MKTG 3700 Basic Marketing 3
A minimum of 18 additional hours of upper division approved business electives 18

Assessment Requirement
MGMT 4220 Business Assessment Testing 0

Emphasis Area Requirements
The study of supply chain management focuses on the whole supply chain from the acquisition of raw materials, through production or service delivery, to the point of consumption.

Twelve (12) credit hours are required of all individuals seeking an emphasis in Supply Chain Management:

SCMA 3320 Advanced Supply Chain and Operations Management 3
Select three of the following courses: 9
SCMA 3321
SCMA 3325
SCMA 3370
SCMA 3390
SCMA 3398

SCMA 3345 Predictive Analytics and Data Mining
SCMA 3370/MKTG 3770 Introduction to Transportation
SCMA 3371/MKTG 3771 Traffic and Transportation Management
SCMA 3376/MKTG 3776 Transportation Security and Risk
SCMA 3390 Internship in Supply Chain and Analytics
SCMA 3398 Seminar in Supply Chain Management and Analytics
SCMA 3399 Independent Study in Supply Chain and Analytics
SCMA 4322 Lean Production in Manufacturing and Service Operations
SCMA 4325 Environmental Sustainability in Business Operations
SCMA 4330 Business Logistics
SCMA 4331 Applied Supply Chain Modeling
SCMA 4347 Introduction to Project Management
SCMA 4350 Prescriptive Analytics and Optimization
SCMA/INTL BUS 4381 Global Supply Chain Management
SCMA 4389 Supply Chain Management Practicum 1
SCMA 4398 Advanced Topics in Supply Chain and Analytics
Total Hours 12

1 At most, only one of SCMA 3390 and SCMA 4389 may be counted towards the Supply Chain Management emphasis area.

Tracks
Students may combine selected courses from the list above, and other specified upper division business electives, to fulfill a designated track and acquire in-depth knowledge. Detailed information is available in the Office of Undergraduate Academic Advising. The specific tracks available include:

- Supply Chain Management
- Transportation
- Business Analytics

Learning Outcomes
Upon completion of the program, graduates will be able to:

- Articulate and apply foundational knowledge associated with core business disciplines (accounting, finance, supply chain management, marketing, information technology, and management). (Functional Business Knowledge)
- (a) Identify business problems and opportunities, (b) analyze relevant strategic, tactical, and operational options through qualitative and quantitative methods in order to (c) make recommendations and provide the rationale behind decisions. (Decision Making Skills)
- Identify and evaluate global business factors, including the opportunities, constraints and risks of operating across various country environments. (Global Orientation)
- Identify legal/ethical issues, assess impact, and decide on a socially responsible course of action. (Ethical Orientation)
• Students will be able to effectively communicate business issues, analyses and recommendations in written and oral presentations to stakeholders. (Business Communication Skills)
• Develop technological and quantitative skills, including those associated with statistics, data visualization and analysis, project management, social media, and those commensurate with their business specialization. (Technological Skills)
• Demonstrate interpersonal skills to collaborate within diverse teams, effectively engage with stakeholders in a professional manner, and develop leadership skills. (Interpersonal Skills)
• Explain basic concepts in supply chain management related to areas such as purchasing, production, operations, logistics, integration and reverse supply chains.
• Apply descriptive, predictive and prescriptive analytics for decision-making in supply chains, such as demand planning, supply chain network design, production planning, inventory control and transportation.
• Analyze supply chain related problems and justify data-driven solutions with business acumen.

**Total Hours: 120**

PLEASE NOTE: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor. All requirements are subject to change.

### Business Administration BSBA/MBA Dual Degree Program

The 2+3 combined BSBA/MBA program in Business Administration provides an opportunity for students of recognized academic ability and educational maturity to complete the requirements for both degrees in 5 years of full-time study. This program is available to UMSL students and students of partner universities with which UMSL has an established 2+3 Memorandum of Understanding. The combined program allows students to complete both the undergraduate and graduate degrees in Business Administration with a total of 138 credit hours instead of the typical 150 credit hours if the degrees were pursued separately. When all the requirements of the BSBA/MBA program have been completed, students will be awarded both the BSBA and MBA degrees.

#### Admission Requirements

Students will apply to the 2+3 program for provisional status after they have completed 60 undergraduate credit hours with a grade point average of 3.0 or higher. After completion of the provisional period, upon recommendation of the Graduate Program Director, students can be granted formal admission into the 2+3 program, which involves admission to the Graduate School. After formal admission, the student will be classified as a graduate student, will pay graduate tuition for all subsequent courses, and must continue taking courses under graduate status until completion of the master’s degree. Students must maintain a grade point average of 3.0 or higher throughout the combined program.

