure, service delivery, finance, personnel policies and practices, and leadership. The course provides direct observation of city council meetings, visits to various city facilities, exposure to different philosophies and styles of city management, and provides students a chance to assemble facts, evaluate options, and present policy recommendations for real problems that local administrators face.

P P ADM 6350 Issues in Urban Management: 3 semester hours
Designed to evaluate management issues that confront managers in local government from a political perspective. The format will include an intense review and discussion of original case studies from actual local government situations. The specific focus of this course will vary. Course may be repeated.

P P ADM 6400 Public Administration: Theory & Practice: 3 semester hours
Same as POL SCI 6440. The course examines major approaches to analyzing public policies and their administration with emphasis on the effects of administrative organization and procedures on policy decisions and their impact. Specific topics may include administrative accountability, inter-governmental relations, public private interaction, implementation processes, bureaucratic expertise, the legal environment of public administration, and public service and merit issue.

P P ADM 6430 Health Care Policy: 3 semester hours
Same as GERON 6443, POL SCI 6443, and SOC WK 6443. Prerequisites: Graduate standing or consent of instructor. Survey course examining current issues in health policy that face the nation. Policies are placed in a historical context to show how issues have been influenced by different political and economic conditions. Secondary consequences and limitations of current trends in health policy are explored.

P P ADM 6444 Seminar in Public Policy and Aging: 3 semester hours
Same as GERON 6444 and POL SCI 6444. Prerequisites: Consent of instructor. The study of specialized issues and methods related to federal, state, and local policies that affect the elderly. Potential policy areas to be covered include housing, taxation, mental health, transportation, etc. May be repeated for credit, provided the subject matter is different.

P P ADM 6470 Proseminar in Urban Politics: 3 semester hours
Same as: POL SCI 6470. Examination of the relationship between the social, economic and political systems of urban areas. Urban political structure, patterns of influence, political participation and communication and political change. Special attention to problems of access to and control of urban political systems.

P P ADM 6471 Seminar in Urban Politics: 3 semester hours
Same as: POL SCI 6471. Research problems and design in urban and regional politics. May be repeated for credit when the subject matter is different.
**P P ADM 6490 Human Resources in the Public Sector: 3 semester hours**

Same as POL SCI 6490 and SOC WK 6491. This course presents an overview of personnel and labor relations in the public sector. It places particular emphasis on issues which are unique to the public sector, such as the merit system, the questions of representative bureaucracy, and the constraints of personnel in the nonprofit sector. Course topics may include personnel reforms in the federal sector, equal employment and affirmative action policies, testing, selection, hiring, comparable worth, job evaluation and labor relations, including grievance arbitration and collective bargaining.

**P P ADM 6500 Selected Topics in Public Policy Administration: 3 semester hours**

Prerequisites: Graduate Standing. Permission of instructor may be required. A seminar of selected issues and methods relating to public policy administration. May be repeated for credit, provided the subject matter is different.

**P P ADM 6501 Selected Topics in Nonprofit Management and Leadership: 3 semester hours**

Prerequisites: Graduate standing. Permission of instructor may be required. A seminar of selected issues and methods relating to nonprofit management and leadership. May be repeated for credit, provided the subject matter is different.

**P P ADM 6550 Strategic and Program Planning for Nonprofit Organizations: 3 semester hours**

Same as POL SCI 6490 and SOC WK 6491. Prerequisite: Graduate standing or consent of instructor. Strategic and program planning enable an organization to concentrate on efforts and set priorities guided by a mission, vision, and an understanding of its environment. Focus is on preparing a strategic plan and a program plan for a nonprofit organization and analyzing the organization's ability to deliver goods and/or services to its constituents in today's economic, social and political climate.

**P P ADM 6600 Managing People in Organizations: 3 semester hours**

Same as MGMT 6600. Prerequisites: Graduate standing or consent of instructor. The theoretical and research contribution of the behavioral sciences to management and administration are examined and applied to selected organizational situations. Areas to be considered from the standpoint of both individual and organizational performance are communication, motivation, conflict, decision-making, goal setting, leadership, organizational design, climate, development and control. Utilizing a systems perspective, the course attempts to develop in each student an ability to analyze and solve organizational problems.

**P P ADM 6750 Applied Research Design: 3 semester hours**

Prerequisites: At least one course in research design and statistics at the graduate level. The course offers a comparative study of research strategies with regard to data sources, data collection, and modes of analysis that are appropriate for program evaluation research. Attention is given to observational, survey, and quasi-experimental methodologies.

**P P ADM 6751 Applied Evaluation Project: 3 semester hours**

Prerequisites: P P ADM 6000, P P ADM 6010 or equivalents. P P ADM 6750 or equivalents. Independent study involving an evaluation project with an appropriate public or private or nonprofit agency.

**P P ADM 6800 Management Information Systems: 3 semester hours**

Same as INFSYS 5800. Prerequisites: Graduate standing. This course provides an overview of issues related to the management of information systems within organizations. Course topics may include the role of the Chief Information Officer, business value from emergent information technologies (IT), enterprise systems, the impact of IT on organizational competitiveness, managing IT-enabled projects, extracting business intelligence from big data, sourcing IT, cybersecurity, ethics, intellectual property rights, and societal impacts of IT.

**P P ADM 6850 E-Governance in the Public Sector: 1 semester hour**

Prerequisite: Graduate standing. This course addresses information technology in the public sector from a managerial perspective. Students will examine basic hardware, software, data, and information management issues from a managerial perspective. These topics may include web portal design, geographic information systems, database management, e-government, strategic design, and the use of information technology to address public policy questions.

**P P ADM 6900 Cases in Public Policy Administration: 3 semester hours**

Prerequisites: 24 hours of public policy administration courses, at least 15 of which are in core courses. This capstone course intensively analyzes public policy administration cases drawn from a variety of issues and settings.

**P P ADM 6950 Internship: 3 semester hours**

Independent study involving work with an appropriate public or private or nonprofit agency.

### Pre-professional Programs

Students at the University of Missouri-St. Louis may develop pre-professional study programs in either law or the health professions. With early and careful advising, students may develop an appropriate program to prepare for the intended professional study.

Students should seek pre-professional advisors in their interest area early in their academic careers to ensure development of sound, comprehensive study programs that fulfill the admission requirements of the professional program to which they wish to apply.

The following information on pre-professional study at UMSL is provided to give students minimal guidelines and assistance in planning a program.

For advisement and information, contact the Marcus Allen Advising Center in the College of Arts and Sciences, 303 Lucas Hall, 314-516-5501

### Pre-Law

Pre-law students at UMSL come from a variety of majors, including Art History, Criminal Justice, Economics, English, History, Philosophy, Political Science, and many more. Many of these majors offer pre-law tracks or minors, and you can identify yourself as a pre-law student at any time during your career at UMSL. The Pre-Law Committee of the American Bar Association (ABA) advises that a wide range of undergraduate majors can serve as a path to law school:

The ABA does not recommend any undergraduate majors or group of courses to prepare for a legal education. Students are admitted to law school from almost every academic discipline. You may choose to major in subjects that are considered to be traditional preparation for law school, such as history, English, philosophy, political science, economics or business, or you may focus your undergraduate studies in areas as diverse as art, music, science and
mathematics, computer science, engineering, nursing or education. Whatever major you select, you are encouraged to pursue an area of study that interests and challenges you, while taking advantage of opportunities to develop your research and writing skills. Taking a broad range of difficult courses from demanding instructors is excellent preparation for legal education. (Source: the American Bar Association [http://www.americanbar.org/groups/legal_education/resources/pre_law.html])

After graduating from UMSL, students have gone on to attend law school locally at Saint Louis University, Washington University in St Louis, as well as at the University of Missouri-Columbia and University of Missouri-Kansas City. Graduates attend prestigious law schools outside the St Louis area as well.

There are hundreds of UMSL graduates who have gone to law school and now work as lawyers, judges, or in other careers in the legal profession. Many of them remain in the St Louis area, and the pre-law program at UMSL regularly brings them to campus to interact and share advice with students. By declaring yourself to be pre-law, you will receive updates about upcoming events and opportunities to meet and connect with alumni in the legal profession.

The pre-law advisor can assist you in selecting courses that will best meet your interests while also allowing you to develop the skills that are important for a successful law school application. For more information, please refer to the UMSL pre-law advising website.

Pre-Health Sciences

The University of Missouri - St. Louis provides advising for students planning to continue their studies to become healthcare professionals. While there are no pre-health majors, the prerequisite classes necessary for entry into health professions schools are offered in both the Fall and Spring Semesters with some being offered in the Summer as well. This allows students to choose any major offered by UMSL to be completed while pursuing their desired pre-health track. While some professional programs might not require a baccalaureate degree, it is strongly recommended to complete one in order to be as competitive as possible when applying.

There are no requirements to declaring a pre-health track, but students that have attended UMSL for two semesters and whose GPA is below a 2.7 will no longer be considered on a pre-health track. Students are able to appeal to be reinstated on a pre-health track after one semester.

Programs that are covered by UMSL’s pre-health advising include but are not limited to: medicine, dentistry, optometry, pharmacy, veterinary science, physician assistant, occupational therapy, physical therapy, chiropractic, and clinical lab science. For pre-health advising please contact 314-516-5501 for an appointment.

In addition to the courses listed below, students should actively seek out extracurricular opportunities. Such activities can include volunteering, shadowing, research, and organizational leadership. Students are encouraged to join some of the many on-campus organizations including one of the pre-health societies. Information about student organizations can be found at the Office of Student Life.

Since admission requirements may vary between schools, students should consult the catalogs of the programs to which they intend to apply. Updated information may be found on the pre-health website: www.umsl.edu/divisions/artscience/advising/prehealth/index.html.

Suggested Courses

Many health professions schools require or recommend the following undergraduate courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 1831</td>
<td>Introductory Biology: From Molecules to Organisms (MOTR BIOL 150L)</td>
</tr>
<tr>
<td>BIOL 1821</td>
<td>Introductory Biology: Organisms and the Environment (MOTR BIOL 150L)</td>
</tr>
<tr>
<td>BIOL 2012</td>
<td>Genetics</td>
</tr>
<tr>
<td>BIOL 2482</td>
<td>Microbiology</td>
</tr>
<tr>
<td>BIOL 3622</td>
<td>Cell Biology</td>
</tr>
<tr>
<td>BIOL 1131</td>
<td>Human Physiology and Anatomy I</td>
</tr>
<tr>
<td>BIOL 1141</td>
<td>Human Physiology and Anatomy II</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 1111</td>
<td>Introductory Chemistry I (MOTR CHEM 150L)</td>
</tr>
<tr>
<td>CHEM 1121</td>
<td>Introductory Chemistry II</td>
</tr>
<tr>
<td>CHEM 2612</td>
<td>Organic Chemistry I</td>
</tr>
<tr>
<td>CHEM 2622</td>
<td>Organic Chemistry II</td>
</tr>
<tr>
<td>CHEM 2633</td>
<td>Organic Chemistry Laboratory</td>
</tr>
<tr>
<td>CHEM 4712</td>
<td>Biochemistry</td>
</tr>
</tbody>
</table>

Mathematics

Select courses at least through calculus, as appropriate for the major degree.

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 1100</td>
<td>Basic Calculus</td>
</tr>
<tr>
<td>MATH 1800</td>
<td>Analytic Geometry and Calculus I</td>
</tr>
<tr>
<td>MATH 1320</td>
<td>Introduction to Probability and Statistics</td>
</tr>
</tbody>
</table>

Physics

As appropriate for the degree chosen:

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYSICS 1011, PHYSICS 1011L, PHYSICS 1012 and PHYSICS 1012L</td>
<td>Physics: Mechanics and Heat and Physics: Electricity, Magnetism, and Optics</td>
</tr>
</tbody>
</table>

1 The campus health professions advisor has copies of these catalogs. Call 314-516-5501 for an appointment.
2 Consult with the health professions advisor to determine the appropriate course(s).

Since students are not confirmed for admission to professional schools until the science requirements for admission are fulfilled, students should meet the science requirements before the end of the junior year. To complete these requirements in time, BIOL 1831 and BIOL 1821, Introductory Biology I and II as well as CHEM 1111 and CHEM 1121, Introductory Chemistry I and II should be taken during their first three semesters.

Successful completion of these recommended courses also helps students prepare for required standardized exams.
Students should take the required national standardized examination early in their junior year as is appropriate for the exam: The Medical College Admission Test (MCAT) for Pre-Med students; the Dental Aptitude Test (DAT) for Pre-Dental students; the Optometry Admission Test (OAT) for Pre-Optometry students; and the Pharmacy College Admission Test (PCAT), (if required) for Pre-Pharmacy students; and the Graduate Record Exam (GRE) is generally sufficient for other professional healthcare school. (Students should consult with their intended professional school for appropriate test information.)

Each year the number of applicants to health profession schools exceeds the number of available places. Students should meet with Career Services and the various campus advising resources are available to students to explore alternative plans should they not be accepted.

Pre-Optometry

The University of Missouri-St. Louis offers a four-year program of study leading to the Doctor of Optometry degree; this professional degree is administered by the College of Optometry. It is one of only 20 schools or colleges of optometry in the United States and the only one in the state of Missouri. This program, as a result, makes UMSL an ideal institution for Pre-Optometry education. Various programs are available for Pre-Optometry students as noted below.

Students may pursue a traditional 4 + 4 program, which is a bachelor’s degree followed by the four-year graduate optometry program. In this case, students may pursue any bachelor’s degree, as long as the pre-optometry requirements are met in biology, chemistry, math, physics, psychology and English.

Alternatively, the College of Arts & Sciences sponsors a 3+4 program in which the undergraduate degree is granted when the student satisfactorily completes the first semester of the professional program and has met all of the conditions for the specific undergraduate degree for which the student has applied. Most commonly, the degree awarded will be a Bachelors of Interdisciplinary Studies or a B.S. in Biology.

Students interested in this program must apply with the campus pre-health advisor and maintain a G.P.A. of 3.2. Some summer classes may be expected, and the student should be prepared to take the OAT by the end of their sophomore year.

For more information on admission requirements for the College of Optometry, please refer to the Optometry section of this Bulletin.

The recommend course schedule can be found below, any changes would need to be approved by both the Pre-Health Advisor, and the College of Optometry:

Total Hours: 117

1 May also be BIOL 4905 or CHEM 3905.
2 May be any Biology 4000 level lecture.

Psychological Sciences

General Information

Psychology Academic Advising Office

Undergraduate psychology majors and other students interested in majoring or minoring in Psychological Sciences should visit an Academic Advisor in the Psychology Academic Advising Office (Stadler 322) to receive specific information on degree requirements and course offerings, discuss questions about career options, and receive information about graduate work in Psychology. All students are encouraged to see a Psychology Academic Advisor regularly throughout their collegiate careers. It is especially important for all students who are within one calendar year of graduation to meet with a Psychology Academic Advisor. Students will minimize waiting time and will be assured one-to-one attention from an Academic Advisor by calling (314) 516-4561 to schedule an appointment. Office hours for Psychology Academic Advising can be obtained by e-mailing: psy_advising@umsl.edu.

Career Outlook

The undergraduate major in Psychological Sciences can provide the foundation for further training in psychology at the graduate level, the background necessary for graduate training in other fields such as the health professions, social work or counseling, or the liberal arts background necessary for entry level positions in many fields such as business, communication, and human services and mental health positions. To function specifically as a psychologist, a graduate degree is
required. For more career information please schedule an appointment with an Academic Advisor in the Psychology Academic Advising Office (Stadler 322; 314-516-4561; psy_advising@umsl.edu). For additional information, visit the American Psychological Association website at www.apa.org.

Facilities
The department has several animal and human experimental laboratories furnished with a wide range of psychophysiological equipment. The department also operates four facilities (Community Psychological Services (CPS), the Center for Trauma Recovery (CTR), the Center for Behavioral Health (CBH), and Children’s Advocacy Services of Greater St. Louis (CASGSL)) which provide training opportunities for students in Psychology, as well as providing psychological treatment and assessment services for citizens of the region.

Program Overview
The Psychological Sciences department offers a broad-based curricular plan leading to the Bachelor of Arts (B.A.) or the Bachelor of Science (B.S.) degree in Psychology as well as a minor in the field. The minor is available through online course work. There are several certificates that can be earned through the department including an undergraduate certificate in Workplace and Organizational Science (WOS) and an undergraduate and a graduate certificate in Trauma Studies. The department also participates in two interdisciplinary certificates with one in Neuroscience and a second in Child Advocacy Studies (CAST). The department also offers a terminal Master of Arts in Psychology, with a specialization in Behavioral Neuroscience. The department offers two options within its Ph.D. Program: Clinical Psychology or Behavioral Neuroscience.

Graduate School Preparation
Students interested in applying to graduate school in Psychology are strongly encouraged to become involved in a research project with a Psychology faculty member by securing enrollment in PSYCH 3390, Directed Studies. These positions are available on a limited and competitive basis. No enrollments in PSYCH 3390 are possible without special Instructor permission. Those invited to participate must obtain a special consent form from the instructor in order to enroll. Contact the Psychology Academic Advising office for more information on such positions (psy_advising@umsl.edu).

Degrees
Psychology BA (p. 585)
Psychology BS (p. 587)
Psychology MA, Behavioral Neuroscience Emphasis (p. 589)
Psychology MA, Industrial/Organizational Emphasis (p. 588)
Psychology PhD, Behavioral Neuroscience Emphasis (p. 590)
Psychology PhD, Clinical Community Psychology Emphasis (p. 591)
Psychology PhD, Industrial and Organizational Psychology Emphasis (p. 591)

Minors
Child Advocacy Studies Minor (p. 375)

Psychology Minor (p. 590)

Workplace and Organizational Science Undergraduate Certificate (p. 650)
Child Advocacy Studies Undergraduate Certificate (p. 375)
Psychology Clinical-Respecialization Graduate Certificate

Psychology Courses
PSYCH 1000 Choosing a Career in Psychology: 1 semester hour
Prerequisite: Psychology Major or consent of instructor. This course is an orientation to the field of psychology for majors and for students who are considering declaring the major. This course is to be completed by native and transfer Psychology majors during their first semester of study at UMSL. Students will be engaged in activities that will help them to develop and identify their professional goals, learn about the various specialties and careers available within the field of psychology, understand the education and skills necessary for various careers, learn the requirements for a psychology major, become familiar with minors that are available at UMSL, think about a possible choice of minor or certificate, and become acquainted with the interest areas of UMSL faculty in Psychology and related fields. All Psychology majors must complete this course during the first semester at UMSL with a grade of C- or higher.

PSYCH 1003 General Psychology (MOTR PSYC 100): 3 semester hours
A survey of the basic concepts, theories, and pivotal findings over the past 100 years in the science of Psychology, with special emphasis on contemporary concepts and findings that focus on the relation of the brain to normal and pathological behaviors. All Psychology majors must complete this course with a grade of C- or higher.

PSYCH 2040 Attraction: An Evolutionary Approach: 3 semester hours
Prerequisites: PSYCH 1003. This course examines the topics of interpersonal and sexual attraction in a scientific context through the milieu of popular media outlets as well as published empirical literature from the fields of Psychology, Anthropology, Ecology, Economics, and Gender Studies. Specific topics include attraction cues, jealousy, monogamy, infidelity, the economics of sex, and the long-term and short-term mating strategies of men and women. We will also investigate the technological and media manipulation of sexual cues, as well as conflicts between the sexes, religion and sex, the peopling of the earth, the fundament of evolved psychological mechanisms, identifying adaptive problems and potential solutions, gender roles, parental investment, issues of kinship, and inter- and intra-sexual competition.

PSYCH 2200 Drugs and Behavior: 3 semester hours
Prerequisite: PSYCH 1003. This course is an introduction to psychopharmacology and the relationship among drugs, and how these impact the brain and behavior. The emphasis is on physiological mechanisms underlying the behavioral responses to psychotherapeutic substances, illicit psychoactive drugs, commonly used substances (alcohol, nicotine, caffeine), and drug-like substances produced naturally in the body.
PSYCH 2201 Psychological Statistics: 4 semester hours
Prerequisites: PSYCH 1003 and satisfaction of the University's mathematical skills requirement. (With Laboratory) This course serves as an introduction to statistical concepts and methods used in Psychological measurement and the analysis and interpretation of social sciences data. Topics include descriptive statistics, frequency distributions centrality, variability, and correlational measures; as well as an introduction to statistical inference, sampling fundamentals, significance testing and effect size, t-test, and analysis of variance. All Psychology majors must complete this course with a grade of C- or higher before registering for PSYCH 2219.

PSYCH 2205 Human Sexuality: Psychological Perspectives: 3 semester hours
Prerequisites: PSYCH 1003. This course is a comprehensive overview of human sexuality from the standpoint of the behavioral science of Psychology. This course includes a study of sexual anatomy and physiology, intersex classifications, sex and gender differences, sexual orientation, interpersonal and interpersonal aspects of human sexuality, classification and treatment of sexual dysfunction and sexual disorders, sexual victimization, and the methods employed for the scientific examination of human sexual behavior.

PSYCH 2211 Introduction to Biological Psychology: 3 semester hours
Prerequisites: PSYCH 1003 and 3 hours of BIOL chosen from either BIOL 1012, or BIOL 1102, or BIOL 1831. Students with career goals that include graduate study in Psychology are urged to complete the BIOL 1831 prerequisite for this course. This course introduces psychology students to behavioral neuroscience and neuropsychology. Course topics include basic neuroanatomy and neurophysiology, neurodevelopment, sensory and motor systems, and the integration of subcortical and cortical networks. All are covered with an emphasis on behavioral outcomes of normal and pathological functioning of the brain. All psychology majors must complete this course with a grade of C- or higher.

PSYCH 2219 Research Methods in Psychological Science: 3 semester hours
Prerequisites: PSYCH 2201 and ENGL 3100. This course is a comprehensive overview of research methods in the psychological sciences. Topics may include technical scientific writing in current APA format, critical evaluation of research literature, the application of statistical methods, and mastery of the ethical principles guiding psychological sciences research. Course and laboratory work involve designing and evaluating research questions, formulating research hypotheses, designing and conducting original research studies, and presenting research results. All psychology majors must complete this course with a grade of C- or higher.

PSYCH 2220 Psychology of Gender: 3 semester hours
Same as GS 2230. Prerequisite: PSYCH 1003. Evaluation of psychological theories and research regarding physiological, cognitive, and personality gender differences and similarities, gender related problems in adjustment, and gender specific clinical interventions.

PSYCH 2245 Abnormal Psychology: 3 semester hours
Prerequisite: PSYCH 1003. This course examines the historical views and current perspectives on the possible antecedents, symptoms, and treatments of major psychological disorders, including anxiety, dissociative, mood, somatoform, eating, schizophrenia and substance-related disorders. Major diagnostic categories and criteria, individual and social factors of maladaptive behavior, methods of clinical assessment, research strategies, and types of therapy will also be covered. All psychology majors must complete this course with a grade of C- or higher.

PSYCH 2250 Social Psychological Science: 3 semester hours
Prerequisite: PSYCH 1003. This course examines the scientific study of the way people think, feel, and behave in social situations. The content focuses on understanding how people influence, and are influenced by, real or imagined others. Specific topics may include the self, social judgments, attitudes and persuasion, helping behavior, prejudice, aggression, attraction, conformity and obedience, and group processes.

PSYCH 2268 Lifespan Developmental Psychology (MOTR PSYC 200): 3 semester hours
Prerequisites: PSYCH 1003. This course examines development over the lifespan with an emphasis on the developmental tasks and challenges of each age period.

PSYCH 2270 Developmental Psychology: Infancy, Childhood and Adolescence: 3 semester hours
Prerequisites: PSYCH 1003. This course systematically examines theories and research concerning the physical, social, emotional, and cognitive development of children from conception through adolescence. It will provide students with a basic knowledge of infant, child, and adolescent development; its subject matter; its approaches to gathering and evaluating evidence about the causes of behavior; and the ways in which our knowledge is applied to enhance the development and the quality of life of children. It is intended for Psychology majors and students with career interests in research, education, and/or the treatment of children. All Psychology majors taking this course instead of PSYCH 2160, must complete it with a grade of C- or higher.

PSYCH 2285 American Culture and Minority Mental Health: 3 semester hours
Prerequisites: PSYCH 1003. Provides an examination of the relationship between American culture and mental health. The focus is on the lives of American minority groups, with specific attention given to how racism, prejudice, and minority status currently reveal themselves within a mental health framework. An eclectic, multidisciplinary approach that draws from clinical and social psychology will be utilized.

PSYCH 2299 Directed Readings in Psychology: 3 semester hours
Prerequisites: PSYCH 1003 or SOC 1010, or consent of instructor. This course will provide an intellectual forum for discussing classic and contemporary theories and research in psychology on a selected topic. Students can retake the course as long as the topic is different.

PSYCH 2500 Human Motivation: 3 semester hours
Prerequisite: PSYCH 1003. This course approaches human motivation through a biopsychosocial perspective, including theories of motivation, individual motivation, and how motivation differs. Application will include real-life workplace and educational psychology contexts.

PSYCH 3200 Sports Psychology: 3 semester hours
Prerequisites: PSYCH 1003. This course examines psychological, biological, and social aspects of sport and human performance. Course topics may include performance enhancement, mental skills training, motivation, group dynamics, as well as physiological responses to stress and anxiety in sport.
PSYCH 3205 Evolutionary Psychology: 3 semester hours
Prerequisites: PSYCH 2211. Evolutionary Psychology refers to a fundamentally unique approach to studying and thinking about human and animal behavior through considerations of 1. The challenges and stressors encountered in ancestral environments, 2. The proximate physical, psychological, and anatomical methods that evolved to meet these adaptive problems, and 3. How adaptive or maladaptive these mechanisms are in current environments. Special emphasis will be placed on the evolution of brain structures, cognitive processes, and social behaviors. The content for this course is not new; Evolutionary Psychology involves looking at the science of Psychology through a unique lens, shaped by its tenets. Although appreciation for this approach to psychological research is increasing, it remains controversial in psychology circles. We will discuss the state of this aspect of Psychology as well.

PSYCH 3232 Psychology of Trauma: 3 semester hours
Same as GS 3232. Prerequisites: PSYCH 1003. This course examines responses to potentially traumatic events (e.g., child abuse and neglect, physical and sexual assault, intimate partner violence, community and gun violence, war, natural disasters). Trauma exposure, posttraumatic growth, the development of trauma-related difficulties including PTSD, assessment and intervention are examined with attention to gender, cultural, and lifespan issues.

PSYCH 3280 Psychology of Death and Dying: 3 semester hours
Same as GERON 3280. Prerequisite: PSYCH 1003 or consent of the instructor. An exploration of end-of-life issues integrating the scholarly, social, and individual dimensions of death and dying. This course provides a solid grounding in theory and research, as well as practical application to students' lives.

PSYCH 3290 Traumatic Stress in Childhood and Adolescence: 3 semester hours
Same as CAST 3290. Prerequisites: PSYCH 2270 (majors) or PSYCH 2268 or ED PSY 2212 or approval from the instructor. This course is an exploration of the biopsychosocial impact of community, family, and individual trauma and stressors experienced during infancy, childhood, and adolescence. It introduces students to relevant theoretical frameworks, cultural considerations, and advocacy strategies.

PSYCH 3295 Selected Projects in Field Placement: 3 semester hours
Prerequisites: 15 credit hours of psychology and consent of instructor. This course provides for selected options in field work placement experiences on campus or in various local agencies with training and supervision by faculty. It may be repeated once for credit.

PSYCH 3318 Industrial and Organizational Psychology: 3 semester hours
Same as MGMT 3623. Prerequisites: PSYCH 2201 or MATH 1105 (or equivalent). This course introduces students to psychological research and theories pertaining to human behavior in the work setting. Topics covered may include: selection, performance appraisal, training, leadership, motivation, job satisfaction, and organizational design.

PSYCH 3340 Clinical Problems of Childhood: 3 semester hours
Prerequisites: PSYCH 2245 or PSYCH 2270. This course will address the clinical disorders and difficulties of children, as well as the causes and the treatment of these disorders. Topics addressed may include autism, childhood schizophrenia, conduct disorders, learning disabilities, ADHD, mood disorders, health-related disorders, anxiety disorders, and child maltreatment. Treatments designed for specific use with children, including behavioral, drug and community mental health approaches will be addressed. This course is recommended for those going on to graduate work in psychology.

PSYCH 3346 Introduction to Clinical Psychology: 3 semester hours
Prerequisite: PSYCH 1003, PSYCH 2245; and three additional hours of Psychology. This course provides a conceptual framework for research, description and understanding of clinical phenomena. Assessment, interviewing, the clinical use of tests and psychological approaches to treatment are also addressed.

PSYCH 3390 Directed Studies: 1-6 semester hours
Prerequisite: Consent of instructor. Directed reading and research. May be repeated for a maximum total of ten hours.

PSYCH 3500 Health Psychology: 3 semester hours
Prerequisite: PSYCH 1003 and three additional hours of Psychology. Health Psychology involves the discipline and principles of psychology and behavior in understanding how the mind, body, and behavior interact in health and disease. Class topics include theoretical foundations of health and illness, health promotion and primary prevention of illness, health enhancing and health damaging behaviors, psychosomatic illness, stress and coping, pain management, and a variety of specific behavior-related medical illnesses (e.g., heart disease, eating disorders, cancer, AIDS).

PSYCH 3820 Cross-Cultural Psychology: 3 semester hours
Prerequisites: PSYCH 1003 and 9 hours of Psychology. The purpose of this course is to present students with a broad theoretical and applied overview of cross-cultural psychology. To this end, the course presents an orientation to the definitions, concepts, theories, and methodologies of cross-cultural psychology. Included is an examination of cultural and ecological factors and their influences on perceptual and cognitive processes, personality, language, and other psychological variables.

PSYCH 3995 Undergraduate Teaching Internship in Psychology: 1 semester hour
Prerequisites: PSYCH 1003 and six additional credits in Psychological Sciences (9 credits minimum), and instructor consent. This course prepares students to work as learning assistants, tutors, or peer mentors for courses within the Department of Psychological Sciences. Students will develop general pedagogical skills. Specific teaching assistant duties will be determined by the instructor of record for the associated course. This course may be repeated for up to 3 total credit hours.

PSYCH 4250 Stereotyping, Prejudice, and Discrimination: 3 semester hours
Prerequisites: PSYCH 2219 and PSYCH 2250, or consent of instructor. This course provides an intellectual forum for discussing classic and contemporary theories and methodologies focused on understanding stereotyping, prejudice, and discrimination. Using a social psychological framework, students will assess psychology's current understanding of why people use and apply stereotypes in their everyday thinking and behavior. Students will also explore such topics as social categorization, stereotype activation, contemporary forms of prejudice, the social context of prejudice, the consequences of prejudice and discrimination, the stigmatized target's perspective, coping with prejudice, and techniques for reducing prejudice and discrimination.

PSYCH 4300 Introduction to Psychopharmacology: Drugs and Mental Illness: 3 semester hours
Prerequisites: PSYCH 1003, PSYCH 2211 or PSYCH 2200; PSYCH 2245. The course is designed to provide an introduction to drugs used to treat anxiety disorders, major depression, schizophrenia, and other psychopathologies. The emphasis will be on understanding neural mechanisms related to psychological disorders and to the effectiveness of current drug treatments.
PSYCH 4305 Developmental Psychology: Cognitive Development of Children: 3 semester hours
Prerequisites: PSYCH 1003, PSYCH 2270, and Junior standing, or consent of instructor. Data and theory concerned with how children's thinking changes over time. Discussion will include domain-general versus domain-specific theories, social and cultural influences on cognition, gains in memory, attention, problem solving, and metacognition, conceptual development, children's naive theories, schooling, and various definitions and measures of intelligence.

PSYCH 4311 Psychology of Nonverbal Behavior: 3 semester hours
Prerequisites: PSYCH 2250 and ENGL 3100. This writing-intensive course examines the psychological perspective on the role of nonverbal behavior in social settings. Primary concerns of the course will include an analysis of the functions of nonverbal behavior (e.g., regulating interaction, expressing intimacy, exercising influence, and managing impressions), factors influencing nonverbal expression (e.g., culture, personality, relationships), and various theoretical views on nonverbal communication. Applications to various problems and settings in everyday life will also be pursued.

PSYCH 4314 Behavioral Neuroscience: 3 semester hours
Prerequisites: PSYCH 2211 or BIOL 1831 or consent of instructor. This neuroscience course focuses on behavioral outcomes of brain function and dysfunction. Course emphasis will be on modern research methods with animal models and humans. Topics discussed may include the classic findings in the field, but the emphasis will be on recent findings from human neuropsychology, neuroimaging, cognitive neuroscience, neuropharmacology, and neuroendocrinology.

PSYCH 4316 Developmental Psychology: Social Development of Children and Adolescents: 3 semester hours
Prerequisites: PSYCH 1003, PSYCH 2270, and junior standing, or consent of instructor. This course examines data and theory concerned with social behavior in infants, preschoolers, and school-aged children. Discussion will include emotional regulation; measurement and nature of temperament; the formation and maintenance of attachment relationships; sex-role development; and theories of aggression and the effects of socializing agents such as family, peers, media, and culture on development.

PSYCH 4330 Hormones, The Brain and Behavior: 3 semester hours
Prerequisites: 9 hours of psychology or biology, including at least one of the following: PSYCH 2200, PSYCH 2211, or PSYCH 4300 or consent of instructor. Historically, hormones have been studied for their role in reproduction, including reproductive physiology and sexual behaviors. It is now clear, however, that the endocrine system actively interacts with brain regions unrelated to reproduction with the result that sex hormones and neuropeptide hormones influence a wide range of behaviors including mood, anxiety, stress responses, cognition, memory, violence, attachment, aging, weight control and athletic prowess. Emphasis of the class is on hormonal contribution both to reproductive and non-reproductive behaviors with special attention paid to gender behavioral differences. This course may be taken for graduate credit with permission of the instructor.

PSYCH 4340 Introduction to Human Neuroanatomy: 3 semester hours
Prerequisites: Grade of B- or above in PSYCH 2211, and nine hours of psychology or biology or consent of instructor. This course is an intensive introduction to brain anatomy. It will explore the structure and function of the human nervous system with the goal of preparing students for advanced study in neuroscience-related fields. Topics will include a review of core concepts from cellular neuroscience, neuroanatomical techniques, sensory and motor systems, and the anatomical basis of cognitive functions. Based on an understanding of typical brain structure and function, the anatomical and physiological basis of various neurological disorders is explored.

PSYCH 4349 Human Learning and Memory: 3 semester hours
Prerequisites: PSYCH 2211 and six additional hours of psychology; or consent of instructor. This course focuses on the basic forms of learning and memory such as habituation, sensitization, conditioning, and skill/procedural memory, as well as more complex forms of learning and memory such as semantic memory, episodic/autobiographical memory, short-term and working memory, and social learning. Students will learn about the neurobiological basis of learning and memory on both cellular and system levels. In addition, students will study how factors such as emotion and age affect learning and memory as well as the relevance of learning and memory for clinical and legal environments.

PSYCH 4350 Emotions and the Brain: 3 semester hours
Prerequisites: PSYCH 2211 and six additional hours of psychology; or consent of instructor. Emotions play an important role in everyday life. But what exactly is an emotion? And what happens in your body when you experience an emotion? More specifically, what happens in your brain? Doesn't the limbic system have something to do with emotions? What are the differences and similarities between emotions (such as anger) and motivations (such as hunger)? What happens in your body and brain when you fall in love? And how do emotions influence cognition, such as attention and memory? Conversely, does cognition influence our emotions as well? These are some of the questions that we will answer in this course. Given that many mental disorders involve emotional disturbances, this course is not only relevant for students who are interested in the fundamental knowledge of emotions, but also for students who are interested in clinical psychology.

PSYCH 4356 Cognitive Processes: 3 semester hours
Prerequisite: Nine hours of psychology or consent of instructor. This course is an overview of the major topics in cognitive psychology, including perception, visual imagery, attention, memory, knowledge representation and retrieval, language, problem solving, reasoning, judgment, decision making, and intelligence.

PSYCH 4365 Psychological Testing and Assessment: 3 semester hours
Prerequisites: Grade of C- or above in PSYCH 2201, or consent of instructor. This course covers the uses, construction, and evaluation of psychological tests and assessments. Students will learn about tests designed to measure personality, intelligence, and other individual differences, including issues related to test use in specific settings. Examination of professionally-developed tests and hands-on learning exercises will be key aspects of the course.
PSYCH 4374 Introduction to Clinical Neuropsychology: 3 semester hours
Prerequisites: PSYCH 2211 and PSYCH 2245, or consent of instructor.
This course is an introduction to current theory and practice of clinical neuropsychology with a focus on neuropsychological findings concerning relationships between the brain and behavior. Particular attention is devoted to function, neuroanatomy, neurological syndromes, patterns of brain impairment associated with various medical diseases, and methods of neuropsychological assessment and intervention.

PSYCH 4376 Mental Health and Aging: 3 semester hours
Same as GERON 4376. Prerequisites: PSYCH 2245 or consent of instructor.
This course provides a survey of theory and research in mental health issues for older populations, focusing on psychological and social aspects of mental health and functioning. The course details approaches to understanding healthy aging, along with the prevalence, etiology, assessment and treatment of psychological disorders in older adults. The course also provides an overview of health care and community-based delivery systems for behavioral health, and allows students to explore information about careers in aging.

PSYCH 4392 Selected Topics in Psychology: 1-3 semester hours
Prerequisite: Twelve hours of psychology and consent of instructor. A seminar of selected issues and methods in psychology. May be repeated once for credit.

PSYCH 4398 Child Maltreatment: A Multidisciplinary Approach: 3 semester hours
Same as SOC WK 4398 and CAST 4398. Prerequisites: CAST 3290 or PSYCH 3290 (may be taken concurrently), or consent of instructor.
This course, with its interdisciplinary emphasis, focuses on the systemic response to the primary domains of child maltreatment by multidisciplinary teams and child advocacy centers. Risk factors, cultural considerations, and mandated reporting of child abuse and neglect are emphasized. Students will begin to develop professional skills pertaining to child maltreatment, using a variety of experiential learning modalities.

PSYCH 4500 Physiology & Pharmacology of Aging: 3 semester hours
Same as GERON 4500. Prerequisites: Junior/senior undergraduate or graduate standing, or consent of the instructor or program director. This course examines functional health in advancing age and the impacts of common disease processes on the aging body. Symptom presentations, diagnostic considerations, treatment and management issues are discussed. A special emphasis is placed on pharmacology, especially how the aging body responds to different medication types, risks for drug-drug interactions, and challenges associated with polypharmacy. The course emphasizes a “whole person” approach to health and well-being, and targets the learning needs of those wishing to work with older adults in health, social and community service settings.

PSYCH 4999 Integrated Psychology: 2 semester hours
Prerequisites: Consent of instructor. This capstone course serves as a review of the primary sub-fields of psychology. An advanced general psychology textbook will guide the class through important contemporary topics in behavioral neuroscience, learning and memory, cognition, psychopathologies and their treatments, and developmental and social psychology. The Major Field Aptitude Test in Psychology will serve as the final exam for the course. This course is restricted to Psychology majors and must be taken during majors’ final semester of study. Students are expected to have already completed their application to graduate. All Psychology majors must complete this course with a grade of C- or higher.

PSYCH 5001 Neuropsychological Assessment: 3 semester hours
Prerequisites: Admission to Psychology graduate program, or consent of instructor. This graduate level course will review neuropsychological systems that mediate primary cognitive networks and methods of assessments and interpretation of data. The course will also review common neurological and psychiatric conditions that result in neuropsychological compromise.

PSYCH 5340 Human Neuroanatomy: 3 semester hours
Prerequisites: Admission to graduate program in psychology or consent of instructor. This course provides an overview of brain anatomy for graduate students in psychology and related disciplines. It explores the structure and function of the human nervous system both in health and disease. The course will cover core concepts from cellular neuroscience, neuroimaging and neuroanatomical techniques, sensory and motor systems, and the anatomical basis of cognitive functions.

PSYCH 5407 Psychopharmacology: 3 semester hours
Prerequisite: 12 units of graduate-level. An examination of the effects of drugs on the brain and on behavior. Primary emphasis is on those drugs used in the treatment of affective disorders, schizophrenia and anxiety.

PSYCH 5465 Seminar: Behavioral Neuroscience: 3 semester hours
Prerequisites: Graduate standing or permission of instructor. Behavioral neuroscience is the study of the relation of the brain to behavior. The field has emerged as the new face of psychology; there are few subfields in psychology that have not been influenced by findings from animal labs, and from human studies employing physiological recordings, neuroimaging and psychotherapeutic drugs. This course will serve as an introduction for graduate students in psychology of brain morphology and function with an emphasis on normal and pathological behaviors.

PSYCH 5468 Seminar: Cognitive Processes: 3 semester hours
Prerequisites: Admission to the Graduate Program in Psychology or consent of instructor. This course is an introduction to classic and contemporary theories, methodologies, and theoretical perspectives used in the field of cognitive psychology. The emphasis is on basic research in the field of cognitive psychology but some applications of these experiments are discussed as well. The class will read and discuss chapters from cognitive psychology textbooks as well as classic and contemporary empirical journal articles in cognitive Psychology.
PSYCH 6410 Gender, Sexuality, and Mental Health: 3 semester hours
Same as GS 6410. Prerequisites: Admission to the doctoral program in Clinical Psychology or consent of instructor. This course will focus on contemporary theory and research on gender and sexuality as they pertain to mental health issues. Gender differences and similarities in the presentation, etiology, and treatment of sexual health problems and other mental illnesses will be discussed.

PSYCH 6415 Seminar in Health Psychology & Behavioral Medicine: 3 semester hours
Prerequisites: Consent of instructor. This course analyzes research, theory, and clinical applications in the interrelationships of behavior, psychological states, physical health and disease. Discussion includes theoretical foundations of health and illness, biopsychosocial factors affecting health and illness, diagnostic issues, prevention, interdisciplinary treatment applications, health and public policy, and research issues. Critical evaluation of theory and empirical support for clinical applications will be discussed.

PSYCH 6441 Aging and Health Behavior: 3 semester hours
Same as GERON 6441. Prerequisite: Graduate standing. This course examines sociocultural influences on health care practices of older adults. The role of social support and other social resources in the health behavior of older adults is emphasized. Topics include self care decisions, formal service utilization, family caregiving, and planned interventions for older adults.

PSYCH 6448 Multicultural Issues in Clinical Psychology: 3 semester hours
Prerequisites: Admission to the doctoral program in Clinical Psychology or consent of instructor. A survey of theoretical perspectives utilized in the treatment of various cultural groups. Their relationship to and implications for the treatment of members of various cultural groups will be explored. Strategies and ethical concerns in diagnosis, test interpretation, and treatment are considered.

PSYCH 6466 Seminar: Developmental Psychology: 1-3 semester hours
Prerequisites: Admission to the doctoral program in Clinical Psychology or consent of instructor. A critical examination of contemporary problems in developmental psychology.

PSYCH 7403 Psychopathology: 3 semester hours
Prerequisite: Admission to clinical psychology program or permission of instructor. A critical examination of the clinical-experimental literature in psychopathology. Etiologies of cognitive/affective functions and dysfunctions are explored, and implications for therapeutic interventions are considered.

PSYCH 7404 Introduction to Clinical Assessment I: 4 semester hours
Prerequisites: Admission to Clinical Psychology program. Fundamentals of clinical assessment with emphasis on interviewing and the measurement of cognitive functioning. This course includes a laboratory.

PSYCH 7406 Introduction to Clinical Assessment II: 4 semester hours
Prerequisites: PSYCH 7404. This course addresses theory and techniques of personality assessment including clinical interviewing, objective and projective assessment, and integrative report writing.

PSYCH 7412 Social Psychology: 3 semester hours
Prerequisites: Admittance to psychology doctoral program or consent of instructor. A review of key areas in contemporary theory and research in social psychology.

PSYCH 7421 Quantitative Methods I: 4 semester hours
Prerequisites: Admission to the Graduate Program in Psychology or consent of instructor. A comprehensive study of univariate statistical concepts and analyses used in psychological research. Topics include descriptive statistics, normal distributions, z, t, F, chi-square statistics, and distributions. Correlation, simple and multiple regression, factorial and repeated measures analysis of variance, significance testing and effect size are also examined.

PSYCH 7422 Quantitative Methods II: 4 semester hours
Prerequisites: PSYCH 7421 and consent of instructor. (With laboratory) A comprehensive study of the use of multivariate statistics in data analysis. Topics include the general linear model, multiple regression, factor analysis, and multivariate analysis of variance.

PSYCH 7423 Quantitative Methods III: 3 semester hours
Prerequisites: PSYCH 7422 and PSYCH 7429 and consent of instructor. A selective study of the use of multivariate statistics in data analysis. Topics include structural equation modeling, multilevel modeling, and analysis of longitudinal data.

PSYCH 7429 Psychometric Theory: 3 semester hours
Prerequisites: PSYCH 7421, PSYCH 7422 and consent of instructor. A consideration of classical and modern theories of psychological testing. Topics include test reliability, validity and construction.

PSYCH 7430 Introduction to Clinical Skills: 1 semester hour
Prerequisites: Admission to doctoral program in clinical psychology. An introduction to processes and procedures involved in psychotherapy.

PSYCH 7431 Clinical Supervision: 1-3 semester hours
Prerequisite: Admission to Clinical Psychology Program. Supervised experience in clinical practice. May be repeated six times for credit.

PSYCH 7432 Ethics and Professional Issues: 3 semester hours
Prerequisites: Admission to Clinical Psychology program. A study of issues in professional development, clinical supervision, risk management, and ethical standards as they relate to teaching, research, and professional practice.

PSYCH 7433 Clerkship in Clinical Psychology: 1 semester hour
Prerequisites: Admission to the doctoral program in Clinical Psychology. Supervised training in an affiliated agency or organization following completion of two years of course work. (May be repeated 3 times).

PSYCH 7434 Foundations of Clinical Interventions: 3 semester hours
Prerequisites: Admittance to Clinical Psychology program. This course focuses on conceptual and methodological issues that are central to the development, evaluation and application of interventions in clinical psychology. Topics include efficacy and effectiveness research, introduction to theories of behavior change, and applications with specific populations.

PSYCH 7439 Summer Supervision: 1 semester hour
Prerequisites: PSYCH 7431. Supervised experience in clinical practice at all graduate year levels during the summer months. Can be repeated for credit.

PSYCH 7442 Seminar: Cognitive and Behavioral Interventions: 3 semester hours
Prerequisites: PSYCH 7434. This course focuses on the theory and practice of cognitive-behavioral interventions in the field of clinical psychology.
PSYCH 7447 Trauma and Recovery: 3 semester hours
Prerequisites: Graduate Trauma Studies Certificate. A comprehensive seminar on the psychological effects associated with exposure to potentially traumatic events. The course will include information on the history of trauma studies; definitions of stressful and traumatic events; common responses to these events; theoretical models for conceptualizing traumatic responses; information on specific types of traumatic events; and issues in treatment.

PSYCH 7449 Research Methods and Project Development in Applied Psychology: 1-3 semester hours
Prerequisite: Admission to the Graduate Program in Psychology or consent of instructor. This course focuses on the basics of conducting research in Industrial-Organizational Psychology. Topics include: philosophy of science; reliability and validity; experimental, quasi-experimental, and non-experimental designs; power; meta-analysis; survey/item analyses; and cross-cultural methods. In addition, the course includes group supervision of initial research that leads to thesis or dissertation proposals. Can be taken up to three times for a total of 6 credit hours.

PSYCH 7450 Clinical Internship I: 1-9 semester hours
Prerequisite: Consent of advisor. Formal, one-year, full-time internship providing student with in-depth supervised training within a site approved by the American Psychological Association. This course is repeated in the fall and spring semesters of the internship year.

PSYCH 7451 Clinical Internship II: 1-8 semester hours
Prerequisite: PSYCH 7450 and consent of advisor. Formal, one-year, full-time internship providing student with in-depth supervised training within a site approved by the American Psychological Association. (Taken in the final summer of the internship year).

PSYCH 7454 Seminar: Personnel Psychology: 3 semester hours
An analysis of theories and research in personnel and industrial psychology. Topics include testing, assessment centers, performance appraisal, and interviewing.

PSYCH 7455 Seminar: Organizational Psychology: 3 semester hours
An analysis of theories and research in organizational psychology. Topics include theories of motivation, leadership, job design, group process decision-making, organizational effectiveness, and the relation between organizations and their environment.

PSYCH 7457 Seminar: Special Topics in Industrial Psychology: 3 semester hours
A seminar of selected issues and methods in personnel psychology.

PSYCH 7458 Seminar: Special Topics in Organizational Psychology: 3 semester hours
A seminar of selected issues and methods in organizational psychology.

PSYCH 7459 Practicum in Industrial/Organizational Psychology: 1-4 semester hours
Supervised experience in personnel or human resource management.

PSYCH 7461 Summer Research in I/O Psychology: 1 semester hour
Prerequisites: Admission to I/O program. Supervised experience on research topics in I/O psychology at all graduate year levels during the summer months. Can be repeated for credit.

PSYCH 7465 Applied Issues in Organizational Psychology: 3 semester hours
Prerequisites: PSYCH 7455 or consent of instructor. Course focuses on the application of psychological theory and principles to organizational development consulting. While such consulting is ultimately intended to enhance organizational level functioning, applications of this approach begin with learning at the individual and small group levels. In this course, students work through real-world cases that address real organizational problems. In addition to this casework, the readings and class discussions will address the theoretical and practical links between individual/team learning and organizational development.

PSYCH 7466 Seminar Series in Industrial/Organizational Psychology: 1 semester hour
Prerequisites: Open only to students in the I/O Psychology Graduate Program. A seminar series involving speakers, presentations, and discussions focusing on applied and theoretical perspectives, techniques, and research in the field of Industrial/Organizational Psychology. May be taken up to 6 times for credit.

PSYCH 7469 I/O Professional Issues and Ethics: 3 semester hours
Prerequisite: Consent of Instructor. In this course students learn the ethical standards as they relate to teaching, research and professional practice in industrial organizational psychology. Other professional and career issues are also discussed.

PSYCH 7472 Special Topics in Psychology: 1-3 semester hours

PSYCH 7474 Clinical Research in Applied Settings: 3 semester hours
Prerequisites: PSYCH 7421 and PSYCH 7422. This course provides information on the design and implementation of research in applied settings (e.g., human service agencies). Topics include program evaluation, consultation models, risk factor analysis, presentation and health promotion, and quality control.

PSYCH 7476 Seminar in Developmental Psychopathology: 2 semester hours
Prerequisites: Admission to the doctoral program in Clinical Psychology or consent of instructor. Introduction to principles, theory, and methods of study in the field of clinical child psychology. Emotional and behavioral dysfunctions are considered from developmental and socialization perspectives.

PSYCH 7477 Directed Research in Industrial/Organizational Psychology: 1-4 semester hours
Independent study of an issue in industrial/organizational psychology through the application of research techniques.

PSYCH 7478 Directed Readings in Industrial/Organizational Psychology: 1-4 semester hours
Independent literature review of a topic in industrial/organizational psychology.

PSYCH 7483 Directed Research: 1-10 semester hours

PSYCH 7484 Directed Readings: 1-10 semester hours

PSYCH 7485 Seminar in Clinical Science: 1-3 semester hours
Prerequisites: Graduate standing in Clinical Psychology. This course discusses professional identity as a clinical scientist and development of programmatic research. Readings include theories and methodologies within clinical psychology, with group supervision of proposals for program research milestones. May be repeated once for credit.
PSYCH 7486 Research Team II: 2 semester hours
Prerequisites: Completion of Independent Research Project or third year standing in doctoral program in clinical psychology. Group supervision of advanced research related to dissertation proposal and program's comprehensive examination required for doctoral candidacy.

PSYCH 7487 Thesis Research Project: 1-6 semester hours
Prerequisites: Admission to the doctoral program in clinical psychology. Supervised original research project of a clinically-related topic.

PSYCH 7488 Specialty Examination Research: 1-6 semester hours
Prerequisites: Admission to the doctoral program in Clinical Psychology. Supervised original review and analysis of a clinically related topic.

PSYCH 7491 MA Thesis Research: 1-10 semester hours
Prerequisite: Graduate standing and consent of instructor.

PSYCH 7492 Ph D Thesis Research: 1-10 semester hours
Prerequisite: Graduate standing and consent of instructor.

Child Advocacy Studies Courses
CAST 1000 Introduction to Child Advocacy Studies: 3 semester hours
This survey course explores how child-serving systems have evolved, the functions they serve, and the roles they play in the lives of children and families. Key legislation, concepts, theories, and historical and contemporary approaches will be examined to highlight the types of advocacy relevant to children and the career paths associated with them. Students will examine skills needed for success as a child advocate, including collaboration and secondary traumatic stress prevention.

CAST 2200 Policy and Global Issues in Child Advocacy: 3 semester hours
Prerequisites: CAST 1000. This course reviews the history and implications of key national and international policies related to child advocacy. Students will explore the components of policy-making and strategies for effective policy advocacy. Students will also engage in advocacy efforts with policy-makers on behalf of children.

CAST 2300 Ethics and Values in Child Advocacy: 3 semester hours
Prerequisites: CAST 1000. This course explores the ethical, legal and professional issues related to child advocacy. Students will study the codes of ethics from a range of multidisciplinary perspectives and apply ethical decision making processes to case studies. The values inherent in a variety of child-serving sectors will be considered, as well as the conflict resolution practices aimed at resolving tensions between professionals.

CAST 3290 Traumatic Stress in Childhood and Adolescence: 3 semester hours
Same as PSYCH 3290. Prerequisites: PSYCH 2270 (majors) or PSYCH 2268 or ED PSY 2212 or approval from the instructor. This course is an exploration of the biopsychosocial impact of community, family, and individual trauma and stressors experienced during infancy, childhood, and adolescence. It introduces students to relevant theoretical frameworks, cultural considerations, and advocacy strategies.

CAST 4398 Child Maltreatment: A Multidisciplinary Approach: 3 semester hours
Same as PSYCH 4398 and SOC WK 4398. Prerequisites: CAST 3290 or PSYCH 3290 (may be taken concurrently), or consent of instructor. This course, with its interdisciplinary emphasis, focuses on the systemic response to the primary domains of child maltreatment by multidisciplinary teams and child advocacy centers. Risk factors, cultural considerations, and mandated reporting of child abuse and neglect are emphasized. Students will begin to develop professional skills pertaining to child maltreatment, using a variety of experiential learning modalities.

CAST 4498 Forensic Investigation of Child Abuse: 3 semester hours
Prerequisites: CAST 4398 or PSYCH 4398 or SOC WK 4398. This course is designed for students across multiple disciplines where knowledge of child abuse investigation and advocacy is necessary. It focuses on the investigative and prosecutorial responses of multidisciplinary team professionals involved with child abuse cases to expand the student’s knowledge and skills about the most effective response to child abuse investigations. The course also includes critical thinking and competency-based skills training, such as conducting a cursory interview, participating in peer review, making case presentations, and producing investigative documentation.

CAST 4598 Child Abuse Assessment and Intervention: 3 semester hours
Prerequisites: CAST 4398 or PSYCH 4398 or SOC WK 4398. This course provides students from a variety of disciplines with knowledge and skills to intervene effectively and empathically with families who may experience child abuse and neglect. It uses experiential learning to develop critical thinking and skills in trauma-focused screening, assessment, and crisis intervention for vulnerable children and their families who are involved with child serving systems, such as law enforcement, child protective services, prosecution, and physical and mental health.

CAST 4698 Internship in Child Advocacy Studies: 3 semester hours
Prerequisites: CAST 4398 or PSYCH 4398 or SOC WK 4398. CAST 4498 (may be taken concurrently), CAST 4598 (may be taken concurrently), and approval of the CAST director. This course involves an internship in child or youth-serving setting and requires approval from the CAST director prior to enrolling. It must be taken concurrently with the CAST field education seminar (CAST 4700).

CAST 4700 Field Education Seminar in Child Advocacy Studies: 1 semester hour
Prerequisites: Consent of CAST director and concurrent enrollment in an approved CAST field education course. In this course, students will synthesize their learning from the Child Advocacy Studies (CAST) certificate courses with their field experiences.

ROTC
Web Site: https://rotc.wustl.edu/
Main Number: 314-935-5521

Background
The Military Science Program in the Department of Military and Veterans Studies is the academic home to Army Reserve Officers Training Corps (Army ROTC). UMSL is partner institution in the Gateway Army ROTC Battalion – which is hosted at Washington University in St. Louis. Completion of the Army ROTC program of instruction qualifies the student for a commission in the United States Army, Army National Guard, or United States Army Reserve. The curriculum does not provide technical training in a job specialty, nor does it emphasize vocational training; rather, it complements and provides a base for normal progression in the commissioned officers' educational program.

Leadership and management objectives are included in academic periods of instruction. Practical leadership experience is gained in a field training environment by attendance at a thirty-two-day summer camp, normally between the junior and senior years. Nursing students attend a nursing internship at Army hospitals following the normal summer camp. A leadership laboratory also provides experience in a range of leadership positions during the school year. The program offers both a four-year and a two-year program, each with its own special advantages. Students
are invited contact the Military Science Program to obtain additional information.

The program requires four years of military science courses, which consist of a two-year basic course and a two-year advanced course. Students can begin the four-year program as a freshman or as a sophomore.

There is also a two-year ROTC program for those students with only two years of college remaining. The two-year course is designed for junior college and other non-ROTC college transfer students, but may be utilized by students who did not enroll in the basic course outlined below. Graduate students may also qualify for enrollment in the two-year course. Additional information regarding eligibility requirements for the two-year program may be obtained by contacting the Department of Military Science.

**Basic Course**

The basic course is normally taken as an elective subject by students in their freshman and sophomore years. The purpose of this instruction is to qualify students for entry into the advanced course by familiarizing them with the organization of the Army, military skills, basic leadership and time management, and military tradition. Students do not incur any military obligation as a result of enrolling in the basic course.

**Advanced Course**

Instruction in the advanced course includes leadership and management, the exercise of command, military teaching methods, tactics, logistics, administration, history, and military justice. Leadership experience and command experience are provided by assigning advanced course students as cadet leaders. Participation in regularly scheduled physical training is a required part of the leadership training. Classroom instruction consists of two one and a quarter hour (seventy-five minutes) periods and a one and a half hour (ninety minutes) leadership laboratory period each week. Only students who have demonstrated a definite potential for becoming competent officers will be selected for the advanced course. Students entering this course must be selected in accordance with the prerequisites listed below.

- Pass a military physical examination
- Pass a background screening
- Pass the three-event physical fitness test
- Pass healthy body-fat standards

**Monetary Allowances**

Cadets selected for admission into the advanced course qualify for a nontaxable monetary allowance of $400–$500 per month for up to twenty months. Cadets may also qualify for the simultaneous membership program with the United States Army Reserve or National Guard, which can provide over $16,000 during the last two years of school. Both the United States Army Reserve and the National Guard offer additional monetary incentives for cadets who join their organizations.

**Army ROTC College Scholarship Program**

Financial assistance is available in the form of two-, three-, or four-year ROTC academic scholarships for selected students. Under the Army ROTC Scholarship Program, the students/cadets receive reimbursement for their tuition and fees. Additionally, Army scholarship recipients receive a flat-rate allowance of $1200 per year for textbooks and other expenses and a stipend for up to 10 months per year. There are also numerous national and organizational scholarships that students may compete for as members of Army ROTC.

**Textbooks and Uniforms**

All textbooks, uniforms, items of insignia, and equipment incident to membership in the Army ROTC Program are furnished by the Gateway Battalion.

**Leadership Laboratory**

Leadership laboratory is open to students who are members of the Reserve Officer Training Corps or who are eligible to pursue a commission as determined by the professor of military science. Leadership laboratory is the formalized phase of leadership training conducted by the cadets. It is scheduled for one and one half hours (ninety minutes) each week for both the basic and advanced officer courses (non-contracted and contracted). All uniforms and equipment required for cadet activities are furnished.

**FAQs**

**What is Army ROTC?**

ROTC is the Reserve Officers Training Corps. It is the largest officer commissioning program for the U.S. Army. It is structured as a college class in which one learns valuable leadership skills.

**Do ROTC courses count for credit?**

Yes! All MIL SCI courses at UMSL count as elective credit (towards your 120 requirement) and your grades are included in GPA calculations. In addition, MIL SCI 1101 and MIL SCI 1102 are core courses for the Military History / Military Logistics Minor.

**Am I joining the Army by signing up for ROTC?**

NO, you are not joining the Army. Only if you are commissioned as a Second Lieutenant will you join the Army. If you are not receiving scholarship or stipend support, there is no military obligation whatsoever during the first two years of ROTC.

**Can I just take the ROTC class for the leadership education or for my minor?**

YES. You can take any 1000 or 2000 level class without prerequisite or obligation. You can choose (or not choose) to participate in the extracurricular events like physical training, field training and other military skills. Before signing up for a 2000 level class, you should have a discussion with the UMSL ROTC advisor.

**How about Scholarships? Do you have any available?**

The Army offers full tuition 2, 3, and 4 year scholarships for the best students (you must be medically, physically, academically qualified and pass a background check). These scholarships are merit and potential based. The number and type of scholarships available is different every year, but once awarded a scholarship is a financial commitment from the Army to you through your graduation.

**Main Number:** 314-977-8227
Background

The Aerospace Studies program in the Department of Military and Veterans Studies is the academic home to Air Force Reserve Officers Training Corps (Air Force ROTC). UMSL is partner institution in Detachment 207, Air Force ROTC – which is hosted at St. Louis University. This program provides pre-commissioning education for qualified students who desire to serve on active duty as commissioned officers in the United States Air Force.

The aerospace studies curriculum is divided into two phases: (1) the general military course; and (2) the professional officer course. The department offers a standard and condensed four-year commissioning programs. The four-year program provides coursework during the freshman through senior years. The condensed program compresses the general military course to one academic year beginning in the fall. To obtain specific information, please contact the Aerospace Studies Program directly.

General Military Course

This program of instruction is open to any student and consists of the first- and second-year courses for students in the four-year Air Force Reserve Officer Training Corps (AFROTC) program. These courses deal with the Air Force structure and the development of air power. They strengthen interest in becoming a professional Air Force officer, develop knowledge of world military forces, and enable the student to understand how the United States Air Force supports national objectives and policies.

Professional Officer Course

Aerospace studies courses offered during the third and fourth years must be completed by all students who seek a commission through AFROTC. Coursework continuity is designed to prepare college students to serve as active duty Air Force officers upon graduation and commissioning. The curriculum stresses national security in contemporary American society, leadership, management, and professionalism. Special emphasis is placed on developing the cadet's communication skills. Students entering this course must be selected in accordance with the prerequisites listed below. Students not currently enrolled in the AFROTC program must have permission of the department chairperson prior to enrolling in these courses.

- Pass a military physical examination
- Pass the four-event physical fitness test
- Pass height/weight standards
- Have a 2.5 cumulative GPA or higher for undergraduates or a 3.0 cumulative GPA or higher for graduate students.

Note: Call the Aerospace Studies Program at 314-977-8227 for specific requirements.

Leadership Laboratory

Leadership laboratory is the formalized phase of leadership training conducted by the cadets. It is scheduled for up to two hours each week. All uniforms and equipment required for cadet activities are furnished. It is required for members of the Air Force Reserve Officer Training Corps, or students who are eligible to pursue a commission as determined by the chairman of the Department of Aerospace Studies.

Monetary Allowances

Once the admission criteria have been met, the student may compete for the opportunity to contract for four years of active duty as a commissioned officer upon graduation. Upon selection and acceptance, the student receives a monthly, tax-exempt stipend ranging from $300.00–$500.00. Tuition assistance is possible but not guaranteed. It is awarded on a competitive basis.

Field Training

Cadets are required to attend a four-week field training course at Maxwell Air Force Base in Montgomery, AL before they may formally enroll in the professional officer course. Field training provides a better understanding of the United States Air Force mission, increases the cadets' proficiency in junior officer training areas, and stresses the importance of physical conditioning. Students attending these courses receive pay for the encampment plus travel allowances.

FAQ

How do I join AFROTC if I am already in college?

Once you are enrolled as a full time student, you can register for AERO 1001 in the fall or AERO 1002 in the spring. If you are a sophomore or only have have 3 years left of your degree, you may still join but will need to contact the Unit Admissions Officers first.

Do AFROTC courses count for credit?

Yes! All AERO courses at UMSL count as elective credit (towards your 120 requirement) and your grades are included in GPA calculations.

What is the difference between AFROTC and enlisting in the Air Force?

AFROTC is one of three commissioning sources for the USAF. Upon completion of a bachelor’s degree and AFROTC you will be commissioned as an officer, followed by specific training in a career field. Officers are trained to be the leaders and supervisors of enlisted personnel. Rank, pay, and career opportunities for officers are commensurate with their elevated level of responsibility. Enlisting in the Air Force is done through a local recruiter followed by basic training and prospective technical training. This avenue does not require a college degree.

Will the Air Force pay for my school?

AFROTC offers many scholarship opportunities. Prospective AFROTC cadets can apply for a high school scholarship before entering into college. Once in college, AFROTC cadets can apply for an in-college scholarship. This process is handled by the host detachment.

Air Science Courses

AERO 1001 Heritage and Values of the US Air Force I: 2 semester hours

This course introduces students to contemporary military issues and overall Air Force structure. Contracting with AFROTC is not required for this course.

AERO 1002 Heritage and Values of the US Air Force II: 2 semester hours

This course introduces students to military concepts such as strategic offensive and defense forces, general purpose forces, aerospace support forces, and the Air Force relationship with U.S. Army forces. Contracting with AFROTC is not required for this course.
AERO 1500 Leadership Laboratory: 0 semester hours
Prerequisites: Students must be enrolled in an AERO course. Instruction is conducted within the framework of an organized cadet corps with a progression of experiences designed to develop each student's leadership potential. Course work includes a study of Air Force customs and courtesies, drill and ceremonies, career opportunities in the Air Force, and the life and work of an Air Force junior officer. Students develop their leadership potential in a practical, supervised laboratory, which typically includes field trips to Air Force installations throughout the United States. This course is generally taught at St. Louis University. It is required for all AF ROTC students.

AERO 2001 Team Leadership Fundamentals I: 2 semester hours
This course lays the foundation for teams and leadership. The topics include skills that will allow cadets to improve their leadership on a personal level and within a team. The course will prepare cadets for their field training experience where they will be able to put the concepts learned into practice. The purpose is to instill a leadership mindset and to motivate sophomore students to transition from AFROTC cadet to AFROTC officer candidate.

AERO 2002 Team Leadership Fundamentals II: 2 semester hours
Prerequisites: AERO 2001 or consent of instructor. This course lays the foundation for Air Force leadership and prepares AFROTC students for their field training experience where they will be able to put the concepts learned into practice. Contracting with AFROTC is not required for this course.

AERO 3001 Leading People & Effective Communications I: 3 semester hours
Prerequisites: Membership in the AFROTC Program or consent of instructor. This course focuses on training students to be effective managers in Air Force context. Professional concepts that will be emphasized include the use of managerial processes involving decision-making and the use of analytic aids to support planning, organizing, and controlling systems in a changing environment.

AERO 3002 Leading People & Effective Communications II: 3 semester hours
Prerequisites: AERO 3001 and membership in the AFROTC Program, or consent of instructor. This course continues the management training from AERO 3001. Using actual Air Force cases, students focus on the management of forces in change and managerial strategy within the context of the military organization.

AERO 4001 Air Force in National Security Affairs I: 3 semester hours
Prerequisites: AERO 3002 and membership in the AFROTC Program, or consent of instructor. This course explores the role of the armed forces as an integral element of American society, including civil-military relations, defense policy, and Air Force responsibilities in national defense. It is part of the final educational experience for AF ROTC Cadets before commissioning.

AERO 4002 Air Force in National Security Affairs II: 3 semester hours
Prerequisites: AERO 4001 and membership in the AFROTC Program, or consent of instructor. This course explores the importance of maintaining adequate national security forces and teaches students how to effectively design and implement Air Force-focused national security policies. It is part of the final educational experience for AF ROTC Cadets before commissioning.

Military Science Courses

MIL SCI 1101 Introduction to Leadership I: 3 semester hours
Examine the challenges and competencies that are critical for effective leadership. You will learn how the personal development of life skills such as cultural understanding, goal setting, time management, mental/physical resiliency, and stress management relate to leadership, officership, and the Army profession. Enrollment in MIL SCI 1101 does not require a commitment to join the US Army. (FALL ONLY).

MIL SCI 1102 Introduction to Leadership II: 3 semester hours
Investigate leadership fundamentals such as problem-solving, listening, presenting briefs, providing feedback, and using effective writing skills. You will explore dimensions of leadership attributes and core leader competencies in the context of practical, hands-on, and interactive exercises. Learn fundamental military concepts and explore the Army’s leadership philosophy. Enrollment in MIL SCI 1102 does not require a commitment to join the US Army. (SPRING ONLY).

MIL SCI 1500 Leadership Laboratory: 0 semester hours
Prerequisites: Must be currently enrolled in a MIL SCI course. Leadership Laboratory provides basic and advanced leadership experience in military courtesy, drill and ceremonies and practical application of classroom-taught subjects. Functions and responsibilities of leadership positions are developed through student-led staff planning actions and command positions. This course normally meets at Washington University. Note: All military science scholarship and advanced course students must register for MIL SCI 1500.

MIL SCI 2201 Innovative Team Leadership: 3 semester hours
Explore the dimensions of creative and innovative tactical leadership strategies and styles by examining team dynamics and leadership theories. The focus continues to build on developing knowledge of leadership attributes and core leader competencies through the understanding of Army rank, structure, and duties as well as broadening knowledge of land navigation and squad tactics. Enrollment in MIL SCI 2201 does not require a commitment to join the US Army. (FALL ONLY).

MIL SCI 2202 Foundations of Tactical Leadership: 3 semester hours
Develop greater self-awareness as you assess your own leadership styles and practice communication and team building skills. Examine the challenges of leading teams in the complex operational environment. Study dimensions of terrain analysis, patrolling, and operation orders. Explores the dynamics of adaptive leadership in the context of military operations. Enrollment in MIL SCI 2202 does not require a commitment to join the US Army. (SPRING ONLY).

MIL SCI 3301 Adaptive Team Leadership: 3 semester hours
Prerequisites: Successful completion of MIL SCI 1101 through 2202; OR attendance at the Leader's Training Course (LTC); OR member of US Army Reserve or National Guard Unit. This is an academically challenging course where you will study, practice, and apply the fundamentals of Army leadership, officership, Army values and ethics, and small unit tactics. At the conclusion of this course you will be capable of planning, coordinating, navigating, motivating and leading a team or squad in the execution of a tactical mission during a classroom practical exercise (PE), a leadership lab, or during a situational training exercise (STX) in a field environment. (FALL ONLY).
MIL SCI 3302 Applied Team Leadership: 3 semester hours
Prerequisites: MIL SCI 3301. Continue to learn and apply the fundamentals of Army leadership, officership, Army values and ethics as you hone your leadership abilities in a variety of tactical environments and the classroom. Successful completion of this course will help prepare you for success at the ROTC Leader Development and Assessment Course (LDAC) which you will attend the summer following this course at Fort Lewis, WA. You will receive systematic and specific feedback on your leadership attributes, values and core leader competencies from your instructors, other ROTC cadre, and senior cadets. (SPRING ONLY).

MIL SCI 4401 Adaptive Leadership: 3 semester hours
Prerequisites: Successful completion of the ROTC Leadership Development and Assessment Course (LDAC). This course focuses on practical application of adaptive leadership. Throughout the semester, students will attend weekly training meetings and fill the roles of Army staff officers. They will plan, execute and assess ROTC training and recruiting events. Study will also focus on the Army values, leader ethics and how they are applied in the Full Spectrum Operating Environment. The officer’s role in the Uniform Code of Military Justice, counseling of subordinates, administrative actions and other aspects of everyday military life will also be discussed. (FALL ONLY).

MIL SCI 4402 Leaders in a Complex World: 3 semester hours
Prerequisites: MIL SCI 4401. Explore the dynamics of leading in the complex situation of current military operations in the contemporary operating environment. Examine differences in customs and courtesies, military law, principles of war, and rules of engagement in the face of international terrorism. You will also explore aspects of interacting with non-government organizations, civilians on the battlefield and host nation support. Significant emphasis is placed on preparing you for your branch school and first unit of assignment. (SPRING ONLY).

MIL SCI 4411 Advanced Military Science Studies I: 3 semester hours
Prerequisites: MIL SCI 4401 or permission of instructor. An in-depth study of the role of the Army officer in today’s Army.

MIL SCI 4413 Military Medical Technologies Independent Study: 3 semester hours
This course explores how medical advances have improved soldiers’ chances of surviving battlefield injuries from the Civil War to the Iraq War. Also explores how soldiers are now surviving more catastrophic injuries and what the implications are on long term health care for these soldiers both physically and mentally.

Military and Veterans Studies Courses

MVS 1100 Veterans Transition Seminar: 1 semester hour
This course is designed for the student veteran who is new to UMSL but not eligible for the First Year Experience class. It will survey essential life skills (time management, financial management, physical fitness) and tools for academic success (note-taking, writing, research, oral presentation). It will familiarize students with the relationship between their education and their career and personal goals. It will also expose students to campus and veteran-specific support services. Maybe most importantly, this course will provide a venue for veterans to connect with other veterans who are facing a similar transition.

MVS 2000 Selected Topics in Military or Veterans Studies: 1-3 semester hours
Selected topics in military or veterans studies. The topics will vary each semester. May be taken more than once for credit as long as the topic differs.

MVS 2021 War and Violence in Modern Times: 3 semester hours
Same as HIST 2021. Prerequisites: Sophomore standing or consent of the instructor. This course examines the connections between warfare and resistance and how gender is a socially constructed concept. Topics may include military treats gender difference, explores how military culture is defined, and how gender is a socially constructed concept. Topics may include gender and sexuality issues affect military readiness and effectiveness.

MVS 2025 U.S. Foreign Relations and Military History: 3 semester hours
Same as HIST 2025. This course surveys the development of American land, sea, air, space, and cyber power from the start of the colonial era to the present, with an emphasis on the interrelationship between U.S. foreign and military policies and between diplomacy and force.

MVS 2100 Veterans in American Society: 3 semester hours
Same as SOC 2801. Prerequisite: ENGL 1100. This survey course will focus on the American veteran experience and explore basic concepts, ideas and research into veterans and veteran institutions. In a multidisciplinary manner, students will examine military culture, the unique status of veterans in our society, and veteran institutions. Students will also study the successes, challenges and obligations our society faces related to its veteran community.

MVS 2130 Gender and the Military: 3 semester hours
Same as SOC 2802 and GS 2130. This course investigates how the military treats gender difference, explores how military culture is defined, and how gender is a socially constructed concept. Topics may include military culture, gender construction, and how gender and sexuality issues affect military readiness and effectiveness.

MVS 2200 Examining Cultural Experiences of Veterans: 3 semester hours
Prerequisites: Consent of the instructor. This course is designed to explore the cultural experiences of veterans. Through discussion, reflection and writing, students will examine the service experience in another culture and then relate those limited interactions within the context of the culture as a whole. For non-western cultural experiences, this course meets UMSL Cultural Diversity [CD] requirement.

MVS 2850 National Security Policy and Practice: 3 semester hours
Same as POL SCI 2551. This simulation-driven course focuses on national security policies and the processes that put these policies into practice. It examines the elements that underpin national security policy and the processes employed by the US government for integrating and synchronizing those instruments in the pursuit of national security objectives.

MVS 2860 Understanding Terrorism in the 21st Century: 3 semester hours
Same as POL SCI 2860. This course seeks to provide insight into the use of terrorism, as a means to achieve a political end, in our current globalized environment. It will review various facets of terrorism including societal disturbances that allow terrorist organizations to flourish, various types of domestic and international non-state actors that use terrorism, terrorism as the next generation of warfare, and the global response to the threat of terrorism. Students will exit the course with a more complete understanding of the multi-faceted threat terrorism poses to our increasingly globalized society.
MVS 3100 Current Issues in Military and Veterans Studies: 1-4 semester hours
Selected topics in military or veterans affairs with emphasis on current issues and trends. May be repeated as long as the topic is different for a maximum of 6 credit hours.

MVS 3201 Narratives from the Forever Wars: 3 semester hours
Same as MEDIA ST 3201 and ENGL 3201. This course studies literature and film written by and about those who served in the wars in Iraq and Afghanistan, with particular interest in how veterans as individuals are represented in it.

MVS 3300 Veteran Social Policy: 3 semester hours
Same as SOC 3802. Prerequisite: SOC 1010. This course provides an overview of American public policy towards military veterans. Students will research, design, and propose policy changes using various written products and presentations.

MVS 3500 Internship in Veterans Studies: 1-3 semester hours
Prerequisites: Junior Standing and consent of the department chair. Independent study involving regular on-site work with an appropriate public or private agency serving the veteran community. A written report reflecting on the experience is required. Course may be repeated for a maximum of 6 credit hours.

MVS 4100 Veterans Studies Capstone Seminar: 3 semester hours
Prerequisites: MVS 2100 and senior standing. Mentored by a faculty member, students in this course will apply insights gained from previous coursework into a substantial Veterans Studies project. Students will work with the instructor and the class to develop a topic, establish a research or project plan, then prepare a project or paper suitable for presentation to the public. Students should expect that their work will be published or presented at an end-of-the-year symposium. This is not an independent study.

MVS 4200 Independent Study in Military and Veterans Issues: 1-3 semester hours
Prerequisite: Consent of instructor. Faculty mentored, independent study through readings, reports, or field research. No student may take more than a cumulative total of 6 hours of Independent Study.

MVS 4300 Current Topics in Military or Veterans Studies: 1-3 semester hours
Prerequisites: Junior standing. Selected topics in military or veterans studies with emphasis on current issues and trends. May be repeated as long as the topic is different for a maximum of 6 credit hours.

MVS 4345 War Crimes, Genocide, and Justice in the 20th and 21st Centuries: 3 semester hours
Same as SOC 4345, POL SCI 4345, and CRIMIN 4345. Prerequisite: ENGL 3100. This course provides advanced undergraduate and Master’s level students a comprehensive overview of the subject of war crimes, crimes against humanity, genocide and legal responses to these crimes in the modern era. The goal of this course is to engage students in sustained, critical thought about these issues and to foster a deeper understanding of both the causes and consequences—legal, social and human—of these egregious crimes.

MVS 6220 Social Policy and Military Veterans: 3 semester hours
Same as SOC WK 6220. Prerequisites: SOC WK 5200 or its equivalent or consent of the instructor and graduate standing. This course provides an overview of public policy towards military veterans, with an emphasis on social work. The course focuses on political theory and public policy and reviews the various methodological approaches to studying public policy, the pertinent theories related to public policy analysis, an introduction to military culture and current issues facing veterans. The main focus of the course will be on understanding the current issues facing veterans and how public policy affects these issues.

Sociology

Ask yourself, **What is this all about?**

Sociology is the scientific study of human social relationships, social interactions, and institutions. Sociology’s subject matter is diverse, ranging from crime to religion, from the family to the state, from the divisions of race and social class to the shared beliefs of a common culture, and from social stability to radical change in whole societies. It provides both quantitative and qualitative tools for understanding how and why our society functions, the impact of social intuitions on individual lives, and the challenges of social interaction between individuals and society.

Sociology will enable you to see the world in a new light. In a country like the United States where individualism is celebrated, it is very easy to forget that the way we behave and feel is socially produced. Whether they be friendships, families, church groups, socioeconomic classes, complex organizations, or nations, much of our lives are socially constructed. This is the basic premise of sociology.

Degree with Distinction in Sociology

A degree with distinction in research, scholarship or creativity in the arts is an honor that recognizes a student for outstanding accomplishments in research and/or other creative endeavors. Students majoring in Sociology who meet the criteria may apply for candidacy for a Degree with Distinction during their final year before graduation. The criteria and guidelines for applying for a Sociology Degree with Distinction can be found on our website.

Student Experience

Students receive training in a variety of social research methods, including questionnaire survey research, social statistical analysis, qualitative methods, and ethnographic fieldwork. They also have the opportunity to gain hands-on experience in urban community-based research.

Sociology students work with faculty who conduct research in Japan, the St. Louis area, and on the internet. They research topics such as urbanization and globalization, Japanese business and society, new media and the role of technology in society. We also encourage our Sociology students to take advantage of opportunities to study with faculty in the Gerontology and Gender Studies Programs exploring the issues of aging and gender on both individual identity and the structure of the wider society.

The Sociology program is a leader of the University of Missouri system in innovative online education. Several courses offer the flexibility of attending an in-class lecture or accessing the lecture and course material online, according to the individual’s schedule.
Department Awards and Honors

The Ray Collins Alumni Award is given annually by the Sociology Alumni Association to the top graduating senior as selected by the faculty.

The Sociology Alumni Awards are awarded by faculty annually on the basis of merit. In addition, one outstanding senior, junior, and freshman are recognized annually based on merit. The Outstanding Sociology Minor Award is presented to the graduating student with the most outstanding minor GPA record.

Department Honors in Sociology are awarded to B.A. and B.S. degree candidates in sociology with an overall grade point average of 3.2 or better.

Sociology Program Scholarship

The Sociology Program offers scholarships to majors in Sociology. Click the link below for more information.

Sociology Major Scholarship

Go to the Financial Aid page to Apply for a Scholarship and see more information on how to apply.

Career Outlook

The Sociology Program teaches the transferable job skills that enable students to rationally analyze social issues and arrive at effective solutions. These skills are valuable for careers in health and social services; human resources; community planning; non-profit leadership; consumer marketing research and consulting; and jobs involving social research in corporate, non-profit, and government settings. Sociology also provides a solid foundation for graduate school in any of the social sciences, and for professional training in fields such as law, medicine, and social work.

Degrees

Sociology BA (p. 627)
Sociology BS (p. 630)
Organizational Leadership BA

Certificates

Sociology (SOC)
College of Business Administration

History
The University of Missouri-St. Louis College of Business Administration was established in 1967 and earned accreditation by the Association to Advance Collegiate Schools of Business (AACSB) six years later, the shortest time on record for any school. Nearly 50 years since the inception of our College, UMSL Business is proud to remain accredited in both business and accounting by AACSB, the only internationally recognized accrediting agency for business and accounting programs.

Mission
The College of Business Administration’s mission is to provide cutting edge research - and practice - based programs that prepare students to enter the workforce and succeed locally and globally across a wide range of business professions. In achieving this mission, we offer quality, value, access, and innovation to our student body. The College benefits from its location in Missouri’s largest metropolitan area. The majority of our graduates continue to live and work in the St. Louis region, and our College plays a key role in educating the workforce of the region.

In conclusion, we are dedicated to strengthening the region by transforming the lives of our students and making an impact on our corporate and civic partners.

Vision
The College will continue to be the leader in the pursuit of excellence in global oriented business education in order to provide the next generation of business leaders and entrepreneurs for the region. We will continue to provide quality, value, access, and innovation.

Quality.
We are St. Louis’ only public university. Faculty recruited from around the world balance meaningful research with excellent teaching and engaged service. We augment this core faculty with instructors equipped with practical business experience and strong teaching skills. Eight advisory boards ensure that our curriculum is up-to-date, addresses employers’ needs, and keeps up with instructional technology. Our new business building encourages innovative learning in accessible, bright open spaces.

Value.
We offer the best value in business education in the St. Louis region. We make quality faculty, programs, and instruction affordable to every St. Louisan. We are extremely focused on student success, offering frequent career-specific job and career fairs in addition to those offered by the campus. The campus mission distilled into the words “we transform lives” is ingrained into our culture. Faculty engage students in service learning opportunities to provide value and help transform lives in the surrounding communities. Increasingly, this orientation has made us attractive to students outside the St. Louis region, including international students attracted to our nationally ranked programs.

Access.
We believe that the transformative power of education should be available to everyone who is willing and able to seek it out. Nearly 80% of our graduates remain in the region, and throughout our 54-year history, we continue to provide business leaders for most organizations in the region. Fully one-third of all UMSL alumni are graduates of the College.

We schedule and price our programs to serve the widest population of college-bound and mid-career students, be they first generation college students, those who are returning to college, those who are place bound, or those who are remove and otherwise unable to pursue a college degree. We use innovative delivery modes - face-to-face, hybrid, and online - to enable students to tailor a program that fits their schedules. We coordinate progression to graduation. At the graduate level, we offer the same level of accessibility. We continue to offer a Fortune 20 company an MBA program on their campus. We also make doctoral level education accessible through our highly innovative DBA program which currently includes student from 10 states.

Innovation.
Reflecting our region’s strong emphasis on entrepreneurship as critical to our future economic growth, the College has made entrepreneurship and innovation a part of who we are. UMSL Accelerate, devoted to education, innovation, and collaboration is a driver for the curriculum and initiatives with the campus and the business community. Cybersecurity is being created in a unique way, emphasizing business problems, not just technical solutions. Analytics is being incorporated into each department’s offerings and the UMSL NOW program is targeting adult learners. Each semester we have been growing inter-UM System collaboration.

Lastly, innovative faculty are bringing service learning projects into the class and using the latest instructional technology to increase student engagement. The pillars of the College of Business brand – global focus, technical competency, and innovation - remain our guideposts as we continue to enhance the quality of our programs, remain the value leader in the market, and improve access for our students.

College of Business Administration Programs

Undergraduate Degrees
- Bachelor of Science in Accounting (p. 307)
- Bachelor of Science in Business Administration (p. 341) (with emphasis areas available in)
  - Entrepreneurship (p. 342)
  - Finance (p. 343)
  - International Business (p. 345)
  - Management (p. 346)
  - Marketing (p. 348)
  - Supply Chain Management (p. 349)
- Bachelor of Science in Cybersecurity, Information Systems Emphasis (p. 407)
- Bachelor of Science in Information Systems and Technology (p. 475)

Undergraduate Minors
- Accounting (p. 310)
- Cybersecurity (p. 409)
- Digital Marketing Communications (p. 414)
- Finance (p. 463)
- General Business (p. 364)
- Information Systems and Technology (p. 475)
• International Business (p. 481)
• Supply Chain Management (p. 643)
• Management (p. 489)
• Marketing (p. 490)
• Transportation Studies (p. 648)

Undergraduate Certificates
• Cybersecurity Certificate (p. 412)
• Entrepreneurship Certificate (p. 460)
• Post-Baccalaureate Certificate in Accounting (p. 310)

Graduate Degrees
• Master of Accounting (p. 309)
• Master of Business Administration (p. 352)
  • Accounting (p. 353)
  • Business Analytics
  • Cybersecurity (p. 354)
  • Finance (p. 356)
  • Information Systems (p. 357)
  • International Business (p. 358)
  • Supply Chain Management
  • Management (p. 360)
  • Marketing (p. 361)
• Master of Science in Cybersecurity, Information Systems Emphasis (p. 411)
• Master of Science in Information Systems (p. 478)
• Doctor of Business Administration (p. 414)
• Ph.D. in Business Administration
  • Logistics and Supply Chain Management (p. 364)

Graduate Certificates
• Graduate Certificate in Accounting Data Analytics (p. 308)
• Graduate Certificate in Accounting Data Security (p. 308)
• Graduate Certificate in Auditing (p. 321)
• Graduate Certificate in Business Administration (p. 352)
• Graduate Certificate in Business Intelligence (p. 364)
• Graduate Certificate in Corporate Controllership (p. 393)
• Graduate Certificate in Corporate Financial Reporting (p. 393)
• Graduate Certificate in Cybersecurity (p. 408)
• Graduate Certificate in Digital and Social Media Marketing (p. 413)
• Graduate Certificate in Entrepreneurship (p. 459)
• Graduate Certificate in Information Security Management and Auditing (p. 475)
• Graduate Certificate in Information Systems and Technology (p. 478)
• Graduate Certificate in Logistics and Supply Chain Management (p. 488)
• Graduate Certificate in Marketing Management (p. 489)
• Graduate Certificate in Talent Management (p. 644)
• Graduate Certificate in Taxation (p. 644)

Admission Requirements
Students entering UMSL may declare themselves as Business majors in the College of Business Administration (COBA). They are advised by Business and may take Business courses as long as they maintain “good standing” status (see General Degree Requirements listed below) and have satisfied the prerequisites for the courses they propose to take.

Credit Hour Requirements
Student must complete a minimum number of hours in the following areas:
• 120 credit hours for the baccalaureate degree
• 48 credit hours of coursework offered by the College of Business
• 36 credit hours of upper-division coursework offered by the College of Business

Credit Hour Requirements for Transfer Students
• Students must complete a minimum of 60 hours from four-year, baccalaureate degree granting colleges or universities.
• A minimum of 50% of all business course work must be completed at UMSL.
• Students must complete a minimum of 21 graded hours in business courses.
• Students must complete their last 30 hours in residence at UMSL.

Credit for Lower Division Transfer Courses
Students seeking to use a lower division course to satisfy an upper division business requirement must validate the course being transferred. If successfully validated, the transfer course will waive the need to take the upper division equivalent course at UMSL, but the course transferred will be counted as lower division; it will not count toward the 36 upper division hours required in business.

GPA Requirements
Student must carry a minimum 2.3 GPA in the following areas in order to graduate. Grade modification may be used.
• Campus GPA
• College of Business Coursework GPA
• Major GPA
• Emphasis Area GPA

Grade Requirements
A minimum grade of C- is required for each course in the business core (except MGMT 4219); for each course which serves as a prerequisite for another course; and for each course in an emphasis area and/or major.

Satisfactory/Unsatisfactory Option
Majors may take no more than 9 satisfactory/unsatisfactory hours in the College. Unsatisfactory/Unsatisfactory grading is restricted to elective coursework.

Prerequisite Requirements
Business course prerequisites are enforced by the College of Business Administration and include a minimum campus grade point average of 2.0 as a condition for taking any upper division business course.

Good Standing
Students are allowed to take a maximum of 9 hours of upper-division Business classes before a “good standing” evaluation is applied to their
academic records. In order to remain in good standing and continue to enroll in upper division Business courses, students must maintain a 2.3 campus and Business grade point average and must have completed the following cluster of courses (with a grade of C- or higher):

### Additional Emphasis Areas

Emphasis areas may be added for up to two years following degree completion. Each additional degree from the College of Business Administration requires 15 unique hours taken at UMSL subsequent to completion of the prior business degree.

### Latin Honors

In accordance with the University's Latin Honors policy (p. 26), candidates graduating from the College of Business in the 2020-2021 Academic Year must meet the following GPA qualifications:

- Summa Cum Laude: 3.932
- Magna Cum Laude: 3.800
- Cum Laude: 3.545

The College of Business Administration offers five graduate degrees: the Doctor of Business Administration (DBA), the Doctor of Philosophy in Business Administration (Ph.D.), the Master of Business Administration (MBA), the Master of Science in Information Systems (MS in IS), and the Master of Accounting (MAcc). All programs carry the prestigious accreditation of AACSB-International.

### Doctor of Philosophy in Business Administration (Ph.D.)

The Ph.D. program includes an emphasis in Logistics & Supply Chain Management (LSCM). This is the only LSCM emphasis in a doctoral business program offered in Missouri. Courses are taught by full-time, nationally known scholars who have been recognized as one of the most academically prolific faculties in America. The Ph.D. program is designed to prepare scholars who will excel in the national and international marketplace, especially in academic and research organizations, but graduates may also find opportunities in the growing private sector demand for advanced LSCM expertise.

### Doctor of Business Administration (DBA)

The Doctor of Business Administration program is a three-year, cohort-based program that offers a flexible format, with limited monthly visits to campus. Over the course of the program, participants will make only three weekend trips to campus per term.

DBA students move through the program in a cohort and meet face-to-face one weekend a month, then engage and collaborate with faculty and students in the online learning platform for discussions. The first two years cover an array of cutting-edge business and management topics and the third year is spent focusing on the candidate’s dissertation research.

he DBA is designed to train engaged management scholars in a learning community supported by select internationally renowned faculty with close ties to business and recognized for their research impact and expertise in graduate education.

### Master of Business Administration Program (MBA)

The MBA is available in three formats: the FlexMBA (formerly evening MBA), the Professional MBA (an accelerated Internet-enhanced weekend program), and the International MBA program. All programs are fully accredited by AACSB International – The Association to Advance Collegiate Schools of Business, the premier accrediting body in collegiate business education. The MBA programs are designed to prepare students for administrative and professional positions. They also provide an appropriate foundation for students contemplating doctoral work and eventual careers in college teaching and research. The programs admit students with bachelor’s degrees from accredited institutions, including those with undergraduate backgrounds in the sciences, engineering, humanities, or arts as well as business. Graduate Business program information is available at the College of Business Administration website.

### The FlexMBA Program

The FlexMBA curriculum familiarizes participants with the fundamental areas of business administration. The core program is designed to generate a working knowledge of the concepts and interrelationships of four broad categories fundamental to management training:

- The external environment confronting business organizations and management’s response to legal, economic, social, and political issues.
- The internal operation of various business organizations and management’s role in channeling human behavior to satisfy both personal and organizational goals.
- Basic concepts, terminology, and interaction of the accounting, marketing, finance, information systems and operations management disciplines.
- Quantitative management decision-making models put to use in the context of current management principles.

Business concepts are integrated by a course in strategy formulation and implementation in the final semester of study. There is no thesis requirement; however, students interested in undertaking an individual research project may earn elective credit by enrolling in a supervised independent study course.

### MBA Areas

MBA students may obtain an emphasis in Accounting, Finance, Information Systems, International Business, Logistics and Supply Chain Management, Management, Marketing or Operations Management.
Depending on the student’s undergraduate background, courses waived, and emphasis area chosen students might require additional coursework.

Graduate Certificate Programs in Business Studies

The College of Business Administration offers five graduate certificates. To be admitted to a graduate certificate program, students must meet the same requirements as those needed for a graduate degree program in business (see Admission Requirements in the Graduate Studies in Business Administration section of this Bulletin).

Certificate programs allow qualified graduate students to pursue an intensive course of study in a specialized business topic without requiring completion of a full graduate business degree program. Certificate programs provide students with the opportunity to obtain the advanced knowledge available through a graduate course of study in a relatively brief period.

In order to successfully complete a certificate program, students must earn a 3.0 cumulative GPA in certificate classes. Unless otherwise specified, the coursework must be completed within six years. Students must also comply with all requirements related to matters such as prerequisites, academic probation, and other graduate business program policies.

Courses

**BUS AD 1000 Introduction to Business: 3 semester hours**
Overview of the functional business disciplines, including, but not limited to principles of Accounting, Finance, Information Systems, Law, Logistics and Operations Management, Management, and Marketing.

**BUS AD 1900 Introduction to Personal Law: 3 semester hours**
This course introduces students to the American legal system and the basic issues every individual must deal with in our society. The course will be of interest to anyone seeking a job, leasing an apartment, buying a car or house, borrowing money, buying insurance, getting married or divorced, entering contracts, filing a law suit, writing a will, or accumulating wealth. May not be used for credit in any undergraduate business program.

**BUS AD 2000 Topics in Business Administration: 1-3 semester hours**
Prerequisites: Vary with topic; contact the School of Business Administration. Study of selected special problems in business and administration. May be repeated for credit with different topics.

**BUS AD 2900 Legal Environment of Business: 3 semester hours**
Prerequisites: Sophomore standing. An introduction to the nature and meaning of law, sources of law, legal process and institutions. The legal environment of business is defined as: the attitude of the government toward business, the historical development of this attitude; current trends of public control in taxation, regulation of commerce and competition; freedom of contract, antitrust legislation and its relationship to marketing, mergers and acquisitions; and labor management relations.

**BUS AD 3090 Internship in Business Administration: 1-3 semester hours**
Prerequisites: Minimum campus GPA of 2.0; one must have completed and/or be currently enrolled in at least 6 hours of Business Administration electives, have consent of supervising instructor and Associate Dean, and a College of Business GPA of at least 2.5. Students are employed in the field of Business Administration where they apply the knowledge and skills learned in the classroom. Professional development and obtaining specialized work experience are the primary goals. A Business Administration faculty member will monitor the student’s program with the student providing a formal written report at the end of the project. BUS AD 3090 may not be counted toward the minimum credit hours for any emphasis area.

**BUS AD 3099 Independent Study In Business Administration: 1-3 semester hours**
Prerequisites: Minimum campus GPA of 2.0 and approval by the supervising professor and the Associate Dean. Special individual study in business under the supervision of a full-time faculty member.

**BUS AD 3990 Internship in Business Law: 1-3 semester hours**
Prerequisites: BUS AD 2900, 3 credit hours of Business Law electives, and a Business College GPA of 2.5. The course is offered to students of Business Administration who have completed the basic Business Law course and have consent of supervising instructor and Area Coordinator. Students are employed in the field of Business Law where the knowledge and skills learned in the classroom are applied. Professional development and obtaining specialized work experience are primary goals. A Business Law faculty member will monitor the student's program with the student providing a formal written report at the end of the project.

**BUS AD 4001 Accelerate Capstone: 3 semester hours**
Same as ENT 4001. Prerequisites: ENT 1001, and either EDUC 2002 or ENT 3040, or consent of instructor. This course provides students with a capstone experience taking an idea from planning to 'launch.' This should be the last course taken in the certificate sequence and may involve elements of an instructional seminar and a practicum. May be taken in conjunction with other courses within the certificate, but it is highly suggested as the final course in the sequence.

**BUS AD 4198 Business Administration Senior Seminar: 1-10 semester hours**
Prerequisites: To be determined each time the course is offered and to include minimum 2.0 campus GPA. An intensive study of a specific area of business administration, of some specific business or economic phenomenon, or a specific problem or theory. Several different courses may be offered under this course number. May be repeated for credit as long as the topic differs.

**BUS AD 4325 Environmental Sustainability in Business Operations: 3 semester hours**
Same as SCMA 4325. Prerequisites: SCMA 3301 or consent of instructor. This course studies the environmental impacts of business operations, and it focuses especially on the principles and methods of 'lean and green' operations, i.e., ways in which organizations can reduce their costs and increase profits, while reducing their environmental impacts. Specific topics include energy efficiency, resource reduction, waste reduction, design for the environment, externalities and internal pricing mechanisms, environmental technologies, life-cycle assessment, recycling, re-use, and re-manufacturing, as well as national and global environmental issues.
BUS AD 5000 Economics for Managers: 3 semester hours
Prerequisite: Graduate standing. The concepts and tools of economic analysis are applied to the production and distribution functions of organizations. The last portion is devoted to the macroeconomic influence of capital markets, the influence of interest rates, inflation, and the business cycle.

BUS AD 5001 Managerial Economic Analysis: 3 semester hours
Prerequisites: BUS AD 5000 or ECON 1001 and ECON 1002. Microeconomic analysis of consumers, firms, and government. The concepts and mathematical tools of economic analysis are applied to the production and distribution functions of organizations.

BUS AD 5002 Analysis Of National Economic Environment: 3 semester hours
Prerequisites: BUS AD 5000 or ECON 1001 and ECON 1002. The character and functioning of the national economic system; analyzing and forecasting fluctuations in national income and product, employment, and prices; the influence of monetary and fiscal policies. Emphasis is on the acquisition of knowledge concerning forces affecting all business firms.

BUS AD 5100 Managerial Communication: 3 semester hours
An analysis of business writing and speaking, and the communication conventions common in organizations. Emphasis is placed on developing skills critical to career advancement and necessary for effective organizational functioning. A second goal is to prepare students for assignments in other business courses. This course must be taken within the first 12 credit hours of study, preferably in the student's first semester.

BUS AD 5198 Seminar in Business Administration: 3 semester hours
An intensive study of a specific area of business administration of some specific business or economic phenomenon, or a specific problem or theory. Several different courses may be offered under this course number.

BUS AD 5299 Individual Research: 1-3 semester hours
Prerequisite: Consent of instructor and graduate director. Special individual research topics under the guidance of a specific professor.

BUS AD 5325 Environmental Analysis and Sustainability in Business Operations: 3 semester hours
Same as SCMA 5325. Prerequisites: SCMA 5310 or consent of instructor. This course analyzes the environmental impacts of business operations, and it focuses especially on the principles and methods of 'lean and green' operations, i.e., ways in which organizations can reduce their costs and increase profit, while reducing their environmental impacts. Specific topics include energy efficiency, resource reduction, waste reduction, design for the environment, externalities and internal pricing mechanisms, environmental technologies, life-cycle assessment, recycling, re-use, and re-manufacturing, as well as national and global environmental issues.

BUS AD 5450 Governmental Budgeting and Financial Control: 3 semester hours
Prerequisite: ACCTNG 5400. A study of municipal and federal financial control and budgeting procedures with emphasis on public policy. The impact of financial control on top management decisions and the effect of budget strategies on the allocations of public funds.

BUS AD 5900 Law, Ethics and Business: 3 semester hours
Analysis of the relationship between law and business with emphasis on the ability of, and extent to which, governments regulate business activities. Topics covered include the employer-employee relationship, protection of consumers, antitrust regulation, and securities law. Also discussed are ethical issues confronting management of the modern business enterprises.

BUS AD 6990 Strategy Formulation and Implementation: 3 semester hours
Prerequisites: FINANCE 6500, MGMT 5600, MKTG 5700, SCMA 5320 and special consent. Graduate program capstone course examining concepts and methods that integrate functional areas of business. The perspective is that of general management charged with directing the total enterprise. Interactions between the environment, organization, strategy, policies and the implementation of plans are explored. Special emphasis is given to globalization of business and ethical perspectives. This course should be taken during the semester prior to graduation. In no case may it be taken sooner than two semesters prior to graduation.

BUS AD 6991 Graduate Business Assessment Testing: 0 semester hours
Prerequisites: Concurrent enrollment in BUS AD 6990 (or INTL BUS 5289 or MGMT 4614 if taken in lieu of BUS AD 6990). A one-time lab during which a major field exam in business is administered. Course graded on a satisfactory/unsatisfactory basis. Satisfactory grade required for graduation.

BUS AD 7001 Doctoral Research: 1-12 semester hours
Prerequisite: Must have PhD Program Director or Area Coordinator approval. Investigation of an advanced nature culminating in preparation for comprehensive examinations and/or development of dissertation proposal. The course may be repeated for credit.

BUS AD 7002 Dissertation Research: 1-12 semester hours
Prerequisites: Must have Ph.D. Program Director or Area Coordinator approval. Investigation of an advanced nature culminating preparation of a doctoral dissertation. The course may be repeated.

BUS AD 7100 Scientific Inquiry in Business: 1-3 semester hours
Prerequisites: Consent of DBA program director and graduate standing. This course provides an overview of research methods for studying business problems including extraction of information from secondary sources, and primary data collection with surveys, interviews, participant observation, action research, field experiments, controlled experiments, case studies, design sciences and simulations. The course covers foundations of business research (substantive theories, formal theories, and frameworks). Students will learn the types of variables used to test theories and develop the skills required for reviewing the literature and conceptualizing research questions that are important for practice. Ethical issues related to conducting and publishing research will be discussed. Students will become nationally certified in protecting human research participants and in responsible research conduct.

BUS AD 7101 Quantitative Research Methods I in Business Administration: 3 semester hours
Prerequisites: Consent of DBA program director. This course provides an understanding of the application of quantitative analytical techniques to problems in the planning and management of business enterprises and service operations. The course provides experience in structuring analytical models and drawing inferences from their results. Topics include techniques for descriptive, predictive and diagnostic analytics, and may cover general linear statistical models, logistical regression, techniques for extrapolating time series, and statistical methods for testing conceptual models.
BUS AD 7102 Qualitative Research Methods I in Business Administration: 3 semester hours
Prerequisites: Consent of DBA program director and graduate standing. Working in groups, students will design and execute a qualitative research project using interviews or direct observations. During the course, students will prepare a qualitative research proposal that includes well-formed research questions, clearly positions the research as a contribution to knowledge, critically reviews the academic literature relevant to the student’s topic, develops qualitative research instruments (such as an interview guide), executes the research, analyzes the data and writes up the report. Students will learn how to abstract their findings into lessons for scholars and/or practitioners. One important output of this seminar is a completed research paper suitable for publication in a respected practitioner or academic outlet.

BUS AD 7103 Quantitative Research Methods II in Business Administration: 3 semester hours
Prerequisites: Consent of DBA program director and graduate standing. This course provides an advanced understanding of quantitative research with special attention to prescriptive analytics. Emulating work in prior published studies, students identify and frame research questions, determine appropriate metrics, develop hypotheses, build and test quantitative models, and discuss the advantages and shortcomings of alternative quantitative approaches. One important output of this course is a completed research paper.

BUS AD 7104 Qualitative Research Methods II in Business Administration: 3 semester hours
Prerequisites: Consent of DBA program director and graduate standing. Working in groups, students design and execute a qualitative research study using a case study method or action research. Students prepare a qualitative research proposal that includes well-formed research questions, clearly positions the research as a contribution to knowledge, and critically reviews the academic literature relevant to the topic. Students develop qualitative research instruments (or design an experimental intervention), execute the research, analyze the data and produce a report that presents lessons for scholars and/or practitioners. An important product of this seminar is a completed research paper suitable for publication in a respected practitioner or academic outlet.

BUS AD 7105 Special Topics in Business Administration: 2 semester hours
Prerequisites: Consent of DBA program director. Special topics examined from the business administration perspective. Topics may vary by semester.

BUS AD 7106 Strategic Business Analysis: 2 semester hours
Prerequisites: Consent of DBA program director. The objective of this capstone course is to synthesize theoretical and empirical research from the different business disciplines (and other non-management sciences and disciplines) to give new insight for public policy or managerial practice. Course projects may address contemporary challenges in the global economy, regulatory processes, taxation, management of innovation, management of risk and disruptive events, consequences of international agreements, environmental issues, sustainability of business practices and business alliances, corporate governance, cultural challenges in international business relations, and other contemporary problems specific to students’ places of employment.

BUS AD 7107 Capstone Project Research in Business Administration: 6 semester hours
Prerequisites: Consent of DBA program director. Students develop a formal proposal for their capstone research projects that includes a draft of all parts of the project that precede the data collection. This proposal includes research questions or hypotheses based on prior research, and the methodology to be employed for addressing the research questions or corroborating the hypotheses. This course will be coordinated by the Academic Director of the DBA Program, and attended by interested faculty, especially those serving as Chairs. By the conclusion of this course, each capstone project proposal is approved by a capstone project committee (consisting of the Chair of the capstone project committee and two other members).

BUS AD 7109 Doctoral Foundations Seminar: 1-3 semester hours
Prerequisites: Consent of DBA program director. This course will cover the foundation necessary to succeed in the DBA Program. This seminar will also provide the doctoral students with an understanding of the culture of research.

BUS AD 7300 Management of Supply Chains: 2 semester hours
Prerequisites: Consent of Program Director. This course provides a comprehensive overview of supply chain management, including procurement, sourcing, operations, production and logistics, with special attention to international issues. Topics include designing and operating multinational logistics systems; managerial issues and strategies for sourcing, transportation, and inventory management; legal and financial issues in import and export; risk identification and management; and the relationship of supply chain management to other activities. The course also provides students with an understanding of quantitative techniques used in the design and management of global supply chains.

BUS AD 7301 Statistical Modeling: 1-3 semester hours
Prerequisites: SCMA 5300; consent of DBA program director. Study of multivariate analytical techniques and their application to the analysis of business systems. Topics include the construction and adaptation of statistical models and extrapolative techniques to accommodate factor interactions, nonlinearities, and periodic effects. Methodologies include multiple regression, ANOVA, and general linear model, MANOVA, structural equation modeling, and time series modeling.

BUS AD 7400 The Role of Accounting Information in Firms and Markets: 2 semester hours
Prerequisites: Consent of DBA program director. This course provides insights into various accounting theories and practices, including financial analysis to identify opportunities, archival and behavioral inquiry in accounting, the role of accounting information in valuation, the role of accounting information in firm contracting, structural cost management, executional cost management, and governance and controls.

BUS AD 7500 Finance Theory and Applications Seminar: 2 semester hours
Prerequisites: Consent of DBA program director. This two-unit finance course addresses contemporary issues in corporate finance, investment, financial institutions and financial markets. Extensive reviews of the literature in different finance fields are conducted. Modigliani-Miller theorem, agency theory, capital asset pricing theory, and option pricing theory are discussed and applied in research analysis.
BUS AD 7600 Managing Talent for Strategic Advantage: 2 semester hours
Prerequisites: Consent of DBA program director. This course provides insight into research on topics that explore how organizational behavior and human resource management practices contribute to developing and sustaining effective and satisfying workplaces. Topics such as conflict management, change management, motivation, cultural intelligence, compensation strategies, selection and promotion decisions, performance management and legal issues in employment decision making, will be discussed.

BUS AD 7700 Contemporary Marketing Intelligence and Decision Making: 2 semester hours
Prerequisites: Consent of DBA program director. This course examines how firms generate valuable marketing intelligence for critical decisions in pursuit of marketing objectives. Marketing strategies and consumer behavior are studied through literature reviews and examination of case studies. Students challenge assumptions, frameworks, and findings and they discuss how marketing strategy is adapted in practice for various products and services. They also learn how data mining techniques are used in the development and execution of marketing strategies.

BUS AD 7800 Management of Sustaining and Disruptive Information Technologies: 2 semester hours
Prerequisites: Consent of DBA program director. This course provides insights into contemporary sustaining and disruptive information technologies and their strategic and supporting roles in organizations and society. This course provides the student with an understanding of the processes through which information systems are adopted and used by organizations, including their sourcing, design, development, implementation, and strategic management. The course will also examine best practices for managing new information technologies, such as social media, business intelligence, and the Internet of Things. Strategic opportunities, threats and processes for achieving cyber security will be considered as students discuss the impacts such technologies have on organizations, individuals, and society.

Accounting

The mission of the UMSL Accounting Department is to foster excellence in accountancy by providing a rigorous educational experience as a framework for lifelong learning. UMSL graduates earn positions at top CPA firms and corporations and rise to high-ranking positions such as “C-Suite” corporate executives, CPA firm partners, internal audit executives, information systems executives, lawyers, investment bankers, entrepreneurs, not-for-profit agency leaders, government entity leaders, and University professors. As you can see, a degree in Accounting opens many doors.

Degree Programs
Accounting BS (p. 307)
Accounting MAcc (p. 309)
Business Administration MBA, Accounting Emphasis (p. 353)

Minor
Accounting Minor (p. 310)

Certificate
Accounting Data Security Graduate Certificate (p. 308)
Post-Baccalaureate Certificate in Accounting (p. 310)

Courses

ACCTNG 2400 Fundamentals of Financial Accounting: 3 semester hours
Prerequisites: MATH 1030 and completion of 27 credit hours. MATH 1030 may be taken concurrently. This is a one semester course in financial accounting theory and practice. The primary emphasis is on the corporate financial statements of income, financial position and cash flow— their content and interpretation; and the impact of financial transactions upon them.

ACCTNG 2410 Managerial Accounting: 3 semester hours
Prerequisites: MATH 1030 and ACCTNG 2400. This is an advanced course that goes beyond the scope of a second-semester course in fundamentals of accounting. The development, interpretation, and use of relevant cost behavior, control, and traceability concepts for management planning, controlling and decision making are emphasized. Topics include: an introduction to product costing, the contribution concept, direct costing, performance standards and variance analysis, responsibility accounting, segment profitability, alternative choice decisions, and capital budgeting.

ACCTNG 2430 Accounting Ethics: 3 semester hours
Same as PHIL 2249. Prerequisites: ACCTNG 2400 and ACCTNG 2410 (may be taken concurrently). This course examines moral problems as they relate to the profession of accounting and the professional Codes of Conduct that govern the accounting profession. Students will apply the requirements of the Codes of Conduct to cases where ethical dilemmas or violations of professional standards may be present.

ACCTNG 3401 Financial Accounting and Reporting I: 3 semester hours
Prerequisites: MATH 1030, ACCTNG 2410, minimum 2.0 campus GPA and 57 credit hours. Review of the foundations of financial accounting theory and of the financial statement preparation process. Accounting theory and practice related to current assets (except for investments in securities). The course includes an emphasis on unstructured case problem solving skills, communication skills, and interpersonal skills.

ACCTNG 3402 Financial Accounting and Reporting II: 3 semester hours
Prerequisites: MATH 1030 and ACCTNG 3401, minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL and minimum campus GPA of 2.0. Accounting theory and practice related to topics such as investments in securities, operational assets, current and long-term liabilities, and leases. The course includes an emphasis on unstructured case problem solving skills, communication skills, and interpersonal skills.

ACCTNG 3411 Cost Accounting: 3 semester hours
Prerequisites: MATH 1030, ACCTNG 3401 and a minimum campus GPA of 2.0 and minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UM-St. Louis. The study of the basic principles of cost determination for, and control of, manufacturing and distribution activities. Topics include job-order costing, process costing, cost allocations, and the development and use of standard costs within a system of absorption costing.

ACCTNG 3421 Accounting Information Systems: 3 semester hours
Prerequisites: MATH 1030, INFYS 2800, ACCTNG 2410, ACCTNG 3401, and a minimum campus GPA of 2.0. Examines the fundamentals of accounting information systems, including hardware and software considerations, internal controls, and transaction processing cycles. Also focuses upon the development of efficient spreadsheets as applied to financial and managerial accounting concepts.
**ACCTNG 3441 Income Taxes: 3 semester hours**
Prerequisites: MATH 1030 and ACCTNG 3401 and a minimum campus GPA of 2.0 and minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UM-St. Louis. Fundamentals of Federal income taxation. Topics include taxable entities, income, deductions, tax accounting methods, tax basis, and property transactions at both the conceptual and operational levels.

**ACCTNG 3451 Accounting for Governmental and Not-For-Profit Entities: 3 semester hours**
Prerequisites: MATH 1030, ACCTNG 3402, a minimum 2.3 GPA in all accounting courses at the 3000-level and above taken at UMSL and a minimum 2.0 campus GPA. Principles of fund accounting and financial reporting for governmental and nonprofit entities. This course includes an emphasis on unstructured case problem solving skills, communication skills, and interpersonal skills.

**ACCTNG 3490 Internship in Accounting: 1-3 semester hours**
Prerequisites: ACCTNG 3401, a minimum campus GPA of 2.0, a minimum GPA of 2.7 in all accounting courses at the 3000-level and above taken at UM-St. Louis, consent of supervising instructor and accounting internship coordinator. Students are employed in the field of Accounting where they apply the knowledge and skills learned in the classroom. Professional development and obtaining specialized work experience are primary goals. An accounting faculty member will monitor the student’s program with the student providing a formal written report at the end of the project.

**ACCTNG 3495 Special Administration Problems - Accounting (VITA) Program: 1-3 semester hours**
Prerequisites: ACCTNG 2400, ACCTNG 2410 and ACCTNG 3401; minimum campus GPA of 2.0, minimum GPA of 2.2 in all accounting courses at the 2000-level and above taken at UMSL; completion of nine semester hours of accounting. Enrollment in the course is restricted to Volunteer Income Tax Assistance (VITA) program student participants. The class offers practical tax experience, networking opportunities, potential managerial experience, and personal satisfaction derived from community service. It is taken on a satisfactory/unsatisfactory basis. The course offers one to three hours of undergraduate business elective credit and may be repeated for up to 3 hours credit.

**ACCTNG 3499 Independent Study in Accounting: 1-3 semester hours**
Prerequisites: Minimum campus GPA of 2.0, a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL and approval by the supervising professor and the department chair. Special individual study in accounting under the supervision of a full-time accounting faculty member.

**ACCTNG 4401 Financial Accounting and Reporting III: 3 semester hours**
Prerequisites: MATH 1030; ACCTNG 3402; a minimum campus GPA of 2.0 and minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UM-St. Louis. Accounting theory and practice related to topics such as income taxes, pensions, owners’ equity, earnings per share, and the statement of cash flows. The course includes an emphasis on unstructured case problem solving skills, communication skills, and interpersonal skills.

**ACCTNG 4402 Financial Accounting and Reporting IV: 3 semester hours**
Prerequisites: MATH 1030; ACCTNG 3402; a minimum campus GPA of 2.0 and minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UM-St. Louis. Accounting theory and practice related to topics such as business combinations, consolidated financial statements, multinational operations, foreign exchange transactions, and governmental and nonprofit organizations. The course includes an emphasis on unstructured problem solving skills, communication skills, and interpersonal skills.

**ACCTNG 4405 Professional Accounting Research: 3 semester hours**
Prerequisites: ACCTNG 4401, a minimum campus GPA of 2.0 and minimum GPA of 2.2 in all accounting courses at the 3000-level and above taken at UM-St. Louis. Discussion of the research tools and methods available to resolve questions concerning accounting standards and practices. Critical analysis of topics of current interest and importance in accounting practice is the focal point of the course.

**ACCTNG 4435 Auditing: 3 semester hours**
Prerequisites: MATH 1105; ACCTNG 3402; ACCTNG 3421 or INFSYS 3810; a minimum campus GPA of 2.0 and minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UM-St. Louis. An introduction to auditing practice. Includes the social role of auditing and the services offered by auditors in internal, governmental, and public accounting practice. Emphasis is on the financial auditing process, including professional ethics, audit risk assessment, study and evaluation of internal control, gathering and evaluating audit evidence, and audit reporting decisions.

**ACCTNG 4441 Advanced Federal Income Tax: Business Taxation: 3 semester hours**
Prerequisites: ACCTNG 3441 with a grade of B- or above; a minimum campus GPA of 2.0 and minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UM-St. Louis. Focuses on federal income taxation of corporations, S corporations, partnerships, LLCs and their owners.

**ACCTNG 4450 Prescriptive Analytics and Optimization: 3 semester hours**
Same as SCMA 4350. Prerequisites: MATH 1105 and a minimum campus GPA of 2.0. This course covers the construction and application of prescriptive analytical models for optimizing business decisions in a wide range of areas such as manufacturing, service, supply chains, logistics and finance. Topics include performance metrics, linear programming, integer programming, network optimization, simulation, and implementation using Excel.

**ACCTNG 5400 Financial and Managerial Accounting: 3 semester hours**
This course provides an introduction to accounting, with emphasis on preparation of financial statements for external parties (financial accounting) and accumulation of cost information to aid internal planning and control (managerial accounting). Topics covered include measurement of assets and liabilities, revenues and expenses, the accounting cycle, financial statements, cost terminology, cost behavior, product costing, and relevant costs for decision making. This course provides the necessary background for ACCTNG 5401.
ACCTNG 5401 Financial Reporting and Analysis: 3 semester hours
Prerequisites: ACCTNG 5400 or the equivalent. This course builds on the foundations covered in ACCTNG 5400, emphasizing in-depth analysis of published financial statements. The course begins with discussion of the role of financial accounting information in capital markets and contracting, and continues with examination of a number of specific accounting issues. Students are encouraged to look behind the numbers to better understand the economics of the underlying transactions, and properly interpret what the reported numbers mean about a firm's future prospects.

ACCTNG 5402 Professional Accounting Research: 3 semester hours
Prerequisites: ACCTNG 4401; a minimum campus GPA of 2.0; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. Discussion of the research tools and methods available to resolve questions concerning accounting standards and practices. Critical analysis of topics of current interest and importance in accounting practice.

ACCTNG 5403 Graduate Topics in Financial Accounting: 3 semester hours
Prerequisites: ACCTNG 4401; a minimum campus GPA of 2.0; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. A study of current financial reporting issues. Analysis of current problems and approaches pertaining to the communication of corporate financial information to the U.S. and international investment communities.

ACCTNG 5404 Professional Accountability I: 3 semester hours
Prerequisites: MATH 1030; ACCTNG 2410; a minimum 2.0 campus GPA; graduate standing. This is the first professional-level course in financial reporting. The course includes a study of the conceptual framework underlying Generally Accepted Accounting Principles (GAAP) and issues pertaining to accounting for current assets and liabilities.

ACCTNG 5405 Professional Accountability II: 3 semester hours
Prerequisites: MATH 1030; ACCTNG 3401; a minimum campus GPA of 2.0; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL; graduate standing. This is the second professional-level course in financial reporting. The course includes an in-depth study of issues pertaining to accounting for operational assets, liabilities and owners equity.

ACCTNG 5406 Research and Professional Writing in Accounting: 3 semester hours
Prerequisites: ACCTNG 4401 and enrollment in Master of Accounting Program. This course employs the professional accounting literature and authoritative databases to analyze contemporary issues in accounting. Students will refine their communication skills in preparation for leadership roles in the accounting profession.

ACCTNG 5408 Fraud Examination: 3 semester hours
Prerequisites: ACCTNG 3402 or ACCTNG 5405; a minimum campus GPA of 2.0; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. This course is designed for graduate students who are interested in fraud and its effects. Students will be introduced to theoretical concepts of fraud and practical responses to it. Course coverage includes an overview of the fraud problem; prevention and detection of fraud; elements of fraud investigation, interview techniques, fraud types, and laws governing the prosecution of fraud cases.

ACCTNG 5411 Cost Systems Analysis: 3 semester hours
Prerequisites: MATH 1030; ACCTNG 3401; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL; graduate standing. The development, interpretation, and use of accounting reports and supplementary information for management planning, control and decision making. Emphasizes the application of relevant cost behavior, control and traceability concepts in the preparation of internal accounting reports, with a secondary emphasis upon product costing techniques as appropriate to financial accounting needs. Topics include break-even analysis, operational budgeting, direct costing, absorption costing, standard costs and variance analysis, business segment analysis, responsibility accounting distribution cost accounting, and gross profit analysis.

ACCTNG 5412 Graduate Topics in Management Accounting: Controllership: 3 semester hours
Prerequisite: ACCTNG 3411 or ACCTNG 5411; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. A study of advanced managerial accounting techniques useful in facilitating the planning and control processes in the modern organization. Emphasis on the implementation and administration of these techniques, their integration with management information systems, and the organizational role of the corporate accountant.

ACCTNG 5421 Information Systems in Accounting: 3 semester hours
Prerequisites: MATH 1030; INFSYS 1800; ACCTNG 2410; ACCTNG 3401; a minimum campus GPA of 2.0; graduate standing. This is a professional-level course in accounting information systems. The course includes examination of transaction cycles, structured analysis and design of accounting information systems, and internal controls.

ACCTNG 5435 Graduate Topics in Auditing: 3 semester hours
Prerequisite: ACCTNG 4435; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. A study of advanced auditing and attestation issues, with an emphasis on operational auditing. Topics include professional ethics, risk analysis, internal control, fraud detection, analytical procedures, determining and assessing operational objectives, and reporting and implementing audit findings.

ACCTNG 5436 Systems Auditing: 3 semester hours
Prerequisite: ACCTNG 5400, INFSYS 6800 or consent of instructor. Study of techniques involved in the control and audit of computer-based systems. Emphasis on the review of internal controls at operational and administrative levels and on computer-assisted audit techniques.

ACCTNG 5441 Tax Research: 3 semester hours
Prerequisite: ACCTNG 3441; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL; or consent of instructor. Application of the research tools and methods available to resolve questions pertaining to the tax laws. Addresses techniques for locating and evaluating relevant authority. Students will be expected to complete written tax research memos. A basic understanding of federal income tax law is presumed.
ACCTNG 5443 Decision Support Systems for Business Intelligence: 3 semester hours
Same as INFSYS 6833. Prerequisites: SCMA 5300. This course examines the applications of data and analytics (models) to support the needs of decision makers. Descriptive, predictive and prescriptive analytics tools are coupled with big data and well-designed user interfaces to provide the necessary tools. Topics such as how to construct the data warehouse, how to clean and store data in the appropriate form, how to construct and implement a useful visualization of data, and how to construct and support decision makers are included. DSS component design in response to decision making and business intelligence needs are discussed. Credit cannot be granted for both INFSYS 3843 and INFSYS 6833.

ACCTNG 5444 Business Analytics and Data Mining: 3 semester hours
Same as SCMA 6345. Prerequisites: SCMA 5300 and INFSYS 5800. This course concentrates on methods for converting data into business intelligence. It provides knowledge of the principles and techniques for business analytics and data mining. Topics include clustering, pattern recognition, visualization of relationships, predictive modeling, optimization techniques and simulation.

ACCTNG 5446 Advanced Topics in Taxation: 3 semester hours
Prerequisites: ACCTNG 3441. Address advanced topics in taxation selected by the instructor.

ACCTNG 5447 Taxation of Individuals and Businesses: 3 semester hours
Prerequisites: MATH 1030; ACCTNG 3401 or both ACCTNG 5400 and FINANCE 6590 with the topic ‘Practice of Personal Financial Planning’ with grades of B or better in both; graduate standing. This is the first professional-level course in taxation. The course includes a general introduction to the concepts of taxation. It will enable students to understand the role of taxes in evaluating decisions typically confronted by individual taxpayers and businesses.

ACCTNG 5451 Accounting and Auditing in Governmental and Not-for-Profit Entities: 3 semester hours
Prerequisite: ACCTNG 3402 and graduate standing; a minimum campus GPA of 2.0 and minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. A study of accounting for use in the public sector and in not-for-profit organizations. Principles of fund accounting and financial reporting for governmental and not-for-profit entities, as well as auditing in the public sector.

ACCTNG 5465 Principles of Information Security: 3 semester hours
Prerequisites: INFSYS 5800 (may be taken concurrently) or permission of instructor. This course is a survey of the vast field of Information Security (InfoSec). It intersects both management and technical aspects of security as relevant to organizations, governments, individuals, and society. Topics covered include fundamental principles of InfoSec and cyber defense, the threat environment, management of InfoSec in organizations, technologies and tools in InfoSec, cryptology/cryptography, web application security, vulnerability management, and current issues. Hands-on labs expose students to basics of penetration testing, applications of cryptography, and vulnerability management. A graduate research paper is required. This course is open to all majors. Credit can only be granted for one of INFSYS 3848, INFSYS 6828, and ACCTNG 5465.

ACCTNG 5466 Management of Accounting Networks and Security: 3 semester hours
Prerequisites: INFSYS 5800 (may be taken concurrently) or permission of instructor. This course focuses on the ‘big-picture’ implications and challenges of data networking and network security within contemporary Information Technology environments. It covers fundamentals of networking and security implications of data networks with hands-on exercises. Topics include networking layers and standardization of functionality across layers, wired and wireless Local Area Networks (LANs) along with switching and physical layer technologies, Internetworking, supporting and supervisory protocols, application layer protocols, network design and management, and fundamentals of network security. Students will also learn about network protocol analyzers such as Wireshark, virtualization, networking in virtual environments, and how some common networked applications operate by utilizing the network infrastructure. Credit can only be granted for one of INFSYS 3842, INFSYS 6836, and ACCTNG 5466.

ACCTNG 5467 Advanced Data Security Concepts: 3 semester hours
Prerequisites: ACCTNG 5465 or INFSYS 6828. This course provides an in-depth examination of advanced principles of cybersecurity. A broad range of topics are covered, including penetration testing, formal verification of systems, formal models of information flow and protection, distributed system authentication, protocol design and attack, computer viruses and malware, as well as intrusion and anomaly detection models. Multi-level security architecture, active defenses, investigation and forensics, network firewalls, virtualization, anonymity and identity, mobile security, and database security models and mechanisms are also studied. The course content is largely influenced by the latest research in the field. Credit can only be granted for one of INFSYS 3858, INFSYS 6858, and ACCTNG 5467.

ACCTNG 5468 Accounting Software Assurance: 3 semester hours
Prerequisites: ACCTNG 5405 or INFSYS 6806 or permission of instructor. This course provides an overview of the vast field of software assurance. The goal is to make students aware of the fundamentals of the secure software lifecycle enabling them to apply principles of secure software development and management. The course also provides practical applications that allow the learners to experience the secure software lifecycle process by developing concrete artifacts. Credit can only be granted for one of INFSYS 3868, INFSYS 6868, and ACCTNG 5468.

ACCTNG 5469 Management of Accounting Data Security: 3 semester hours
Prerequisites: ACCTNG 5465 or INFSYS 6828. This course provides students the necessary background knowledge and skills to develop and run a systematic information security management program that is in line with organization strategy, structure, processes, and culture. Specifically, the course introduces governance, strategy, policies, implementation, operation, evaluation, and improvement of an organization's information security to achieve business objectives and be resilient to information security threats. Credit can only be granted for one of INFSYS 3878, INFSYS 6878, and ACCTNG 5469.
ACCTNG 5490 Graduate Internship in Accounting: 1-3 semester hours
Prerequisites: ACCTNG 3401 or ACCTNG 5404; a minimum graduate GPA of 3.0; a minimum GPA of 3.0 in all accounting courses at the 3000-level and above taken at UMSL; consent of supervising instructor and accounting internship coordinator. The student works in an accounting internship that contains sufficient content and rigor to merit graduate credit. The student's program will be monitored by a member of the Graduate Faculty in Accounting. The course requires several meetings with the faculty advisor and a graduate-level written assignment. The course will be graded on a Satisfactory/Unsatisfactory basis. A student who has previously taken ACCTNG 3490 may not take ACCTNG 5490.

ACCTNG 5498 Graduate Seminar in Accounting: 3 semester hours
Prerequisites: To be determined each time the course is offered and to include a minimum 2.0 overall GPA and a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. Study of selected special problems in accounting. May be repeated for credit with different topics.

ACCTNG 5499 Individual Research in Accounting: 1-3 semester hours
Prerequisites: Consent of instructor, department chair and graduate director; a minimum 3.0 graduate GPA; a minimum GPA of 3.0 in all accounting courses at the 3000-level and above taken at UMSL. Special individual research topics in Accounting under the guidance of a specific professor.

ACCTNG 6441 Graduate Topics in Taxation: 3 semester hours
Prerequisites: At least a B in ACCTNG 3441 or ACCTNG 5447; enrollment in Masters of Accountancy program; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. This course examines the role taxes play in evaluating decisions confronted by individuals. Students will apply basic tools learned in accounting and finance to settings impacted by tax laws with the goal of not minimizing taxes but maximizing the present value of a taxpayer's wealth.

ACCTNG 6460 Advanced Data Integration: 3 semester hours
Same as INFSYS 6860. Prerequisites: Graduate standing. This course discusses the theories and techniques for blending unstructured and structured data including big data and social media streams with relational databases, data warehouses, spreadsheets, and other sources of data. It provides hands-on experience in integrating data from diverse sources, screening and cleaning it, and producing descriptive and visual summaries in tables, graphs, maps, and text for business intelligence. Students will be introduced to tools that integrate data from different sources and provide input to dashboards for rich visualization and advanced analytics. Students may not receive credit for both INFSYS 3860 and INFSYS 6860.

Finance and Legal Studies

Finance and Legal Studies is a multi-disciplinary field that combines various concepts from management, economics and accounting with financial techniques to make sound business decisions and solve problems. There are many business situations in both large and small companies that require knowledge of the latest financial practices and tools. Generally, these applications involve investing (using funds) or financing (raising funds). As a result, the field is comprised of a number of areas including corporate finance, investments, financial institutions and services (banking, insurance, real estate) and personal financial planning.

Over the last two decades, the field of finance has become increasingly technical and specialized. Employers recruiting for financial positions not only require candidates to have an undergraduate or graduate degree in finance, but they also want new employees to exhibit skills and experience beyond those typically found in a traditional academic environment. As a result, professional licensing or certification has become one of the most widely recognized means of demonstrating core competency. Consequently, the finance program at the University of Missouri - Saint Louis carefully integrates finance tracks into the curriculum to enable students to complete their academic degrees while at the same time providing the in-depth knowledge necessary for taking professional certification exams. Our program is designed to accelerate professional development and provide students with superior credentials to qualify them for skilled positions in a highly competitive job market.

The Department of Finance and Legal Studies offers six track certifications in addition to General Finance Emphasis for undergraduate students. These tracks include Corporate Finance, Financial Institutions and Services, Investment and Portfolio, Financial Planning, Insurance, and the newest track, Fintech (or Financial Technology). Fintech is one of the most fast-moving industries. The applications of Fintech go over different areas in investments and financial institutions. The Fintech track gives students an opportunity to view finance from a technological perspective. The track introduces students to major areas of Fintech which include Blockchain, Cryptocurrencies, FinTech Credit, Big Data, Machine Learning, Neural Network, Robo Advisers, Algorithmic Trading, etc. These new financial technology and applications will give students an opportunity to understand the interaction among finance, technology, and regulation in the financial industry.

The BS in Actuarial Science degree at UMSL is an interdisciplinary program offered by the Department of Mathematics and Computer Science, the Department of Economics, and the Department of Finance and Legal Studies. Actuaries use the tools of math, economics and finance to evaluate and price risk. Actuaries work in the fields of insurance and finance. This major is among the highest-paying of all undergraduate majors.

The department also supports Flex MBA degree with Emphasis in Finance and the newly launched DBA program.

Practical Experiences and Enrichment Opportunities for Students

The department also contains many rewarding opportunities for students such as the Student Investment Trust, the Finance Club, and the Finance Career Conference. The Student Investment Trust offers students a great opportunity to learn investments and portfolio management by investing real money in the securities markets. Students manage a portfolio worth $350,000 and learn to apply tools and techniques learned in the classroom. Students also have the opportunity to participate in the CFA Case Competition and Industrial Issues Competition by the Society of Financial Service Professionals, guided by faculty in the department.

The Finance Club contributes with multiple resources for students that are interested in a career in the financial industry through workshops, job fairs, and finance career mentoring events.

The Finance Advisory Board brings business leaders from local companies, banks, insurance companies, and securities firms to campus. They are actively engaged in student enrichment, curriculum development and student mentoring program.

The department, the Finance Club and the Finance Advisory Board host a Finance Career Conference every year in which students will learn about building a career in the financial field. The conference includes keynote speakers, live panel discussions and multiple professional workshops. More importantly, students have the opportunity to network...
with companies from all over the St. Louis region to discuss internships, placement opportunities, and career development.

**Scholarship Opportunities**

The department offers a variety of scholarship opportunities, including Boeing Company Scholars Program in Business, Mindy Griffin Finance Scholarship ($2000), James and Mary Lou Krueger SIT ($2000), Kenneth Locke SIT ($2000) and NISA Investment Advisors Scholarship, in addition to general business scholarships.

**Job and Internship Opportunities**

New graduates with bachelor’s degrees in finance from UMSL have a wide selection of career opportunities to choose from. At the corporate level, companies such as Boeing, Bayer, and Ameren hire our graduates for positions in budget analysis, project management, working capital management, and mergers and acquisitions. Local and national investment firms such as Edward Jones, Moneta Group, Ameritrade hire many of our students to serve as stockbrokers, financial analysts, wealth managers, financial planners, and portfolio managers. In banking, new graduates are employed in management positions in commercial and consumer lending, trust services, operations and branch banking. The insurance and real estate industries also have a strong presence in St. Louis (e.g. Northwestern Mutual, Cushman and Wakefield) hire graduates for various sales and administrative positions.

Students have many internship opportunities in their junior and senior years, facilitated by the internship offices at the College of Business Administration. Internships not only provide valuable real-world experience to complement academic learning, but enhances student marketability at graduation. Over 95 percent undergraduate students have jobs or are pursuing a graduate degree within 6 months of graduation.

**Faculty**

The Department of Finance and Legal Studies contains a very prestigious faculty group that holds Ph.D.’s from many major U.S. universities and has extensive industrial experience to share in the classroom. They hold many highly respected certifications such as the CFA, FRM, and CFP and have won a range of college, campus and UM system awards for excellence in research and teaching.

As active researchers, they are on the cutting edge of new developments in the field which are carefully integrated into coursework. The Finance area recently was ranked in the top 12% of all finance faculties nationwide, based on academic productivity. All of the law faculty hold J.D. degrees from major U.S. universities and have many years of experience in private law practice both national and international.

Finance Minor (p. 463)

**Affiliated Interdisciplinary Programs**

Actuarial Science BS (p. 311)

Actuarial Studies Undergraduate Certificate (p. 313)

**Courses**

**FINANCE 1590 Personal Finance for Nonbusiness Majors: 3 semester hours**

For future professionals who want to learn more about personal finance and how to better manage their resources. The topics include purchasing/leasing cars, home acquisitions, investing in stocks and bonds, mutual funds, retirement planning and health and life insurance. Special emphasis will be on the nontechnical aspects of these issues. Cannot be used for credit in BSBA program.

**FINANCE 3500 Financial Management: 3 semester hours**

Prerequisites: ECON 1002, MATH 1105, ACCTNG 2400, INFSYS 2800, and a minimum overall GPA of 2.0. The study of a firm's need for funds; the institutions, instruments and markets concerned with raising funds; and the techniques of analysis used to determine how effectively these funds, once raised, are invested within the firm.

**FINANCE 3501 Financial Policies: 3 semester hours**

Prerequisite: FINANCE 3500 and a 2.0 overall GPA. The intensification and application of the concepts developed in FINANCE 3500. Special emphasis is given to the development of top management policies and their application toward complex problems of finance. Techniques for identifying and dealing with these problems before they become acute will be investigated. Cases will be integrated with appropriate outside reading.

**FINANCE 3503 Computer Applications in Finance: 3 semester hours**

Prerequisite: INFSYS 1800, FINANCE 3500, one 3000-level finance course and a 2.0 overall GPA. Financial problem solving and applications on the micro-computer. A project oriented course with an emphasis on micro based finance projects: Present value/IRR analysis, duration, immunization, portfolio optimization, leasing, capital budgeting, financial forecasting, options and futures.

**FINANCE 3520 Investments: 3 semester hours**

Prerequisite: FINANCE 3500 and a 2.0 overall GPA. Financial analysis of debt and equity instruments available on organized exchanges and in less tangible ‘over the counter’ markets. Techniques of such analysis being presented in context with economic and management circumstances within the company, industry and economy.

**FINANCE 3521 Financial Engineering: Applying Derivatives: 3 semester hours**

Prerequisites: FINANCE 3500. Students engage in a comprehensive investigation of advanced risk management techniques. Futures, forwards, options and synthetic securities are explored to determine their effectiveness in generating the desired risk exposure. A comprehensive study of speculative market conditions and characteristics are assessed in conjunction with a variety of financial innovations. Valuation techniques and hedging theories are combined with mathematical models to determine their effectiveness in practical situations. Special topics are introduced as market conditions dictate. It is recommended that students take Investments (FINANCE 3520) prior to enrolling in FINANCE 3521.

**FINANCE 3523 Fixed Income Analysis: 3 semester hours**

Prerequisites: FINANCE 3500. This course explores key issues in fixed income securities. The topics include pricing of bonds, measuring bond yields, bond price volatility, factors affecting yields and the term structure of interest rates, treasury securities, corporate debt instruments, residential mortgage loans, collateralized mortgage/debt obligation, and analysis of bonds with embedded options. The course prepares students for the CFA exams of Level 1 in the area of fixed income analysis.
FINANCE 3524 Advanced Investment Management: 3 semester hours
Prerequisites: FINANCE 3520 or consent of the instructor. This course reviews various advanced topics in investment management. The topics include (1) portfolio management, (2) fixed income analysis, (3) equity analysis, (4) economics in a global context, (5) derivatives, (6) alternative investments, and (7) Ethical and Professional Standards. The course provides students with theoretical and practical knowledge in portfolio management techniques and advanced investment strategies. The course materials are related to the CFA (Chartered Financial Analyst) Level I Exam curriculum.

FINANCE 3525 Practicum in Investments: 1 semester hour
Prerequisites: FINANCE 3500 and a 2.0 campus GPA. Students will apply their knowledge of stocks and bonds by managing a real dollar portfolio of securities. This course requires that students perform technical and fundamental analysis, prepare research reports, present proposals and participate in group investment decisions. The University's Student Investment Trust provides the money for students to invest. Course may be repeated for credit up to a maximum of 3 credit hours.

FINANCE 3540 Introduction to Financial Institutions and Financial Markets: 3 semester hours
Prerequisite: FINANCE 3500 and a 2.0 overall GPA. The course surveys financial institutions and financial markets and addresses the interplay between institutions and markets. State and federal regulation of institutions and markets is explored. A portion of the course addresses current events, managerial policy issues, and regulatory issues in financial services and markets. Focus is primarily U.S. institutions and markets, but the evolving impact of globalization and importance of the Foreign Exchange Market on U. S. financial institutions are developed.

FINANCE 3541 Commercial Bank Management: 3 semester hours
Prerequisites: ECON 1002, FINANCE 3500 and a 2.0 overall GPA. Corporate finance and microeconomics are applied to matters of importance to commercial bankers. Among the subjects treated are bank-asset portfolio construction, lending policies, liabilities management, bank capital structure, short-run cash management, financial market rates and flows, and quantitative models for bank management. Commercial bank management is analyzed from an internal viewpoint in terms of what bank managers should look for in asset management and why; what market conditions they should be aware of; and what techniques they can use to meet changing economic and financial conditions.

FINANCE 3542 Principles of Real Estate: 3 semester hours
Prerequisites: FINANCE 3500 and a 2.0 campus GPA. As an introduction to the real estate industry, the course broadly explores all phases of acquisition, development and disposal of real property. Topics include legal requirements of contracts, property rights, valuation and appraisal techniques, marketing, brokerage operations and practices, mortgage financing, leasing and property management.

FINANCE 3545 Seminar in Venture Capital and Private Equity: 3 semester hours
Prerequisites: FINANCE 3500 and another finance elective. This course examines venture capital and private equity firms as an important category of financial institutions. The main focus of the course is on financial, economic, and legal issues that develop between venture capital firms and their limited partners and between private equity firms and the firms in which they invest. More specifically, the course will explore the following processes: (1) how private equity and venture capital firms raise capital; (2) how they deal with firms in which they invest; and (3) how they exit investments. The course also discusses technology development process including protection through patents before they are licensed or used to establish as startup companies.

FINANCE 3546 Advanced Topics in Bank Management: 3 semester hours
Prerequisites: ECON 1002, FINANCE 3500 and a 2.0 overall GPA. This course is designed to give students an understanding of the retail banking process. Students will use the bank software to simulate retail banking transactions. The course will also explore various other topics including managing bank risk, financial ratios, and evaluating the performance of banks.

FINANCE 3550 Selected Topics in Finance: 3 semester hours
Prerequisites: FINANCE 3520 or consent of instructor. This course reviews various advanced topics in finance. The topics include (1) portfolio management, (2) fixed income analysis, (3) equity analysis, (4) economics in a global context, (5) derivatives, (6) alternative investments, and (7) Ethical and Professional Standards. The course provides students with theoretical and practical knowledge in portfolio management techniques and advanced investment strategies. The course materials are related to the CFA (Chartered Financial Analyst) Level I Exam curriculum.

FINANCE 3560 Practice of Personal Financial Planning: 3 semester hours
Prerequisites: A minimum campus GPA of 2.0; FINANCE 3500 or consent of instructor and Area Coordinator. Professional financial planning requires broad knowledge of investments, insurance, income taxation, retirement planning, and estate planning, as well as certification requirements and legal/ethical issues. This course introduces students to the field of financial planning, and provides an integrated overview of the topics listed above. Students interested in the Financial Planning track are encouraged to complete this course prior to taking other courses in the track.

FINANCE 3561 Principles of Insurance: 3 semester hours
Prerequisites: FINANCE 3500 and a 2.0 campus GPA. This is a survey course intended to introduce students to the basic concepts of insurance. Topics include the nature of risks, types of insurance carriers and markets, insurance contracts and policies, property and casualty coverages, life and health insurance, and government regulations. The functions of underwriting, setting premiums, risk analysis, loss prevention, and financial administration of carriers are emphasized.

FINANCE 3562 Life Insurance and Employee Benefits: 3 semester hours
Prerequisites: FINANCE 3500 or equivalent and a minimum campus GPA of 2.0. This course explores the life insurance business from the perspective of both the consumer and provider. Coverage will include an analysis of the various types of life insurance products, aspects of life insurance evaluation, reinsurance, underwriting, and uses of life insurance in financial planning. Also included is an examination of the tax, legal, and ethical requirements.

FINANCE 3563 Retirement Planning and Employee Benefits: 3 semester hours
Prerequisites: A minimum campus GPA of 2.0; FINANCE 3500 or consent of instructor and Area Coordinator. The course is designed to give students an understanding of the retirement planning process. Students will gain an appreciation of the usefulness (and shortcomings) of employee benefits and develop an ability to counsel others on important retirement and employee benefit decisions. Corporate pension and profit sharing plans, self-employed Keough plans, IRA's, annuities, health insurance, and social security will be discussed.

FINANCE 3564 Estate Planning and Trusts: 3 semester hours
Prerequisites: A minimum campus GPA of 2.0; FINANCE 3500 or consent of instructor and Area Coordinator. This course will focus on the responsibilities of a financial planner in the formulation and implementation of an estate plan. Topics include wills, lifetime transfers, trusts, gifts, estate reduction techniques, tax implications in estate planning, business and inter-family transfers, dealing with incompetency, postmortem techniques, and the role of fiduciaries. Lectures, cases, and guest speakers will be used to stimulate analysis and discussion.

FINANCE 3565 Seminar in Financial Planning: 3 semester hours
Prerequisites: ACCTNG 3441, FINANCE 3520, FINANCE 3560, FINANCE 3561, FINANCE 3563, and FINANCE 3564; a minimum campus GPA of 2.0; or consent of instructor. This course serves as the capstone in the registered Financial Planning curriculum. Students will prepare and present comprehensive, professional-level personal financial plans. This course is required by the Certified Financial Planner Board of Standards for those who wish to sit for the Certified Financial Planner examination.
FINANCE 3570 Essentials of Fintech: 3 semester hours
Prerequisites: FINANCE 3500 or consent of the instructor. This is an introductory course to provide students an overview of Fintech (Financial Technology). The course may include the following topics: Blockchain, Cryptocurrencies, FinTech Credit, Artificial Intelligence and Big Data, Robo Advisers, FinTech Regulation and RegTech, and Algorithmic Trading. This course provides students with the foundations for the interaction of finance, technology, and regulation in the financial industry.

FINANCE 3572 Financial Data Programming: 3 semester hours
Prerequisites: FINANCE 3500 and a minimum campus GPA of 2.0. Students will learn the fundamentals of financial data programming with Python and R using structured data (tabular data such as spreadsheets) and unstructured data (text data such as social media) for application in finance fields.

FINANCE 3574 Artificial Intelligence Applications in Finance: 3 semester hours
Prerequisites: FINANCE 3572 or consent of instructor. This course introduces students to topics in artificial intelligence (AI) and its applications in finance fields. The course discusses the history of AI and machine learning (ML) and its general methodology of development of data models. The course presents AI and ML applications and real life examples in financial services industries, such as portfolio management, algorithmic trading, and credit scoring.

FINANCE 3576 Blockchain in Business: 3 semester hours
Prerequisites: FINANCE 3500 or consent of the instructor. The course is designed to provide students with an understanding of key concepts, developments and major applications of the blockchain, a peer-to-peer exchange mechanism without an intermediary. It covers the technical foundations of the blockchain, why it is needed, and how it works. It also explores a series of applications including but not limited to those in business entities. Credit cannot be granted for both FINANCE 3576 and FINANCE 6576.

FINANCE 3580 International Corporate Finance: 3 semester hours
Same as INTL BUS 3580. Prerequisites: FINANCE 3500 and a 2.0 campus GPA. This course explores corporate finance in the context of a global environment. Financial managers for an international firm must deal with all the normal problems faced by domestic corporations plus additional foreign exchange and political risks. Class discussions will focus on applying financial techniques to decision making in foreign operations. Students are required to work in a group to undertake a project related to international finance.

FINANCE 3582 International Investments: 3 semester hours
Same as INTL BUS 3582. Prerequisites: FINANCE 3500. This course explores the concepts of investing and hedging risk management, portfolio diversification, currency risk, asset pricing, and alternative portfolio strategies. Techniques for using derivatives are discussed in the context of hedging exchange rate risk. Reading foreign exchange quotes and understanding the functioning of global markets is central to the course. A prior course in investments is recommended but not required.

FINANCE 3583 The Law of International Business Transactions: 3 semester hours
Same as INTL BUS 3280. Prerequisites: BUS AD 2900 or consent of instructor. This course studies the role and function of International Law and national laws in the regulation of international business transactions. The impact of various legal regimes on import/export transactions, foreign investments, and the operations of multinational enterprises will be included. The role of national governments, supra-national governmental organizations, and non-governmental organizations in forming and administering the international legal environment will be studied.

FINANCE 3585 Business in China: 3 semester hours
Same as INTL BUS 3281. Prerequisites: A minimum campus GPA of 2.0 and junior standing. This course introduces students to the practices of doing business in China. Students will be introduced to the Chinese economic and business environment. Issues related to trade and foreign direct investment in China will be discussed. The course adopts an innovative approach, utilizing lectures, case analysis, projects, and student presentations.

FINANCE 3590 Internship in Finance: 1-3 semester hours
Prerequisite: a minimum campus GPA of 2.0; one must have completed and/or be currently enrolled in at least 6 credit hours of finance electives and have consent of supervising instructor and Area Coordinator. A Business College GPA of at least 2.5 is also required. Students are employed in the field of finance where they apply the knowledge and skills learned in the classroom. Professional development and obtaining specialized work experience in a Track are the primary goals. The student's program will be monitored by a finance faculty member with the student providing a formal written report at the end of the project. FINANCE 3590 may not be counted toward the minimum 15 credit hours of finance electives for a finance emphasis.

FINANCE 3595 Special Administration Problems - Finance: 1-10 semester hours
Prerequisite: To be determined each time the course is offered and to include a minimum 2.0 overall GPA. Study of selected special problems in business and administration. May be repeated for credit with different topics.

FINANCE 3598 Seminar in Finance: 1-3 semester hours
Prerequisite: To be determined each time the course is offered and to include a minimum 2.0 overall GPA. This course is a selected special topic in the field of finance. May be repeated for credit with different topics.

FINANCE 3599 Independent Study in Finance: 1-3 semester hours
Prerequisites: Minimum campus GPA of 2.0 and approval by the supervising professor and the Area Coordinator. Special individual study in finance under the supervision of a full-time finance faculty member.

FINANCE 5599 Individual Research in Finance: 1-3 semester hours
Prerequisites: Consent of instructor and graduate director. Special individual research topics in Finance under the guidance of a specific professor.

FINANCE 6500 Financial Management: 3 semester hours
Prerequisites: ACCTNG 5400 or ACCTNG 2400, SCMA 5300 or SCMA 3300, and BUS AD 5000 or ECON 1001 and ECON 1002. This course provides an in-depth analysis of corporate finance including asset pricing, risk and return, short- and long-term investment decisions, capital structure choices, dividend policy, derivatives, mergers and acquisitions, and a host of other current topics. The material is taught through lectures and problem solving.

FINANCE 6501 Advanced Financial Management: 3 semester hours
Prerequisite: FINANCE 6500 and SCMA 5300. Exposure to recent financial management theory through selected readings. Financial management problems are considered by the use of cases and simulation models. An original research project under the supervision of instructor is required.
FINANCE 6503 Computer Applications in Finance: 3 semester hours
Prerequisites: FINANCE 6500 and 3.0 overall GPA. This course focuses on modeling and data analytics in finance. Hands-on projects include applications in loan amortization, buy or lease decisions, financial statement analysis and forecasting, capital budgeting, bond and stock valuation, risk analysis, capital structure, and portfolio analysis. Students will learn basic and sophisticated Excel tools and how to build executive dashboards, interfaces, and other monitoring tools used in day-to-day business. They will also gain exposure to statistical inference, time series modeling, event study analysis, and machine learning techniques for forecasting and working with financial data.

FINANCE 6520 Security Analysis: 3 semester hours
Prerequisite: FINANCE 6500 and SCMA 5300. An in-depth study of techniques used in evaluating various financial assets as investment opportunities. Financial assets studied include common stock, preferred stock, and fixed income securities. Other related topics such as sources of investment information and current market trends are discussed.

FINANCE 6521 Financial Forensics: The Science of Derivatives: 3 semester hours
Prerequisites: FINANCE 6500. Students engage in a comprehensive investigation of advanced risk management techniques. Futures, forwards, options and synthetic securities are explored to determine their effectiveness in generating the desired risk exposure. A comprehensive study of speculative market conditions and characteristics are assessed in conjunction with a variety of financial innovations. Valuation techniques and hedging theories are combined with mathematical models to determine their effectiveness in practical situations. Special topics are introduced as market conditions dictate. It is recommended that students take Investments (FINANCE 6520) prior to enrolling in FINANCE 6521.

FINANCE 6523 Fixed Income Analysis: 3 semester hours
Prerequisites: FINANCE 6500. This course explores key issues in fixed income securities. The topics include pricing of bonds, measuring bond yields, bond price volatility, factors affecting yields and the term structure of interest rates, treasury securities, corporate debt instruments, residential mortgage loans, collateralized mortgage/debt obligation, and analysis of bonds with embedded options. The course prepares students for the CFA exams of Levels I and (part of) II in the area of fixed income analysis.

FINANCE 6524 Portfolio Analysis and Management: 3 semester hours
Prerequisites: FINANCE 6500. This course reviews various advanced topics in investment management. The topics include portfolio management, fixed income analysis, equity analysis, economics in a global context, derivatives, alternative investments, ethical and professional standards, and applications of technology in financial services such as machine learning. The course provides students with theoretical and practical knowledge in portfolio management techniques and advanced investment strategies. The course materials are related to the CFA (Chartered Financial Analyst) Level I Exam curriculum.

FINANCE 6540 Financial Institutions and Financial Markets: 3 semester hours
Prerequisite: Graduate standing and FINANCE 6500. By lecture and casework, the course surveys markets (Money Market, Capital Markets, Foreign Exchange) and various forms of financial institutions. Historical and evolving business models of financial institutions are explored in the context of regulation, economics, and competition. Interplay between institutions and markets is addressed. Structure and purpose of regulation is examined. A portion of the course involves current events and managerial policy issues in financial services. A major U.S. financial institution is selected and case analyzed by the class. Focus is U.S. institutions and markets, but impact of globalization is discussed.

FINANCE 6541 Commercial Bank Management: 3 semester hours
Prerequisite: FINANCE 6500. This course explores the various bank management techniques required to manage a modern commercial bank in a rapidly changing environment. Topics include asset and liability management, capital adequacy, bank holding companies, profitability, and bank market structure and regulation.

FINANCE 6542 Real Estate: 3 semester hours
Prerequisite: FINANCE 6500. This course provides a broad introduction to real estate with a focus on legal issues, market analysis, valuation, financing, leasing and investment decisions. Classes are conducted in a in a standard lecture format with discussion on current topics. No prior knowledge of the industry is required.

FINANCE 6545 Venture Capital and Private Equity: 3 semester hours
Prerequisites: FINANCE 6500. This course examines venture capital and private equity firms as an important category of financial institutions. The main focus of the course is on financial, economic, and legal issues that develop between venture capital firms and their limited partners and between private equity firms and the firms in which they invest. More specifically, the course will explore the following processes: (1) how private equity and venture capital firms raise capital; (2) how they deal with firms in which they invest; and (3) how they exit investments. Before discussing the main issues of the course, and as a way of introducing the subject, we begin with a brief discussion of the significance of venture capital funding in the technology transfer process and a simple example of venture capital funding from the perspective of an entrepreneur. As most new technologies are proprietaries, the course also discusses technology development process including protection through patents before they are licensed or used to establish as startup companies.

FINANCE 6570 Introduction to Fintech: 3 semester hours
Prerequisites: FINANCE 6500. This course introduces students to the major topics of fintech (financial technology), including blockchain, cryptocurrencies, fintech credit, big data, machine learning, neural network, robo advisers, and algorithmic trading, as they relate to investments and financial institutions.

FINANCE 6572 Financial Data Analytics: 3 semester hours
Prerequisites: Graduate standing. This course covers fundamentals of Python and R programming with hands-on projects and specific applications in finance. Students will learn to acquire, clean, analyze and visualize both structured (tabular data such as spreadsheets) and unstructured data (text data such as social media). Both data programming languages are used in data analytics, machine learning, and artificial intelligence in modern financial services industry including banks, brokerage houses, hedge funds, and mutual funds.

FINANCE 6574 Artificial Intelligence and Machine Learning in Finance: 3 semester hours
Prerequisites: FINANCE 6572 or consent of the instructor. This course introduces students to artificial intelligence (AI) and machine learning (ML) and the applications in finance. The course covers the historical development of fundamental ideas in AI and ML, and its general methodology of the development of data models. The course provides a sampling of successful applications of AI and ML in different areas of finance, including portfolio management, algorithmic trading, fraud analytics, and credit scoring. Each of these topics are presented with real world examples and programming applications in languages like Python and R.
GLAM Area is the College of Business Administration's focal point for research, academic course work, non-credit instruction, consulting, and community service in the areas of general management, strategic management, human resource management, international management, and small business management.

The Global Leadership and Management Department is committed to:

- Providing students with a first-rate business education at the undergraduate and graduate levels.
- Conducting and disseminating basic and applied research that advances our understanding of issues relevant to the effective management of organizations.
- Creating educational value by delivering an innovative, cutting-edge management curriculum, using both traditional and nontraditional delivery methods.
- Serving the University, the St. Louis business and not-for-profit communities, the citizens of Missouri, and society at large.

GLAM faculty are widely recognized for their excellence in teaching, research, and service by their various constituencies (e.g., students, local business leaders, community organizations, faculty at other universities).

During the course of their careers, GLAM faculty have won campus teaching awards, served as editors of professional journals, authored leading textbooks, chaired professional societies, consulted with major corporations, been awarded federal grants, served on community boards and provided thousands of hours of non-compensated community service.

We believe that what we learn from our research and our consulting work shapes what we teach in our classes, producing an educational experience that is grounded in what goes on today in business with an eye to business in the future.

GLAM faculty are quite active in interacting with students. For example, numerous students have participated in management-oriented internships under faculty direction. Other students have worked closely with faculty on special projects of mutual interest. Still other students have benefited from working with faculty on projects that were carried out in conjunction with trips to other countries.

Information Systems and Technology

Choosing IST as a major or a minor is a smart move for any student’s immersion days, conferences, competitions, and student clubs. To reinforce understanding of successful practices in the use and management of IT, the IST faculty constantly challenge and engage students through opportunities such as hackathons, game jams, and immersion days, conferences, competitions, and student clubs.

UMSL’s IST students are thus well-versed in varied technology landscapes as well as in sustaining and disruptive information technologies through specialized coursework in Business Intelligence, Cybersecurity, Financial Technology, IT Auditing and Legacy Systems. With strong business and communication skills, they make an immediate impact on the organizations they join after graduating from UMSL. Job roles they are employed in include application developer, business analyst, business process designer, chief information officer, cybersecurity analyst, database designer, helpdesk manager, IT manager, network administrator, pen tester, systems administrator, and web designer, among others.

To reinforce understanding of successful practices in the use and management of IT, the IST faculty constantly challenge and engage students through opportunities such as hackathons, game jams, immersion days, conferences, competitions, and student clubs.

Choosing IST as a major or a minor is a smart move for any student’s career. For more information, please visit the department’s website: http://ist.umsl.edu or contact the department chair, Dr. Dinesh Mirchandani at mirchandanid@umsl.edu or 314-516-7354.

INFSYS 3816 Managerial Application of Object-Oriented Programming II: 3 semester hours
Prerequisites: INFSYS 3806 and a minimum campus GPA of 2.0. This course builds on skills learned in INFSYS 3806 and focuses on contemporary client-server development environments and tools. Topics include database integration, web applications, and web services. Students will be provided hands-on application development experiences during class and in assignments.

INFSYS 3817 Advanced Legacy Systems: 3 semester hours
Prerequisites: INFSYS 3807 or consent of instructor. This course will build upon Contemporary z/OS COBOL I. Topics may include JCL, file management, utilities/tools (like SORTING, File-Aid, IEB's, JCLCheck), file access (VSAM, DB2, and Sequential), scheduling, debugging, testing, and mainframe-server communication protocols. Students will be prepared for leadership roles in managing IT landscapes consisting of both legacy and modern systems. Credit cannot be granted for both INFSYS 3817 and INFSYS 6817.

INFSYS 3818 Management of Software Testing: 3 semester hours
Prerequisites: INFSYS 3806 or INFSYS 3844 or consent of instructor. This course provides the core concepts of the lifecycle of Software Assurance, Quality Control and Testing. It will emphasize the importance of testing strategies, methodologies, planning, design, staging, reporting and managing defects, test environment management and Test Driven Development. Credit cannot be granted for both INFSYS 3818 and INFSYS 6818.

INFSYS 3820 Introduction to Systems Administration: 3 semester hours
Prerequisites: INFSYS 2800 or CMP SCI 1250 or permission of Information Systems department chair. This course provides an overview of modern Information Technology (IT) infrastructure components and focuses on systems administration in Linux and Windows server environments. Students will learn to install, configure, operate, maintain, and secure servers. Topics include user management and policies, file systems, backup and recovery, network configuration, and host security among others. Virtualization and cloud environments are introduced. Basic foundations of automation and configuration management using shells and other contemporary tools are provided. Credit cannot be granted for both INFSYS 3820 and INFSYS 6820.

INFSYS 3830 Data Programming: 3 semester hours
Prerequisites: A minimum campus GPA of 2.0 or consent of instructor. In this course, students will learn the fundamentals of data programming with R and Python using structured (tabular data such as spreadsheets) and unstructured data (text data such as social media) for application in Business and Cyber Analytics, Machine Learning, and Artificial Intelligence. Credit cannot be granted for both INFSYS 3830 and INFSYS 6830.

INFSYS 3841 Enterprise Information Systems: 3 semester hours
Prerequisites: INFSYS 2800 and a minimum campus GPA of 2.0. This course provides students the skills and knowledge needed for roles as ERP business analysts, ERP configuration specialists, and consultants. Students will be introduced to integrated business processes through the application of SAP modules supporting Sales and Distribution (SD), Materials Management (MM), Financial Accounting (FI), Production Planning (PP), and Controlling (CO) as components of the SAP integrated business solution. Students will complete exercises to construct a functioning company operating in an integrated SAP R/3 environment.

INFSYS 3842 Data Networks and Security: 3 semester hours
Same as INTL BUS 3882. Prerequisites: INFSYS 2800 and a minimum campus GPA of 2.0; or consent of instructor. This is a foundational course in data networking and network security. It covers the fundamentals of networking and security implications of data networks with hands-on exercises. Topics include networking layers and standardization of functionality across layers, wired and wireless Local Area Networks (LANs) along with switching and physical layer technologies, Internetworking, supporting and supervisory protocols; application layer protocols such as HTTP, and fundamentals of network security. Students will also learn about network protocol analyzers such as Wireshark, virtualization, and networking in virtual environments. Credit cannot be granted for both INFSYS 3842 and INFSYS 6836. Course satisfies/fulfills the College of Business Global Awareness requirement.

INFSYS 3843 Decision Support Systems for Business Intelligence: 3 semester hours
Prerequisites: SCMA 3300 and a minimum campus GPA of 2.0. This class examines the applications of data and analytics (models) to support the needs of decision makers. Descriptive, predictive and prescriptive analytics tools are coupled with Big Data and well-designed user interfaces to provide the necessary tools. Topics such as how to construct the data warehouse, how to clean and store data in the appropriate form, how to construct and implement a useful visualization of data, and how to construct and support decision makers are included. DSS component design in response to decision making and business intelligence needs are discussed.

INFSYS 3844 Developing Business Applications in .NET: 3 semester hours
Prerequisites: INFSYS 2800 or CMP SCI 2250, and a minimum campus GPA of 2.0. This course will enable students to design, implement, and debug object-oriented and data driven business applications in C#.NET. Students will learn application design choices, object-oriented design principles, event-driven programming, user interface programming, user interface controls, data binding and database access, exception handling, debugging and effective ways of working with C#.NET.

INFSYS 3845 Database Management Systems: 3 semester hours
Prerequisites: INFSYS 2800, INFSYS 3816, ACCTNG 2400, and a minimum campus GPA of 2.0. This course provides an introduction to the design and use of databases in meeting business information needs. Topics include database planning, conceptual design, and data administration. The concepts are studied with projects involving the use of a current database management system.

INFSYS 3847 Web Design: 3 semester hours
Prerequisites: INFSYS 2800 and a minimum campus GPA of 2.0. This course focuses on website planning, design, and construction. Topics include site structure, navigation, content management, markup languages, CSS, scripting languages, and important tools, libraries and frameworks.
**INFSYS 3848 Introduction to Information Security: 3 semester hours**
Prerequisites: INFSYS 2800 or CMP SCI 2250 or consent of instructor and a minimum campus GPA of 2.0. This course provides an introductory survey of the vast field of Information Security (InfoSec). It intersects both management and technical aspects of security as relevant to organizations, governments, individuals, and society. Topics include fundamental principles of InfoSec and cyber defense, the threat environment, management of InfoSec in organizations, technologies and tools in InfoSec, cryptography, web application security, and current issues. Hands-on labs expose students to basics of penetration testing, applications of cryptography, and vulnerability management. Course is open to all majors. Credit cannot be granted for both INFSYS 3848 and INFSYS 6828. Course satisfies/fulfills the College of Business Global Awareness requirement.

**INFSYS 3858 Advanced Security and Information Systems: 3 semester hours**
Prerequisites: INFSYS 3848 or Permission of Department Chair. This course builds upon the principles of information security. It covers topics ranging from networking, penetration testing, formal verification of systems, formal models of information flow and protection, distributed system authentication, protocol design and attack, computer viruses and malware, as well as intrusion and anomaly detection models. Students are exposed to virtualization, defensive security, offensive security, and other forms of cybersecurity. Credit cannot be granted for both INFSYS 3858 and INFSYS 6858.

**INFSYS 3860 Data Integration: 3 semester hours**
Prerequisites: INFSYS 2800 or consent of instructor. This course discusses the theories and techniques for blending unstructured and structured data including big data and social media streams with relational databases, data warehouses, spreadsheets, and other sources of data. It provides hands-on experience in integrating data from diverse sources, screening and cleaning it, and producing descriptive and visual summaries in tables, graphs, maps, and text for business intelligence. Students will be introduced to tools that integrate data from different sources and provide input to dashboards for rich visualization and advanced analytics. Students may not receive credit for both INFSYS 3860 and INFSYS 6660.

**INFSYS 3862 Artificial Intelligence Applications for Business: 3 semester hours**
Prerequisites: INFSYS 3830 or consent of instructor. This course introduces students to topics in Artificial Intelligence (AI) and its applications in Business and Cybersecurity. The course discusses the history of AI and delves into Machine Learning (ML) and its general methodology of development of data models. The course provides a sampling of successful applications of AI and ML in different areas of Business such as portfolio management, algorithmic trading, fraud analytics, and credit scoring. Credit cannot be granted for both INFSYS 3862 and INFSYS 6862.

**INFSYS 3864 Applied Cryptography for Business: 3 semester hours**
Prerequisites: INFSYS 3806 and INFSYS 3848, or consent of instructor. This course provides an overview of the building blocks of contemporary cryptographic solutions to address information security needs in organizations. The focus will be on understanding cryptographic primitives and applying them to assure confidentiality, integrity, authentication, and non-repudiation among other information security goals. Using best practices, students will work on projects aimed at evaluating, selecting, and implementing an appropriate mix of cryptographic solutions given particular application domains. Application areas in traditional as well as cloud-based information technology environments will be considered. Credit cannot be granted for both INFSYS 3864 and INFSYS 6864.

**INFSYS 3866 Cloud Security for Business: 3 semester hours**
Prerequisites: INFSYS 3843 or INFSYS 3848 or consent of instructor. This course covers the fundamentals of cloud security in public cloud computing environments with a focus on business applications. Topics include identity and access management, secure configuration of cloud services, and various security focused cloud services. Data collection and analysis of cloud-based data logging services to aid in security auditing and compliance is covered. Emerging topics, such as use of artificial intelligence-based services and tools in cloud security are also discussed. Student may not receive credit for both INFSYS 3866 and INFSYS 6868.

**INFSYS 3868 Secure Software Development: 3 semester hours**
Prerequisites: A first course in programming such as INFSYS 3806 or CMP SCI 2250 or consent of instructor. This course covers the concepts of software assurance and the fundamentals of the secure software lifecycle as it relates to software development. Students will experience the secure software lifecycle process by developing concrete artifacts and practicing in a lab environment. Credit cannot be granted for both INFSYS 3868 and INFSYS 6868.

**INFSYS 3878 Information Security Risk Management and Business Continuity: 3 semester hours**
Prerequisites: INFSYS 3848 or consent of Instructor. This course provides students the tools and concepts necessary to plan for, prevent, and when needed successfully respond to disruptions in business operations. Topics covered include security policies, frameworks, information and materials management, risk management, and regulatory compliance. Credit cannot be granted for both INFSYS 3878 and INFSYS 6878.

**INFSYS 3890 Internship in Information Systems: 1-3 semester hours**
Prerequisites: Minimum business GPA of 2.5, minimum campus GPA of 2.0, completed and/or currently enrolled in at least 6 credit hours of information systems electives at the 3000 level or above, consent of supervising instructor, and consent of department chair. Students are employed in the field of information systems where they apply the knowledge and skills learned in the classroom. Professional development obtaining specialized work experience are primary goals. An information systems faculty member will monitor the student's program with the student providing a formal written report at the end of the project.

**INFSYS 3898 Seminar in Information Systems: 1-3 semester hours**
Prerequisites: To be determined each time course is offered and to include a minimum 2.0 overall GPA. This course is a selected special topic in the field of information systems. May be repeated for credit with different topics.

**INFSYS 3899 Independent Study in Information Systems: 1-3 semester hours**
Prerequisites: Minimum campus GPA of 2.0 and approval by the supervising professor and the Area Coordinator. Special individual study in information systems under the supervision of a full-time information systems faculty member.

**INFSYS 4800 IT Leadership: 3 semester hours**
Prerequisites: INFSYS 2800. This course seeks to prepare students for IT leadership roles using business cases as exemplars. Credit cannot be granted for both INFSYS 4800 and INFSYS 5800.
INFSYS 4847 IT Project Management: 3 semester hours
Prerequisites: INFSYS 2800 or consent of instructor. Effective project management ensures that a project is completed on time, within budget, and includes the necessary scope. This course explores the project management processes shared by all projects: project selection, planning, control, and closing. Traditional and Agile project management techniques will be explored in the contexts of Information Technology and Supply Chain Management. Credit cannot be granted for both INFSYS 4847 and INFSYS 6847.

INFSYS 4850 Information Systems Design: 3 semester hours
Prerequisites: INFSYS 3810, INFSYS 3816, INFSYS 3845 and a minimum campus GPA of 2.0. This course builds on the skills learned in INFSYS 3810. System design, implementation, and methods of systems installation and operation are presented. A system development project is required.

INFSYS 5800 Management Information Systems: 3 semester hours
Same as P P ADM 6800. Prerequisites: Graduate standing. This course provides an overview of issues related to the management of information systems within organizations. Course topics may include the role of the Chief Information Officer, business value from emergent information technologies (IT), enterprise systems, the impact of IT on organizational competitiveness, managing IT-enabled projects, extracting business intelligence from big data, sourcing IT, cybersecurity, ethics, intellectual property rights, and societal impacts of IT.

INFSYS 5890 Graduate Internship in Information Systems: 1-6 semester hours
Prerequisites: INFSYS 6840 or permission of instructor. The internship will be a supervised field experience in a US-based business/organization or a US-based international business/organization. Students will be employed off-campus for a 10-16 week period on projects directed by host organization supervisors in consultation with a UM-St. Louis faculty member. The project requires students to apply IS concepts to a real-world problem. The project does not duplicate, but builds upon material in the IS curriculum. A professional written report will be required.

INFSYS 5899 Individual Research in Information Systems: 1-3 semester hours
Prerequisites: Consent of instructor and graduate director. Special individual research topics in Information Systems under the guidance of a specific professor.

INFSYS 6805 Applications of Programming for Business Solutions: 3 semester hours
Prerequisites: Graduate standing. This course will enable students to design, implement, and debug object-oriented and data driven business applications in C#.NET. Students will learn application design choices, object-oriented design principles, event-driven programming, user interface programming, user interface controls, data binding and database access, exception handling, debugging and effective ways of working with C#.NET.

INFSYS 6806 Managerial Applications of Object-Oriented Technologies: 3 semester hours
Prerequisites: Graduate Standing. This course provides an introduction to object-oriented programming. Topics include object-oriented design principles and choices, encapsulation, inheritance, and event-driven programming. Hands-on labs during class sessions and assignments help students develop applied programming skills. Students may not receive credit for both INFSYS 3806 and INFSYS 6806.

INFSYS 6807 Contemporary z/OS COBOL: 3 semester hours
Prerequisites: Graduate standing. This course covers structured programming techniques for legacy business applications. Students will learn COBOL syntax, structure, design and best programming practices to create, maintain, debug, compile and execute COBOL programs.

INFSYS 6808 Advanced Object-Oriented Programming for Business: 3 semester hours
Prerequisite: INFSYS 6806. This course builds on skills learned in INFSYS 6806 and focuses on contemporary client-server development environments and tools. Topics include database integration, web applications, and web services. Students will be provided hands-on application development experiences during class and in assignments.

INFSYS 6814 Web Applications for Business: 3 semester hours
Prerequisites: Graduate standing. This course focuses on website planning, design, and construction. Topics include site structure, navigation, content management, markup languages, CSS, scripting languages, and important tools, libraries and frameworks.

INFSYS 6815 Advanced Web Applications for Business: 3 semester hours
Prerequisites: INFSYS 6806 and INFSYS 6814 or consent of instructor. This course provides a study of web application development using Java and JavaScript. Students will learn about frameworks, design patterns, software testing, and front-end web technologies. Students may not receive credit for both INFSYS 3815 and INFSYS 6815.

INFSYS 6817 Advanced COBOL and Modern z/OS System Tools: 3 semester hours
Prerequisites: INFSYS 6807 or consent of instructor. This course will build upon Contemporary z/OS COBOL 1. Topics will include JCL, file management, utilities/tools (like SORTING, File-Aid, IEB's, JCLCheck), file access (VSAM, DB2, and Sequential), scheduling, debugging, testing, and mainframe-server communication protocols.

INFSYS 6818 Management of Software Testing: 3 semester hours
Prerequisites: INFSYS 6805 or INFSYS 6806 or consent of instructor. This course provides the core concepts of the lifecycle of Software Assurance, Quality Control and Testing. It will emphasize the importance of testing strategies, methodologies, planning, design, staging, reporting and managing defects, test environment management and Test Driven Development.

INFSYS 6820 Systems and IT Infrastructure: 3 semester hours
Prerequisites: Graduate standing. This course establishes the critical role of Linux and Windows server environments in contemporary Information Technology (IT) infrastructure management. Students will explore both the technical and management aspects of server infrastructure. Technical aspects include installation, operation, maintenance, virtualization, and systems security. Management aspects include server lifecycles and management of server environments at scale using automation and configuration management tools within the context of application development, security operations, and IT operations. Credit cannot be granted for both INFSYS 3820 and INFSYS 6820.
**INFSYS 6828 Principles of Information Security: 3 semester hours**  
Prerequisites: Graduate standing. This course is a survey of the vast field of Information Security (InfoSec). It intersects both management and technical aspects of security as relevant to organizations, governments, individuals, and society. Topics covered include fundamental principles of InfoSec and cyber defense, the threat environment, management of InfoSec in organizations, technologies and tools in InfoSec, cryptography, web application security, vulnerability management, and current issues. Hands-on labs expose students to basics of penetration testing, applications of cryptography, and vulnerability management. A graduate research paper is required. This course is open to all majors. Credit cannot be granted for both INFSYS 6828 and INFSYS 3848.

**INFSYS 6830 Data Programming for Business Intelligence: 3 semester hours**  
Prerequisites: Graduate standing and consent of instructor. This course introduces students to the fundamentals of data programming with R and Python using structured (tabular data such as spreadsheets) and unstructured data (text data such as social media) for application in business and cyber analytics, machine learning, and artificial intelligence. Students may not receive credit both INFSYS 3830 and INFSYS 6830.

**INFSYS 6832 Information Systems Strategy: 3 semester hours**  
Prerequisites: Graduate Standing. This course presents the management of computer-based information resources in the context of business organizations. Issues may include: management strategies and policies for improving organizational productivity, measurement, evaluation and acquisition of management information services, office automation, end-user computing, computer use in international environments, social and organizational perspectives and ethical implications. The course will be taught using cases.

**INFSYS 6833 Decision Support Systems for Business Intelligence: 3 semester hours**  
Same as ACCTNG 5443. Prerequisites: SCMA 5300. This course examines the applications of data and analytics (models) to support the needs of decision makers. Descriptive, predictive and prescriptive analytics tools are coupled with big data and well-designed user interfaces to provide the necessary tools. Topics such as how to construct the data warehouse, how to clean and store data in the appropriate form, how to construct and implement a useful visualization of data, and how to construct and support decision makers are included. DSS component design in response to decision making and business intelligence needs are discussed. Credit cannot be granted for both INFSYS 3843 and INFSYS 6833.