Students on provisional status may request enrollment in up to 6 credit hours of 4000/5000/6000 level coursework to count towards their graduate degree, while in undergraduate status, per the submission of the C1 form, and the approval of their advisor and the Director of Graduate Business Programs.

Applicants are considered for formal admission into the 2+3 program, if they meet the following four criteria:

1. earned at least 90 hours as an undergraduate;
2. have a minimum GPA of 3.0 since being granted provisional status;
3. have submitted at least one letter of recommendation from a College of Business Faculty member; and
4. have met with a Graduate Business Programs academic advisor.

Up to 12 hours of graduate coursework may be counted both to meet the 120 credit hours required for the Bachelor’s degree (p. 341) and to meet the requirements of the Master’s degree (p. 352). Students may resign from the 2+3 Program and apply for the Bachelor’s degree. However, once the Bachelor’s degree is awarded, the benefit of “double counting” courses will be lost. Any course used to meet a degree requirement for an undergraduate degree cannot be applied to a subsequent Master’s degree.

The courses which will be “double counted” for both degrees must be approved by both the Undergraduate and Graduate Program Directors. All other requirements for the BSBA degree remain in effect.
A waiver of GMAT requirement may be requested if applicants meet certain criteria. Please see petition to waive the GMAT: http://mba.umsl.edu/files/pdfs/GMAT-waiver.pdf.

Awarding of Degree

Both degrees (the BSBA and MBA) will be awarded when all requirements for the entire program have been completed. In other words, the BSBA and MBA degrees will be simultaneously awarded at the completion of study.

Note: The CPA exam and Accounting licensure requirements are not related to the BSBA/MBA degree requirements.

Business Administration Graduate Certificate

This is an 18-hour program designed to accommodate individuals with an undergraduate/graduate degree in a non-business field seeking core business knowledge. The program emphasizes coursework designed to cover the major disciplines within the field of business. Upon completion, the student will have knowledge of common business theories, practices, and procedures.

Program Description

The Graduate Certificate in Business Administration is designed for individuals with an undergraduate/graduate degree in non-business fields. It provides students a focused exposure to core business functions and contemporary business administration frameworks. Upon successful completion, students will have the core knowledge necessary to articulate and apply business administration principles and practices across functional domains.

All 12 credit-hours taken as part of this certificate program transfer to the MBA degree program.

Admission Requirements

Applicants must meet general University of Missouri-St. Louis Graduate School admissions requirements.

Certificate Requirements

All course prerequisites and all course waivers are applicable. Substitute courses may be approved by the appropriate department chairperson and the Director of Graduate Business Programs.

Choose four of the following courses:

<table>
<thead>
<tr>
<th>Course Code</th>

</tr>
<tr>
<td>SCMA 5310</td>
<td>Supply Chain Strategies</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Hours: 12

Learning Outcomes

Upon completion of the program, certificate earners will be able to:

- Apply theories and frameworks of business to analyze authentic contexts and business problems;
- Integrate core knowledge of and apply business administration principles and practices across the functional domains: finance, marketing, management, supply chain management and information systems.

Business Administration MBA

The Master of Business Administration (MBA) at the University of Missouri-St. Louis (UMSL) is a selective program designed to create business managers and leaders. The MBA at UMSL is fully accredited by the The Association to Advance Collegiate Schools of Business (AACSB) International, the premier accrediting body in collegiate business education.

The MBA program is designed for students with bachelor’s degrees from accredited institutions in fields such as the sciences, engineering, humanities, arts or business.

Students pursuing a Graduate Certificate in Business Foundations may transfer all certificate program courses toward the MBA.

For more information go to: https://mba.umsl.edu

For students pursuing an emphasis, the following areas are available:

- Accounting (p. 353)
- Business Analytics
- Finance (p. 356)
- Information Systems and Technology (p. 357)
- International Business (p. 358)
- Management (p. 360)
- Marketing (p. 361)
- Supply Chain Management

Admission Requirements

The admissions decision is based on a combination of factors. Consideration is given to a candidate’s academic record, scores on the Graduate Management Admissions Test (GMAT), work and leadership experience, a personal narrative on the application form and recommendation letters.

Applicants are generally required to submit Graduate Management Admissions Test (GMAT) scores. A waiver of GMAT requirement may be requested if applicants meet certain criteria. Please see petition to waive the GMAT: http://mba.umsl.edu/files/pdfs/GMAT-waiver.pdf.

Degree Requirements

Depending on the student’s previous background, programs will require a minimum of 30 hours. Coursework must be completed within a maximum six-year period. At least 2/3 of coursework must be taken while enrolled as an MBA candidate at UMSL.