**INFSYS 6836 Management of Data Networks and Security: 3 semester hours**  
Prerequisites: INFSYS 5800 (may be taken concurrently) or Consent of Instructor. This course focuses on the big-picture implications and challenges of networking and network security within contemporary Information Technology environments. It covers fundamentals of networking and security implications of data networks with hands-on exercises. Topics include networking layers and standardization of functionality across layers, wired and wireless Local Area Networks (LANs) along with switching and physical layer technologies, Internetworking, supporting and supervisory protocols, application layer protocols, network design and management, and fundamentals of network security. Students will also learn about network protocol analyzers such as Wireshark, virtualization, networking in virtual environments; and how some common networked applications operate by utilizing the networking infrastructure. Credit cannot be granted for both INFSYS 6836 and INFSYS 3842.

**INFSYS 6838 Business Processes: Design, Management and Integration: 3 semester hours**  
Prerequisite: INFSYS 5800. Business design methodologies are used to create new, or improve existing processes. Examples of business processes include: call centers, order-flow processing in financial services, manufacturing, hospital emergency services, and more. Special attention is paid to the role of information technology during the design process. Specific business process design methods we will cover are: SIPOC (supplier-input-process-output-customer), Process Flow Mapping, Simulation Modeling, Performance Scorecards, Quality Functional Deployment, Failure Mode and Effects Analysis, and Theory of Constraints. Case studies are used to illustrate the concepts and guest speakers will discuss their applications of the latest business process design methods and software.

**INFSYS 6840 Information Systems Analysis: 3 semester hours**  
Prerequisite: INFSYS 6805 or INFSYS 6806. In this course, students will learn how to identify, evaluate, and document business systems using traditional and agile methodologies. This includes how to study systems' ability to meet the business needs and information requirements of an organization, and defend alternatives that better meet needs. Students will conduct a systems analysis of an actual organization in project teams, including the identification of and defense of alternatives.

**INFSYS 6845 Database Management Systems: 3 semester hours**  
Prerequisites: INFSYS 5800 and either INFSYS 6805 or INFSYS 6806. This course provides an introduction to the design and use of databases in meeting business information needs. Topics include database architecture, design, administration, and implementation. The concepts are studied with projects involving the use of a current database management system.

**INFSYS 6847 Project Management: 3 semester hours**  
Prerequisite: INFSYS 5800. Effective project management ensures that a project is completed on time, within budget, and has high quality. The purpose of this class is to examine the task of project resource management with a focus on IT and services. It will cover conventional aspects of project management, such as the project evaluation, planning, roles, responsibilities, scheduling, and tracking. In addition, this class will examine risk management, change management, critical chain management, build vs. buy analysis, package vs. custom solutions, vendor qualification and selection, and the roles of certification in the process. The class will also cover the management of programs or a portfolio of IT projects.

**INFSYS 6848 Knowledge Management and Business Intelligence: 3 semester hours**  
Prerequisite: INFSYS 5800. Knowledge management (KM) is the process of creating, and drawing value from, an organization's intellectual assets. It deals with how to best leverage the organization's knowledge internally as well as externally. The emphasis on knowledge management within business organizations has risen dramatically in the last few years, to some extent as a result of the rapid progress in information technology capabilities. The course covers the following topics: KM tools, technologies, and systems, including knowledge repositories, knowledge portals, and expert seeker systems, creating and sustaining a knowledge sharing culture, managing and measuring intellectual capital, managing knowledge in networked organizations, including interorganizational alliances and supply chains, aligning knowledge with business strategy, risks of knowledge loss and knowledge leakage, business intelligence, and social aspects of knowledge management.
INFSYS 6849 Data Warehouse Design and Implementation: 3 semester hours
Prerequisites: INFSYS 6845 or consent of instructor. Course will cover different design configurations for structuring and organizing data in a data warehouse. Formal methodologies for the development of data warehouses will also be discussed and implemented.

INFSYS 6850 Information Systems Design: 3 semester hours
Prerequisites: INFSYS 6840 and INFSYS 6845. This course builds upon the analysis techniques presented in INFSYS 6840. It requires the student, usually working in a group to design and implement a system in a real-world environment. Advanced design concepts are presented to support the students in their project work.

INFSYS 6851 Practicum in Business Intelligence: 3 semester hours
Prerequisites: INFSYS 6833. This course will provide the context for students to integrate, synthesize and apply their Business Intelligence skills in an actual business organization. Project work will be jointly supervised and coordinated by a faculty member and a supervisor in the relevant business organization.

INFSYS 6858 Advanced Cybersecurity Concepts: 3 semester hours
Prerequisites: INFSYS 6828. This course provides an in-depth examination of advanced principles of cybersecurity. A broad range of topics are covered, including penetration testing, formal verification of systems, formal models of information flow and protection, distributed system authentication, protocol design and attack, computer viruses and malware, as well as intrusion and anomaly detection models. Multi-level security architecture, active defenses, investigation and forensics, network firewalls, virtualization, anonymity and identity, mobile security, and database security models and mechanisms are also studied. The course content is largely influenced by the latest research in the field. Credit cannot be granted for both INFSYS 6858 and INFSYS 3858.

INFSYS 6860 Advanced Data Integration: 3 semester hours
Same as ACCTNG 6460. Prerequisites: Graduate standing. This course discusses the theories and techniques for blending unstructured and structured data including big data and social media streams with relational databases, data warehouses, spreadsheets, and other sources of data. It provides hands-on experience in integrating data from diverse sources, screening and cleaning it, and producing descriptive and visual summaries in tables, graphs, maps, and text for business intelligence. Students will be introduced to tools that integrate data from different sources and provide input to dashboards for rich visualization and advanced analytics. Students may not receive credit for both INFSYS 3860 and INFSYS 6860.

INFSYS 6862 Artificial Intelligence Applications for Business and Cybersecurity: 3 semester hours
Prerequisite: Graduate standing. This course introduces students to topics in artificial intelligence (AI) and its applications in business and cybersecurity. The course starts with a historical development of fundamental ideas in AI and their relationship to the state of the art. The course then introduces one of the most successful branches of AI-machine learning (ML), and its general methodology of the development of data models. The course provides a sampling of successful applications of AI and ML in different areas of business such as portfolio management, algorithmic trading, fraud analytics, and credit scoring. Credit cannot be granted for both INFSYS 3862 and INFSYS 6862.

INFSYS 6864 Applied Cryptography for Business Applications: 3 semester hours
Prerequisites: INFSYS 6805 or INFSYS 6806, and consent of instructor. This course provides an overview of the building blocks of contemporary cryptographic solutions to address information security needs in organizations. The focus will be on understanding cryptographic primitives and applying them to assure confidentiality, integrity, authentication, and non-repudiation, among other security goals. Students will work on projects aimed at evaluating, selecting, and implementing an appropriate mix of cryptographic solutions, based on best practices, given particular application domains. Application areas in traditional as well as cloud-based Information Technology (IT) environments will be considered. Students will also learn about important considerations and pitfalls in managing cryptographic solutions at scale in modern IT environments. Students may not receive credit for both INFSYS 3864 and INFSYS 6864.

INFSYS 6866 Cloud Security Management: 3 semester hours
Prerequisites: INFSYS 6828 or INFSYS 6833 or consent of instructor. This course covers the fundamentals of cloud security in public cloud computing environments with a focus on business applications. Topics include identity and access management, secure configuration of cloud services, and security focused cloud services such as the analysis of cloud-based data logging to aid in security auditing and compliance, and new artificial intelligence-based tools. Students may not receive credit for both INFSYS 3866 and INFSYS 6866.

INFSYS 6868 Software Assurance: 3 semester hours
Prerequisites: INFSYS 6805 or INFSYS 6806 or consent of instructor. This course provides an overview of the vast field of software assurance. The goal is to make students aware of the fundamentals of the secure software lifecycle enabling them to apply principles of secure software development and management. The course also provides practical applications that allow the learners to experience the secure software lifecycle process by developing concrete artifacts. Credit cannot be granted for both INFSYS 6868 and INFSYS 3868.

INFSYS 6878 Management of Information Security: 3 semester hours
Prerequisites: INFSYS 6828. This course provides students the necessary background knowledge and skills to develop and run a systematic information security management program that is in line with organizational strategy, structure, processes, and culture. Specifically, the course introduces governance, strategy, policies, implementation, operation, evaluation, and improvement of an organization's information security to achieve business objectives and be resilient to information security threats. Credit cannot be granted for both INFSYS 6878 and INFSYS 3878.

INFSYS 6888 Capstone in Information Security: 3 semester hours
Prerequisites: INFSYS 6828 and one of either INFSYS 6858 or CMP SCI 5782. This course provides students an opportunity to participate in the full information security lifecycle in an applied setting using a project-based approach. Students from technical and non-technical backgrounds will work together in teams. Major tasks may include creating an information security management plan, conducting risk assessments, implementing technical and administrative controls to mitigate information security risks, and managing security operations with a focus on incident detection and response. Students may work on projects through an actual organization and demonstrate application of knowledge gained through all prior courses in the degree program. This course must be taken the last semester prior to graduation. Cannot receive credit for INFSYS 6888 and CMP SCI 5888.
Supply Chain and Analytics

The Supply Chain & Analytics Department is responsible for a broad range of topics in the areas of supply chain management and business analytics. The department faculty are recognized as supply chain and analytics thought leaders who are most connected to the region’s businesses.

Supply Chain Management (SCM) is the cornerstone of modern economies and includes all of the activities needed to get the right product to the right place in the right quantity at the right time. This requires effective procurement and sourcing, transportation and logistics, manufacturing and service delivery, inventory and warehousing, distribution, sales and customer service, as well as the associated information and financial management. SCM professionals are involved in every facet of an organization as they work to create a sustainable competitive advantage. Business Analytics includes a wide range of techniques, skills, statistical methods, and modeling to develop better understanding and new insights for data-driven decision making. Departmental programs cover descriptive, predictive and prescriptive analytics, including optimization and simulation, as well as effective communication of results from analytics projects. Graduates in Supply Chain & Analytics are in high demand in all types of service, manufacturing and government organizations.

Supply Chain & Analytics faculty and students are involved in a wide range of theoretical and applied research activities in collaboration with academic colleagues and industry partners, especially through the College's Center for Transportation Studies and the Center for Business and Industrial Studies. The department is supported by a very active and engaged departmental Advisory Board of leading companies and organizations in the St. Louis region.

Degrees

Business Administration BS, Supply Chain Management Emphasis (p. 349)

Business Administration MBA, Logistics and Supply Chain Management Emphasis (p. 364)

Business Administration MBA, Operations Management Emphasis (p. 354)

Business PhD, Logistics and Supply Chain Management Emphasis (p. 364)

Minors

Supply Chain Management Minor (p. 643)

Transportation Studies Minor (p. 648)

Certificates

Business Intelligence Graduate Certificate (p. 364)

Logistics and Supply Chain Management Graduate Certificate (p. 488)
Courses

**SCMA 3300 Business Analytics and Statistics: 3 semester hours**
Prerequisites: MATH 1105, INF SYS 1800 and a 2.0 campus GPA.
This course covers basic statistical analysis (descriptive and predictive analytics) for business management. Tools include matched sample tests, chi-square tests, rank sum tests, simple linear regression and correlation, multiple linear regression, and extrapolative techniques such as moving averages and exponential smoothing. Emphasis is placed on problem definition, construction of statistical models, analysis of data, and interpretation of results.

**SCMA 3301 Introduction to Supply Chain Management: 3 semester hours**
Prerequisites: A minimum campus GPA of 2.0. This course provides an understanding of fundamental concepts of supply chain management. All functional areas of supply chain management are explored in an integrated view of procurement, manufacturing and operations management, transportation and logistics, inventory and warehousing, demand planning, scheduling, network design, collaboration and performance measurement. Topics also cover supply chain financial metrics, strategy and change management for demand driven value networks.

**SCMA 3320 Advanced Supply Chain and Operations Management: 3 semester hours**
Prerequisites: SCMA 3301 or MATH 1320 and a 2.0 campus GPA. This course covers supply chain management with special focus on understanding manufacturing and service operations. Emphasis is on the application of quantitative methods to the solution of strategic, tactical and operational problems. Topics include demand planning, capacity, new product design and launch, process selection, facility layout, production planning, scheduling, inventory, process control, waiting lines, lean production, etc.

**SCMA 3321 Procurement: 3 semester hours**
Prerequisites: SCMA 3301 and a 2.0 campus GPA. This course covers procurement processes and supplier management, with emphasis on managing a supplier base for both products and services. Topics include the strategic role of procurement in supply chains, sourcing options, identification and evaluation of requirements, the role of product design, make-versus-buy decisions, and supplier selection and evaluation.

**SCMA 3345 Predictive Analytics and Data Mining: 3 semester hours**
Prerequisites: SCMA 3300 and a minimum campus GPA of 2.0. This course covers predictive analytics in business settings. Topics may include applications of multivariate analyses to problems in marketing, finance, transportation and logistics. The course covers use of decision trees, regression and logistic regression to explain phenomena and predict future outcomes. Students acquire experience in the use of modern tools for data mining.

**SCMA 3370 Introduction to Transportation: 3 semester hours**
Same as MKTG 3770. Prerequisites: A minimum campus GPA of 2.0. This course provides an overview of the transportation sector, including history, providers, users, government regulation, and the central role of transportation in supply chain management. The course covers the importance of domestic and global transportation, the operational aspects of the various transportation modes (rail, water, motor, air, and pipeline), the role of transportation intermediaries, the demand and supply of transportation, and the managerial aspects of transport in both the commercial and urban environment.

**SCMA 3371 Traffic and Transportation Management: 3 semester hours**
Same as MKTG 3771. Prerequisites: SCMA 3370 or MKTG 3770, and a minimum campus GPA of 2.0. This course focuses on transportation management as a function of a firm's logistics and supply chain strategy. The course covers the management of the various transportation modes (rail, motor, air, water, and pipeline), strategic use of transportation intermediaries such as 3PL’s, and linkages between transportation and warehousing. This course is designed to provide a basic understanding of the issues and work performed by transportation managers, including costing and pricing, transportation procurement, transportation technology, and cross border trade management.

**SCMA 3376 Transportation Security and Risk: 3 semester hours**
Same as MKTG 3776. Prerequisites: SCMA 3370 or MKTG 3770 and a minimum campus GPA of 2.0. This course emphasizes risk and security issues related to transportation systems and supply chains, including highway, aviation, pipeline, waterway, transit, and rail networks, as well as port facilities. This course also provides an overview of transportation safety issues including passenger and employee safety, and hazardous materials. It addresses transportation and supply chain risk management and continuity strategies to prepare for, and respond to, disruptions as from terrorism events or natural disasters.

**SCMA 3390 Internship in Supply Chain and Analytics: 1-3 semester hours**
Prerequisites: Minimum business GPA of 2.5, minimum campus GPA of 2.0, completed and/or currently enrolled in at least 6 credit hours of departmental electives, consent of supervising instructor, and consent of department chair. Students are employed in the field where they apply the knowledge and skills learned in the classroom. Professional development and obtaining specialized work experience are the primary goals. A departmental faculty member will monitor the student's program with the student providing a formal written report at the end of the project. Students cannot receive credit towards the emphasis for both SCMA 3390 and SCMA 4389. Repeatable for a maximum of 9 credit hours.

**SCMA 3398 Seminar in Supply Chain Management and Analytics: 1-3 semester hours**
Prerequisites: To be determined each time the course is offered and to include a minimum 2.0 campus GPA. This course is a selected special topic in the fields of supply chain management and analytics. May be repeated for credit with different topics.

**SCMA 3399 Independent Study in Supply Chain and Analytics: 1-3 semester hours**
Prerequisites: Minimum campus GPA of 2.0 and approval by the supervising professor and the department chair. Special individual study in supply chain and analytics under the supervision of a full-time faculty member of the department.

**SCMA 4322 Lean Production in Manufacturing and Service Operations: 3 semester hours**
Prerequisites: A minimum campus GPA of 2.0 or graduate standing; also SCMA 3320. Study of Lean Production philosophy and techniques in manufacturing and service operations. Topics include process analysis and continuous improvement techniques, quick set-ups, total productive maintenance, kanban scheduling, cellular production, team organization of workers, supplier relations, quality management, and the environmental aspects of production.
SCMA 4325 Environmental Sustainability in Business Operations: 3 semester hours
Same as BUS AD 4325. Prerequisites: SCMA 3301 or permission of instructor. This course studies the environmental impacts of business operations, and it focuses especially on the principles and methods of 'lean and green' operations, i.e., ways in which organizations can reduce their costs and increase profits, while reducing their environmental impacts. Specific topics include energy efficiency, resource reduction, waste reduction, design for the environment, externalities and internal pricing mechanisms, environmental technologies, life-cycle assessment, recycling, re-use, and re-manufacturing, as well as national and global environmental issues.

SCMA 4330 Business Logistics: 3 semester hours
Prerequisites: SCMA 3320 and a minimum campus GPA of 2.0. This course addresses the analysis of business logistics systems, their design, and operation in light of cost and service tradeoffs. Topics include performance measures and management, logistics and supply chain network design, facility location, transportation, vehicle routing, storage and handling, capacity planning, inventory management, customer service and the role of technology.

SCMA 4331 Applied Supply Chain Modeling: 3 semester hours
Prerequisites: SCMA 3320 and a 2.0 minimum campus GPA. This course introduces applied models and technology for supply chain management through hands-on experience using state-of-the-art software and tools for the design and operation of supply chains. The course covers the economic tradeoffs involved in such decisions, data requirements, operating parameters, application of software packages and performance management and analytics.

SCMA 4347 Introduction to Project Management: 3 semester hours
Prerequisites: SCMA 3301 and a minimum campus GPA of 2.0. This course introduces the concepts and practices of Project Management with a focus on supply chain and analytics related projects. It covers conventional aspects of project management, such as the project evaluation, planning, roles, responsibilities, scheduling, and tracking. In addition, this class introduces agile project management as applicable to projects where there is not the specificity of goals or solutions to be applicable to traditional project management.

SCMA 4350 Prescriptive Analytics and Optimization: 3 semester hours
Same as ACCTNG 4450. Prerequisites: MATH 1105 and a minimum campus GPA of 2.0. This course covers the construction and application of prescriptive analytical models for optimizing business decisions in a wide range of areas such as manufacturing, service, supply chains, logistics and finance. Topics include performance metrics, linear programming, integer programming, network optimization, simulation, and implementation using Excel.

SCMA 4381 Global Supply Chain Management: 3 semester hours
Same as INTL BUS 4381. Prerequisites: SCMA 3301 and a minimum campus GPA of 2.0. This course covers business logistics and supply chain strategies involving shipments across national boundaries. Topics may include the effects of international agreements and regional trading blocks on supply chain strategies, the design of global logistics networks, managerial processes and systems for international production and distribution, and risk management for international logistics.

SCMA 4389 Supply Chain Management Practicum: 3 semester hours
Prerequisites: SCMA 3320. This course engages students with local organizations to provide practical experience in critical thinking, analysis, and communication in a supply chain context. This allows students to integrate, synthesize, and apply supply chain management knowledge and skills in a real business/organization through projects jointly supervised by a faculty member and a supervisor from the organization. Students cannot receive credit towards the emphasis for both SCMA 3390 and SCMA 4389.

SCMA 4398 Advanced Topics in Supply Chain and Analytics: 1-3 semester hours
Prerequisites: SCMA 3301 or permission of the instructor and a minimum 2.0 campus GPA. An intensive study of a specific aspect, problem or technique in the areas of supply chain management, analytics, logistics, or operations management. Different topics may be offered under this course number, so the course (with different topics) can be repeated for credit.

SCMA 5300 Statistical Analysis for Management Decisions: 3 semester hours
Prerequisites: MATH 1030 and spreadsheet modeling or equivalent competency. Probability and probability distributions are studied as a basis of statistical inference. An introduction to multivariate analysis is provided, which includes analysis of variance and regression methods.

SCMA 5310 Supply Chain Strategies: 3 semester hours
Prerequisites: Graduate standing. This course addresses supply chain management and its implications, with a focus on what firms can do to maintain competitiveness in the quickly changing business landscape. Topics may include fundamentals of supply chain management, value chain analyses, supply chain analytics, procurement, production, logistics, inventory management, and marketing business-to-business.

SCMA 5320 Production and Operations Management: 3 semester hours
Prerequisites: SCMA 5300. This course discusses issues related to the creation and delivery of goods and services. Topics include the design of production processes, the layout and location of facilities, forecasting, scheduling, inventory control, queuing, materials planning, and quality control. Analytical techniques such as linear programming are used in studying these problems.

SCMA 5322 Lean Production: 3 semester hours
Prerequisites: SCMA 5310. This course covers the study of Lean Production philosophy and techniques in manufacturing and service operations. Topics include process analysis and continuous improvement, set-up reduction, total productive maintenance, kanban scheduling, cellular production, work teams, supplier relations, quality management, and the environmental aspects of production. Cases and a course project will be used to integrate and apply the course material.

SCMA 5325 Environmental Analysis and Sustainability in Business Operations: 3 semester hours
Same as BUS AD 5325. Prerequisites: SCMA 5310 or consent of instructor. This course analyzes the environmental impacts of business operations, and it focuses especially on the principles and methods of 'lean and green' operations, i.e., ways in which organizations can reduce their costs and increase profit, while reducing their environmental impacts. Specific topics include energy efficiency, resource reduction, waste reduction, design for the environment, externalities and internal pricing mechanisms, environmental technologies, life-cycle assessment, recycling, re-use, and re-manufacturing, as well as national and global environmental issues.
SCMA 5334 Internship in Logistics and Supply Chain Management: 1 semester hour
Prerequisite: Consent of instructor. Students receive practical experience in the area of logistics or supply chain management. The internship is supervised by a professional in the host organization in consultation with a faculty member.

SCMA 5354 Simulation for Managerial Decision Making: 3 semester hours
Prerequisites: SCMA 5300. This course is an introduction to simulation as a managerial decision-making aid. The applications of simulations to a number of management science-oriented problems are covered using a simulation language.

SCMA 5381 Global Supply Chain Management: 3 semester hours
Same as INTL BUS 5381. Prerequisites: SCMA 5310 (may be taken concurrently). This course covers global supply chain management strategy, planning and operations. Topics include issues in global trade, global network design and facility location strategies, international logistics, import-export operations, and global supply chain risk management.

SCMA 5389 Supply Chain Management Practicum: 3 semester hours
Prerequisites: SCMA 5300 or equivalent; SCMA 5310 or equivalent (may be taken concurrently). This course engages students with local organizations to provide practical experience in critical thinking, analysis, and communication in a supply chain context. This allows students to integrate, synthesize and apply supply chain management knowledge and skills in a real business/organization through projects jointly supervised by a faculty member and a supervisor from the organization. Students may not count both SCMA 5389 and an internship toward the SCMA emphasis.

SCMA 5399 Individual Research in Logistics and Operations Management: 1-3 semester hours
Prerequisites: Consent of instructor and graduate director. Special individual research topics in Logistics and Operations Management under the guidance of a specific professor.

SCMA 6321 Strategic Sourcing: 3 semester hours
Prerequisites: SCMA 5310 (may be taken concurrently). This course provides a strategic focus on the acquisition of goods and services and management of suppliers in business-to-business transactions. The course covers the strategic sourcing process, including categorizing the buy, conducting a market analysis, developing a supply strategy, analyzing prices and cost, developing bids, selecting suppliers, negotiating, and managing the supply base.

SCMA 6330 Business Logistics Systems: 3 semester hours
Prerequisites: SCMA 5310 (may be taken concurrently). This course focuses on analysis of business logistics systems and their role in supply chain management. It covers design and operation of logistics systems and their components. Topics include network design, facility location, transportation, vehicle routing, inventory management, customer service, sustainability, and reverse logistics.

SCMA 6331 Supply Chain Modeling: 3 semester hours
Prerequisites: SCMA 5310 (may be taken concurrently). This course introduces model-building techniques for data-driven decision-making in supply chains. It covers math programming (linear and integer programming), network optimization, and constraint programming, with their applications in production planning, MRP, transportation, network design and configuration. It provides hands-on experience by using state-of-the-art optimization tools and commercial software.

SCMA 6338 Business Processes: Design, Management and Integration: 3 semester hours
Prerequisites: SCMA 5310. This course presents the concepts and state of the art, and state of the practice of business process design and business process management. Issues related to characteristics, goals, benefits and costs of enterprise-wide design and to the role of information technology during the design process are discussed. Topics include the history and development of process focused businesses and the impacts on processes caused by just-in-time and total quality management philosophies, organizational learning, strategy mapping, the exploitation of core competencies, and changing business scenarios such as globalization and electronic-commerce.

SCMA 6345 Business Analytics and Data Mining: 3 semester hours
Same as ACCTNG 5444. Prerequisites: SCMA 5300 and INFSYS 5800. This course concentrates on methods for converting data into business intelligence. It provides knowledge of the principles and techniques for business analytics and data mining. Topics include clustering, pattern recognition, visualization of relationships, predictive modeling, optimization techniques and simulation.

SCMA 6347 LOM Project Management: 3 semester hours
Prerequisites: SCMA 5320. This course addresses the concepts and processes of project management as applicable to Logistics and Operations Management. Students study organizational design, project specification, integrated project planning, risk management and project control; students will come to understand how globalization, environmental and sustainability issues, quality control (including industry standard initiatives such as the Continuing Integration Improvement Model and the International Standards Organization model), and cultural factors drive project management. NOTE: Credit may not be earned for both SCMA 6347 and INFSYS 6847.

SCMA 6350 Management Science Methods: 3 semester hours
Prerequisites: SCMA 5310. This course provides comprehensive coverage of management science and operations research methodologies. It introduces data-driven optimization approaches to solving business problems, construction of mathematical models, and sensitivity analysis for managerial decision-making. Topics include linear programming, integer programming, network optimization, and simulation.

SCMA 6360 Supply Chain Integration: 3 semester hours
Prerequisites: SCMA 5310 (may be taken concurrently). The course covers the connections between supply chain capabilities and corporate competitiveness, the management of business relationships with customers and suppliers, collaboration and coordination approaches, the role of technology, and the link between supply chain performance and overall financial measures. Students will learn how to leverage the competitiveness of a firm by integrating and coordinating strategies, business relationships and key supply chain processes across the network of suppliers and customers in the supply chain and among the various departments within a firm.

SCMA 6395 Seminar in Logistics and Operations Management: 3 semester hours
Prerequisites: SCMA 5310. This course covers topics of current interest in logistics and operations management. Topics may include just-in-time and lean production, quality management, manufacturing and service systems, transportation and logistics, quantitative management tools, etc.
**SCMA 7381 International Supply Chain Management: 3 semester hours**
Prerequisites: SCMA 5320. Admission into the Ph.D. Program. A comprehensive examination of international logistics and supply chain management strategies, planning and operations from the firm's perspective. Topics may include multinational logistics and supply chain issues and management strategies, multinational sourcing and network design, transportation issues in international supply chains, multinational distribution and operations, legal and financial issues in import and export, risk identification and management in international supply chains, and the relationship of supply chain management to other activities of international firms.

**SCMA 7390 Research Seminar in LSCM: 3 semester hours**
Prerequisites: SCMA 6330. Admission into the Ph.D. Program. Analysis of research approaches, and findings in Logistics and Supply Chain Management. May be repeated for credit when the subject matter is different.

**SCMA 7393 Special Topics in LSCM: 3 semester hours**
Prerequisites: Consent of instructor. Admission into the Ph.D. Program. In-depth analysis of special topics in Logistics and Supply Chain Management research. May be repeated for credit when the subject matter is different.
College of Education

College of Education Home Page

About the College

The College of Education offers a variety of programs at all levels that lead to exciting and rewarding career opportunities. It takes many types of education professionals to prepare our children, youth and adults for an ever-changing world. The College’s faculty, staff, and community partners are committed to providing experiences to build the knowledge and skills needed for individuals to be successful in multiple educational settings and occupations. These careers include teachers, principals, and superintendents for K-12 districts, schools, and classrooms; teachers and administrators for informal education organizations like museums, zoos, and nature centers; counselors and mental health professionals for schools, hospitals, corporate employee assistance programs, clinics and private settings; and postsecondary leaders and instructors for community colleges, career technical schools, and four-year colleges and universities.

The College has 50 full-time faculty, of which 10 are endowed professors, as well as a UM System Curator's Distinguished Research Professor and a Curator's Distinguished Teaching Professor. Additionally, the College has more than 200 part-time clinical faculty who have years of direct classroom experience. The College offers six undergraduate degrees, 32 undergraduate and post-baccalaureate teaching certificates, seven Master's degrees, many graduate certificate programs, two Educational Specialist degrees, and two Doctoral degrees. By reaching out and partnering with a vast array of educational, business and community resources, our College can provide opportunities for faculty and students to develop professional connections which will improve their careers as well as their communities.

Support Services

Student support is provided through the Office of Advising and Student Services (OASIS), 116 South Campus Classroom Building. This office contains a staff of professional undergraduate and graduate academic advisors who provide both undergraduate and M.Ed. students with the academic support they need to satisfy the requirements for state teacher certification as well as undergraduate and M.Ed. degree program requirements.

The Office of Clinical Experiences and School Partnerships, 203 South Computer Building, houses professional staff who coordinate teacher education clinical experiences.

Accreditation

The College of Education is fully accredited by the Council for the Accreditation of Educator Preparation, and the Department of Elementary and Secondary Education for the preparation of early childhood, elementary, middle, secondary, physical, and special educators and the preparation of administrators, counselors, and school psychologists. Additionally, the Council for Accreditation of Counseling and Related Educational Programs accredits our Counseling programs and the National Association for School Psychology accredits our School Psychology program.

Centers and Initiatives

The College hosts many centers and initiatives that enhance the experience of students in our programs. Among these are: the Center for Character and Citizenship; The Center for the Research and Study of Disability, Education, and Culture; the E. Desmond Lee Technology and Learning Center; the Gateway Writing Project; the Richard Burnett Literacy Clinic; the Counseling and Social Advocacy Center; and the University Child Development Center. We also sponsor eight charter schools.

Course Designations in the College of Education

The following abbreviations are used to indicate instructional areas in the course listings and descriptions in the College of Education.

Adult Education (ADULT ED)
Counselor Education Courses (CNS ED)
Early Childhood Education Courses (ECH ED)
Educational Administration Courses (ED ADM)
Educational Foundations Courses (ED FND)
Educational Psychology Courses (ED PSY)
Educational Research and Evaluation Methods Courses (ED REM)
Educational Technology Courses (ED TECH)
Elementary Education Courses (ELE ED)
Middle Education Courses (MID ED)
Higher Education Courses (HIGHERED)
Health and Physical Education Courses (HLTH PE)
Physical Education (PHY ED)
College#Wide Education Courses (EDUC)
Secondary Education Courses (SEC ED)
Special Education Courses (SPEC ED)
Sports Management (SPTMGMT)
Teacher Education Courses (TCH ED)

Teacher Education

Degrees and Areas of Concentration

Students may earn teacher certification in the fields of elementary education/special education, elementary education/TESOL endorsement, elementary education/special education/TESOL endorsement, early childhood education/early childhood special education, middle school, music education, physical education, art education, as well as the secondary education areas of biology, chemistry, English, foreign languages (French, Spanish), mathematics, physics, and social studies. Students with a Bachelor's degree can combine educator preparation and Master’s-level work in selected areas. Graduate programs leading to certification are also offered in counseling, reading, school administration (elementary and secondary principal, school superintendent), and special education.

The following certification programs are designed to provide the following learning outcomes. Upon successful completion of the programs, education candidates will:

• Understand the central concepts, tools of inquiry and structures of the discipline(s) within the context of a global society and create learning experiences that make these aspects of subject matter meaningful for students.
• Understand how students learn and develop, and provide learning opportunities that support the intellectual, social, and personal development of all students.
• Understand how students differ in their approaches to learning and create instructional opportunities that are adapted to diverse learners.
• Recognize the importance of long-range planning curriculum development and develop, implement and evaluate curriculum based upon student, district, and state performance standards.
• Use a variety of instructional strategies to encourage students’ development of critical thinking, problem solving, and performance skills.
• Use an understanding of individual and group motivation and behavior to create a learning environment that encourages positive social interaction, active engagement in learning, and self-motivation.
• Model effective verbal, nonverbal, and media communication techniques to foster active inquiry, collaboration, and supportive interaction in the classroom.
• Understand and use formal and informal assessment strategies to evaluate and ensure the continuous intellectual, social, and physical development of the learner.
• Develop skills to become a reflective practitioner who continually assesses the effects of choices and actions on others. This reflective practitioner actively seeks out opportunities to grow professionally and utilizes the assessment and professional growth to generate more learning for more students.
• Foster relationships with school colleagues, parents, and educational partners in the larger community to support student learning and well-being.
• Understand theories and applications of technology in educational settings and have adequate technological skills to create meaningful learning opportunities for all students.
• Also, education candidates upon successful completion of their program, master DESE professional standards.

General Education Requirements
Students in the College of Education must meet university and departmental general education requirements (p. 51) specified for their degree programs.

Academic Residence
Students must be in residence for 30 of the last 30 semester hours of credit. Courses graded on a satisfactory/unsatisfactory basis are not accepted within these last 30 semester credit hours. This residency requirement applies to students seeking a degree or teacher certification.

Education Majors
Professional education courses must be completed with a grade point average of 2.5 and no grade lower than a C (2.0).

The Cumulative, Content Area, and Professional Education grade point averages required for admission to the Teacher Education Program at UMSL are subject to changes in grade point average requirements promulgated by the Department of Elementary and Secondary Education.

Admission to the College of Education
Any students who desire an education degree programs as their intended degree paths will have Education as their assigned academic unit. Students admitted to the College of Education and seeking teacher certification must also be admitted to the Teacher Education Program.

Application and Admission to the Teacher Education Program
The application can be found at http://coe.umsl.edu/portal

All students seeking teacher certification must be admitted to the Teacher Education Program. Applications to the Teacher Education Program are processed through the Office of Advising and Student Services (OASIS). Eligibility is based upon fulfillment of the following requirements:
• Submission of qualifying scores on a qualifying exam approved by the Missouri Department of Elementary and Secondary Education in areas of English, writing, mathematics, science and social studies. Students should consult OASIS for test descriptions, cost, required scores, dates of administration, retest policies, etc. (Students who have an earned bachelor’s degree are not required to pass the qualifying exam).
• Completion of 60 hours of college or university courses (at UMSL or another accredited school).
• A grade point average of 2.75 or higher.
• Approved results of the Family Care Safety Registry.
• A clear TB test or chest x-ray, if appropriate.

General Information
It is important that students meet with an academic advisor in the Office of Advising and Student Services once each semester. Students should contact the office at 314-516-5937 to schedule an advising appointment.

Application to Practica
The application can be found at http://coe.umsl.edu/portal. Deadlines for the Formal Application are May 31 for January Practicum I candidates, December 31 for August Practicum I candidates and August 1 for Teach in 12 certification candidates who are approved to enroll in classes in August.

Upon receipt, formal applications for both pre- and post-degree (Teach in 12) students are checked to ensure they have met the following requirements:
• Admission to the teacher education program for both pre- and post degree (Teach in 12) students.
• A cumulative grade point average of at least 2.75 or above by the semester prior to the semester in which students plan to student teach. A 2.75 grade point average must be attained in order to graduate with a B.S. in education degree and/or be certified to teach in the state of Missouri. A 3.0 grade point average must be attained in professional education courses.
• Grade point average of 3.0 in the teaching field (secondary education students only).
• A grade of C or higher in all professional education courses. Lists of these courses are available in the OASIS office and from advisors.
• Completion of TB screening, Missouri Family Care Safety Registry check, FBI check and Missouri substitute certificate.
• Undergraduate students are required to have passed all sections of the qualifying exam designated by the Missouri Department of Elementary and Secondary Education.

The Practicum II experience in art, music, and physical education provides opportunities in a variety of settings. Students will be expected to student teach on a full-day basis for 15 weeks during an entire semester. Practicum II must be completed in residence.

For further information regarding requirements and certification, contact the Office of Advising and Student Services, 314-516-5937, 116 SCCB or consult the College of Education Advising Home Page.
Application for Degree and/or Certificate
Bachelor of Science in Education (B.S. Ed.)
Candidates for the B.S.Ed. degree must complete the graduation application; and undergraduate music and art students, as well as candidates interested in master's-level teacher certification must complete a certification application form in the Office of Advising and Student Services when they apply for admission to Practicum or during the semester before the one in which they expect to complete degree requirements. See information below on the state-required exit examination.

Bachelor of Educational Studies (B.E.S.)
Candidates should consult with the Office of Advising and Student Services or call (314) 516-5397 for more information. This degree offers four areas of study. It does not qualify students for Missouri Teacher Certification. Visit the Education Sciences and Professional Programs Department home page for more information.

Certification
In cooperation with the Missouri State Department of Elementary and Secondary Education (DESE), the College of Education is responsible for recommending all qualified students for state teacher certification. The curriculum usually meets all requirements for the Missouri Department of Elementary and Secondary Education (DESE) Teacher Certification. DESE requirements, however, are subject to change and additional courses beyond degree requirements may be needed to obtain certification.

All teacher education candidates must pass the appropriate Missouri Content Assessment(s) in order to satisfy the degree requirements to earn the Bachelor of Science in Education degree. This exam must be taken during Practicum I.

Latin Honors Requirements
In accordance with the University’s Latin Honors policy (p. 26), candidates graduating from the College of Education in the 2020-2021 Academic Year must meet the following GPA qualifications:

<table>
<thead>
<tr>
<th>Grade</th>
<th>GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Summa Cum Laude</td>
<td>4.00</td>
</tr>
<tr>
<td>Magna Cum Laude</td>
<td>3.980</td>
</tr>
<tr>
<td>Cum Laude</td>
<td>3.911</td>
</tr>
</tbody>
</table>

Degrees and Areas of Emphasis
The College of Education offers Master of Education (M.Ed.), Educational Specialist (Ed.S.), and doctoral degrees at the graduate level. The M.Ed. degrees and the emphasis areas are:

Adult and Higher Education
- Adult Education (p. 313) (The College of Education is no longer accepting applications for this emphasis area)
- Higher Education (p. 314)

Counseling
- Clinical and Mental Health Counseling (p. 394)
- Elementary School Counseling (p. 395)
- Secondary School Counseling (p. 397)

Educational Administration
- Community Education (p. 429) (The College of Education is not accepting applications for this emphasis area)
- School Administration (p. 430)

Elementary Education
- General (p. 446)
- Reading (p. 454)

Secondary Education
- Curriculum and Instruction (p. 621)
- General (p. 617)
- Reading (p. 621)
- Teaching English to Speakers of Other Languages (p. 622)

Special Education
- Autism and Development Disabilities (p. 634)
- Cross Categorical Disabilities (p. 635)
- Early Childhood/Special Education (p. 451)

Ed.S. Programs
Ed.S. degree programs are available in school psychology (p. 604) and educational administration (p. 423).

Doctoral Programs
Programs leading to the Ph.D. degree are offered in the areas of Counseling (p. 425), Educational Psychology (p. 427), Teaching-Learning Processes (p. 428), and Educational Leadership and Policy Studies (p. 426). The Ed.D in Educational Practice admits students to the thematic learning communities announced in December for study commencing the following fall.

Master of Education Degree
The Master of Education Degree programs are designed for graduates to attain the following learning outcomes:

- Understand the major theories in the discipline of study.
- Attain a solid foundation in the overall field of education in general, including areas of social justice, educational leadership and advocacy, educational psychology and research.
- Attain a depth of knowledge in the primary discipline.
- Think critically.
- Develop skills as a reflective practitioner to be able to create and sustain change.
- Conduct teacher research.

Admission and General Requirements
The College of Education follows Graduate School policies relating to admissions, academic standards, residency, transfer credit, time limitations, and thesis options (see Graduate Study in this Bulletin). In addition to meeting the general requirements of the Graduate School, applicants for counseling and educational administration must complete a separate application (see graduate studies in the Counseling Department and the Educational Leadership and Policy Studies Department pages in this Bulletin). The minimum number of hours required for the M.Ed. degree is 33 except that the elementary and secondary counseling emphases require 48 hours and the mental health emphasis requires 60 hours.
The school has adopted a flexible policy on exit requirements, which are determined departmentally.

Advisement and Program Planning

Upon acceptance, each student is assigned a faculty advisor but should make an advising appointment for their first semester only with an OASIS advisor. A faculty advisor counsels the student in registration and program planning thereafter. A program plan for the master's degree must be completed during the first semester that the student's academic program commences. This form includes all coursework required for the academic program and the exit requirement.

Students working toward teacher certification as graduate students should complete state certification forms in the OASIS one year before those requirements will be completed.

Faculty Advisor Assignment Information

All M.Ed. students will be assigned an advisor by OASIS, the advising office for the College of Education, located in 116 SCCB.

Both Ph.D. and Ed.D. students will be assigned an advisor by the Doctoral Program Director, located in 201 EAB.

If any student determines that an advisor assignment has not been documented in MyView, please contact OASIS at 516-5937 or the Doctoral Program Director at 516-5107.

If a student would like to change their faculty advisor assignment for any master's degree program, please contact OASIS to complete an Advisor Assignment Form. The faculty advisor information will subsequently be updated in MyView.

Doctoral students should contact the Doctoral Program Director to discuss the possibility of changing their doctoral advisor or dissertation chair.

Educational Specialist Degree

The Ed.S. degree is intended for school personnel preparing for a specific role, either that of a school psychologist or that of a school building or district administrator. The programs require 60 hours of postbaccalaureate course work designed to meet the respective Missouri certification requirements. The Ed.S. in School Psychology degree program requires three years of intensive, full-time training but students may be able to complete up to half of the curriculum as a part-time student. The Ed.S. in Educational Administration can be pursued on a part-time or a full-time basis and can include credits taken in an M.Ed. in Educational Administration program.

The Educational Specialist Degree program is designed for graduates to attain the following learning outcomes:

- Expand their knowledge of the major theories in their area of specialty.
- Attain a solid foundation in the field of education in general and a depth of knowledge in the specialty.
- Think critically.
- Develop skills to become a reflective practitioner.
- Mentor teachers and other practitioners as a specialist in a specific area.
- Understand research methods in education.
- Conduct research.
- Demonstrate leadership skills and attributes.

Admission and General Requirements

The College of Education follows Graduate School policies (p. 38) relating to admissions, academic standards, residency, transfer credit, time limitations, and exit requirements. Specific materials required for application vary by program, but generally applicants should submit an application to The Graduate School, transcripts of previous college work, and letters of recommendation.

Advisement and Program Planning

For advising and program planning, school psychology students should contact the Department of Education Sciences and Professional Programs, 469 Marillac Hall, 314-516-5944. Educational administration students should contact the Office of Advising & Student Services (OASIS), 116 South Campus Classroom Building, at 314-516-5937.

Doctor of Philosophy Degree

The Ph.D. degree in Education is designed for educators who desire directed research experiences promoting scholarly inquiry in education. Four emphases are available:

- Teaching-learning processes
- Educational leadership and policy studies
- Educational psychology
- Counseling

The Ph.D. program is designed for graduates to attain the following learning outcomes:

- Understand the major theories in their primary and secondary disciplines;
- Attain a breadth of knowledge in education in general and a depth of knowledge in the primary discipline;
- Think critically;
- Locate literature in the primary and secondary disciplines;
- Understand research methods in education;
- Conduct research; and
- Demonstrate leadership skills and attributes

Courses

**EDUC 2002 Social Entrepreneurship: 3 semester hours**

This course examines the mindsets, skills, and approaches that social entrepreneurs use to solve problems in society. Students explore the role of social entrepreneurs with an emphasis on how social entrepreneurs create change in people's lives and their impact on local to global scales. Students identify sustainable models for social innovation and formulate social entrepreneurship action plans. Previous experience as a social entrepreneur or the desire to become a social entrepreneur in the future is not required.

**EDUC 2204 Special Topics in Education: 1-3 semester hours**

Prerequisite: Completion of 75 hours and consent of instructor. Examination of a special area or topic within the field of education. Topics to be considered will be announced prior to registration and may vary. For elective credit only. This course may be repeated for different topics. Not to exceed a total of six hours credit.
EDUC 2222 Interpretation: Connecting Audiences and Meaning: 3 semester hours
Interpretation is a process for forming intellectual and emotional connections between the interests of an audience and the inherent meanings within a resource. This class covers interpretive methods for development and delivery of thematic, non-formal, presentations to various audiences. The class also introduces informal exhibit design, customer service and social media as they relate to interpretation.

EDUC 2297 Independent Study: 1-3 semester hours
Prerequisite: Completion of 75 hours and consent of instructor.
Independent study through readings, research, reports and conferences designed to provide depth in areas of study previously introduced in education courses. For elective credit only. May be repeated. Not to exceed a total of three hours credit.

EDUC 3170 Grant Proposal Writing for Educators: 3 semester hours
Prerequisites: ENGL 1100 or equivalent and junior standing. An introduction to grant proposal writing for educators and other professionals in community agencies, cultural institutions, and childcare centers. Students will practice writing the customary parts of a grant proposal as they learn essential concepts in fundraising, nonprofit management, and social entrepreneurship. Writing assignments include cover letters, problem statements, organizational profiles, project descriptions, budget narratives, and evaluation plans. Collaboration and peer review are required. Emphasis is on clarity, conciseness, format, style, tone, persuasiveness, and evidence basis.

EDUC 4000 International Education Field Experience: 2-4 semester hours
Prerequisites: ED PSY 2212, consent of instructor, minimum GPA of 2.5, current and clear background check, and current and clear TB screening. This field experience will be supervised by university faculty. Students will travel to a country to explore the culture and educational system. Prior to the field experience students will receive training that includes familiarization with the culture and educational system of the host country. Students will complete approximately 50 hours per credit hour in travel and cultural exploration as well as designed educational experiences. Course may not be repeated for more than 6 credit hours. This course will satisfy the cultural diversity requirement if the country is appropriate.

EDUC 4989 Internship I: 3 semester hours
Prerequisites: Junior standing, admission to the Bachelor of Educational Studies program, or consent of instructor. Supervised field experience in educational settings to prepare for planning, research, evaluation, and other professional activities in the student's emphasis area of concentration that will be carried out in EDUC 4990 and EDUC 4991.

EDUC 4990 Internship II: 6 semester hours
Prerequisites: B- or better in EDUC 4989, senior standing, or consent of instructor. Supervised field experience in an approved setting.

EDUC 4991 Internship III: 6 semester hours
Prerequisites: B- or better in EDUC 4990 (may be taken concurrently) or consent of instructor. Supervised field experience in an approved setting.

EDUC 5006 Graduate Workshop: 1-10 semester hours
Prerequisite: Consent of instructor.

EDUC 5612 Intrapreneurial Leadership: 3 semester hours
Prerequisite: Graduate standing. This course helps graduate students bring people and resources together to create value within existing organizations. Intrapreneurial leadership focuses on identifying and leveraging opportunities to enhance organizational responsiveness, growth, and vitality.

EDUC 5616 Accelerate Intrapreneurial Experience: 3 semester hours
Prerequisites: Graduate standing. This course equips graduate students to apply theories of leadership, entrepreneurship, innovation, and systems thinking within real-world organizational or business contexts. Students propose and implement a new program, product, or service model that builds organizational capacity and financial sustainability.

EDUC 6142 The History and Practice of Community Education: 3 semester hours
Prerequisites: Graduate standing. Students will explore the history of community-based education initiatives cultivating the insights, capacities and skill sets required to lead educational innovation, use information, media and technology effectively, strengthen cultural literacies, and engage in leadership and community development.

EDUC 6308 Graduate Institute: 1-10 semester hours
Prerequisite: Consent of instructor.

EDUC 6404 Seminar: 1-10 semester hours
Seminar on an educational topic or special issue not normally included in the regular curriculum.

EDUC 6408 Graduate Seminar: 1-10 semester hours
Prerequisites: Consent of instructor. Intensive study of selected issues in education.

EDUC 6442 Leadership in Community Education: 3 semester hours
Prerequisites: Graduate standing. Students will explore the leadership skills and capacities required for effective community-development efforts, including social innovation and entrepreneurship, adaptive management, cultural competence, and how to work with community collaborators to plan and implement inclusive projects.

EDUC 6491 Staff Development and Professional Growth: 1-10 semester hours
Designed in conjunction with an individual school district or educational agency and related to problems of education confronting that specific district or agency.

EDUC 6998 Thesis Research: 1-10 semester hours
Prerequisite: Consent of instructor.

EDUC 7050 The Research Process I: Framing Research Questions in Education Research: 3 semester hours
Prerequisites: Admission to the EdD or PhD in Education. This course is an overview of the essential elements of writing a research proposal including, identifying a problem statement and conceptualizing critical research questions. The course emphasizes exploring the research literature, framing research questions, and justifying them based on the literature.

EDUC 7200 English Academic Support: 1-3 semester hours
This course addresses the language needs of international doctoral students as they perform scholarly analysis and write at the doctoral level. The course contributes to the development of skills necessary for the successful completion of the dissertation. This course may be repeated for a maximum of 27 credit hours.

EDUC 7205 Action Research for Educational Practitioners: 1 semester hour
Prerequisites: Admission to an Ed.D cohort or consent of instructor. Study of small-scale simulations that introduce students to the fundamentals of framing relevant questions, working in community, writing field notes, interviewing, technologies to support and help analyze data, and storytelling. Particular attention will be given to representing perspectives of various stakeholders including students, parents, administrators, and colleagues.
EDUC 7210 Survey Design for Educational Practitioners: 1 semester hour
Prerequisites: Admission to an Ed.D. cohort or consent of instructor. Application of relevant theories, research, and pedagogical practices in designing surveys for educational settings. Focus on instrument development and design, forming questions and scales, and sampling methods as well as analysis of results and presentation for various target audiences in educational organizations and settings.

EDUC 7215 Data Analysis for Educational Practitioners: 3 semester hours
Prerequisites: Admission to an EdD cohort or consent of instructor. This course provides an overview of the quantitative skills needed for research including using software for statistical data analysis. The course facilitates an understanding and application of statistical techniques used for survey research.

EDUC 7220 Designing Research for Educational Practitioners: 1 semester hour
Prerequisites: Admission to an Ed.D. cohort or consent of instructor. Guided workshop, applying the principles of research design, to design a study of the research issues selected by the learning community. Course covers how to develop research questions, choose among quantitative and qualitative methods, and consider the best, ethical practices.

EDUC 7225 Ethnography for Educational Practitioners: 1 semester hour
Prerequisites: Admission to an Ed.D. cohort or consent of instructor. The study of ethnography as a methodology to engage in field research and provide the conceptual, theoretical, and empirical knowledge base for action research.

EDUC 7230 Interviewing for Educational Practitioners: 1 semester hour
Prerequisites: Admission to an Ed.D. cohort or consent of instructor. Provides opportunities for developing skills in interviewing individuals and groups to identify, describe, assess and compare educational programs, practices and policies. Emphasis on interviewing experts in the field and research participants in educational research field studies.

EDUC 7255 Inquiry Seminar for Educational Practitioners: 1 semester hour
Prerequisites: Admission to an Ed.D. cohort or consent of instructor. Seminar on a specified approach to inquiry in order to obtain or analyze information of interest to scholar-practitioners leading educational programs through continuous improvement cycles.

EDUC 7305 Representing Data for Educational Practitioners: 1 semester hour
Prerequisites: Admission to an Ed.D. learning community or permission of instructor. Methods for presenting and displaying various types of data to a range of target audiences. Means of ensuring accurate representation and the advantages and disadvantages of various methods are reviewed. Displays include tables, graphs, and charts. Current software programs to aid representation are reviewed.

EDUC 7310 Integrating Technology in Learning for Educational: 1 semester hour
Prerequisites: Admission to an Ed.D. cohort or consent of instructor. Appropriate technology tools for carrying out individual or group research and assessment projects will be identified and integrated. The appropriate tools will be learned and applied to present, analyze and complete projects.

EDUC 7315 Project Management for Educational Practitioners: 1 semester hour
Prerequisites: Admission to the Ed.D. program or consent of instructor. Tools for and approaches to managing complex projects in educational organizations, including establishing goals, subdivision of work, formation of work groups, planning and scheduling, establishing and tracking time lines, deployment of resources to complete a project, and addressing constraints. Use of current software for charting and reporting projects.

EDUC 7320 Financial and Budgeting Skills for Educational Practitioners: 1 semester hour
Prerequisites: Admission to an Ed.D. cohort or consent of instructor. Examines budgeting and finance systems of educational institutions, both from the perspective of theory, research and policy development, and from the perspective of actual budgeting and practice. There will also be an emphasis on the impact of federal and state policy regarding the finance of educational institutions, as well as the processes by which budgets are developed and resources allocated.

EDUC 7325 Grant Writing for Educational Practitioners: 1 semester hour
Prerequisites: Admission to an Ed.D. cohort or consent of instructor. Provides hands-on help for current and would-be grant writers. Examines search tools to locate likely request for proposals, explores text and sub-text issues, develops a timeline for grant development and submission, provides practice on how a peer review system works, considers issues related to revision and follows the real processes engaged in by successful grant recipients.

EDUC 7330 Human Relations Skills for Educational Practitioners: 1 semester hour
Prerequisites: Admission to Ed.D. program or consent of instructor. Exposure for educational practitioners in a variety of leadership roles to basic human relations skills, effective interventions which can be made with the individual worker, and assessment skills to enable the leader to determine if referral to a mental health professional is warranted. Effective ways of confronting employees because of impaired job performance, giving performance evaluations, providing career development and planning information, identifying work transitions in their employees, and identifying stress and stressors in the work environment, along with identifying substance abusing workers and deciding what to do about them.

EDUC 7415 Topics in Education: 3 semester hours
Prerequisites: Admission to the doctoral program. Intensive study of a topic in education.

EDUC 7450 Directed Readings in the Education Research Literature: 1-6 semester hours
Prerequisites: Doctoral standing. Independent study of the education research literature in an area defined in consultation with an advisor.

EDUC 7455 Doctoral Research Tools: 1-6 semester hours
Prerequisites: ED REM 6710. A structured individual or small group instructional or supervised investigative experience in and with a specific research skill and/or procedure that will be needed in the production of a doctoral dissertation. This course may not substitute for any existing graduate courses that cover the same research tool skills.

EDUC 7600 Learning Community of Practice I: 1-6 semester hours
Prerequisites: Admission to an EdD cohort. This course requires students in the Ed.D. learning communities to apply the scholarship of teaching and learning through asset mapping, inquiry formation, and selected readings. Students develop professional connections, explore their interests and beliefs, and reflect on a problem of practice.
EDUC 7605 Scholarship of Teaching and Learning in Educational Practice: 2 semester hours
Prerequisites: Admission to an Ed.D. cohort. Exploration of learning through practice and reflection within a community of scholars committed to situated best practice in education.

EDUC 7610 Learning Community of Practice II: 1-6 semester hours
Prerequisites: EDUC 7600. This course requires students to identify and examine research problems by developing skills of inquiry, integrating prior knowledge, and evaluating extant research.

EDUC 7615 Evaluation of Educational Programs: 2 semester hours
Prerequisites: Admission to an Ed.D. cohort. Assessment of programs for continuous improvement cycles within educational settings.

EDUC 7620 Learning Community of Practice III: 1-6 semester hours
Prerequisites: EDUC 7610. This course assists students in the selection and definition of a problem of practice addressed through research by the learning community members. This includes building relationships within and outside the learning community and designing structure to support inquiry into a problem of practice.

EDUC 7625 Building Socially Just and Ethical Educational Communities: 3 semester hours
Prerequisites: Admission to the EdD program. This course examines the role of culture, analyzes social justice components, and considers ethical and legal issues for learning communities.

EDUC 7640 Learning Community of Practice V: 1-6 semester hours
Prerequisites: EDUC 7630. This course requires students to prepare a dissertation proposal. This involves selection of research tools, establishment of study procedures at research sites, and adherence to high ethical standards for conducting research.

EDUC 7642 Sociocultural Perspectives in Education: 3 semester hours
Prerequisite: Doctoral standing and consent of instructor. Investigation of sociocultural theory with a focus on educational applications. Topics include the social formation of mind, language as cultural tool, methodological issues in social science research, and dialogic inquiry as pedagogy.

EDUC 7650 Learning Community of Practice VI: 1-6 semester hours
Prerequisites: EDUC 7640. This course is a continuation of EDUC 7640, which requires preparation of a dissertation proposal, selection of research tools, establishment of study procedures at research sites, and adherence to high ethical standards in research.

EDUC 7660 Learning Community of Practice VII: 1-6 semester hours
Prerequisites: EDUC 7650. This course requires preparation of a dissertation proposal, selection of research tools, establishment of study procedures at research sites, and adherence to high ethical standards in research.

EDUC 7670 Learning Community of Practice VIII: 1-6 semester hours
Prerequisites: EDUC 7660. This course requires students to prepare the final chapters of the dissertation, understand and perform data analysis, interpret the results for a problem of practice, provide recommendations for future research, and disseminate the results to applicable audiences.

EDUC 7680 Learning Community of Practice IX: 1-6 semester hours
Prerequisites: EDUC 7670. This course assists students to prepare the final chapters of the dissertation, understand and perform data analysis, interpret the results for a problem of practice, provide recommendations for future research, and disseminate the results to applicable audiences.

EDUC 7690 Learning Community of Practice X: 1-6 semester hours
Prerequisites: EDUC 7680. This course prepares students to defend the dissertation. This includes assistance with the dissertation manuscript and the oral defense.

EDUC 7710 Research Methods and Design for Educational Practitioners: 3 semester hours
Prerequisites: Students must be admitted to the EdD program in order to enroll in this course. This course prepares educational practitioners to identify and understand research questions and develop appropriate research designs to answer them. Students learn how to critically evaluate research reports.

EDUC 7880 Research Internship I: 3 semester hours
Prerequisites: Nine hours of research methods or statistics and consent of instructor. Supervised experience in the conduct of research studies or scholarly inquiry.

EDUC 7881 Research Internship II: 3 semester hours
Prerequisites: EDUC 7880 and consent of instructor. Supervised experience in the conduct of research studies or scholarly inquiry.

EDUC 7882 Research Internship III: 3 semester hours
Prerequisites: EDUC 7881 and consent of instructor. Supervised experience in the conduct of research studies or scholarly inquiry.

EDUC 7889 Laboratory of Practice: 1-6 semester hours
Prerequisites: Admission to an Ed.D. cohort. Field experience that bridges theory and practice in solving complex, situated problems of practice.

EDUC 7950 Preparation for Writing the Dissertation Proposal: 1 semester hour
Prerequisites: Completion of research methods course requirements. This course provides an in-depth examination of the essential elements of a dissertation proposal. Particular emphasis is placed on examining the validity and reliability or the trustworthiness of the design of proposed research. Tools for identifying strengths and weaknesses are applied to proposals. Critique of proposals is employed. Also reviewed is the process of presenting and defending a proposal.

EDUC 7998 Dissertation in Practice Research: 1-8 semester hours
Prerequisite: Admission to pre-candidacy in the EdD program.

EDUC 7999 Dissertation Research: 1-12 semester hours
Prerequisite: Admission to pre-candidacy in the PhD in Education program.

Education Sciences and Professional Programs

The College of Education at the University of Missouri-St. Louis is comprised of two departments: the Department of Educator Preparation and Leadership (EPL) and the Department of Education Sciences and Professional Programs (ESPP). Teacher educator and educational administrator preparation and certification occur in EPL, whereas ESPP supports these efforts via educational foundations, psychological development, educational technology, and research methods and evaluation courses and offers assorted undergraduate and professional graduate degrees that include Educational Studies, Sport Management, Adult and Higher Education, Educational Psychology, four Council for Accreditation of Counseling and Related Educational Programs-accredited (CACREP) Counseling programs, and a National Association of School Psychologists-approved (NASP) School Psychology Program.

The following degrees and programs are available through the Department of Education Sciences and Professional Programs:
Bachelor of Educational Studies

Bachelor of Science in Sport Management

Master of Education:
- Adult & Higher Education with an emphasis in Higher Education
- Clinical Mental Health Counseling (CACREP-accredited)
- Educational Psychology
- Elementary School Counseling (CACREP-accredited)
- Secondary School Counseling (CACREP-accredited)

Educational Specialist:
- School Psychology (NASP-approved)

Doctor of Education
- Assorted Learning Communities

Doctor of Philosophy in Education with an Emphasis in:
- Counseling (CACREP accredited)
- Educational Psychology

Graduate Certificate and Certification Programs:
- Character and Citizenship Education
- Community College Leadership
- Program Evaluation in Education
- Social Justice in Education
- Student Affairs Administration & Leadership

Degrees

Educational Studies BES
- Early Childhood Emphasis (p. 432)
- Exercise Science and Wellness Emphasis (p. 433)
- Park and Museum Programs Emphasis (p. 434)
- Youth and Adult Development Emphasis (p. 435)
- Social Entrepreneurship Emphasis (p. 434)

Sport Management BS (p. 637)

Adult and Higher Education MEd
- Adult Education Emphasis (p. 313)
- Higher Education Emphasis (p. 314)

Counseling MEd
- Clinical Mental Health Emphasis (p. 394)
- Elementary Emphasis (p. 395)
- Secondary Emphasis (p. 397)

Educational Psychology MEd (p. 431)

School Psychology EdS (p. 604)

Certificates

Character and Citizenship Education Graduate Certificate (p. 366)
Institutional Research Graduate Certificate (p. 480)
Community College Leadership Graduate Certificate (p. 387)
Institutional Research Graduate Certificate (p. 480)
Program Evaluation in Education Graduate Certificate (p. 585)
Social Justice in Education Graduate Certificate (p. 623)
Student Affairs Administration and Leadership Graduate Certificate (p. 638)

Courses

Courses offered by the department can be found at the links below:

Adult Education (ADULT ED)
Counselor Education (CNS ED)
Education (EDUC)
Educational Foundations (ED FND)
Educational Psychology (ED PSY)
Educational Research and Evaluation Methods (ED REM)
Higher Education (HIGHERED)

Educator Preparation and Leadership

General Information

The Department of Educator Preparation & Leadership offers coursework leading to bachelor's degrees, master's degrees, graduate certificates, and doctoral degrees. Students may also choose to pursue the Bachelor of Arts (B.A.) degree in the College of Arts and Sciences and also complete the education courses that are required for teacher certification in high school English, mathematics, social studies, science, music, art, and physical education.

Through the integration of content in general, special, and second language learning, candidates gain knowledge and valued skills that make them highly qualified and marketable. Nationally-recognized research faculty teach undergraduate and graduate courses that prepare educators in curriculum, instruction, assessment, and educational technology with a strong foundation in working with diverse, urban populations.

The following Department of Educator Preparation & Leadership degrees are accredited by the Missouri Department of Elementary and Secondary Education (DESE):

Undergraduate degrees:
- Bachelor of Science in Education (B.S. Ed) in Early Childhood Education
- Bachelor of Science in Education (B.S. Ed) in Elementary Education
- Bachelor of Science in Education (B.S. Ed) in Physical Education
- Bachelor of Science in Education (B.S. Ed) in Secondary Education

Master's degrees:
• Master of Education (M.Ed.) in Elementary Education
• Master of Education (M.Ed.) in Secondary Education
• Master of Education (M.Ed.) in Special Education

Graduate Certificates:
• Applied Behavior Analysis
• Autism Studies
• Early Childhood Teaching
• Elementary School Teaching
• Elementary and Special Education Teaching
• Secondary School Teaching
• Teaching English to Speakers of Other Languages (TESOL)
• Teaching of Writing, Gateway Writing Project

Doctoral Degrees
• Teaching-Learning Processes
• Educational Leadership and Policy Studies

Minors
Athletic Coaching

Mission
Our mission is to advance scholarship and promote teaching and learning as a lifelong process for all.

Goals
Through undergraduate and graduate programs and faculty engagement, the Department of Educator Preparation & Leadership seeks to:

• Create new ideas about and knowledge of teaching and learning processes.
• Utilize general, content, and pedagogical knowledge to design curriculum and enact instruction.
• Reflect on and evaluate teaching practices and research to improve learning.
• Develop educators who model the dispositions necessary to teach all students in a diverse society.
• Integrate learning tools by adapting instruction to changing technologies.
• Apply current research on assessment in culturally responsive ways to document and facilitate learning.
• Engage with community members to promote justice and develop active democratic citizens in a global world.
• Foster learning communities through collaboration with partner families, peers, and communities.

Career Outlook
Undergraduate and graduate degrees in elementary secondary and special education are most directly applicable to teaching at the level appropriate to the program emphasis. Demand for career-ready educators who have significant clinical experience working with youngsters, and who demonstrate contemporary, best-practice knowledge, skills, and strategies continue to create school-based employment opportunities for UMSL graduates. As in the past, elementary education graduates are attractive candidates for employment in varied positions that require preparation and training in social and behavioral sciences. Positions that serve the general public, such as sales, service, public relations, and general business, are common examples. Future expansions of opportunities in schools are tied to population growth, increased specialization of services, and reduction in ratios between professional staff and children served.

The employment outlook for special education teachers continues to be favorable, as they are in great demand among certain regions of the country. In addition to inclusion classroom teaching, graduates are typically employed as resource-room or self-contained classroom teachers, clinical diagnostic personnel, itinerant teachers, educational resource teachers, curriculum and/or behavior specialists, consultants, educational therapists, job coaches, supported employment and sheltered workshop evaluators, and in various supervisory and administrative positions among agencies and schools. In combination with related areas of expertise in systems supports, assessment, and educational psychology, for example, many occupations incorporate the skills, interventions knowledge, insights, and programmatic expertise learned in the UMSL Master’s Degree of Special Education.

The employment outlook in the middle and high schools continues to be positive, especially in mathematics, sciences and modern languages. Recent placement years have yielded excellent employment opportunities to UMSL graduates. In addition to middle school, and high school teaching, more limited opportunities exist in athletic training, dance, research, sports management, and exercise leadership fields serving persons of all age categories.

Degrees
Early Childhood Education BSEd (p. 416)
• Special Education Emphasis (p. 417)

Elementary Education BSEd
• Middle School Education Emphasis (p. 439)
• Special Education Emphasis (p. 442)
• Special Education and TESOL Emphasis (p. 440)
• TESOL Emphasis (p. 444)

Physical Education BSEd
• PK-12 Emphasis (p. 568)

Secondary Education BSEd
• English Emphasis (p. 605)
• Mathematics Emphasis (p. 607)
• Modern Foreign Language-French Emphasis (p. 608)
• Modern Foreign Language-Spanish Emphasis (p. 610)
• Science-Biology Emphasis (p. 611)
• Science-Chemistry Emphasis (p. 613)
• Science-Physics Emphasis (p. 614)
• Social Studies Emphasis (p. 616)

Education Administration EdS (p. 423)

Educational Administration MEd

• Community Education Emphasis (p. 429)

Elementary Education MEd (p. 446)
broadens candidates’ understanding of their own identity as educators as community youth-serving agency. The community-based experiences understanding of how youth learn subject matter in a variety of informal research-based scholarship and practical community-based contexts.

Undergraduate educator preparation programs are designed around Educator preparation is both engaging and innovative. Our high quality undergraduate educator preparation programs are designed around research-based scholarship and practical community-based contexts. Early course-based experiences provide candidates with practical understanding of how youth learn subject matter in a variety of informal settings. Every future educator is guided through approximately 100 clock hours of volunteer academic instruction and support for a local partnering community youth-serving agency. The community-based experiences broadens candidates’ understanding of their own identity as educators as well as enhancing their ability to build relationships, extend their skills, and understand family/community dynamics and interactions.

For their final year-long practicum, teacher candidates are immersed in Studio Schools. These partnering K-12 schools participate in our innovative, collaborative approach to educator preparation. Drawing on their studies during carefully sequenced coursework, teacher candidates enter their final two-semester clinical experience as collaborative teams of 6-14 candidates and work in a Studio School. In Studio Schools, candidates work with experienced teachers to deepen learning and increase student achievement. Rather than being placed as individuals with one cooperating teacher, our candidates work with multiple teachers learning from each one. This process is supported and facilitated on-site by a specially trained UMSL clinical educator who leads bi-monthly seminars, conducts observations, and provides candidates with regular feedback to guide their growth.

Teacher candidates inquire deeply into how their students are learning, and use data to inform their instruction. All participate in appropriate school and district professional development and school-wide activities, thereby becoming professionals who are part of the fabric of a school, not just a temporary teacher candidate. We believe that these community and school-based experiences create educators who understand learning in a broader context. In short, graduating educators have experienced an innovative education which prepares them for their future career as educational leaders in our region and beyond.

The following Department of Educator Preparation & Leadership degrees have been accredited by the Missouri Department of Elementary and Secondary Education (DESE):

**Undergraduate degrees:**

- Bachelor of Educational Studies (BES)
- Bachelor of Science in Education (B.S. Ed) in Early Childhood
- Bachelor of Science in Education (B.S. Ed) in Elementary Education
  - Special Education and TESOL emphasis
  - Special Education emphasis
  - TESOL emphasis
  - Middle School Certification for English
  - Middle School Certification for Mathematics
  - Middle School Certification for Science
  - Middle School Certification for Social Studies
- Bachelor of Science in Education (B.S. Ed) in Physical Education
- Bachelor of Science in Education (B.S. Ed) in Secondary Education
  - Biology concentration
  - Chemistry concentration
  - English concentration
  - Mathematics concentration
  - Modern Language, French K-12
  - Modern Language, Spanish K-12
  - Physics concentration
  - Social Studies concentration

**Certificates:**

- Teacher Certification in Music
- Teacher Certification in Art
Graduate Studies

The Department of Educator Preparation & Leadership offers three Master’s degrees, sixteen concentration areas, four Graduate Certificate programs, and joins with the College of Education Faculty to offer two Doctoral degrees.

Master of Education (M.Ed): A minimum of 30 credit hours is required.

Become a distinguished educator. Whether you are a PreK-12 classroom teacher, a school administrator, or an educator/trainer in a museum, business or youth serving organization, these concentration areas provide a broad spectrum of interests that gives a path to expertise.

The Masters of Education Degree programs and Graduate Certificate programs are designed for graduates to attain the following learning outcomes:

- Understand the major theories in the discipline of study.
- Attain a solid foundation in the overall field of education in general, including areas of social justice, educational leadership and advocacy, educational psychology and research.
- Attain a depth of knowledge in the primary discipline.
- Think critically.
- Develop skills as a reflective practitioner to be able to create and sustain change.
- Conduct teacher research.

The Master's Degree consists of:

- 6 credit hours of foundations courses that examine history, the impact of community on our youth, issues of social justice, teacher leadership and student advocacy;  
- 18 hours that provide the core of expertise in the areas you choose and give you the depth and expertise in areas that match the needs of your students;  
- and a 6 credit hour capstone where you become a researcher in your own organization or classroom to fully understand how to ask the right questions, collect meaningful data, and analyze and present it in a way that informs others.

A minimum of 30 credit hours is required.

The non-degree option is suited for those who have a Master's Degree or are not quite ready, and simply want to gain more in-depth knowledge about a particular area listed in the concentrations below.

Elementary Education

The M.Ed. program in elementary education has a General program option, an emphasis in Reading option, an emphasis in Teaching English to Speakers of Other Languages (TESOL), and an Early Childhood education option (18 credit hours) as well as focused concentrations in a variety of interest areas listed below. Additional hours may be necessary for reading specialist certification.

Secondary Education

The M.Ed. program in Secondary Education has several areas of specialization: General, Curriculum and Instruction, Middle Level Education, Reading, and Teaching English to Speakers of Other Languages (TESOL). Additionally, students may seek initial teacher certification while also studying for the M.Ed. A set of prescribed courses needed for certification fill the emphasis area. A minimum of 30 credit hours is required.

Special Education

The M.Ed. Program in Special Education includes a representation of the important core knowledge in Special Education. The primary goal is to empower professionals to be thoughtful teachers who use best practice when working with students with disabilities. Research and data-based decision making are emphasized throughout the program. Graduate students will translate research into practice in their courses, and learn to analyze multiple types of assessment data. The M.Ed. Program in Special Education consists of an initial required core of courses, an opportunity to develop an area of specialization, and a capstone or exit course.

Graduate Certificate Programs: A minimum of 18 credit hours is required.

Graduate Certificate programs are specialized programs of study that are not degree programs but are shown on the academic transcript so that readers are aware of the concentrated program of study. Graduate Certificates are unrelated to teaching certificates.

Graduate Certificate Areas are: Autism Studies Certificate; History Education Certificate; Teaching English to Speakers of Other Languages (TESOL) Certificate; and Teaching of Writing Certificate.

Doctoral Program

Doctor of Education (Ed.D) Program: BRIDGE THEORY AND PRACTICE WITH SCHOLARSHIP

The Doctor of Education in Educational Practice is a doctoral degree intended for practitioners. Areas of study available are the themes around which learning communities are formed. Members of the learning communities advance through the program as a cohort in three to three-and-one-half years. The degree program requires 80 credit hours, and the Master’s degree is recognized and applied toward the 80 credit hour requirement. A Dissertation in Practice is the capstone. The program applies an Inquiry as Practice model of scholarship. Graduates gain the ability to use data to inform decision-making and enhance their practice by gathering, organizing, judging, aggregating, and analyzing situations, literature, and data. The Doctor of Education degree program places emphasis on preparing scholarly practitioners for their professional work rather than emphasizing research for the purposes of building theory and preparation for the professoriate in higher education.

The curriculum of the Doctor of Education degree is intended to prepare practicing professionals to transform both their practice and the field by working in community, just as practitioners collaborate with key stakeholders to address complex problems of practice. Students are admitted to the degree program and simultaneously to a learning community of practice formed around a theme such as Language, Literacy, and Culture, Curriculum and Instruction, STEM, Higher Education Student Services, Global Learning, Social Justice or Heritage Leadership. The learning community and a mentor team of faculty and practitioners work together throughout the program using the learning community seminar, which is required every semester, as a mechanism by which to cultivate community and build the unique skills needed for education practitioners. The skills to work collaboratively to develop, test, and advance innovative solutions to high-leverage problems of practice are fostered throughout the program.
In addition to the thematic learning community of practice format, the curriculum features Laboratories of Practice and a Dissertation in Practice as culminating activities. The Laboratories of Practice take the doctoral studies away from the University campus and to a context where theory, inquiry, and practice can intersect and the implementation of practice can be measured. The Dissertation in Practice allows the learning community to address a high leverage problem of practice through collaborative and connected work beyond what a single individual could do alone. Individuals contribute work that feeds into group work. The Dissertation of Practice is characterized by generative impact.

The University of Missouri-St. Louis College of Education is a member of the Carnegie Project on the Education Doctorate, a national group of over 100 universities that are re-designing and re-orienting the Doctor of Education degree as a program that is distinct from Doctor of Philosophy in Education degree programs. Our program reflects our commitment to the work of the Carnegie Project and its working principles.

Doctor of Philosophy of Education (Ph.D.)

The Ph.D. degree in Education, offered in cooperation with the School of Education at the University of Missouri-Kansas City and the College of Education at the University of Missouri-Columbia, is designed for educators who desire directed research experience promoting scholarly inquiry in education.

The Ph.D. program is designed for graduates to attain the following learning outcomes:

- Understand the major theories in their primary and secondary disciplines.
- Attain a breadth of knowledge in education in general and a depth of knowledge in the primary discipline.
- Think critically.
- Locate literature in the primary and secondary disciplines.
- Understand research methods in education.
- Conduct research.
- Demonstrate leadership skills and attributes.

Categories of coursework and credits Required are: 1. Research Methods (15-18 hrs.); 2. Disciplinary Specialization (24-26 hrs., 16 in residence as Ph.D. student); 3. Foundations Courses (10-14 hrs.); 4. Proposal Writing (EDUC 7950; 1 hr.); 5. Comprehensive Examination; and 6. Dissertation Research (6 hrs.).

The minimum total credit hour requirement to complete the Ph.D. in Education degree is 90 credit hours of post-baccalaureate coursework. Up to 44 credit hours of graduate coursework, typically the Master’s degree and post-Master’s credit hours, can be applied to the foundations, research methods, and disciplinary specialization categories as appropriate.

The Master’s degree work can usually be applied without regard to the age of the degree, but post-Master’s coursework should be recent (4 to 6 years old). There is an 8-year time limit for completing the Ph.D. in Education.

The final program configuration, including how previous coursework is applied to the degree requirements, is determined at a meeting of the student, the student’s advisor, and two additional faculty members in the area of study, where applicable. This meeting typically takes place 2 to 3 semesters after program entry.

Courses

Courses offered by the department can be found at the links below:

- Early Childhood Education (ECH ED)
- Educational Administration (ED ADM)
- Educational Technology (ED TECH)
- Elementary Education (ELE ED)
- Health and Physical Education (HLTH PE)
- Middle Education (MID ED)
- Physical Education (PHY ED)
- Secondary Education (SEC ED)
- Special Education (SPEC ED)
- Teacher Education (TCH ED)
College of Nursing

General Information

The College of Nursing offers academic nursing programs at the undergraduate and graduate levels. Knowledge and skills needed to complete the professional licensure examination to become a registered nurse are available through the traditional baccalaureate option. A part-time, evening and weekend scheduling option is available, as is an accelerated option for students with degrees in other fields or who meet the admission criteria for this intensive option. Nurses who have obtained their basic nursing education through an associate degree or a diploma nursing program may fulfill the requirements for the BSN completion option without repetition of previous nursing education classes through the RN to BSN option. The Doctor of Philosophy in Nursing (Ph.D.) program prepares nurse scientists. Admission to the Ph.D. program is available at the post BSN and MSN levels. The Doctor of Nursing Practice (DNP) program prepares students for the highest level of advanced clinical nursing practice. Admission to the DNP program is available at the post BSN and MSN levels.

*Completion of the nursing program does not guarantee eligibility to take the licensure examination, per section 335.066 RSMo of the Missouri Nursing Practice Act.

International Students

Students with international status are required to take the English for Academic Purposes (EAP) assessment at the University. Based upon the assessment, students may be required to complete recommended EAP courses prior to enrolling in nursing courses.

All students with international coursework (whether they are classified as an international student or as a citizen or permanent resident of the United States) must submit official transcripts from the international school(s), as well as official course descriptions (in English) for every course taken at a foreign institution.

Professional Organizations

Sigma Theta Tau International Honor Society for Nursing

The Nu Chi Chapter of Sigma Theta Tau was officially established in April 1984. Membership is offered by invitation to those students graduating in the upper third of their class and to those recognized as outstanding community nursing leaders. Professional presentations are held twice each year and feature leaders in the nursing profession.

Student Nurses' Association

The College of Nursing is a constituent of the National Student Nurses' Association (SNA). The purpose of this organization is to provide nursing students in the basic baccalaureate program the opportunity to connect with the nursing profession prior to licensure. SNA provides students with volunteer, donation, and networking opportunities to increase their involvement in the nursing community. The organization is open to all nursing majors.

Minority Student Nurses’ Association

The Minority Student Nurses’ Association (MSNA) was developed to function as an academic support and networking group. The focus of MSNA is to provide service, knowledge, and sense of awareness through community and university service, and to create a bond between minority nursing students. MSNA is all about support, academics, and community outreach. Membership is open to all students from the CON regardless of race, culture, religion, or ethnic background.

Undergraduate Studies

The College of Nursing provides coursework leading to the Bachelor of Science in Nursing (BSN). The undergraduate program offers two means for achieving the bachelor’s degree in nursing: studies that are preparatory for completion of the professional nurse licensure examination (pre-licensure program) and advanced placement for the professional registered nurse without repetition of fundamental nursing and clinical courses (RN to BSN program). An accelerated pre-licensure option is available for qualified individuals who hold earned degrees in non-nursing fields, or outstanding students who have completed all prescribed general education and science course work. The traditional pre-licensure option can be completed on a full-time basis or through a part-time evening/weekend program.

Students must meet university and College of Nursing requirements. Baccalaureate students meeting admission criteria may participate in the Pierre Laclede Honors College. Students who have been dismissed from another nursing program are not eligible for admission to the pre-licensure BSN program.

Faculty maintain the right to make appropriate curriculum changes to comply with standards for accreditation and approval as stipulated by the Commission on Collegiate Nursing Education and the Missouri State Board of Nursing’s minimum standards. For that reason, students receive exceptional advising support from college advisors.

Degree Requirements for BSN

The Bachelor of Science in Nursing degree requires comprehensive course work in general education and nursing. Basic undergraduate nursing course work includes theory, on-campus laboratory and clinical activities. Clinical experiences require weekday, evening, and/or weekend commitments.

- Full-time study in the traditional BSN pre-licensure option can be completed in four academic years (2.0 years of nursing course work following the completion of 2.0 years of general education coursework).
- Part-time study in the traditional BSN pre-licensure option is available with nursing classes in the evenings and clinical hours predominantly on the weekends. The nursing clinical curriculum can be completed in 10 semesters following completion of general education courses.
- The accelerated BSN pre-licensure option requires full-time study and can be completed in 15 months (following the completion of general education courses).
- The RN to BSN program is offered 100% online, blended on the UMSL campus, or blended at select off-campus locations throughout the metro area. Clinical activities in the RN to BSN program are community-based and may be completed in the student's home community.

Courses that require clinical hours will require a student to pass a criminal background check and drug screening prior to entry into the program. Additional requirements and/or disclosures may become necessary throughout the courses of the program. Specific current immunizations, certifications, and examinations will also be required prior to the academic year. Students who fail to upload all health documents into the health
compliance tracker “CastleBranch” by the determined designated date will not be allowed to attend the clinical portion of their course. It is the responsibility of the student to obtain the information necessary for them to become knowledgeable about these requirements and plan their plan of study accordingly.

Advanced Nursing Education

The College of Nursing provides coursework leading to the Doctor of Nursing Practice (DNP) or Doctor of Philosophy in Nursing (Ph.D.). The DNP program prepares graduates for the highest level of clinical practice, including clinical and translational analysis for improved practice outcomes. The Ph.D. program prepares nurses to pursue theoretical inquiry and conduct original research for the purpose of extending knowledge in the field. Post-Graduate Certificate Programs (PGC) are offered to allow students to take the examinations for advanced practice nursing certification in any of our population of foci areas.

Students must meet university and College of Nursing requirements.

Faculty maintain the right to make appropriate curriculum changes to comply with standards for accreditation and approval as stipulated by the Commission on Collegiate Nursing Education. For that reason, students receive exceptional advising support from the graduate academic advisors.

The UMSL College of Nursing is proud to be fully accredited/approved by the following bodies:

- The Post-Graduate Certificate and DNP programs at UMSL are accredited by the Commission on Collegiate Nursing Education (CCNE), 655 K Street, NW, Suite 750, Washington, DC 20001, 202-887-6791.
- The University of Missouri-St. Louis is accredited by the Higher Learning Commission (hlcommission.org), a regional accreditation agency recognized by the U.S. Department of Education.

Courses that require clinical hours will require a student to pass a criminal background check and drug screening prior to entry into the program. Additional requirements and/or disclosures may become necessary throughout the courses of the program. Specific current immunizations, certifications, and examinations will also be required prior to or within the first semester of the program and prior to any semester requiring a residency experience. Students who fail to upload all health documents into the health compliance tracker ‘CastleBranch’ by the determined designated date will not be allowed to attend the residency portion of their course. It is the responsibility of the student to obtain the information necessary for them to become knowledgeable about these requirements and plan their plan of study accordingly.

DNP

The DNP program is an online program with intensive on-campus experiences that focus on the preparation of leaders in clinical nursing who can improve quality of care for individuals and populations through advanced practice and through improving systems of care. The curriculum is based on national standards for DNP education.

Courses are designed to support nursing science, clinical research, leadership and a specialty area. Concepts woven throughout the courses include methodologies for translating research into practice, using culturally competent leadership techniques with diverse and underserved populations, advanced nursing science and clinical scholarship, clinical prevention, advanced nursing practice and clinical decision making, understanding organizational systems and change, and policy development. The DNP program is available for nurses who have completed an accredited MSN or BSN academic degree.

The UMSL College of Nursing is committed to admitting a diverse group of students who will become nurse leaders responsive to the specific needs of the communities and populations we serve. We value diversity, intellectual discourse and rigor, caring, professionalism, mutual respect and support, innovation, collaboration, and transparency. Applicants will be selected using inclusive and balanced admission criteria that measure their potential in nursing practice, education, research, and scholarship. We measure our success by graduates who become lifelong learners and leaders in their communities and in the profession of nursing.

Ph.D.

The Doctor of Philosophy in Nursing (Ph.D.) program at the University of Missouri-St. Louis (UMSL) affords students with academic, clinical, and research resources of the University of Missouri system through a cooperative arrangement with the schools of nursing at UMSL. Upon completion of all degree requirements, the Ph.D. degree is awarded by the UMSL Graduate School. The Ph.D. degree is an online program with synchronous and asynchronous classes. Some courses are shared with the University of Missouri-Columbia and the University of Missouri-Kansas City.

The Ph.D. in nursing curriculum is divided into these general categories:

- Nursing Science and Theory
- Nursing Research Methods and Statistics
- Cognates
- Dissertation

The Ph.D. program is designed for graduates to attain the following program outcomes:

- Develop expertise and knowledge to establish a program of research and scholarship.
- Translate nursing research into practice and policy to improve health and healthcare systems.
- Provide leadership to effect change in healthcare practice, policy, and education issues by collaboration and partnerships.
- Collaborate effectively with interdisciplinary teams.
- Improve the healthcare quality of life, individuals/families/communities regionally, nationally and internationally.

Post-Graduate Certificates

Students with nursing graduate degrees who wish to become eligible for a nurse practitioner certification may complete one of the post-graduate certificates (PGC). The length of the program and the specific plan of study for each student will vary. The average part-time student can complete the certificate in one to two years.

PGC population of foci available for study include:

- Adult-Geriatric Nurse Practitioner - Primary Care
- Family Nurse Practitioner - Primary Care
- Pediatric Nurse Practitioner - Acute Care
- Pediatric Nurse Practitioner - Primary Care
- Psychiatric-Mental Health Nurse Practitioner - Primary Care
- Women’s Health Nurse Practitioner - Primary Care
Courses

NURSE 1000 Cultural Diversity in Healthcare: 3 semester hours
This course introduces cultural congruence across the lifespan. Transcultural nursing concepts will be examined, as well as theories & practices in relationship to human caring. Application and analysis of health care practices within selected cultural contexts are explored.

NURSE 1050 Communication for the Healthcare Professional: 3 semester hours
This course focuses on the development of communication skills utilized in professional nursing. The individual's relationship with self, individuals, communities, and populations are discussed. Communication and collaboration concepts in nursing are introduced to develop effective human caring relationships with diverse populations.

NURSE 2000 Nutrition in Health: 3 semester hours
This course examines nutritional needs across the illness and wellness continuum with emphasis on nutritional principles related to health promotion and protection. Content includes assimilation, digestion and absorption of nutrients, and cultural and economic influences on dietary practices across the lifespan.

NURSE 2050 Pathophysiology: 3 semester hours
Prerequisites: BIOL 1141 and BIOL 1162. This course focuses on the normal processes and mechanisms operating within the human body. Explores the nature of disease, its causes and the bodily changes that accompany. The course includes general principles of disease, diseases specific to internal organs, and the clinical implications.

NURSE 2101 Introduction to Nursing: 2 semester hours
This course introduces the historical and theoretical development of nursing as a discipline. Nursing is examined as a dynamic practice profession. Variables that influence nursing and health care are discussed. Concepts and skills introduced in this course guide the student's educational experience within the nursing major.

NURSE 2103 Nutrition and Health: 3 semester hours
This course examines nutritional needs throughout the life span with emphasis on nutritional principles related to health promotion and protection. Content includes assimilation, digestion and absorption of nutrients and cultural and economic influences on dietary practices.

NURSE 2105 Communication in the Nursing Profession: 3 semester hours
This course focuses on the development of communication abilities utilized in professional nursing. The individual's relationship with self, others and groups is discussed. Students learn verbal and non-verbal communication skills, self-awareness, and sensitivity to others. Interpersonal skills are introduced to enable the student to develop effective human caring relationships with a diverse population of clients and colleagues.

NURSE 3000 Health Promotion and Disease Prevention Concepts Across the Lifespan: 3 semester hours
Prerequisites: Admission to nursing clinical major. This course focuses on the role of the nurse in promoting health and reducing risk behaviors of individuals and families across the lifespan. Concepts of nutrition, physical activity, coping and stress management skills, social determinants of health, and health disparities will be examined with an emphasis on the impact of genetics, values, lifestyles and cultural influences. Patient education for health promotion, risk reduction, and disease prevention across the lifespan will be explored.

NURSE 3005 Introduction to Professional Nursing: 3 semester hours
Prerequisites: Admission to the Accelerated BSN program. This course introduces students to the role of the professional nurse. Health promotion and disease prevention across the life span are examined. Ethics, legal standards, and healthcare policy concepts are also explored.

NURSE 3010 Foundations of Professional Practice: 3 semester hours
Prerequisites: Admission to the nursing clinical major. An introductory course to the discipline of professional nursing. Concepts of nursing process and clinical reasoning are introduced and explored within the context of the domain of nursing (person, environment, health, nursing).

NURSE 3015 Professional Nursing Concepts and Practice: 6 semester hours
Prerequisites: Admission to the Accelerated BSN Program. Introduction to the structure of the discipline of nursing, selected theoretical and conceptual models, and their application to nursing process, clinical reasoning, and education as a foundation for socialization into professional nursing practice. Includes didactic, laboratory, and clinical components.

NURSE 3020 Fundamental Concepts of Nursing Care: 3 semester hours
Prerequisites: Admission to nursing clinical major. Introduces fundamental evidence based nursing concept, skills, and standard of care that underpin the implementation phase of the nursing process. Course allows for students to acquire and practice the skills in a lab setting with the application of skills with patients in an assigned clinical setting.

NURSE 3030 Health Assessment Concepts: 3 semester hours
Prerequisites: Admission to nursing clinical major. This course integrates concepts related to theoretical knowledge and interpersonal skills in the assessment of clients, focusing on differentiating normal from abnormal findings. It emphasizes the use of problem solving, critical thinking, and cultural competency in identifying and documenting multidimensional health variations across the lifespan. The course includes a classroom component and laboratory experiences, including practice of psychomotor skills.

NURSE 3035 Health Assessment and Promotion: 3 semester hours
Prerequisites: Admission to the Accelerated BSN Program. Health promotion, client education, and physical assessment skills across the lifespan are developed using the nursing process framework. Didactic and laboratory components are included.

NURSE 3040 Concepts of Evidence-Based Practice: 3 semester hours
Prerequisites: Admission to nursing clinical major. This course focuses on utilizing evidence-based practice to promote health and wellness, illness, and prevent injury among individuals, families, communities, and populations. Emphasis is placed on education, collaboration, utilizing evidence in practice for quality improvement, and resource utilization. This course builds on content presented in previous coursework and increases the complexity of students’ mastery of focus concepts.

NURSE 3050 Concepts of Pharmacology: 3 semester hours
Prerequisites: Admission to nursing clinical major. Building upon knowledge of illness and wellness concepts developed in previous coursework, students will learn to apply this knowledge to the pharmacotherapeutic component of caring for patients across the lifespan.
NURSE 3055 Foundations of Nursing Pharmacotherapeutic Concepts: 3 semester hours
Prerequisites: NURSE 3005, NURSE 3015. This course covers concepts and principles of pharmacology across the lifespan with an emphasis on pharmacotherapeutics and an evidence-based, comprehensive approach to the clinical application of drug therapy. Cultural considerations, individual needs, and patient education related to pharmacology are examined.

NURSE 3060 Behavioral Health Concepts: 5 semester hours
Prerequisites: NURSE 3000, NURSE 3010, NURSE 3020, and NURSE 3030. This course focuses on mental health and illness across the lifespan for individuals experiencing emotional distress, crisis, and severe, persistent mental illness. Students will increase basic skills in interpersonal communication, decision-making, and professional behavior as they utilize theory concepts and research from nursing, psychology, pharmacology, and other disciplines in the provision of care to individuals, families, groups, and vulnerable populations. The course includes basic theory and clinical experiences in hospital and community settings. Students will complete 90 clinical hours.

NURSE 3065 Professional Nursing Adult and Elder Care I: 5 semester hours
Prerequisites: NURSE 3005, NURSE 3015, NURSE 3035. This course covers nursing care of adult and elder patients including healthy aging and maintenance of functional capacity. It content addresses common physiologic and social changes, challenges, and adaptations affecting adult and elder populations. Strategies for health promotion and disease management are addressed in the care of adult and elder patients experiencing fluid and electrolyte imbalances, cardiovascular, integumentary, immunologic, pulmonary, and hematologic alterations. Pathophysiological processes of organ systems are explored. Didactic and clinical components are included.

NURSE 3070 Concepts of Caring for Adults I: 5 semester hours
Prerequisites: NURSE 3000, NURSE 3010, NURSE 3020 and NURSE 3030. This course focuses on the nursing care of the adult patient experiencing selected pathophysiological processes affecting body regulatory mechanisms. These mechanisms are related to multiple concepts across the illness and wellness continuum. Emphasis is placed on health restoration, maintenance and support of chronic illness as well as the continued development of critical thinking processes, and evidence-based nursing practice. This course includes lecture and active learning within the classroom, as well as a clinical component. Students will complete 90 clinical hours.

NURSE 3075 Professional Nursing Mental Health: 5 semester hours
Prerequisites: NURSE 3015, NURSE 3055. This course covers theoretical knowledge and skill to promote the mental health of patients across the lifespan. Common and complex mental health disorders affecting individuals, families, and communities are examined. Students will learn and apply therapeutic communication techniques with patients experiencing mental health disorders. Ethical, moral, and legal issues in mental health nursing practice are addressed. Didactic and clinical components are included.

NURSE 3101 Nursing and Health: 6 semester hours
Prerequisites: BIOL 1131; BIOL 1141; CHEM 1052; NURSE 1010, NURSE 3106; NURSE 3110; NURSE 3111. An introduction to the discipline of nursing, the historical and theoretical development of nursing is explored with an emphasis on critical thinking, the teaching/learning process, and foundational practice concepts. Through modular laboratory experiences, the student acquires psychomotor skills to provide safe and effective nursing care to clients promoting health and wellness. Includes classroom, laboratory, and clinical experiences.

NURSE 3106 Assessment of Clients in Health and Illness: 4 semester hours
Prerequisites: BIOL 1131; BIOL 1141; BIOL 1162; CHEM 1052; PSYCH 1268; NURSE 1010. This course integrates theoretical knowledge and interpersonal skills in the assessment of clients focusing on differentiating normal from abnormal findings. It emphasizes the use of problem solving, critical thinking and cultural competency in identifying multidimensional health variations across the life span. The course includes classroom and laboratory experiences.

NURSE 3110 Pathophysiological Bases of Nursing Practice: 3 semester hours
Prerequisites: BIOL 1131, BIOL 1141, BIOL 1162, CHEM 1052 (or equivalent); NURSE 1010. This course focuses on the nature of disease, its causes and the bodily changes that accompany it. The course includes a study of general principles of disease, specific diseases of individual organs and systems and the clinical implications.

NURSE 3111 Pharmacotherapeutics in Nursing Practice: 3 semester hours
Prerequisites: BIOL 1141, BIOL 1162, CHEM 1052, NURSE 1010; pre/ co requisite: NURSE 3110. This course introduces key terminology, legal foundations, general principles and clinical applications of pharmacology.

NURSE 3120 Foundations of Nursing: 7 semester hours
Prerequisites: All 3100 level nursing courses. This course introduces the student to the theoretical concepts and foundations of professional nursing practice. Utilizing an integrated approach, health promotion and protection throughout the lifespan are explored and supported using theories of nursing practice, health assessment of well individuals, and general principles and concepts of pharmacology and critical thinking.

NURSE 3121 Clinical Foundations of Nursing: 3 semester hours
Prerequisites: NURSE 3120. This course assists in the development and application of clinical reasoning in the lab, clinical agency, and simulation environments. Through clinical learning experiences, the student acquires basic psychomotor, communication, and medication administration skills. The student applies these skills in the provision of safe and effective nursing care to clients while promoting health, wellness, and clinical reasoning.

NURSE 3205 Adult Health Nursing I: 5 semester hours
Prerequisites: All 3100 level nursing courses and PSYCH 1268. This course focuses on the nursing care of the adult experiencing selected pathophysiological processes affecting body regulatory mechanisms. These mechanisms are related to immune responses, problems of oxygenation: ventilation, transport and perfusion: kidney function; regulatory mechanisms and digestion absorption and elimination. Emphasis is placed on health restoration, maintenance and support as well as the continued development of the nurse-client relationship, critical thinking processes, and research-based nursing practice. This course includes classroom and clinical activities in a variety of settings.

NURSE 3206 Adult Health Nursing II: 5 semester hours
Prerequisites: All 3100 level nursing courses, NURSE 3205, and PSYCH 1268. This course focuses on the nursing care of the adult experiencing selected pathophysiological processes affecting body regulatory mechanisms. These mechanisms are related to endocrine, sensory-perceptual, gynecological, and genitourinary functions. Emphasis is placed on health restoration, maintenance and support as well as the continued development of the nurse-client relationship, critical thinking processes, and research-based nursing practice. This course includes classroom and clinical activities in a variety of settings.
NURSE 3214 Psychiatric Mental Health Nursing: 4 semester hours
Prerequisites: All 3100-level nursing courses; PSYCH 1268. This course focuses on health and illness across the lifespan of clients who have acute and chronic emotional and psychosocial difficulties and psychiatric illnesses. The course emphasizes development of students' decisional capabilities, self-awareness and professional behaviors as they utilize theory and research from nursing, psychology and related disciplines for the provision of nursing care to individuals, families, & groups. Clinical experiences in community and acute care settings are designed for students to engage in individual and group strategies that promote and maintain mental health. Course includes classroom and clinical activities in a variety of settings.

NURSE 3215 Nursing of Women and Childbearing Families: 4 semester hours
Prerequisites: All 3100 level nursing courses, PSYCH 1268. Focuses on the childbearing family and women's reproductive health, including family dynamics and growth and development. Health promotion, protection, maintenance and restoration are covered in experiences that include hospital and community settings. Health care policy and systems as relevant to these populations are included. Course includes classroom and clinical activities in a variety of settings.

NURSE 3216 Child and Family Health Nursing: 4 semester hours
Prerequisites: All 3100 level nursing courses, PSYCH 1268. This course focuses on pediatric health and illness with emphasis on family dynamics, growth and development and communication with children and their families. Health promotion, protection, restoration, maintenance and support concepts are covered in experiences that include hospital and community settings. Health care policy and systems are studied as relevant to this population. Course includes classroom and clinical activities in a variety of settings.

NURSE 3330 Nursing of Adults I: 5 semester hours
Prerequisites: NURSE 3120, NURSE 3121. This course focuses on the nursing care of the adult experiencing health problems affecting body regulatory mechanisms. These mechanisms are related to perioperative processes, immune processes, problems of oxygenation, cardiovascular alterations, fluid and electrolyte/acid-base imbalances, integumentary problems, abnormalities of the reproductive system and genetics, oncology and hematologic problems. This course also incorporates relevant concepts of pharmacology and pathophysiology related to these conditions. Emphasis is placed on health promotion and restoration, maintenance and support as well as the continued development of the nurse-client relationship, clinical reasoning, and evidence-based nursing practice across the adult life span.

NURSE 3331 Clinical Nursing of Adults I: 3 semester hours
Prerequisites: NURSE 3330. This course focuses on the nursing care of adults in the lab, clinical agency, and simulation environments. Utilizing an integrated approach, advanced nursing skills and assessment techniques for adult clients are mastered in perioperative processes, immune processes, problems of oxygenation, hematology, cardiovascular alterations, fluid and electrolyte/acid-base imbalances, integumentary problems, abnormalities of the reproductive system, genetics and oncology problems. Clinical reasoning is developed and applied in order to provide safe and effective nursing care to adult clients across the health/illness continuum.

NURSE 3340 Behavioral Health Nursing: 2.5 semester hours
Prerequisites: All 3100 level nursing courses and PSYCH 1268. This course focuses on health and illness across the lifespan of clients who have acute and chronic psychosocial and behavioral health issues and specific psychiatric illnesses. An emphasis is placed on the nurse/client relationship in behavioral health promotion, restoration, maintenance and support.

NURSE 3341 Clinical Behavioral Health Nursing: 1.5 semester hour
Prerequisites: NURSE 3340. In this course students utilize theory and evidence from nursing and related disciplines in the provision of nursing care to individuals, families, and groups with psychiatric and behavioral health problems. Clinical experiences in community and acute care settings are designed so that students can engage in individual and group strategies that promote and maintain mental health.

NURSE 3350 Nursing of Adults II: 5 semester hours
Prerequisites: NURSE 3120, NURSE 3121. This course focuses on the nursing care of the adult experiencing complex pathophysiologic processes affecting body regulatory mechanisms. These mechanisms are related to endocrine, neurological, musculoskeletal, gastrointestinal, sensory-perceptual, male reproductive and genitourinary problems. This course also incorporates relevant concepts of pathophysiology and pharmacology related to these conditions. Emphasis is placed on health promotion and restoration, maintenance and support, as well as the continued development of the nurse-client relationship, critical thinking and evidence-based nursing practice across the adult life span. NURSE 3350 and NURSE 3351 are co-requisites to be taken together in an 8-week period.

NURSE 3351 Clinical Nursing of Adults II: 3 semester hours
Prerequisites: Co-requisite with NURSE 3350. This course focuses on the nursing care of adults in the lab, clinical agency and simulation environments. Utilizing an integrated approach, complex psychomotor skills and assessment techniques for adult clients are mastered in patients with musculoskeletal problems, endocrine alterations, renal/genitourinary problems, sensory-perceptual problems, and liver problems. Clinical reasoning is developed and applied in order to provide safe and effective nursing care to adult clients with complex problems across the health/illness continuum. NURSE 3350 and NURSE 3351 are co-requisites to be taken together in an 8-week period.

NURSE 3360 Maternal-Child Nursing: 5 semester hours
Prerequisites: PSYCH 1268, NURSE 3120, NURSE 3121. This course focuses on women's reproductive health, childbearing and child-rearing families, as well as the health and illness of children from conception through adolescence. There is an emphasis on family dynamics, growth and development, and communication with children and their families. Health care policy and systems are incorporated as they relate to diverse populations. NURSE 3360 and NURSE 3361 are co-requisites to be taken together in an 8-week period.

NURSE 3361 Clinical Maternal-Child Nursing: 3 semester hours
Prerequisites: Co-requisite with NURSE 3360. Health promotion, protection, restoration, and maintenance for the mother-child and family care are addressed in experiences that include nursing skills lab, hospital agency and a variety of community settings. NURSE 3360 and NURSE 3361 are co-requisites to be taken together in an 8-week period.

NURSE 3799 Statistics for Population Health: 3 semester hours
Prerequisite: Admission to the College of Nursing's RN to BSN Program. This course provides students with an introduction to the use and interpretation of basic statistics, statistical databases, and data analysis. Basic statistical techniques will be introduced and utilized to identify and support evidence-based clinical decisions related to health and society.
NURSE 3804 Ethical and Legal Dimensions of Nursing Practice: 3 semester hours
Prerequisites: Philosophy (3 credits). This course explores the ethical and legal dimensions of nursing practice. The relationship between ethical and legal issues is examined within nursing situations. The student participates in dialogue addressing ethical-legal issues in professional nursing practice to explore personal values, increase sensitivity to others and to develop ethical reasoning abilities.

NURSE 3807 Research and Evidence-Based Nursing Practice: 3 semester hours
Prerequisites: NURSE 3799 (or equivalent) and NURSE 3817. This course prepares nurses to provide evidence-based care to patients among the rapid advances in the science and technology of healthcare. This course provides a basic understanding of how evidence is developed, including the research process, clinical judgment, interprofessional perspectives, and patient preference as applied to nursing practice. Students will learn a systematic method to evaluate and apply research findings and other evidence in designing and implementing nursing care that is multidimensional, high quality, and cost-effective.

NURSE 3808 Management And Leadership In Nursing: 2-3 semester hours
Prerequisites: All 3000 level nursing courses; ECON 1000 or (equivalent) This course prepares the nurse to coordinate and manage client care in diverse health care settings. Emphasis is placed on leadership and management theory and related skills, collaboration, delegation, coordination, and evaluation of multi-disciplinary work and the application of outcome-based nursing practice.

NURSE 3817 Introduction to Health and Nursing Informatics: 3 semester hours
This online laboratory course establishes competency in fundamental information management and computer technology skills. It enables students to use existing information systems and available information to manage nursing practice. Students critically evaluate technology, information, and its sources; use decision support systems designed for clinical decision making; and focus on the representation of nursing data, information, and knowledge.

NURSE 3820 Introduction to Evidence-Based Nursing Practice and Informatics: 5 semester hours
Prerequisites: NURSE 3799 or equivalent statistics course. This course will focus on current review of quantitative and qualitative nursing literature and research utilization through evidence-based practice and establish competency in fundamental information management and technology. Students will examine the research and evidence-based process through analysis and critique of nursing literature; critically evaluate technology, information, and its sources; use decision support systems designed for clinical and ethical decision making; and focus on the presentation of nursing data, information, and knowledge.

NURSE 3873 Guided Study in Nursing: 1-3 semester hours
This course is an in-depth independent study of selected topics in nursing under the guidance of a specific instructor. No more than six hours may be taken under this option.

NURSE 3900 Role of the Baccalaureate-Prepared Nurse: 3 semester hours
Prerequisite: Admission to the College of Nursing's RN to BSN Program. This course provides an overview of the expanded expectations of the baccalaureate-prepared nurse in today's changing healthcare climate. The role of the baccalaureate prepared nurse in influencing healthcare delivery, healthcare systems, and health outcomes of individuals, families, and communities will be explored.

NURSE 3910 Nursing Theory for Population Health: 3 semester hours
Prerequisites: Admission to the College of Nursing's RN to BSN Program. This course provides the opportunity to examine evidence-based practice nursing interventions, select theories, models, assessment strategies, and tools that can be used to promote health for populations. The roles and responsibilities of the professional nurse in population-based health systems will be explored.

NURSE 3920 Health Assessment for the Professional Nurse: 3 semester hours
Prerequisite: Admission to the College of Nursing's RN to BSN Program. This course will incorporate a holistic, multidimensional approach that culminates in the ability to perform a comprehensive health assessment. The course will emphasize the use of clinical reasoning to determine areas in which health promotion activities should be implemented. The impact of social determinants of health, genomics, lifestyle, environmental factors, literacy, and culture will be explored.

NURSE 3930 Nursing Research and Evidence-Based Practice for the Professional Nurse: 3 semester hours
Prerequisite: Admission to the College of Nursing's RN to BSN Program. This course prepares nurses to provide evidence-based nursing care to patients among the rapid advances in the science and technology of healthcare. This course provides a basic understanding of how evidence is developed, including the research process, clinical judgment, interprofessional perspectives, and patient preference as applied to nursing practice. Students will learn a systematic method to evaluate and apply research findings and other evidence in designing and implementing nursing care that is multidimensional, high quality, and cost-effective.

NURSE 3940 Leadership and Management for Professional Nursing: 3 semester hours
Prerequisites: Admission to the College of Nursing's RN to BSN Program. This course prepares the nurse to coordinate and manage client care in diverse health care settings. The use of information systems and data to guide management decisions will be emphasized. Leadership and management concepts, issues, and functions as applied to the role of the professional nurse in delivering culturally competent, safe, and quality care will be examined.

NURSE 4010 Concepts of Caring for Adults II: 5 semester hours
Prerequisites: NURSE 3050 and NURSE 3070. This course focuses on the application of nursing care of the adult patient experiencing selected pathophysiological processes affecting body regulatory mechanisms across the illness and wellness continuum. Emphasis is placed on health restoration, maintenance and support of acute illness as well as the continued development of the nurse-client relationship, critical thinking processes, research-based nursing practice and use of technology. A focus on care collaboration, communication, quality of care, health care ethics and legal implications is provided. This course includes lecture and active learning, in addition to a clinical portion. Completion of 90 clinical hours.

NURSE 4015 Professional Nursing Adult & Elder Care II: 5 semester hours
Prerequisites: NURSE 3065. This course covers nursing care of adult and elder patients including healthy aging and maintenance of functional capacity. Content addresses common physiologic, psychological, and social changes, challenges, and adaptations affecting adult and elder populations. Strategies for health promotion and disease management are addressed in the care of adult and elder patients experiencing genitourinary, gastrointestinal, neurological, endocrine, musculoskeletal, health restoration, and/or sensory-perceptual alterations. Pathophysiologic processes of organ systems are explored. Didactic and clinical components are included.
NURSE 4020 Concepts of Caring for Women and the Childbearing Family: 3 semester hours
Prerequisites: NURSE 3000, NURSE 3010, NURSE 3020, NURSE 3030, and NURSE 3050. This course focuses on the application of health and illness continuum concepts related to the care of the woman, gravida, newborn, and growing family. This course builds on knowledge developed in previous coursework. Concurrent enrollment in NURSE 4025 and NURSE 4030 is required.

NURSE 4025 Care of Women and Children Clinical: 2 semester hours
Prerequisites: Concurrent enrollment in NURSE 4020 and NURSE 4030. This clinical course focuses on the application of health and illness continuum concepts of the gravida, newborn, family, and child in relation to nursing care, in addition to women across the lifespan. This course builds on knowledge developed in previous coursework. Students will complete a pediatric-focused clinical of 45 hours and a maternal-focused clinical of 45 hours. Concurrent enrollment in NURSE 4020 and NURSE 4025 is required.

NURSE 4030 Concepts of Caring for Children and Families: 3 semester hours
Prerequisites: NURSE 3000, NURSE 3010, NURSE 3020, NURSE 3030, and NURSE 3050. This course focuses on the pediatric health and illness continuum with an emphasis on family dynamics, growth and development, and communication with children and their families. Nursing concepts include safety, community, cultural congruence, education, collaboration, environmental health, and ethics. Concurrent enrollment in NURSE 4020 and NURSE 4025 is required.

NURSE 4035 Nursing Care of Children: Infancy to Adolescence: 4 semester hours
Prerequisites: NURSE 3035, NURSE 3055. This course covers pediatric health promotion and disease management with an emphasis on integration of the concepts of communication and growth and development to provide primary, secondary, and tertiary levels of prevention for children and their families. Nursing care of pediatric patients experiencing acute and chronic illness are examined. Didactic and clinical components are included.

NURSE 4045 Nursing Care of the Childbearing Patient-Family System: 4 semester hours
Prerequisites: NURSE 3035, NURSE 3055. This course covers theoretical basis and clinical skills necessary to provide quality care to patient/family systems during the childbearing/child-rearing stages of life with an emphasis on family and system theories. Didactic and clinical components are included.

NURSE 4050 Concepts of Community Focused Care: 5 semester hours
Prerequisites: NURSE 3070, NURSE 4010, NURSE 4020, and NURSE 4030. This course includes a variety of experiences to prepare the student to assess the health care needs in diverse community settings and develop interventions to meet those needs. Student will complete 90 clinical hours. Concurrent enrollment in NURSE 4060 and NURSE 4065 is required.

NURSE 4060 Synthesis of Concepts in Professional Nursing: 4 semester hours
Prerequisites: NURSE 3070, NURSE 4010, NURSE 4020, and NURSE 4030. This course will focus on the synthesis of previous nursing concepts and general education courses with the goal of preparing the student for entry into professional nursing practice. Areas of study are selected from across the lifespan, including diverse populations in a variety of healthcare systems. This course builds upon knowledge developed in previous coursework. Concurrent enrollment in NURSE 4050 and NURSE 4065 is required.

NURSE 4065 Synthesis of Professional Practice Immersion Clinical: 4 semester hours
Prerequisites: Concurrent enrollment in NURSE 4050 and NURSE 4060. This clinical course includes a variety of experiences to prepare the student nurse to lead, coordinate, and manage client care in diverse healthcare settings. This course includes evidence-based strategies. Areas of practice are selected from across the lifespan, including diverse populations in a variety of healthcare systems. Students will complete 180 clinical hours. Concurrent enrollment in NURSE 4050 and NURSE 4060 is required.

NURSE 4075 Global Health Immersion: 3 semester hours
Prerequisite: Consent of instructor. This is an international healthcare trip that will include a full immersion experience into a foreign culture with emphasis on the analysis of healthcare systems and social determinants of health. Core coursework may include basic foreign language skills, a review of historical and cultural concepts relevant to the country, and application of medical/nursing treatment options. This course may be taken twice for credit.

NURSE 4105 Professional Nursing Leadership and Synthesis: 8 semester hours
Prerequisites: NURSE 3065, NURSE 3075, NURSE 4015, NURSE 4035, NURSE 4045. This course is a leadership practicum experience which reflects synthesis of cognitive and affective skills acquired in the Accelerated BSN program. Areas of study are selected from across the lifespan, including diverse populations in a variety of healthcare systems. Didactic and clinical components are included.

NURSE 4125 Community Nursing and Public Health: 5 semester hours
Prerequisites: NURSE 3065, NURSE 3075, NURSE 4015, NURSE 4035, NURSE 4045. This course is a synthesis of community and public health nursing that prepares students to apply, promote, and protect the health of patients, families, communities, and populations. Global perspectives on health equity, policy, and diversity are explored. Didactic and clinical components are included.

NURSE 4135 Evidence-Based Practice: Integration of Research in Professional Nursing: 2 semester hours
Prerequisites: Admission to the Accelerated BSN Program. This course is designed to provide a foundational theoretical review of evidence-based practice in the nursing profession. Students synthesize knowledge and skill from the natural and behavioral sciences, humanities, and nursing in order to understand the research process and its relevance in guiding nursing practice and improving patient care. Emphasis is placed on identifying and using research evidence in clinical decision making.
**NURSE 4300 Community Health Nursing: 4 semester hours**
Prerequisites: All 3000 level nursing courses. This course provides a conceptual foundation for nursing that recognizes the community as client in society. The course examines socioeconomic, environmental, epidemiological, and legislative influences, ethical/legal issues, and the impact of health beliefs and practices on health promotion and protection in communities and society. The student applies various theories and concepts when encountering families, groups and communities with diverse value systems and cultural backgrounds. Course includes classroom and clinical activities in a variety of settings.

**NURSE 4310 Senior Synthesis: 6 semester hours**
Prerequisites: All 3000 level nursing courses; NURSE 4300 and NURSE 3808 may be taken concurrently. This course integrates theory and practice from previous nursing and general education courses with the goal of preparing the student for entry into professional nursing practice. Within a seminar context, students explore a variety of clinical and professional nursing topics. The course includes research-based strategies utilized for health promotion and protection, health restoration, maintenance and support. Areas of study are selected from across the lifespan, including diverse populations in a variety of health care systems. Course includes classroom and clinical experiences in a variety of settings. Not for graduate credit.

**NURSE 4520 Population Focused Nursing: 2 semester hours**
Prerequisites: All 3300 level nursing courses, NURSE 3804, NURSE 3820. This course provides a conceptual foundation for nursing that recognizes populations in society. The course examines the effect of socioeconomic and environmental, epidemiological factors, and the impact of health beliefs and practices on health promotion and protection in populations. This course also focuses on epidemiological factors and legislative influences in diverse populations.

**NURSE 4521 Clinical Population Focused Nursing: 2 semester hours**
Prerequisites: NURSE 4520. This clinical course focuses on the nursing care of populations in various settings. The student applies population-based theories and concepts when encountering individuals, families, groups and populations with diverse value systems and cultural backgrounds.

**NURSE 4530 Leadership Development and Professional Nursing Practice: 4 semester hours**
Prerequisites: All 3300 level nursing courses, NURSE 3804, NURSE 3820. This course integrates theory and practice from previous nursing and general education courses with the goal of preparing the student for entry into professional nursing practice. Areas of study are selected from across the lifespan, including diverse populations in a variety of health care systems. Topics will include leadership, management theory and related skills, collaboration, delegation, coordination, and evaluation of outcome based interdisciplinary nursing practice.

**NURSE 4531 Clinical Leadership Development and Professional Nursing Practice: 4 semester hours**
Prerequisites: NURSE 4530. This clinical course includes a variety of experiences to prepare the student nurse to lead, coordinate, and manage client care in diverse health care settings. This course includes research-based strategies utilized for health promotion and protection, health restoration, maintenance, and support. Areas of study are selected from across the lifespan, including diverse populations in a variety of health care systems.

**NURSE 4720 Perioperative Nursing: 3 semester hours**
Prerequisite: Consent of the instructor. Provides experiences in preoperative, intraoperative, and postoperative settings. Includes a clinical component.

**NURSE 4730 Nursing Care at the End of Life: 3 semester hours**
Prerequisites for Nursing Students NURSE 3205 and NURSE 3214. All others by consent of instructor. This course focuses on the nursing care of terminally ill patients and their families. Topics explored will include the impact of personal values and beliefs about death, physiology of end stage disease processes, symptom assessment and management, psychosocial and spiritual support, consideration in special patient populations, societal issues and trends in end of life care, ethical considerations in caring for the dying patient, grief and bereavement processes, and the role nursing in end of life care across settings.

**NURSE 4741 Advanced Nursing Assessment and Management of Clients with Cardiac Dysrhythmias: 3 semester hours**
Prerequisite: Senior status. Focuses on advanced nursing assessment and management of clients with cardiac rhythm problems and conduction disturbances. Includes a clinical component.

**NURSE 4900 Ethics and Values in Population Health: 3 semester hours**
Prerequisites: Admission to the College of Nursing’s RN to BSN program. This course provides an introduction to the impact of values and ethical issues on professional nursing practice and population health. Emphasis is on values clarification, ethical theories and principles, ethical decision-making, and professional ethical standards. Ethical issues affecting nursing practice and the delivery of care will be explored.

**NURSE 4902 Ethics, Values, and Policy in Population Health: 6 semester hours**
Prerequisites: Admission to the College of Nursing’s RN to BSN Program and all 3000-level RN to BSN courses. This course provides an introduction to the impact of values, ethical issues and health policy on professional nursing practice and population health. Students will have the opportunity to analyze public policy’s influence on shaping healthcare. Ethical issues affecting nursing practice and patient care will be explored. The opportunity to identify vulnerable populations locally, nationally, and globally will be provided. Epidemiological, demographic, economic, and environmental health factors will be explored to identify community oriented strategies aimed to promote population health.

**NURSE 4905 Values in Professional Nursing: 3 semester hours**
Prerequisites: All 3000 level nursing courses; NURSE 4300 and NURSE 4310 Senior Synthesis; all 3000-level RN to BSN courses. This course provides an introduction to the impact of values and ethical issues on professional nursing practice and population health. Students will have the opportunity to analyze public policy’s influence on shaping healthcare. Ethical issues affecting nursing practice and patient care will be explored. The opportunity to identify vulnerable populations locally, nationally, and globally will be provided. Epidemiological, demographic, economic, and environmental health factors will be explored to identify community oriented strategies aimed to promote population health.

**NURSE 4910 Health Policy for the Professional Nurse: 3 semester hours**
Prerequisites: Admission to the College of Nursing’s RN to BSN Program. This course provides an introduction to the impact of values, ethical issues and health policy on professional nursing practice and population health. Students will have the opportunity to analyze public policy’s influence on shaping healthcare. Ethical issues affecting nursing practice and patient care will be explored. The opportunity to identify vulnerable populations locally, nationally, and globally will be provided. Epidemiological, demographic, economic, and environmental health factors will be explored to identify community oriented strategies aimed to promote population health.
NURSE 4911 Community and Population Health Synthesis: 6 semester hours
Prerequisites: Admission to the College of Nursing's RN to BSN Program and RN Licensure. This practicum course focuses on community-based application and synthesis of professional nursing roles and responsibilities across a continuum of health care settings, with selected populations determined to be at risk for a variety of health-related problems. Students integrate and apply curricular concepts such as health policy, epidemiology, health promotion strategies, and evidence-based practice in planning care for a select population. This is taken during the last semester of RN to BSN courses. This course consists of 4 semester hours of didactic and 2 semester hours of clinical.

NURSE 6075 Advanced Global Health Immersion: 3 semester hours
Prerequisites: Consent of the instructor and graduate standing. This is an international healthcare trip that will include a full immersion experience into a foreign culture with emphasis on the analysis of healthcare systems and social determinants of health. Core coursework may include basic foreign language skills, a review of historical and cultural concepts relevant to the country, and application of medical/nursing treatment options. This course may be taken twice for credit.

NURSE 6111 Healthcare Systems: 3 semester hours
Prerequisites: Graduate standing. This course introduces the historical development, current structure, and projected transformation of the U.S. healthcare system and provides the student with an understanding of the complex nature of the healthcare sector.

NURSE 6130 Research, Interventions and Evidence-Based Practice: 3 semester hours
Prerequisites: Consent of Program Director. This course provides opportunities to examine the processes and evaluation components of evidence-based practice, including the identification of significant clinical problems, evaluation of evidence underlying competing interventions, effectiveness of interventions, and implementation and evaluation of health promotion and therapeutic interventions that improve the quality of care or health outcomes for individuals, groups, and populations. Students will have opportunities to develop skills needed to critically analyze scientific literature foundational to implementing evidence-based practice projects.

NURSE 6322 Evaluation Strategies in Nursing: 3 semester hours
Prerequisites: NURSE 6309. This course provides students the opportunity to learn evaluation concepts, including testing and measurement in nursing education at the didactic, clinical, and programmatic levels. Content includes strategies to assess and evaluate learning in the cognitive, psychomotor and affective domains. Quality improvements, as well as legal and ethical considerations are explored. Key concepts include criterion and norm referenced theory and technique; reliability, validity, and the associated descriptive statistics; preparation of instrumental objectives for use in developing classroom tests and clinical nursing performance evaluations.

NURSE 6418 Organizational Behavior and Human Resource Management in Healthcare: 3 semester hours
Prerequisites: Graduate standing. This course applies theory and concepts from organizational behavior and human resources to the healthcare system as a framework for improving an organization's performance.

NURSE 6420 Healthcare Law and Regulation: 3 semester hours
Prerequisites: Consent of Program Director. This course introduces and examines a wide range of topics in the area of health law and regulation, and discusses how laws and regulations can promote or impede health and well-being. Students will explore concepts that inform healthcare policy, potential legal problems in various health care settings, issues and rights that are implicated, and the role of law in healthcare and policy. Students will identify issues and propose solutions or plans of action. The emphasis will be on formulating analyses of federal, state, and local law related to healthcare and public health. Specific topics will include the role that policy and law have played in areas such as tobacco regulation, managed care, healthcare reform, and laws utilized for emergency use of drugs and during public health emergencies.

NURSE 6424 Social Determinants of Health for Underserved Populations: 3 semester hours
Prerequisites: Graduate standing. This course examines the health and well-being of underserved populations through the lens of the social determinants of health. The course will explore responses to social factors that adversely influence vulnerability and health behaviors.

NURSE 6509 Role of the Clinical Nurse Specialist/Nurse Practitioner: 2 semester hours
Prerequisites: Admission to the Master's Program in the College of Nursing or consent of instructor. This course will focus on issues affecting the emerging roles of the nurse practitioner and clinical nurse specialist. It is designed to facilitate the role development of nurses who desire to function as primary care providers and/or as specialists within a specific clinical area of advanced nursing practice. Emphasis include sub-roles of advanced practice (leader, consultant, expert, researcher, educator), legal and professional issues, change theories, and standards of practice.

NURSE 6518 Pathophysiology for Advanced Nursing Practice: 3 semester hours
Prerequisites: Consent of Program Director. This course prepares the student to interpret changes in physiology that result in symptoms indicative of illness by a systematic examination of disease processes. The graduate student will compare and contrast differential diagnosis within physiological systems of sub-cellular and cellular origin, biochemical, and anatomical changes across the life span.
NURSE 6520 Pharmacology for Advanced Nursing Practice: 3 semester hours
Prerequisites: NURSE 6518 or consent of Program Director. This is a course in clinical pharmacotherapeutics that builds on prior knowledge of drug classifications, actions, interactions, and adverse drug reactions. The major focus of the course is the pharmacotherapeutic use of medications for primary healthcare management by advanced practice nurses. Emphasis is placed on clinical critical thinking processes used to prescribe drugs in the management of specific illnesses. The laws and regulations for advanced practice nurse prescriptive authority will be addressed. Emphases include pharmacodynamics, pharmacokinetics, pharmacotherapeutics, health-related information, medication compliance, and issues that pertain to the prescribing of medications in advanced nursing practice.

NURSE 6521 Healthcare Finance: 3 semester hours
Prerequisites: Graduate Admission. This course analyzes various financial sectors of the healthcare system. Analyses of the financial and economic structures for providers, health insurance organizations, pharmaceutical industries, not-for-profit, and federally-funded clinics will occur.

NURSE 6524 Health Assessment for Advanced Nursing Practice: 3 semester hours
Prerequisite: NURSE 6518 or consent of Program Director. This course provides a systematic approach to advanced physical assessment as well as psychological, sociocultural, developmental, and spiritual assessment of individuals across the life span. This course builds upon basic health assessment knowledge and skills, laboratory work interpretation, validation, documentation, and analysis of assessment findings. This course includes mandatory didactic and clinical experiences.

NURSE 6527 Patient Safety, Performance Improvement, and Compliance: 3 semester hours
Prerequisites: Graduate standing. This course covers the key principles of patient safety, performance improvement, and compliance. The epidemiology of healthcare error, distinguishing safety from quality, and understanding the policy environment for patient safety will be examined. Strategies to enhance patient safety, evaluation of performance improvement activities, and the management for the risk of error will be addressed.

NURSE 6530 Clinical Diagnostics for Advanced Nursing Practice: 3 semester hours
Prerequisites: Consent of Program Director. This course provides an introduction to the interpretation and appropriate use of diagnostic measures for advanced practice nurses in primary care settings. Special attention is paid to laboratory, radiographic and diagnostic testing. In addition, clinical opportunities will be provided to gain clinical interventional skills for advanced practice nursing.

NURSE 6660 Introduction to Health Systems Management, and Policy for Underserved: 3 semester hours
Prerequisites: Consent of Program Director. This course provides a comprehensive survey of the U.S. health care system, healthcare policy, integrative care practice models, and management principles useful in primary care settings dedicated to underserved populations. Selected topics include health behaviors, health maintenance and the management of primary healthcare in underserved populations, access to mental health care and substance abuse treatment, the U.S. healthcare system (both public and private sectors), the legal and ethical bases for caring for the underserved, the public policy-making process, and management principles of strategic planning, marketing, and project management in clinics serving the underserved. The analysis of community health indicators, health disparities, and healthcare trends impacting underserved populations will be incorporated into a community based experience.

NURSE 6721 Foundations of Psychiatric Mental Health: 3 semester hours
Prerequisites: NURSE 6518, NURSE 6520, NURSE 6524. This course provides a foundation for students to assume advanced practice nursing roles in health promotion, disease prevention, diagnosis, and management of psychiatric health and mental illness across the lifespan and within the family context. A foundation for an integrative practice, including psychiatric interviewing, psychotherapy, neurobiology, and psychopharmacology for the management of psychiatric conditions will be developed.

NURSE 6722 Foundations of Adolescent and Geriatric Health: 3 semester hours
Prerequisites: NURSE 6518, NURSE 6520, NURSE 6524. This course provides a foundation for students to assume an advanced practice nursing role in the care of adolescent and geriatric populations. Therapeutic strategies to address adolescent and geriatric health promotion, preventative care and the most common health conditions managed in these populations in primary care practice will be developed.

NURSE 6723 Foundations of Pediatric Health: 3 semester hours
Prerequisites: NURSE 6518, NURSE 6520, NURSE 6524. This course provides a foundation for students to assume advanced practice nursing roles in health promotion, disease prevention, diagnosis and management of health and illness in newborn, infant, child and adolescent populations within the family context. Therapeutic strategies about pediatric preventive care, behavioral health, common pediatric office-based procedures, pediatric prescribing practices, and the most common health problems managed in pediatric primary care will be developed.

NURSE 6724 Foundations of Women’s Health: 3 semester hours
Prerequisites: NURSE 6518, NURSE 6520, NURSE 6524. This course provides a foundation for students to assume an advanced practice nursing role in health promotion, disease prevention, diagnosis, and management of common conditions affecting women across the lifespan. Emphasis is placed on clinical assessment and decision making related to primary care management of reproductive growth and development, common acute and chronic primary health conditions, and behavioral health in gender-related populations.

NURSE 6730 Nursing Administrative Leadership in Healthcare I: 3 semester hours
Prerequisites: NURSE 6418, NURSE 6526, NURSE 6527. This course focuses on enhancing administrative practice skills through analysis of concepts appropriate to a variety of nursing and health care delivery systems. The focus will be on developing skills needed for nursing and health care administrative leadership practice in complex health care systems in the core domain of knowledge of the healthcare environment.

NURSE 6731 Nursing Administrative Leadership in Healthcare II: 3 semester hours
Prerequisites: NURSE 6418, NURSE 6526, NURSE 6527. This course focuses on enhancing administrative practice skills through analysis of concepts appropriate to a variety of nursing and health care delivery systems. The focus will be on developing skills needed for nursing and health care administrative leadership practice in complex health care systems in the core domains of communication and relationship building, leadership, professionalism, and business skills and principles for healthcare.
NURSE 6737 Psychiatric Mental Health I: 4 semester hours  
Prerequisites: NURSE 6721. This course develops the advanced practice nursing role in caring for individuals with a mental health disorder, across the lifespan and within the family context. Strategies for the assessment, diagnosis and holistic management of common mental health disorders will be developed.

NURSE 6738 Psychiatric Mental Health II: 4 semester hours  
Prerequisites: NURSE 6737. This course investigates the role of the psychiatric health mental nurse practitioner in the restoration and promotion of mental health. Strategies into the assessment, diagnosis and holistic management of individuals with complex mental health needs, including the application of advanced prescribing practices, psychotherapeutic care, and maintenance of overall healthcare needs will be developed.

NURSE 6739 Adult Health I: 4 semester hours  
Prerequisites: NURSE 6722 or NURSE 6723. This course prepares students to assume an advanced practice nursing role when caring for adults across the lifespan within a family context. Strategies for the assessment, diagnosis, and holistic management of common acute, chronic, and behavioral health conditions addressed in a primary care setting for adults will be developed.

NURSE 6740 Adult Health II: 4 semester hours  
Prerequisites: NURSE 6739. This course prepares students to assume an advanced practice nursing role in caring for adults across the lifespan within a family context. Strategies for the assessment, diagnosis, and holistic management of common acute, chronic, and reproductive health conditions addressed in a primary care setting will be developed.

NURSE 6741 Family Health I: Diagnosis and Management of Advanced Practice Nursing: 4-5 semester hours  
Prerequisites: NURSE 6518, NURSE 6520, NURSE 6524 or consent of the Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of individuals and families across the lifespan. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

NURSE 6742 Family Health II: Diagnosis and Management in Advanced Practice Nursing: 4-5 semester hours  
Prerequisites: NURSE 6741 or consent of Program Director. This course builds upon the advanced practice foundational courses of pathophysiology, pharmacology and advanced physical assessment to prepare students to assume roles in the advanced nursing care of individuals and families across the lifespan. Emphasis is placed on clinical assessment and decision-making in the provision of direct patient care within a defined scope of practice. Students will synthesize prior learning and apply primary prevention strategies into the diagnosis and holistic management of common acute, chronic and mental health problems in this population.

NURSE 6743 Pediatric Health I: Acute and Chronic Care: 4 semester hours  
Prerequisites: NURSE 6723. This course prepares students for the advanced practice nursing role when caring for infants, children, and the adolescent populations within the family context. Strategies for the assessment, diagnosis and holistic management of common episodic complaints and chronic condition management in the pediatric primary and acute care settings will be developed.

NURSE 6744 Pediatric Health II: Comprehensive Primary Care: 4 semester hours  
Prerequisites: NURSE 6743. This course prepares students for the role of the advanced practice nurse in the pediatric primary care setting and in the promotion of child health. Strategies for the assessment, diagnosis and holistic management of children with complex health needs in providing effective health promotion and health care services will be developed.

NURSE 6745 Pediatric Health II: Complex Acute Care: 4 semester hours  
Prerequisites: NURSE 6743. This course prepares students for the role of the pediatric nurse practitioner in restoring a child’s health when complex illness or injury occurs in the acute care setting. Strategies into the assessment, diagnosis and holistic management of children with complex health needs will be developed.

NURSE 6746 Women’s Health I: 4 semester hours  
Prerequisites: NURSE 6724. This course prepares students to assume roles in the advanced nursing care of women considering related gender issues across the lifespan with an emphasis on common acute and chronic gynecologic conditions. Strategies for the diagnosis and holistic management of common acute and chronic gynecologic health problems in gender-related populations will be developed.

NURSE 6747 Women’s Health II: 4 semester hours  
Prerequisites: NURSE 6746. This course prepares students to assume roles in the advanced nursing care of women with an emphasis on reproductive healthcare. Strategies for the diagnosis and holistic management of complex reproductive health conditions including preconception, obstetrical, and postpartum care as well as family planning and infertility will be developed.

NURSE 6748 Neonatal Nursing I: 3 semester hours  
Prerequisites: NURSE 6525, NURSE 6528, NURSE 6517, or consent of instructor; NURSE 6749 may be taken concurrently. The first of two courses that integrate the physiologic, pharmacologic, and assessment skills and principles in determining appropriate care of the ill neonate. Current research and evidenced-based practices are used as the course framework. The effects of critical conditions on the growth and development of the neonate, including subsequent chronic health problems as well as the short and long term consequences to the child's family are emphasized. Disorders of the central nervous, pulmonary, and cardiovascular systems will be discussed. The use of specific interventions and diagnostic procedures are demonstrated and applied in laboratory/clinical settings during forty hours of required clinical activities.

NURSE 6750 Acute Child Health I: Diagnosis and Management in Advanced Practice Nursing: 4 semester hours  
Prerequisites: NURSE 6529 or consent of the Program Director. This is the first of two courses in which the management of complex acute, critical, and chronically ill patients for urgent and emergent conditions is explored. The focus is on alterations in pathophysiology, advanced assessment, diagnosis, and collaborative management of infants, children and adolescents with selected episodic/chronic health problems in acute/critical care.

NURSE 6751 Acute Child Health II: Diagnosis and Management in Advanced Practice Nursing: 4 semester hours  
Prerequisites: NURSE 6750. This is the second of two courses which builds upon prior acute care pediatric content and focuses on critical complex and end of life care. The emphasis is on evidenced based strategies to stabilize the patient’s condition, assess the risk for and prevent complications, and restore maximum health and/or provide palliative care in the context of the patient's developmental, physical and psychosocial environment.
**NURSE 6870 Special Topics in Advanced Practice Nursing: 1-4 semester hours**
Prerequisites: Consent of instructor. Explore special topics for the advanced practice nurse in the areas of research, theory, education and administration. No more than three hours shall be applied toward the degree. This course is for graduate MSN or PhD levels.

**NURSE 6875 Special Study in Graduate Nursing: 1-3 semester hours**
Prerequisites: Admission to MSN program or consent of instructor. In-depth study of selected topics in nursing under the guidance of a specific instructor. No more than three hours may be applied to the master's program of study.

**NURSE 6934 Leadership in Population Health and Healthcare Systems Residency I: 2-4 semester hours**
Prerequisites: Consent of the instructor and graduate standing. This clinical course is designed to provide a theoretical and practical base for leadership development in population health and community health and organizational management. Emphasis is placed on clinical assessment and decision-making in the populations and community-level interventions to change health outcomes. The student is expected to clinically apply the concepts and theories discussed in class that address health disparities in underserved populations, infectious diseases, and community-level responses to chronic conditions. Clinical experiences are designed to enhance assessment and technical skills.

**NURSE 6935 Leadership in Population Health and Healthcare Systems Residency II: 2-4 semester hours**
Prerequisites: Consent of the instructor and graduate standing. This clinical course provides continued precepted experiences that allow students to develop the nurse practitioner role and clinical competencies within their specific emphasis area. Students integrate theory and clinical competencies to provide preventative care, health promotion, health education and evidence-based care for acute, chronic and mental health conditions for individuals and families.

**NURSE 6951 Advanced Intensive Clinical for the Nurse Educator: 2 semester hours**
Prerequisites: NURSE 6520, NURSE 6524, NURSE 6309. This course provides a concentrated opportunity to function in an advanced nursing role as a nurse educator incorporating an intensive clinical experience focusing on the student's chosen population.

**NURSE 6952 Synthesis Practicum: 3 semester hours**
Prerequisites: All required courses in the Nurse Educator or Nursing Leadership of Health Systems option or consent of instructor. This clinical course is a concentrated opportunity to function in an advanced nursing role as a nurse administrator, integrating clinical and functional role activities within a chosen setting. Emphasis includes educator or administrator nursing practice, functional role responsibilities, and activities with emphasis on their relationship to client outcomes.

**NURSE 6954 Advanced Practice Nursing: Residency I: 2-4 semester hours**
Prerequisites: NURSE 6738, NURSE 6740, NURSE 6742, NURSE 6744 or NURSE 6747. This clinical course provides precepted experiences that allow students to continue to develop the nurse practitioner role and clinical competencies within their specific emphasis area. Students integrate theory and clinical competencies to provide preventative care, health promotion, health education and evidence-based care for acute, chronic and mental health conditions for individuals and families.

**NURSE 6955 Advanced Practice Nursing: Residency II: 2-4 semester hours**
Prerequisites: NURSE 6954. This clinical course provides a continuation of precepted experiences that allow students to develop the nurse practitioner role and clinical competencies within their specific emphasis area. Students integrate theory and clinical competencies to provide preventative care, health promotion, health education and evidence-based care for acute, chronic and mental health conditions for individuals and families.

**NURSE 7200 State of the Science in Nursing Research and Practice: 3 semester hours**
Prerequisites: Consent of Program Director. This course examines the state of scientific knowledge in nursing research and practice. Gaps in the nursing research and practice are identified. Interrelationships between nursing science and scientific developments in other disciplines from the perspectives of health outcomes, population health indices, and policy implications of scientific progress are analyzed. Advances in biophysiological, psychosocial, sociocultural, health systems, and health economics research and the implications for translation to improve nursing science and practice are analyzed.

**NURSE 7209 Advanced Nursing Roles and the Role of the DNP: 3 semester hours**
Prerequisites: Consent of Program Director. This course provides students with the opportunity to synthesize and analyze knowledge of the advanced nursing role and the DNP role within a specified population focus and role. The overview of selected theories and frameworks that can be used to guide advanced practice nurses and nursing leaders in facilitating the use of evidence-based practice, understanding cultural aspects of care, and framing situational awareness. Emphasis includes sub-roles of the doctorally-prepared nurse including Advance Practice Registered Nurse (APRN), leader, consultant, expert, researcher, and educator.

**NURSE 7211 Biostatistics I: 3 semester hours**
Prerequisites: Consent of Program Director. This course provides a foundational understanding of the use of biostatistics in conducting research. Types of data, data description, logic of sampling and test statistics, hypothesis testing, type 1 and type 2 errors, covariates and confounding variables, and clinical versus statistical significance are included. Opportunities will be provided to gain skills conducting statistical analysis using SPSS, interpreting the results of analytic processes, and applying the results to common health and illness examples encountered in research publications.

**NURSE 7212 Biostatistics II: 3 semester hours**
Prerequisites: NURSE 7211 or permission of the instructor. This course emphasizes applications of inferential statistics including analysis of variance, simple and multiple linear and logistic regression models, tests of mediation and moderation, and repeated measures and an introduction to longitudinal analyses. The analytic methods and applications will be framed within the health science research field with emphases placed on designing and conducting studies and appropriate analyses using the techniques described above.
NURSE 7213 Biostatistics III - Structural Equation Modeling: 3 semester hours
Prerequisites: NURSE 7211 Biostatistics I (or its equivalent), NURSE 7212 Biostatistics II (or its equivalent). This course serves as an introduction to structural equation modeling (SEM). The overall objective is to develop a solid conceptual and theoretical understanding and ability to use SEM and its extensions correctly and effectively in independent research. Topics include factor analysis, path analysis, and basic principles of model building. Applications and extensions of SEM, such as scale construction and validation, mediation and moderation, multi-group analyses, and latent growth modeling are also included. Students will have the opportunity to work on projects tailored to their research interests and needs.

NURSE 7215 Evidence-Based Practice For the DNP: 3 semester hours
Prerequisites: NURSE 6130. This course examines the state of clinical inquiry and the implementation of evidence into practice. The relationship between clinical questions and the critical appraisal and synthesis of research and literature is explored. Models for implementing and sustaining change based on the evidence are examined.

NURSE 7220 Leadership in Practice: 3 semester hours
Prerequisites: Consent of Program Director. This course provides students with the opportunity to develop and refine critical leadership skills by focusing on improving the health of individuals and populations. The course uses a combination of didactic lectures, case-based learning and experiential exercises to explore leadership competencies including change management, strategy implementation, quality improvement, effective communication, team dynamics, and systems thinking. Emphasis is on using models and theories that facilitate inter-professional collaboration to achieve optimal health outcomes. The focus is effective communication and leadership methods necessary to establish successful inter-professional teams. Students will enhance skills in verbal, written and electronic communication; team leadership; and creating and sustaining health related initiatives. Through advanced understanding of the inter-professional dimension of healthcare, students will facilitate collaboration and remove barriers to providing safe, timely, effective, efficient, equitable and patient centered care in healthcare systems.

NURSE 7230 Epidemiology: 3 semester hours
Prerequisite: NURSE 7211 or Consent of Program Director. This course covers epidemiology, logistic modeling, and public health surveillance in primary healthcare. It provides an introduction into investigation of outbreaks. The course will enable the healthcare professional to develop a knowledge base to address issues of health and illness of a population.

NURSE 7240 Health Informatics: 3 semester hours
Prerequisites: Consent of the Program Director. This course explores information systems and computer technologies that can improve the health of individuals, families, communities, and populations by optimizing information management and communication. Focus areas include the electronic medical record, technologies to improve patient safety, standards for privacy and security, tele-health systems to improve healthcare access to underserved populations, use of web-enhanced technologies for research translation, and strategies to provide data for decision making and evidence-based databases. Emphasis is placed on developing competence in technology use for the purpose of program evaluation, establishing healthcare quality, and improving healthcare delivery to diverse populations in complex healthcare settings.

NURSE 7251 Healthcare Economics: 3 semester hours
Prerequisites: Consent of Program Director. This course introduces the student to the basic economic concepts and analytical methods used to understand, analyze, and evaluate economic aspects across various sectors of the healthcare system including clinics, underserved and rural populations, the role of government in the delivery of healthcare services, and the economic aspects of healthcare reform. The course applies tools of analysis to the behavior of households, healthcare providers, health insurance organizations, pharmaceutical industries, and not-for-profit and federally-funded clinics.

NURSE 7260 Program Evaluation and Quality Management in Healthcare: 3 semester hours
Prerequisites: None. This course introduces students to the principles and procedures for assessing the quality and effectiveness of programs, projects, and materials related to planned interventions and systems changes in health settings. An overview is provided of past and current strategies to define and assess the quality of healthcare delivery using tools required to examine, evaluate, and implement the key structures and processes of quality improvement programs in healthcare organizations. Practical applications that prepare the participants to use the theory and techniques of quality improvement in situations with complex clinical and managerial implications will be incorporated.

NURSE 7291 DNP Capstone I: 2 semester hours
Prerequisites: NURSE 7215. This course provides opportunities for development of practice expertise into a systems-level approach to create change in a targeted population within a healthcare or related environment. Students will develop their clinical scholarship project proposal.

NURSE 7292 DNP Capstone II: 2 semester hours
Prerequisites: NURSE 7291. This course provides opportunities to develop strategies to create change in a targeted population and complex healthcare environments. Students will implement evidence-based, clinical scholarship projects to improve health outcomes.

NURSE 7293 DNP Capstone III: 2 semester hours
Prerequisites: Consent of Program Director. This experience provides additional opportunities for the development of practice expertise to create change in a targeted population and complex healthcare environments. Students will develop skills to assess and diagnose healthcare systems and identify evidence-based strategies to improve health outcomes. This experience includes immersion in their population-focused scholarly project.

NURSE 7299 DNP Seminar: 1-3 semester hours
Prerequisites: All DNP required course work or Consent of Instructor. This seminar provides students with the opportunity to synthesize and analyze knowledge within the context of the emerging DNP role. Analysis of practice issues may include reflective practice, collaboration, health systems technology, ethics and policy.

NURSE 7300 Prevention of Injury and Disability: 3 semester hours
Prerequisites: Graduate status or consent of instructor. This course will examine trends in injury and disability nationally and internationally, relevant theories and conceptual models, the definition and measurement of key concepts, and analysis of interventions proposed for preventing injury and mitigating disability. The role of information and computer technologies in the management of disability will also be considered. Specific content will include age-related injury and disability, disability associated with cardiovascular and other chronic diseases, and the psychosocial contexts of disability, including traumatic stress and its outcomes.
NURSE 7403 Development of the Nurse Scientist: 3 semester hours
Prerequisite: Admission to doctoral study in nursing. This course addresses the role of the PhD-prepared nurse as scientist, leader, academician, and policy maker. Students will analyze strategies for lifelong learning and development as nurse scientists and will explore avenues for building their programs of scholarship, funding opportunities, and contributing to nursing science in policy and clinical practice. Students will examine ways to collaborate effectively in order to improve health care and health outcomes.

NURSE 7443 Healthcare Policy and Economics: 3 semester hours
Prerequisites: Graduate admission. This course introduces the student to economic and healthcare policy concepts using analytical methods to understand and evaluate the impact across various sectors of the healthcare system. The historical context of healthcare policy is explored.

NURSE 7481 Development of Nursing Science and Theory: 3 semester hours
Prerequisite: Admission to PhD Program. This course focuses on the discipline of nursing, including the evolution of the state of scientific inquiry and knowledge development in nursing. The course includes the aims of nursing science, the nature of nursing knowledge and scientific theories, and a discussion of relationships among theory, research, method, and practice. Students engage in constructive dialogue as they begin to conceptualize nursing phenomena in their area of interest.

NURSE 7488 Introduction to Qualitative Research Methodologies and Methods: 3 semester hours
Prerequisites: Admission to PhD program. This course introduces qualitative research methodologies and methods useful to healthcare and related sciences. Emphasis is placed on theoretical and philosophical perspectives, selection of appropriate methodologies, data collection and analysis methods, and critique. An overview of traditional and emerging designs, strengths and limitations of various methodologies, and ethical concerns will be addressed.

NURSE 7490 Advanced Nursing Research Designs and Methods: 3 semester hours
Prerequisite: Admission to the PhD program. This course focuses on development of the research plan including issues in sampling, design, and implementation nursing research. Students will evaluate research methods to answer research questions in their area of interest. Content includes design and analysis issues affecting validity, examination of measurement techniques for assessing validity, reliability, structure of data collection instruments, and criteria for instrument selection. A research proposal will be prepared.

NURSE 7491 Advanced Nursing Theory Development and Validation: 3 semester hours
Prerequisite: Admission to PhD program. This course focuses on a systematic study of contemporary nursing science and related theories in knowledge development, and the application of theory construction and validation strategies to specific nursing phenomena of interest. Students create and critically examine theoretical frameworks and models, with emphasis placed on constructing and testing theoretical statements.

NURSE 7495 Mixed Methods Research in Health Care: 3 semester hours
Prerequisites: NURSE 7490, NURSE 7488; or consent of the instructor. Emphasis will be on merging methods and addressing epistemological and paradigmatic issues. The value and use of the mixed methods approach, philosophical assumptions, types of designs, and approaches to designing and conducting mixed methods research in health care related disciplines will be emphasized.

NURSE 7496 Seminar in Advanced Qualitative Research Methods: 3 semester hours
Prerequisites: NURSE 7488 or consent of the instructor. This course is designed to engage nurse researchers in the applied collection and analysis of qualitative data and the dissemination of qualitative findings. This course explores congruent systematic analyses/interpretations based upon a variety of philosophical and/or theoretical stances, which could include phenomenology, hermeneutics, ethnography, grounded theory, case study, participatory action research, critical theory or other post-colonial and feminist approaches, textual analysis, aesthetic inquiry and others. Dissemination of findings will be emphasized as well as issues related to data management, rigor, and funding of qualitative proposals. Contemporary approaches to multiple methodology studies and innovative designs will be addressed. Students will be encouraged to practically engage in a methodology of choice in depth.

NURSE 7497 Design, Implementation and Evaluation of Health Interventions: 3 semester hours
Prerequisites: NURSE 7490 or consent of the instructor. This course focuses on developing skills in designing, delivering, and evaluating evidence-based health interventions that integrate relevant theoretical, research, social determinants, and biobehavioral variables with salient cultural variables for targeted groups. The course includes the application of research skills and empirical foundation for advanced research intervention design and evaluation related to a local area of research interest.

NURSE 7498 Doctoral Seminar: 1-12 semester hours
Prerequisite: Consent of instructor. Presentation and discussion of pertinent methodological and clinical issues related to doctoral research.

NURSE 7499 Dissertation Research: 1-12 semester hours
Prerequisite: All required course work; successful completion of comprehensive examination. Investigation of an advanced nature culminating in successful defense of dissertation. Continuous registration is required.

NURSE 7529 Special Topics in Qualitative Systematic Reviews: 3 semester hours
Prerequisites: NURSE 7488 or equivalent. This course examines and carries out elements of qualitative systematic reviews, such as topic/problem identification, data collection, and analysis. Students will gain an understanding of how to limit threats to validity and maximize generalizability.

NURSE 7530 Community Health and Infrastructure Assessment: 3 semester hours
Prerequisites: Consent of the instructor and graduate standing. This course will introduce community health assessment and community infrastructure assessment. Participants will be introduced to the information and the resources available to secure and improve resilience in the community’s healthcare and public health infrastructure. Participants will also be given an opportunity to work on a community-based health assessment project in conjunction with a community partner. Much of the experience will be practical and hands-on. Participants may be asked to work with a new project or join in an ongoing project.

NURSE 7870 Special Topics in Scientific Foundations of Research: 1-3 semester hours
Prerequisites: Consent of the instructor and graduate standing. Explore special topics related to PhD dissertation. This course can be a cognate, elective, or for students who are enrolling in one of the shared courses available through the UM-funded CARMA initiative (Collaborations for Advanced Research Methods and Analysis).
NURSE 7934 Leadership in Population Health and Healthcare Systems Residency III: 2-4 semester hours
Prerequisites: Consent of the instructor and graduate standing. This clinical course provides continued precepted experiences that allow students to develop the leadership and population-focused role and clinical competencies within their specific emphasis area. Students integrate theory and clinical competencies to population preventative care, healthcare, health promotion, health education, health systems leadership, policy, and evidence-based care populations.

NURSE 7954 Advanced Practice Nursing: Residency III: 2-4 semester hours
Prerequisites: NURSE 6955; may be taken concurrently with DNP Capstone. This clinical course provides continued precepted experiences that allow students to develop the leadership and population-focused role and clinical competencies within their specific emphasis area. Students integrate theory and clinical competencies to population preventative care, healthcare, health promotion, health education, health systems leadership, policy, and evidence-based care populations.

NURSE 7955 Research Topics in Nursing and Health: Psychometrics: 3 semester hours
Prerequisites: Admission to the College of Nursing PhD Program. This course focuses on theoretical foundations of measurement, item construction, instrument design, item analysis, validity and reliability assessment. Basic methodologies and techniques for constructing, testing, and evaluating instruments will be discussed. This course is for students who are enrolling in one of the shared courses available through the UM-funded CARMA initiative (Collaborations for Advanced Research Methods and Analysis).

NURSE 7956 Participatory Approaches for Health and Health Systems: 3 semester hours
Prerequisites: Admission to the College of Nursing PhD Program. This course will focus on the use of participatory approaches for the design of health and health-system interventions. This course is for students who are enrolling in one of the shared courses available through the UM-funded CARMA initiative (Collaborations for Advanced Research Methods and Analysis).

NURSE 7957 Research Topics in Nursing and Health: Hierarchical Linear Modeling: 3 semester hours
Prerequisites: Admission to the College of Nursing PhD Program. This course is an extension of regression methods to situations where data has multiple layers of meaningful structure. It emphasizes ability to specify, evaluate, and estimate a multilevel model using SPSS and HLM. This course is for students who are enrolling in one of the shared courses available through the UM-funded CARMA initiative (Collaborations for Advanced Research Methods and Analysis).

NURSE 7958 Comparative Effectiveness Research: 3 semester hours
Prerequisites: Admission to the College of Nursing PhD Program. This course provides evidence on the benefits and harms of treatment and prevention strategies, for which patients they work best, under which circumstances, and at what time. This advanced quantitative methods class presents a framework for analyzing observational studies and randomized trials for comparativeness effectiveness. This course is for students who are enrolling in one of the shared courses available through the UM-funded CARMA initiative (Collaborations for Advanced Research Methods and Analysis).

NURSE 7959 Research Topics in Nursing & Health: Structural Equation Modeling: 3 semester hours
Prerequisites: Admission to the College of Nursing PhD Program. This course focuses on factor analysis, path analysis, basic principles of model building, as well as applications and extensions of SEM such as scale construction and validation, mediation and moderation, multi-group analyses, and latent growth modeling. This course is for students who are enrolling in one of the shared courses available through the UM-funded CARMA initiative (Collaborations for Advanced Research Methods and Analysis).
College of Optometry

This section contains an abbreviated version of the College of Optometry Bulletin. Some information is omitted.

For the most complete and accurate information regarding the Optometry program at UMSL, please go to the College of Optometry Home Page.

General Information

The UMSL College of Optometry enrolled its first class in 1980, graduating 32 students in May 1984. The College is located on the South Campus complex of the University of Missouri-St Louis at 7800 Natural Bridge Road. A five-story building houses the College’s classrooms, laboratories, research facilities, administrative offices, and the Center for Eye Care campus facility (the University Eye Center).

The College of Optometry is a member of the Association of Schools and Colleges of Optometry (ASCO) and is accredited by the Accreditation Council on Optometry Education (ACOE).

The Doctor of Optometry (O.D.) Degree

A student who satisfactorily completes all four years of the professional curriculum will be eligible to receive the Doctor of Optometry degree. The training and clinical experience optometry students receive at UMSL qualifies graduates to practice optometry in any state in the nation.

Center for Eye Care

The Center for Eye Care provides a patient care environment for upper level optometry students and postdoctoral residents. The Center for Eye Care includes three locations: the University Eye Center on the UMSL South Campus, the Lindell Eye Center in the Central West End of the city of St. Louis, and the East St. Louis Eye Center on the campus of East St. Louis Community College Center. These and other affiliated health centers in the St. Louis area provide an instructional setting where student interns are exposed to a wide variety of patients under the direct supervision of College of Optometry faculty. Equally important is that these Centers provide exemplary, comprehensive and state-of-the-art eye and vision care to their patients.

The Centers provide a full range of optometric services including adult primary eye care, contact lens, pediatrics, binocular vision, low vision, and eye health management. Specialized testing of color vision and electrophysiology are also available.

Situated in Missouri’s largest metropolitan area, the College of Optometry enjoys the region’s strong community and professional support. The urban setting offers many opportunities for outreach programs, expanding the scope of optometric education and making possible a highly diverse program of clinical training. Another asset of the College is its proximity to the national headquarters of the American Optometric Association, located just a few miles from campus.

The curriculum leading to the doctor of optometry degree is a four-year, full-time program of study. The first year of the professional curriculum emphasizes basic and biomedical sciences and introduces students to optics of the visual system. The second year pertains to vision science and instruction in clinical examination techniques. The third year emphasizes patient care and introduces the student to specialty areas within optometry, such as contact lenses, pediatrics and geriatric vision care, binocular vision and vision therapy, and low vision rehabilitation. The second and third years also include course work and clinical instruction in ocular disease and pharmacology. The fourth year includes six rotations through the externship program, giving the student added experience in the management of eye diseases, as well as valuable experience in other optometric clinical specialties.

Fourth-Year Externship Program

In addition to the patient care experiences available through the University Eye Center, Lindell Eye Center, the East St. Louis Center, the College of Optometry also has a diverse Externship Program. Students must receive approval from the faculty and Director of the 4th Year Clinical Experience for assignments to each Externship site. This program allows fourth-year students to spend a portion of their final year of training in a variety of patient care environments (i.e., military bases, Veterans Administration Hospitals, Indian Health Services Hospitals, various specialty practices and private practices).

These six (6), eight (8) week externships are selected and scheduled with consideration given to the individual student’s interest, needs and future practice intentions. Externship Rotations are located throughout the United States and select international sites. In this program, students leave the academic environment and begin working with selected eye care professionals while continuing to be monitored by the faculty through bi-weekly reports of patient encounters, therapies, and activities. The externship rotations are designed to give students exposure in the following areas:

- Pediatric/Binocular Vision Patient Care
- Contact Lens Patient Care
- Low Vision Patient Care
- General (Primary Optometric) Patient Care
- Refractive Management Patient Care
- Eye Health Management Patient Care
- Geriatric Patient Care
- Sports Vision Patient Care
- Optometric Rehabilitation Patient Care

Student Organizations & Activities

All optometry students enrolled in the University of Missouri-St. Louis College of Optometry are eligible for membership in the various student optometric associations, including The Missouri Optometric Student Association (MOSA) and The American Optometric Student Association (AOSA). Through these organizations, and many others, students become involved in local and national optometric activities. The organizations provide an environment for the cultivation of professional leadership skills, and members have organized and participated in a variety of community service activities, including community health screenings and vision care to residents of nursing homes, convalescent hospitals, and mental institutions. Furthermore, optometry students have formed local chapters of Student Volunteer Optometric Services to Humanity (SVOSH), an international organization of optometrists providing free vision care to people in impoverished nations, and the National Optometric Student Association (NOSA), which strives to recruit minority students into optometry and encourages retention of minority students.

In addition to the many activities through the College of Optometry, optometry students are able to take advantage of all the activities provided by the university to the entire university community. These include intramural sports, movies and cultural activities, a new and fully-equipped
fitness center, and access to many social and cultural opportunities in St. Louis at reduced cost.

Pre-Optometry Programs

The University of Missouri-St. Louis offers a four-year program of study leading to the doctor of optometry degree; this professional degree is administered by the College of Optometry. It is one of only 23 accredited programs in the United States and the only one in the state of Missouri. This program, as a result, makes UMSL an ideal institution for pre-optometry education. Various programs are available for pre-optometry as noted below.

Students may pursue a traditional 4 + 4 program, which is a bachelor's degree followed by the four-year graduate optometry program. In this case, students may pursue any bachelor's degree, as long as the pre-optometry requirements are met in biology, chemistry, mathematics, physics, psychology and English.

Alternatively, the Department of Arts and Sciences, sponsors a 3+4 Programs for the UMSL College of Optometry, for which a student may be admitted to the College of Optometry after completing three years (90 semester hours) of study in their respective majors and successful completion of the Optometry Admission Test (OAT). For more information, please contact the Pre-Health Advisor in the Marcus Allen Advising Center in the College of Arts and Sciences via email: artscience@umsl.edu or by phone: 314-516-5501 for specific requirements. You can also visit the Pre-Health Advising Website for additional information at: http://www.umsl.edu/divisions/artscience/student-resources/prehealth/index.html.

The Pierre Laclede Honors College and the College of Optometry also offer the Scholars Program, which allows a student to complete both the undergraduate and doctor of optometry degrees in seven years. To qualify for this program, a student must be a senior in high school; score a minimum composite of 27 on the ACT; and be accepted to the UMSL Pierre Laclede Honors College program. For more information about the Scholars Program, contact the Pierre Laclede Honors College, (314) 516-7769.

For the programs described above (Scholars or 3+4), the undergraduate degree is granted when the student satisfactorily completes the first year of the professional program and has met all of the conditions for the specific undergraduate degree for which the student has applied.

In exceptional circumstances, students with exemplary qualifications may be admitted to the optometry program without a degree.

Admission Requirements

- Semester:
  - English - 2
  - Biology (including laboratory)\(^1\) - 3
  - Physics (including laboratory) - 2
  - Chemistry\(^2\)
    - General (including laboratory) - 2
    - Organic (including laboratory) - 1
  - Calculus - 1
  - Statistics - 1
  - Psychology - 1
  - Liberal Arts - 2

- Quarter:
  - English - 3
  - Biology (including laboratory)\(^1\) - 4
  - Physics (including laboratory) - 3
  - Chemistry\(^2\)
    - General (including laboratory) - 3
    - Organic (including laboratory) - 2
  - Calculus - 1
  - Statistics - 1
  - Psychology - 1
  - Liberal Arts - 2

\(^1\) One semester (or one quarter) of Microbiology with laboratory is a requirement. One semester of Anatomy or Physiology is strongly recommended.

\(^2\) One semester of Biochemistry, Cell Biology or Human/Comparative Physiology is strongly recommended.

The College of Optometry uses a rolling admissions process. All courses used to satisfy the admission requirements must have been taken at an institution fully accredited by one of the Department of Education regional accreditation bodies. Specific prerequisite courses must be taken for a letter grade; they cannot be taken as an audit or on a pass/fail or satisfactory/unsatisfactory basis. Applicants must have completed 90 semester or 135 quarter hours (the equivalent of three years of college education) before the start of classes. The applicant cannot apply more than 60 semester hours or 90 quarter hours which were earned at a two year institution toward the credit-hour requirement. Applicants holding a bachelor's degree will be given preference over applicants with similar academic credentials who do not have a degree. Applicants to the college come from a variety of undergraduate backgrounds, such as biological sciences, chemistry, psychology, education, and business.

Advanced Placement Credit (AP) Policy (effective July 1, 2014)

A total of 10 hours of AP credit is acceptable if the applicant scored 4 or greater in the subject on the AP Exam. An official transcript is required.

For science courses, in addition to the 10 hour limit and a score of 4 or higher achieved on the exam, the applicant must score a 330 or higher in relevant subject areas of the OAT exam.

Admission Test

Students should work with their undergraduate advisors as well as their academic advisor in optometry, to insure that all pre-requisite courses are taken prior to taking the Optometry Admission Test (OAT).

The Optometry Admission Test (OAT) is the preferred qualifying exam that determines an applicant's eligibility for an interview. Beginning with applicants applying July 1, 2019 the college will also consider test scores from the Dental Admissions Test (DAT), Medical College Admissions Test (MCAT), and the Pharmacy College Admissions test (PCAT). Please contact the College of Optometry’s office of admissions for more information regarding the acceptance of these exams. Official test scores from qualifying exams are valid for up to three years from the testing date. Students should plan to take the OAT after completing courses that are tested on the exams. Typically students should plan to take the exam during the summer between the third and fourth year of their undergraduate program.
Applicants are encouraged to take the examination by June of the year of application to the College of Optometry. If applicants wish to enhance their scores, the examination may be repeated. For OAT information, contact:

Optometry Admission Testing Program
211 East Chicago Ave.
Suite 1846
Chicago, IL 60611
(312) 440-2693
http://www.opted.org

To apply to take the OAT, please click on the OAT link on www.opted.org (on right).

Application Procedures
The OptomCAS application opens on July 1 for the class entering the following year. An applicant's file will be considered complete and ready for consideration by the Admission Committee when the following material has been received:

*Asterisked items are processed by Centralized Application Service:
- *Verified Centralized Application Service (OptomCAS) application
- *Supplemental Application through UMSL including a $50.00 non-refundable application fee
- *Three letters of recommendation including one from a practicing optometrist processed through OptomCAS
- *Official scores from qualifying examination (OAT)

Please send directly to OptomCAS:
- *Official high school and college transcripts, followed by updated transcripts as they become available. (Exception: graduates of international programs see deadline requirement for all transcripts).

Official transcripts must be submitted to OptomCAS and must be mailed or electronically sent through a secure transcript processing service such as the National Clearinghouse, etc. Transcripts must be sent from every college attended regardless of whether courses appear on your current institution transcript. AP Scores should not be sent to OptomCAS.

Letters of recommendation must be submitted by the originator through a direct link provided by OptomCAS. It is the applicant's responsibility to ensure all application materials are received by the Centralized Application Service center by April 1 to be considered for admission to the class entering in August of the same year. Application material received after April 1 will not be evaluated for the class entering in August of the same year. To insure that all materials will be processed in time, we strongly encourage students to complete his/her OptomCAS application and insure all transcripts and letters of recommendation are received at OptomCAS at least four weeks prior to the April 1 deadline. To be considered for merit scholarships, there is an early application deadline. All materials must be received by January 15 in order to be considered for the early application deadline. Applications received after that time will still be considered for admission but not for additional awards, e.g. merit scholarships, state seat contracts.

International Students
International students whose native language is not English and who have spent less than two of the last three years in an English-speaking country are required to submit scores from an internationally accepted standardized examination before a decision is made on admission.

To complete their credential file, applicants are required to furnish original and official transcripts the year prior to admission from each school and college attended both in the U.S. and abroad. All international transcripts must be evaluated by The Educational Credentials Evaluators, Inc. or the World Education Services and these evaluations should be sent directly to the UMSL. International transcripts should not be sent to OptomCAS.

For information contact:

Educational Credentials Evaluators, Inc.
Post Office Box 514070
Milwaukee, WI 53203-3470
(414) 289-3400
Fax: (414) 289-3411
Email: eval@ece.org
Web site: https://www.ece.org

World Education Services
P.O. Box 5087
New York, N.Y. 10274-5087
(212) 966-6311
Fax: (212) 939-6100
Email: info@wes.org

The University of Missouri-St. Louis maintains an Office of International Student Services to assist applicants who have been offered admission. All new international students are required to attend a formal orientation program before matriculation. For more information, contact:

University of Missouri-St. Louis
Office of International Student Services
One University Blvd.
St. Louis, MO 63121-4499
(314) 516-5229
Email: iss@umsl.edu

Selection Procedures
Applications are reviewed beginning after July 1 of the year prior to matriculation with interviews starting in August. The college uses a ‘rolling admissions’ process that allows qualified applicants to be admitted on an ongoing basis until the class is filled. Therefore, applicants are encouraged to apply as early as possible to ensure full consideration for admission.

The Admissions Committee has the responsibility to review and evaluate all applicants and select the best qualified candidates. The committee considers: cumulative GPA, science GPA, and OAT scores. Candidates are also evaluated on less quantitative measures such as extracurricular activities and interests, related or unrelated work experience, essay, and letters of recommendation.

Those applicants whom the committee finds to be most competitive will be invited for an on-campus interview. The on-campus interview facilitates an assessment of the applicant’s communication skills, interests, motivation, and personal characteristics. In addition, the on-campus interview allows the applicant to tour the facilities, meet with currently enrolled students, and learn more about the University of Missouri-St. Louis and the College of Optometry. From this group of interviewed applicants, the entering class of 46-48 students, plus any alternate positions, will be selected.
Once an offer of admission is made to an applicant, the applicant will be contacted by OptomCAS to complete a criminal background check. We encourage applicants to review the criteria for background check on the OptomCAS website. www.optomcas.org

The policies of the University of Missouri-St. Louis and the College of Optometry comply with the provisions under those laws that forbid discrimination on the basis of race, color, religion, sex, sexual orientation, national origin, age, disability or veteran status.

Admission Process

Notices of acceptance may be received as late as July of the year in which the students enter the program. Individuals on the alternate list may be contacted at a later date. If acceptance to the class is conditional, the terms of the condition must be completed prior to matriculation. Applicants who have indicated that degree requirements will be completed prior to matriculation, and who have been selected for admission, may receive a conditional offer of acceptance contingent upon completion of the degree and any outstanding prerequisites.

Students offered admission have 20 days from the date on the offer of admission letter to make a required $500 seat deposit. The $500 deposit will be credited toward tuition when the student matriculates. If the student withdraws from consideration prior to May 15th, $250 will be refunded. After May 15th, no refunds will be given. There is a $250 administrative fee.

A certain number of applicants are placed on an alternate list. If an applicant who has been offered admission declines the offer, their position will be allocated to the next individual on the alternate list.

Notification of denial is sent by mail and/or email. Applicants who do not receive an offer of admission may reapply the following year through OptomCAS.

Financial Aid

The University of Missouri-St. Louis maintains an Office of Student Financial Aid to assist students with the cost of their education.

Financial assistance is available in the form of loans, scholarships, and work-study. Funds for these programs are available from federal, private, state, and institutional resources. To apply for financial aid, students must complete a Free Application for Federal Student Aid (FAFSA). Preference will be given to those students who have completed the FAFSA by March 1. Preference means that the Student Financial Aid Office will begin awarding FWS (Federal College Work-Study), and maximum government allowable funding under subsidized loans. A completed financial aid application means that the Financial Aid Office has received an official Student Aid Report from the Federal Processing Center. Information about Federal loan programs and FAFSA are available at www.fafsa.ed.gov.

To be considered for all university scholarships offered through the Financial Aid Office, a student must be accepted for admission.

Many state optometric associations and their auxiliaries offer scholarships and grants. Application is generally made directly to the state association or auxiliary and selection is generally made on the basis of state residence and other criteria. Information may be obtained by writing to the various state optometric associations and/or auxiliaries.

The College of Optometry provides additional information about scholarships via the Handbook of Loans, Scholarships, Grants, and Awards once an offer for admission is accepted. Many of the scholarships are listed on the College Website.

Fees

Detailed information regarding current fees and residency regulations is furnished on the UMSL Cashier's website.

The university reserves the right to change fees and other charges at any time without advance notice.

Education Fees

All students enrolled in the University must pay educational fees based on either the schedule for Missouri residents or the schedule for non-residents. All optometry students will be required to pay the non-resident educational fee if they do not meet the University of Missouri residency requirements at the time of enrollment.

For current fees and costs, please check the fee section of the Cashier's Website and be certain to select appropriately optometry resident / nonresident.

A Summer Session is required following the second and third professional year.

Other Required Fees

All students are required to pay the following fees each semester:
Information Technology Fee; Student Facility, Activity, and Health Fee. In addition, the University Eye Center fee is applied to the fall and spring semesters. Please refer to the Fees Section of the Cashier's website for current fees and caps on fees.

Student Health Insurance (optional)

An Accident and Sickness Insurance plan is available to students and their dependents. Information concerning premiums and coverage is available upon request from University Health Services or call (314) 516-5671.

Nonresident Students

Optometry students who do not meet the residency requirements must pay the nonresident educational fee according to the schedule above. A definition of ‘residency’ is outlined in Tuition and Residency Rules, available in the cashier's office. (314-516-5151) Students are responsible for registering under the proper residence and paying the proper educational fees.

Twelve positions (average of three each year) are allocated by state reciprocal agreement with the State of Kansas for residents of Kansas. Individuals who are admitted under these agreements will pay reduced non-resident fees. To apply for this award, applicants must be certified as a bonafide Kansas resident and meet financial need (FAFSA). Additionally, Kansas residents accepting a seat are required to return to Kansas to practice following graduation or completion of a residency program. For additional information, contact:

Four-Year Professional Degree (O.D.)
Curriculum

Curricular Outcomes
Entry Level Practice Standards

Doctors of Optometry must have an established knowledge of the basic and clinical sciences in order to provide quality eye and vision care to their patients. The academic foundation must be broad and include the biological, medical, vision and optical sciences, as well as a basic understanding of the health care delivery system. A doctor of Optometry must recognize the dynamic nature of knowledge and possess the commitment and skills needed to responsibly assess and apply new information and treatment strategies throughout their career.

The UMSL College of Optometry shall ensure that before graduation each student will effectively utilize and demonstrate a working knowledge in patient care with each of the following areas:

I. PATIENT HISTORY
1. the basic elements of a comprehensive patient history
2. the ability to obtain an efficient patient history necessary for a problem oriented examination
3. the proper standard of recording patient history in EHR
4. the ability to relate patient history to examination findings

II. OPTOMETRIC KNOWLEDGE
5. basic body systems, with special emphasis on the ocular and visual system and their interrelationships to the body as a whole;
6. the impact of genes and their interaction with behavior, diet and the environment on human health;
7. the various processes and causes that lead to dysfunction and disease and the effect that these processes can have on the body and its major organ systems, with special emphasis on the ocular and visual systems;
8. the mechanisms of actions of the various classes of pharmaceutical agents, including injectable agents, and their interactions;
9. the structures and processes contributing to the development of refractive error and other optical or perceptual abnormalities of the visual system;
10. the optics of the eye and ophthalmic lens systems - including spectacles, contact lenses, and low vision devices;
11. principles of the effects of radiant energy on the eye, including environmental lighting and ophthalmic lasers

III. PATIENT CARE
12. ophthalmic lens systems used to correct refractive, oculomotor and other vision disorders;
13. visual development and vision function with respect to deviation and enhancement of conditions such as, but not limited to, strabismus, amblyopia, ocular motility, accommodation, vergence and visual perception;
14. vision therapy and other rehabilitative methods used for the management of common visual disorders;
15. the detection, diagnosis, treatment and management of ocular disease and ocular manifestations of systemic disease;
16. the safe and effective use of pharmaceutical agents for the treatment of disease and conditions affecting the eye and visual system, and recognize adverse reactions;
17. the strategies, interventions, and support system to best meet the unique needs of each patient regardless of age, taking into account co-existing medical conditions, medications, dietary needs, family issues, and social concerns
18. the utilization of injectable agents for the management of ocular and systemic diseases
19. the concepts of refractive surgery and its management;
20. basic life support skills for prevention and response to life-threatening emergencies;
21. the use of ophthalmic lasers in the management of refractive error and other anomalies of the eye;
22. the use of evidence from well designed and conducted research in healthcare decision-making

IV. CLINICAL SKILLS
23. the importance of performing necessary examination techniques competently and efficiently
24. the capacity to adapt the administration of clinical tests to meet the needs of the patient
25. the obligation to maintain clinical skills through practice and repetition

V. RECORD KEEPING
26. the significance of proper documentation in the electronic health record
27. the proper use of abbreviations
28. the appropriate notation of clinical observations

VI. INTERPERSONAL AND COMMUNICATION SKILLS
29. the critical elements of verbal and written communications with patients and other health care professionals;
30. the psychosocial dynamics of the doctor/patient relationship;
31. the need for clear, accurate and appropriate documentation of patient encounters;
32. the manner in which people of diverse cultures and belief systems perceive human health and illness and respond to various symptoms, diseases and treatments;

VII. INTRA/INTER PROFESSIONAL CONSULTATION/PRACTICE
33. when there is a requirement for intra/inter professional consultation
34. the process of coordination among professionals involved in a patient’s care

VIII. PROFESSIONALISM

35. the need for a commitment to uphold the ethical obligations of the Optometric Oath;

36. the specific duties and responsibilities toward the individuals they serve and toward society as a whole;

37. the provisions to guarantee patient privacy and medical record security as expressed by HIPAA regulations;

38. inter-professional values, related ethics and relationships among the professions;

IX. SYSTEMS-BASED PRACTICE

39. the practice management structure and strategies as they pertain to different practice settings;

40. the broad-based, multidisciplinary nature of the health care delivery system;

41. the role of the optometrist as a primary health care provider;

X. PRACTICE-BASED LEARNING

42. the conscientious use of current best practices in patient care decision making;

43. the necessity for a commitment to lifelong learning;

44. the information management systems and technology used in the delivery of eye and health care.

Grades

All courses taken for credit in the professional program must be passed with a 'C-' or better in order for a student to qualify for graduation. The College of Optometry does not recognize a "D" grade for courses taken for degree credit; and for a student enrolled in a patient care course. Therefore, any grades lower than a "C-" will be recorded as an "F" and have 0 grade points. Furthermore, in order to qualify for graduation, a student must be in good academic standing and the cumulative professional Grade Point Average (GPA) must be 2.50 or higher. Students must submit evidence to the Office of Student Services that they have taken the 3 part NBEO examinations prior to graduation. Such evidence may include a copy of the score report received from NBEO.

To assure graduating at the end of a specific semester, all work for that semester and any delayed grades from previous semesters must be completed with the grades sent to the Office of Student Services no later than the official date for submission of final semester grades.

Time limitations

All of the required courses during the first six (6) semesters of first course enrollment and all required courses for the O.D. degree must be completed within six (6) years after the first course enrollment.

Continuing Education

The College of Optometry offers continuing education programs for optometrists throughout the Midwest region as well as nationwide. Courses on nutrition, management of ocular diseases, ocular anomalies, and visual skills are held on a frequent basis. In addition to College of Optometry faculty, optometric specialists, medical educators, and researchers have input into course development as well as participation in course presentations. All CE courses offered by the college are COPE approved and accepted by those states requiring continuing education credit for re-licensure.

Continuing Education course information may be obtained by contacting:

University of Missouri-St. Louis College of Optometry
Educational Program Coordinator
One University Blvd., 331 Marillac Hall
St. Louis, MO 63121-4499
(314) 516-5615

Career Outlook

Doctor of Optometry Degree

According to the American Optometric Association, Doctors of Optometry (OD's) are the independent primary health care professionals for the eye. Optometrists examine, diagnose, treat, and manage diseases, injuries, and disorders of the visual system, the eye, and associated structures as well as identify related systemic conditions affecting the eye.

- Doctors of Optometry prescribe medications, low vision rehabilitation, vision therapy, spectacle lenses, contact lenses, and perform certain surgical procedures.
- Optometrists counsel their patients regarding surgical and non-surgical options that meet their visual needs related to their occupations, avocations, and lifestyle.
- An optometrist has completed pre-professional undergraduate education in a college or university and four years of professional education at a college of optometry, leading to the doctor of optometry (O.D.) degree. Some optometrist's complete an optional residency in a specific area of practice.
- Optometrists are eye health care professionals state-licensed to diagnose and treat diseases and disorders of the eye and visual system.

--Approved by the AOA Board of Trustees, 2012

As primary eye care providers, Doctors of Optometry are an integral part of the health care team and an entry point into the health care system. They are skilled in the co-management of care that affects the eye health and vision of their patients and an excellent source of referral to other health care professionals.

The scope of optometric practice requires an understanding of the development and maintenance of vision from infancy through adulthood, and the therapeutic and rehabilitative methods required to care for eye and vision abnormalities that affect people of any age.

Optometry is the largest eye care profession and one of the largest independent health care professions in the United States. Currently, some 34,000 Doctors of Optometry practice in America. They are widely distributed across the nation, practicing in more than 7,100 different municipalities. In more than 4,300 of these communities, they are the only primary care provider. As such, Doctors of Optometry provide the major portion of primary eye care services in the United States.
Studies have indicated that a ratio of one practicing Doctor of Optometry to every 7,000 people (a ratio of 14.3 practicing doctors of optometry per 100,000 populations) is a reasonable average for the United States. Despite recent growth in the profession, few states meet this criterion.

As our society becomes more technically oriented, vision requirements become more exacting. The number of persons needing professional help for reading and other near-point visual tasks, and computer usage among all people including young children, is steadily growing. Increased demands for vision care result not only from population growth but also from increased understanding of how quality vision relates to industrial production, student achievement, adjustments to aging, and other areas crucial to modern society.

As a result the patients have more varied and challenging needs. On any given day, a Doctor of Optometry could be involved in restoring functional vision to a partially sighted patient; fitting glasses for a child whose vision problem is affecting academic achievement; treating an eye infection with antibiotics; improving the function of a patient’s eyes through vision training; helping an elderly patient in a nursing home cope with changing vision through critical eye health education; co-managing eye or systemic health problems with a physician specialist; and performing comprehensive eye examinations for those who need glasses or contact lenses to correct astigmatism, nearsightedness, and numerous other vision problems.

The practice of optometry offers independence, flexibility, and diversity. Doctors of Optometry have a wide range of modes of practice. They may choose to practice in the inner cities, suburbs, and rural areas. Opportunities exist for solo practice, associateship, optometric or multidisciplinary group practice, government or military service, clinical or hospital practice, teaching, and research.

Optometry is a rewarding career, both economically and personally. Based on data from the Bureau of Labor Statistics and surveys by professional associations, optometry is one of the top 10 income-earning professions in the country.

Courses

**OPTOM 8010 Anatomy, Physiology and Disease Processes I: 5 semester hours**
This course is the first in a two-semester course sequence that will detail the general anatomy of the human body along with the histology (microanatomy), physiology and disease processes of major organ systems, the course content will be presented in a modular format. Areas of discussion will include cardiovascular, respiratory, endocrine, digestive, reproductive, integumentary and peripheral and autonomic nervous systems. The laboratories will emphasize and augment important concepts introduced in the classroom environment.

**OPTOM 8020 Basic and Clinical Optics I: 4 semester hours**
Prerequisites: Consent of instructor. The principles of geometrical optics as applied to refracting and reflecting surfaces, thin lenses, thick lenses, and lens systems. The optics of various ophthalmic instruments and techniques will be examined.

**OPTOM 8030 Introduction to Optometry: 1 semester hour**
An introduction to the profession of optometry, including a consideration of the characteristics of a profession, the behaviors and attitudes of a professional, the history of optometry, the profession’s legal basis, the major optometric organizations and sources and types of information available to optometrists. One hour of lecture per week.

**OPTOM 8040 Neuroanatomy: 4 semester hours**
Prerequisites: Consent of instructor. Detailed gross and microscopic anatomy of human central nervous system with a special emphasis on the cranial nerves, nuclei, and the visual system.

**OPTOM 8050 Basic and Applied Immunology: 2 semester hours**
This course will address the basic concepts of immunology including innate and adaptive immune responses. Mechanisms of hypersensitivity reactions and applications of immunology to ocular and systemic disease, transplantation, and treatment or prevention of cancer are included. Students must be concurrently enrolled in OPTOM 8010.

**OPTOM 8060 Biochemistry: 2 semester hours**
Basic concepts of general and cellular biochemistry. Study of nomenclature, structure, and reactions of organic molecules. Some emphasis on visual system - tears, intraocular fluids, lens, and photochemistry.

**OPTOM 8080 Clinical Optometry I: 2 semester hours**
Introduction to ocular assessment including case history and entrance examination procedures and theory.

**OPTOM 8090 Case Based Discovery for the Developing Clinician: 1 semester hour**
Students acquire curricular competencies appropriate for the professional year in which they are enrolled via in depth individual and group discovery via case based presentations. The experience will provide students the opportunity to assimilate and recognize the relationships among diverse topics emphasized within the optometric curriculum. Participants work in groups of no more than 10.

**OPTOM 8110 Anatomy, Physiology and Disease Processes II: 4 semester hours**
Prerequisites: OPTOM 8010, OPTOM 8060. Continuation of OPTOM 8010 Anatomy, Physiology and Disease Processes I.

**OPTOM 8120 Basic and Clinical Optics II: 5 semester hours**
Prerequisite: OPTOM 8020. Radiometry and photometry, polarization, scattering, emmetropia, myopia, hyperopia, astigmatism, models of experimental myopia, accommodation, diffraction, retinal image size, entoptic phenomena, aberrations, lasers and the eye, apertures, and optical instruments.

**OPTOM 8160 Anatomy and Physiology of the Eye: 5 semester hours**
Prerequisites: OPTOM 8040, OPTOM 8010 or consent of instructor. Vegetative anatomy and physiology of the eye, optic nerve, orbit, and adnexa will be discussed. This includes discussion of embryology and the dynamics of ocular fluids. Four lecture hours and a two-hour laboratory per week.

**OPTOM 8180 Clinical Optometry II: 5 semester hours**
Prerequisites: OPTOM 8080. Continuation of Clinical Optometry I. Patient care instruction including entrance examination procedures, refraction, opthalmoscopy and biomicroscopy.

**OPTOM 8190 Introduction to Clinical Diagnostic Reasoning: 1 semester hour**
Prerequisite: OPTOM 8090. Introduction to clinical diagnostic reasoning by individual and group case-based learning. Scenarios give students an understanding of the relationship between basic and clinical sciences and provide an introduction to established best practices.

**OPTOM 8220 Ophthalmic Optics: 4 semester hours**
Prerequisites: OPTOM 8120. Ophthalmic materials, physical characteristics of lenses and frames, paraxial optics of ophthalmic lenses, ophthalmic prisms, lens specifications, special lenses, multifocal lenses, unique designs, aniseikonic lenses, aberration theory and its application to lens design, lenses for low vision, protective eyewear.
OPTOM 8230 Interpersonal Communications: 1 semester hour
Prerequisites: OPTOM 8030. This course covers the principles of human interpersonal relationships. The enhancement of listening and verbal skills will be provided. Emphasis will be on preparing the student to understand and manage the many human interpersonal relationships necessary in the practice of optometry.

OPTOM 8240 Ocular Motility: 2 semester hours
Prerequisites: OPTOM 8040 or consent of instructor. The anatomy, physiology, neurology, measurement, characteristic, and control of the intra- and extraocular system.

OPTOM 8250 Monocular Sensory Processes: 5 semester hours
Prerequisite: OPTOM 8160 or consent of instructor. Monocular sensory processes of vision: phototransduction, visual neurophysiology, spatial and temporal vision, acuity, light adaptation and discrimination, color, motion, objects and attention. Sensory processes are considered from both the psychophysical aspects and neurophysiological bases, including the changes during development, adulthood and aging. Four hours of lecture and two hours of laboratory per week.

OPTOM 8260 General and Ocular Pharmacology: 4 semester hours
Prerequisites: OPTOM 8110, OPTOM 8160, OPTOM 8080, OPTOM 8180. This course establishes an understanding of both systemic and ocular pharmacology focusing on mechanisms of action, drug interactions within the body, and drug interactions with other medications. Attention is given to clinical cases relevant to optometric practice and a broad overview of general and ocular pharmacology as a whole.

OPTOM 8280 Clinical Optometry III: 4 semester hours
Prerequisites: OPTOM 8080 and OPTOM 8180. Continuation of clinical optometry. Patient care in the areas of refraction, binocular integration, perimetry, and biomicroscopy.

OPTOM 8320 Ophthalmic Dispensing: 1 semester hour
Prerequisites: OPTOM 8220. Clinical experience in verification and dispensing of ophthalmic materials.

OPTOM 8340 Binocular Vision and Space Perception: 4 semester hours
Prerequisites: OPTOM 8240, OPTOM 8280 and OPTOM 8250 or consent of instructor. Binocular vision and space perception. Visual direction, theory of correspondence, fusion, rivalry, ocular dominance, and stereopsis. Developmental aspects and neurophysiological mechanisms.

OPTOM 8370 Foundations of Ocular and Systemic Disease and Management I: 5 semester hours
Prerequisite: OPTOM 8260. The first in the series of courses that address diseases of the eye, clinical diagnoses, and optometric and medical management of ocular and systemic disease. The laboratories emphasize diagnostic techniques and treatment skills, preparation for the initial clinic privileging examination and augment important concepts introduced in the classroom environment.

OPTOM 8380 Clinical Optometry IV: 2 semester hours
Prerequisites: OPTOM 8280. Continuation of Clinical Optometry III. Diagnosis, prognosis and management of visual problems. Emphasis on conducting comprehensive eye exams in preparation for the initial clinical privileging examination.

OPTOM 8390 Specialty Clinic Laboratory: 1 semester hour
Prerequisite: OPTOM 8280. Students acquire and practice skills for pediatric, binocular vision, low vision, and contact lens examinations. The course format is one 2-hour laboratory per week.

OPTOM 8391 Clinical Topics in Contact Lenses: 1 semester hour
Prerequisite: OPTOM 8280. This is the first in a series of 3 courses addressing contact lenses. The focus is on contact lens care and evaluation. The course format is one 50-minute lecture per week.

OPTOM 8392 Clinical Topics in Binocular Vision and Pediatric Optometry: 1 semester hour
Prerequisite: OPTOM 8240 and OPTOM 8280. This course presents clinical diagnostic and management skills for both pediatric patients and those with binocular vision anomalies. The course format is lecture.

OPTOM 8393 Clinical Topics in Low Vision: 1 semester hour
Prerequisite: OPTOM 8280. This course presents clinical diagnostic and management skills for patients with low vision. the course format is one 50-minute lecture per week.

OPTOM 8400 Directed Readings: 1-3 semester hours
Prerequisite: Consent of Instructor. Credit is given for independent literature review of a specific topic in any area of basic or clinical vision science guided by a full time faculty member with appropriate interests. Credit is awarded upon approval of a written paper regarding the selected topic. This elective may be repeated up to a total of 3 credit hours.

OPTOM 8410 Directed Research: 1-3 semester hours
Prerequisite: Consent of Instructor. Credit is given for independent research. Projects may be laboratory, library, or clinically based research in any area of vision science. Projects will be supervised by one or more full time faculty members. This elective may be repeated up to a total of 6 credit hours.

OPTOM 8450 Introduction to Primary Care Clinic: 4 semester hours
Prerequisites: OPTOM 8230, OPTOM 8320, OPTOM 8340, OPTOM 8370, OPTOM 8380, OPTOM 8390, OPTOM 8391, OPTOM 8392, OPTOM 8393, OPTOM 8560, and successful completion of the Clinical Proficiency Examination. The first in a series of adult primary care courses. Students perform comprehensive examinations, make diagnoses, and develop management plans with patient education under supervision of a faculty attending. Students participate in accompanying clinic seminar discussion groups.

OPTOM 8460 Foundations of Ocular and Systemic Disease and Management III: 2 semester hours
Prerequisites: OPTOM 8370. The third course in the foundation series that addresses ocular and systemic diseases and their management.

OPTOM 8480 Pharmaceutical Management in Patient Care: 2 semester hours
Prerequisites: OPTOM 8260; OPTOM 8370; OPTOM 8460. This course will discuss the clinician's responsibility in the treatment and management of ocular conditions and systemic complications of pharmaceutical use. Principles of ocular pharmacology in regards to specific management and treatment of ocular disease, trauma, and surgery by systemic, local, and topical therapy. In addition, simulated case studies are used to illustrate the basic and subtle clinical aspects of treating patients using pharmaceutical agents.

OPTOM 8500 Primary Care Clinic I: 6 semester hours
Prerequisites: OPTOM 8450. Continuation of Introduction to Primary Care Clinic. Weekly clinic seminar will supplement clinical experience with discussion of medical billing and coding, pharmacology, and patient case discussion and review.
OPTOM 8520 Contact Lenses I: 3 semester hours
Prerequisites: OPTOM 8380 and OPTOM 8391. Historical development of the contact lens and its use. Basic lens terminology, specifications, physicochemical characteristics, optics, fabrication, and verification.

OPTOM 8540 Binocular Vision Anomalies: 4 semester hours
Prerequisites: OPTOM 8340, OPTOM 8380 and OPTOM 8392 or consent of instructor. The etiology, epidemiology, symptoms, signs, and course sequelae of the obstacles to binocular vision-sensory, integrative, and motor. The detection, diagnosis, prognosis, and orthoptic treatment of such anomalies. Clinical care of aniseikonias.

OPTOM 8550 Low Vision: 2 semester hours
Prerequisite: OPTOM 8380 and OPTOM 8393. The etiology, epidemiology, symptoms, signs, course, and sequelae of low vision problems. Methods of testing, prognosis, selection of therapy, design of environmental and optical aids, problems of rehabilitation. Agencies, laws, public and social assistance for the partially sighted and blind. The course format is lecture and 1 two-hour laboratory per week.

OPTOM 8560 Epidemiology and Public Health: 2 semester hours
The essentials of epidemiological study procedures and a discussion of the epidemiology of vision disorders are discussed. The course reviews descriptive statistics, probability sampling, correlation, and prediction. The public health component includes a review of local, state, and federal organizations involved in health care, comprehensive health planning, new trends in health care delivery, and the assessment of the quality of health care delivery.

OPTOM 8570 Advanced Topics in Ocular and Systemic Disease and Management: 6 semester hours
Prerequisite: OPTOM 8370. The third semester of a comprehensive, systems based course sequence. Advanced topics in diagnoses as well as optometric and medical management of ocular and systemic disease will be discussed. The laboratories will emphasize and augment important concepts introduced in the classroom environment.

OPTOM 8600 Primary Care Clinic II: 6 semester hours
Prerequisites: OPTOM 8500, OPTOM 8520, OPTOM 8540, OPTOM 8550, OPTOM 8570, and OPTOM 8650. The final course in the adult primary care sequence. Students examine and care for patients under supervision of a faculty attending. Students are expected to function nearly independently in final preparation for the Externship Program.

OPTOM 8620 Contact Lenses II: 2 semester hours
Prerequisites: OPTOM 8520. Advanced contact lens fitting, theories, and clinical methods for astigmatic, presbyopic, keratoconic, and aphanic designs. Special considerations include the use of corneal topography, orthokeratology, disposable lenses, lenses for extended wear and lenses for color deficiencies. The course format is one lecture per week.

OPTOM 8630 Practice Management I: 3 semester hours
Prerequisites: OPTOM 8030 and OPTOM 8230. The development and management of an optometric practice from a patient and community service point of view - office design, office routine, patient care administration, personnel management, recall systems and the establishment, development and management of an optometric practice from a business point of view - legal developments, governmental regulations, legislation and the legislative process, malpractice, professional ethics, taxes, fee structures, insurance and accounting methods.

OPTOM 8640 Pediatric Optometry: 2 semester hours
Prerequisites: OPTOM 8380 and OPTOM 8540. Special examination and management considerations of the pediatric patient. Psychological, physiological, social, and demographic aspects of early visual development. Discussion of the optometric considerations of children with learning and reading disabilities. The course format is two lecture/discussions per week.

OPTOM 8645 Neurologic Disorders of the Eye and Visual System: 2 semester hours
Prerequisites: OPTOM 8570. Diagnosis, management and treatment of selected neurologic disorders of the eye and visual system. Emphasis is on diagnostic imaging of the visual system, diagnosis of central and peripheral disorders of eye movements, space occupying lesions, acquired brain injury, and optic nerve disease.

OPTOM 8650 Geriatric Optometry: 2 semester hours
Prerequisite: OPTOM 8380. Special examination and management considerations of the geriatric patient will be discussed. Psychological, physiological, social, and demographic aspects of aging, as well as ocular changes associated with the aging process will be taught.

OPTOM 8660 Contact Lens Specialty Clinic: 1 semester hour
Prerequisites: OPTOM 8391. The clinical examination and care of patients in the optometric specialty area of contact lenses.

OPTOM 8670 Comprehensive Case Review and analysis: 1 semester hour
Prerequisites: Enrollment in OPTOM 8500 or OPTOM 8600. Discussion of the diagnosis and management of common clinic patient encounters via Socratic teaching techniques. Interns are encouraged to present actual cases which have been particularly challenging for them. The course format is a weekly seminar.

OPTOM 8680 Ophthalmic Lasers: 2 semester hours
Prerequisites: OPTOM 8570. This course will review the principles and applications of lasers for the anterior segment. Topics will include the principles, physics, laser tissue interactions and safety concerns for ophthalmic lasers. The indications, contraindications and potential complications of lasers used for open angle glaucoma, closed angle glaucoma and posterior capsulotomy will be reviewed. In addition, the course will review epiluminescence microscopy, minor surgical procedures, suture techniques, office emergencies including anaphylaxis, chalazion management and radiofrequency surgery. An overview of the anatomy of eyelids, post-operative wound care, complications of surgical procedures, surgical instruments, asepsis and OSHA will be provided. The medicolegal aspects of anterior segment procedures will be discussed. Co-Management of patients who have corneal refractive surgery will also be covered.

OPTOM 8690 Pediatric/Binocular Vision Specialty Clinic: 1 semester hour
Prerequisites: OPTOM 8392. The clinical examination and care of patients in the optometric specialty areas of binocular vision and pediatric vision.

OPTOM 8700 UM-St. Louis Pediatric/Binocular Vision Patient Care: 3 semester hours
Prerequisites: Successful completion of all first, second and third year coursework. Comprehensive clinical care of patients in pediatric/binocular vision clinic at the University of Missouri-St. Louis Center for Eyecare. This course fulfills one of the clinic courses required for graduation. This course must be taken in conjunction with OPTOM 8710 and OPTOM 8720.
OPTOM 8710 UM-St. Louis Contact Lens Patient Care: 3 semester hours
Prerequisites: Successful completion of all first, second and third year coursework required. Comprehensive clinical care in the contact lens clinic at the University of Missouri-St. Louis Center for Eyecare. This course fulfills one of the clinic courses required for graduation. This course must be taken in conjunction with OPTOM 8700 and OPTOM 8720.

OPTOM 8720 UMSL Eye Health Management Patient Care: 1 semester hour
Prerequisites: Successful completion of all first, second, and third year course work. Comprehensive clinical care in the eye health management clinic with ophthalmologists at the University of Missouri-St. Louis University Eye Center. This course fulfills one of the clinic courses required for graduation. This course must be taken in conjunction with OPTOM 8700 and OPTOM 8710.

OPTOM 8730 Community Service Patient Care Rotation A: 7 semester hours
Prerequisites: Successful completion of all first, second and third year coursework. Comprehensive clinical care of patients at St. Louis area community health centers. This course fulfills one of the clinic courses required for graduation.

OPTOM 8770 Community Service Patient Care Rotation C: 7 semester hours
Prerequisites: Successful completion of all first, second, and third year coursework. Comprehensive clinical care of patients at St. Louis area community health centers. This course fulfills one of the clinic courses required for graduation.

OPTOM 8780 External Rotation in Institutional Patient Care: 7 semester hours
Prerequisites: Successful completion of all first, second and third year coursework. Comprehensive clinical care of patients at external sites approved by the School of Optometry’s Externship Council. This course fulfills one of the clinic courses required for graduation.

OPTOM 8790 External Rotation in Ocular Disease Patient Care: 7 semester hours
Prerequisites: Successful completion of all first, second and third year coursework. Comprehensive clinical care of patients with ocular disease at external sites approved by the School of Optometry’s Externship Council. This course fulfills one of the clinic courses required for graduation.

OPTOM 8800 External Rotation in Pediatric/Binocular Vision Patient Care: 7 semester hours
Prerequisites: Successful completion of all first, second and third year coursework. Comprehensive clinical care of pediatric/binocular vision patients at an external site approved by the School of Optometry’s Externship Council. This course fulfills one of the clinic courses required for graduation.

OPTOM 8810 External Rotation in Contact Lens Patient Care: 7 semester hours
Prerequisites: Successful completion of all first, second and third year coursework. Comprehensive clinical care of contact lens patients at an external site approved by the School of Optometry’s Externship Council. This course fulfills one of the clinic courses required for graduation.

OPTOM 8811 External Rotation in Ophthalmic Surgical Patient Care: 7 semester hours
Prerequisites: Successful completion of all second and third year coursework. Comprehensive clinical care of Ophthalmic Surgical Patients at an external site approved by the College of Optometry’s Externship Council. This course fulfills one of the clinic courses required for graduation.

OPTOM 8812 External Rotation in Geriatric Patient Care: 7 semester hours
Prerequisites: Successful completion of all second and third year coursework. Comprehensive clinical care of Geriatric Patients at an external site approved by the College of Optometry’s Externship Council. This course fulfills one of the clinic courses required for graduation.

OPTOM 8813 External Rotation in Ophthalmic Sports Vision: 7 semester hours
Prerequisites: Successful completion of all second and third year coursework. Comprehensive clinical care of Sports Vision Patients at an external site approved by the College of Optometry’s Externship Council. This course fulfills one of the clinic courses required for graduation.

OPTOM 8814 External Rotation in Primary Care: 7 semester hours
Prerequisites: Successful completion of all second and third year coursework. Comprehensive clinical care of Primary Care Patients at an external site approved by the College of Optometry’s Externship Council. This course fulfills one of the clinic courses required for graduation.

OPTOM 8815 External Rotation in Pathology and Treatment: 7 semester hours
Prerequisites: Successful completion of all second and third year coursework. Comprehensive clinical care in pathology and treatment of patients at an external site approved by the College of Optometry’s Externship Council. This course fulfills one of the clinic courses required for graduation.

OPTOM 8816 External Rotation in Ophthalmic Laser Treatment: 7 semester hours
Prerequisites: Successful Completion of all second and third year coursework. Comprehensive clinical care in ophthalmic laser treatment of patients at an external site approved by the College of Optometry’s Externship Council. This course fulfills one of the clinic courses required for graduation.

OPTOM 8817 External Rotation in Rehabilitative Patient Care: 7 semester hours
Prerequisites: Successful completion of all second and third year coursework. Comprehensive clinical care in Rehabilitative Patient Care at an external site approved by the College of Optometry’s Externship Council. This course fulfills one of the clinic courses required for graduation.

OPTOM 8820 External Rotation in Low Vision Patient Care: 7 semester hours
Prerequisites: Successful completion of all first, second and third year coursework. Comprehensive clinical care of low vision patients at an external site approved by the School of Optometry’s Externship Council. This course fulfills one of the clinic courses required for graduation.

OPTOM 8830 External Rotation in General Patient Care: 7 semester hours
Prerequisites: Successful completion of all first, second, and third year coursework. Comprehensive clinical care of a general population of optometric patients at external sites approved by the School of Optometry’s Externship Council. This course fulfills one of the clinic courses required for graduation.
OPTOM 8840 External Supplementary Rotation in General Patient Care: 7 semester hours
Prerequisites: Successful completion of all first, second, and third year coursework. Comprehensive clinical care of general population of optometric patients at external site approved by the School of Optometry’s Externship Council.

OPTOM 8850 Supplementary Rotation in General Patient Care: 7 semester hours
Prerequisites: Successful completion of all first, second, and third year coursework. Comprehensive clinical care of general population of optometric patients at the UM-St. Louis Center for Eye Care, UM-St. Louis Optometric Center, or the UM-St. Louis East St. Louis Eye Center.

OPTOM 8870 Practice Management IV: 2 semester hours
Prerequisites: Successful completion of all first, second and third year coursework. Further in-depth discussion in practice management.

OPTOM 8880 Clinic Seminar: 1 semester hour
Prerequisites: Successful completion of all first, second and third year coursework. Presentation and discussion of interesting clinical patients. Additional clinical testing techniques and concepts. Further discussion of patient data analysis-the process of determining diagnosis, prognosis, and therapy. Further discussions in the optometric specialties.
The Graduate School

The Graduate School of the University of Missouri-St Louis promotes a culturally and intellectually diverse learning environment in which scholarship and creativity flourish. To fulfill the teaching and research goals of the university, the Graduate School provides leadership to graduate programs that inspire in students a passion for discoveries. Our programs reflect our mission as a public metropolitan research university. The scholarly and creative activity of our faculty and graduate students serves the local community and advances academic disciplines at the national and international level.

Graduate Faculty

The regular Graduate Faculty (GF) shall consist of all tenured and tenure-track faculty. Visiting and part-time faculty will not normally be members of the Graduate Faculty. Exceptions may be made on a case-by-case basis per approval of the Graduate Council. All regular members of the Graduate Faculty may:

(a) teach graduate courses
(b) serve on and chair comprehensive examination and exit project committees
(c) serve on and chair master’s thesis committees and doctoral dissertation committees

Term Appointments. Upon recommendation by a college, qualified non-tenure track and adjunct faculty may be approved by the Graduate Council for term appointments to the Graduate Faculty for a period of 1 to 5 years. Term members of the Graduate Faculty may:

(a) teach graduate courses
(b) serve on, but not chair, Ph.D. comprehensive exam committees and exit project committees
(c) serve on, but not chair, master’s thesis committees and Ph.D. dissertation committees

Term graduate faculty who demonstrate scholarship in their discipline may serve on and chair comprehensive exam and capstone project committees for professional doctoral degrees. Upon recommendation of the unit and approval of the Graduate Dean, a term Graduate Faculty member who brings a particular expertise may chair a Ph.D. dissertation committee.

To request a term appointment, the appropriate unit Chair/Dean shall submit a nomination form and CV for the nominee to the Graduate Dean for review and approval by the Graduate Council. A terminal degree is normally required for appointment to the Graduate Faculty. For nominees without a terminal degree, other documented professional accreditation and/or licensure may be used to justify the appointment. Current graduate students at UMSL are not eligible for Graduate Faculty appointment, but under extraordinary circumstances, a current doctoral student may teach a graduate course upon approval of the Dean and the Graduate Council.

Emeritus Appointments. Upon request of the unit, members of the Graduate Faculty who retire or move to a new academic position may be given emeritus status (GFE). Emeritus faculty may continue to teach graduate courses and serve on comprehensive exam committees and dissertation/capstone committees. With the approval of the Academic Dean and the Dean of the Graduate School, faculty transitioning to GFE status may continue to chair any existing doctoral committees, but may not be appointed to chair any new doctoral committees.

Special Appointments. External scholars with relevant specialized expertise may be appointed to replace a member of the graduate faculty on a qualifying exam, thesis, or dissertation committee. The appointment is limited to one committee and does not entitle the appointee to teach graduate courses. Special appointees may not chair a dissertation or qualifying exam committee. Although there is no strict limit on the number of special appointees serving on a committee, in all cases a voting majority of the committee must be members of the graduate faculty.

Each unit with a doctoral program must include in its 5-year review a summary of its policies and practices regarding the methods of assuring the quality of the dissertations in that unit as well as the outcomes of its quality assessment of the dissertations. The Graduate Dean will review the 5-year reviews and confer with the unit and its academic dean regarding the strengths or weaknesses noted.

The Graduate Dean will be the chairperson of the Graduate Faculty.

Conflict of Interest Policy for Student Engagement in Faculty Enterprise

The Conflict of Interest (COI) Committee determines whether a faculty member has a conflict regarding student engagement in an enterprise in which the faculty member has an outside interest as defined in the University’s Collected Rules and Regulations (CRR 330.015 B2). Given the diversity of faculty activities, and potential student engagement, the COI Committee may determine:

a. the conflict is manageable
b. the conflict is manageable only through a Student Monitoring Plan and appointment of a COI Student Monitor
c. the conflict is not manageable and the faculty member may not engage the student

If a Student Monitoring Plan is implemented,

a. A COI Student Monitor will be appointed by the Conflict of Interest Committee. Monitors should be disinterested parties relative to the faculty member’s outside interest and preferably a faculty member at or above the rank of the faculty member with the conflict of interest. A director of graduate studies in the faculty member’s unit or an associate dean are likely appointees.
b. COI Student Monitors will have access to the faculty COI Management Plan that includes recommendations for student monitoring as well as information regarding the role of the student in the company.
c. The COI Student Monitor will meet with assigned student upon student request, and must meet, at minimum, annually and upload or submit the COI Student Monitor Report to the COI office. These reports will be reviewed by the COI Committee to ensure the student’s education/academic interest is upheld as “primary.”

i. “Primary” indicates the student is making the expected progress on their degree, without being unduly compromised or biased by their industry affiliation/ responsibilities, and can openly discuss and publish their work without retribution or unnecessary delay.
Concerns regarding student academic progress/success identified by the Student Monitor and/or COI Committee will be addressed with the faculty member within 60 days and may result in removal of the student from the enterprise. Failure of the faculty member to remedy concerns expressed by the COI Committee to adequately protect the academic interest of students could lead to charges of faculty irresponsibility (CRR 300.010 L) and/or violations of standards of faculty conduct (CRR 330.110 D2) for failure to meet their responsibility as “teacher” as defined in CRR 300.010 C2a.

Graduate Council

The Graduate Council is an elected faculty body that works closely with the Graduate Dean to:

(a) approve all non-regular appointments to the Graduate Faculty

(b) continuously review and amend Graduate School policies to improve procedures and maintain rigorous academic standards.

(c) facilitate interdisciplinary communication and respond to innovations in teaching and research.

(d) review and approve all curricular changes in graduate courses and degree programs.

After the Graduate Council approves a curricular proposal, the proposal goes to the Faculty Senate for review and approval. New programs also require approval of the University of Missouri System and the Missouri Coordinating Board for Higher Education.

A list of Graduate Programs can be found at http://www.umsl.edu/gradschool/gradprograms/index.html.

Graduate School Policies can be found at http://bulletin.umsl.edu/graduatestudy/ (p. 38)
Pierre Laclede Honors College

At the Pierre Laclede Honors College, we transform lives through engaged, individualized learning in and outside of the classroom. Our graduates are economically productive, ethically committed, thoughtfully engaged, active citizens who flourish within their culture and world.

Our vision is a community that empowers students to develop unique paths that allow them to pursue individual goals. Small classes (on average 13) allow students to learn by active questioning and conversation. Students develop strong communication and writing skills while exploring connections across areas of knowledge as they think critically within and beyond their majors. By exploring a wealth of beyond-the-classroom opportunities, Honors students develop the crucial foundation for future professional success.

The Honors College offers a certificate program that can be paired with any major without extending time to graduation. Classes in the Honors College are seminar-style, meaning that they are based in reading, writing, discussion, and critical thinking. This format fosters an intellectual climate centered around democracy, diversity, civility, and academic excellence. Members of the Honors College are engaged with their peers in a close-knit community of scholars from all majors and backgrounds, creating an invaluable interdisciplinary educational experience.

The four year program is open to entering freshmen and extends over a student’s entire undergraduate career.

The two year program is open to select third year students who are either continuing at or have transferred to the university, and a two-plus program is available for transferring sophomores.

The Honors College Writing Program

Both two- and four-year programs include participation in the Honors College writing program, writing through the curriculum, which involves writing in most honors seminars, as well as formal courses in composition (including HONORS 1100, HONORS 3100, HONORS 3120, or HONORS 3160). In the final year, this culminates in the compilation of a personal Honors College writing portfolio (HONORS 4100).

Independent Study Requirement

All Honors College students, whether in the four-year or the two-year program, must fulfill a 6-credit-hour independent study requirement. This can be met in several ways, including supervised research, guided reading, internships, and in many cases capstone courses in the major.

Faculty Overview

Honors College instructors are drawn from university faculty in all academic divisions but mainly from the traditional disciplines of the Arts, Humanities, Social Sciences, and Sciences. These teachers share a desire to work closely with intellectually curious, high-achieving students. Faculty design courses directed toward such an audience and based on small discussion seminars. Thus the honors faculty grows each year as new faculty join the honors project. Their talents add to the Honors College’s rich instructional pool of more than 100 regular and full-time faculty, many of whose teaching and scholarship have been singled out for special awards.

In addition, the Honors College has nine full-time academic faculty members whose responsibilities (besides instruction) include administration, admissions, student advising, and curricular design.

Honors College Certificate

Four Year Program (40 credit hours total):

Approximately one-third of the 120 hours honors students earn toward graduation are taken in the Honors College. Most of these credits are associated with a sequence of honors courses designed specifically for the college, the majority of which are taken during the first two years. During this period, these students fulfill virtually all of the university’s general education requirements (p. 51), usually in innovative ways. In their junior and senior years, honors students also may earn honors credit for work done within their major fields, work which includes the possibility of internships, independent study projects, and advanced undergraduate research.

First Year

Students take HONORS 1100, HONORS 1200, and HONORS 1201, and one course each from the Western Traditions and Non-Western Traditions seminar series. Students may take a seminar from the American Traditions series as an elective or in place of the Western Traditions seminar.

HONORS 1110 Western Traditions: Humanities 3
HONORS 1200 Freshman Symposium: Cultural Traditions I - Humanities 3
HONORS 1201 Freshman Symposium: Cultural Traditions II - Humanities 3
HONORS 1130 Western Traditions: Social and Behavioral Sciences 3
HONORS 1230 American Traditions: Social and Behavioral Sciences 3
HONORS 1310 Non-Western Traditions Series Humanities 3
HONORS 1330 Non-Western Traditions Series Social Sciences 3

1 Elective as an alternate to Western Traditions.

Second Year

Students take two of the following Honors classes:

HONORS 2010 Inquiries in The Humanities 3
HONORS 2020 Inquiries in The Fine and Performing Arts 3
HONORS 2030 Inquiries in the Social and Behavioral Sciences 3
HONORS 2050 Inquiries in the Natural Sciences 1-3
HONORS 2060 Inquiries in Business 3
HONORS 2070 Inquiries in Education 3
HONORS 2071 Inquiries in Nursing 4
HONORS 2080 Inquiries in Nursing 3

During the first two years, honors students will take additional course work in other areas, such as mathematics, natural science, foreign language, and major prerequisite classes to satisfy various university, Honors College, and specific degree requirements.
Third and Fourth Years

Honors students in the four-year program take at least four seminars (12 credit hours) from the Advanced Seminar (3000 level series) and/or Research Seminar (HONORS 3530 or HONORS 3535). They may take more where this is compatible with their major and/or minor requirements.

Honors students in the four-year program who take HONORS 3100 ('Writing the City') or HONORS 3160 ('Writing in the Sciences') may present it for their honors certificate as one of their 3000-level seminars.

They may also, depending on their major, present it to meet their graduation requirement for Junior-level composition.

In addition, honors students do 6 credit hours in independent study projects, normally in or closely related to their major field. These independent study projects normally carry credit in the major, but can be done as Honors College independent study or research projects (HONORS 4900, HONORS 4910, HONORS 4915). During the final year, students also take HONORS 4100, a one-hour capstone for the Honors College writing program; HONORS 4100 may be taken for two hours.

Two year Program (22 credit hours total):

Students in this program will take a combination of Honors College seminars and honors independent study credit (usually for work done in their major fields). The 22 credit hours must include 6 credits of independent study, as for the four-year program.

Third Year

During the first year of the two-year program, students take three honors seminars, including HONORS 3100, Writing the City or HONORS 3160, Writing in the Sciences; one course from the Inquiries series (2000 level); one course from the Social and Behavioral Sciences; one course from either the Advanced Seminar (3000 level) or Research Seminar (HONORS 3530 or HONORS 3535). In addition, 3 credit hours of independent study may be taken during this year, normally in or closely related to their major.

Fourth Year

The final year of the two-year program involves three courses chosen from the 3000 and 4000 level options, including HONORS 4100, the honors writing portfolio, and at least one course chosen from the 3000 level. In addition, students will complete their independent study requirements with 3 or 6 hours of project, internship, or research work.

Honors and Nursing; Honors and Engineering

Because of the extensive professional requirements for both Nursing and Engineering, the Honors College has, with the support of the relevant faculties, created special programs for Nursing and Engineering majors who wish to pursue the Honors College certificate. Both programs feature reduced Honors College credit hour requirements but retain the core of the Honors program and give students ample opportunities to experience interdisciplinary inquiry, seminar-based learning, and take part in the Honors College Writing Program.

Honors and the Bachelor of Liberal Studies (BLS)

Pierre Laclede Honors College students who wish to present the honors Certificate as a minor for the BLS must complete the Honors Capstone (HONORS 4100, one or two credit hours) and also direct three to six hours of their Honors independent study requirement as part of their BLS program. Students should consult the BLS faculty advisor in the Honors College about this requirement, as well as an Arts and Sciences advisor.

Other Academic Features and Requirements

Satisfactory/Unsatisfactory

The satisfactory/unsatisfactory option does not apply to any course work undertaken for Honors College credit.

Admission and Retention

To be considered for admission to either the two-year or four-year honors program, a candidate must file a special Honors College application, as well as a general university application. These application forms and additional information concerning scholarship awards, general eligibility guidelines, and the admissions process are available from the Honors College admissions office at (314) 516-7769 or from the University Admissions. See also the Honors College website.

Scholarships

Every new freshman or transfer student admitted in good standing to the Honors College receives academic scholarship support. Students continue to receive these awards as long as they meet the criteria associated with their particular scholarship.

Good academic standing To remain in good standing, a student must maintain a cumulative GPA, in all his or her UMSL courses, of at least 3.2, and must continue to meet the requirements of the honors program for which he or she was initially admitted. Unless other arrangements have been made, Honors College students are also expected to be full time, that is, to register for and satisfactorily complete at least 12 credit hours per semester. Students wishing to enter the Honors College as part-time students or to change to part-time status must make prior arrangements with the Honors College dean or associate dean.

Honors graduates synthesize knowledge from various perspectives by comparing and contrasting diverse cultural viewpoints, academic disciplinary approaches, and information; they have a holistic approach to creating knowledge and understand their discipline in a larger context.

Honors graduates communicate effectively, across disciplines, in speech and writing by focusing on various perspectives, audiences, and disciplinary approaches, and by employing correct diction, syntax, usage, grammar, and mechanics.

Honors graduates think and write critically and value and manage information effectively:

- By distinguishing among opinions, facts, and inferences; identifying underlying or implicit assumptions; making informed
judgments; and solving problems through applying evaluative standards.

- By locating, critiquing, synthesizing, and distinguishing information from various scholarly and non-scholarly sources.
- By analyzing and synthesizing information from a variety of sources, applying the results to resolving complex situations and problems, and defending conclusions using relevant evidence and reasoned argument.
- By utilizing cultural, behavioral, and historical knowledge to clarify and articulate value systems while recognizing the ramifications of value decisions on the self, others, and the community.
- By identifying conflicts within and between multiple perspectives and value systems, recognizing and analyzing ethical issues in a variety of contexts, and employing standards of logic to formulate a reasonable position among perspectives.

- Honors graduates, having completed coursework and experiential learning in diverse fields, are practiced in various disciplines and demonstrate essential skills and approaches relevant to those disciplines; they can apply those skills and approaches to their own areas of specialization.
  - Honors graduates understand data and mathematical concepts; they are quantitatively literate; they understand and analyze data, draw conclusions, and solve problems.
  - Honors graduates understand themselves and the world around them; they describe, explain, and predict human behavior and social systems; they understand the diversity and complexity of the cultural and social world, past and present, and come to an informed sense of self and others.
  - Honors graduates understand the ways in which people have addressed their condition through art and literature; they analyze cultural works and their historical circumstances; they formulate judgments of these works.
  - Honors graduates understand scientific principles, research procedures, and empirical methods of inquiry; they understand how scientific discoveries affect and are affected by theoretical views of the world and human history.
  - Honors graduates have well-developed awareness of career and advanced study opportunities.
    - Honors graduates demonstrate advanced knowledge in discipline(s), professional skills, and career and educational goals via participation in internships, independent study, undergraduate research, creative endeavors, community engagement, and study abroad.
    - Honors graduates are self-aware of their writing skills and development and devise and revise documents for professional purposes, employment searches, and academic applications.

Courses

HONORS 1100 Honors Freshman Composition: 3 semester hours
Prerequisites: Consent of the Dean of the Honors College. Through formal and informal writing assignments, discussion, instruction, and research, students will improve their critical reading, thinking and writing skills, as well as their research techniques. The course is designed to help students meet the rigorous challenges of academic writing across the disciplines by emphasizing intellectual inquiry, logic, style, correct and concise expression, and formal research and documentation. In addition to four formal essay assignments, students will complete a variety of informal writings.

HONORS 1110 Western Traditions: Humanities: 3 semester hours
Prerequisites: Consent of the Dean of the Honors College. All Western Traditions seminars will be based on the reading and discussion of works of exceptional importance in the development of western culture and civilization. The works to be discussed in each seminar will follow a central theme (defined by its particular relevance to the traditional academic disciplinary areas of the humanities, arts, social sciences, mathematics, or sciences) but will relate that theme to wider developments in Western Traditions and to the American concept of a liberal education.

HONORS 1130 Western Traditions: Social and Behavioral Sciences: 3 semester hours
Prerequisites: Consent of the Dean of the Honors College. All Western Traditions seminars will be based on the reading and discussion of works of exceptional importance in the development of western culture and civilization. The works to be discussed in each seminar will follow a central theme (defined by its particular relevance to the traditional academic disciplinary areas of the humanities, arts, social sciences, mathematics, or sciences) but will relate that theme to wider developments in Western Traditions and to the American concept of a liberal education.

HONORS 1200 Freshman Symposium: Cultural Traditions I - Humanities: 3 semester hours
Prerequisite: Consent of the Dean of the Honors College. This course surveys Western and non-Western cultural traditions from their beginnings until the 1700s. It will introduce the intellectual traditions of a wide variety of cultures through major works of literature, religion and philosophy. This course will approach texts and materials from a humanities perspective.

HONORS 1201 Freshman Symposium: Cultural Traditions II - Humanities: 3 semester hours
Prerequisite: Consent of the Dean of the Honors College. This course surveys Western and non-Western cultural traditions from the 1700s to current times. It will introduce intellectual traditions of a wide variety of cultures through major works of literature, religion and philosophy. This course will approach texts and materials from a humanities perspective.

HONORS 1202 Freshman Symposium: Cultural Traditions I - Social Science: 3 semester hours
Prerequisite: Consent of the Dean of the Honors College. This course surveys Western and non-Western cultural traditions from their beginnings until the 1700s. It will introduce the intellectual traditions of a wide variety of cultures through major works of literature, religion, history, and political theory. This course will approach texts and materials from a social science perspective.

HONORS 1203 Freshman Symposium: Cultural Traditions II - Social Science: 3 semester hours
Prerequisite: Consent of the Dean of the Honors College. This course surveys Western and non-Western cultural traditions from the 1700s. It will introduce the intellectual traditions of a wide variety of cultures through major works of literature, religion, history, science and political theory. This course will approach texts and materials from a social science perspective.
HONORS 1230 American Traditions: Social and Behavioral Sciences: 3 semester hours
Prerequisites: Consent of the Dean of the Honors College. Honors seminars in the American Traditions series involve reading and discussion of texts of major importance in the development of the culture, politics, ideologies, and values which are or have been characteristic of the United States of America. Every American Traditions seminar will cover a broad range of time, and each may include contemporary issues. HONORS 1230 (Social Sciences) satisfies the American history and government requirement, and any course in the American Traditions sequence may be taken to satisfy one of the ‘core’ requirements for the American Studies Minor.

HONORS 1310 Non-Western Traditions Series Humanities: 3 semester hours
Prerequisite: Consent of the Dean of the Honors College. Seminars focus on different topics in the humanities but address themes and problems in non-western cultures that are related to the freshmen core classes (HONORS 1200 and HONORS 1201). These topics will be examined in depth through reading discussion, and students will produce formal papers and participate in individual or small group presentations.

HONORS 1330 Non-Western Traditions Series-Social Sciences: 3 semester hours
Prerequisite: Consent of the Dean of the Honors College. Seminars focus on different topics in the social sciences but address themes and problems in non-western cultures that are related to the freshmen core classes (HONORS 1200 and HONORS 1201). These topics will be examined in depth through reading discussion, and students will produce formal papers and participate in individual or small group presentations.

HONORS 2010 Inquiries in The Humanities: 3 semester hours
Prerequisites: Consent of the Dean of the Honors College. Inquiries seminars focus on the particular contributions academic disciplines can make to relatively broad areas of inquiry, and reading, discussion, writing and where appropriate laboratory work or field trips will enhance students' understanding of the strengths, frailties, and particular characteristics of one or more disciplinary strategies. Inquiries courses may be used to meet relevant General Education requirements. Where special arrangements have been agreed, they can meet more specific departmental and divisional requirements. The course number may be repeated for credit whenever the topic is substantially different.

HONORS 2020 Inquiries in The Fine and Performing Arts: 3 semester hours
Prerequisites: Consent of the Dean of the Honors College. Inquiries seminars focus on the particular contributions academic disciplines can make to relatively broad areas of inquiry, and reading, discussion, writing and where appropriate laboratory work or field trips will enhance students' understanding of the strengths, frailties, and particular characteristics of one or more disciplinary strategies. Inquiries courses may be used to meet relevant General Education requirements. Where special arrangements have been agreed, they can meet more specific departmental and divisional requirements. The course number may be repeated for credit whenever the topic is substantially different.

HONORS 2030 Inquiries in the Social and Behavioral Sciences: 3 semester hours
Prerequisites: Consent of the Dean of the Honors College. Inquiries seminars focus on the particular contributions academic disciplines can make to relatively broad areas of inquiry, and reading, discussion, writing and where appropriate laboratory work or field trips will enhance students' understanding of the strengths, frailties, and particular characteristics of one or more disciplinary strategies. Inquiries courses may be used to meet relevant General Education requirements. Where special arrangements have been agreed, they can meet more specific departmental and divisional requirements. The course number may be repeated for credit whenever the topic is substantially different.

HONORS 2040 Inquiries in Mathematics and Computing: 3 semester hours
Prerequisite: Consent of the Dean of the Honors College. 2040 Inquiries courses may be used to meet relevant General Education requirements in the Explore area of Math and Life/Natural Sciences. Where special arrangements have been agreed, they can meet more specific departmental and divisional requirements. The course number may be repeated for credit whenever the topic is substantially different.

HONORS 2050 Inquiries in the Natural Sciences: 1-3 semester hours
Prerequisites: Consent of the Dean of the Honors College. Inquiries seminars focus on the particular contributions academic disciplines can make to relatively broad areas of inquiry, and reading, discussion, writing and where appropriate laboratory work or field trips will enhance students' understanding of the strengths, frailties, and particular characteristics of one or more disciplinary strategies. Inquiries courses may be used to meet relevant General Education requirements. Where special arrangements have been agreed, they can meet more specific departmental and divisional requirements. The course number may be repeated for credit whenever the topic is substantially different.

HONORS 2051 Inquiries in the Sciences: Laboratory or Field Work: 1 semester hour
Prerequisites: Permission of Honors Dean. This course develops students' understanding of how the experimental procedures of the life and physical sciences are used to collect data and to develop and test scientific hypotheses. HONORS 2051 is taken as a required companion course to specific sections of HONORS 2050, (Inquiries in the Sciences), when laboratory or field work experience is essential to students' understanding of and competence in the scientific subject matter of the companion section of HONORS 2050.
HONORS 2060 Inquiries in Business: 3 semester hours
Prerequisites: Consent of the Dean of the Honors College. Inquiries seminars focus on the particular contributions academic disciplines can make to relatively broad areas of inquiry, and reading, discussion, writing and where appropriate laboratory work or field trips will enhance students' understanding of the strengths, frailties, and particular characteristics of one or more disciplinary strategies. Courses in the 2060 series of courses, ‘Inquiries in Business,’ satisfy the Social Science area of General Education. The course number may be repeated for credit whenever the topic is substantially different.

HONORS 2070 Inquiries in Education: 3 semester hours
Prerequisites: Consent of the Dean of the Honors. College Inquiries seminars focus on the particular contributions academic disciplines can make to relatively broad areas of inquiry, and reading, discussion, writing and where appropriate laboratory work or field trips will enhance students' understanding of the strengths, frailties, and particular characteristics of one or more disciplinary strategies. Inquiries courses may be used to meet relevant General Education requirements. Where special arrangements have been agreed, they can meet more specific departmental and divisional requirements. The course number may be repeated for credit whenever the topic is substantially different.

HONORS 2080 Inquiries in Nursing: 3 semester hours
Prerequisites: Consent of the Dean of the Honors College. Inquiries seminars focus on the particular contributions academic disciplines can make to relatively broad areas of inquiry, and reading, discussion, writing and where appropriate laboratory work or field trips will enhance students' understanding of the strengths, frailties, and particular characteristics of one or more disciplinary strategies. Inquiries courses may be used to meet relevant General Education requirements. Where special arrangements have been agreed, they can meet more specific departmental and divisional requirements. The course number may be repeated for credit whenever the topic is substantially different.

HONORS 2310 Cultural Diversity in the Humanities: 3 semester hours
This seminar focuses upon cultural diversity themes, texts, and perspectives within the humanities.

HONORS 2330 Cultural Diversity in the Social Sciences: 3 semester hours
This seminar focuses upon cultural diversity themes, texts, and perspectives within the social sciences.

HONORS 3001 Topics in Global Awareness: 3 semester hours
Prerequisite: Consent of the dean of the Honors College. Honors topics approved by the College of Business for their Global Awareness requirement.

HONORS 3010 Advanced Honors Seminar in the Humanities: 3 semester hours
Prerequisites: Consent of the Dean of the Honors College. Open only to Honors College students and not acceptable for graduate credit. Usually restricted to Juniors and Seniors, these advanced seminars focus on study. These courses will not usually require specific prerequisites, but may (with the consent of the appropriate department or division) be taken as major or minor courses. The course number may be repeated for credit whenever the topic is substantially different.

HONORS 3020 Advanced Honors Seminar in the Fine and Performing Arts: 3 semester hours
Prerequisites: Consent of the Dean of the Honors College. Open only to Honors College students and not acceptable for graduate credit. Usually restricted to Juniors and Seniors, these advanced seminars focus on in-depth study of a significant body of subject matter. The perspective employed will normally be interdisciplinary or multidisciplinary and will underscore the value of making connections between diverse areas of study. These courses will not usually require specific prerequisites, but may (with the consent of the appropriate department or division) be taken as major or minor courses. The course number may be repeated for credit whenever the topic is substantially different.

HONORS 3030 Advanced Honors Seminar in the Social and Behavioral Sciences: 3 semester hours
Prerequisites: Consent of the Dean of the Honors College. Open only to Honors College students and not acceptable for graduate credit. Usually restricted to Juniors and Seniors, these advanced seminars focus on in-depth study of a significant body of subject matter. The perspective employed will normally be interdisciplinary or multidisciplinary and will underscore the value of making connections between diverse areas of study. These courses will not usually require specific prerequisites, but may (with the consent of the appropriate department or division) be taken as major or minor courses. The course number may be repeated for credit whenever the topic is substantially different.

HONORS 3100 Honors Advanced Composition: Writing The City: 3 semester hours
Prerequisites: Consent of the Dean of the Honors College. Enhances critical thinking, research, discussion and writing skills by focusing on the city of St. Louis and on the specific fields of study of those enrolled in the course. Issues such as depth and development of content, voice, style, tone, correct expression, and research techniques are among the topics emphasized. Students maintain a Commonplace Book of journals, drafts, and creative writings; they also submit a minimum of four formal papers. This course is required for transfer students (two-year Honors Program) and an elective for students on the four-year program. For students on either program, HONORS 3100 meets the Advanced Composition requirement of the University.

HONORS 3120 Honors Business Writing: 3 semester hours
Prerequisite: Junior standing. This Honors course further develops the experienced writer's style and analytical capabilities to the level of sophistication necessary for upper-division writing assignments and for business and professional settings. Writing assignments may include business correspondence, reports, resumes, proposals, analyses, feasibility studies, and articles for in-house publications. The course emphasizes clarity, conciseness, organization, format, style, tone and mechanical correctness; expands upon students' research and documentation skills; and requires research in university libraries. Formal assignments, including one large project and several informal papers, are required for this challenging Honors course. HONORS 3120 fulfills the University's junior-level writing requirement.
HONORS 3160 Honors Writing in the Sciences: 3 semester hours  
Prerequisites: Junior-level standing. This honors course, designed to meet the needs for students in the science disciplines, will satisfy the campus junior-level writing requirement. The course will stress writing observation reports, academic journals, laboratory reports and a major project suited to the specific area of study of each student enrolled in the class. Instruction will include correct documentation of science sources, synthesis techniques of research information, technology-based research skills and effective laboratory reporting methods. Four formal papers, including one large project, and several informal papers will be required for this challenging course.

HONORS 4100 Independent Portfolio Writing: 1-2 semester hours  
Prerequisites: Senior status. Students in this course will meet with their instructor on a regular basis to discuss and revise their writing portfolio and write their master resume, career or academic resume, personal statements for graduate school, or other projects for careers or their futures. The course is required to be at least one hour and may be taken for two hours to allow for more personal time and assistance from the instructor.

HONORS 4900 Independent Study in Honors: 1-6 semester hours  
Prerequisites: Consent of the Dean of the Honors College. Open only to Honors College students and not acceptable for graduate credit. Most Honors students will fulfill their Honors independent study requirements in another department or division of the university. Where this is not possible, and where academic credit seems an appropriate reward for the independent study in question, the project may be undertaken as HONORS 4900, normally as a 3-credit course. This will involve substantial reading, research, and/or field work, and will be supervised by a permanent member of the Honors College academic staff. Completed proposal forms for this course must be submitted to the Honors College not later than the deadline for university registration.

HONORS 4910 Independent Study: Internships: 1-6 semester hours
School of Social Work

General Information

Degrees and Areas of Specialization

The Social Work program offers courses leading to a bachelor of social work (BSW), a master of social work (MSW), and a minor in social work. The BSW and the MSW programs are fully accredited by the Council on Social Work Education. The programs stress the critical, empirical, and applied aspects of social work, incorporating a liberal arts perspective throughout the curriculum. There is a strong accent on community and agency field work as an integral part of the program. Professional social work education enables students to integrate the knowledge, values, and skills of the profession into competent practice.

Students must apply for admission into the BSW and the MSW programs. After admission, undergraduate social work majors and Master’s students should obtain a copy of the Student Handbook (available on the School of Social Work's web page). Students in both programs must meet with a social work advisor for advisement each semester, and must set up an appointment with the practicum office and attend a series of pre-practicum orientation sessions one semester prior to enrolling in the practicum.

Career Outlook

The Bachelor of Social Work program prepares students for entry-level employment in social welfare agencies, schools, hospitals, correctional institutions, social action and community organizations, and day care, geriatric, or rehabilitation and residential centers. The Master of Social Work program prepares professionals for advanced social work practice with individuals, families, groups, organizations, and communities. Individuals currently working in social welfare can develop skills and increase employment and job advancement opportunities with the BSW and MSW degrees.

Courses

SOC WK 2000 Social Work and Social Issues: 3 semester hours
Prerequisites: SOC 1010 or PSYCH 1003. Examination of the network of social programs and services developed in response to social problems in modern urban communities and the various roles and functions performed by the helping professions. Students will be introduced to basic values, skills, and training involved in a helping relationship as well as the characteristics of clients seeking help and professionals engaged in the helping process.

SOC WK 2001 Social Work and Social Issues Lab: 1 semester hour
The lab session will be used for field trips to social agencies which will allow students to better understand the many roles social workers are involved in. This course is required for social work majors. Concurrent enrollment in SOC WK 2000 is required.

SOC WK 2102 Introduction to Gender Studies: 3 semester hours
Same as HIST 2102, SOC 2102, POL SCI 2102 and GS 2102. This core class is required for all Gender Studies Certificate earners. This class introduces students to cultural, political and historical issues that shape gender. Through a variety of disciplinary perspectives in the humanities, social sciences, and natural sciences, the course familiarizes students with diverse female and male experiences and gendered power relationships.

SOC WK 2200 Social Welfare as a Social Institution: 3 semester hours
Prerequisites: SOC WK 2000 or consent of instructor. This course 1) examines the development of social welfare service and philosophies underlying existing practices and systems; 2) analyzes social welfare programs with particular emphasis given to public income maintenance provisions; 3) presents issues surrounding special needs of minority and diverse populations; and 4) provides an overview of the development of social work as a profession.

SOC WK 2330 Asians in Migration: 3 semester hours
This course is a comparative analysis of the social and cultural diversity of the peoples of East, South, and Southeast Asia. Study focuses on their reasons for migration and the extent and quality of the social and cultural connections they maintain to their homelands. Implications of these cultures for students in a variety of disciplines are explored. This course satisfies the cultural diversity requirement.

SOC WK 3100 Introduction to Strategies for Social Work Practice: 3 semester hours
Prerequisites: SOC WK 2200, SOC 1010 and PSYCH 1003 or consent of instructor. A presentation of basic knowledge, skills, and theory used for entry-level professional practice, such as problem assessment, interviewing skills, crisis intervention and referral procedures. The course objectives will also be to teach students how to help clients negotiate systems effectively, and to use resources, services, and opportunities.

SOC WK 3210 Social Issues and Social Policy Development: 3 semester hours
Prerequisites: SOC WK 2200, POL SCI 1100, and ECON 1000. The identification of issues concerning governmental provisions to meet contemporary social needs, with analysis of the principles and values underlying alternative solutions. A study of the processes by which citizen opinions and public policies evolve and are implemented in areas such as income maintenance, crime and delinquency, employment, family and child welfare, and public mental health.

SOC WK 3410 Research Design in Social Work: 3 semester hours
Prerequisites: Satisfaction of Math Proficiency requirement and either SOC 3220, CRIMIN 2220, or PSYCH 2201. Students explore research concepts and procedures (hypothesis testing, sampling, measurement, and design) emphasizing issues in social work research. Students learn to collect, analyze, and present data.

SOC WK 3510 Human Behavior in the Social Environment: 3 semester hours
Prerequisites: BIOL 1012 and SOC 2160 or PSYCH 2250 or consent of instructor. This course will focus on the normative stages in the life span, and specifically, how human development is affected by the physical environment and social status characteristics. Empirical information and theoretical views on human development will be included. Human development will be viewed as a complex interaction of individual developmental stages with family, social, and community systems.

SOC WK 3700 Diversity and Social Justice: 3 semester hours
Same as GS 3700. Prerequisites: PSYCH 2250 or SOC 2160; and SOC WK 3100 (may be taken concurrently). Analyzes the structure, dynamics, and consequences of social and economic injustice, and the impact on diverse groups in American society. Examines theoretical models and practice principles for work with diverse groups.
SOC WK 4110 Social Work Practice with Individuals, Families, and Groups: 3 semester hours
Prerequisites: SOC WK 3100, SOC WK 3510, and SOC WK 3700 taken prior to or concurrently. This course continues the presentation of basic knowledge and practice skills for entry level professional practice begun in SOC WK 3100. It builds on the generalized helping model, incorporating specialized skills for working with specific groups of clients (e.g., children, older adults, and people with mental illnesses and/or disabilities), with families, and small groups.

SOC WK 4300 Social Work Practice with Communities: 3 semester hours
Prerequisites: SOC WK 3210 (may be taken concurrently), senior standing. Continuation of basic practice skills with emphasis given to analysis and intervention at the community level. Includes assessment of community assets and needs and the development of community-level interventions. Emphasis is also placed on helping the practitioner evaluate the impact of intervention.

SOC WK 4350 Human Service Organizations: 3 semester hours
Prerequisite: POL SCI 1100; PSYCH 2250 or SOC 2160 and admission to the BSW program or consent from instructor. This course seeks to help develop knowledge of organizational functioning and an understanding of organizational history, principles and philosophy of effective administration. Students develop theoretical and empirical understandings of organizations and organizations, including concepts such as power and authority, organizational structure, goals, membership, leadership, motivation, technology and organizational culture. They will learn to develop a budget and to submit proposals for grant funding. Using a systemic perspective with organizations as settings for practice students learn to function in and through organizations.

SOC WK 4376 Mental Health and Aging: 3 semester hours
Same as GERON 4376 and PSYCH 4376. Prerequisites: 9 hours of psychology, graduate standing, or consent of instructor or program director. This course provides a survey of theory and research in mental health issues for older populations, focusing on psychological and social aspects of mental health and impairment. The course details approaches to understanding prevalence, etiology, assessment, and treatment of the psychological disorders most commonly experienced by older adults, including anxiety, depression, delirium, and dementia, among others.

SOC WK 4398 Child Maltreatment: A Multidisciplinary Approach: 3 semester hours
Same as PSYCH 4398 and CAST 4398. Prerequisites: CAST 3290 or PSYCH 3290 (may be taken concurrently), or consent of instructor. This course, with its interdisciplinary emphasis, focuses on the systemic response to the primary domains of child maltreatment by multidisciplinary teams and child advocacy centers. Risk factors, cultural considerations, and mandated reporting of child abuse and neglect are emphasized. Students will begin to develop professional skills pertaining to child maltreatment, using a variety of experiential learning modalities.

SOC WK 4604 Introduction to Motivational Interviewing: 1 semester hour
Prerequisites: SOC WK 4110 or SOC WK 5100, or consent of instructor and admission to the BSW or MSW program. This course focuses on skill development in Motivational Interviewing (MI), a specific style of interaction used to help clients/patients increase internal motivation to change behavior. The course will include theoretical underpinnings of MI, including a review of research establishing MI as an evidence-based intervention for a number of behavior areas. The course will also review a model of learning MI and provide specific opportunities for students to practice the skill. The broad objective of this course is to provide social work students an overview of Motivational Interviewing and its application to various domains of social work.

SOC WK 4610 Intimate Partner Violence: 3 semester hours
Same as GS 4610. Prerequisites: SOC WK 3510. Focuses on theoretical and empirical understanding of domestic violence in US society and social work practice with battered women and their families. Addresses direct services, community organizing, and public policy changes to help end violence against women. Relationships between violence against women and other forms of oppression (e.g., racism, economic exploitation, heterosexism and social class) are explored.

SOC WK 4620 Substance-Related and Addictive Disorders: 3 semester hours
Prerequisites: SOC WK 4110 or SOC WK 5100 or equivalent, (or taking concurrently), or consent of instructor. This class examines the interface of psychological, physical, social, and spiritual aspects of addiction. This practice class is designed to deepen students’ abilities to address clients’ issues related to addictions and addictive behaviors, including: prevention, assessment, and intervention. It builds on the generalized helping model within a systems perspective, and it introduces specialized skills for working with individuals, with specific groups of clients, with families, and with small groups.

SOC WK 4641 Crisis Intervention: 1 semester hour
Prerequisites: SOC WK 4110 or SOC WK 5100 or equivalent (or are taking concurrently), or consent of instructor. This course introduces students to the theoretical framework as well as the skills needed to understand and engage in effective crisis intervention. Students will learn a specialized model for assessment and intervention with people in crisis and will have an opportunity to apply this model to a variety of case situations.

SOC WK 4642 Safety Strategies for Social Workers: 1 semester hour
Prerequisites: SOC WK 4110 or SOC WK 5100, and at least senior or graduate standing, and admission to the BSW or MSW program; or consent of instructor. Social Workers can find themselves in situations where their physical safety may be threatened. This hands-on interactive course introduces students to an escape and evasion curriculum. Students will learn the principles of avoidance, escape, and evasion as well as the impact of the sympathetic nervous system on survival. In addition, students become familiar with techniques for avoiding aggression by learning to identify threat cues. Strategies for countering and escaping from escalating levels of physical threats are reviewed. Under the supervision of a trained campus police officer student learn to refine physical techniques for staying safe.
SOC WK 4670 Cross Cultural Perspectives on Social Policy: 3 semester hours
Prerequisites: SOC WK 3210 or equivalent. This course examines social policies in different countries, which may include social insurance, social assistance, health care, and social services. Using a comparative framework, the course examines the nature of government involvement, and public and private sector relations. It examines adequacy, equity, inclusiveness, comprehensiveness, effectiveness, and efficiency of social policies in the countries being studied.

SOC WK 4680 Introduction to Gerontological Practice: 3 semester hours
Same as GERON 4680. Prerequisites: Junior/senior undergraduate or graduate standing, or permission of the instructor or program director. This course introduces key concepts and practices in the evaluation and care of older adults. It is intended for students considering aging-focused careers in the social service or healthcare fields. Topics include developmental and health-related theories of aging, functional and psychosocial aspects of aging, working with older adults in various service settings, multi and interdisciplinary team approaches, and basic standards of professional conduct that apply across professions.

SOC WK 4751 Skills for Healing Racism: Facilitating Dialogue for Institutional Change: 1 semester hour
Prerequisites: BSW senior standing or graduate standing. This course will enable students to explore the social structures, institutions and patterns of thinking and behavior that perpetuate racism. In this very interactive format, participants will develop facilitation skills necessary to attempt institutional change in their agency, school or community. Students will explore their roles, both as the oppressed and the oppressor, in the dynamics of race relations and societal change.

SOC WK 4800 Supervised Field Experience in Social Work I: 4 semester hours
Prerequisite: SOC WK 3100, SOC WK 4110. SOC WK 4110 must be taken prior to or concurrently with SOC WK 4801; consent of instructor. This course provides students practice experience in social service agencies. Students work at the agencies approximately 20 hours per week. The purpose of this experience is to familiarize students with agency operations. Selection of the agency is based on student education needs.

SOC WK 4801 Integrative Field Experience Seminar I: 2 semester hours
Prerequisite: Consent of instructor. This seminar provides an opportunity for students to integrate previous course work with their experience in social work agencies. Classroom discussion will emphasize direct practice issues. Concurrent enrollment in SOC WK 4800 is required.

SOC WK 4850 Supervised Field Experience in Social Work II: 4 semester hours
Prerequisite: SOC WK 4800, SOC WK 4801 and consent of instructor. This is a continuation of agency practice experience. Students work at the agency approximately 20 hours per week and continue at the same agency as SOC WK 4800 or change agencies with the consent of the instructor.

SOC WK 4851 Integrative Field Seminar II: 2 semester hours
Prerequisites: Consent of instructor and concurrent registration in SOC WK 4850. This seminar is a continuation of SOC WK 4801. Classroom discussion will emphasize administration and community organization issues.

SOC WK 4900 Special Study: 1-10 semester hours
Prerequisite: Consent of instructor. Independent study through advanced readings in method and philosophy on a topic of particular interest, or field research in an agency.

SOC WK 5100 Generalist Social Work Practice: 3 semester hours
Prerequisites: SOC WK 4110 or equivalent admission to MSW program. Using a problem-solving approach, students develop theoretical and empirical understanding and practical application of generalist social work methods. Students gain knowledge and skills that include interviewing, assessment, crisis and short term intervention, contracting, resource development, and case documentation needed for competent direct practice with diverse populations.

SOC WK 5200 Social Policy and Social Services: 3 semester hours
Prerequisites: SOC WK 3210 or POL SCI 2420 or POL SCI 3460 or equivalent admission to the MSW program. Covers the history and development of social welfare policies, legislative processes, and existing social welfare programs. Examines frameworks for social policy analysis, analyzes how social and economic conditions impact the process of social policy development and implementation, and introduces policy practice in social work.

SOC WK 5300 Community Practice and Social Change: 3 semester hours
Prerequisites: SOC WK 3300, or SOC 3344, or equivalent admission to the MSW program. Focuses on economic, social, and political theory and research on communities and social change. Examines conceptual models of community practice within the generalist model and develops skills in organizing, advocacy, and planning.

SOC WK 5350 Social Work and Human Service Organizations: 3 semester hours
Prerequisites: SOC WK 3510 and SOC WK 4300 or PSYCH 3318 or MGMT 3611 or equivalent admission to the MSW program. Students develop theoretical and empirical understanding of groups and organizations, including concepts such as power and authority, structure, goals, membership, leadership, motivation, technology and organizational culture. Using organizations as settings for social work practice and as targets for change, students learn strategies and skills for assessment and intervention.

SOC WK 5410 Critical Thinking and Analysis: 3 semester hours
Prerequisites: Admission to MSW program. This course will require students to think critically about social work practice and analyze the evidence base. It is the first of a two-course sequence designed to provide students the knowledge base and skills for using the scientific method ethically to advance social work practice, knowledge, and theory. It focuses on understanding a variety of methods for critical analysis and synthesis of academic literature. Students learn the importance of critically assessing quantitative and qualitative research methods and how to apply an ethical decision making model to resolve ethical dilemmas including the use of research results to inform practice.

SOC WK 5450 Social Work Research Methods and Analysis II: 3 semester hours
Prerequisites: SOC WK 5410 and an approved statistics course. Advanced course, focusing on analysis of qualitative and quantitative data to advanced social work practice, knowledge, and theory. Students learn to use and interpret various statistical procedures for analyzing quantitative data, including bivariate and multivariate analysis, and content and statistical analysis for qualitative data. Students apply these analytic techniques to social work case material using computer software applications.
SOC WK 5500 Foundations of Human Behavior in the Social Environment: 3 semester hours
Same as GS 5500. Prerequisites: SOC WK 3510 or equivalent or admission to the MSW program. Focuses on theoretical and empirical understanding of human behavior in the social environment using a life-span perspective. Introduces biological, behavioral, cognitive, and sociocultural theories of individuals, families, and small groups, and their implications for the professional social worker's understanding of socioeconomic status, gender, disability, ethnicity, race, and sexual orientation.

SOC WK 5635 Social Work Practice with LGBT Populations: Deconstructing the Alphabet Soup: 3 semester hours
Same as GS 5635. Prerequisites: SOC WK 5100 and SOC WK 5500 or consent of instructor. This advanced-practice course focuses on developing the knowledge and skills necessary for effective social work practice with LGBT persons, families, and communities. The goal of this course is to facilitate deeper understanding of LGBT identities, relationships, health and mental health challenges, and issues of race, age, religion, spirituality, and class and how these intersect. The course treats lesbian women, gay men, bisexual, and transgender persons as four distinct communities.

SOC WK 5700 Diversity and Social Justice for Social Work: 3 semester hours
Same as GS 5700. Prerequisite: Graduate standing. Analyzes the structure, dynamics, and consequences of social and economic injustice, and the impact on diverse groups in American society. Examines theoretical models and practice principles for work with diverse groups.

SOC WK 5800 Graduate Field Practicum I: 4 semester hours
Prerequisites: Graduate standing and consent of academic advisor. Provides integrative field experience in generalist social work practice.

SOC WK 5801 Foundation Field Practicum Seminar: 2 semester hours
Prerequisite: Graduate standing and consent of instructor. Integrates academic content from foundation course work and experiential learning in field placements. Goals are to conceptualize the problem solving process in field practice, synthesize theory into a social work approach that encourages creative use of self, and underscore ethics and service to diverse groups in practices.

SOC WK 6120 Theory and Practice with Older Adults: 3 semester hours
Same as GERON 6120. Prerequisites: Graduate standing. This course examines theory and empirically-based assessment and intervention models for work with older adults. Topics include the differences between life circumstances of older adults and younger adult populations; how ethnicity, gender, social class, and sexual orientation intersect with age and create special intervention issues; discussion of ethical and value issues (e.g., client autonomy, rationing of health care); examination of family and community resources in providing care; interventions with older adults with physical and mental disabilities; and older adults in residential settings.

SOC WK 6150 Theory and Practice with Families: 3 semester hours
Prerequisites: SOC WK 5100 or equivalent, graduate standing and departmental approval. This course will examine theoretical approaches to social work with families, including the impact of the social environment. Skills will include assessment and multi-disciplinary intervention with multi-problem families. Special emphasis will be given to poverty, chemical dependency, intra-familial violence, physical and mental illnesses, and working with family members of diverse cultures, socioeconomic backgrounds, races, sexual orientation, and ability. Values and ethics will be emphasized.

SOC WK 6160 Advanced Social Work Practice Across the Life Span: 3 semester hours
Prerequisites: SOC WK 5100 or equivalent or consent of instructor. Examines theory and empirically-based assessment and intervention strategies for diverse populations across the life span. Students will gain basic mastery of behavioral, cognitive-behavioral, brief therapeutic and supportive psychotherapeutic techniques and their appropriate use with children, adolescents, and young, middle and older adults. The course will also consider the effects of family, peers, and societal context (e.g., poverty, racism, and ageism) in understanding psycho-social stressors particular to each life era, including academic failure and delinquency, substance abuse, physical and mental illness, family disruption and instability, and grief and loss issues.

SOC WK 6200 Family Policy: 3 semester hours
Prerequisites: SOC WK 5200 or equivalent or consent of instructor and graduate standing. Examines policy development, implementation and impact of social policies on children, youth, and families. International, national, and state policies that affect basic family needs will be the focus, including topics such as economic support, health care, child care and protection, and child and youth development. Intended and unintended consequences of existing policies on the family will be examined as well as future policy directions.

SOC WK 6220 Social Policy and Military Veterans: 3 semester hours
Same as MVS 6220. Prerequisites: SOC WK 5200 or its equivalent or consent of the instructor and graduate standing. This course provides an overview of public policy towards military veterans, with an emphasis on social work. The course focuses on political theory and public policy and reviews the various methodological approaches to studying public policy, the pertinent theories related to public policy analysis, an introduction to military culture and current issues facing veterans. The focus of the course will be on understanding the current issues facing veterans and how public policy affects these issues.

SOC WK 6250 Social and Economic Development Policy: 3 semester hours
Same as POL SCI 6418. Prerequisites: SOC WK 5200 or equivalent, or consent of instructor. This course examines the economic and political urban processes that planners, policy makers, service organizations and advocates seek to influence. In this course students will develop skills in policy analysis and development. The course provides an introduction to three models of modern political economy, then seeks to deepen these broad analytic approaches by examining more recent policy developments in cities like St. Louis. This course also focuses on recent strategies to address issues such as employment, wages, housing, education, taxes and social services.
SOC WK 6300 Leadership and Management in Nonprofit Organizations: 3 semester hours
Same as P P ADM 6300 and POL SCI 6300. Prerequisite: Graduate standing required. Addresses the role and scope of the independent sector in the United States, as well as the leadership and management of nonprofit organizations within that sector. Topics include the economic and political scope of the independent sector, the role of volunteerism in a democratic society, and the role and scope of philanthropy. Topics in voluntary organization management and leadership include the dynamics, functions, and membership structure of NPOs, especially staff-board and other volunteer relations; governance and management of NPOs; resource mobilization; and program development management and evaluation.

SOC WK 6310 American Philanthropy and Nonprofit Resource Development: 3 semester hours
Same as P P ADM 6310. Prerequisite: Graduate standing. This course addresses the history, philosophy, roles and scope of philanthropy in the United States, including its role in the nonprofit, voluntary sector. It further examines the contemporary forces which impact philanthropy and charitable giving, both by institutions and individuals. The course examines the effective planning and management of development programs (e.g., annual giving), fund raising vehicles (e.g., mail solicitations) and the fund raising process, form planning through donor relations.

SOC WK 6311 Staff Management Issues in Nonprofit Organizations: 1 semester hour
Same as P P ADM 6311. Prerequisites: Graduate standing required. This course addresses issues involved in managing staff in nonprofit organizations. The course will cover the following topics: fundamentals of staff supervision; balancing supervisory processes with counseling and coaching; selecting, hiring, evaluating, and terminating staff, and legal issues that affect these processes.

SOC WK 6312 Legal Issues in Managing Nonprofit Organizations: 1 semester hour
Same as P P ADM 6312. Prerequisite: Graduate standing. This course addresses legal issues involved in managing and governing nonprofit organizations. The course will cover the following topics: The Board as steward of the organization; Director and officer liability; tax laws concerning charitable giving; legal issues in managing staff and volunteers (e.g., hiring, evaluating, and terminating employees); Missouri nonprofit law.

SOC WK 6313 Financial Issues in Managing Nonprofit Organizations: 1 semester hour
Same as P P ADM 6313. This course addresses financial issues involved in governing and managing nonprofit organizations. The course will cover the following topics: cash flow analysis; budgeting; fund accounting; cost accounting (determining costs for programs and services); understanding and using standard financial statements, including balance sheets, cash flow statements, statements of activity, and operating and capital budgets.

SOC WK 6380 Advanced Community Development Theory & Practice: 3 semester hours
Prerequisites: SOC WK 5200 and SOC WK 5300. In this advanced community practice course, students examine concepts, theories, and models of macro level practice and gain skills for addressing complex community building challenges. Course content focuses on theories of social change, empowerment, and promotion of social and economic justice for culturally diverse and at-risk communities. The roles of community organizer, community developer, and social planner are emphasized in this course to help students understand and apply mezzo-macro social work interventions in urban settings.

SOC WK 6400 Practice and Program Evaluation: 3 semester hours
Prerequisites: SOC WK 5410 and SOC WK 5450 or equivalent or consent of instructor. Provides specialized knowledge in the use of qualitative and quantitative research skills to evaluate the effectiveness of social work practice. Topics will include single system design, group designs, and program evaluation. Students will design and conduct a research project associated with their advanced social work practicum. Results will be presented to the class and the agency. Value and ethical issues, particularly those relevant to client race and gender will be emphasized as students develop and conduct their research.

SOC WK 6443 Health Care Policy: 3 semester hours
Same as POL SCI 6443, P P ADM 6430, GERON 6443. Prerequisites: Graduate Standing and consent of instructor. (MSW students will normally take the social policy foundation course prior to enrolling in this course.) Survey course examining current issues in health care policy that face the nation. Policies are placed in a historical context to show how issues have been influenced by different political and economic conditions. Secondary consequences and limitations of current trends in health policy are explored.

SOC WK 6444 Integrated Health Care: 3 semester hours
Prerequisites: SOC WK 5500 or its equivalent. This course will introduce students to the essential practice skills needed to effectively address the challenges of integrating services, care and support for persons with health, mental health, and substance use problems.

SOC WK 6449 Human Resources in the Public Sector: 3 semester hours
Same as POL SCI 6449 and P P ADM 6490. This course presents an overview of personnel and labor relations in the public sector. It places particular emphasis on issues which are unique to the public sector, such as the merit system, the questions of representative bureaucracy, and the constraints of personnel in the nonprofit sector. Course topics may include personnel reforms in the federal sector, equal employment and affirmative action policies, testing, selection, hiring, comparable worth, job evaluation and labor relations, including grievance arbitration and collective bargaining.

SOC WK 6450 Gerontological Assessment: 3 semester hours
Same as GERON 6450. Prerequisite: Graduate standing. This course provides an overview of psychosocial assessment with older adults and their family caregivers. Major areas of gerontological assessment practice are considered, including dementia, mood disorders, suicide, grief, alcoholism, elder abuse/neglect, family caregiving, and interdisciplinary team issues.

SOC WK 6491 Strategic and Program Planning for Nonprofit Organizations: 3 semester hours
Same as POL SCI 6490 and P P ADM 6550. Prerequisites: Graduate standing or consent of Instructor. Strategic and program planning enable an organization to concentrate on efforts and set priorities guided by a mission, vision, and an understanding of its environment. Focus is on preparing a strategic plan and a program plan for a nonprofit organization and analyzing an organization's ability to deliver goods and/or services to its constituents in today's economic, social and political climate.
SOC WK 6601 Evid Bsd Approaches in Direct SW Practice: Cog & Rational Emotive Behavioral Therapy Models: 1 semester hour
Prerequisites: SOC WK 5100 or advanced standing, and graduate standing. This course examines theory and evidence-based practices through use of the Cognitive Behavioral and Rational Emotive Behavioral therapy models. Students will use these theories to conduct hands-on intervention practices of assessment, treatment planning, interventive strategies, and termination when working within a family or direct practice setting. Student-conducted interventions through the use of role-plays will be videotaped and viewed by the instructor and classmates at each stage of the therapeutic process. This course will include integration and application of the Diagnostic and Statistical Manual of Mental Disorders through the psychotherapeutic process.

SOC WK 6603 Evid Bsd Approaches in Dir SWork Practice: Play and Interactive Models: 1 semester hour
Prerequisites: SOC WK 5100 or advanced standing status, and graduate standing. This course examines theory and evidence-based practices through use of the Play and Interactive therapy models. Students will use these theories to conduct hands-on intervention practices of assessment, treatment planning, interventive strategies, and termination when working within a family or direct practice setting. Student-conducted interventions through the use of role-plays will be videotaped and viewed by the instructor and classmates at each stage of the therapeutic process. This course will include integration and application of the Diagnostic and Statistical Manual of Mental Disorders through the psychotherapeutic process.

SOC WK 6605 Screening, Brief Intervention, and Referral to Treatment: 1 semester hour
Prerequisites: SOC WK 5100 and SOC WK 5500; or their equivalents. This course will include in depth information on screening tools to identify high risk substance use, application of SBIRT and specific motivational interviewing techniques, referral procedures that include how and to whom to refer patients for further treatment and how best to communicate with specialty providers, procedures for following patients after referral, use of electronic health records, and how to integrate SBIRT into established systems of care.

SOC WK 6606 Evidence-Based Approaches in Direct Social Work Practice: Dialectical Behavior Therapy: 1 semester hour
Prerequisites: SOC WK 5100 or advanced standing status, and graduate standing. This course examines theory and evidence-based practices through the Dialectical Behavior Therapy (DBT) model. DBT combines cognitive and behavioral theories in individual and group treatment. Students will use these theories to understand the DBT skills of Mindfulness, Emotion Regulation, Interpersonal Effectiveness, and Distress Tolerance. Students will engage in role playing while learning the four components of DBT: DBT skills training, DBT individual therapy, DBT phone coaching, and DBT therapist consultation team meeting. This course will include integration and application of the DSM-5.

SOC WK 6630 Diagnosis and Related Pharmacology for Social Work Practice: 3 semester hours
Prerequisites: SOC WK 5100 or equivalent or consent of instructor. Course is designed for social work students, and will provide an overview of the development and treatment of selected mental health disorders classified by Diagnostic and Statistical Manual of Mental Disorders. In particular, the course will examine, from a systems perspective, the psychological and neuropsychological etiologies of mood, psychotic, personality and other disorders and their preferred pharmacological treatment.

SOC WK 6640 School Social Work Practice in Public Schools: 3 semester hours
Prerequisites: SOC WK 5100 or equivalent or graduate standing and consent of instructor. Examines the role of the social worker in school settings and includes work with youth, families, and communities in relation to the child or adolescent's functioning in school.

SOC WK 6645 Social Work in Healthcare Settings: 3 semester hours
Prerequisites: SOC WK 5100 and SOC WK 5500 or equivalent. This course focuses on the key issues and practices of providing social work services in varying healthcare settings including hospital and primary care clinics. Practice issues will include admission, treatment and discharge planning (housing, transportation, insurance and finances, medications and social/community supports) with a focus on cultural competence, health literacy, and medical terminology. The course will also review inpatient medicine, inpatient psychiatry, forensic social work, emergency department social work, transplant social work and clinic social work. Course discussions will integrate information concerning current health care economics.

SOC WK 6800 Graduate Field Practicum II: 3 semester hours
Prerequisites: SOC WK 5800 and SOC WK 5801 and consent of academic advisor. Provides integrative field experience in student's graduate social work practice concentration. May be taken concurrently with SOC WK 6850 with special permission.

SOC WK 6850 Graduate Field Practicum III: 3 semester hours
Prerequisites: SOC WK 6800. Provides advanced integrative field experience in students' graduate social work concentration.

SOC WK 6900 Directed Study in Professional Social Work: 1-10 semester hours
Prerequisite: Graduate standing and consent of instructor. Independent graduate-level study on a topic of particular interest through readings, reports, and field work under faculty supervision.
UMSL/Washington University Joint Undergraduate Engineering Program

General Information

The Joint Undergraduate Engineering Program of UMSL and Washington University was approved in 1993 by the University of Missouri and the Coordinating Board for Higher Education. The program is designed to offer course work beyond the pre-engineering courses at UMSL and the area community colleges. Pre-engineering and general education courses are offered at UMSL, and upper-level engineering courses are offered in the late afternoons, evenings and on Saturdays on the Washington University campus; this schedule permits students to co-op during the day at local engineering firms. Students will be admitted to the upper-division program only after they have completed an acceptable pre-engineering program. They can earn a bachelor of science in civil engineering (BSCIE), a bachelor of science in electrical engineering (BSEE), or a bachelor of science in mechanical engineering (BSME).

Mission Statement

The mission of the University of Missouri-St. Louis/Washington University Joint Undergraduate Engineering Program is to provide a high quality engineering education preparing students to meet the evolving expectations of industry. The program strives to excite and nurture the intellectual, technical, professional and personal development of the students through a partnership that provides a mechanism for Washington University to share its campus, resources and personnel with the UMSL students, many of whom are place-bound individuals. The Joint Program educates students from the diverse St. Louis community to elevate their future to enter the engineering profession, thereby elevating the St. Louis region.

Program Educational Objectives

Our program aspires to make positive, substantive and lasting contributions to the lives of our students. The nontraditional and traditional students in the civil, electrical and mechanical engineering programs often have work experience in or related to engineering practice or the military. The program seeks to impart an education that inspires the graduates to constantly share their knowledge with others, to continually improve their knowledge and understanding, and to persistently adapt to change in technology and world needs. Graduates should be able to apply their comprehensive education with the highest ethical standards within the civil, electrical or mechanical engineering profession or a related field. The objectives are to:

- meet the needs of employers of civil, mechanical, and electrical engineers, with an emphasis on the St. Louis region.
- meet the expectations of graduate schools that our alumni attend.

Student Outcomes

The student outcomes are the skills and knowledge expected of all students at the time of their graduation. Faculty members will assess these student outcomes. The student outcomes for the Joint Engineering Program are:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics;
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors;
3. an ability to communicate effectively with a range of audiences;
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts;
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives;
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions;
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

The BSCIE, the BSEE, and the BSME are accredited by the Engineering Accreditation Commission of ABET. https://www.abet.org

Latin Honors

In accordance with the University’s Latin Honors policy (p. 26), candidates graduating from the University of Missouri St. Louis/Washington University Join Undergraduate Engineering Program in the 2020-2021 Academic Year must meet the following GPA qualifications:

- Summa Cum Laude 3.947
- Magna Cum Laude 3.841
- Cum Laude 3.583

Fees

Students register on the UMSL campus and pay UMSL fees plus an engineering fee for engineering courses. Limits on enrollments are determined by the availability of resources.

Career Outlook

Engineering is one of the few careers in which the bachelor's degree is a professional degree. Students earning a bachelor of science degree in one of the engineering disciplines are well qualified for entry-level engineering positions in a variety of businesses, industries, consulting firms, and government agencies. As society becomes increasingly dependent on technology, the outlook for all engineering disciplines becomes increasingly bright. Engineering careers typically rank at, or very near, the top of virtually any published rating of promising jobs for the 21st Century. Besides tackling challenging technical problems, roughly two-thirds of all engineers will have some level of management responsibility within ten years of receiving their bachelor's degrees. Many practicing engineers will eventually continue their education by pursuing graduate degrees on a part-time basis. Typical areas of graduate study include all advanced technical and scientific fields and management.
For Further Information
For information about enrolling in this program, please contact the UMSL/Washington University Joint Undergraduate Engineering Program at 314-516-6800.

Degrees
Civil Engineering BSCIE (p. 376)
Electrical Engineering BSEE (p. 436)
Mechanical Engineering BSME (p. 505)

Minors
Civil Engineering (p. 379)
Electrical Engineering (p. 438)
Mechanical Engineering (p. 506)

Engineering Courses
ENGR 1010 Introduction to Engineering: 1 semester hour
This course, required of all new Freshman with an interest in Engineering, is designed to assist students in their transition to the university experience and to UMSL by giving students the knowledge and tools needed to succeed as scholars. Students will learn about faculty expectations, support services, and student life, as well as engineering.

ENGR 2310 Statics: 3 semester hours
Prerequisites: MATH 1900 and PHYSICS 2111. Statics of particles and rigid bodies. Equivalent systems of forces. Distributed forces; centroids. Applications to trusses, frames, machines, beams, and cables. Friction. Moments of inertia. Principle of virtual work and applications.

ENGR 2320 Dynamics: 3 semester hours

Joint Civil Engineering Courses
J C ENGR 1430 Introduction to Engineering Design: CAD & GIS: 2 semester hours
Prerequisites: Civil Engineering major. An introduction to engineering design in the context of civil engineering problems and applications. Students will learn the basics of GIS and computer-aided design and drafting concepts and techniques to learn the fundamentals of spatial reasoning and graphical representation. Introduction to terminology, symbols, multiple use blocks and details, origins and uses of survey data, contours, alignments, working with 2D and 3D, using both model space and layouts, dimensioning and dimension styles, attributes, and xrefs, and using templates. Freehand sketching, including pictorial and orthographic views, applied to the design process as well.

J C ENGR 2160 Surveying: 3 semester hours
Prerequisites: Civil Engineering major. Horizontal and vertical control surveys, including traverses, triangulation, trilateration, and leveling; basic adjustments of observations; geologic data; coordinate systems. Basic route surveying, including horizontal and vertical curves.

J C ENGR 3210 Computer Methods of Engineering Analysis: 2 semester hours
Prerequisites: MATH 2020, CMP SCI 1250 (may be taken concurrently), and junior standing. This course provides an introduction to engineering design and analysis utilizing numerical methods, spreadsheet functions, and database queries. Students will build on skills gained in CMP SCI 1250 to utilize a high level programming language and spreadsheet functions to develop techniques for civil engineering design and problem solving.

J C ENGR 3360 Civil Engineering Materials Lab: 1 semester hour
Prerequisite: J M ENGR 2410. This course and J M ENGR 3360 should be taken concurrently. Testing procedures, testing machines, use of laboratory equipment, analysis of data, and presentation of results. Laboratory tests on static tension, compression, bending, and torsion of metal specimens. Tests on wood. Determination of compressive and tensile strengths of concrete. Design of concrete mixes and verification of strength. Experiments in advanced topics in mechanics of materials.

J C ENGR 3410 Structural Analysis: 3 semester hours

J C ENGR 3420 Structural Design: 3 semester hours
Prerequisites: J M ENGR 2410 and J C ENGR 3410. Fundamentals of structural design in steel, reinforced concrete, and timber. Familiarization with the sources of various design codes and practice in interpreting them. Computer graphics applications.

J C ENGR 3430 Civil Engineering Design CAD & GIS: 2 semester hours
Prerequisites: J M ENGR 1413, junior standing. This course provides an introduction to engineering design in the context of civil engineering. Students will build on skills gained in J M ENGR 1413 to utilize computer-aided design software and GIS software to learn techniques of civil engineering design and problem solving.

J C ENGR 3460 Transportation Engineering: 3 semester hours
Prerequisites: Civil Engineering major. Fundamental treatment of the planning, engineering, design, and procedural aspects of multimodal transportation are covered. Intermodal freight and urban transportation planning processes and overview of environmental, energy, and economic issues are discussed.

J C ENGR 3520 Water and Wastewater Treatment: 3 semester hours
Prerequisites: J M ENGR 3700 (may be taken concurrently) and Civil Engineering major, or consent of instructor. Application of the basic principles of chemistry, microbiology, and fluid mechanics to the analysis of environmental problems, especially those involving control of water and land contamination. Properties of municipal and industrial wastewater, solid waste, and hazardous waste. Estimation of assimilative capacity and other characteristics of receiving waters. Introduction to unit processes and unit operations used in the treatment of municipal and industrial wastewater. Design of processes and facilities used for treating drinking water, wastewater, and sludge disposal. Waste minimization and recycling in both industrial and municipal settings.
J C ENGR 3760 Hydraulic Engineering: 3 semester hours
Prerequisites: J M ENGR 3700 and Civil Engineering major. The principles of open channel flow will be discussed and illustrated with practical examples. Methods for channel design, storm sewer, culvert and bridge analysis will be presented using the concepts of gradually-varied, steady flow. A design project using computerized analysis and design is used to implement concepts in a large practical application.

J C ENGR 4000 Independent Study: 1-3 semester hours
Prerequisites: Civil Engineering major and consent of instructor. Independent investigation of a civil engineering topic of special interest to a student performed under the direction of a faculty member.

J C ENGR 4190 Soil Mechanics: 3 semester hours

J C ENGR 4200 Soil Exploration and Testing: 1 semester hour
Prerequisites: J C ENGR 4190 (may be taken concurrently) and Civil Engineering major. Soil exploration; in-situ soil testing, laboratory testing of soil; processing of test data using a microcomputer; statistical analysis of test data; use of test results in the decision-making process.

J C ENGR 4630 Design of Steel Structures: 3 semester hours
Prerequisites: J C ENGR 3410, J C ENGR 3420, and Civil Engineering major. Behavior and design of steel frames by ‘allowable stress’ and ‘maximum strength’ based on deterministic and LRFD (Load-resistance factor design) methods. Design of beams, columns, beam-columns, plate girders, connections, multistory frames, and bridge girders, Torsional design of steel structures. Plastic analysis and design of steel structures. Miscellaneous topics in structural steel construction and design.

J C ENGR 4640 Foundation Engineering: 3 semester hours
Prerequisites: J C ENGR 3420, J C ENGR 4190, J C ENGR 4200 and Civil Engineering major. Principal problems in design and construction of foundations for bridges and buildings. Bearing capacity of deep and shallow foundations; pressure on retaining walls and shallow foundations; pressure on retaining walls and slope stability; modern developments in piling, cofferdams, open caissons, pneumatic caissons.

J C ENGR 4660 Advanced Design of Concrete Structures: 3 semester hours
Prerequisites: J M ENGR 3360, J C ENGR 3410, J C ENGR 3420, and Civil Engineering major. Flexural behavior and design, strength and deformation of rectangular and nonrectangular sections, shear strength, beam-columns, long columns, slab systems, design of frames, and footings will be covered.

J C ENGR 4670 Structural Design Projects: 3 semester hours
Prerequisites: J C ENGR 4630 and Civil Engineering major. Students carry out the complete design of typical and unusual building and bridge structures. Use of the computer as a design tool is emphasized. Projects are conducted in cooperation with production engineers.

J C ENGR 4720 Legal Aspects of Construction: 3 semester hours
Prerequisites: Junior standing or permission of instructor, and Civil Engineering major.

J C ENGR 4740 Economic Decisions in Engineering: 3 semester hours
Same as J M ENGR 4730. Prerequisites: Enrolled in the Joint Engineering Program. This course examines the principles of economics involved in engineering decisions. It looks at decisions between alternatives based on the efficient allocation of resources. Topics include the time element in economics, analytical techniques for economic studies and taxes.

J C ENGR 4830 Fundamentals of Surface Water Hydrology and Environmental Engineering: 3 semester hours
Prerequisites: J M ENGR 3700 and senior status. The principles of the hydrologic cycle including precipitation, evaporation, transpiration, infiltration, runoff, streamflow, and groundwater will be discussed and illustrated. In addition, computational fundamentals of hydrologic analysis will be presented such as unit hydrographs, routing, data analysis, and flood frequency. Elements of quantitative problems in urban stormwater systems and management, water quality and urbanization. Concepts of sustainability and green engineering such as low impact development and other best management practices will be presented. Computer software will be utilized.

J C ENGR 4910 Hydrology and Hydraulic Design Project: 3 semester hours
Prerequisites: J M ENGR 3700, J C ENGR 3760, J C ENGR 4830 and Civil Engineering major. This course is designed to provide seniors in Hydrology and Hydraulics with a major design/facility plan project. The principals of hydrologic and hydraulic design will be utilized in developing the hydrology, hydraulics and floodplain analysis for a local watershed or land area. Hydrologic analysis is performed to size hydraulic systems and evaluate watershed and floodplain performance. The course is structured to apply hydrologic theory and modeling techniques to engineering hydrology and hydraulics for watershed analysis, floodplain delineation, and urban stormwater. The student will also consider the next generation of hydrologic computation, watershed evaluation and the importance of severe storm impacts and flood management. Consideration of sustainability and green infrastructure practices will also be included. A final written report and class presentation of the design project is included.

J C ENGR 4950 Fundamentals of Civil Engineering Review: 1 semester hour
Prerequisite: Senior standing. A review and preparation of the most recent NCEES Fundamentals of Engineering (FE) Exam specifications for Civil Engineering students is offered in a classroom setting. Exam strategies will be illustrated using examples.

Joint Computer Science Courses
J CMP SC 1002 Introduction to Computing Tools: Matlab Skills: 1 semester hour
This course is aimed at the acquisition of MATLAB skills through hands-on familiarization and practice. Students practice the array, vector, and meshgrid representations, programming and plotting, and apply these skills to solve numerical problems and generate reports.

Joint Electrical Engineering Courses
J E ENGR 2300 Introduction to Electrical Networks: 3 semester hours
Prerequisites: Electrical Engineering or Mechanical Engineering major. Elements, sources, and interconnects. Ohm's and Kirchoff's laws, superposition and Thevenin's theorem; the resistive circuit, transient analysis, sinusoidal analysis, and frequency response.
J E ENGR 2320 Introduction to Electronic Circuits: 3 semester hours  
Prerequisites: J E ENGR 2300 and Electrical Engineering major. 
Introduction to contemporary electronic devices and their circuit 
applications. Terminal characteristics of active semiconductor devices. 
Incremental and D-C models of junction diodes, bipolar transistor (BJTs), 
and metal-oxide semiconductor field effect transistors (MOSFETs) are 
developed and used to design single-and multi-stage amplifiers. Models of 
the BJT and MOSFET in cutoff and saturation regions are used to design 
digital circuits.

J E ENGR 2330 Electrical and Electronic Circuits Laboratory: 3 semester hours  
Prerequisites: J E ENGR 2300 and Electrical Engineering major. Lectures 
and laboratory exercises related to sophomores topics in introductory 
networks and basic electronics.

J E ENGR 2340 Electrical Laboratory for Mechanical Engineers: 1 semester hour  
Prerequisites: J E ENGR 2300 (may be taken concurrently) and 
Mechanical Engineering major. Laboratory in introductory electrical circuits 
and devices of relevance to mechanical engineers.

J E ENGR 2600 Introduction to Digital Logic and Computer Design: 3 semester hours  
Prerequisites: CMP SCI 1250. Digital computers and digital information-
processing system; Boolean algebra, principles and methodology of 
logical design; machine language programming; register transfer logic; 
microprocessor hardware, software, and interfacing; fundamental of digital 
circuits and systems; computer organization and control; memory systems; 
arithmetic unit design. Occasional laboratory exercises.

J E ENGR 3300 Engineering Electro Magnetic Principles: 3 semester hours  
Prerequisites: Electrical Engineering major. Electromagnetic theory 
as applied to electrical engineering; vector calculus; electrostatics and 
magnetostatics; Maxwell's equations, including Poynting's theorem and 
boundary conditions; uniform plane-wave propagation; transmission lines-
TEM modes, including treatment of general, lossless line, and pulse 
propagation; introduction to guided waves; introduction to radiation and 
scattering concepts.

J E ENGR 3310 Electronics Laboratory: 3 semester hours  
Prerequisites: J E ENGR 2300, J E ENGR 2330 and Electrical Engineering 
major. Laboratory exercises for juniors covering topics in computeraided 
measurements, computer simulation, and electronic circuits.

J E ENGR 3320 Power, Energy and Polyphase Circuits: 3 semester hours  
Prerequisites: J E ENGR 2300 and Electrical Engineering major. 
Fundamental concepts of power and energy; electrical measurements; 
physical and electrical arrangement of electrical power systems; 
polyphase circuit theory and calculations; principle elements of electrical 
systems such as transformers, rotating machines, control, and protective 
devices, their description and characteristics; elements of industrial power 
system design.

J E ENGR 3360 Principles of Electronic Devices: 3 semester hours  
Prerequisites: Electrical Engineering major. Introduction to the solid-state 
physics of electronic materials and devices, including semiconductors, 
metals, insulators, diodes and transistors, Crystals growth technology 
and fundamental properties of crystals. Electronic properties and band 
structure of electronic materials, and electron transport in semiconductor 
materials. Fabrication of pn junction diodes, metal-semiconductor 
junctions, and transistors and integratedcircuit chips. Fundamental 
electrical properties of rectifying diodes and light-emitting diodes, bipolar 
transistors and field effect transistors. Device physics of diodes and 
transistors, large-signal electrical behavior and high-frequency properties.

J E ENGR 3370 Electronic Devices and Circuits: 3 semester hours  
Prerequisites: J E ENGR 2320 and Electrical Engineering major. 
Introduction to semiconductor electronic devices: transistors and 
diodes. Device electrical DC and high-frequency characteristics. Bipolar 
transistors, field-effect transistors for analog electronics applications. 
Transistors fabrication as discrete devices and as integrated-circuit chips. 
Large-signal analysis of transistor amplifiers: voltage gain, distortion, input 
resistance and output resistance. Analysis of multitransistor amplifiers: 
Darlington, Cascade, and coupled-pair configurations. Half-circuit 
concepts, differential-mode gain, common-mode gain, and differential-
to-single-ended conversion. Transistor current sources, active loads, 
and power-amplifier stages. Applications to operational amplifiers and 
feedback circuits.

J E ENGR 3510 Signals and Systems: 3 semester hours  
Prerequisites: J E ENGR 2300, J E MATH 3170 and Electrical Engineering 
major. Elementary concepts of continuous-time and discrete-time 
signals and systems. Linear time-invariant (LTI) systems, impulse 
response, convolution, Fourier series, Fourier transforms, and frequency-
domain analysis of LTI systems. Laplace transforms, Z-transforms, and 
rational function descriptions of LTI systems. Principles of sampling and 
modulation. Students participate weekly in recitation sections to develop 
oral communications skills using class materials.

J E ENGR 3620 Computer Architecture: 3 semester hours  
Prerequisites: J E ENGR 2600 and Electrical Engineering major. Study 
of interaction and design philosophy of hardware and software for 
digital computer systems: Machine organization, data structures, I/O 
considerations. Comparison of minicomputer architectures.

J E ENGR 4000 Independent Study: 1-3 semester hours  
Prerequisites: Electrical Engineering major and consent of instructor. 
Opportunities to acquire experience outside the classroom setting and to 
work closely with individual members of the faculty. A final report must 
be submitted to the department. Open as a senior elective only. Hours 
and credit to be arranged. Credit variable, maximum credit per semester 3 
hours. Maximum program total credit 3 hours.

J E ENGR 4050 Reliability and Quality Control: 3 semester hours  
Prerequisites: J E MATH 3260, MATH 1320 and Electrical Engineering 
major. An integrated analysis of reliability and quality control function in 
manufacturing. Statistical process control, analysis, reliability prediction, 
design, testing, failure analysis and prevention, maintainability, availability, 
and safety are discussed and related. Qualitative and quantitative aspects 
of statistical quality control and reliability are introduced in the context of 
manufacturing.
J E ENGR 4340 Solid State Power Circuits and Applications: 3 semester hours
Prerequisites: J E ENGR 2320, J E ENGR 3510, and Electrical Engineering major. Study of the strategies and applications of power control using solid-state semiconductor devices. Survey of generic power electronic converters. Applications to power supplies, motor drives, and consumer electronics. Introduction to power diodes, thyristors, and MOSFETs.

J E ENGR 4350 Electrical Energy Laboratory: 3 semester hours
Prerequisites: J E ENGR 2330 and Electrical Engineering major. Experimental studies of principles important in modern electrical energy systems. Topics: power measurement, transformers, batteries, static frequency converters, thermoelectric cooling, solar cells, electrical lighting, induction, commutator, and brushless motors, synchronous machines.

J E ENGR 4360 Energy Alternatives: 3 semester hours
Same as J M ENGR 4360. Prerequisites: J E ENGR 2300 or J M ENGR 3200. This course introduces engineering analyses of the human uses of energy. Both non-renewable (e.g., oil, natural gas, coal, nuclear) and sustainable (e.g., hydropower, solar, wind, biomass) resources are covered. Topics include the engineer's role in harvesting, production, storage, conversion, delivery, and uses of energy. Students will learn system analysis, design, integration, optimization, and operational aspects of selected resources delivery systems, and end uses. Technical content will include site selection, conversion and delivery efficiency calculations, engineering economic analyses, control systems, and energy resource systematic classification. Measure will consist of a mix of homework, quizzes, tests, class participation, and projects.

J E ENGR 4410 Control Systems I: 3 semester hours

J E ENGR 4440 Sensors and Actuators: 3 semester hours
Prerequisites: Senior standing. The course provides engineering students with basic understanding of two of the main components of any modern electrical or electromechanical system; sensors as inputs and actuators as outputs. This course is useful for those students interested in control engineering, robotics and systems engineering.

J E ENGR 4470 Robotics Laboratory: 3 semester hours
Prerequisites: J E ENGR 3510 or J E ENGR 4410, and Electrical Engineering major. Introduces the students to various concepts such as modeling, identification, model validation and control of robotic systems. The course focuses on the implementation of identification and control algorithms on a two-link robotic manipulator (the so-called pendubot) that will be used as an experimental testbed. Topics include: introduction to the mathematical modeling of robotic systems; nonlinear model, linearized model; identification of the linearized model: input-output and state-space techniques; introduction to the identification of the nonlinear model: energy-based techniques; model validation and simulation; stabilization using linear control techniques; a closer look at the dynamics; stabilization using nonlinear control techniques.

J E ENGR 4520 Power Systems Analysis: 3 semester hours
Prerequisites: J E ENGR 3320 and Electrical Engineering major. Introduction to the modeling and elements of power systems; machines, lines, and loads; load flow methods and applications; short circuit analysis using symmetrical components on symmetrical and unsymmetrical faults; methods of economic operation of power systems and contingency; state estimators, stability, and introduction of the independent system operator.

J E ENGR 4710 Communications Theory and Systems: 3 semester hours
Prerequisites: J E ENGR 3510, J E MATH 3260 or MATH 1320, and Electrical Engineering major. Introduction to the concepts of transmission of information via communication channels. Amplitude and angle modulation for the transmission of continuous-time signals. Analog-to-digital conversion and pulse code modulation. Transmission of digital data. Introduction to random signals and noise and their effects on communication. Optimum detection systems in the presence of noise. Elementary information theory. Overview of various communication technologies such as radio, television, telephone networks, data communication, satellites, optical fiber, and cellular radio.

J E ENGR 4720 Internet Communications: 3 semester hours
Prerequisites: Electrical Engineering major. This course will introduce and cover the architecture, protocols, security, and quality of service (QoS) of Internet Communications. Starting with the design principles and architecture of the Internet, communication applications such as Voice over IP (VoIP), video conferencing, and presence and instant messaging will be covered. Protocols developed by the Internet Engineering Task Force (IETF) including IP, TCP, UDP, DNS, SIP, XMPP, and ENUM will be studied. Latest areas of research including the Service Oriented Architecture (SOA) and peer-to-peer (P2P) architectures for Internet Communications will be covered.

J E ENGR 4730 Radar Systems: 3 semester hours

J E ENGR 4820 Digital Signal Processing: 3 semester hours

J E ENGR 4950 Fundamentals of Electrical Engineering Review: 1 semester hour
Prerequisites: Senior standing. A review and preparation of the most recent NCEES Fundamentals of Engineering (FE) Exam specifications for Electrical Engineering students is offered in a classroom setting. Exam strategies will be illustrated using examples.
**Joint Engineering Communication Courses**

**J E COMM 2000 Engineering Studio I: 1 semester hour**

This one credit hour seminar introduces a holistic, professional formation approach to engineering education. This seminar will help students build real-world understanding of business, ethics, and society; integrate real-world perspective with traditional coursework; and build their own professional identity. Students will learn from local leaders in industry and work in teams to explore modern problems and solutions. This course must be taken during the first semester of the upper level engineering program.

**Joint Engineering Mathematics Courses**

**J E MATH 3170 Engineering Mathematics: 4 semester hours**

Prerequisites: MATH 2000, and Electrical Engineering or Mechanical Engineering major. Study of probability and statistics together with engineering applications. Probability and statistics: random variables, distribution functions, density functions, expectations, means, variances, combinatorial probability, geometric probability, normal random variables, joint distribution, independence, correlation, conditional probability, Bayes theorem, the law of large numbers, the central limit theorem. Applications: reliability, quality control, acceptance sampling, linear regression, design and analysis of experiments, estimation, hypothesis testing. Examples are taken from engineering applications.

**J E MATH 3260 Probability and Statistics for Engineering: 3 semester hours**

Prerequisites: MATH 2000, and Electrical Engineering or Mechanical Engineering major. Study of probability and statistics together with engineering applications. Probability and statistics: random variables, distribution functions, density functions, expectations, means, variances, combinatorial probability, geometric probability, normal random variables, joint distribution, independence, correlation, conditional probability, Bayes theorem, the law of large numbers, the central limit theorem. Applications: reliability, quality control, acceptance sampling, linear regression, design and analysis of experiments, estimation, hypothesis testing. Examples are taken from engineering applications.

**Joint Mechanical Engineering Courses**

**J M ENGR 1413 Introduction to Engineering Design: CAD: 2 semester hours**

Prerequisites: Civil Engineering or Mechanical Engineering major. An introduction to engineering design in the context of mechanical engineering. Students learn the fundamentals of spatial reasoning and graphical representation. Freehand sketching, including pictorial and orthographic views, are applied to the design process. Computer modeling techniques provide accuracy, analysis, and visualization tools necessary for the design of devices and machines. Topics in detailing design for production, including fasteners, dimensioning, tolerancing, and creation of part and assembly drawings are also included.

**J M ENGR 1414 Introduction to Engineering Design: Project: 2 semester hours**

Prerequisites: Mechanical Engineering major. An introduction to engineering design in the context of mechanical engineering. Students first complete a series of experiments that introduce physical phenomena related to mechanical engineering. Understanding is achieved by designing and building simple devices and machines. The course proceeds to a design contest in which the students design and build from a kit of parts a more significant machine that competes in a contest held at the end of the course. The course is open to all and is appropriate for anyone interested in mechanical devices, design, and the design process.

**J M ENGR 2110 Machine Shop, Fabrication, and Prototyping: 2 semester hours**

Basic machine shop and mechanical fabrication skills are taught in the context of case studies from prototype design and build projects. After considering possible redesigns, students build the hardware considered in the case study. Through these ‘build’ assignments students learn basic machine shop skills including precision measurement, workholding, sawing, drilling, turning, milling, and grinding. The assignments also provide the opportunity to learn general purpose mechanical fabrication activities including glueing, basic woodwork, welding, and basic electronic control. Completion of the course provides certification to use the Washington University engineering machine shop.

**J M ENGR 2410 Mechanics of Deformable Bodies: 3 semester hours**

**J M ENGR 3110 Mechanical Design and Machine Elements: 3 semester hours**

Prerequisites: J M ENGR 2410 and Mechanical Engineering major. The Laplace transform and applications; series solutions of differential equations, Bessel's equation, Legendre's equation, special functions; matrices, eigenvalues, and eigenfunctions; Vector analysis and applications; boundary value problems and spectral representation; Fourier series and Fourier integrals; solution of partial differential equations of mathematical physics.

**J M ENGR 2410 Mechanics of Deformable Bodies: 3 semester hours**

**J M ENGR 3110 Mechanical Design and Machine Elements: 3 semester hours**

Prerequisites: J M ENGR 2410 and Mechanical Engineering major. The Laplace transform and applications; series solutions of differential equations, Bessel's equation, Legendre's equation, special functions; matrices, eigenvalues, and eigenfunctions; Vector analysis and applications; boundary value problems and spectral representation; Fourier series and Fourier integrals; solution of partial differential equations of mathematical physics.
J M ENGR 3250 Material Science for J M ENGR: 4 semester hours
Prerequisites: CHEM 1111. Introduces the chemistry and physics of engineering materials. Emphasis on atomic and molecular interpretation of physical and chemical properties, the relationships between physical and chemical properties, and performance of an engineering material.

J M ENGR 3360 Material Science for J C ENGR: 3 semester hours
Prerequisites: CHEM 1111 and Civil Engineering major. Introduces the chemistry and physics of engineering materials. Emphasis on atomic and molecular interpretation of physical a chemical properties, the relationships between physical and chemical properties, and performance of an engineering material.

J M ENGR 3700 Fluid Mechanics: 3 semester hours

J M ENGR 3710 Principles of Heat Transfer: 3 semester hours

J M ENGR 3721 Fluid Mechanics Laboratory: 1 semester hour
Prerequisites: J M ENGR 3700 and Civil Engineering or Mechanical Engineering major. Physical laboratory exercises focusing on fluid properties and flow phenomena covered in J M ENGR 3700. Calibration and use of a variety of equipment; acquisition, processing, and analysis of data by manual as well as automated methods.

J M ENGR 3722 Heat Transfer Laboratory: 1 semester hour
Prerequisites: J M ENGR 3721, J M ENGR 3710 and Mechanical Engineering major. Physical laboratory exercises, including some numerical simulations and computational exercises, focusing on heat-transfer phenomena covered in J M ENGR 3710. Calibration and use of variety of laboratory instrumentation; acquisition, processing, and analysis of data by manual as well as automated methods; training in formal report writing.

J M ENGR 3750 Fluid Control and Power Systems Theory and Practice: 3 semester hours
Prerequisites: J M ENGR 3700 and Mechanical Engineering major. Topics to be covered include: design of hydraulic and pneumatic control and power systems using advanced concepts and analytical tools; analysis of fluid flow through small orifices and between parallel and inclined planes; theory of spool and flapper valves; physical configuration of practical components: pumps, motors, fluid lines and valves, accumulators and storage devices; integration of components into practical systems, development of realistic performance diagrams using MATLAB Simulink; application of performance diagrams in design and analysis of fluid power systems.

J M ENGR 4000 Independent Study: 1-3 semester hours
Prerequisites: Mechanical Engineering major and consent of instructor. Independent investigation of a mechanical engineering topic of special interest to a student performed under the direction of a faculty member.

J M ENGR 4110 Mechanical Engineering Design Project: 3 semester hours
Prerequisites: J M ENGR 3110. Small student teams complete design projects subject to various constraints (e.g. economic, safety, legal, environmental, ethical), and appropriate codes and standards. Teams first perform a background information study, which is followed by a specification and conceptual design study. Embodiment and fabrication plans are produced for the chosen concept. The results of an engineering analysis study influence the final design of a working prototype, which is built and demonstrated. This is 'documented' in an appropriate manner (e.g. a CAD model) that allows others to reproduce a version, and it is 'published' so that other interested parties learn of its existence.

J M ENGR 4120 Design of Thermal Systems: 3 semester hours
Prerequisites: J M ENGR 3200 and senior standing. Analysis and design of advanced thermo-fluid systems. Student teams participate in the design process which could involve research, design formulation, codes, standards, engineering economics, a design project report, and formal presentations. Topics include: thermal-fluid systems and components, such as power, heating, and refrigeration systems, pumps, fans, compressors, combustors, turbines, nozzles, coils, heat exchangers and piping.

J M ENGR 4170 Dynamic Response of Physical Systems: 2 semester hours

J M ENGR 4180 Dynamic Response Laboratory: 1 semester hour
Prerequisites: J M ENGR 4170 and J M ENGR 4180 must be taken during the same semester. Laboratory problems focusing on materials covered in J M ENGR 4170.

J M ENGR 4250 Material Selection in Engineering Design: 3 semester hours
Prerequisites: J M ENGR 3250 and Mechanical Engineering major. Analysis of the scientific bases of material behavior in the light of research contributions of the last 20 years. Development of a rational approach to the selection of materials to meet a wide range of design requirements for conventional and advanced applications. Although emphasis will be placed on mechanical properties, other properties of interest in design will be discussed, e.g., acoustical, optical and thermal.

J M ENGR 4310 Control Systems I: 3 semester hours
J M ENGR 4360 Energy Alternatives: 3 semester hours
Same as J E ENGR 4360. Prerequisites: J E ENGR 2300 or J M ENGR 3200. This course introduces engineering analyses of the human uses of energy. Both non-renewable (e.g., oil, natural gas, coal, nuclear) and sustainable (e.g., hydropower, solar, wind, biomass) resources are covered. Topics include the engineer's role in harvesting, production, storage, conversion, delivery, and uses of energy. Students will learn system analysis, design, integration, optimization, and operational aspects of selected resources delivery systems, and end uses. Technical content will include site selection, conversion and delivery efficiency calculations, engineering economic analyses, control systems, and energy resource systematic classification. Measure will consist of a mix of homework, quizzes, tests, class participation, and projects.

J M ENGR 4630 Nanotechnology: Concepts and Applications: 3 semester hours
The aim of this course is to introduce to students the general meaning, terminology and ideas behind nanotechnology and its potential application in various industries. The topics covered will include nanoparticles - properties, synthesis and applications, carbon nanotubes - properties, synthesis and applications, ordered and disordered nanostructured materials and their applications, quantum wells, wires and dots, catalysis and self-assembly, polymers and biological materials, nanoelectronics and nanophotonics, nanomanufacturing and functional nano-devices, health effects and nanotoxicity etc.

J M ENGR 4700 Sustainable Environmental Building Systems: 3 semester hours
Prerequisites: Mechanical Engineering major. Sustainable design of building lighting and HVAC systems considering performance, life-cycle cost and downstream environmental impact. Criteria, codes and standards for comfort, air quality, noise/vibration and illumination. Life cycle and other investment methods to integrate energy consumption/conservation, utility rates, initial cost, system/component longevity, maintenance cost and building productivity. Direct and secondary contributions to acid rain, global warming and ozone depletion.

J M ENGR 4706 Aircraft Performance: 3 semester hours
Prerequisites: Enrolled in the Joint Engineering Program. This course introduces the principles and applications of aerodynamics to determine the performance of typical jet engine and propeller airplanes. The performance calculations include flight conditions of takeoff, climb, level flight, and landing. The topics covered also include range and endurance computation, turning flight, flight envelope, constraint analysis and design process. The knowledge and skill gained in this course can be readily applied in the preliminary design of an airplane.

J M ENGR 4730 Economic Decisions in Engineering: 3 semester hours
Same as J C ENGR 4740. Prerequisites: Enrolled in the Joint Engineering Program. This course examines the principles of economics involved in engineering decisions. It looks at decisions between alternatives based on the efficient allocation of resources. Topics include the time element in economics, analytical techniques for economic studies and taxes.

J M ENGR 4810 HVAC Analysis and Design I: 3 semester hours

J M ENGR 4820 HVAC Analysis and Design II: 3 semester hours
Prerequisites: Enrolled in the Joint Engineering Program. Energy calculations to estimate the quantity of energy needed to heat and cool building structures. Fundamentals of incompressible flow, basics of centrifugal pump performance, and design procedures for water piping systems. Space air diffuser design to assure that temperatures, humidities, and air velocities within occupied spaces are acceptable. Air duct design and fan analysis for optimally distributing air through building air duct systems. Performance analysis of refrigeration systems, including the effects of pressure losses and heat transfer. Direct contact heat and mass transfer.

J M ENGR 4900 Engineering Project Management: 3 semester hours
Prerequisites: Electrical Engineering or Mechanical Engineering major. Basic fundamentals and advanced concepts of engineering project management applicable to projects and programs, both large and small. Project management skills, techniques, systems, software and application of management science principles will be covered and related to research, engineering, architectural, and construction projects from initial evaluations through approval, design, procurement, construction and startup.

J M ENGR 4950 Fundamentals of Mechanical Engineering Review: 1 semester hour
Prerequisites: Senior standing and Mechanical Engineering major. A review and preparation of the most recent NCEES Fundamentals of Engineering (FE) Exam specifications for Mechanical Engineering students is offered in a classroom setting. Exam strategies will be illustrated using examples.

J M ENGR 4990 Mechanical Engineering Senior Seminar: 1 semester hour
Prerequisites: Mechanical Engineering major. Personal and professional development to prepare graduates entering the mechanical engineering profession. Topics may include personality characteristics, diversity, team dynamics, professionalism, early career development, graduate study, effective presentations, and case histories of mechanical engineering projects. Performance is based on class participation, oral presentations, and written reports.
International Studies and Programs

General Information
UMSL Global supports academic programs, seminars, and conferences designed to promote research in international studies, improve teaching of international studies, and encourage an interest in international affairs in the university and community.

UMSL Global houses the E. Desmond Lee Global Ethnic Collaborative, the Karakas Family Foundation Alliance for the Advancement of Hellenic Studies, and endowed professorships in African/African American studies, Chinese studies, Greek studies, International Education, Irish studies, and Japanese studies. The German Culture Center and Nicholas and Theodora Matsakis Hellenic Culture Center are also vital parts of UMSL Global’s international programming.

Fellows
Each year a number of UMSL faculty are appointed as research Fellows.

Education Abroad and Exchange Programs
The Education Abroad section of this Bulletin contains details about campus study abroad and international exchange programs. Those programs are administered by UMSL Global’s Education Abroad team.

International Student and Scholar Services
International Student and Scholar Services (ISSS) provides services for international students and scholars, including admissions, visa and immigration matters, credential evaluations, health insurance, tax matters, nonacademic advising, initial campus arrival, orientation, social activities, and referrals to other campus units.

Education Abroad Programs
Study Abroad Programs
The University of Missouri-St. Louis is committed to broadening students’ understanding of different cultures and preparing them for the global community in which we live. One of the most successful ways of achieving this global mindset is to study overseas. The opportunity to live and study in a different culture is an enriching experience, both academically and personally.

UMSL Global (formerly The Office of International Studies and Programs) provides UMSL students of nearly any major the opportunity to study around the globe. Most programs run for an academic year, semester, or summer. Two to three week-long faculty-led programs are offered during the winter intersession and summer. Through individual advising, students can find the program best suited to their personal, academic, and career goals.

Fees and Financial Aid
The cost of the program depends on the type of program, the services provided and the country of study. For most programs, participants continue to pay UMSL fees plus airfare, room and board, and spending money. Students studying abroad for a semester or more are usually housed in dormitories or are assisted in finding apartments. In most cases, students are able to use their UMSL financial aid toward a study abroad program. Study abroad scholarships are available for qualified applicants through UMSL Global.

Application
Applications are generally due in mid-February (summer, fall and academic year programs) and mid-September (winter intersession and spring programs). Students should plan to spend at least one or two months researching a program before applying.

Participant selection is based on academic achievement, faculty recommendations, departmental/divisional approval of the proposed course of study, and for some programs, proficiency in the foreign language of instruction. Most programs are designed for undergraduate students in their sophomore to senior years of study; however, a limited number of programs for freshmen and graduate students are available.

Student Teaching Abroad
Teacher Education students may be able to student teach in Fuxin, China during the spring semester. In addition to meeting the other requirements for student teaching, students complete an application form for the site.

Courses
C IST 3200 Study Abroad, Non UM-St. Louis Program: 1-24 semester hours
C IST 5200 Study Abroad Non UM-St Louis Program Grad: 1-15 semester hours

Internship and Cooperative Education Positions

Internship/Cooperative Education Positions

Internships and Co-ops give students the opportunity to combine classroom studies with work experience in a field related to their education and career goals. These degree related positions offer students an excellent opportunity to gain professional job experience and earn money to help with expenses while in school. Through these opportunities, students begin to understand what career choices they might make, gain valuable contacts in their field, and, in many cases, get paid for their work. They graduate with a college degree and an impressive resume. Career Services and academic departments work with students and employers to ensure that positions are linked to curriculum and career development. These opportunities are available to UMSL students at all levels in all majors. Contact Career Services for more information at 516-5111, or visit 278 Millennium Center.

In addition to internships available through Career Services, internships and practica are available through many academic departments. Academic advisors can provide information about the requirements for these experiences, some of which are summarized below:

College of Arts and Sciences

Anthropology
ANTHRO 4325- ANTHRO 4329, Internship in Cultural Anthropology, Archaeology, Folklore, Museum Studies, Physical Anthropology - elective, for credit; placement with outside organizations; junior standing required. Positions available on competitive basis as lab and research assistants, teachers/facilitators, and interns/assistants - optional, noncredit.

The Human Origin and Cultural Diversity program offers internships in educational anthropology and diversity education.

Art
ART HS 3387, Professional Internship for Art History majors only elective, for credit.

Biology
BIOL 3699, Undergraduate Internship in Biotechnology - optional as part of certificate program, for credit or noncredit, enrollment in certificate program required.

BIOL 4299, Practicum in Conservation - required as part of certificate program, for credit, enrollment in certificate program required.

Chemistry and Biochemistry
Opportunities are available to pursue research with faculty members for credit during the academic year, normally while enrolled in CHEM 3905. Stipends may be available in some cases. Expanded opportunities are available in the summer through the Research Experience for Undergraduates Program, which is typically funded by the National Science Foundation and local industry. In some cases students may conduct CHEM 3905 research at a local company through collaborative arrangement between a faculty members and an industrial chemist.

Communication
COMM 4920, Practicum in Applied Communication
COMM 4950, Internship in Applied Communication

Computer Science
CMP SCI 3990, Undergraduate Internship in Computer Science

Criminology and Criminal Justice
CRIMIN 3280, Internship in Criminology and Criminal Justice - elective, for credit.

Economics
ECON 4990, Internship in Applied Economics; not required; 3 hours maximum.

English
ENGL 4890, Independent Writing Project - internships offered in areas such as journalism, public relations, advertising, publishing, and technical writing; for credit, enrollment in Writing Certificate Program required.

History
HIST 4001, Special Readings - internships occasionally available with historical agencies; department chair and/or undergraduate coordinator must approve to obtain credit.

Mathematics
Career-related work arrangements for students majoring in math are primarily administered through Career Services located in 278 Millennium Student Center. These positions are paid and non-credit-bearing.

Music
PRACTM 4920, Internship – required, for credit, enrollment in bachelor of music business required. Department sponsored internships available for all majors at St. Louis area arts institutions.

Physics and Astronomy
The department funds research internships in the department in both physics and astronomy. The awards are competitive, and preference is given to students who have completed the PHYSICS 2111/PHYSICS 2112 sequence.

Political Science
POL SCI 3940 Public Affairs Internship - required, for credit, for bachelor of science in public administration program. It may also count as an elective, for credit, within the bachelor of arts in political science program and is open to all majors. Placements include municipal, state, and federal governmental agencies, nonprofit organizations, courts, and political campaign offices.

Psychology
PSYCH 3390, Research Assistant.
Social Work
SOC WK 4800 and SOC WK 4850, Supervised Field Experience in Social Work I and II - required, for credit, admission to B.S.W. program and prior consent of instructor are required.

Sociology
SOC 4385 Internship in Sociology - elective, for credit.

College of Business Administration
Career Services works in partnership with the College of Business Administration to assist students in securing career-related work arrangements for students majoring in all areas of business. These positions can be paid or unpaid and credit bearing or non-credit bearing. Those students choosing to receive academic credit through one of the courses listed below must contact the College of Business Administration Internship Coordinator in Room 469 SSB, by phone at 314-516-6117, or by email.

College of Education
Internships (4989) are required for 3 hours credit for most undergraduate programs and Site Based Experience (4990 and 4991) is required for 12 hours credit in all teacher certification programs. For more information, contact the Teacher Certification and Advising Office at 314-516-6710.

Joint Engineering Program
UMSL/Washington University Joint Undergraduate Engineering Program career-related work arrangements for students majoring in all areas of engineering are administered through Career Services and the UMSL Engineering Advisor. These positions are paid and non-credit-bearing.

College of Nursing
Clinical courses are required in both the undergraduate and graduate programs. These experiences are limited to nursing majors only.

Pierre Laclede Honors College
Internships chosen by Honors College students, or arranged by their major departments, are valuable opportunities to broaden educational experience while also meeting the honors independent study requirement for graduation.
Academic Integrity

Academic Dishonesty

Academic dishonesty is a serious offense that may lead to probation, suspension, or expulsion. One form of academic dishonesty is plagiarism—the use of an author's ideas, statements, or approaches without crediting the source. Academic dishonesty also includes such acts as cheating by copying information from another student's examination, take-home test, or laboratory manual. The Code of Student Conduct is in this Bulletin and is also available in the UMSL Student Planner.

Honor Statement

The University of Missouri-St. Louis encourages students to pursue excellence within a respectful and collegial environment and to assume responsibility for the consequences of personal actions. For that reason the university requires students to reject any type of dishonest behavior.

Honesty precludes seeking, providing, or receiving any form of unauthorized assistance on tests or any type of assignment. It requires giving credit through appropriate citation to the author of materials used in written or oral assignments.

The full Student Standard of Conduct is available on the Web and in the student planner. By registering for a class at UMSL, students agree to follow this standard of integrity.
Student Conduct and Title IX Policies

By registering for a class at any University of Missouri campus, students agree to abide by the Code of Student Conduct below. For more information about student conduct contact Student Conduct and Community Standards in the Office of Student Affairs (301 Woods Hall; 314-516-5211).

Code of Student Conduct

200.010 Standard of Conduct

Amended Bd. Min. 3-20-81; Bd. Min. 8-3-90, Bd. Min 5-19-94; Bd. Min. 5-24-01, Bd. Min. 7-27-12; Bd. Min. 12-7-12; Bd. Min. 6-19-14; Revised 9-22-14 by Executive Order 41; Revised 11-3-15 by Executive Order 41; Amended 2-9-17.

A student at the University assumes an obligation to behave in a manner compatible with the University's function as an educational institution and voluntarily enters into a community of high achieving scholars. A student organization recognized by the University of Missouri also assumes an obligation to behave in a manner compatible with the University's function as an educational institution. Consequently, students and student organizations must adhere to community standards in accordance with the University's mission and expectations.

These expectations have been established in order to protect a specialized environment conducive to learning which fosters integrity, academic success, personal and professional growth, and responsible citizenship.

A. Jurisdiction of the University of Missouri generally shall be limited to conduct which occurs on the University of Missouri premises or at University-sponsored or University-supervised functions. However, the University may take appropriate action, including, but not limited to the imposition of sanctions under Sections 200.020 and 600.030 of the Collected Rules and Regulations against students and student organizations for conduct occurring in other settings, including off campus, in order to protect the physical safety of students, faculty, staff, and visitors or if there are effects of the conduct that interfere with or limit students' ability to participate in or benefit from the University's educational programs and activities.

B. A student organization is a recognized student organization which has received official approval in accordance with Section 250.010 of the Collected Rules and Regulations. To determine whether a student organization is responsible for conduct outlined in Section 200.010.C, all circumstances will be considered, including but not limited to whether:

1. The student organization approved, condoned, allowed, encouraged, assisted or promoted such conduct;
2. The prohibited behavior in question was committed by one or more student organization officers or a significant number of student organization members;
3. Student organization resources, such as funds, listservs, message boards or organization locations, are used for the prohibited conduct; and/or
4. A policy or official practice of the student organization resulted in the prohibited conduct.

C. Conduct for which students and student organizations, when applicable, are subject to sanctions falls into the following categories:

1. Academic dishonesty, including but not limited to cheating, plagiarism, or sabotage. The Board of Curators recognizes that academic honesty is essential for the intellectual life of the University. Faculty members have a special obligation to expect high standards of academic honesty in all student work. Students have a special obligation to adhere to such standards. In all cases of academic dishonesty, the instructor shall make an academic judgment about the student's grade on that work and in that course. The instructor shall report the alleged academic dishonesty to the Primary Administrative Officer.
   a. The term cheating includes but is not limited to: (i) use of any unauthorized assistance in taking quizzes, tests, or examinations; (ii) dependence upon the aid of sources beyond those authorized by the instructor in writing papers, preparing reports, solving problems, or carrying out other assignments; (iii) acquisition or possession without permission of tests or other academic material belonging to a member of the University faculty or staff; or (iv) knowingly providing any unauthorized assistance to another student on quizzes, tests, or examinations.
   b. The term plagiarism includes, but is not limited to: (i) use by paraphrase or direct quotation of author with footnotes, citations or bibliographical reference; (ii) unacknowledged use of materials prepared by another person or agency engaged in the selling of term papers or other academic materials; or (iii) unacknowledged use of original work/material that has been produced through collaboration with others without release in writing from collaborators.
   c. The term sabotage includes, but is not limited to, the unauthorized interference with, modification of, or destruction of the work or intellectual property of another member of the University community.

2. Forgery, alteration, or misuse of University documents, records or identification, or knowingly furnishing false information to the University.

3. Obstruction or disruption of teaching, research, administration, conduct proceedings, or other University activities, including its public service functions on or off campus.

4. Physical abuse or other conduct which threatens or endangers the health or safety of any person.

5. Stalking another by following or engaging in a course of conduct with no legitimate purpose that puts another person reasonably in fear for his or her safety or would cause a reasonable person under the circumstances to be frightened, intimidated or emotionally distressed.

6. Violation of the University's Equal Employment/Education Opportunity and Nondiscrimination Policy located at Section 600.010 of the Collected Rules and Regulations.

7. Violation of the University's Sex Discrimination, Sexual Harassment and Sexual Misconduct in Education/Employment Policy in Section 600.020 of the Collected Rules and Regulations.

8. Threatening or Intimidating Behaviors, defined as written or verbal conduct that causes a reasonable expectation of injury to the health or safety of any person or damage to any property or implied threats or acts that cause a reasonable fear of harm in another.
9. Participating in attempted or actual taking of, damage to, or possession without permission of property of the University or of a member of the University community or of a campus visitor.

10. Unauthorized possession, duplication or use of keys to any University facilities or unauthorized entry to or use of University facilities.

11. Violation of University policies, rules or regulations or of campus regulations including, but not limited to, those governing residence in University-provided housing, or the use of University facilities, or student organizations, or the time, place and manner of public expression.

12. Manufacture, use, possession, sale or distribution of alcoholic beverages or any controlled substance without proper prescription or required license or as expressly permitted by law or University regulations, including operating a vehicle on University property, or on streets or roadways adjacent to and abutting a campus, under the influence of alcohol or a controlled substance as prohibited by law of the state of Missouri.

13. Disruptive conduct. Conduct that creates a substantial disruption of University operations including obstruction of teaching, research, administration, other University activities, and/or other authorized non-University activities that occur on campus.

14. Failure to comply with directions of University officials acting in the performance of their duties.

15. The illegal or unauthorized possession or use of firearms, explosives, other weapons, or hazardous chemicals.

16. Hazing, defined as an act that endangers the mental or physical health or safety of a student, or an act that is likely to cause physical or psychological harm to any person within the University community, or that destroys or removes public or private property, for the purpose of initiation, admission into, affiliation with, or as a condition for continued membership in a group or organization. Participation or cooperation by the person(s) being hazed does not excuse the violation. Failing to intervene to prevent, failing to discourage, and/or failing to report those acts may also violate this policy.

17. Misuse of computing resources in accordance with University policy, including but not limited to:
   a. Actual or attempted theft or other abuse;
   b. Unauthorized entry into a file to use, read, or change the contents, or for any other purpose;
   c. Unauthorized transfer of a file;
   d. Unauthorized use of another individual’s identification and password;
   e. Use of computing facilities to interfere with the work of another student, faculty member, or University official;
   f. Use of computing facilities to interfere with normal operation of the University computing system; and
   g. Knowingly causing a computer virus to become installed in a computer system or file.

A. Preamble. The following rules of procedure in student or student organization conduct matters are hereby adopted in order to ensure insofar as possible and practicable (a) that the requirements of procedural due process in student conduct proceedings will be fulfilled by the University, (b) that the immediate effectiveness of Section 10.030, which is Article V of the Bylaws of the Board of Curators relating to student conduct and sanctions may be secured for all students in the University of Missouri, and (c) that procedures shall be definite and determinable within the University of Missouri. Student or student organization conduct involving discrimination, harassment, and sexual misconduct is governed by Section 600.030: Equity Resolution Process for Resolving Complaints of Discrimination, Harassment and Sexual Misconduct against a Student or Student Organization.

B. Definitions. As used in these rules, the following definitions shall apply:

1. Primary Administrative Officers. As used in these procedures, the Chief Student Affairs Administrator on each campus is the Primary Administrative Officer except in cases of academic dishonesty, where the Chief Academic Administrator is the Primary Administrative Officer. Each Primary Administrative Officer may appoint designee(s) who are responsible for the administration of these conduct procedures, provided all such appointments are made in writing and filed with the Chancellor of the campus and the Office of General Counsel. The Primary Administrator’s Office will certify in writing that the given designee has been trained in the administration of student conduct matters.

2. Student Panelist Pool. The student panelist pool is a panel of students appointed by the Vice Chancellor for Student Affairs, who may participate on the Student Conduct Committee. Specifically, if requested by the accused student or student organization, the Chair of the Student Conduct Committee shall select not more than three students from the Student Panelist Pool to serve as members on the Student Conduct Committee, or not more than two students to serve as members on a Hearing Panel.

3. Student. A person having once been admitted to the University who has not completed a course of study and who intends to or does continue a course of study in or through one of the campuses of the University. For the purpose of these rules, student status continues whether or not the University’s academic programs are in session.

4. Student Organization. A recognized student organization which has received official approval in accordance with Section 250.010 of the Collected Rules and Regulations. Three members of the organization may represent the student organization in all proceedings, and the registered faculty/staff advisor may be present, though not act on behalf of the student organization. Each student organization shall designate, and such designation shall be on file with the University, the individual who will receive all notices, findings, determinations and decisions on behalf of the student organization. If the student organization fails to have a designation on file with the University, the President of the organization is the default designee. The registered faculty/staff advisor will also be sent a courtesy copy of all notices, findings, determinations and decisions.

5. Student Conduct Committee. As used in these procedures, ‘Student Conduct Committee,’ hereinafter referred to as the Committee, is that body on each campus which is authorized to conduct hearings and to make dispositions under these procedures or a Hearing Panel of such body as herein defined.

6. Hearing Panel. As used in these procedures, the term ‘hearing panel’ refers to the part of the Student Conduct Committee described in Section 200.020.E.3(b) below.
C. Sanctions.

1. The following sanctions, when applicable, may be imposed upon any student or student organization found to have violated the Student Conduct Code. More than one of the sanctions may be imposed for any single violation. Sanctions include but are not limited to:
   a. **Warning.** A notice in writing to the student or student organization that there is or has been a violation of the institutional regulations.
   b. **Probation.** A written reprimand for violation of specified regulations. Probation is for a designated period of time and includes the probability of more severe sanctions if the student or student organization is found to be violating any institutional regulation(s) during the probationary period.
   c. **Loss of Privileges.** Denial of specified privileges of the student or student organization for a designated period of time.
   d. **Restitution.** Compensation by the student or student organization for loss, damage, or injury to the University or University property. This may take the form of appropriate service and/or monetary or material replacement.
   e. **Discretionary Sanctions.** Work assignments, service to the University or community, or other related discretionary assignments, or completion of educational programming or counseling.
   f. **University Housing Suspension.** Separation of the student or student organization from University owned or operated housing for a definite period of time, after which the student or student organization is eligible to return. Conditions for readmission may be specified.
   g. **University Housing Expulsion.** Permanent separation of the student or student organization from University owned or operated housing.
   h. **University Dismissal.** An involuntary separation of the student from the institution for misconduct. It is less than permanent in nature and does not imply or state a minimum separation time.
   i. **University Suspension.** Separation of the student from the University for a definite period of time, after which the student is eligible to return. Conditions for readmission may be specified.
   j. **University Expulsion.** Permanent separation of the student from the University.
   k. **Withdrawal of Recognition.** Student organization loses its official approval as a recognized student organization. May be either temporary or permanent. Conditions for future approval may be specified.

2. **Temporary Suspension.** The Chancellor or Designee may at any time temporarily suspend or deny readmission to a student from the University pending formal procedures when the Chancellor or Designee finds and believes from available information that the presence of a student on campus would seriously disrupt the University or constitute a danger to the health, safety, or welfare of members of the University community. The appropriate procedure to determine the future status of the student will be initiated within seven business days.

3. **Temporary Suspension of a Student Organization.** The Chancellor or Designee may at any time temporarily suspend the student organization's operations. University recognition, access to and use of the University campus/facilities/events and/or all other University activities or privileges for which the student organization might otherwise be eligible, pending formal procedures when the Chancellor or Designee finds and believes from available information that the presence of the student organization on campus would seriously disrupt the University or constitute a danger to the health, safety, or welfare of members of the University community. The appropriate procedure to determine the future status of the student organization will be initiated within seven business days.

D. Records Retention. Student conduct records shall be maintained for seven years after University action is completed.

E. Policy and Procedures.

1. **Preliminary Procedures.** The Primary Administrative Officer or Designee (hereafter 'Primary Administrative Officer') shall investigate any reported student or student organization misconduct before initiating formal conduct procedures and give the student or student organization the opportunity to present a personal or organizational version of the incident or occurrence. The Primary Administrative Officer shall utilize the preponderance of the evidence standard in deciding whether or not to initiate formal conduct procedures and in deciding whether or not to offer an informal disposition in accordance with Section 200.020.E.2 below. The Primary Administrative Officer may discuss with any student or student organization such alleged misconduct and the student or student organization shall attend such consultation as requested by the Primary Administrative Officer. The Primary Administrative Officer, in making an investigation and disposition, may utilize student courts and boards and/or divisional deans to make recommendations.

2. **Informal Dispositions.** The Primary Administrative Officer shall have the authority to make a determination and to impose appropriate sanctions and shall fix a reasonable time within which the student or student organization shall accept or reject a proposed informal disposition. A failure of the student or student organization either to accept or reject within the time fixed may be deemed by the University to be an acceptance of the determination, provided the student or student organization has received written notice of the proposed determination and the result of the student or student organization's failure to formally reject and, in such event, the proposed disposition shall become final upon expiration of such time. If the student or student organization rejects informal disposition it must be in writing and shall be forwarded to the Committee. The Primary Administrative Officer may refer cases to the Committee without first offering informal disposition.

3. **Formal Procedure and Disposition.**
   a. **Student Conduct Committee:**
      i. The Committee shall be appointed by the Vice Chancellor for Student Affairs and shall have the authority to impose appropriate sanctions upon any accused student or students or student organization appearing before it.
      ii. When deemed appropriate or convenient by the Chair of the Committee, the Chair may divide the Committee into Hearing Panels each consisting of no less than five (5) Committee members of which no more than two (2) shall be students. If the Chair creates such Hearing Panels, the Chair of the Committee shall designate a Hearing Panel Chair. A Hearing Panel has the authority of the whole Committee in those cases assigned to it. The Chair of the Committee or a Hearing Panel Chair shall count as one member of the Committee or Hearing Panel and have the same rights as other members.
      iii. The Vice Chancellor for Student Affairs shall appoint a panel of students, to be known as the Student Panelist Pool. Upon written request of an accused student or the student organization designee before the Committee made at least
seventy-two (72) hours prior to the hearing, the Chair of the Committee shall appoint from the Student Panelist Pool not more than three students to sit with the Committee or the Hearing Panel Chair shall appoint two students to sit with the Hearing Panel for that particular case. When students from the Student Panelist Pool serve as members of the Committee or as members of the Hearing Panel, they shall have the same rights as other members of the Committee or Hearing Panel.

b. General Statement of Procedures. A student or student organization accused of violating the Student Conduct Code is entitled to a written notice and a formal hearing unless the matter is disposed of under the rules for informal disposition. Student conduct proceedings are not to be construed as judicial trials and need not wait for legal action before proceeding; but care shall be taken to comply as fully as possible with the spirit and intent of the procedural safeguards set forth herein. The Office of the General Counsel shall be legal adviser to the Committee and the Primary Administrative Officer, but the same attorney from the Office of the General Counsel shall not perform both roles with regard to the same case.

c. Notice of Hearing. At least fourteen (14) business days prior to the Student Conduct Committee Hearing, or as far in advance as is reasonably possible if an accelerated resolution process is scheduled with the consent of the accused student or student organization, the Primary Administrative Officer will send a letter to the accused student or student organization with the following information:
   i. A description of the alleged violation(s) and applicable policies
   ii. A description of the applicable procedures
   iii. A statement of the potential sanctions/remedial actions that could result; and
   iv. The time, date and location of the hearing. If any party does not appear at the hearing, the hearing will be held in their absence. For compelling reasons, the hearing may be rescheduled.

   1. This Notice of Charges letter will be made in writing and will be delivered either: 1) in person, 2) by email only to the Party's University-issued email account if the Party has consented in writing to receipt of all notifications by email; or 3) mailed to the mailing address of the respective Party as indicated in the official University records and emailed to the Party's University-issued email account. If there is no local address on file, mail will be sent to the Party's permanent address.

   Notice is presumptively deemed delivered, when: 1) provided in person or 2) emailed to the individual (when prior consent - whether electronically or in writing - has been given to receipt of all notifications by email or 3) when mailed and emailed.

   Any request to reschedule the hearing shall be made in writing to the Chair, who shall have the authority to reschedule the hearing if the request is timely and made with good cause. The Chair shall notify the Primary Administrative Officer and the accused student or student organization of the new date for the hearing. If the accused student or student organization fails to appear at the scheduled time, the Committee may hear and determine the matter.

4. Right to Petition for Review: (other than University expulsion, University dismissal, or University suspension or Withdrawal of Recognition).
   a. In all cases where the sanction imposed by the Committee is other than University expulsion, University dismissal, University suspension or Withdrawal of Recognition, the Primary Administrative Officer or the accused student or student organization may petition the Chancellor or Designee in writing for a review of the decision within five (5) business days after written notification. A copy of the Petition for Review must also be served upon the non-appealing party or parties within such time. The Petition for Review must state the grounds or reasons for review in detail, and the non-appealing party or parties may answer the petition within five (5) business days.
   b. The Chancellor or Designee (hereafter 'the Chancellor') may grant or refuse the right of review. In all cases where the Petition for Review is refused, the action of the Committee shall be final. If the Chancellor reviews the decision, the action of the Chancellor shall be final unless it is to remand the matter for further proceedings.

5. Right of Appeal (University expulsion, University dismissal, University suspension only or Withdrawal of Recognition only).
   a. When an accused student is expelled, dismissed, or suspended from the University or when a student organization has its recognition withdrawn, either temporarily or permanently, by the Committee, the Primary Administrative Officer, the accused student or student organization may appeal such decision to the Chancellor by filing written notice of appeal stating the grounds or reasons for appeal in detail with the Chancellor within ten (10) business days after notification of the decision of the Committee. The appealing party may file a written memorandum for consideration by the Chancellor with the Notice of Appeal, and the Chancellor may request a reply to such memorandum by the appropriate party.
   b. The Chancellor shall review the record of the case and the appeal documents and may affirm, reverse, or remand the case for further proceedings. The Chancellor shall notify the accused student or student organization in writing of the decision on the appeal. The action of the Chancellor shall be final unless it is to remand the matter for further proceedings.

   a. In cases of suspension, dismissal, or expulsion where a Notice of Appeal is filed within the required time, a student may petition the Chancellor in writing for permission to attend classes pending final determination of appeal. The Chancellor may permit a student to continue in school under such conditions as may be designated pending completion of appellate procedures, provided such continuance will not seriously disrupt the University or constitute a danger to the health, safety, or welfare of members of the University community. In such event, however, any final sanctions imposed shall be effective from the date of the decision of the Committee.
   b. In cases of withdrawal of recognition where a Notice of Appeal is filed within a required time, a student organization may petition the Chancellor in writing to stay the withdrawal of recognition while the appeal is pending. The Chancellor may stay the withdrawal of recognition under such conditions as may be designated pending completion of appellate procedures, provided such continuance will not seriously disrupt the University or constitute a danger to the health, safety, or welfare of members of the University community.
7. Student Honor System. Forums under the student honor systems established for investigating facts, holding hearings, and recommending and imposing sanctions are authorized when the student honor code or other regulations containing well-defined jurisdictional statements and satisfying the requirements of Section 10.030, which is Article V of the Bylaws of the Board of Curators, have been reduced to writing and have been approved by the Chancellor and the Board of Curators and notice thereof in writing has been furnished to students subject thereto. Though the student honor system has jurisdiction, together with procedures set forth therein, instead of the Primary Administrative Officer, the standard of conduct called for in any such student honor system shall be deemed to contain at a minimum the same standards set forth in Section 200.010, entitled Standards of Conduct. Procedures shall satisfy the requirements of the Board of Curators’ Bylaws, Section 10.030, which is Article V, and shall contain procedures herein before stated insofar as appropriate and adaptable to the particular situation and shall be approved by the Chancellor and the General Counsel. Students subject to student honor systems shall have the rights of appeal as set forth in Section 200.020.E.6 and 7.

F. Hearing Procedures.

1. Pre-Hearing Witness List and Documentary Evidence. At least seven (7) business days prior to the hearing, the student or representatives of the student organization will provide the Primary Administrative Officer a list of the names of the proposed witnesses and copies of all proposed documentary evidence. At least five (5) business days prior to the hearing, the Primary Administrative Officer will have the names of proposed witnesses, copies of all pertinent documentary evidence and a copy of any investigative report available for the student or representatives of the student organization, and a copy of the same will be sent to the Hearing Panel Chair.

2. Conduct of Hearing. The Chair shall preside at the hearing, call the hearing to order, call the roll of the Committee in attendance, ascertain the presence or absence of the student or representatives of the student organization accused of misconduct, read the notice of hearing and charges, verify the receipt of notices of charges by the student or student organization, report any continuances requested or granted, establish the presence of any adviser or counselor of the student or student organization and the registered faculty/staff adviser of the student organization, and call to the attention of the accused student or student organization and the registered faculty/staff adviser of the student organization the others' presentation(s).

a. Opening Statements.
   i. The Primary Administrative Officer shall make opening remarks outlining the general nature of the case and testify to any facts the investigation has revealed.
   ii. The accused student or student organization may make a statement to the Committee about the charge at this time or at the conclusion of the University's presentation.

b. University Evidence.
   i. University witnesses are to be called and identified or written reports of evidence introduced as appropriate.
   ii. The Committee may question witnesses at any time.
   iii. The accused student or student organization or, with permission of the Committee, the adviser or counselor may question witnesses or examine evidence at the conclusion of the University's presentation.

b. Accused Student or Student Organization Evidence.
   i. If the accused student or student organization has not elected to make a statement earlier under a.(2) above, the accused student or student organization shall have the opportunity to make a statement to the Committee about the charge.
   ii. The accused student or student organization may present evidence through witnesses or in the form of written memoranda.
   iii. The Committee or Hearing Panel may question the accused student or representatives of the accused student organization or witnesses at any time. The Primary Administrative Officer may question the accused student or witnesses.

3. Rights of Accused upon Hearing. A student or student organization appearing before a Committee shall have the right to:
   a. Be present at the hearing
   b. Have an adviser or counselor and to consult with such adviser or counsel during the hearing;
c. Hear or examine evidence presented to the Committee;

d. Question witnesses present and testifying;

e. Present evidence by witnesses or affidavit;

f. Make any statement to the Committee in mitigation or explanation of the conduct in question;

g. Be informed in writing of the findings of the Committee and any sanctions it imposes; and

h. Request review or appeal to the Chancellor as herein provided.

4. Determination by the Student Conduct Committee. The Committee shall make its findings and determinations based on the preponderance of the evidence in executive session out of the presence of the Primary Administrative Officer and the accused student or student organization. Separate findings are to be made:

a. As to the conduct of the accused student or student organization, and

b. On the sanctions, if any, to be imposed. No sanctions shall be imposed on the accused student or student organization unless a majority of the Committee present is convinced by the preponderance of the evidence that the student or student organization has committed the violation charged. In determining what sanction, if any, is appropriate, the Committee may take into consideration the previous disciplinary history of the accused student or student organization.

5. Official Report of Findings and Determinations. The Committee shall promptly consider the case on the merits and make its findings and determination and transmit them to the Primary Administrative Officer/Designee(s) and the accused student or student organization designee.

6. Other Procedural Questions. Procedural questions which arise during the hearing not covered by these general rules shall be determined by the Chair, whose ruling shall be final unless the Chair shall present the question to the Committee at the request of a member of the Committee, in which event the ruling of the Committee by majority vote shall be final.

7. General Rules of Decorum. The following general rules of decorum shall be adhered to:

a. All requests to address the Committee shall be addressed to the Chair.

b. The Chair will rule on all requests and points of order and may consult with Committee's legal adviser prior to any ruling. The Chair’s ruling shall be final and all participants shall abide thereby, unless the Chair shall present the question to the Committee at the request of a member of the Committee, in which event the ruling of the Committee by majority vote shall be final.

c. Rules of common courtesy and decency shall be observed at all times.

d. An adviser or counselor may be permitted to address the Committee at the discretion of the Committee. An adviser or counselor may request clarification of a procedural matter or object on the basis of procedure at any time by addressing the Chair after recognition.

8. Record of Hearing. An audio, video, digital or stenographic record of the hearing shall be maintained. The notice, exhibits, hearing record and the findings and determination of the Committee shall become the ‘Record of the Case’ and shall be filed in the Office of the Primary Administrative Officer and for the purpose of review or appeal be accessible at reasonable times and places to the University, and the accused student(s) or student organization designee.

UMLST Anti-Hazing Policy

Hazing, defined by the Fraternity Executive Association and accepted by the University of Missouri St. Louis, is any intentional action taken or situation created, whether on or off University or chapter premises, that produces mental or physical discomfort, embarrassment, harassment, or ridicule. This includes but is not limited to: paddling in any form, creation of excessive fatigue, physical or psychological shocks, wearing apparel in public, stunts and buffoonery, morally degrading or humiliating games and activities, involuntary labor, or any activity not consistent with the University Of Missouri Board Of Curators Standard Of Student Conduct.

The University of Missouri-St. Louis does not condone nor tolerate hazing of any type by any organization, or by an individual against another individual.

The University and the Office of Student Involvement will investigate any incident in which a charge of hazing has been made. University recognition may be temporarily withdrawn pending hearings and due process procedures.

1. Automatic and indefinite suspension of campus recognition with an accompanying loss of all campus privileges, (i.e. use of facilities, student services, etc.)

2. Disciplinary action against those members involved in the incident(s) including suspension or expulsion from the University.

The following diversity, equity and inclusion policies have been established by the University of Missouri Board of Curators to govern the academic and administrative functions of the four campuses and are available on the UM System website.

600.010 Equal Employment/Educational Opportunity and Nondiscrimination Policy

600.070 Policy Related to Students with Disabilities

330.070 Affirmative Action on Committee Appointments

Students may contact Student Affairs or the Title IX Office to lodge complaints or seek information about these procedures.

Equal Employment/Educational Opportunity

600.010 Equal Employment/Educational Opportunity and Nondiscrimination Policy

Bd. Min. 2-19-71; Reaffirmed Bd. Min. 10-14-77; Amended Bd. Min. 5-23-80; Amended Bd. Min. 10-15-82; Amended Bd. Min. 10-16-03; Amended Bd. Min. 6-19-14; Revised 9-22-14 by Executive Order 41. Revised 2-5-15; Amended 2-9-17 with an effective date of 3-1-17; Revised 7-28-20 with effective date of 8-14-20.

A. Equal Employment/Educational Opportunity Policy and Statement of Nondiscrimination. The Curators of the University of Missouri does hereby reaffirm and state the policy of the University of Missouri on Equal Employment/Educational Opportunity and Nondiscrimination.

1. Equal Opportunity is and shall be provided for all employees and applicants for employment on the basis of their demonstrated ability and competence without unlawful discrimination on the basis of their race, color, national origin, ancestry, religion, sex, pregnancy, sexual orientation, gender identity, gender expression, age, disability, protected veteran status, or any other status protected by applicable
state or federal law. This policy shall not be interpreted in such a manner as to violate the legal rights of religious organizations or the recruiting rights of military organizations associated with the Armed Forces or the Department of Homeland Security of the United States of America.

2. Equal Opportunity is and shall be provided for all students and applicants for admission without unlawful discrimination on the basis of their race, color, national origin, ancestry, religion, sex, pregnancy, sexual orientation, gender identity, gender expression, age, disability, protected veteran status, or any other status protected by applicable state or federal law. This policy shall not be interpreted in such a manner as to violate the legal rights of religious organizations or the recruiting rights of military organizations associated with the Armed Forces of the Department of Homeland Security of the United States of America.

3. The University of Missouri does not discriminate on the basis of race, color, national origin, ancestry, religion, sex, pregnancy, sexual orientation, gender identity, gender expression, age, disability, protected veteran status, and any other status protected by applicable state or federal law. As used in this policy, the word “sex” is also inclusive of the term “gender.”

The University’s Nondiscrimination policies apply to any phase of its employment process, any phase of its admission or financial aid programs, other aspects of its educational programs or activities, and instances occurring in other settings, including off-campus, if there are effects of the conduct that interfere with or limit any person’s ability to participate in or benefit from the University’s educational programs, activities or employment. Notices of Nondiscrimination are posted online and in physical locations for the UM System and each of the Universities in the System.

The President of the University shall establish affirmative action procedures to implement this policy.

B. Definition of Discrimination and Harassment. For purposes of determining whether a particular course of conduct constitutes prohibited discrimination or harassment under this policy, the following definitions will be used:

1. Conduct that constitutes sex discrimination (including discrimination on the basis of sex, pregnancy, gender identity, and gender expression), sexual harassment, sexual misconduct, stalking on the basis of sex, dating/intimate partner violence or sexual exploitation is defined in Section 600.020 – Sex Discrimination, Sexual Harassment and Sexual Misconduct in Employment/Education Policy.

2. Conduct that is based upon an individual’s race, color, national origin, ancestry, religion, sexual orientation, age, disability, protected veteran status, or any other status protected by applicable state or federal law that:
   a. Adversely affects a term or condition of employment, education, living environment or participation in a University activity; or
   b. Creates a hostile environment by being sufficiently severe or pervasive and objectively offensive that it interferes with, limits, or denies the ability to participate in or benefit from the University’s educational programs, activities, or employment.

C. Equity Officers. Duties and responsibilities of the University’s Equity Officers include monitoring and oversight of overall implementation and compliance with the University’s Equal Employment/Educational Opportunity and Nondiscrimination Policy, including coordination of training, education, communications and coordination with the equity resolution processes for faculty, staff, students and other members of the University community and investigation of complaints of discrimination, harassment, and retaliation.

Any person having inquiries concerning this policy should contact their respective UM System or campus Equity Officer. The following individuals serve as Equity Officers and are designated to handle inquiries regarding the Anti-Discrimination policies and to serve as the coordinators for purposes of compliance with those policies:

University of Missouri-St. Louis

Dana Beteet Daniels
Title IX Coordinator and Chief Equity Officer
Senior Human Resources Consultant
Address:
220 Woods Hall
St. Louis, MO 63121
Telephone: (314) 516-4538
Email: dana@umsl.edu
www.umsl.edu/title-ix

NOTE: The above-listed contact information for Title IX Coordinators may be updated as needed and without requiring the approval of the Board of Curators.

If the Complaint involves the University’s Equity Officer, Complaints may be made to the System Equity Officer. If the Complaint involves the System Equity Officer, reports may be made to the System President. The contact information for the System President is:

Office of the President
321 University Hall
Columbia, MO 65211
Telephone: (573) 882-2011
Email: umpresident@umsystem.edu

NOTE: The above-listed contact information for Equity Officers may be updated as needed and without requiring the approval of the Board of Curators.

D. Equity Resolution Processes. The University is committed to preventing and eliminating impermissible discrimination and harassment in its educational programs, activities and employment. To that end, the University maintains policies regarding reporting, investigation, and resolution of complaints of discrimination, harassment, or sexual misconduct. Specifically, please see:

1. Section 600.030 – Equity Resolution Process for Resolving Complaints of Discrimination, Harassment and Sexual Misconduct Against a Student or Student Organization
2. Section 600.040 – Equity Resolution Process for Resolving Complaints of Discrimination, Harassment and Sexual Misconduct Against a Faculty Member
3. Section 600.050 – Equity Resolution Process for Resolving Complaints of Discrimination, Harassment and Sexual Misconduct Against a Staff Member
4. Section 600.060 - Equity Resolution Process for Resolving Complaints of Discrimination and Harassment Against the University of Missouri

E. Retaliation. Retaliation is any adverse action taken against a person because of that person’s participation in protected activity. The University strictly prohibits retaliation against any person for making any good faith report of discrimination, harassment, or sexual misconduct, or for filing, testifying, assisting, or participating in any investigation or proceeding.
involving allegations of discrimination, harassment or sexual misconduct. Any person who engages in such retaliation shall be subject to disciplinary action, up to and including expulsion or termination, in accordance with applicable procedures. Any person who believes they have been subjected to retaliation is encouraged to promptly notify the Equity Officer or Title IX Coordinator. The University will promptly investigate all claims of retaliation.

F. False Reporting. False reporting is making an intentional false report or accusation in relation to this policy as opposed to a report or accusation, which, even if erroneous, is made in good faith. False reporting is a serious offense subject to appropriate disciplinary action up to and including expulsion or termination.

G. Witness Intimidation or Harassment. No individual participating in an investigation relating to a report or Complaint that a violation of this policy has occurred should, directly or through others, take any action which may interfere with the investigation. The University prohibits attempts to or actual intimidation or harassment of any potential witness. Failure to adhere to these requirements may lead to disciplinary action ranging up to and including expulsion or termination.

H. U.S. Department of Education – Office for Civil Rights. Inquiries concerning discrimination in educational opportunities also may be referred to the United States Department of Education’s Office of Civil Rights. For further information on notice of nondiscrimination and for the address and phone number of the U.S. Department of Education office which serves your area call 1-800-421-3481. The State of Missouri regional Office for Civil Rights is located in Kansas City and is available to provide assistance.

600.030 Resolution Process for Resolving Complaints of Sexual Harassment under Title IX - for matters involving conduct alleged to have occurred on or after August 14, 2020

A. General. The University will promptly and appropriately respond to any report of violation of the University’s Title IX policies.

B. Jurisdiction. Jurisdiction of the University of Missouri under the Title IX policies shall be limited to sexual harassment which occurs in an education program or activity of the University of Missouri against a person in the United States. For purposes of this policy, “education program or activity” includes locations, events, or circumstances over which the University exercised substantial control over both the Respondent and the context in which the conduct occurs, and includes any building owned or controlled by a student organization that is officially recognized by the University. This policy does not apply to sexual harassment which occurs outside of the United States, even when the conduct occurs in an education program or activity of the University.

If a Complainant alleges or the investigation suggests that another University policy violation occurred in concert with an alleged violation of the University’s Title IX policies, the University shall have the authority to investigate and take appropriate action regarding the alleged violations of other University policies pursuant to this process. In conducting such investigations, the Title IX Coordinator(s), and/or their Investigator may consult with and/or seek guidance from the Equity Officer, Student Conduct Coordinator, or other University officials as appropriate. If the allegations in a Formal Complaint that fall under this policy are dismissed, the University may discontinue the process under this policy and proceed under the applicable University procedure for all remaining allegations in the Formal Complaint.

C. Definitions:

1. Academic Medical Center. University of Missouri Hospitals and Clinics, and other Academic Medical Centers as may be designated by the University in the future.

2. Academic Medical Center Resolution Process. Resolution of a Formal Complaint by a decision-maker making a finding on each of the alleged policy violations and a finding on sanctions.

3. Administrative Resolution. A voluntary informal resolution process where a decision-maker makes a finding on each of the alleged policy violations in a Formal Complaint and a finding on sanctions without a hearing.

4. Advisors. The individuals selected by the Complainant and the Respondent, or if a Party does not have their own Advisor, selected by the University, to conduct all cross-examination and other questioning on behalf of a Party at a hearing; an Advisor may, but is not required to, be an attorney.

5. Alternate Methods of Notice: Methods of providing Notice to a Party other than in person or by email to the Party’s University email account; these include email to another email account specified by the Party, or a Party’s designation of an address to which Notice may be mailed via U.S. Mail; a Party seeking to designate an Alternate Method of Notice must provide such designation in writing to the Title IX Coordinator.

6. Complainant. “Complainant” means an individual who is alleged to be the victim of conduct that could constitute sexual harassment.

7. Emergency Removal Appeal Individual/Committee: An individual or committee of three (3) individuals appointed by the Chancellor (or Designee) to hear appeals of an Emergency Removal decision by the Title IX Coordinator.

8. Equity Resolution Appellate Officer. For Staff, Student(s) or Student Organization Respondents, a trained, senior-level administrator appointed by the Chancellor (or Designee) to hear appeals stemming from the Title IX Resolution Process. For Faculty Respondents, the Chancellor (or Designee).

9. Equity Resolution Hearing Panel (“Hearing Panel”). A group of two (2) trained Equity Resolution Hearing Panelist Pool members who, together with the Hearing Officer, serve as the Hearing Panel for a specific Formal Complaint. A good faith attempt will be made for the Hearing Panel to include at least one faculty member and one administrator or staff member. The Hearing Officer shall serve as the Chair of the Hearing Panel.

10. Equity Resolution Hearing Panelists Pool (“Hearing Panelist Pool”). A group of at least five (5) faculty and five (5) administrators and/or staff selected by the Chancellor (or Designee) to serve as hearing panel members in the Hearing Panel Resolution process. The faculty hearing panel members selected by the Chancellor (or Designee) shall be selected from a list of no less than ten (10) faculty members proposed by the
faculty council/senate. Selection of hearing panel pool members shall be made with an attempt to recognize the diversity of the University community. Hearing Panel members from one University may be asked to serve on a hearing panel involving another University.

11. **Formal Complaint.** Formal Complaint means a written document filed by a Complainant or signed by the Title IX Coordinator alleging sexual harassment against a Respondent and requesting that the University investigate the allegation of sexual harassment. The phrase “document filed by a Complainant” means a document or electronic submission (such as by electronic mail or an online portal provided for this purpose by the University) that contains the Complainant’s physical or digital signature, or otherwise indicates that the Complainant is the person filing the Formal Complaint.

12. **Hearing Officer.** A trained individual appointed by the Chancellor (or Designee) to preside over a hearing and act as a member of the Hearing Panel, and to rule on objections and the relevancy of questions and evidence during the hearing.

13. **Hearing Panel Decision.** Resolution of a Formal Complaint by an Equity Resolution Hearing Panel recommending or making a finding on each of the alleged policy violations and sanctions, if applicable.

14. **Hearing Panelist Pool Chair (“Pool Chair”).** The Hearing Panelist Pool Chair is selected by the Chancellor (or Designee). The Pool Chair randomly selects and coordinates the hearing panel members to serve on the Hearing Panel for a specific Formal Complaint. The Pool Chair may serve as a panel member for a specific Formal Complaint.

15. **Informal Resolution.** A voluntary resolution process using alternative dispute resolution mechanisms such as mediation, facilitated dialogue, administrative resolution, or restorative justice.

16. **Investigators.** Investigators are trained individuals appointed by the Title IX Coordinator (or designee) to conduct investigations of the alleged violations of the University’s Title IX Policies.

17. **Parties.** The Complainant and the Respondent are collectively referred to as the Parties.

18. **Record of the Case.** The Record of the Case in the Section 600.030 Process includes, when applicable: All Notices to the Parties; investigative report; recordings of Party and witness interviews; exhibits used at a hearing or at the Academic Medical Center (AMC) Meeting; recordings of meetings between the AMC decision-maker and Parties and witnesses, if any; the hearing record (an audio or audiovisual record of the hearing); any determination of dismissal of all or part of a Formal Complaint; the determination on each of the alleged policy violations and sanctions by either the Hearing Panel or decision-maker; and the decision on the appeal, if any, including the request for appeal, any additional evidence submitted for the appeal, and written arguments of the Parties.

19. **Report.** Any verbal or written communication or notice of an alleged violation of the University’s Title IX Policies.

20. **Respondent.** Respondent means an individual who has been reported to be the perpetrator of conduct that could constitute sexual harassment.

21. **Rules of Decorum.** Hearing process rules to which Parties and their Advisors must adhere during any Hearing under this policy.

22. **Student.** A person having once been admitted to the University who has not completed a course of study and who intends to or does continue a course of study in or through one of the Universities of the University System. For the purpose of these rules, student status continues whether or not the University’s academic programs are in session.

23. **Student Organization.** A recognized student organization which has received Official Approval in accordance with Section 250.010 of the Collected Rules and Regulations. Three members of the organization may represent the student organization as the Party.

24. **Support Person.** An individual selected by a Party to accompany the Party to all meetings and interviews to provide support for the Party throughout the Title IX Process. A Support Person may not attend a hearing under the Title IX process unless also serving as a Party’s Advisor.

25. **Title IX Coordinator.** The Title IX Coordinator is a trained administrator designated by the Chancellor (or Designee) to respond to reports of sexual harassment; and to receive and assist with the Title IX process for Formal Complaints alleging violation of the University’s Sexual Harassment in Employment/ Education Policy. All references to “Title IX Coordinator” throughout this policy refer to the Title IX Coordinator or the Title IX Coordinator’s designee.

26. **University’s Title IX Policies.** The University’s Title IX Policies include this Policy and the Sexual Harassment in Employment/Education Policy located at Section 600.020 of the Collected Rules and Regulations (CRR).

D. **Making a Report.** Any person (whether or not the person reporting is the Complainant) may report sexual harassment to the Title IX Coordinator. Such Reports may be made in person, or at any time (including during non-business hours) by mail, by telephone, or by electronic mail, using the contact information listed for the Title IX Coordinator, by an online portal set up by the University for this purpose, or by any other means that results in the Title IX Coordinator receiving the person’s verbal or written report. Individuals may also contact University police if the alleged offense may also constitute a crime. In order to foster reporting and participation, the University may provide amnesty to Parties and witnesses accused of minor student conduct violations ancillary to the incident.

E. **Preliminary Contact.** Upon receiving a Report, the Title IX Coordinator shall promptly contact the Complainant to discuss the availability of Supportive Measures as defined herein, consider the Complainant’s wishes with respect to Supportive Measures, inform the Complainant of the availability of Supportive Measures with or without the filing of a Formal Complaint, and explain to the Complainant the process for filing a Formal Complaint. If the identity of the Complainant is unknown, the Title IX Coordinator may conduct a limited investigation sufficient to identify the Complainant to the extent possible.

F. **Filing of a Formal Complaint.** A Complainant may file a Formal Complaint with the Title IX Coordinator in person, by mail, or by electronic mail, by using the contact information set forth in CRR 600.020, or through an online portal provided for this purpose by the University. At the time of filing a Formal Complaint, the Complainant must be participating in or attempting to participate in an education program or activity of the University.

The Title IX Coordinator may sign a Formal Complaint when they believe that with or without the Complainant’s desire to participate in this process, a non-deliberately indifferent response to the allegations requires an investigation. Where the Title IX Coordinator signs a Formal Complaint,
the Title IX Coordinator is not a Complainant or otherwise a Party under this policy.

If the Respondent files a Formal Complaint against the Complainant within ten (10) business days of the date of the Notice of Allegations where the allegations of sexual harassment in both Formal Complaints arise out of the same facts or circumstances, the University will consolidate the Formal Complaints for purposes of investigation and resolution in accordance with this policy.

The University may consolidate Formal Complaints as to allegations of sexual harassment against more than one Respondent, or by more than one Complainant against one or more Respondents, or by one Party against the other Party where the allegations of sexual harassment arise out of the same facts or circumstances. If the Respondent files a Formal Complaint against the Complainant more than ten (10) business days after the date of the Notice of Allegations where the allegations of sexual harassment in both Formal Complaints arise out of the same facts or circumstances, the University may consolidate the Formal Complaints for purposes of investigation and resolution in accordance with this policy. Where this process involves more than one Complainant or more than one Respondent, each Complainant and each Respondent shall be entitled and subject to all of the rights and obligations set forth herein.

G. Notice of Allegations:

1. Upon receipt of a Formal Complaint, the Title IX Coordinator will provide a written notice to the known Parties that includes the following:
   a. A description of the University’s Title IX Process, including Informal Resolution;
   b. Notice of the allegations of sexual harassment, including sufficient details known at the time. Sufficient details include the identities of the Parties involved in the incident, if known; the conduct allegedly constituting the sexual harassment; and the date and location of the alleged incident.
   c. A statement that the Respondent is presumed not responsible for the alleged conduct and that a determination regarding responsibility is made at the conclusion of the Title IX process.
   d. A statement reminding the Respondent that they have the right to file a report or Formal Complaint with the Title IX Coordinator; however, both Parties are advised that retaliation against any Party is prohibited.
   e. A statement notifying the Parties of the availability of Supportive Measures.
   f. A statement notifying the Parties of their right to have an Advisor of their choice, who may be, but is not required to be, an attorney. The Parties will be advised that if they do not have an Advisor to conduct cross-examination at a hearing on their behalf, the University will appoint such an Advisor; this Advisor may be, but is not required to be, an attorney. (This provision does not apply to matters proceeding under the process for Academic Medical Centers set forth in Section R).
   g. A statement notifying the Parties that they may have a Support Person selected by a Party accompany the Party to all meetings and interviews to provide support for the Party throughout the Title IX Process. A Support Person may not attend a hearing under the Title IX process unless also serving as a Party’s Advisor.
   h. A statement notifying the Parties that they will be permitted to inspect and review any evidence obtained as part of the investigation that is directly related to the allegations raised in the Formal Complaint, including the evidence upon which the University does not intend to rely in reaching a determination regarding responsibility, and including inculpatory and exculpatory evidence whether obtained from a Party or other source.
   i. A statement notifying the Parties that they must be truthful when making any statement or providing any information or evidence to the University throughout the Title IX process, and all documentary evidence must be genuine and accurate. False statements and fraudulent evidence by an employee may be the basis for personnel action pursuant to CRR 370.010 or HR 601, or other applicable University policies, or for disciplinary action pursuant to CRR 200.010 for students.
   j. A statement that nothing in the Title IX process is intended to supersede nor expand any rights the individual may have under applicable state or federal statutory laws or the U.S. Constitution.
   k. A statement informing a Party that all notices hereafter will be sent via their University-issued email account, unless they provide to the Title IX Coordinator an alternate method of notification. If a Party does not have a University-issued email account, all notices will be via U.S. Mail unless they provide the Title IX Coordinator with a preferred method of notification.

2. The Notice of Allegations will be made in writing to the Parties by email to the Party’s University-issued email account, with a read-receipt. If a read-receipt is not returned within one (1) business day or the Party does not have a University-issued email account, the Notice of Allegations shall be sent via U.S. Mail postage pre-paid to the last known address of the Party. Notice also may be provided in person to either Party. Notice is presumptively deemed delivered, when: 1) provided in person, 2) emailed to the individual, or 3) when mailed.

H. Supportive Measures. Supportive measures are non-disciplinary, non-punitive individualized services offered as appropriate, as reasonably available, and without fee or charge to the Complainant or the Respondent before or after the filing of a Formal Complaint or where no Formal Complaint has been filed. These measures are designed to restore or preserve equal access to the University’s education program or activity without unreasonably burdening the other Party, including measures designed to protect the safety of all Parties or the University’s education environment, or deter sexual harassment. The University will maintain as confidential any Supportive Measures provided to the Complainant or Respondent, to the extent that maintaining such confidentiality would not impair the ability of the University to provide the Supportive Measures. The Title IX Coordinator is responsible for the effective implementation of Supportive Measures. Supportive Measures may include:

1. Referral and facilitating contact for the Complainant or Respondent for counseling or other support services.
2. Mutual restrictions on contact between the Parties.
3. Providing campus escort services to the Parties.
4. Increased security and monitoring of certain areas of the campus.
5. Adjusting the extracurricular activities, work schedules, work assignments, supervisory responsibilities, or work arrangements of the Complainant and/or the Respondent, as appropriate.

6. If either Party is a student:
   a. Referral of that Party to academic support services and any other services that may be beneficial to the Party.
   b. Adjusting the courses, assignments, and/or exam schedules of the Party.
   c. Altering the on-campus housing assignments, dining arrangements, or other campus services for the Party.

7. Providing limited transportation accommodations for the Parties.

8. Informing the Parties of the right to notify law enforcement authorities of the alleged incident and offering to help facilitate such a report.

9. Implementing an Emergency Removal of a Respondent from the University's education program or activity on an emergency basis, if the Title IX Coordinator, after conducting an individualized safety and risk analysis, determines that an immediate threat to the physical health or safety of any student or other individual arising from the allegations of sexual harassment, justifies removal.
   a. In all cases in which an Emergency Removal is imposed, the Respondent will immediately be given notice and an opportunity to challenge the decision of the Title IX Coordinator either prior to such Removal being imposed, or as soon thereafter as reasonably possible but no later than five (5) business days, to show cause why the removal should not be implemented. Any such challenge shall be made in writing and directed to the Title IX Coordinator who will forward such challenge to the Emergency Removal Appeal Individual/Committee, which will make a final decision on removal within three (3) business days.
   b. Violation of an Emergency Removal under this policy may be grounds for discipline.

10. Suspending, on an interim basis, a Respondent Student Organization’s operations, University recognition, access to and use of the University campus/facilities/events and/or all other University activities or privileges for which the Respondent Student Organization might otherwise be eligible, pending the completion of the Title IX Process when the Title IX Coordinator finds and believes from available information that the presence of the student organization on campus would seriously disrupt the University or constitute a danger to the health, safety, or welfare of members of the University community. The appropriate procedure to determine the future status of the student organization will be initiated within seven (7) business days.

11. Implementing an administrative leave for an employee in accordance with University Human Resources Policies. Administrative leave for an employee is not an Emergency Removal under this policy.

I. Employees and Students Participating in the Title IX Process. All University employees and students must be truthful when making any statement or providing any information or evidence to the University throughout the process, including but not limited to the Investigator, Title IX Coordinator, the Hearing Panel and/or the Equity Resolution Appellate Officer, and all documentary evidence must be genuine and accurate. False statements or fraudulent evidence provided in this process, including but not limited to the Investigator, Title IX Coordinator, Hearing Panel and/or the Equity Resolution Appellate Officer, by an employee may be the basis for personnel action pursuant to CRR 370.010 or HR 601, or other applicable University policies, or if by a student may be the basis for disciplinary action pursuant to the provisions of CRR 200.010. However, this obligation does not supersede nor expand any rights the individual may have under applicable state or federal statutory law or the U.S. Constitution. Nothing in this provision is intended to require a Party or witness to participate in the process. The fact that a determination has been made that a Respondent has or has not violated any policy is not sufficient grounds, by itself, to declare that a false statement or fraudulent evidence has been provided by a Party or witness.

No employee or student, directly or through others, should take any action which may interfere with the investigation. Employees and students are prohibited from attempting to or actually intimidating or harassing any potential witness. Failure to adhere to these requirements may lead to disciplinary action, up to and including expulsion or termination.

J. Rights of the Parties in the Title IX Process

1. To be treated with respect by University officials.
2. To be free from retaliation.
3. To have access to University support resources (such as counseling and mental health services and University health services).
4. To request a no contact directive between the Parties.
5. To have a Support Person of the Party’s choice accompany the party to all interviews and meetings (excluding hearings) throughout the Title IX Process.
6. To refuse to have an allegation resolved through the Informal Resolution Processes.
7. To receive prior to a hearing or other time of determination regarding responsibility, an investigative report that fairly summarizes the relevant evidence in an electronic format or hard copy for their review and written response.
8. To have an opportunity to present a list of potential witnesses and provide evidence to the Investigator.
9. To have Formal Complaints heard in substantial accordance with these procedures.
10. To receive written notice of any delay of this process or limited extension of time frames for good cause which may include considerations such as the absence of a Party, a Party’s Advisor or a witness; concurrent law enforcement activity; or the need for language assistance or accommodation of disabilities.
11. To be informed of the finding, rationale, sanctions and remedial actions.
12. To report the matter to law enforcement (if applicable) and to have assistance in making that report.
13. To have an opportunity to appeal the dismissal of all or a portion of a Formal Complaint, and appeal the determination of a Hearing Panel or other decision-maker.
14. Additional Rights for Students as a Party:
   a. To request reasonable housing, living and other accommodations and remedies consistent with Section 600.030.H.
   b. To receive amnesty for minor student misconduct that is ancillary to the incident, at the discretion of the Title IX Coordinator.
15. Additional Rights for Hearing Panel Resolution:
a. To receive notice of a hearing.
b. To have the names of witnesses who may participate in the hearing and copies of all documentary evidence gathered in the course of the investigation and any investigative report prior to the hearing.
c. To be present at the hearing, which right may be waived by either written notification to the Hearing Officer or by failure to appear.
d. To have present an Advisor during the hearing and to consult with such Advisor during the hearing, and have the Advisor conduct cross-examination and other questioning on behalf of the Party at the hearing.
e. To have an Advisor of the University’s selection appointed for a Party where the Party does not have an Advisor of their own choice at a hearing.
f. To testify at the hearing or refuse to testify at the hearing; however, if a Party or witness fails to submit to cross-examination at the hearing, the Hearing Panel shall not rely on any statement of that Party or witness in reaching a determination regarding responsibility. The Hearing Panel shall not draw any inference about the determination regarding responsibility based solely on a Party’s or witness’s failure to submit to cross-examination.
g. To have an equal opportunity to present and question witnesses, including fact and expert witnesses, and present relevant evidence.
h. To request that the hearing be held virtually, with technology enabling participants simultaneously to see and hear each other.

16. Additional Rights for Academic Medical Center Process:
   a. To receive notice of the meeting with the decision-maker.
   b. To submit written, relevant questions that a Party wants asked of any Party or witness and to be provided with the answers to such questions.
   c. To be allowed additional, limited follow-up questions.

K. Role of Support Persons and Advisors.

1. Support Persons. Each Complainant and Respondent is allowed to have one Support Person of their choice present with them for all Title IX Process interviews and meetings. The Parties may select whomever they wish to serve as their Support Person, including an attorney or parent. The Support Person may also act as the Party’s Advisor. If requested by a student Party, the Title IX Coordinator may assign a Trained Support Person to explain the Title IX process and attend interviews and meetings with a Party. University Trained Support Person(s) are administrators, faculty, or staff at the University trained on the Title IX Process. A Trained Support Person cannot be called upon as a witness by a Party in a hearing to testify about matters learned while that individual was acting in their capacity as a Trained Support Person.

2. Advisors. Each Party may have an Advisor of their choice present at the hearing to conduct cross-examination and other questioning for that Party. A Party may not directly question any other Party or any witness; all cross-examination and other questioning on behalf of a Party must be conducted by their Advisor. The Advisor may be, but is not required to be, an attorney. If a Party does not have an Advisor of their choice present at the hearing, the University will provide, without fee or charge to that Party, an Advisor of the University’s choice to conduct cross-examination and other questioning on behalf of that Party. The Parties may not require that the assigned Advisor have specific qualifications such as being an attorney. At the hearing, a Party’s Advisor may ask the other Party and any witnesses all relevant questions and follow-up questions, including those challenging credibility. An Advisor may conduct cross-examination and other questioning for a Party, and object to questions on limited grounds as specified in the Rules of Decorum. The Advisor may not make a presentation or otherwise represent the Complainant or the Respondent during the hearing. The Advisor may consult with the Party quietly or in writing, or outside the hearing during breaks, but may not speak on behalf of the Party, other than to conduct cross-examination or other questioning for the Party. Advisors who do not follow the Rules of Decorum will be warned or dismissed from the hearing at the discretion of the Hearing Officer.

3. Investigation. If a Formal Complaint is filed, then the Title IX Coordinator will promptly appoint a trained Investigator or a team of trained Investigators to investigate. The burden of proof and the burden of gathering evidence sufficient to reach a determination regarding responsibility rests on the University.

For purposes of the Investigation, the University cannot access, consider, disclose, or otherwise use a Party’s records that are made or maintained by a physician, psychiatrist, or other recognized professional or paraprofessional acting in the professional’s or paraprofessional’s capacity, or assisting in that capacity, and which are made and maintained in connection with the provision of treatment to the Party, unless the University obtains that Party’s voluntary, written consent to do so for use in the Title IX process.

The Parties are not prohibited from discussing the allegations under investigation or from gathering and presenting relevant evidence. The Parties may present witnesses, including fact and expert witnesses, and other inculpatory and exculpatory evidence; all such evidence must be relevant.

A Party whose participation is expected or invited at a hearing, interview or other meeting, shall receive written notice of the date, time, location, participants, and purpose of all hearings, investigative interviews, or other meetings, with sufficient time for the Party to prepare to participate.

The Parties may be accompanied to any related meeting or interview by a Support Person of their choice, who may be, but is not required to be, an attorney; however, the Support Person may only participate in the proceedings as set forth in this policy.

The Parties shall be permitted to inspect and review any evidence obtained as part of the investigation that is directly related to the allegations raised in the Formal Complaint, including the evidence upon which the University does not intend to rely in reaching any determination regarding responsibility, and inculpatory or exculpatory evidence whether obtained from a Party or other source and copies of recordings of all interviews conducted during the investigation, in sufficient time for the
Parties to meaningfully respond to the evidence prior to the conclusion of the investigation.

Prior to completion of the investigative report, the University will make available to each Party and the Party’s Advisor, if any, the evidence subject to inspection and review in an electronic format or a hard copy, and the Parties will have ten (10) business days to submit a written response to the Investigator, which the Investigator will consider prior to completion of the investigative report.

The final investigative report will fairly summarize the relevant evidence, and prior to a hearing or other time of determination regarding responsibility, the investigator will send to each Party and the Party’s Advisor, if any, the final investigative report in an electronic format or a hard copy, for their review and written response. If a written response is received from either Party, that response will be shared with the other Party and their Advisor, if any.

All investigations will be thorough, reliable and impartial. All interviews shall be recorded. In the event that recording is not possible due to technological issues, the investigator shall take thorough notes and such notes shall be provided to the Parties in lieu of recordings. The investigator shall document the reason the recording was not possible and such documentation shall become part of the Record of the Case.

The investigation of reported sexual harassment should be completed expeditiously, normally within thirty (30) business days of the filing of the Formal Complaint. Investigation of a Formal Complaint may take longer based on the nature and circumstances of the Formal Complaint.

M. Impact of Optional Report to Law Enforcement. A delay may also occur when criminal charges on the basis of the same behaviors that invoke this process are being investigated, to allow for evidence collection by the law enforcement agency. However, University action will not typically be altered or precluded on the grounds that civil cases or criminal charges involving the same incident have been filed or that such charges have been dismissed or reduced.

The Title IX Coordinator will not wait for the conclusion of a criminal investigation or criminal proceeding to begin the Title IX process. However, a Title IX investigation and resolution process may be temporarily delayed for good cause, which can include concurrent law enforcement activity. In such instances, written notice of the delay or extension with reasons for the action will be sent to each Party.

If delayed, the Title IX Coordinator will promptly resume the Title IX investigation as soon as notified by the law enforcement agency that it has completed the evidence-gathering process. The Title IX Coordinator will implement appropriate supportive measures during the law enforcement agency’s investigation period to provide for the safety of all Parties, the University community and the avoidance of retaliation or sexual harassment.

N. Dismissal of a Formal Complaint. During or upon the completion of the investigation, the Title IX Coordinator will review the Formal Complaint and the investigative report. If available, to determine if the Formal Complaint is subject to dismissal. A Formal Complaint shall be dismissed: (1) if the conduct alleged in the Formal Complaint would not constitute sexual harassment, as defined in CRR 600.020 even if proved; (2) the conduct alleged in the Formal Complaint did not occur in the University’s education program or activity, or (3) the conduct alleged in the Formal Complaint did not occur against a person in the United States. A dismissal under this provision does not preclude action under other applicable University processes.

A Formal Complaint or any allegations therein, may be dismissed at any time during the investigation or hearing if (1) the Complainant notifies the Title IX Coordinator in writing that the Complainant would like to withdraw the Formal Complaint or any allegations therein; (2) the Respondent is no longer enrolled or employed by the University; or (3) specific circumstances prevent the University from gathering evidence sufficient to reach a determination as to the Formal Complaint or the allegations therein.

Upon a dismissal required or permitted under this provision, the University will promptly send written notice of the dismissal and reason(s) therefor simultaneously to the Parties. Either Party may appeal a dismissal as set forth in Section U herein.

If the Title IX Coordinator determines there is a sufficient basis to proceed with the Formal Complaint, then the Title IX Coordinator will direct the process to continue. The Formal Complaint will then be resolved through Informal Resolution or Hearing Panel Resolution, or the Academic Medical Center (AMC) Process, if applicable.

O. Informal Resolution. Upon the filing of a Formal Complaint, the Parties may choose to engage in Informal Resolution. The decision of the Parties to engage in Informal Resolution must be voluntary, informed, and in writing. The Parties are not required to engage in Informal Resolution as a condition of enrollment or continuing enrollment, or employment or continuing employment, or enjoyment of any other right. The Parties are not required to waive their right to an investigation of a Formal Complaint or a right to a hearing process, or AMC Process, if applicable. At any time prior to agreeing to (or in Administrative Resolution, rendering of) a final resolution, any Party has the right to withdraw from the Informal Resolution process and the matter will be referred back for further investigation and/or hearing as may be applicable.

Informal Resolution is never available to resolve allegations that an employee sexually harassed a student.

In Informal Resolution, which includes mediation or facilitated dialogue, a neutral facilitator will foster a dialogue with the Parties to an effective resolution, if possible. The Complainant’s and the Respondent’s Support Persons may attend the Informal Resolution meeting. The Parties will abide by the terms of the agreed-upon resolution. Failure to abide by the terms of the agreed-upon resolution may be referred to the Title IX Coordinator for review and referral to the appropriate University Process for discipline or sanctions. The Title IX Coordinator will keep records of any Informal Resolution that is reached.

In the event the Parties are unable to reach a mutually agreeable resolution, the matter will be referred back for further investigation and/or hearing as may be applicable. The content of the Parties’ discussions during the Informal Resolution Process will be kept confidential in the event the matter proceeds to the hearing process. The Parties’ agreement to participate, refusal to participate in, or termination of participation in Informal Resolution shall not be factors in any subsequent decisions regarding whether a policy violation occurred.

Among the resolutions which may be reached at this stage, the Respondent may voluntarily request to permanently separate from the University of Missouri System. If the Title IX Coordinator accepts the
Respondent’s proposal, the Respondent must sign a Voluntary Permanent Separation and General Release agreement to effectuate their separation and terminate the Title IX Process.

P. Procedural Details for Administrative Resolution. The Parties may mutually choose to participate in a type of informal Resolution called Administrative Resolution. The Administrative Resolution process is not available where a student has alleged that an employee sexually harassed the student. The Administrative Resolution process is not available to Academic Medical Centers (AMC).

The Administrative Resolution process is a process whereby the decision-maker will meet separately with the Parties and their Support Person, if any, and consider the evidence provided by the investigator, including the investigative report, and evidence provided by the Parties, and will make a determination of responsibility that is binding on both Parties. The decision of the Parties to participate in Administrative Resolution must be voluntary, informed and in writing provided to the investigator, and must include a knowing written waiver of their right to a hearing under the Title IX process. However, either Party may choose to leave the process and opt for a hearing at any time before a final determination has been rendered. In addition, the following will apply to the Administrative Resolution process:

1. The standard of proof will be “preponderance of the evidence,” defined as determining whether the evidence shows it is more likely than not that a policy violation occurred.
2. The decision-maker has the discretion to determine the relevance of any witness or documentary evidence and may exclude information that is irrelevant, immaterial, cumulative, or more prejudicial than informative. In addition, the following rules shall apply to the introduction of evidence:
   a. Questions and evidence about the Complainant’s pre-disposition or prior sexual behavior are not relevant, unless such questions and evidence about the Complainant’s prior sexual behavior are offered to prove that someone other than the Respondent committed conduct alleged by the Complainant, or if the questions and evidence concern specific incidents of the Complainant’s prior sexual behavior with respect to the Respondent and are offered to prove consent.
   b. Character evidence is information that does not directly relate to the facts at issue, but instead reflects upon the reputation, personality, or qualities of an individual, including honesty. Such evidence regarding either Party’s character is of limited utility and shall not be admitted unless deemed relevant by the decision-maker.
   c. Incidents or behaviors of the Respondent not directly related to the possible violation(s) will not be considered unless they show a pattern of related misconduct. History of related misconduct by the Respondent that shows a pattern may be considered only if deemed relevant by the decision-maker.
   d. A Party’s records that are made or maintained by a physician, psychiatrist, psychologist, or other recognized professional or paraprofessional acting in the professional’s or paraprofessional’s capacity, or assisting in that capacity, and which are made or maintained in connection with the provision of treatment to the Party, may not be used without that Party’s express consent.
   e. The decision-maker shall not require, allow, rely upon, or otherwise use questions or evidence that constitute, or seek disclosure of, information protected under a legally recognized privilege, unless the person holding such privilege has waived the privilege.
3. In the Administrative Resolution Process, the Respondent and the Complainant may provide a list of questions for the decision-maker to ask the other Party. If those questions are deemed appropriate and relevant, they may be asked on behalf of the requesting Party; answers to such questions will be shared with the requesting Party.
4. At any time prior to a final determination being rendered, the Complainant and/or the Respondent may request that the Formal Complaint shift from the Administrative Resolution Process to the Hearing Panel Resolution Process. Upon receipt of such timely request from either Party, the Formal Complaint will shift to the Hearing Panel Resolution Process.
5. The Administrative Resolution process will normally be completed within sixty (60) business days of the decision-maker’s receipt of the Formal Complaint. Deviations from this timeframe will be promptly communicated to both Parties.
6. For good cause, the decision-maker in the Administrative Resolution Process may, in their discretion, grant reasonable extensions to the time frames and limits provided.
7. The Administration Resolution process consists of:
   a. A prompt, thorough and impartial investigation;
   b. A separate meeting with each Party and their Support Person, if any, and the decision-maker;
   c. A written finding by the decision-maker on each of the alleged policy violations;
   d. A written finding by the decision-maker on sanctions and remedial actions for findings of responsibility; and
   e. The decision-maker shall be as follows:
      (1) For Student or Student Organization Respondents and Staff Respondents, the decision-maker will be the Title IX Coordinator;
      (2) For Faculty Respondents, the decision-maker will be as follows:
         (a) The Title IX Coordinator will act as decision-maker and make recommendation(s) on findings of responsibility and sanctions and remedial actions, if applicable, to the Provost who will be the final decision-maker.
         (b) The Title IX Coordinator has the option to request that a designee from the Provost’s office act as decision-maker in Administrative Resolution and make recommendation(s) regarding findings of responsibility and sanctions and remedial actions, if applicable, to the Provost who will be the final decision-maker.
8. At least fifteen (15) business days prior to meeting with the decision-maker or if no meeting is requested, at least fifteen (15) business days prior to the decision-maker rendering a finding(s), the Title IX Coordinator or Provost’s designee, if applicable, will send a letter (Notice of Administrative Resolution) to the Parties with the following information:
   a. A description of the alleged violation(s) and applicable policy or policies that are alleged to have been violated.
b. The name of the decision-maker.

c. Reference to or attachment of the applicable procedures.

d. A copy of the final investigative report.

e. The option and deadline of ten (10) business days from the date of the notice to request a meeting with the decision-maker.

f. An indication that the Parties may have the assistance of a Support Person of their choosing at the meeting, though the Support Person’s attendance at the meeting is the responsibility of the respective Parties.

9. The sanctions of expulsion and termination are not available sanctions under the Administrative Resolution process in this Policy. Further, any suspension of a student under this Administrative Resolution process shall not exceed two (2) years. Any suspension of an employee under this Administrative Resolution process may be without pay, but may not exceed ten (10) business days.

10. The decision-maker can, but is not required to, meet with and question the Investigator and any identified witnesses. The decision-maker may request that the Investigator conduct additional interviews and/or gather additional information. The decision-maker will meet separately with the Complainant and the Respondent, and their Support Person, if any, to review the alleged policy violations and the investigative report. The Respondent may choose to admit responsibility for all or part of the alleged policy violations at any point in the process. If the Respondent admits responsibility, in whole or in part, the decision-maker will render a finding that the individual is in violation of University policy for the admitted conduct. For any disputed violations, the decision-maker will render a finding using the preponderance of the evidence standard. The decision-maker will also determine appropriate sanctions or remedial actions.

11. The decision-maker will inform the Respondent and the Complainant simultaneously of the finding on each of the alleged policy violations and the finding of sanctions, if applicable, in writing by email to the Party’s University-issued email account, or by the method of notification previously designated in writing by the Party. Notice is presumptively deemed delivered, when: 1) provided in person, 2) emailed to the individual to their University-issued email account, or 3) when sent via the alternate method of notification specified by the Party.

12. Either Party may appeal a decision under Administrative Resolution in accordance with Section U of this policy.

Q. Hearing Panel Resolution. This process is not available for Academic Medical Centers. See Section R.

1. Equity Resolution Hearing Panelist Pool. Each University will create and annually train a pool of not less than five (5) faculty and five (5) administrators and/or staff to serve as hearing panel members in the Hearing Panel Resolution Process. The faculty hearing panel pool members selected by the Chancellor (or Designee) shall be selected from a list of no less than ten (10) faculty members proposed by the faculty council/senate. Pool members are selected by the Chancellor (or Designee) and serve a renewable one-year term. Selection of hearing panel pool members shall be made with an attempt to recognize the diversity of the University community. Hearing Panel members from one University may be asked to serve on a hearing panel involving another University.

The Chancellor (or Designee) will select a Hearing Panelist Pool Chair (“Pool Chair”). The Pool Chair randomly selects and coordinates the hearing panel members to serve on the Hearing Panel for a specific Formal Complaint. The Pool Chair may serve as a panel member for a specific Formal Complaint.

Administrators, faculty, and staff will be removed from the Hearing Panelist Pool if they fail to satisfy the annual training requirements, as determined by the Title IX Coordinator. Under such circumstances, the Title IX Coordinator will notify the Chancellor (or Designee), who will inform the administrator, faculty, or staff member of the discontinuation of their term.

2. Title IX Hearing Panel (“Hearing Panel”). When a Formal Complaint is not resolved through an Informal Resolution process, the Hearing Panelist Pool Chair will randomly select two (2) members from the Hearing Panelist Pool to serve on the specific Hearing Panel together with the Hearing Officer. A good faith attempt will be made for the Hearing Panel to include at least one faculty member and one administrator or staff member. Up to two (2) alternates may be designated to sit in throughout the process as needed. The University reserves the right to have its attorney present during the hearing and during deliberations to advise the Hearing Panel.

a. At least twenty (20) business days prior to the hearing, the Title IX Coordinator will send a letter (Notice of Hearing) to the Parties with the following information:

1. A description of the alleged violation(s) and applicable policy or policies that are alleged to have been violated

2. A description of the applicable procedures.

3. A statement that the Parties may have the assistance of an Advisor of their choosing, at the hearing; that the Party’s Advisor will conduct all cross-examination and other questioning of the other Party and all witnesses on behalf of the Party they are advising; that if the Party does not have an Advisor, an Advisor will be provided by the University for the purpose of conducting cross-examination and other questioning for that Party; and the Advisor may be, but is not required to be, an attorney.

4. The time, date and location of the hearing.

5. A list of the names of each of the Hearing Panel members, including the Hearing Officer, and alternates, and information on how to raise an objection to any member of the Hearing Panel and the timeline in which to raise any objections.

6. A copy of the final investigative report and exhibits.

7. Notification to the Parties that all of the evidence gathered in the course of the investigation that is directly related to the allegations including inculpatory and exculpatory evidence, is available to the Parties and instructions regarding how to request access to that evidence.

8. Notice that if a Party or witness does not submit to cross-examination at the hearing, the decision-maker(s) must not rely on any statement of that Party or witness in reaching a determination regarding responsibility, but no inference can be drawn from the fact that a Party or witness failed to submit to cross-examination.
5. Objection to or Recusal of Hearing Panel Member.

a. Hearing Panel members, including the Hearing Officer, shall not have a conflict of interest or bias for or against Complainant or Respondent generally or an individual Complainant or Respondent. If a Hearing Panel member or Hearing Officer feels that they have a conflict of interest or bias, or cannot make an objective determination, they must recuse themselves from the proceedings in advance of the hearing.

b. The Parties will have been given the names of the Hearing Panel members, including the Hearing Officer, in the Notice of Hearing. Should any Complainant or Respondent object to any panelist, they must raise all objections, in writing, to the Title IX Coordinator at least fifteen (15) business days prior to the hearing.

c. Hearing Panel members will only be unseated and replaced if the Title IX Coordinator concludes that good cause exists for the removal of a panel member. Good cause may include, but is not limited to, bias that would preclude an impartial hearing or circumstances in which the Hearing Panel member’s involvement could impact the Party’s work or learning environment due to current or potential interactions with the Hearing Panel member (e.g., a panel member being in the same department as either Party). If the Title IX Coordinator determines that a Hearing Panel member, other than the Hearing Officer, should be unseated and replaced, then Title IX Coordinator will ask the Hearing Panel Pool Chair to randomly select another member from the pool to serve on the Hearing Panel. The Title IX Coordinator will select an alternate Hearing Officer if they determine that the Hearing Officer should be replaced. The Title IX Coordinator will provide a written response to all Parties addressing any objections to the Hearing Panel members, including the Hearing Officer.

6. Alternative Attendance or Questioning Mechanisms. All hearings will be live. However, at the request of either Party or by the University’s designation, the live hearing may occur with the Parties located in separate rooms with technology enabling the Hearing Panel, including the Hearing Officer, and their legal advisor, if any, the Parties and their Advisors, and the Investigator, to simultaneously see and hear the Party or the witness answering questions. Should any hearing take place in this manner, the Title IX Coordinator (or Designee) shall be in charge of the technology during the hearing. The University will make reasonable accommodations for the Parties in keeping with the principles of equity and fairness.

7. Requests to Reschedule the Hearing Date. For good cause, the Title IX Coordinator may grant requests to reschedule the hearing date.

a. At least ten (10) business days prior to the hearing date, a Party shall inform the Title IX Coordinator whether the Party intends to bring an Advisor of their choice to the hearing.

b. At least ten (10) business days prior to the hearing date, a Party shall inform the Title IX Coordinator whether the Party is requesting accommodations for the hearing.

c. At least five (5) business days prior to the hearing date, the final investigative report and all exhibits will be provided to the Hearing Panel members.

9. Pre-Hearing Meeting. Unless otherwise agreed by the Parties and the Hearing Officer, a pre-hearing meeting may be scheduled one hour prior to the start of the hearing between the Hearing Officer and Parties’ Advisors. Parties may, but are not required to, be in attendance at this meeting.

10. Conduct of Hearing. The Hearing Officer shall participate on the Hearing Panel and preside at the hearing, call the hearing to order, call the roll of the Hearing Panel and alternates in attendance, ascertain the presence or absence of the Investigator, the Complainant and the Respondent, confirm receipt of the Notice of Allegations and Notice of Hearing by the Parties, report any extensions requested or granted and establish the presence of any Advisors.

a. Order of Evidence. The order of evidence shall generally be the following:

(1) The Complainant will proceed first and may give a verbal statement of their allegations of sexual harassment against the Respondent. The Hearing Panel may next ask questions of the Complainant. The Complainant will then be subject to cross-examination by the Advisor of the Respondent. The Complainant may also call witnesses who will be subject to questioning by the Advisor of the Complainant, questioning by the Hearing Panel, and cross-examination by the Advisor of the Respondent. The Complainant may also submit documentary evidence.
(2) The Respondent will proceed next and may give a verbal statement in response to the allegations of sexual harassment made by the Complainant. The Hearing Panel may next ask questions of the Respondent. The Respondent will be subject to cross-examination by the Advisor of the Complainant. The Respondent may also call witnesses who will be subject to questioning by the Advisor of the Respondent, questioning by the Hearing Panel, and cross-examination by the Advisor of the Complainant. The Respondent may also submit documentary evidence.

(3) The Investigator will then be available to answer questions of the Hearing Panel. The Investigator will next be subject to cross-examination by the Advisors of the Complainant and the Respondent. The Investigator may also call witnesses who will be subject to questioning by the Hearing Panel, and cross-examination by the Advisors of the Complainant and Respondent. The Investigator may also submit documentary evidence.

(4) The Hearing Panel may ask questions of the Parties or any witnesses including the Investigator at any time during the hearing.

b. Record of Hearing. The Title IX Coordinator shall arrange for an audio or audiovisual recording of the hearing. The recording of the hearing will become part of the Record of the Case.

a. The formal rules of evidence shall not apply to any live hearing.

b. Questions and evidence about the Complainant’s predisposition or prior sexual behavior are not relevant, unless such questions and evidence about the Complainant’s prior sexual behavior are offered to prove that someone other than the Respondent committed conduct alleged by the Complainant, or if the questions and evidence concern specific incidents of the Complainant’s prior sexual behavior with respect to the Respondent and are offered to prove consent.

c. Character evidence is information that does not directly relate to the facts at issue, but instead reflects upon the reputation, personality, or qualities of an individual, including honesty. Such evidence regarding either Party’s character is of limited utility and shall not be admitted unless deemed relevant by the Hearing Officer.

d. Incidents or behaviors of a Party not directly related to the possible violation(s) will not be considered unless they show a pattern of related misconduct. History of related misconduct by a Party that shows a pattern may be considered only if deemed relevant by the Hearing Officer.

e. A Party’s records that are made or maintained by a physician, psychiatrist, psychologist, or other recognized professional or paraprofessional acting in the professional’s or paraprofessional’s capacity, or assisting in that capacity, and which are made or maintained in connection with the provision of treatment to the Party, may not be used without that Party’s express consent.

f. The Hearing Officer shall not require, allow, rely upon, or otherwise use questions or evidence that constitute, or seek disclosure of, information protected under a legally recognized privilege, unless the person holding such privilege has waived the privilege.

g. The relevancy and admissibility of any evidence offered at the hearing shall be determined by the Hearing Officer, whose ruling shall be final.

h. A Party’s Advisor will be permitted to ask the other Party and any witnesses relevant questions and follow-up questions, including those challenging credibility. Before a Complainant, Respondent or witness answers a cross-examination or other question, the Hearing Officer must first determine whether the question is relevant and explain any decision to exclude a question as not relevant. Where the Hearing Officer permits a question to be answered, a presumption shall be made that the Hearing Officer determined that the question was relevant.

i. The Party’s Advisors may object to questions on limited grounds as specified in the Rules of Decorum. The Hearing Officer will rule on such objections and that ruling shall be final.

j. The Hearing Officer may dismiss any person from the hearing who interferes with or obstructs the hearing, fails to adhere to the Rules of Decorum, or fails to abide by the rulings of the Hearing Officer.

k. Procedural questions which arise during the hearing and which are not covered by these general rules shall be determined by the Hearing Officer, whose ruling shall be final.

a. The Hearing Panel will deliberate with no others present, except any legal advisor to the Hearing Panel, to find whether the Respondent is responsible or not responsible for the policy violation(s) in question. The Hearing Panel will base its finding on a preponderance of the evidence (i.e., whether it is more likely than not that the Respondent committed each alleged violation). If a Respondent is found responsible by a majority of the Hearing Panel, the Hearing Panel will determine appropriate sanctions and remedial actions by a majority vote.

b. The Hearing Officer will prepare a written determination reflecting the decision of the Hearing Panel regarding responsibility, sanctions and remedial actions, if any (“Hearing Panel Decision”), and deliver it to the Title IX Coordinator detailing the following:

(1) Identification of the allegations potentially constituting sexual harassment as defined in CRR 600.020;

(2) A description of the procedural steps taken from the receipt of the Formal Complaint through the determination, including any notifications to the Parties, interviews with Parties and witnesses, site visits, methods used to gather other evidence and hearings held;

(3) Findings of fact supporting the determination;

(4) Conclusions regarding the application of the University’s Title IX Policies to the facts;

(5) A statement of, and rationale for, the result as to each allegation, including a determination regarding responsibility, any disciplinary sanctions to be imposed on the Respondent, and whether remedies designed to restore or preserve equal access to the University’s education programs or activities will be provided by the University to the Complainant; and
6. The procedures and permissible bases for the Complainant and the Respondent to appeal.

c. The Hearing Panel Decision should be submitted to the Title IX Coordinator within five (5) business days of the end of deliberations. Deviations from the five-day period will be communicated by the Hearing Officer to the Parties and the Title IX Coordinator, along with an expected time for completion. The Hearing Panel Decision will be provided to the Title IX Coordinator who will provide it to the Parties simultaneously within five (5) business days of receipt of the decision.

d. The Hearing Panel Decision will be sent to each Party by email to their University-issued email account, or by the method of notification previously designated in writing by the Party. Notice is presumptively deemed delivered, when: 1) provided in person, 2) emailed to the individual to their University-issued email account, or 3) when sent via the alternate method of notification specified by the Party.

e. The Hearing Panel Decision will become final either on the date that the Parties are provided with the written determination of the result of the appeal, if an appeal is filed, or if an appeal is not filed, the date on which an appeal would no longer be considered timely.

f. The Title IX Coordinator is responsible for effective implementation of any remedies.

R. Process for Academic Medical Centers (AMC)

1. Academic Medical Centers at the University of Missouri are not required to provide for a live hearing, but rather must adhere to the following process for resolving Formal Complaints alleging Title IX violations.

2. The decision-maker(s) for the Title IX Process for Academic Medical Centers shall be a neutral, impartial, and unbiased decision-maker designated by the Executive Vice Chancellor for Health Affairs.

3. Notice of AMC Meeting. The decision-maker will meet separately with each Party. At least fifteen (15) business days prior to the initial meeting with the decision-maker, the Title IX Coordinator will send a letter (Notice of AMC Meeting) to the Parties with the following information:

   a. A description of the alleged violation(s) and applicable policy or policies that are alleged to have been violated.
   b. A description of the applicable procedures.
   c. A statement that the Parties may be accompanied by a Support Person of their choosing at the AMC Meeting.
   d. The time, date and location of the AMC Meeting.
   e. The name of the decision-maker, and information on how to raise an objection to the decision-maker and the timeline in which to raise any objections.
   f. A copy of the investigative report and exhibits.
   g. Notification to the Parties that all of the evidence gathered in the course of the investigation that is directly related to the allegations, including inculpatory and exculpatory evidence, is available to the Parties and how to request access to that evidence.

4. The Notice of AMC Meeting letter will be sent to each Party by email to their University-issued email account, or by the method of notification previously designated in writing by the Party. Notice is presumptively deemed delivered, when: 1) provided in person, 2) emailed to the individual to their University-issued email account, or 3) when sent via the alternate method of notification specified by the Party.

5. At least fifteen (15) business days prior to the initial AMC Meeting, the Investigator will provide to the Parties access to all evidence gathered in the investigation which is directly related to the allegations in the Formal Complaint, including any evidence upon which the Investigator does not intend to rely, and inculpatory and exculpatory evidence whether obtained from a Party or other source, copies of recordings of all interviews conducted during the investigation, and a copy of any investigative report.

6. At least ten (10) business days prior to the initial AMC Meeting, the Complainant and Respondent may provide the decision-maker with written, relevant questions the Party wants asked of any Party or witness. At least five (5) business days prior to the initial AMC Meeting, the decision-maker will provide each Party with the answers, and allow for additional, limited follow-up questions from each Party. The decision-maker must explain to the Party proposing the questions any decision to exclude a question as not relevant. The Parties may also provide the decision-maker with documentary evidence.

7. No employee or student, directly or through others, should take any action which may interfere with the investigation or the AMC process. Employees and students are prohibited from attempted or actual intimidation or harassment of any potential witness. Failure to adhere to these requirements may lead to disciplinary action, up to and including expulsion or termination.

8. The decision-maker shall not have a conflict of interest or bias for or against Complainants or Respondents generally or an individual Complainant or Respondent. If a decision-maker feels that they have a conflict of interest or bias, or cannot make an objective determination, they must recuse themselves from the proceedings in advance of the AMC meeting.

9. At least ten (10) business days prior to the initial AMC Meeting, the Parties shall provide to the Title IX Coordinator all objections in writing to the decision-maker identified in the Notice of AMC Meeting. If the Title IX Coordinator determines that the decision-maker should be replaced, the Title IX Coordinator will select an alternate decision-maker. The Title IX Coordinator will provide a written response to all Parties addressing the objections.

10. Questions and evidence about the Complainant’s predisposition or prior sexual behavior are not relevant, unless such questions and evidence about the Complainant’s prior sexual behavior are offered to prove that someone other than the Respondent committed conduct alleged by the Complainant, or if the questions and evidence concern specific incidents of the Complainant’s prior sexual behavior with respect to the Respondent and are offered to prove consent.

11. Character evidence is information that does not directly relate to the facts at issue, but instead reflects upon the reputation, personality, or qualities of an individual, including honesty. Such evidence regarding either Party’s character is of limited utility and shall not be admitted unless deemed relevant by the Hearing Officer.

12. Incidents or behaviors of a Party not directly related to the possible violation(s) will not be considered unless they show a pattern of related misconduct. History of related misconduct by a Party that shows a pattern may be considered only if deemed relevant by the Hearing Officer.
13. A Party’s records that are made or maintained by a physician, psychiatrist, psychologist, or other recognized professional or paraprofessional acting in the professional’s or paraprofessional’s capacity, or assisting in that capacity, and which are made or maintained in connection with the provision of treatment to the Party, may not be used without that Party’s express consent.

14. The decision-maker shall not require, allow, rely upon, or otherwise use questions or evidence that constitute, or seek disclosure of, information protected under a legally recognized privilege, unless the person holding such privilege has waived the privilege.

15. All meetings between the decision-maker and Parties and/or witnesses shall be recorded.

16. Within ten (10) business days of the last meeting with any Party or witness, the decision-maker must issue a written determination regarding responsibility, applying the preponderance of the evidence standard of evidence. The written determination must include:
   a. Identification of the allegations potentially constituting sexual harassment as defined in CRR 600.020.
   b. A description of the procedural steps taken from the receipt of the Formal Complaint through the determination, including any notifications to the parties, interviews with parties and witnesses, site visits, methods used to gather other evidence and meetings held;
   c. Findings of fact supporting the determination;
   d. Conclusions regarding the application of the Title IX policies to the facts;
   e. A statement of, and rationale for, the result as to each allegation, including a determination regarding responsibility, any disciplinary sanctions to be imposed on the Respondent, and whether any remedies designed to restore or preserve equal access to the University’s education program or activity will be provided by the University to the Complainant; and
   f. The University’s procedures and permissible bases for the Complainant and Respondent to appeal as set forth in Section U.

17. The written determination will be provided to the Title IX Coordinator, who will provide it to the Parties simultaneously within five (5) business days of receipt of the determination. Notification will be made in writing and sent to each Party by email to their University-issued email account, or by the method of notification previously designated in writing by the Party. Notice is presumptively deemed delivered, when: 1) provided in person, 2) emailed to the individual to their University-issued email account, or 3) when sent via the alternate method of notification specified by the Party.

18. The determination becomes final either on the date that the University provides the Parties with the written determination of the result of the appeal, if any appeal is filed, or if any appeal is not filed, the date on which an appeal would no longer be considered timely.

19. The Title IX Coordinator is responsible for effective implementation of any remedies.

S. Sanctions and Remedial Actions.

1. If the Respondent is found responsible for a violation of the University’s Title IX Policies, the Hearing Panel, or the decision-maker in the Administrative Resolution Process or Academic Medical Center Process, will determine sanctions and remedial actions. The Title IX Coordinator will apply and enforce the sanctions and remedial actions and may also add other remedial actions as deemed appropriate.
   a. Factors Considered When Finding Sanctions/Remedial Actions include but are not limited to:
      (1) The nature, severity of, and circumstances surrounding the violation;
      (2) The disciplinary history of the Respondent;
      (3) The need for sanctions/remedial actions to prevent the future recurrence of the conduct; and
      (5) The need to remedy the effects of the conduct on the Complainant and the University community.

2. Types of Sanctions. The following sanctions may be imposed upon any Respondent found to have violated the University’s Title IX Policies. Multiple sanctions may be imposed for any single violation. Sanctions include but are not limited to the following:
   a. For Respondents who are Student(s) or Student Organization(s):
      (1) Warning. A notice in writing to the Respondent that there is or has been a violation of institutional regulations, and cautioning that if there are further violations, the existence of the Warning may result in more severe sanctions in the future.
      (2) Probation. A written reprimand for violation of specified regulations. Probation is for a designated period of time and includes the probability of more severe sanctions if the Respondent is found to be violating any institutional regulation(s) during the probationary period.
      (3) Loss of Privileges. Denial of specified privileges for a designated period of time.
      (4) Restitution. Compensating the University for loss, damage, or injury to University property. This may take the form of appropriate service and/or monetary or material replacement.
      (5) Discretionary Sanctions. Work assignments, service to the University, or other related discretionary assignments, or completion of educational programming.
      (6) Residence Hall Suspension. Separation of the Respondent from the residence halls for a definite period of time, after which the Respondent is eligible to return. Conditions for readmission may be specified.
      (7) Residence Hall Expulsion. Permanent separation of the Respondent from the residence halls.
      (8) Campus Suspension. Respondent is suspended from being allowed on a specific University campus for a definite period of time. Logistical modifications consistent with the
sanction imposed, may be granted at the discretion of the Chief Student Affairs Officer (or Designee).

(9) **University System Suspension.** Separation of the Respondent from the University System for a definite period of time, after which the Respondent is eligible to return. Conditions for readmission may be specified.

(10) **Withdrawal of Recognition.** Respondent Student Organization loses its Official Approval as a recognized student organization. May be either temporary or permanent.

(11) **University System Expulsion.** Permanent and complete separation (i.e., not eligible for online courses either) of the Respondent from the University System.

b. **For Respondents who are Employee(s):**

(1) Warning – verbal or written;

(2) Performance improvement plan;

(3) Required counseling;

(4) Required training or education;

(5) Loss of annual pay increase;

(6) Loss of supervisory responsibility;

(7) Recommendation of discipline in a training program, including recommendation of termination, suspension or other corrective or remedial actions;

(8) For Non-Regular Faculty, immediate termination of term contract and employment;

(9) For Regular, Untenured Faculty, immediate termination of term contract and employment. Notice of not reappointing would not be required;

(10) Suspension without pay;

(11) Non-renewal of appointment;

(12) For Regular, Tenured Faculty, suspension without pay, removal from campus and referral to the Chancellor to initiate dismissal for cause as detailed in Section 310.060 of the Collected Rules and Regulations;

(13) For Staff, Demotion;

(14) For Staff, Termination.

c. **Remedial Actions.** The following remedial actions may also be imposed to address the effects of the violation(s) of the University’s Title IX Policies on the Complainant. Such remedial actions will vary depending on the circumstances of the policy violation(s), but may include:

(1) Where the Complainant is a student:

(a) Permitting the student to retake courses;

(b) Providing tuition reimbursement;

(c) Providing additional academic support;

(d) Removal of a disciplinary action; and

(e) Providing educational and/or on-campus housing accommodations.

(2) Where the Complainant is an employee:

(a) Removal of a disciplinary action;

(b) Modification of a performance review;

(c) Adjustment in pay;

(d) Changes to the employee’s reporting relationships; and

(e) Workplace accommodations.

In addition, the University may offer or require training and/or monitoring as appropriate to address the effects of the violation(s) of the University’s Title IX Policies.

d. **When Implemented.** Sanctions will be imposed once the written determination regarding responsibility becomes final; the determination regarding responsibility is final either on the date that the Parties are provided with the written determination of the result of the appeal, if an appeal is filed, or if an appeal is not filed, the date on which an appeal would no longer be considered timely.

T. **Withdrawal While Charges Pending.** Should a Respondent decide to resign employment, or withdraw from the University and not participate in the investigation and/or hearing without signing a Voluntary Permanent Separation and General Release Agreement and without the approval of the Title IX Coordinator, the Formal Complaint may be dismissed, or the Title IX Coordinator may determine that the process will nonetheless proceed in the Respondent’s absence to a reasonable resolution and, if the Respondent is found responsible, the Respondent will not be permitted to return to the University unless all sanctions have been satisfied.

U. **Appeal.**

1. **Grounds for Appeal.** Both Complainant and Respondent are allowed to appeal the dismissal of a Formal Complaint or any of the allegations therein, or the findings of the Administrative Resolution Process, the Hearing Panel Resolution Process, or the Academic Medical Center process. Appeals are limited to the following:

a. A procedural irregularity that affected the outcome of the matter (e.g., material deviation from established procedures, etc.);

b. To consider new evidence that was not reasonably available at the time the determination regarding responsibility or dismissal was made, that could affect the outcome of the matter;

c. The Title IX Coordinator, Investigator(s), or decision-maker(s) had a conflict of interest or bias for or against Complainants or Respondents generally or the individual Complainant or Respondent that affected the outcome of the matter; or

d. The sanctions fall outside the range typically imposed for this offense, or for the cumulative conduct record of the Respondent.

2. **Requests for Appeal.** Both the Complainant and the Respondent may appeal a dismissal of a Formal Complaint or any allegations therein, or a determination regarding
responsibility to the Equity Resolution Appellate Officer. The Equity Resolution Appellate Officer must not have a conflict of interest or bias for or against Complainants or Respondents generally or an individual Complainant or Respondent; if the Equity Resolution Appellate Officer does not believe that they can make an objective decision about an appeal, they should recuse themselves and the Chancellor (or Designee) shall appoint an alternate Equity Resolution Appellate Officer to hear the pending appeal. All requests for appeal must be submitted in writing to the Equity Resolution Appellate Officer within five (5) business days of the delivery of the notice of dismissal or Administrative Resolution Decision, Hearing Panel Decision, or AMC Determination. When any Party requests an appeal, the other Party will be notified and receive a copy of the request for appeal.

3. Response to Request for Appeal. Within five (5) business days of the delivery of the notice and copy of the request for appeal, the non-appealing Party may file a response to the request for appeal. The response can address that sufficient grounds for appeal have not been met and/or the merits of the appeal.

4. Review of the Request to Appeal. The Equity Resolution Appellate Officer will make an initial review of the appeal request(s) to determine whether:
   The Equity Resolution Appellate Officer will reject the request for appeal if any of the above requirements are not met. The decision to reject the request for appeal is final and further appeals and grievances are not permitted. The Equity Resolution Appellate Officer will render a written decision whether the request for appeal is accepted or rejected within fifteen (15) business days from receipt of the request for appeal. If no written decision is provided to the Parties within fifteen (15) business days from receipt of the request, the appeal will be deemed accepted.
   a. The request is timely, and
   b. The appeal is on the basis of any of the articulated grounds listed above, and
   c. When viewed in the light most favorable to the appealing Party, the appeal states grounds that could result in an adjusted finding or sanction.

5. Review of the Appeal. If all three (3) requirements for appeal listed in paragraph 4 above are met, the Equity Resolution Appellate Officer will accept the request for appeal and proceed with rendering a decision on the appeal applying the following additional principles:
   a. Appeals are not intended to be full re-hearings of the Formal Complaint and are therefore deferential to the original findings. In most cases, appeals are confined to a review of the written documentation and Record of the Case, and relevant documentation regarding the grounds for appeal. Appeals granted based on new evidence should normally be remanded to the original decision-maker for reconsideration.
   b. The Equity Resolution Appellate Officer will render a written decision on the appeal to all Parties within ten (10) business days from accepting the request for appeal. In the event the Equity Resolution Appellate Officer is unable to render a written decision within ten (10) business days from accepting the request for appeal, the Equity Resolution Appellate Officer will promptly notify the Parties in writing of the delay.
   c. Once an appeal is decided, the outcome is final. Further appeals are not permitted.

6. Extensions of Time. For good cause, the Equity Resolution Appellate Officer may grant reasonable extensions of time (e.g.: 7-10 business days) to the deadlines in the appeal process. The Equity Resolution Appellate Officer will notify the Parties in writing if such extensions are granted.

V. Failure to Complete Sanctions/Comply with Interim and Long-term Remedial Actions. All Respondents are expected to comply with all sanctions and remedial actions within the timeframe specified. Failure to follow through on these sanctions and remedial actions by the date specified, whether by refusal, neglect or any other reason, may result in additional sanctions and remedial actions and/or suspension, expulsion, termination, referral to Dismissal for Cause process, or withdrawal of recognition from the University. Suspension will only be lifted when compliance is achieved to the satisfaction of the Title IX Coordinator.

W. Dismissal for Cause Referral. If the recommended sanction for a Regular, Tenured Faculty member is referral to the Chancellor to initiate Dismissal for Cause, the Record of the Case will be forwarded to the appropriate Faculty Committee on Tenure. Because the Dismissal for Cause proceeding is not a re-hearing of the Complaint, the Record of the Case will be included as evidence and the findings will be adopted for proceeding as detailed in Section 310.060: Procedures in Case of Dismissal for Cause in the Collected Rules and Regulations.

X. Records. In implementing this policy, records of all Formal Complaints, the Hearing Process or Academic Medical Center Process, and resolutions (including Informal resolution and result therefrom), will be kept by the Title IX Coordinator. For the purpose of review or appeal, the Record of the Case will be accessible at reasonable times and places to the Respondent and the Complainant. The Record of the Case will be kept for seven (7) years following final resolution.

In addition, a record of the response to all complaints of sexual harassment, must be maintained for a period of seven (7) years, including records of any actions, including Supportive Measures, taken in response to a report or Formal Complaint of sexual harassment. In each instance, the University must document the basis for its conclusion that its response was not deliberately indifferent, and document that it has taken measures designed to restore or preserve equal access to the University’s education programs or activities. If the University did not provide a Complainant with Supportive Measures, the University must document the reasons why such a response was not clearly unreasonable in light of the known circumstances.

Each Title IX Coordinator, including the Title IX Coordinator for the academic medical center, shall maintain statistical, de-identified data on the race, gender and age of each Party to a Formal Complaint for that university/ academic medical center, and will report such data on an annual basis to the President of the University of Missouri. Additionally, statistical data relating to each university in the University of Missouri System shall be reported on an annual basis to that university’s Chancellor and chief officers for human resources, student affairs, and diversity, equity and inclusion; the academic medical center shall report such statistical data for the academic medical center on an annual basis to the Executive Vice-Chancellor for Health Affairs. Data relating to the University of Missouri System shall be reported on an annual basis to the University of Missouri System’s chief officers for human resources, student affairs, and diversity, equity and inclusion.
Y. Retaliation. No person may intimidate, threaten, coerce, or discriminate against any individual for the purpose of interfering with any right or privilege secured by Title IX, or because the individual has made a report or complaint, testified, assisted, or participated or refused to participate in any manner in an investigation, proceeding, or hearing under this policy. Intimidation, threats, coercion, or discrimination, including charges against an individual for policy violations that do not involve sex discrimination or sexual harassment, but arise out of the same facts or circumstances as a report or complaint of sex discrimination, or a report or Formal Complaint of sexual harassment, for the purpose of interfering with any right or privilege secured by Title IX, constitutes retaliation.

The University must keep confidential the identity of any individual who has made a report or complaint of sex discrimination, including any individual who has made a report or filed a Formal Complaint of sexual harassment, any Complainant, any individual who has been reported to be the perpetrator of sex discrimination, any Respondent, and any witness, except as may be permitted by the FERPA statute, 20 U.S.C. 1232g, or FERPA regulations, 34 CFR part 99, or as required by law, or to carry out the purposes of Title IX, including the conduct of any investigation, hearing, or judicial proceeding arising thereunder. Complaints alleging retaliation may be filed with the Equity Officer in accordance with CRRs 600.010, 600.040, and 600.050.

The exercise of rights protected under the First Amendment does not constitute retaliation prohibited under this section.

Charging an individual with a policy violation for making a materially false statement in bad faith in the course of the any proceedings under this policy does not constitute retaliation provided, however that a determination regarding responsibility, alone, is not sufficient to conclude that any Party made a materially false statement in bad faith.

600.020 Sex Harrassment under Title IX - for matters involving conduct alleged to have occurred on or after August 14, 2020

Executive Order 40, 4-8-14; Revised 6-19-14; Revised 9-22-14 by Executive Order 41. Revised 2-9-17 with an effective date of 3-1-17.

A. Sex Discrimination, Sexual Harassment and Sexual Misconduct in Education. The University is committed to affording equal employment and education opportunities to its employees and students, and to creating an environment free from discrimination (see Section 600.010 of the Collected Rules and Regulations). In furtherance of these commitments, both University policy and applicable state and federal law, prohibit all students, employees, volunteers and visitors at the University from engaging in discrimination on the basis of any protected characteristic, including sex, pregnancy, gender identity, and gender expression. In addition, University policy and the law prohibit sexual misconduct, sexual harassment, stalking on the basis of sex, dating/intimate partner violence, and sexual exploitation, as defined in Section 600.020.B. As used in this policy, the word “sex” is also inclusive of the term “gender.” This policy applies to any phase of its employment process, any phase of its admission or financial aid programs, and all other aspects of its educational programs or activities. Additionally, this policy applies to allegations of sexual misconduct or allegations of other forms of sex discrimination, as defined in Section 600.020.B., occurring in other settings, including off-campus, if there are effects of the conduct that interfere with or limit any person’s ability to participate in or benefit from the University’s educational programs, activities or employment. Notices of nondiscrimination are posted online and in physical locations for the UM System and each of the campuses.

B. Definitions

1. Sex Discrimination. Sex discrimination is conduct that is based upon an individual’s sex, pregnancy, gender identity, or gender expression that adversely affects a term or condition of an individual’s employment, education, living environment, or participation in a University activity.

In addition, sexual harassment, sexual misconduct, sexual exploitation, stalking on the basis of sex and dating/intimate partner violence, as further defined below, are forms of sex discrimination which are prohibited under this policy.

2. Sexual Harassment. Sexual harassment is defined as:
   a. Unwelcome sexual advances or requests for sexual activity by a person or persons in a position of power or authority to another person; or
   b. Other unwelcome verbal or physical conduct of a sexual nature or because of sex, pregnancy, gender identity, or gender expression when:
      i. Submission to or rejection of such conduct is used explicitly or implicitly as a condition for academic or employment decisions; or
      ii. Such conduct creates a hostile environment by being sufficiently severe or pervasive or objectively offensive that it interferes with, limits or denies the ability to participate in or benefit from the University’s educational programs, activities, or employment.

3. Sexual Misconduct. Sexual misconduct includes: 1) Nonconsensual sexual intercourse; 2) Nonconsensual sexual contact involving the sexual touching of a body part (i.e., the lips, genitals, breast, anus, groin, or buttocks of another person) or the nonconsensual sexual touching of another with one’s own genitals whether directly or through the clothing; 3) Exposing one’s genitals to another under circumstances in which one should reasonably know that the conduct is likely to cause affront or alarm; or 4) Sexual exploitation.

4. Stalking on the Basis of Sex. Stalking on the basis of sex is following or engaging in a course of conduct on the basis of sex with no legitimate purpose that makes another person reasonably concerned for their safety or would cause a reasonable person under the circumstances to be frightened, intimidated or emotionally distressed.

5. Dating/Intimate Partner Violence. Violence, threats of violence, intimidation and acts of coercion committed by a person who is or has been in a social relationship of a romantic or intimate nature with the recipient of the violent behavior.

6. Sexual Exploitation. Sexual exploitation occurs when one person takes nonconsensual or abusive sexual advantage of another person for one’s own advantage or benefit or for the advantage or benefit of anyone other than the person being exploited and which behavior does not constitute any other form of sexual misconduct. Examples of sexual exploitation include, but are not limited to, the following activities done without the consent of all participants:
   a. Invasion of sexual privacy;
   b. Prostitution another person;
   c. Taping or recording of sexual activity;
   d. Going beyond the boundaries of consent to sexual activity (e.g., letting your friends hide to watch you engaging in sexual activity);
   e. Engaging in voyeurism;
f. Knowingly transmitting an STI, STD, venereal disease or HIV to another person;
g. Inducing another to expose their genitals;
h. Nonconsensual distribution of intimate images;
i. Use or distribution of drugs or alcohol with intent to facilitate sexual contact without consent (i.e., predatory drugs or alcohol).

7. Consent to Sexual Activity. Consent to sexual activity is knowing and voluntary. Consent to sexual activity requires all involved persons a conscious and voluntary agreement to engage in sexual activity. Each person engaged in the sexual activity must have met the legal age of consent. It is the responsibility of each person to ensure they have the consent of all others engaged in the sexual activity. Consent must be obtained at the time of the specific activity and can be withdrawn at any time. Consent, lack of consent or withdrawal of consent may be communicated by words or non-verbal acts.

Someone who is incapacitated cannot consent. Silence or absence of resistance does not establish consent. The existence of a dating relationship or past sexual relations between the Parties involved should never by itself be assumed to be an indicator of consent. Further, consent to one form of sexual activity does not imply consent to other forms of sexual activity. Consent to engage in sexual activity with one person does not imply consent to engage in sexual activity with another. Coercion and force, or threat of either, invalidates consent.

8. Incapacitated or Incapacitation. A state in which rational decision-making or the ability to consent is rendered impossible because of a person’s temporary or permanent physical or mental impairment, including but not limited to physical or mental impairment resulting from drugs or alcohol, disability, sleep, unconsciousness or illness. Consent does not exist when the Respondent knew or should have known of the other individual’s incapacitation. Incapacitation is determined based on the totality of the circumstances. Incapacitation is more than intoxication but intoxication can cause incapacitation.

Factors to consider in determining incapacity include, but are not limited to, the following:
• Lack of awareness of circumstances or surroundings (e.g., an inability to understand, either temporarily or permanently, the who, what, where, how and/or why of the circumstances; blackout state)
• Inability to physically or verbally communicate coherently, particularly with regard to consent (e.g., slurred or incoherent speech)
• Lack of full control over physical movements (e.g., difficulty walking or standing without stumbling or assistance)
• Physical symptoms (e.g., vomiting or incontinence)

C. Title IX Coordinators. Duties and responsibilities of the University’s Title IX Coordinators include monitoring and oversight of overall implementation of Title IX compliance at the University, including coordination of training, education, communications and coordination with the Equity Resolution Processes for faculty, staff, students and other members of the University community and investigation of complaints of sex discrimination. The University may designate Deputy Coordinators as needed to assist in fulfillment of the Coordinator’s duties and responsibilities.

NOTE: All references to “Title IX Coordinator” throughout this policy refer to the Title IX Coordinator or the Coordinator’s designee.

Any person having inquiries concerning the application of Title IX should contact their respective UM System or campus Title IX Coordinator.

The following individuals serve as Title IX Coordinators and are designated to handle inquiries regarding the Anti-Discrimination policies and to serve as coordinators for purposes of Title IX compliance:

University of Missouri-St. Louis
Dana Beteet Daniels
Title IX Coordinator and Chief Equity Officer
Senior Human Resources Consultant

Address:
220 Woods Hall
St. Louis, MO 63121
Telephone: 314-516-4538
Email: dana@umsl.edu
www.umsl.edu/title-ix

If the Complaint involves the University’s Title IX Coordinator, Complaints may be made to the System Title IX Coordinator. If the Complaint involves the System Title IX Coordinator, reports may be made to the System President. The contact information for the System President is:

Office of the President
321 University Hall
Columbia, MO 65211
Telephone: 573-882-2011
Email: umpresident@umsystem.edu

NOTE: The above-listed contact information for Title IX Coordinators may be updated as needed and without requiring the approval of the Board of Curators.

D. Reporting Sex Discrimination, Including Sexual Harassment and Sexual Misconduct

Students, employees, volunteers, visitors, and patients of the University who have experienced any form of sex discrimination, sexual harassment or sexual misconduct, are encouraged to report the incident promptly to the appropriate Title IX Coordinator listed in Section 600.020.C. above. In addition, students, volunteers, visitors, and patients of the University who have witnessed such conduct are encouraged to report the incident promptly to the appropriate Title IX Coordinator. The University will investigate and appropriately resolve all such reports pursuant to one of its Equity Resolution Processes (see Sections 600.030, 600.040, 600.050, 600.060). For questions regarding confidentiality or requests that the Complaint not be pursued, see Section 600.020.E. below. In order to foster reporting and participation, the University may provide amnesty to Complainants and witnesses for minor student conduct violations ancillary to the incident.

2. Mandated Reporters. Any employee of the University, except as noted below, who becomes aware of sex discrimination as defined in this policy (including sexual harassment, sexual misconduct, stalking on the basis of sex, dating/intimate partner violence or sexual exploitation) is a Mandated Reporter, regardless of whether the recipient of the behavior is a student, employee, volunteer or visitor of the University.

3. Employees with a Legal Obligation or Privilege of Confidentiality.

Employees with a legal obligation or privilege of confidentiality (including health care providers, counselors, lawyers, and their associated staff) are not considered Mandated Reporters and are not required to report when the information is learned in the course of a confidential communication. This also means that the employee seeking the exemption is employed by the University for that specific
E. Requests for Confidentiality or Not to Pursue an Investigation

1. The Title IX Coordinator or other appropriate official should inform and obtain the consent from the Complainant before beginning an investigation. If the Complainant requests confidentiality or asks that the Complaint not be pursued, the Title IX Coordinator should take all reasonable steps to investigate and respond to the Complaint consistent with the request for confidentiality or request not to pursue an investigation. If a Complainant requests confidentiality or insist that identifiable information, such as the Complainant’s name, not be disclosed to the Respondent, the Title IX Coordinator should inform the Complainant that the institution’s ability to respond may be limited. The Title IX Coordinator should evaluate the Complainant’s request in the context of providing a safe and nondiscriminatory environment for the University community.

2. If, after due deliberation and based on the nature and severity of the Complaint, the Title IX Coordinator determines there is a sufficient basis to proceed with the Complaint, the Title IX Coordinator may initiate an investigation notwithstanding a Complainant’s request that the Complaint not be pursued. Such a decision should be well-reasoned and documented. Documentation of the decision will be maintained by the Title IX Coordinator. In such cases, the Title IX Coordinator will inform the Complainant of the decision to commence an investigation. Alternatively, if after due deliberation and based on the nature and severity of the Complaint, the Title IX Coordinator determines there is not a sufficient basis to proceed with the Complaint, the Title IX Coordinator may decide not to initiate an investigation and/or may also refer the Complaint to the appropriate procedural process. Such a decision should be well-reasoned and documented. Documentation of the decision will be maintained by the Title IX Coordinator. If, after due deliberation, the Title IX Coordinator decides the University cannot or should not take disciplinary action with respect to the Respondent, the Title IX Coordinator should consider other steps to limit the effects of the alleged harassment and prevent its recurrence, and remedy its effects on the victim and the University community.

F. Impact of Optional Report to Law Enforcement. In accordance with federal law, the Title IX Coordinator will not wait for the conclusion of a criminal investigation or criminal proceeding to begin the Title IX preliminary investigation. It may be necessary to delay temporarily the fact-finding portion of a Title IX preliminary investigation while the police are gathering evidence. The Title IX Coordinator will promptly resume the preliminary Title IX investigation as soon as notified by the law enforcement agency that it has completed the evidence-gathering process. The Title IX Coordinator will implement appropriate interim steps during the law enforcement agency’s investigation period to provide for the safety of the Complainant and the campus community and the avoidance of retaliation.

G. Non-compliance. Failure to comply with this policy can result in disciplinary action. Employees also are cautioned that non-compliance with this policy may increase their risk of personal liability. Further, an individual who fails to report as required under this policy may be determined to be ineligible for defense or protection under Section 490.010 for any associated claims, causes of action, liabilities or damages.

H. Retaliation. Retaliation is any adverse action taken against a person because of that person’s participation in protected activity. The University strictly prohibits retaliation against any person for making any good faith report to a Title IX Coordinator or for filing, testifying, assisting, or participating in any investigation or proceeding involving allegations of sex discrimination, sexual harassment or sexual misconduct. Any person who engages in such retaliation shall be subject to disciplinary action, up to and including expulsion or termination, in accordance with applicable procedures. Any person who believes they have been subjected to retaliation is encouraged to promptly notify the Equity Officer or Title IX Coordinator. The University will promptly investigate all claims of retaliation.

Examples of prohibited retaliation include, but are not limited to, giving a lesser grade than the student’s academic work warrants because the student filed a Complaint of sexual harassment; giving lower than justified performance appraisals because a person was a witness in an investigation of alleged sexual harassment; and threatening to spread false information about a person for filing a Complaint of sexual harassment.

I. False Reporting. False reporting is making an intentional false report or accusation in relation to this policy as opposed to a report or accusation, which, even if erroneous, is made in good faith. False reporting is a serious offense subject to appropriate disciplinary action ranging up to and including expulsion or termination.

J. Witness Intimidation or Harassment. No individual participating in an investigation relating to a report or Complaint that a violation of this policy has occurred should, directly or through others, take any action which may interfere with the investigation. The University prohibits attempts to or actual intimidation or harassment of any potential witness. Failure to
adhere to these requirements may lead to disciplinary action, up to and including expulsion or termination.

K. U.S. Department of Education—Office for Civil Rights. Inquiries concerning the application of Title IX also may be referred to the United States Department of Education’s Office for Civil Rights. For further information on notice of nondiscrimination, visit http://wdcrробcoip01.ed.gov/CFAPPS/OCR/contactus.cfm and for the address and phone number of the U.S. Department of Education office which serves your area, or call 1-800-421-3481.

The State of Missouri regional Office for Civil Rights is located in Kansas City and is available to provide assistance.

600.040 Equity Resolution Process for Resolving Complaints of Discrimination, Harassment, and Sexual Misconduct against a Faculty Member

600.050 Equity Resolution Process for Resolving Complaints of Discrimination, Harassment, and Sexual Misconduct against a Staff Member

600.060 Equity Resolution Process for Resolving Complaints of Discrimination and Harassment against the University of Missouri
Confidentiality Policies

These statements are set forth as guidelines and procedures to implement the University of Missouri policy on student records developed from the federal Family Educational Rights and Privacy Act of 1974.

The University of Missouri–St. Louis, as charged in the act, will annually inform its eligible students by including in the Student Planner and the UMSL Bulletin the following information:

1. ‘Education Records’ are those records, files, documents, and other materials that contain information directly related to a student and are maintained by the university. Those records, made available for review to the student under The Family Educational Rights and Privacy Act of 1974, are student financial aid, the student’s cumulative advisement file, student health records, disciplinary records, admissions file, and academic record. Confidential letters and statements of recommendation that were placed in student credential folders at the Office of Career Placement Services after January 1, 1975, are also made available, if the student has not waived the right to view these recommendations.

The University of Missouri–St. Louis ‘Education Records’ do not include:

Records of instructional, supervisor, and administrative personnel and educational personnel ancillary thereto which are in the sole possession of the maker thereof and which are not accessible or revealed to any other person except a substitute.

Records of the University of Missouri Police Department created for a law enforcement purpose and maintained by the police department.

In the case of persons who are employed by the university but who are not in attendance at the university, records made and maintained in the normal course of business that related exclusively to such persons and that person’s capacity as an employee where the records are not available for any other purpose.

All records on any university student that are created and maintained by a physician, psychiatrist, psychologist, or other recognized professional or paraprofessional acting in his professional or paraprofessional capacity, or assisting in that capacity, and created, maintained, or used only in connection with the provision of treatment to the student, and are not available to anyone other than persons providing such treatment, provided, however, that such records can be personally reviewed by a physician or other appropriate professional of the student’s choice.

Directory Information:

1. The University of Missouri-St. Louis recognizes ‘Directory Information/Public Information’ to mean a student’s name, address, telephone listing, email, enrollment status, current level, major field of study, participation in officially recognized activities and sports, dates of attendance, degrees and awards received, and the most recent previous educational agency or institution attended by the student. All students must inform the Office of the Registrar if the information designated as directory information should not be released without the student’s prior consent. Students may change their privacy settings by logging in to MyView.

2. University of Missouri-St. Louis students have access to the educational records identified in Paragraph 1 above. In accordance with Public Law 93380 as amended, the University of Missouri–St. Louis will not make available to students the following materials:

Financial records of the parents of students or any information contained therein.

Confidential letters and statements of recommendation placed in the education records prior to January 1, 1975, if such letters or statements are not used for the purpose other than those for which they were specifically intended.

Confidential recommendations respecting admission to the university, application for employment and receipt of honor, or honorary recognition, where the student has signed a waiver of the student’s rights of access as provided in 6.0404, the University Policy on Student Records.

1. The Director of Financial Aid, the appropriate academic dean, Assistant Vice Provost for Student Affairs: Health, Wellness, & Counseling Services, the Vice Provost for Student Affairs, the Director of Career Placement Services, the Director of Admissions, and the Registrar are the officials responsible for the maintenance of each type of record listed in Paragraph 1.

2. Any student may, upon request, review his or her records and, if inaccurate information is included, may request the expunging of such information from the file. Such inaccurate information will then be expunged upon authorization of the official responsible for the file.

3. Students desiring to challenge the content of their record may request an opportunity for a hearing to challenge the content of the educational record in order to ensure that the record is not inaccurate, misleading, or otherwise in violation of the privacy or other rights of the student, to provide an opportunity for the correction or deletion of any such inaccurate, misleading, or otherwise inappropriate data contained therein, and to insert into such records a written explanation respecting the content of such records.

4. The university official charged with custody of the records will attempt to settle informally any disputes with any student regarding the content of the university’s educational records through informal meetings and discussions with the student.

5. Upon request of the student or the university official charged with custody of the records of the student, a formal hearing shall be conducted as follows:

a. The request for a hearing shall be submitted in writing to the chancellor, who will appoint a hearing officer or a hearing committee to conduct the hearing.

b. The hearing shall be conducted and decided within a reasonable period of time following the request for a hearing. The parties will be entitled to written notice 10 days prior to the time and place of the hearing.

c. The hearing shall be conducted and the decision rendered by an appointed hearing official or officials who shall not have a direct interest in the outcome of the hearing.

d. The student shall be afforded a full and fair opportunity to present evidence relevant to the hearing.

e. The decision shall be rendered in writing within a reasonable period of time after the conclusion of the hearing.

Either party may appeal the decision of the hearing official or officials to the campus chancellor. Appeal of the chancellor’s decision is to the president. Appeal of the president’s decision is to the Board of Curators.
1. The University of Missouri-St. Louis will not provide grade reports to parents unless the student has granted access to academic information via their self-service student center.

2. The University of Missouri--St. Louis may permit access to or release of the educational records without the written consent of the student to the parents of a dependent student as defined in Section 152 of the Internal Revenue Code of 1954.

3. If any material or document in the educational record of a student includes information on more than one student, the student may inspect and review only such part of such material or document as relates to him or her or to be informed of the specific information contained in such part of such material.
Tuition and Payments

Fee Assessment
Fees for coursework vary due to the student’s residency standing, undergraduate, graduate or post-graduate status, credit hours, and the applicability of any course fees charged to specific courses or programs. Detailed information on tuition and fee rates and residency status can be found on the Cashier’s website.

Financial Responsibility
A Statement of Financial Responsibility will be presented to all students at least once per academic year. The agreement explains the billing methods, payment options, and all policies related to student accounts. It is the responsibility of the student that fees and other financial obligations are paid as they become due regardless of who is making the payments. Students who need assistance in meeting financial obligations to the University should contact the Financial Aid Office in a timely manner. Students are expected to adhere to important dates and policies that impact fees. Due dates and fee reassessment dates are posted on the Cashier’s website and through links on the eBill website. The non-payment of any financial obligation may result in additional collection fees, the inability to register, and the withholding of student records.

Billing
The Cashier’s Office bills you by posting a monthly student account billing statement on eBill around the 15th of any month in which there is a new charge or credit on your account. The Cashier’s Office will send you and your authorized payer (if any) a billing notification email reminder to check your statement and pay any balance due. The mail.umsl.edu email address will be used for students and the authorized payers email address will be used for authorized payers.

Payment of Fees
Payments are due on the 10th day of each month. The minimum payment can be found at the top of the monthly billing statement or by checking the percentage due as shown in the billing schedules on the Cashier’s website. If a student chooses to make the minimum payment or a partial payment, a finance charge of 1% will be assessed on the unpaid billed balance. The monthly 1% finance charge can be avoided by paying the balance in full. A $25 late payment fee will be charged to student accounts in which the billed minimum or payment in full is not paid by the due date.

All fees, fines, bookstore charges, etc. must be paid by the last day of the term. After the term ends, unpaid accounts will be turned over to an outside collection agency. The University will pursue any and all collection efforts and practices including referring accounts to collection agencies and reporting to the credit bureaus. Accounts may be assessed additional collection charges of 30% of the unpaid principal balance when it is referred to a collection agency. Your Missouri state income tax refund may also be intercepted to partially or fully satisfy a past due debt to the University. Educational and related fees are generally non-dischargeable in bankruptcy and will survive after the bankruptcy has closed. Except in certain limited situations, this means that a student will still owe the debt to the University after the bankruptcy.

Payment Options

Online – Log on to the MyView student system to make payment using a personal checking or savings account (with no additional fee) or any major credit card (a 2.85% service fee will be applied to credit card payments).

Mail – Send your check or money order to the Cashier’s Office at: University of Missouri - St. Louis, 285 Millennium Student Center (MC 212), One University Blvd., St. Louis, MO 63121-4400. Include student name and student number on the check or money order.

In person – Visit the Cashier’s Office on the second floor of the Millennium Student Center in Room 285. Payment in cash, check, money order or pin-based debit are accepted. Credit card payments cannot be processed at the Cashier’s Office, but are accepted online at http://ebill.umsl.edu.

Payment Drop Box – A secure payment drop box is located outside the Cashier’s Office, Room 285 of the Millennium Student Center. Only check or money order payments, please.

Any communications concerning disputed debts, including instruments tendered as full satisfaction of debt, must be sent to Account Disputes, One University Blvd., 289 Millennium Student Center, St. Louis, MO 63121-4400.

Online – Log on to the MyView student system to make payment using a personal checking or savings account (with no additional fee) or any major credit card (a 2.85% service fee will be applied to credit card payments).

Financial Aid – If you have applied for financial aid in advance and have received an award letter, your letter describes how much of your award will be paid towards your student fees. If your financial aid does not cover all the fees, then you must pay the remainder of your student fees yourself by the due date. Financial aid that has not yet been disbursed will appear on your monthly billing statement as “Anticipated Aid”. Your statement will reflect Anticipated Aid as being deducted from your Account Balance giving you an Adjusted Amount Due. Your Minimum Payment is a percentage of the Adjusted Amount Due. Students should pay either the Adjusted Amount Due or the Minimum Payment by the due date to avoid a late payment fee.

Third Party Sponsor – When an organization makes a commitment to pay your educational expenses, they are considered a Third Party Sponsor. If you are expecting a third party sponsor to pay your tuition and fees, you will need to have your sponsor submit a letter of authorization to the Cashier’s Office. Once the sponsor’s letter is received, a credit for the amount the sponsor has indicated will be applied to your student account. An invoice for this amount will then be sent to your sponsor. You are responsible for paying any charges not covered by your sponsor on time, to avoid finance and late charges or other penalties. If your sponsor does not pay for the charges they authorized, the responsibility of paying those charges defaults back to you.
UMSL Compliance with the Veteran Access, Choice and Accountability Act of 2014, Section 702

UMSL is compliant with the requirements of PL 113-146 the Veteran Access, Choice and Accountability Act of 2014, Section 702. Section 702 targets educational assistance through ensuring in-state tuition/in-district rates to uniformed services veterans and their qualified dependents covered under this Section.

The following individuals shall be charged the in-state rate, or otherwise considered a resident, for tuition purposes:

- A Veteran using educational assistance under either chapter 30 (Montgomery G.I. Bill – Active Duty Program) or chapter 33 (Post-9/11 G.I. Bill), of title 38, United States Code, who lives in Missouri while attending a school located in Missouri (regardless of his/her formal State of residence) and enrolls in the school within three years of discharge or release from a period of active duty service of 90 days or more.

- Anyone using transferred Post-9/11 GI Bill benefits (38 U.S.C. § 3319) who lives in Missouri while attending a school located in Missouri (regardless of his/her formal State of residence) and enrolls in the school within three years of the transferor’s discharge or release from a period of active duty service of 90 days or more.

- Anyone described above while he or she remains continuously enrolled (other than during regularly scheduled breaks between courses, semesters, or terms) at the same school. The person so described must have enrolled in the school prior to the expiration of the three year period following discharge or release as described above and must be using educational benefits under either chapter 30 or chapter 33, of title 38, United States Code.

- Anyone using benefits under the Marine Gunnery Sergeant John David Fry Scholarship (38 U.S.C. § 3311(b)(9)) who lives in Missouri while attending a school located in Missouri (regardless of his/her formal State of residence).

- Anyone using transferred Post-9/11 G.I. Bill benefits (38 U.S.C. § 3319) who lives in Missouri while attending a school located in Missouri (regardless of his/her formal State of residence) and the transferor is a member of the uniformed service who is serving on active duty.

UMSL Compliance with the Veterans Benefits and Transition Act of 2018, Section 103

This policy ensures that UMSL will not impose any penalty, including the assessment of late fees, the denial of access to classes, libraries, or other institutional facilities, or the requirement that a covered individual borrow additional funds, on any covered individual because of the individual’s inability to meet his or her financial obligations to the institution due to the delayed disbursement of a payment to be provided by the VA under chapter 31 or 33 of this title.

Refunds

A credit balance is the result of an overpayment on a student’s account from financial aid, loans or payments received. Credit balance refunds will be processed when a credit actually exists on the student’s account. Anticipated financial aid must be received and posted to the student’s account in order for a credit to exist and for a refund to be processed.

When financial aid funds are received by the University, the funds are applied to the students account. During the Fall and Spring semesters, financial aid funds are applied to student accounts no sooner than ten days prior to the start of classes. During the Summer semester, a student must be enrolled in enough hours to qualify for financial aid. Aid for that term will not apply to the student’s account until all of the course(s) begin that satisfy that qualification. If the student has a credit balance after financial aid funds have paid all account charges in full, the student is now eligible for a refund.

Parent-Plus Loan Refund - If you have any funds available after what is owed directly to the University, the refund may be released to the parent at the address listed on the PLUS Loan Application. Refunds from proceeds of PLUS will be issued to the student only if the parent requests that on the PLUS application.

Credit Card Refund - If a credit card payment has been made towards your student account in the past 120 days, any refund due to you will be returned to that credit card.

Drop/Withdrawal Refund – Students who are dropping classes are responsible for canceling their registration and verifying that their classes have been dropped. Any refunding of fees will be made according to the reassessment schedule available on the Cashier’s website. Fees reassessed may include Tuition and Course/Supplemental fees (if applicable). The Spring and Fall reassessment schedules only apply to regular 16-week session courses. The Summer reassessment schedules only apply to regular 4-week, 8-week and 12-week session courses. Fee reassessment for courses not in regular sessions will be based on the course’s total number of calendar days (weekends and holidays included) and the number of calendar days that the student was enrolled in the course. If the meeting dates for your course are different from the regular session meeting dates, please contact the Cashier’s Office as your fee reassessment for withdrawal or dropping may differ from the regular reassessment.

After the withdrawal/drop of a class, the refund process may require two to four weeks processing time. When a student completely withdraws from a semester and was receiving federal financial aid, the University and/or the student may be required to return some of the financial aid awarded to the student.

Charges that students accrue prior to a refund being issued will be deducted from the refund amount. Charges that are accrued after a refund is issued will be billed to the student on the monthly billing statement. As student accounts go into credit balance, the Cashier’s Office processes refunds to students by checks through the mail and by direct deposit to students personal checking or savings accounts. Students should allow 7-10 business days from the day that the refund is processed to receive a refund check in the mail. For students that have direct deposit, please allow 3-5 business days from the day that the refund is processed to receive the refund in your bank account.

Cancellation of Registration Due to Nonpayment of Fees

The university will attempt to notify any student whose registration is about to be administratively canceled for nonpayment of fees prior to taking this action. On or before the last day on which a student may enroll in a course, a canceled student’s space in a course will be given to other students on that course’s wait lists. The canceled student will be placed at the end of the course wait list. Any student who has been administratively canceled for nonpayment of assessed fees may not enroll in a class.
unless the required fees have been paid. If your classes are canceled for nonpayment and you wish to be reinstated, the minimum payment will be required plus a late registration fee. When payment is received, you will be charged for all classes that were canceled.

**Fees May Change Without Notice**

The University reserves the right to modify by increase or decrease the fees charged for attendance and other services at the University, including but not limited to tuition or educational fees, at any time when in the discretion of the governing board the same is in the best interest of the University with all modification of fees to be effective irrespective as to whether fees have or have not been paid by or on behalf of a student prior to the effective date of the modification.
Pursuant to Missouri HB 1606 (2018), information regarding the number of credit hours, program length, employment rate, wage data, and graduates employed in careers related to their program of study at The University of Missouri - St. Louis can be found at the following URL: https://scorecard.mo.gov/scorecard/.

To Search:

- Enter "University of Missouri at St Louis" in the School / Program box.
- Choose a Degree/Credential Type. We offer:
  - Bachelor's Degrees
  - Certificates
  - Doctoral/Professional Degrees
  - Educational Specialist
  - Graduate Certificates
  - Master's Degrees
- Choose the Field of Study.
## Programs A-Z

### A
- Accounting BS (p. 307)
- Accounting Data Analytics Graduate Certificate (p. 308)
- Accounting Data Security Graduate Certificate (p. 308)
- Accounting MAcc (p. 309)
- Accounting Minor (p. 310)
- Accounting Post Baccalaureate Undergraduate Certificate (p. 310)
- ACP Instructional Communication Graduate Certificate (p. 311)
- Actuarial Science BS (p. 311)
- Actuarial Studies Undergraduate Certificate (p. 313)
- Adult and Higher Education MEd, Adult Education Emphasis (p. 313)
- Adult and Higher Education MEd, Higher Education Emphasis (p. 314)
- Adult-Geriatric Nurse Practitioner Post-Graduate Certificate (p. 315)
- Advanced Nursing Practice with Educator Functional Role Post-Graduate Certificate (p. 316)
- African/African American Studies Minor (p. 316)
- American Politics Minor (p. 316)
- American Studies Minor (p. 317)
- Anthropology BA (p. 318)
- Anthropology Minor (p. 320)
- Applied Behavior Analysis Graduate Certificate (p. 320)
- Applied Econometrics and Data Analysis Undergraduate Certificate (p. 320)
- Artificial Intelligence Graduate Certificate (p. 321)
- Artificial Intelligence Undergraduate Certificate (p. 321)
- Athletic Coaching Minor (p. 321)
- Auditing Graduate Certificate (p. 321)
- Autism Studies Graduate Certificate (p. 322)

### B
- Biochemistry and Biotechnology BS (p. 322)
- Biochemistry and Biotechnology BS/MS Dual Degree Program (p. 324)
- Biochemistry and Biotechnology MS (p. 325)
- Biochemistry and Biotechnology MS, Professional Emphasis (p. 325)
- Biology BA (p. 326)
- Biology BS (p. 329)
- Biology BS/MS Dual Degree Program (p. 334)
- Biology Minor (p. 334)
- Biology MS (p. 335)
- Biology MS, Cell and Molecular Biology Emphasis (p. 335)
- Biology MS, Ecology Evolution and Systematics Emphasis (p. 336)
- Biology MS, Professional Science in Cellular and Molecular Biology Emphasis (p. 337)
- Biology PhD, Cell and Molecular Biology Emphasis (p. 337)
- Biology PhD, Ecology, Evolution and Systematics Emphasis (p. 339)
- Biotechnology Graduate Certificate (p. 340)
- Business Administration BS (p. 341)
- Business Administration BS, Entrepreneurship Emphasis (p. 342)
- Business Administration BS, Finance Emphasis (p. 343)
- Business Administration BS, International Business Emphasis (p. 345)
- Business Administration BS, Management Emphasis (p. 346)
- Business Administration BS, Marketing Emphasis (p. 348)
- Business Administration BS, Supply Chain Management Emphasis (p. 349)
- Business Administration BSBA/MBA Dual Degree Program (p. 351)
- Business Administration Graduate Certificate (p. 352)
- Business Administration MBA (p. 352)
- Business Administration MBA, Accounting Emphasis (p. 353)
- Business Administration MBA, Business Analytics Emphasis
- Business Administration MBA, Cybersecurity Emphasis (p. 354)
- Business Administration MBA, Finance Emphasis (p. 356)
- Business Administration MBA, Information Systems Emphasis (p. 357)
- Business Administration MBA, International Business Emphasis (p. 358)
- Business Administration MBA, International Program (p. 359)
- Business Administration MBA, Management Emphasis (p. 360)
- Business Administration MBA, Marketing Emphasis (p. 361)
- Business Administration MBA, Professional Program (p. 362)
- Business Administration MBA, Supply Chain Management Emphasis
- Business Administration Minor (p. 364)
- Business Intelligence Graduate Certificate (p. 364)
- Business PhD, Logistics and Supply Chain Management Emphasis (p. 364)
- Business Administration MS (p. 375)
- Child Advocacy Studies Minor (p. 377)
- Communication BA (p. 379)
- Communication BA, Applied Visual Communication Emphasis (p. 380)
- Communication BA, Interpersonal Communication Emphasis (p. 382)
- Communication BA, Mass Communication Emphasis (p. 383)
- Communication BA, Strategic Communication Emphasis (p. 384)
- Communication BA/MA Dual Degree Program (p. 385)
- Communication MA (p. 386)
- Communication Minor (p. 387)
- Community College Leadership Graduate Certificate (p. 387)
• Computer Programming Education Undergraduate Certificate (p. 387)
• Computer Programming Undergraduate Certificate (p. 387)
• Computer Science BS (p. 388)
• Computer Science BS/MS Dual Degree Program (p. 389)
• Computer Science Minor (p. 390)
• Computer Science MS (p. 390)
• Computing Technology BS (p. 391)
• Conservation Biology Undergraduate Certificate (p. 392)
• Corporate Controllship Graduate Certificate (p. 393)
• Corporate Financial Reporting Graduate Certificate (p. 393)
• Counseling MEd, Clinical Mental Health Emphasis (p. 394)
• Counseling MEd, Elementary Emphasis (p. 395)
• Counseling MEd, Secondary Emphasis (p. 397)
• Creative Writing MFA (p. 398)
• Creative Writing Undergraduate Certificate (p. 399)
• Criminology and Criminal Justice BS (p. 400)
• Criminology and Criminal Justice BS/MA Dual Degree Program (p. 401)
• Criminology and Criminal Justice MA (p. 402)
• Criminology and Criminal Justice Minor (p. 403)
• Criminology and Criminal Justice PhD (p. 403)
• Criminology and Criminal Justice Undergraduate Certificate (p. 404)
• Cybersecurity BS, Computer Science Emphasis (p. 405)
• Cybersecurity BS, Information Systems Emphasis (p. 407)
• Cybersecurity Graduate Certificate (p. 408)
• Cybersecurity Minor (p. 409)
• Cybersecurity MS, Computer Science Emphasis (p. 410)
• Cybersecurity MS, Information Systems Emphasis (p. 411)
• Cybersecurity Undergraduate Certificate (p. 412)

D
• Data Science Graduate Certificate (p. 412)
• Data Science Undergraduate Certificate (p. 413)
• Digital and Social Media Marketing Graduate Certificate (p. 413)
• Digital Marketing Communications Minor (p. 414)
• Doctor of Business Administration (DBA) (p. 414)
• Doctor of Education (Ed.D.) (p. 415)

E
• Early Childhood Education BSEd (p. 416)
• Early Childhood Education BSEd, Special Education Emphasis (p. 417)
• Economics BA (p. 419)
• Economics BS (p. 420)
• Economics BS/MA Dual Degree Program (p. 421)
• Economics MA (p. 422)
• Economics MA, Business Economics Emphasis (p. 423)
• Economics Minor (p. 423)
• Education Administration EdS (p. 423)
• Education Minor (p. 425)
• Education PhD, Counseling Emphasis (p. 425)

F
• Family Nurse Practitioner Post-Graduate Certificate (p. 462)
• Film Studies Undergraduate Certificate (p. 463)
• Finance Minor (p. 463)
• French Minor (p. 463)

G
• Gender and Politics Minor (p. 463)
• Gender Studies Graduate Certificate (p. 464)
• Gender Studies Minor (p. 464)
• Gender Studies Undergraduate Certificate (p. 465)
• German Minor (p. 465)
• Gerontology Minor (p. 465)
• Global Biodiversity Conservation and Leadership Graduate Certificate (p. 466)
• Global Health and Social Medicine Minor (p. 467)

H
• Health Communication Undergraduate Certificate (p. 467)
• History BA (p. 467)
• History BA/MA Dual Degree Program (p. 469)
• History Education Graduate Certificate (p. 470)

Accounting BS

General Education Requirements
All Business majors must meet the university general education requirements (p. 51). As part of meeting the university’s general education requirements, all Business majors must complete the prerequisite courses below:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 1001</td>
<td>Principles of Microeconomics</td>
<td>3</td>
</tr>
<tr>
<td>ECON 1002</td>
<td>Principles of Macroeconomics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1030</td>
<td>College Algebra (MOTR MATH 130)</td>
<td>3</td>
</tr>
</tbody>
</table>

Degree Requirements
All Business majors must meet College of Business G.P.A., good standing and credit requirements (p. 179) as outlined in the Bulletin.

Lower Division Business Core Requirements

<table>
<thead>
<tr>
<th>Course</th>

</table>
The prerequisite for enrollment in ACCTNG 3402, ACCTNG 3411, ACCTNG 3441, and all 4000-level accounting courses is an upper-level accounting grade point average of 2.3 or higher.

See the Office of Undergraduate Academic Advising for alternatives to satisfy the State of Missouri’s requirement of 150 hours for eligibility to take the Uniform Certified Public Accounting Examination.

**Learning Outcomes**

Upon completion of the program, graduates will be able to:

- Interpret business process transactions and create financial statements
- Analyze relevant strategic options relevant to business processes
- Explain the impact of International Financial Reporting Standards upon Financial Reporting
- Identify and assess legal and ethical issues with financial reporting and the accounting profession
- Effectively prepare and present oral and written financial information individually and within group settings
- Evaluate business decisions in the functional areas of financial analysis, corporate governance, taxation, or business processes

**PLEASE NOTE:** This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor. All requirements are subject to change.

**Accounting Data Analytics Graduate Certificate**

The Graduate Certificate in Accounting Data Analytics is designed for individuals seeking expertise in the fast growing data analytics specialty in CPA Practice and corporate practice. Students will gain experience with data visualization and analytics techniques applied to business settings.

**Admission Requirements**

Applicants must meet general University of Missouri-St. Louis Graduate School admissions requirements.

**Certificate Requirements**

All course prerequisites and all course waivers are applicable. Substitute courses may be approved by the appropriate department chairperson and the Director of Graduate Business Programs. All 12 credit hours taken as part of this certificate transfer to the MBA degree program.

Choose four of the following courses: 12

| ACCTNG 5435 Graduate Topics in Auditing |
| ACCTNG 5443/6833 Decision Support Systems for Business Intelligence |
| ACCTNG 5444/6345 Business Analytics and Data Mining |
| ACCTNG 4450/4350 Prescriptive Analytics and Optimization |
| ACCTNG 6460 Advanced Data Integration |

Total Hours: 12

**Accounting Data Security Graduate Certificate**

The Accounting Data Security Certificate requires 18 credit hours in data security. Students pursuing the Master of Accounting degree, the MBA with an Accounting Emphasis, or the Post-Baccalaureate Certificate in Accounting may be interested in also earning this certificate. Any six of the following courses qualifies for credit towards the certificate:

| ACCTNG 5408 Fraud Examination |
| ACCTNG 5435 Graduate Topics in Auditing |
| ACCTNG 5436 Systems Auditing |
| ACCTNG 5465 Principles of Information Security |
| ACCTNG 5466 Management of Accounting Networks and Security |
ACCTNG 5467 Advanced Data Security Concepts 3
ACCTNG 5468 Accounting Software Assurance 3
ACCTNG 5469 Management of Accounting Data Security 3

Accounting MAcc

Prerequisite Courses
The Master of Accounting program is designed to accommodate students who have earned an undergraduate degree with an accounting major. Students who have not completed an undergraduate accounting degree must complete the following courses prior to entry into the MAcc program:

ACCTNG 2400 Fundamentals of Financial Accounting 3
ACCTNG 2410 Managerial Accounting 3
ACCTNG 3401 Financial Accounting and Reporting I 3
ACCTNG 3402 Financial Accounting and Reporting II 3
ACCTNG 3411 Cost Accounting 3
ACCTNG 3421 Accounting Information Systems 3
ACCTNG 3441 Income Taxes 3

These requirements may be waived with appropriate prior coursework. Candidates who have not completed the preparatory courses may apply and be provisionally accepted into the MAcc program, but must complete the courses before registration as a Master of Accounting student can be finalized.

Students must complete a minimum of 30 credit hours while enrolled as a graduate student.

MAcc Degree Requirements

Quantitative Methods
All students must complete the following course:
SCMA 5300 Statistical Analysis for Management Decisions 3

Finance Requirement
FINANCE 6500 Financial Management 3

Business Breadth 12
Select four of the following courses:
BUS AD 5100 Managerial Communication
BUS AD 5900 Law, Ethics and Business
BUS AD 6990 Strategy Formulation and Implementation
INFSYS 5800 Management Information Systems
SCMA 5320 Production and Operations Management
MGMT 5600 Managing People in Organizations
MKTG 5700 Contemporary Marketing Concepts

Accounting Course Requirements
Students must complete the following three courses:
ACCTNG 4401 Financial Accounting and Reporting III 3

Research Course
Select one of the following:
ACCTNG 4402 Professional Accounting Research 3

Graduate Topics
Select one of the following:
ACCTNG 5403 Graduate Topics in Financial Accounting 3
or ACCTNG 5412 Graduate Topics in Management Accounting: Controllership
or ACCTNG 5435 Graduate Topics in Auditing
or ACCTNG 6441 Graduate Topics in Taxation

Electives 15
Students must complete 15 hours of electives including at least six hours of Accounting courses.

Accounting Electives
Select at least two of the following (Not all courses are offered each year):
ACCTNG 5402 Professional Accounting Research
ACCTNG 5403 Graduate Topics in Financial Accounting
ACCTNG 5406 Research and Professional Writing in Accounting
ACCTNG 5408 Fraud Examination
ACCTNG 5412 Graduate Topics in Management Accounting: Controllership
ACCTNG 5435 Graduate Topics in Auditing
ACCTNG 5436 Systems Auditing
ACCTNG 5441 Tax Research
ACCTNG 5446 Advanced Topics in Taxation
ACCTNG 5451 Accounting and Auditing in Governmental and Not-for-Profit Entities
ACCTNG 5480 International Accounting
ACCTNG 5490 Graduate Internship in Accounting
ACCTNG 5491 Contemporary Issues In Accountancy
ACCTNG 5498 Graduate Seminar in Accounting
ACCTNG 6441 Graduate Topics in Taxation

Non-Accounting Courses
Students may complete up to 9 hours from other business disciplines (maximum: 9 credit hours at the graduate level)
Any BUS AD 5000 and above
Any FINANCE 6500 and above
Any INFSYS 5800 and above
Any SCMA 5300 and above
Any MGMT 5600 and above
Learning Outcomes

Upon Completion of the program, graduates will be able to:

• Synthesize business process transactions as well as create and analyze financial statements
• Analyze, critique, and inform strategic options relevant to business processes, corporate governance, internal controls, and security
• Identify and discuss the impact of International Financial Reporting Standards upon financial reporting
• Apply ethical judgement in analyzing accounting situations and be able to formulate ethical accounting and business decisions
• Actively participate in team collaborations as well as prepare written professional communications that justify, critique, or inform relevant accounting or business decisions
• Analyze and critique business decisions in the functional business areas of financial analysis, corporate governance, taxation, or business processes

Accounting Minor

General Requirements

• All minors are 15 credit hours or 5 courses, including business core courses.
• Students must attain a 2.0 grade point average for all courses in the minor.
• Students must attain a minimum grade of C- in each course included in the minor.
• All courses in the minor must be on a graded basis.
• A minimum of 9 credit hours of coursework included in the minor must be taken in residence at UMSL.
• A minor may be added for up to two years following completion of the baccalaureate degree

Specific Requirements for the Minor

Available to all students except those pursuing the Bachelor of Science in Accounting degree. Students must complete:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCTNG 2400</td>
<td>Fundamentals of Financial Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ACCTNG 2410</td>
<td>Managerial Accounting</td>
<td>3</td>
</tr>
<tr>
<td>Plus any three upper division accounting electives</td>
<td></td>
<td>9</td>
</tr>
<tr>
<td>Total Hours</td>
<td></td>
<td>15</td>
</tr>
</tbody>
</table>

Learning Outcomes

Upon completion of the program, certificate earners will be able to:

• Assess business decisions in the functional areas of financial analysis, corporate governance, taxation, and business processes

Accounting Post Baccalaureate Undergraduate Certificate

Prerequisite

Bachelor's degree (in any subject)

Prerequisite Courses

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

</tbody>
</table>

1 MATH 1030 College Algebra is a prerequisite for the required accounting courses. It may be taken concurrently with ACCTNG 2400 Fundamentals Of Financial Accounting, but must be completed prior to enrollment in ACCTNG 2410 Managerial Accounting.

2 ACCTNG 2400 Fundamentals Of Financial Accounting and ACCTNG 2410 Managerial Accounting are also prerequisites for the 3000-level accounting courses.

Required

Complete 27 hours of accounting courses at the 3000-level or above, at least 15 hours of which are completed at UMSL. The accounting courses must include the six required courses listed below and three accounting electives. Courses previously completed can be waived upon presentation of appropriate documentation. Waived courses will not count toward the 15-hour residency requirement.

Courses must be completed with a grade of C- or higher. The grade point average for all courses counting toward the Post-Baccalaureate Certificate in Accounting must be 2.3 or higher. The prerequisite for enrollment in ACCTNG 3402, ACCTNG 3411, ACCTNG 3441, ACCTNG 3451 and all 4000-level accounting courses is an upper-level accounting grade point average of 2.3 or higher.

ACCTNG 4441 Advanced Federal Income Tax: Business Taxation

Total Hours 27

Notes on qualifying for the CPA exam in Missouri
Successful completion of the Post-Baccalaureate Certificate in Accounting includes all the accounting courses needed to qualify for the CPA exam in Missouri. However, Missouri law also requires a total of 60 credit hours in business (including the accounting courses). Many students with undergraduate degrees in business have satisfied this requirement. A student who has not satisfied this requirement must take additional business classes in order to qualify for the CPA exam.

In addition, Missouri requires 150 credit hours of college level coursework in order to qualify for the CPA exam. A student who has completed a 120-hour undergraduate business degree and the Post-Baccalaureate Certificate in Accounting will need additional coursework in order to satisfy the 150-hour requirement.

Learning Outcomes
Upon completion of the program, certificate earners will be able to:

• Analyze business process transactions and create financial statements
• Critically examine strategic options relevant to business processes, corporate governance, internal controls, and security
• Assess business decisions in the functional areas of financial analysis, corporate governance, taxation, and business processes

ACP Instructional Communication Graduate Certificate
The ACP Instructional Communication Certificate is designed for secondary educators interested in teaching public speaking and related courses to high school students for college credit through programs such as UMSL’s Advanced Credit Program. The certificate combines practical application with theory and research to provide teachers with a grounded approach to delivering college appropriate courses with empirical research in communication at the foundation.

Through a combination of online courses and independent studies, students can complete the ACP Communication graduate certificate without visiting campus.

Students who earn the ACP Instructional Communication graduate certificate will be eligible to teach college level courses in public speaking at the secondary level.

Requirements: Graduate Standing. To earn the ACP Communication certificate, students must complete a minimum of 18 hours. Typically, students will earn the certificate by completing the following courses in sequence:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 5000</td>
<td>ACP - Elements of Public Speaking ([R])</td>

<td>ACP - Special Topics ([E])</td>
<td>2,3</td>
</tr>
<tr>
<td></td>
<td>Total Hours</td>
<td>18</td>
</tr>
</tbody>
</table>

1 Most of these are offered only once a year.

Actuarial Science BS
Campus Address: 408 Social Sciences and Business Building (SSB)
Main Number: 314-516-5353
Fax Number: 314-516-5352

Bachelor of Science (B.S.) in Actuarial Science
The B.S. in Actuarial Science provides students with the quantitative skills used by actuaries. Students are required to complete courses offered by the Department of Mathematics and Computer Science, the Department of Economics and the College of Business Administration. Students take coursework in calculus, financial mathematics, statistics, economics, econometrics, and finance. The program is designed to provide students with a solid preparation to take exams and to complete validation by educational experience requirements needed to begin a career as an actuary.

Certificate in Actuarial Studies
The Certificate in Actuarial Studies is designed to provide the education needed for entry level employment in the actuarial profession.

Career Outlook in Actuarial Science
Graduates with this skill set are hired by insurance firms, consulting firms, and financial institutions. Actuarial training is also transferable to broader jobs in data science and analytics. Job prospects for those with actuarial degrees are expected to remain strong over the next decade.

For more information on careers in actuarial science, visit the website of the Society of Actuaries (https://www.soa.org/Member/).

Bachelor of Science in Actuarial Science
General Education Requirements
Students must satisfy the university general education requirements (p. 51). Many of the courses for the degree may be used to fulfill math proficiency, information literacy, social science, and math and life/natural sciences requirements. There is no foreign language requirement for the degree.

Satisfactory/Unsatisfactory Option
Courses required for the major may not be taken on a satisfactory/unsatisfactory basis.
Required Courses

Candidates for the B.S. in Actuarial Science degree must complete a program of 62 credit hours of required courses. Each required course must be completed with a grade of C- or better and students must maintain a GPA of 2.0 for courses required for the degree.

ACCTNG 2400 Fundamentals of Financial Accounting 3
CMP SCI 1250 Introduction to Computing 3
ECON 1001 Principles of Microeconomics (MOTR ECON 102) 3
ECON 1002 Principles of Macroeconomics (MOTR ECON 101) 3
ECON 4100 Introduction to Econometrics 4
ECON 4120 Time Series Econometrics for Business and Economics 4
FINANCE 3500 Financial Management 3
FINANCE 3520 Investments 3
FINANCE 3521 Financial Engineering: Applying Derivatives 3
INFSYS 2800 Information Systems Concepts and Applications 3
MATH 1800 Analytic Geometry and Calculus I 5
MATH 1900 Analytic Geometry and Calculus II 5
MATH 2000 Analytic Geometry and Calculus III 5
MATH 1320 Introduction to Probability and Statistics 3
or ECON 3100 Economic Data and Statistics 3
MATH 4010 Financial Mathematics I 3
MATH 4020 Financial Mathematics II 3
MATH 4200 Mathematical Statistics I 3
MATH 4210 Mathematical Statistics II 3

Total Hours: 62

Recommended Courses

Students are strongly encouraged to take as many of the following courses as possible.

CMP SCI 2250 Programming and Data Structures 3
ECON 3001 Intermediate Microeconomics 3
ECON 3002 Intermediate Macroeconomics 3
ECON 4110 Applied Econometrics 4
ECON 4995 Internship in Actuarial Science 1-3
or MATH 4995 Internship in Actuarial Science 1-3
FINANCE 3561 Principles of Insurance 3
MATH 2450 Elementary Linear Algebra 3
MATH 4260 Introduction to Stochastic Processes 3

Learning Outcomes

Upon completion of the program, graduates will be able to:

• Understand the fundamental concepts of financial mathematics and how those concepts are applied in present and accumulated values for various streams of cash flow.
• Develop the fundamental probability tools for quantitatively assessing risk.
• Use the concepts of statistical inference, such as estimation and hypothesis testing, required for actuarial modeling.
• Become familiar with regression models to analyze and forecast time series data.
• Use economic reasoning to explain individual decision-making and economy-wide outcomes.
• Understand and apply accounting concepts and knowledge of financial instruments and how they are utilized.
• Develop knowledge of the theoretical basis of actuarial models and the application of those models to insurance and other financial risks.

Total Hours: 120

1 INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.
PLEASE NOTE: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Actuarial Studies Undergraduate Certificate

Actuaries use the tools of economics, finance, and mathematics to evaluate and price risk. They are employed by insurance companies, pension funds, consulting firms, and a variety of other financial institutions. The actuarial profession has consistently been ranked as one of the most desirable professions in which to be employed. To become an actuary one must satisfy certain educational requirements, pass exams offered by the Society of Actuaries, and complete professional courses.

The Certificate in Actuarial Studies is designed to provide the education needed for entry level employment in the actuarial profession. Those who complete the certificate will satisfy some of the Validation by Educational Experience requirement of the Society of Actuaries and be prepared to take the first two actuarial examinations (P and FM).

Completion of the certificate requires the following courses. Please note that many of these courses have prerequisites so anyone pursuing the certificate should work carefully with an academic advisor.

Residency Requirement: Of the above required six courses at least five must be taken at the University of Missouri-St. Louis.

**Learning Outcomes**

Upon completion of the program, certificate earners will be able to:

- Interpret, formulate and solve applied problems in probability and statistics.
- Interpret, formulate and solve applied problems in mathematics relating to annuities, bonds and derivative investments.

Acute Care Pediatric Nurse Practitioner Post-Graduate Certificate

Post-graduate certificate (PGC) requirements are tailored to the individual student, depending on past academic work, experience, the student’s goals, and specialty requirements. Upon completion of the PGC requirements, a certificate is awarded by the College of Nursing (CON) and Graduate School. Graduates are eligible to apply to take board certification exams in the advanced practice role and population for which they have been prepared.

Due to higher education regulation changes, the University of Missouri-St. Louis cannot admit students from all states for online programs. Please see the Center for Teaching and Learning for additional information: [http://www.umsl.edu/services/ctl/onlinelearning/state_authorization.html](http://www.umsl.edu/services/ctl/onlinelearning/state_authorization.html).

**Admission Criteria**

- Admission to the University by completing the UMSL Graduate Application
- Completion of College of Nursing supplemental application
- MSN or DNP from a nationally accredited nursing program
- MSN or DNP 3.0 minimum GPA
- Current professional licensure

**Certificate Requirements**

All students must complete 8 credit hours of Residency. One credit hour is equivalent to 75 residency hours.

Adult and Higher Education MEd, Adult Education Emphasis

Effective Fall 2019, the Adult and Higher Education with Adult Education Emphasis program will not be accepting applications at this time.

**Admission Requirements**

This degree program follows the policies of The College of Education and the Graduate School relating to admissions, academic standards, residency, transfer credit, time limitations, and thesis options (see Graduate Study in the Bulletin). The minimum number of hours required for the M.Ed. degree is 32 credit hours.

**Education Requirements**

**Foundation Courses**

Select a course focusing on the learner from the following: 3

---

**Adult and Higher Education MEd, Higher Education Emphasis**

The M.Ed. in Adult & Higher Education is intended for

1. faculty and other educators who want to improve their adult teaching skills;
2. persons who occupy and seek to advance into administrative or management positions in a variety of educational settings; and
3. others who work with adults in a variety of agencies.

The degree program includes courses in foundations, curriculum and teaching (including distance learning), organization and administration, research, and electives so that students can create an emphasis area to fit their career goals. To help address student interests, special topic seminars are offered from time to time. An internship in the student’s emphasis area is a required exit experience. Students elect either the adult education or higher education emphasis area.

**Admission Requirements**

This degree program follows the policies of The College of Education and the Graduate School relating to admissions, academic standards, residency, transfer credit, time limitations, and thesis options (see Graduate Study in the Bulletin). The minimum number of hours required for the M.Ed. degree is 32 credit hours.

- NURSE 6952 Synthesis Practicum 3

American Politics Minor

Requirements for Political Science Minors

A general minor in political science can be arranged, as well as specialized minors in eight different subfields of the discipline. Interested students should see a faculty adviser to plan a coherent program of study as a minor field.

Students must achieve a cumulative 2.0 GPA in the political science courses chosen to qualify for the minor. Students may count no more than 3 hours in political science taken on a satisfactory/unsatisfactory basis toward the minor. Students taking an internship POL SCI 3940 may count no more than three hours of the internship toward the minor.

American Politics

Designed for those students interested in careers in communications, education, business, social work, political consulting, and other fields requiring knowledge of American urban, state, and national politics and institutions. Education majors planning to teach in the social studies field, communications majors planning on a career in journalism, or business majors thinking about working in corporate relations may especially wish to consider a double major in political science with a focus in this area. In addition to the core curriculum and common requirements for all majors, students are advised to take:

Select at least five of the following: 15

- POL SCI 2280 Judicial Politics
- POL SCI 2300 State Politics
- POL SCI 2320 African Americans and the Political System
- POL SCI 2350 Introduction to Urban Politics
- POL SCI 2380 The Politics of Gender in the United States
- POL SCI 2420 Introduction to Public Policy
- POL SCI 2650 American Political Thought
- POL SCI 2820 United States Foreign Policy
- POL SCI 2900 Studies in Political Science (when appropriate)
- POL SCI 3300
- POL SCI 3330 Public Opinion and Political Participation
- POL SCI 3331
- POL SCI 3340 Politics And The Media
- POL SCI 3350 Political Parties and Elections
- POL SCI 3390 Studies in American Politics

African/African American Studies Minor

Core Course (Required):

- CI ST 2000 3

Select at least four of the following electives: 12

- ANTHRO 2124 Introduction to Contemporary African Cultures (Core Course (Required))
- ANTHRO 3235 Women in Subsaharan Africa: A Contemporary Perspective
- ART HS 1105
- HIST 1003 African American History
- HIST 1061
- HIST 1062 Modern Africa: From Colonies to Nations
- HIST 2016 Complete the remaining credit hours with electives.
In addition, students may wish to choose other political science courses listed below under the public policy and administration program of study. Given the growing reality of international interdependence, students should not restrict their studies completely to American politics but should take some course work in comparative and international politics as well. Depending on their specific career interest, students may wish to round out their program with course work in other social science departments such as criminal justice, communications, economics, or social work.

Public Policy and Administration

Learning Outcomes

- Demonstrate knowledge of the institutions, political culture, and processes of American politics.
- Analyze the actions of political actors and their motives.
- Assess political issues, formulate evidence-based recommendations, and communicate them with clarity and coherence.

American Studies Minor

American Studies involves an interdisciplinary approach to the study of the history, cultures, politics, and economy of the United States, its colonial antecedents, and its indigenous peoples. At UMSL, the minor enables students also to study the city and region of St. Louis, a quintessentially American city.

Students interested in this minor should contact the coordinator of American Studies for advice and information.

There are 18 hours required in the minor, and in completing these hours candidates must take courses from at least three disciplines. Candidates must have a cumulative grade point average of 2.0 or better in the minor. Three hours of the minor may be taken on a satisfactory/unsatisfactory basis, and a maximum of nine hours will be accepted in transfer. Candidates wishing to take American Studies courses in the Honors College do not need to be members of the Honors College but must register for the courses via the Honors College.

Requirements for the Minor

Completion of the American Studies Minor requires at least 18 credit hours (6 courses) including an interdisciplinary introductory course. Of the remaining 15 hours, at least six hours must be taken from a small group of core courses designed to give students a foundation for further study and at least six hours from a larger group of elective courses which will broaden students' experience or enable them to specialize in specific areas. At least six hours must be taken from advanced level (3000 and 4000) undergraduate courses. Students are recommended to include in this advanced work an American Studies "capstone", an option that may be fulfilled in several ways, which are described below.
Anthropology BA

Anthropology is the scientific study of humanity. Anthropologists take a broad approach to understanding the diversity of human biology, culture, and language in the past and present. Anthropology students learn about the processes that shape our own culture and the cultures of others, and develop a solid knowledge of the underlying humanity that connects and defines us. Opportunities exist for students to pursue diverse research experiences across a vast range of topics on human actions, beliefs, and organization, and to intern with local organizations.

General Education Requirements

Majors must satisfy the university and college general education requirements (p. 51). Any foreign language may be used to meet the language requirement for the B.A. degrees.

Degree Requirements

All required courses for the major must be completed with a grade of C- or better. The following courses are required:

<table>
<thead>
<tr>
<th>Course Code</th>

<td></td>
</tr>
<tr>
<td>Select nine additional credit hours in Anthropology numbered 3000-4999</td>
<td>9</td>
<td></td>
</tr>
</tbody>
</table>

Total Hours: 37

Students are encouraged to complete a capstone for the American Studies minor. A capstone course can satisfy three credit hours of the 18 hour minor. Experiences that could serve as a capstone include appropriate departmental capstone courses, independent studies, research projects, and internships. Interested students should work with the coordinator of American Studies to have a capstone course approved.

Capstone options:

1 The three courses must come from two different subfields: Cultural Anthropology, Archaeology, or Biological Anthropology.

The total number of hours required for the major is 37.

Students may elect to take up to, but not to exceed, 15 additional hours in anthropology courses of their choice.
At the end of the program, students should have these competencies:

- **Discipline-Specific (Content) Knowledge**
  Graduates will be able to discuss the importance of cultural diversity, thus preparing them to function in multicultural or international settings. Graduates will understand the common evolutionary origins that unify all cultural differences, as well as human biological variation within our shared humanity. Graduates will develop in-depth knowledge of the culture of a particular region of the world.

- **Communication Skills**
  Graduates will develop social science writing skills, including writing of a research proposal for a grant agency and a substantial research report. Graduates will develop oral presentation skills, including presenting a formal research report.

- **Information Management/Quantitative Skills**
  Graduates will master research methods in one of the subfields of anthropology (cultural anthropology, biological anthropology, archaeology). Graduates will learn to design and conduct an original research project, working in close cooperation with faculty.

- **Valuing/Ethics/Integrity**
  Graduates will be able to discuss and articulate the professional ethics and codes of conduct of the discipline.

- **Critical Thinking Skills**
  Graduates will develop the ability to apply anthropological concepts in performing critical analysis of broad historical trends and complex social issues. Graduates will be able to value cultural diversity, thus preparing them to function in multicultural or international settings.

- **Application/Internship Skills**
  Graduates will gain hands-on experience in the application of anthropological concepts to real life and will be able to apply anthropological theory to real-life experience.

### Residency Requirement

Undergraduate majors must complete a minimum of 17 hours of upper-level (3000-5000) Anthropology courses in residence, including:

- ANTHRO 4315  Anthropology Past, Present, and Future  3

And at least one of the following:

- ANTHRO 3209  Forensic Anthropology  3
- ANTHRO 3211  Linguistic Anthropology
- ANTHRO 3212  Medical Anthropology
- ANTHRO 4015  Data Analytics in the Social Sciences
- ANTHRO 4000  Ethnographic Field Research Methods
- ANTHRO 4100  Field Methods in Archaeology
- ANTHRO 4307  Community Based Research in Anthropology
- ANTHRO 4310  Laboratory Methods in Archaeology

**Total Hours: 6**

### Learning Outcomes

Upon completion of the program, graduates will be able to:

- Demonstrate knowledge of the evolutionary and historical processes that shaped our ancestors and led to the biological, behavioral, and cultural diversity seen in the present
- Demonstrate a command of key concepts, issues, theories, and debates in anthropology
- Demonstrate knowledge of varying types of anthropological data and how they are collected, analyzed, synthesized, and interpreted
- Think critically and analytically about issues of social justice and social inequality
- Apply problem-solving and research skills beneficial to anthropology as well as to a variety of careers in today’s global economy
- Communicate cross-culturally and within multicultural settings
- Demonstrate an appreciation for the role of anthropology in the workplace and the real world

Applied Econometrics and Data Analysis Undergraduate Certificate

Those with economics degrees are in high demand in a large number of occupations, whether in business or government; students with advanced econometrics skills who understand how to apply these techniques in real-world settings are in even higher demand. This Certificate in Applied Econometrics and Data Analysis is designed to provide the education needed for employment in analysis positions in business or government. The Certificate is a valuable credential for economics majors with a quantitative focus, (applied) math majors, and selected students from other social sciences.

The Certificate consists of 6 courses met through 3 required courses and 3 electives which must be selected from the list below. At least 4 of these courses must be completed in residency at UMSL. (Note that all of these courses have prerequisites that the student must complete before taking the selected course.)

Required Courses

<table>

</tr>
</tbody>
</table>
Learning Outcomes

• Use statistical software to estimate, analyze, and interpret economic relationships applying regression analysis techniques to data.
• Develop appropriate econometric models using real-world data to make management or policy recommendations in a variety of professional settings.
• Apply key concepts of estimation and forecasting in a time series context.

Artificial Intelligence Graduate Certificate

The graduate certificate in Artificial Intelligence is a four-course (12 credit hour) program. It provides skills and training necessary to start and/or advance in the growing areas of AI, with a range of electives to focus more specifically in one’s desired direction of study. All students must take two required courses and two electives.

A minimum of three courses must be taken from UMSL. A maximum of two courses can be used from the 4000-level. Courses may be substituted with the permission of the certificate coordinator. For more information, students can contact the department chair or email info@arch.umsl.edu.

Auditing Graduate Certificate

The Certificate Program in Auditing provides students with the knowledge and judgment needed to conduct audits of for-profit, not-for-profit, and government entities. Concepts associated with independent audits, systems audits, controls evaluations, internal audits, and operational audits are examined.

Admission Requirements

Applicants must meet general University of Missouri-St. Louis Graduate School admissions requirements.

Certificate Requirements

All course prerequisites and all course waivers are applicable. Substitute courses may be approved by the appropriate department chairperson and the Director of Graduate Business Programs. All 12 credit hours taken as part of this certificate transfer to the MBA degree program.

The mission of the certificate program is:

- To improve current preparation of teachers and related educational practitioners in the greater St. Louis area with dedicated coursework that increases program participants’ understanding and skills necessary to providing comprehensive and holistic programming (in areas of academic, social, functional, and life skills) that addresses the unique characteristics of individuals with Autism.
- To provide contemporary, best practices-based preparation of professionals who specialize in the treatment of individuals with autism spectrum disorders (ASD) and/or who work collaboratively with school personnel to recognize and follow the ASD profile that best educates the students.
- To gain greater understanding of challenges faced by families of individuals with ASD.
- To prepare personnel to educate and support individuals with ASD, which includes autism, Asperger Syndrome, and other pervasive developmental disorders.
- To address the complex needs of students with ASD, including those who require intensive and highly individualized programs, to those who require less intensive modifications to succeed in their educational, functional, and life goals.
- To increase the current body of scholarly and applied knowledge pertaining to the science and practice in areas of cognitive disability studies.

1. The first three courses in the autism certificate are the same as those in the M.Ed. Special Education Concentration I.

### Biochemistry and Biotechnology BS

The mission of the Biochemistry and Biotechnology Program is to provide students with a solid foundation in both chemistry and biology, as well as specialized training in the rapidly growing fields of biochemistry and biotechnology. Faculty members in this program are engaged in teaching and research in a broad range of areas, including genetics and molecular biology, microbiology and immunology, and protein biochemistry and biophysics. Students have the opportunity through coursework, laboratories, seminars, and research experience to develop the knowledge and skills necessary to enter the workforce or to continue with further graduate education.

### Degree Requirements

#### General Education Requirements

Students must satisfy the university and college general education requirements (p. 51). Some math or science courses required for the major may be used to meet the science and mathematics requirement of the university. There is no foreign language requirement for the degree.

All Biochemistry & Biotechnology majors are required to take a capstone seminar (either CHEM 4797 or BIOL 4797) during the semester in which they plan to graduate (the winter semester for students graduating in the summer). Students may not receive credit for both CHEM 4797 and BIOL 4797.

#### Satisfactory/Unsatisfactory Option

Up to 18 credit hours may be taken on a satisfactory/unsatisfactory (s/u). Excluded from this option are required courses in biology, chemistry, physics, and mathematics.

#### Non-major Biology or Chemistry courses

Courses in Biology with a number less than 1800 and courses in Chemistry with a number less than 1100 do not count toward the credit hours required for a major in biochemistry and biotechnology.

### Research for Credit

A maximum of 3 credit hours from any combination of BIOL 4905 and CHEM 3905 may be applied toward the Biochemistry & Biotechnology program.

### Transfer of Credit from Saint Louis Community Colleges

Students transferring BIO 219 and BIO 220 from Saint Louis Community Colleges will not have to complete BIOL 4614. However, they will have to take an additional 3 credit hours of Biochemistry and Biotechnology Elective coursework.

#### Biology Core Courses

  - CHEM 3643
  - CHEM 3905

- Electives
  - Recommendations include basic statistics (MATH 1310 or MATH 1320), computer science, public speaking (COMM 1040), foreign language, ethics, and undergraduate research.

- Research Opportunity
  - Students may use up to 3 credit hours of undergraduate research as elective hours in the B.S. degree. This provides an opportunity to gain research experience under the supervision of a faculty member. The project will normally include a review of the literature, laboratory experience and a final research report.

- Minor in Biology
  - Students who complete the B.S. degree in Biochemistry and Biotechnology may also obtain a minor in biology by completing BIOL 1821, Introductory Biology: Organisms and the Environment. The minor must be approved by the chair of the Department of Biology. At least 9 hours of the biology course credits must be taken in residence at UMSL. Candidates must have a cumulative grade point average of 2.0 or better in the minor, and none of the courses may be taken on a satisfactory/unsatisfactory (S/U) basis.

- Minor in Chemistry
  - Students who complete the B.S. degree in Biochemistry and Biotechnology will also fulfill the course requirements for a minor in Chemistry. A GPA of at least 2.0 is required for the courses presented for the minor. At least three courses toward the Chemistry minor must be completed at UMSL.

- Program Learning Outcomes
  - Students often think of the physical and life sciences as areas in which one masters a collection of “scientific facts”. However, an education in Biochemistry & Biotechnology involves much more than memorizing facts. Students in this program will develop a well-rounded set of competencies in several critical areas. These include:
    - **Discipline-Specific Knowledge.** Graduates will demonstrate a clear understanding of the overriding principles and theorems within and between the primary content areas of chemistry, biology, and biochemistry, including the
      - Structure and function of the basic biological units of living organisms and their role in life and disease.
      - Information flow, exchange, and storage from parent to offspring or from parent cells to progeny cells.
      - Organic reactions and physical chemical principles underlying metabolic reactions.
      - Molecular mechanisms commonly used to regulate metabolic and cellular pathways.
    - **Laboratory Skills.** Scientists not only learn the results of others, they work in the lab to generate new knowledge. Graduates will develop basic skills associated with performing laboratory experiments in chemistry, biology, and biochemistry following a broad introduction of commonly used equipment and procedures.
    - **Critical thinking Skills.** Graduates will be able to formulate meaningful hypotheses and evaluate data critically, including
Communication Skills. Scientists not only must be able to
Problem Solving Skills. Graduates will be able to define and

understanding and respect for the accepted standards of
practices, including honestly and objectively evaluating and
comprehension and be able to critically evaluate reliability,
and scientific information presented to the public with good
the background knowledge necessary to read the literature
chemistry, biology, and biochemistry. Graduates will have
results and ideas.
• Scientific Literacy. Scientists must be able to build on the
previous work of others and to put their new results into the
larger context of the field. Graduates will be able to find
and retrieve information within the vast scientific literature in
chemistry, biology, and biochemistry. Graduates will have
the background knowledge necessary to read the literature
and scientific information presented to the public with good
comprehension and be able to critically evaluate reliability,
accuracy, authority, and point of view or bias.
• Professional Ethics. Graduates will follow standard scientific
practices, including honestly and objectively evaluating and
reporting data and acknowledging the ideas and published
work of others. In doing so, graduates will demonstrate an
understanding and respect for the accepted standards of
conduct associated with the profession.

Total Hours: 120

1 INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

Please Note: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change

Biochemistry and Biotechnology
BS/MS Dual Degree Program

The BS/MS (2+3) BCBT program is an accelerated program that allows students of appropriate academic ability and maturity to complete both a B.S. and a M.S. in Biochemistry and Biotechnology in five years of full time study. The program allows students to apply 12 of the 30 M.S. credit hours towards the B.S. (per the approval of the College of Arts and Sciences), reducing the overall required hours for the two. Students will pay graduate credit hour tuition for all courses applied to the graduate degree. All other requirements for the B.S. and M.S. degrees remain in effect.

Admission Requirements

Students interested in this program must go through a two-step admission process. First, applicants for Provisional Status must have completed all courses in the biology, chemistry, math and physics cores of the B.S. BCBT program. CHEM 4712 Biochemistry must be in progress or completed prior to applying for Provisional Graduate status. Applicants should have completed all of the general education requirements. Applicants must also have a minimum G.P.A. of 3.0 (both overall and in science courses) and must submit at least two letters of recommendation (one instructor and one academic advisor is recommended).

The second step of the admission process is the transition from Provisional status to formal graduate status. Admission requirements for formal graduate status are the same as for the traditional MS program.

Awarding of Degrees

Both degrees (the B.S. and M.S.) will be awarded when all requirements for the entire program have been completed. In other words, the B.S. and M.S. degrees will be simultaneously awarded at the completion of study. Students who officially withdraw from the BS/MS Dual BCBT Degree Program and who have successfully completed all of the requirements for the B.S. degree will be awarded the B.S. degree.
Biochemistry and Biotechnology MS

The Biochemistry and Biotechnology Program offers three types of Master of Science degrees.

- One is a 30 credit hour non-thesis option suitable for those with laboratory research experience or for others, such as educators, who do not require research experience.
- The second is a 32 credit hour Professional Science emphasis area that includes a strong business component for students who are interested in learning more about the business aspects of companies. This track may not be appropriate for students who are interested in pursuing a PhD or working primarily as laboratory scientists.
- The third option includes laboratory-based research under the supervision of one of the program faculty members, leading to a written thesis. All students admitted to the graduate program are considered to be in the non-thesis program. They may transfer into the thesis program after they have been accepted as a thesis student by one of the faculty.

Admission Requirements

Applicants to the M.S. program must submit a completed application and personal data forms, and transcripts of all previous postsecondary academic work. Submission of Graduate Record Examination scores, although not required, will be considered. Admission as a regular graduate student requires graduation from an accredited college with a minimum grade point overall and in biology and chemistry courses of 3.0 (where A=4.0). Students will generally be expected to have completed a major in biology, chemistry, biochemistry or biotechnology. In addition to the Graduate School admission requirements, applicants should have completed an undergraduate course in biochemistry. Successful applicants will typically have completed courses in organic chemistry, cell biology, and genetics. Applicants may be asked to make up any deficiencies in these areas as a condition of enrollment.

All international applicants, except those from countries where English is the primary language, must take the TOEFL. Ordinarily, a score of 213 on the computer-based exam (550 on the paper-based exam or 80 on the internet-based exam) or better is required.

Degree Requirements

Both the thesis and non-thesis options require a total of 30 graduate credit hours, of which at least half must be at the 5000-level or above. A maximum of 12 or 5 credit hours of Graduate Research (BIOL 6905 or CHEM 6905) may be applied toward the 30 credit hour total for the thesis or non-thesis options, respectively. Students must have a 3.0 GPA in non-research courses.

Biochemistry and Biotechnology MS, Professional Emphasis

Professional Science Master's Emphasis

This track requires a total of 32 graduate credit hours, of which at least half must be at the 5000-level or above. Students take 21 credit hours of science courses (Biology and Chemistry) and 9 hours in business courses. In addition, each student is required to take 2 credit hours of either an on-campus practicum course or an off-campus internship.

Total Hours 32

¹ Can be repeated for up to 2 credit hours.
² Can be taken for up to 2 credit hours in either CHEM 6905 or BIOL 6905. Students must have a 3.0 GPA in non-research courses.

Biology BA

The B.A. degree in biology is designed to prepare students for basic technical positions and graduate studies in the life sciences. Candidates for the degree have the same core courses and general education requirements as those seeking the Bachelor of Science degree, but with less emphasis on science electives and more emphasis on liberal arts.

General Education Requirements

Students must satisfy the university and college general education requirements (p. 51). Some Biology courses may be used to meet the science and mathematics requirement of the university.

Candidates for the B.A. degree must fulfill the foreign language requirement of the College of Arts and Sciences. There is no foreign language requirement for the B.S. degree.

Satisfactory/Unsatisfactory Option

Up to 18 credit hours may be taken on a satisfactory/unsatisfactory (s/u) basis. Excluded from this option are required courses in biology, chemistry, physics, and mathematics.

Non-major biology courses

The following 1000 level biology courses do not count toward the biology credit hours required for a major in biology. Moreover, if biology majors take these courses, they are treated as biology courses when computing the 70 credit hours outside of biology needed to be included in the 120 total credit hours required for graduation.

Declaring the Biology Major

Students seeking to major in biology are first designated as pre-biology majors until they have successfully completed Genetics, BIOL 2012, in residence with a grade of C or better. Students who have completed a Genetics course elsewhere will have to either pass a proficiency examination in Genetics or complete BIOL 2012 in residence with a grade of C or better. Students may then declare biology as their major. BIOL 2012 must be completed successfully within two attempts, including excused withdrawals.

The B.A. degree provides maximum flexibility for biology majors to pursue an undergraduate liberal arts course of study that can lead to professional careers in medicine, allied health, public and environmental health, law, and graduate studies in the life sciences. Candidates must have a cumulative grade point average of 2.0 or better in biology courses. Candidates must also earn a minimum grade of C- in all core courses.

All B.A. degree majors must take at least 40 credit hours, but not more than 50 hours, in appropriate biology course work. A minimum of 18 hours at or above the 2000 level (including one laboratory) must be taken in residence in the UMSL Department of Biology in order to receive a B.A. degree from the College of Arts and Sciences with a major in biology.

Lecture and Seminar Course Requirements

The following biology courses or their equivalents are required:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 1800</td>
<td>Introduction to the Biology Major</td>
</tr>
<tr>
<td>BIOL 1821</td>

<tr>
<td>BIOL 4422</td>
<td>Entomology</td>
</tr>
<tr>
<td>BIOL 4501</td>
<td>Flowering Plant Families: Phylogeny and Diversification</td>
</tr>
</tbody>
</table>

Capstone 2-4

Select one of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 4889</td>
<td>Senior Seminar</td>
</tr>
</tbody>
</table>
**Elective Courses**

Three additional biology lecture courses, at the 2000 level or higher are required. They may be selected from any of the lecture or lecture-laboratory courses offered. Selection of these courses should reflect the career interest of the student. Biology courses taken to fulfill basic skill requirements (e.g., statistics requirement or biochemistry option) can be used to satisfy this requirement.

At least two biology lecture courses taken as part of the core or as electives must be at the 4000 level or higher. No more than one of these higher level courses can be used to fulfill other requirements (e.g., diversity or statistics requirements, or biochemistry option). Biochemistry CHEM 4722 can also be used toward satisfying this requirement.

BIOL 4905 or BIOL 4915 can be applied to the electives requirement but two 4000 level lecture courses are still required.

**Laboratory Course Requirements**

Three biology laboratory courses at the 2000 level or higher are required. They may be taken from any of the lecture-laboratory or laboratory courses offered. Two credit hours of BIOL 3699, BIOL 4299, BIOL 4905, or BIOL 4915 (no combination of these courses allowed) can be used to fulfill one laboratory requirement. Students may take CHEM 4733 to satisfy one of these laboratory course requirements, but students may not use both BIOL 4713 and CHEM 4733 to fulfill this requirement.

**Basic Skills Requirement**

A well-rounded biologist needs certain skills outside the biology subject matter. The basic skills requirement is designed to provide the student with a background in communication skills and knowledge in associated science areas.

Communication Skills. Courses in foreign languages and in writing are required for development of the basic communication skills needed to transmit scientific information. The following satisfy this requirement:

<table>
<thead>
<tr>
<th>Course</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 3160</td>
<td>3</td>
</tr>
<tr>
<td>or ENGL 3100</td>
<td></td>
</tr>
</tbody>
</table>

**Associated Science Area**

The following courses or their equivalents must be successfully completed in science areas related to biology:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS 1011</td>
<td>Basic Physics I</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 1011L</td>
<td>Basic Physics I Laboratory</td>
<td>1</td>
</tr>
<tr>
<td>PHYS 1012</td>

<td>5</td>
</tr>
<tr>
<td>CHEM 1121</td>
<td>Introductory Chemistry II</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 2612</td>
<td>Organic Chemistry I</td>
<td>3</td>
</tr>
</tbody>
</table>

**Research Opportunity**

Students in the B.S. Biology degree program who are interested in gaining research experience are encouraged to take a minimum 2 credit hours of undergraduate research, BIOL 4905. The privilege of doing undergraduate research provides students with a first-hand opportunity to experience the research process under the supervision of a faculty member or off-campus scientist. The project normally includes a library search of pertinent literature, laboratory or field experience, and a summary paper and a presentation, all based on an average 8 hr. per week per credit hour for a 15 week semester.

**Thesis in Biology Research and the Degree with Distinction**

The Department of Biology offers high-achieving students the opportunity to present primary research in the form of a written thesis and to graduate with a Degree with Distinction in Biology. The first step in conducting an undergraduate thesis is to identify a faculty research mentor with whom you can conduct novel research. The mentor, along with two UMSL faculty members, will be readers of the thesis. Students need a minimum of two semesters, usually more, to conduct research. After students have identified a research mentor and have completed 75 credit hours, they may apply for a Degree with Distinction in Biology. The final thesis will be written in the form of a scientific manuscript and presented orally in an advertised public forum at least 6 weeks prior to commencement. The readers of the thesis will decide if the thesis merits a Degree with Distinction, and will report their recommendation to the Dean of Arts and Sciences. In addition to fulfilling the coursework required for a B.S. or B.A. in Biology and the thesis itself, students must also fulfill all the requirements for UMSL’s Degree with Distinction.

**Academic Tracks within the Major of Biology**

Biology majors may choose to focus their elective hours in a particular sub-discipline of biology, or academic track. These tracks are groups of departmental courses that fit within sub-disciplines of biology and are recommendations for students wanting to pursue careers in specific sub-disciplines. Academic tracks are NOT majors and are only intended to serve as guides for courses within a particular area of biology and are represented by current faculty expertise. Selecting an academic track does not prevent a student from taking courses in another track. Students should not expect to take all recommended courses for each academic track. Students may choose not to select an academic track.
Currently, the Biology Department offers three academic tracks: Cell and Molecular Biology; Ecology, Evolution and Conservation Biology; and Pre-professional/Health Sciences.

Cell and Molecular Biology Track

BIOL 2482 Microbiology 3
BIOL 2483 Microbiology Laboratory 2
BIOL 4442 Developmental Biology 3
BIOL 4550 Bacterial Pathogenesis 3
BIOL 4602 Molecular Biology 3
BIOL 4614 Biotechnology Laboratory I 4
BIOL 4615 Biotechnology Laboratory II 4
BIOL 4622 Cellular Basis of Disease 3
BIOL 4632 Nucleic Acid Structure and Function 3
BIOL 4642 Plant Molecular Biology and Biotechnology 3
BIOL 4652 Virology 3
BIOL 4712 Biochemistry 3
BIOL 4713 Techniques in Biochemistry 2
BIOL 4842 Immunobiology 3

Ecology, Evolution and Conservation Biology Track

BIOL 2102 Ecology 3
BIOL 2103 Ecology Laboratory 2
BIOL 2402 Vertebrate Anatomy 3
BIOL 2403 Vertebrate Anatomy Laboratory 2
BIOL 2482 Microbiology 3
BIOL 2483 Microbiology Laboratory 2
BIOL 2501 Biology of Plants 5
BIOL 3102 Animal Behavior 3
BIOL 3103 Animal Behavior Laboratory 2
BIOL 3202 Conservation Biology 3
BIOL 3203 Conservation Biology Laboratory 2
BIOL 3802 Vertebrate Physiology 3
BIOL 3803 Vertebrate Physiology Lab 2
BIOL 4102 Behavioral Ecology 3
BIOL 4122 Biometry 3
BIOL 4182 Population Biology 3
BIOL 4192 Applications of Geographic Information Systems 5
BIOL 4222 Tropical Ecology and Conservation 3
BIOL 4245 Field Biology 3
BIOL 4299 Practicum in Conservation 2
BIOL 4402 Ornithology 3
BIOL 4403 Ornithology Laboratory 2
BIOL 4422 Entomology 3
BIOL 4423 Entomology Laboratory 2
BIOL 4501 Flowering Plant Families: Phylogeny and Diversification 5

Pre-professional/Health Sciences Track

BIOL 2402 Vertebrate Anatomy 3
BIOL 2403 Vertebrate Anatomy Laboratory 2
BIOL 2482 Microbiology 3
BIOL 2483 Microbiology Laboratory 2
BIOL 3802 Vertebrate Physiology 3
BIOL 3803 Vertebrate Physiology Lab 2
BIOL 4442 Developmental Biology 3
BIOL 4550 Bacterial Pathogenesis 3
BIOL 4602 Molecular Biology 3
BIOL 4622 Cellular Basis of Disease 3
BIOL 4652 Virology 3
BIOL 4712 Biochemistry 3
BIOL 4822 Introduction to Neuroscience 3
BIOL 4842 Immunobiology 3

B.S. Ed. in Secondary Education with Emphasis in Biology

The B.S. Ed. is a professional education degree designed for students who wish to pursue a teaching career in secondary schools. Much of the discipline-specific coursework parallels the B.A. or B.S. degree in the discipline; however, the Missouri Department of Elementary and Secondary Education (DESE) requires specific coursework for teacher certification. Therefore, students interested in the B.S. Ed. should contact the advising office (OASIS) 314-516-5937 in the College of Education for discipline-specific requirements. Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

B.A. or B.S. in Biology with Master's Level Coursework for Secondary Teacher Certification

In addition to the B.S. Ed., students may opt to complete a B.A. or B.S. degree in their discipline as an undergraduate, followed by admission to the Graduate School for Master’s level teaching certification. The College of Education has a one-year accelerated program for post-graduate certification called Teach in 12, or students can choose a traditional path to certification. Graduate coursework for certification can apply towards a Master’s Degree in Secondary Education, with additional coursework. Students interested in Master’s Level teacher certification should contact the advising office (OASIS) 314-516-5937 in the College of Education. Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

Learning Outcomes

Integrative Knowledge

Graduates will demonstrate a clear understanding of the overriding principles and theorems within and between the content areas of anatomy, botany, cytology, ecology, evolutionary biology, microbiology, physiology, and zoology. Specifically, graduates will demonstrate competency in the following areas:

- Structure and function of the basic biological units of living organisms
- Information flow, exchange and storage from parent to offspring or from parent cells to progeny cells.
- Pathways and transformations of energy and matter that govern metabolism
- Systems that govern interactions between organisms or between organisms and their environment
• Biodiversity at the genetic, organismal, community, and global scales
• Evolution, common ancestry, and changes to biological populations over successive generations.

**Laboratory Skills**
Scientists not only learn the results of others, they work in the lab to generate new knowledge. Graduates will demonstrate basic skills associated with performing laboratory experiments or field studies in biology following a broad introduction of commonly used equipment and procedures.

**Critical Thinking Skills**
Graduates will be able to formulate meaningful hypotheses, design experiments to test them, and evaluate data critically, including an appreciation of the potential sources of error associated with laboratory measurements and troubleshooting technical issues.

**Scientific Literacy**
Graduates will be able to identify the need for information, procure the information from relevant scientific literature publications and databases, and critically evaluate reliability, validity, accuracy, authority, timeliness, and point of view or bias.

**Communication Skills**
Scientists not only must be able to solve problems, they also must be able to communicate those solutions to others. Graduates of this program demonstrate how to present scientific concepts and information in a clear and accurate manner. Specifically, graduates will be able to write scientific reports and make effective oral presentations of their results and ideas.

**Professional and Research Ethics**
Graduates will honestly and objectively evaluate and report data in an ethical and legal manner to promote the values that are essential to scholarly work: trust, accountability, mutual respect, and fairness. By doing so, graduates will come to understand and respect the accepted standards of conduct associated with the scientific profession regarding citation, use of privileged information, integrity of data, and authorship.

**Foreign Language**
B.A. graduates will demonstrate basic proficiency in speaking, listening, writing and reading in a language in addition to English.

Total Hours: 123

1 INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

**Please Note:** This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

**Biology BS**

The B.S. degree in biology is designed to prepare students for basic technical positions and graduate studies in the life sciences. Candidates for the degree have the same core courses and general education requirements as those seeking the Bachelor of Arts degree, as well as additional requirements in depth of study, laboratory experience, communication skills, and background in associated science areas.

**General Education Requirements**

Students must satisfy the university and college general education requirements (p. 51). Some Biology courses may be used to meet the science and mathematics requirement of the university.

Candidates for the B.A. degree must fulfill the foreign language requirement of the College of Arts and Sciences. There is no foreign language requirement for the B.S. degree.

**Satisfactory/Unsatisfactory Option**

Up to 18 credit hours may be taken on a satisfactory/unsatisfactory (s/u) basis. Excluded from this option are required courses in biology, chemistry, physics, and mathematics.
Non-major biology courses
The following 1000 level biology courses do not count toward the biology credit hours required for a major in biology. Moreover, if biology majors take these courses, they are treated as biology courses when computing the 70 credit hours outside of biology needed to be included in the 120 total credit hours required for graduation.

Declaring the Biology Major
Students seeking to major in biology are first designated as pre-biology majors until they have successfully completed Genetics, BIOL 2012, in residence with a grade of C or better. Students who have completed a Genetics course elsewhere will have to either pass a proficiency examination in Genetics or complete BIOL 2012 in residence with a grade of C or better. Students may then declare biology as their major. BIOL 2012 must be completed successfully within two attempts, including excused withdrawals.

Degree Requirements
The B.S. degree in biology is designed to prepare students for basic technical positions and graduate studies in the life sciences. Candidates for the degree have the same core courses and general education requirements as those seeking the Bachelor of Arts degree, as well as additional requirements in depth of study, laboratory experience, communication skills, and background in associated science areas. Candidates must have a cumulative grade point average of 2.0 or better in biology courses. Candidates must earn a minimum grade of C- in all core courses.

There is no foreign language requirement for the B.S. degree. However, students should realize that the literature for biological studies is in many different languages and the ability to extract information from this literature is an important skill.

To fulfill the requirements for the B.S. degree a minimum of 45 hours, but not more than 50 hours, must be completed in appropriate biology course work. A minimum of 22 hours at or above the 2000 level (including two laboratory courses) must be taken in residence in the UMSL Department of Biology in order to receive a B.S. degree from the College of Arts and Sciences with a major in biology.

Lecture and Seminar Course Requirements
The following biology courses or their equivalents are required:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 1800</td>
<td>Introduction to the Biology Major</td>

<tr>
<td>BIOL 1831</td>
<td>Introductory Biology: From Molecules to Organisms (MOTR BIOL 150L)</td>
<td>5</td>
</tr>
</tbody>
</table>

Elective Courses
Four additional biology lecture courses at the 2000 level or higher are required. They may be selected from any of the lecture or lecture-laboratory courses offered. Selection of these courses should reflect the career interest of the student and may be selected from optional academic tracks (see below). Biology courses taken to fulfill basic skill requirements (e.g., statistics requirement or biochemistry option) can be used to satisfy this requirement.

At least two biology lecture courses taken as electives must be at the 4000 level or higher. No more than one of these higher level courses can be used to fulfill other requirements (e.g., statistics requirement or biochemistry option). Biochemistry CHEM 4722 can also be used toward satisfying this requirement. BIOL 4905 or BIOL 4915 can be applied to the electives requirement but two 4000 level lecture courses are still required.

Laboratory Course Requirements
Four biology laboratory courses at the 2000 level or higher are required. They may be selected from any of the lecture-laboratory or laboratory courses offered. Two credit hours of BIOL 3699, BIOL 4905, or BIOL 4915 (no combination of these courses allowed) can be used to fulfill one laboratory requirement. Students may take CHEM 4733 to satisfy one of these laboratory course requirements, but students may not use both BIOL 4713 and CHEM 4733 to fulfill this requirement.

Basic Skills Requirement
A well-rounded biologist needs certain skills outside the biology subject matter. The basic skills requirement is designed to provide the student with a background in communication skills and knowledge in associated science areas.

Communication Skills
Courses in both formal speaking and writing are required for development of the basic communication skills needed to transmit scientific information.

Total Hours 25-31
The final thesis will be written in the form of a scientific manuscript and presented orally in an advertised public forum at least 6 weeks prior to commencement. The readers of the thesis will decide if the thesis merits a Degree with Distinction, and will report their recommendation to the Dean of Arts and Sciences. In addition to fulfilling the coursework required for a B.S. or B.A. in Biology and the thesis itself, students must also fulfill all the requirements for UMSL’s Degree with Distinction.

### Pre-professional Graduation

The Department of Biology sponsors a 3+4 Program for the UMSL College of Optometry.

In this program students may be admitted to the College of Optometry after completing three years (90 semester hours) of study in the Department of Biology. The undergraduate degree is granted when students satisfactorily complete the first year of optometry school. One or more of the following conditions must be met in order to qualify for the undergraduate degree. All general education requirements and all requirements for the major, except electives, must be completed. Any deficiency in required courses must be remedied with courses taken at UMSL within three years after entering the College of Optometry. Up to 6 hours from the College of Optometry may be substituted for undergraduate degree requirements, with approval of the Department of Biology.

### UMSL – Logan College (3+3 program)

The Department of Biology has developed a 3+3 articulation agreement with Logan College of Chiropractic (LCC). This program enables qualified students the opportunity to complete a Bachelor of Science degree in Biology for the University of Missouri – St. Louis as well as a Doctor of Chiropractic for Logan College of Chiropractic in six years.

The program is only open to students who enter UMSL as first-time freshmen.

Participants must complete their first 90 hours of college work (3 years) at UMSL following a prescribed curriculum.

Participants who have achieved at least 3.25 GPA at UMSL will automatically be granted admission by Logan College of Chiropractic.

After successfully completing an additional 30 credit hours (4th year) at Logan, a student will receive a BS in Biology degree from UMSL. After completing two additional years at Logan, the student will receive a doctorate in chiropractic.

The acceptance of transfer credits or testing toward completion of degree requirements shall be governed by current policies of UMSL. However, no more than 20 credits of required courses, and NONE of the science credits required for admission to LCC may be earned via examination or transfer from another school.

LCC shall accept, for the entrance date of their choice, all students who successfully complete the Pre-Chiropractic Program with a cumulative GPA of 3.25 or higher and meet all other criteria for admission.

Students who earn less than a 3.25 GPA, but at least a 2.50 GPA, will be eligible for admission to LCC, and will receive appropriate consideration in the admission process for having completed the UMSL Pre-Chiropractic Program, but will not receive the assurance of a seat reserved for students earning a 3.25 or higher GPA.

Students will make application to LCC one year in advance of their desired entrance date and will complete all required application procedures.

### Associated Science Area

**Total Hours**: 38-39

### Research Opportunity

Students in the B.S. Biology degree program who are interested in gaining research experience are encouraged to take a minimum 2 credit hours of undergraduate research, BIOL 4905. The privilege of doing undergraduate research provides students with a first-hand opportunity to experience the research process under the supervision of a faculty member or off-campus scientist. The project normally includes a library search of pertinent literature, laboratory or field experience, and a summary paper and a presentation, all based on an average 8 hr. per week per credit hour for a 15 week semester.

### Thesis in Biology Research and the Degree with Distinction

The Department of Biology offers high-achieving students the opportunity to present primary research in the form of a written thesis and to graduate with a Degree with Distinction in Biology. The first step in conducting an undergraduate thesis is to identify a faculty research mentor with whom you can conduct novel research. The mentor, along with two UMSL faculty members, will be readers of the thesis. Students need a minimum of two semesters, usually more, to conduct research. After students have identified a research mentor and have completed 75 credit hours, they may apply for a Degree with Distinction in Biology. The final thesis will be written in the form of a scientific manuscript and
thereafter in a timely manner, including submission of recommendation and a satisfactory interview.

This program offers benefits to students (six years instead of seven from high school to doctorate). The University of Missouri courses are listed below:

### Academic Tracks within the Major of Biology

Biology majors may choose to focus their elective hours in a particular sub-discipline of biology, or academic track. These tracks are groups of departmental courses that fit within sub-disciplines of biology and are recommendations for students wanting to pursue careers in specific sub-disciplines. Academic tracks are NOT majors and are only intended to serve as guides for courses within a particular area of biology and are represented by current faculty expertise. Selecting an academic track does not prevent a student from taking courses in another track. Students should not expect to take all recommended courses for each academic track. Students may choose not to select an academic track. Currently, the Biology Department offers three academic tracks: Cell and Molecular Biology; Ecology, Evolution and Conservation Biology; and Pre-professional/Health Sciences.

#### Cell and Molecular Biology Track

| BIOL 2482 Microbiology |

| BIOL 3803 Vertebrate Physiology Lab |
| BIOL 4102 Behavioral Ecology |
| BIOL 4122 Biometry |
Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

Learning Outcomes

Integrative Knowledge
Graduates will demonstrate a clear understanding of the overriding principles and theorems within and between the content areas of anatomy, botany, cytology, ecology, evolutionary biology, microbiology, physiology, and zoology. Specifically, graduates will demonstrate competency in the following areas:

- Structure and function of the basic biological units of living organisms
- Information flow, exchange and storage from parent to offspring or from parent cells to progeny cells.
- Pathways and transformations of energy and matter that govern metabolism
- Systems that govern interactions between organisms or between organisms and their environment
- Biodiversity at the genetic, organismal, community, and global scales
- Evolution, common ancestry, and changes to biological populations over successive generations.

Laboratory Skills
Scientists not only learn the results of others, they work in the lab to generate new knowledge. Graduates will demonstrate basic skills associated with performing laboratory experiments or field studies in biology following a broad introduction of commonly used equipment and procedures.

Critical Thinking Skills
Graduates will be able to formulate meaningful hypotheses, design experiments to test them, and evaluate data critically, including an appreciation of the potential sources of error associated with laboratory measurements and troubleshooting technical issues.

Scientific Literacy
Graduates will be able to identify the need for information, procure the information from relevant scientific literature publications and databases, and critically evaluate reliability, validity, accuracy, authority, timeliness, and point of view or bias.

Communication Skills
Scientists not only must be able to solve problems, they also must be able to communicate those solutions to others. Graduates of this program demonstrate how to present scientific concepts and information in a clear and accurate manner. Specifically, graduates will be able to write scientific reports and make effective oral presentations of their results and ideas.

Professional and Research Ethics
Graduates will honestly and objectively evaluate and report data in an ethical and legal manner to promote the values that are essential to scholarly work: trust, accountability, mutual respect, and fairness. By doing so, graduates will come to understand and respect the accepted standards of conduct associated with the scientific profession regarding citation, use of privileged information, integrity of data, and authorship.

B.S. Ed. in Secondary Education with Emphasis in Biology

The B.S. Ed. is a professional education degree designed for students who wish to pursue a teaching career in secondary schools. Much of the discipline-specific coursework parallels the B.A. or B.S. degree in the discipline; however, the Missouri Department of Elementary and Secondary Education (DESE) requires specific coursework for teacher certification. Therefore, students interested in the B.S. Ed. should contact the advising office (OASIS) 314-516-5937 in the College of Education for discipline-specific requirements. Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

B.A. or B.S. in Biology with Master’s Level Coursework for Secondary Teacher Certification

In addition to the B.S. Ed., students may opt to complete a B.A. or B.S. degree in their discipline as an undergraduate, followed by admission to the Graduate School for Master’s level teaching certification. The College of Education has a one-year accelerated program for post-graduate certification called Teach in 12, or students can choose a traditional path to certification. Graduate coursework for certification can apply towards a Master’s Degree in Secondary Education, with additional coursework. Students interested in Master’s Level teacher certification should contact the advising office (OASIS) 314-516-5937 in the College of Education. Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

Sample Plan of Study

BS/MS Dual Degree Program

BS/MS Dual Degree Program in Biology

The BS/MS (‘2+3’) Biology program is an accelerated program that allows students of appropriate academic ability and maturity to complete both a BS and a MS in Biology in five years of full time study. The program allows students to apply 12 of the 30 MS credit hours towards the BS (per the approval of the College of Arts and Sciences), reducing the overall required hours for the two degrees. Students will pay graduate credit hour tuition for all courses applied to the graduate degree. All other requirements for the BS and MS degrees remain in effect.

Admission Requirements

Students interested in this program must go through a two-step admission process. First, applicants for Provisional Status must have completed all courses in the biology, chemistry, math and physics cores of the BS Biology program. Applicants should have completed all of the general education requirements. Applicants must also have a minimum GPA of 3.0 (both overall and in science courses) and must submit at least two letters of recommendation (one instructor and one academic advisor is recommended). The second step of the admission process is the transition from Provisional Status to formal graduate status. Admission requirements for formal graduate status are the same as for the traditional MS program.

Awarding of Degrees

Both degrees (the BS and MS) will be awarded when all requirements for the entire program have been completed. In other words, the BS and MS degrees will be simultaneously awarded at the completion of study. Students who officially withdraw from the BS/MS Dual Biology Degree Program and who have successfully completed all of the requirements for the BS degree will be awarded the BS degree.

Biology Minor

Students may minor in biology by completing a minimum of 19 credit hours in biology, of which at least 9 hours of the biology course credits must be taken in residence at UMSL.

Requirements are:

Two additional courses totaling no less than 6 credit hours. At least one course should be at the 3000 level or above.

Total Hours 19

All students must plan an appropriate course of study in consultation with an advisor, and the program must be given prior approval by the Chairperson of the Department of Biology. Under certain circumstances, a student may deviate from the prescribed course of study and substitute a group of courses that exhibit a coherent area of specialization to coordinate with a career objective.

Candidates must have a cumulative grade point average of 2.0 or better in the minor, courses may be taken on a satisfactory/unsatisfactory (s/u) basis.

Learning Outcomes

Foundational Knowledge

Students with a minor in biology will demonstrate an understanding of the fundamental principles of biology including the structure and function of cells and their components, heredity and variation in populations, and evolution.
Laboratory Skills
Minors will acquire a basic understanding of how the scientific method is employed for research.

Biology MS

Advisors
All graduate students will have a faculty advisor. In the event that a student’s interest changes or the faculty advisor feels the student’s direction no longer falls with his/her area of expertise, the student and advisor should discuss whether a change of advisor is warranted. The graduate director must be notified in writing of any change in advisors. If a student or advisor is uncomfortable discussing the issue directly with the other, he/she is encouraged to meet with the director of the graduate program.

Graduate Assistantships
Stipends for teaching and research assistantships are awarded on a competitive basis to qualified graduate students in masters or PhD. Programs. Tuition fees are waived for graduate assistants. Applications for assistantships must be sent to the Director of Graduate Studies in the Department of Biology and received by December 15.

The Department of Biology offers three ways of achieving the Master of Science degree. The first is a 30 credit hour non-thesis option suitable for those who may already have extensive research experience, for educators who seek to upgrade their academic skills but do not require research experience, or for those who need to broaden their biological background. The second is a 32 credit hour Professional Science track that includes a strong business component for students who are interested in learning more about the business aspects of companies. This track may not be appropriate for students who are interested in pursuing a PhD or working primarily as laboratory scientists. The third is a 30 credit hour traditional apprenticeship in research leading to a written thesis. All students admitted to the graduate program are considered to be in the non-thesis program unless they have been accepted into an individual faculty lab. Starting with a common core, both the thesis and non-thesis option may be developed into a final degree program in either of two broad areas in biology:

1. Cell and Molecular Biology or

Non-thesis students may also elect to take courses in both areas. Only the non-thesis option is available in the Professional Science emphasis.

M.S. Admission Requirements
Applicants to the M.S. program must submit completed application and personal data forms, three letters of recommendation from undergraduate faculty or work supervisors, and transcripts of all previous work. Submission of Graduate Record Examination scores, although not required, is highly recommended and will be helpful for positive consideration of admittance. Admission as a regular graduate student requires graduation from an accredited college with a minimum grade point average overall and in biology courses of 3.0 (where A = 4.0).

All foreign applicants, except those from countries where English is the primary language, must take the TOEFL. Ordinarily, a score of 213 on the computer-based exam (550 on the paper-based exam) or better is required.

In addition to the Graduate School admission requirements, applicants should have completed advanced undergraduate biology courses including genetics, biochemistry, and evolution. Courses in organic chemistry, college physics, and calculus are also expected, and a course in statistics is highly recommended.

Students admitted to the degree program who have not met some of the prerequisites may be asked to pass appropriate courses before graduating. These courses will be agreed upon by the student’s advisor and the student during the first semester of enrollment. In particular, undergraduate deficiencies in genetics and either biochemistry or evolution shall be made up by taking the appropriate course(s). Three credits of BIOL 4920 Selected Topics can be given to graduate students for BIOL 2012 (Genetics) or BIOL 3302 (Evolution), if they receive a grade of B or better for all undergraduate course work and complete a graduate level paper assigned by the instructor. Instructor consent is required.

General Requirements
All students are required to take at least 4 but not more than 8 hours of BIOL 6889, Graduate Seminar. However, Professional Science masters students must take only 4 credit hours total of BIOL 6889. Thesis students are required to take BIOL 5179, Ethical Issues in Biology. Students are expected to maintain a GPA of 3.0 or better. Students may choose to specialize in either Cellular and Molecular Biology (CMB) emphasis area or the Ecology, Evolution and Systematics (EES) emphasis area, and appropriate courses in each area will be recommended by the student’s advisor. The Professional Science emphasis area in CMB has specific course requirements that are described below.

Non-thesis Option
Including the general requirement, students must take at least 30 graduate credit hours, of which at least half must be at the 5000 or 6000 level. No more than 5 hours of BIOL 6905, Graduate Research, may be counted toward the degree.

Thesis Option
The student and adviser work together to develop a research plan. The thesis proposal must be approved by the student’s adviser and advisory committee before the student enrolls in more than 4 credit hours of BIOL 6905, Graduate Research, and before the student has completed 15 credit hours in the master's program. No more than 13 hours of BIOL 6905, Graduate Research, may be counted toward 30 hours of the degree. A thesis embodying results of original research shall be submitted to and approved by the Department of Biology and the Graduate School. This approval requires both a written thesis and oral presentation and defense.

Biology MS, Cell and Molecular Biology Emphasis
This Master of Science in Biology with the Profession Science in Cellular and Molecular Biology emphasis requires a total of 32 credit hours, of which at least half must be at the 5000-level or above. Students will take 21 credit hours in Biology, 9 hours in business courses, and 2 credit hours of internship/practicum. Professional Science students: 1) must take 2 seminars (4 credit hours total) of BIOL 6889, 2) are limited to a maximum of 2 credit hours of Topics in Cellular and Molecular Biology (BIOL 5069 ) and 3) cannot count any hours of Graduate Research (BIOL 6905) as part of the 32 credit hour total.
The Department of Biology offers three ways of achieving the Master of Science degree. The first is a 30 credit hour non-thesis option suitable for those who may already have extensive research experience, for educators who seek to upgrade their academic skills but do not require research experience, or for those who need to broaden their biological background. The second is a 32 credit hour Professional Science track that includes a strong business component for students who are interested in learning more about the business aspects of companies. **Biology PhD, Cell and Molecular Biology Emphasis**

**Graduate Studies**
The graduate program offers both Masters and Ph.D. degrees, as well as Graduate Certificates in Biotechnology and Tropical Biology and Conservation.

**Advisors**
All graduate students will have a faculty advisor. In the event that a student’s interest changes or the faculty advisor feels the student’s direction no longer falls with his/her area of expertise, the student and advisor should discuss whether a change of advisor is warranted. The graduate director must be notified in writing of any change in advisors. If a student or advisor is uncomfortable discussing the issue directly with the other, he/she is encouraged to meet with the director of the graduate program.

The doctoral program emphasizes empirical and theoretical approaches to biological research. Students are required to integrate basic skills in biology with focal studies in an emphasis area. The program is designed to provide research experience and training appropriate for advanced positions in academic research and teaching, government and public agencies, and industry.

**Ph.D. Admission Requirements**
Applicants to the Ph.D. program must submit a formal application to the Graduate Admissions Office. In addition, the applicant should arrange to have sent: three letters of recommendation from faculty members at previously attended colleges or universities, GRE scores (Verbal, Quantitative, and Analytical), and transcripts of all postsecondary academic work. Admission to the Ph.D. program normally requires a minimum grade point average overall and in biology courses of 3.0 (where A=4.0). Applicants from countries where English is not a primary language are required to take the TOEFL examination. Scores must be submitted
before admission can be decided. Ordinarily, a score of 550 or better is required.

Applicants should have a bachelor's or M.S. degree from an accredited United States college or university or evidence of equivalent training at an accredited institution outside the United States. They should have the appropriate background for graduate work in biology, including courses in genetics, biochemistry, and evolution. Courses in organic chemistry, college physics, and calculus are expected. A course in statistics is recommended. Students admitted to the Ph.D. program who have not met all the prerequisites may be required to make up deficiencies before admission to candidacy. The deficiencies will be decided during orientation meetings prior to the start of the second semester. Three credits of BIOL 4920 Selected Topics can be given to graduate students for BIOL 2012 or BIOL 3302 if they receive a grade of B or better for all undergraduate course work and complete a graduate-level paper assigned by the instructor. Instructor consent is required.

**Ph.D. Degree Requirements**

In addition to the general requirements of the Graduate School, the basic requirements for the Ph.D. degree in Biology include 60 graduate credit hours. At least 30 of the 60 hours must be taken at the 5000 or 6000 level. With the explicit consent of the advisory committee, students may take for graduate credit up to 3 credit hours of 3000 level courses in allied departments. All students are required to take BIOL 5178, Introduction to Graduate Research in Biology, and BIOL 5179, Ethical Issues in Biology. Courses in biology at the 3000 level and below are not available for graduate credit. At least 31 of the 60 hours must be taken while in residence at the University of Missouri-St. Louis. Graduate credit for course work transferred from another program is subject to approval by the graduate committee and by the Graduate School. Graduate courses taken elsewhere will be considered for transfer credit during orientation meetings conducted prior to the start of the second semester of enrollment.

The requirements for all Ph.D. students include:

- 30 hours of course work, including:
  - At least 6 credits of BIOL 6889, Graduate Seminar
  - One credit each of BIOL 5178, Introduction to Graduate Research in Biology, and BIOL 5179, Ethics in Biology (to be taken the first year)

The maximum number of credit hours that may be applied toward the 60-hour requirement is limited as stated below:

- BIOL 6889, Graduate Seminar: 10 hours
- BIOL 6905, Graduate Research: 30 hours

A combination of 6 total credit hours of the following:

- BIOL 5059, Topics in Ecology, Evolution, and Systematics
- BIOL 5069, Topics in Cellular and Molecular Biology
- BIOL 5079, Topics in Floristic Taxonomy
- BIOL 5089 Topics in Animal Behavior
- BIOL 5099, Biology Colloquium

**Emphasis area requirements**

Each Ph.D. student is associated either with the Cellular and Molecular Biology (CMB) emphasis area, or the Ecology, Evolution and Systematics (EES) emphasis area. Each of these areas has its own course requirements in addition to the University-wide and department-wide requirements listed above.

**Ecology, Evolution and Systematics**

**Cellular and Molecular Biology**

| BIOL 5436 | Applied Bioinformatics | 3 |

1 An equivalent graduate level course at another university may be substituted for one of the required courses, if approved by the Graduate Director

**Maintenance of Status**

All students are expected to maintain a GPA of 3.0 or better. Students will normally meet formally with their thesis committee, or if that has not been formed, with their advisor each year to maintain their status in the program.

**First-Year Experience**

Ph.D. students in the Cellular and Molecular Biology emphasis area typically rotate through three different labs during their first semester before choosing/being accepted by a particular dissertation advisor. Ph.D. students in the Ecology Evolution and Systematics emphasis area typically are accepted by a particular dissertation advisor as part of the Ph.D. program application/acceptance process. All students are expected to become involved in research by the spring semester of their first year.

**Qualifying Examination**

All students must pass a qualifying examination consisting of a written and oral component. Students beginning studies in the fall semester will normally take the qualifying examination at the end of their fourth semester of full-time study. Doctoral students who have earned an M.S. degree previously are encouraged to take the examination in their first year.

The examination for Ecology, Evolution and Systematics students evaluates knowledge of fundamental principles presented in formal courses and in papers of special importance in the field. The written exam will be given in December at the end of the third semester, and the oral portion immediately afterwards.

The Qualifying Examination for Cellular and Molecular students is composed of a written portion in which the student prepares a formal research proposal on a topic different from that of her/his doctoral dissertation research, and an oral portion during which the student defends the research proposal as well as his/her knowledge of the fundamental concepts of molecular biology, cell biology, and biochemistry.

**Admission to Candidacy**

To be admitted to candidacy, students must satisfy the requirements of the Graduate School, which includes passing all qualifying examinations and completing all required course work.

**Dissertation Proposal**

All students must defend orally a written dissertation proposal to their dissertation committee. The approved proposal must be submitted to the
director of graduate studies in biology. Doctoral students may not enroll in more than 4 credits of graduate research (BIOL 6905) before they have received approval for their dissertation proposal. The proposal is to be successfully defended by the end of the sixth semester.

**Dissertation**

A dissertation embodying the results of original research shall be submitted to and approved by the Department of Biology and the Graduate School. The general regulations of the Graduate School concerning the preparation of the dissertation must be met. These rules include a public oral defense of the written dissertation. Dissertations are to be presented in a style appropriate for one or more publications in scientific journals.

**Teaching**

At least one semester of supervised teaching is required of all doctoral students.

**Biology PhD, Ecology, Evolution and Systematics Emphasis**

**Graduate Studies**

The graduate program offers both Masters and Ph.D. degrees, as well as Graduate Certificates in Biotechnology and Tropical Biology and Conservation.

**Advisors**

All graduate students will have a faculty advisor. **Admission to Candidacy**

To be admitted to candidacy, students must satisfy the requirements of the Graduate School, which includes passing all qualifying examinations and completing all required course work.

**Dissertation Proposal**

All students must defend orally a written dissertation proposal to their dissertation committee. The approved proposal must be submitted to the director of graduate studies in biology. Doctoral students may not enroll in more than 4 credits of graduate research (BIOL 6905) before they have received approval for their dissertation proposal. The proposal is to be successfully defended by the end of the sixth semester.

**Dissertation**

A dissertation embodying the results of original research shall be submitted to and approved by the Department of Biology and the Graduate School. The general regulations of the Graduate School concerning the preparation of the dissertation must be met. These rules include a public oral defense of the written dissertation. Dissertations are to be presented in a style appropriate for one or more publications in scientific journals.

**Teaching**

At least one semester of supervised teaching is required of all doctoral students.

**Biotechnology Graduate Certificate**

The Graduate Certificate in Biotechnology is offered for students with a bachelor's degree who wish to obtain advanced level training in those fields of biology that pertain to biotechnology without necessarily earning a master's degree. Students who enter this program may have a variety of interests, including biochemistry, microbiology, molecular biology, cell biology, developmental biology, or molecular evolution.

**Admission**

Students who wish to earn a Graduate Certificate in Biotechnology must apply to the Biotechnology Certificate Program for admission to the program. Students must be enrolled in the graduate program at the University of Missouri-St. Louis either as non-degree students or as master's students.

Students who wish to obtain a Master's degree with a Biotechnology Certificate must be accepted into the Master's degree program in Biology as well as into the Biotechnology Certificate Program. Students who apply to the certificate program as non-degree students will earn only the certificate.

Students must have at least a 3.0 GPA for undergraduate course work to be accepted into the program. The minimum course prerequisites for admission to the program are undergraduate courses in genetics, cell biology, and biochemistry.

**Requirements**

Students must maintain a minimum GPA of 3.0 to remain in the certificate program. The certificate is awarded after completion of the courses listed below. Students enrolled in the Master's program may simultaneously earn a graduate degree and count the appropriate courses from the list below toward the Biotechnology Certificate.

The biotechnology certificate requires 18 credit hours of course work:

<table>

</table>

**Electives**

Select 11 credits from the following:

- Biology
- BIOL 4712: Biochemistry
- BIOL 4842: Immunobiology
- BIOL 5069: Topics In Cellular And Molecular Biology
- BIOL 6550: Advanced Bacterial Pathogenesis
BIOL 6612 Advanced Molecular Genetics of Bacteria
BIOL 6622 Advanced Cellular Basis of Disease
BIOL 6632 Advanced Nucleic Acid Structure and Function
BIOL 6642 Advanced Plant Biology and Biotechnology
BIOL 6652 Advanced Virology
BIOL 6699 Graduate Internship in Biotechnology
BIOL 6889 Graduate Seminar
BIOL 6915 Graduate Research Practicum
BIOL 6920 Advanced Topics in Biology
Chemistry
CHEM 4722 Advanced Biochemistry
CHEM 4733 Biochemistry Laboratory
CHEM 4772 Physical Biochemistry

Total Hours 18

Business Administration BS

General Education Requirements
All Business majors must meet the university general education requirements (p. 51). As part of meeting the university’s general education requirements, all Business majors must complete the prerequisite courses below:

ECON 1001 Principles of Microeconomics (MOTR ECON 102) 3
ECON 1002 Principles of Macroeconomics (MOTR ECON 101) 3
MATH 1030 College Algebra (MOTR MATH 130) 3
MATH 1100 Basic Calculus 3
MATH 1105 Basic Probability and Statistics 3

Degree Requirements
All Business majors must meet College of Business G.P.A., good standing and credit requirements (p. 179) as outlined in the Bulletin.

Lower Division Business Core Requirements
ACCTNG 2400 Fundamentals of Financial Accounting 3
ACCTNG 2410 Managerial Accounting 3
BUS AD 2900 Legal Environment of Business 3
INFSYS 2800 Information Systems Concepts and Applications 3

Total Hours 12

Upper Division Requirements
ENGL 3120 Business Writing 3

Upper Division Non-Business or Business Requirement
Two global awareness courses selected from an approved list maintained in the Office of Undergraduate Academic Advising in the College of Business Administration; also available on our web site.

Upper Division Business Requirements
FINANCE 3500 Financial Management 3
SCMA 3300 Business Analytics and Statistics 3
SCMA 3301 Introduction to Supply Chain Management 3
MGMT 3600 Management and Organizational Behavior 3
MGMT 4219 Strategic Management 3
MKTG 3700 Basic Marketing 3
A minimum of 18 additional hours of upper division approved business electives 18

Assessment Requirement
MGMT 4220 Business Assessment Testing 0

General Business
For those undecided regarding a specific emphasis area, a general business degree option is available. Students must complete a minimum of 18 hours of upper division approved business electives (see comprehensive list of business courses in the course descriptions section of this publication).

Learning Outcomes
Upon completion of the program, graduates will be able to:

• Articulate and apply foundational knowledge associated with core business disciplines (accounting, finance, supply chain management, marketing, information technology, and management). (Functional Business Knowledge)
• (a) Identify business problems and opportunities, (b) analyze relevant strategic, tactical, and operational options through qualitative and quantitative methods in order to (c) make recommendations and provide the rationale behind decisions. (Decision Making Skills)
• Identify and evaluate global business factors, including the opportunities, constraints and risks of operating across various country environments. (Global Orientation)
• Identify legal/ethical issues, assess impact, and decide on a socially responsible course of action. (Ethical Orientation)
• Students will be able to effectively communicate business issues, analyses and recommendations in written and oral presentations to stakeholders. (Business Communication Skills)
• Develop technological and quantitative skills, including those associated with statistics, data visualization and analysis, project management, social media, and those commensurate with their business specialization. (Technological Skills)
• Demonstrate interpersonal skills to collaborate within diverse teams, effectively engage with stakeholders in a professional manner, and develop leadership skills. (Interpersonal Skills)

</tbody>
</table>

Track Certification

Students may combine selected courses from the list above, and other specified upper division business electives, to fulfill a designated track with dual objectives of acquiring in depth knowledge, and to prepare and be eligible for various professional certification examinations. Detailed information is available in the Office of Undergraduate Academic Advising.

The specific tracks available include:

- Corporate Finance
- Financial Institutions and Services
- Investment and Portfolio Management
- Financial Planning
- Insurance

Learning Outcomes

Upon completion of the program, graduates will be able to:

- Articulate and apply foundational knowledge associated with core business disciplines (accounting, finance, supply chain management, marketing, information technology, and management). (Functional Business Knowledge)
- (a) Identify business problems and opportunities, (b) analyze relevant strategic, tactical, and operational options through qualitative and quantitative methods in order to (c) make recommendations and provide the rationale behind decisions. (Decision Making Skills)
- Identify and evaluate global business factors, including the opportunities, constraints and risks of operating across various country environments. (Global Orientation)
- Identify legal/ethical issues, assess impact, and decide on a socially responsible course of action. (Ethical Orientation)
- Students will be able to effectively communicate business issues, analyses and recommendations in written and oral presentations to stakeholders. (Business Communication Skills)
- Develop technological and quantitative skills, including those associated with statistics, data visualization and analysis, project management, social media, and those commensurate with their business specialization. (Technological Skills)
- Demonstrate interpersonal skills to collaborate within diverse teams, effectively engage with stakeholders in a professional manner, and develop leadership skills. (Interpersonal Skills)
- Explain and apply fundamental concepts in finance.
- Address corporate and investment issues by utilizing financial principles.
- Interpret and analyze financial data to evaluate firm performance.
- Apply financial tools and technologies to assist in real-life personal financial decision making and real estate investment.

Upon completion of the program, students will be able to:

**Learning Outcomes**

Upon completion of the program, students will be able to:

- Articulate and apply foundational knowledge associated with core business disciplines (accounting, finance, supply chain management, marketing, information technology, and management). (Functional Business Knowledge)
- (a) Identify business problems and opportunities, (b) analyze relevant strategic, tactical, and operational options through qualitative and quantitative methods in order to (c) make recommendations and provide the rationale behind decisions. (Decision Making Skills)
- Identify and evaluate global business factors, including the opportunities, constraints and risks of operating across various country environments. (Global Orientation)
- Identify legal/ethical issues, assess impact, and decide on a socially responsible course of action. (Ethical Orientation)
- Students will be able to effectively communicate business issues, analyses and recommendations in written and oral presentations to stakeholders. (Business Communication Skills)
- Develop technological and quantitative skills, including those associated with statistics, data visualization and analysis, project management, social media, and those commensurate with their business specialization. (Technological Skills)
- Demonstrate interpersonal skills to collaborate within diverse teams, effectively engage with stakeholders in a professional manner, and develop leadership skills. (Interpersonal Skills)
- Develop language proficiency and effective communication skills in a chosen foreign language;
- Analyze cultural differences and environmental factors to develop competitive strategies globally;
- Evaluate political, legal, and ethical issues across different country markets;
- Assess alternative strategic options and make specific recommendations, such as global market entry and currency risk analysis.

</tr>
</tbody>
</table>

Total Hours: 12
Marketing majors may choose to focus their electives in the area of digital and social media marketing and communications. This track is a group of departmental courses that will focus on the use of emerging technologies and platforms by which business use to communicate with and engage with their customers, prospects and vendors.

The Track in Digital and Social Media Marketing is comprised of the following courses:

- **MKTG 3721** Introduction to Digital Marketing Strategies 3 hours
- **MKTG 3722** Introduction to Social Media Marketing 3 hours
- **MKTG 3710** Consumer Behavior 3 hours
- **MKTG 3720**

### Learning Outcomes

Upon completion of the program, graduates will be able to:

- Articulate and apply foundational knowledge associated with core business disciplines (accounting, finance, supply chain management, marketing, information technology, and management). (Functional Business Knowledge)
- (a) Identify business problems and opportunities, (b) analyze relevant strategic, tactical, and operational options through qualitative and quantitative methods in order to (c) make recommendations and provide the rationale behind decisions. (Decision Making Skills)
- Identify and evaluate global business factors, including the opportunities, constraints and risks of operating across various country environments. (Global Orientation)
- Identify legal/ethical issues, assess impact, and decide on a socially responsible course of action. (Ethical Orientation)
- Students will be able to effectively communicate business issues, analyses and recommendations in written and oral presentations to stakeholders. (Business Communication Skills)
- Develop technological and quantitative skills, including those associated with statistics, data visualization and analysis, project management, social media, and those commensurate with their business specialization. (Technological Skills)
- Demonstrate interpersonal skills to collaborate within diverse teams, effectively engage with stakeholders in a professional manner, and develop leadership skills. (Interpersonal Skills)
- Students will be able to solve marketing related problems using qualitative and/or quantitative tools.

- Students will be able to demonstrate creativity in developing marketing communication plans (e.g., advertising, social media).
- Students will be able to develop marketing plans and execute marketing strategies.