All students must satisfy the following requirements in professional written and oral communication, business law and ethics/ and social responsibility, economics, and business statistics. The Graduate Business Office in collaboration with department chairs will determine whether a student satisfies these requirements. In general:
The Professional and Written Communications skills requirement can be satisfied by any one of the following:

- Evidence of prior coursework
- Completion of BUS AD 5100

The Business Law and Ethics/Social Responsibility requirements can be satisfied by any one of the following:

- Evidence of prior coursework
- Completion of BUS AD 5900

The Economics requirement can be satisfied by any one of the following:

- Evidence of prior coursework
- Completion of BUS AD 5000
- Completion of Economics boot camp

The Statistics requirement can be satisfied by any one of the following:

- Evidence of prior coursework
- Completion of SCMA 5300
- Completion of Statistics boot camp

Assurance of Learning

All MBA students are required to participate in the BUS AD 6991 Graduate Business Assessment Testing class during their last semester. This learning assessment course is not for credit.

Business Core (18 credit hours)

The following courses or their equivalents are required of all degree candidates.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCTNG 5400</td>
<td>Financial and Managerial Accounting</td>
<td>3</td>
</tr>
<tr>
<td>FINANCE 6500</td>
<td>Financial Management</td>
<td>3</td>
</tr>
<tr>
<td>INF SYS 5800</td>
<td>Management Information Systems</td>
<td>3</td>
</tr>
<tr>
<td>MGMT 5600</td>
<td>Managing People in Organizations</td>
<td>3</td>
</tr>
<tr>
<td>MKTG 5700</td>
<td>Contemporary Marketing Concepts</td>
<td>3</td>
</tr>
<tr>
<td>SCMA 5310</td>
<td>Supply Chain Strategies</td>
<td>3</td>
</tr>
</tbody>
</table>

Students with prior business degrees take advanced courses in each of the functional areas listed in the Business Core, as advised by the Graduate Business Advisors assigned to the students. Based on a formal review and evaluation by the Graduate Business Programs Office, students may be granted waivers in the Business Core section. Waivers depend on the applicability of, and performance in, prior coursework. Regardless of the number of courses waived, all students must complete at least 30 credit hours to earn the MBA degree.

Strategic Management Required (3 credit hours)

Take one of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BUS AD 6990</td>
<td>Strategy Formulation and Implementation</td>
<td>3</td>
</tr>
<tr>
<td>INTL BUS 5289</td>
<td>International Business Strategies</td>
<td>3</td>
</tr>
<tr>
<td>MGMT 4614</td>
<td>Entrepreneurship/Small Business Management</td>
<td>3</td>
</tr>
</tbody>
</table>

2 Students with a non-business undergraduate degree are required to take BUS AD 6990 to satisfy the Strategic Management requirement.

Electives (9 credit hours)

Students may choose to pursue an Emphasis Area to satisfy the 9 credit hour Electives requirement or pursue an MBA with no emphasis area. No course may be used for more than one emphasis area. If no emphasis area is chosen, students have the flexibility to customize their MBA by choosing from a large collection of elective graduate courses within the College of Business Administration, in consultation with their Graduate Business academic advisor.

Learning Outcomes

Upon completion of the program, graduates will be able to:

- Demonstrate knowledge of core business content in accounting, finance, information systems, supply chain analytics, management, and marketing.
- Apply core business content and principles for effective business decision making.
- Demonstrate analytical skills to solve business problems and evaluate the conditions of corporations and markets.
- Effectively communicate business insights using oral and written formats.
- Identify legal/ethical issues and implications, and make informed decisions.
- Expand leadership skills to effectively engage with stakeholders in a professional manner.
- Demonstrate a global mindset needed to effectively navigate the interconnected nature of today's business environment.

Business Administration MBA, Accounting Emphasis

Admission Requirements

The admissions decision is based on a combination of factors. Consideration is given to a candidate’s academic record, scores on the Graduate Management Admissions Test (GMAT), work and leadership experience, a personal narrative on the application form and recommendation letters.

Applicants are generally required to submit Graduate Management Admissions Test (GMAT) scores. A waiver of GMAT requirement may be requested if applicants meet certain criteria. Please see petition to waive the GMAT: http://mba.umsl.edu/files/pdfs/GMAT-waiver.pdf.

2 Students with a non-business undergraduate degree are required to take BUS AD 6990 to satisfy the Strategic Management requirement.

**Electives (9 credit hours)**

Students may choose to pursue an Emphasis Area to satisfy the 9 credit hour Electives requirement or pursue an MBA with no emphasis area. No course may be used for more than one emphasis area. If no emphasis area is chosen, students have the flexibility to customize their MBA by choosing from a large collection of elective graduate courses within the College of Business Administration, in consultation with their Graduate Business academic advisor.

**Emphasis Area Requirements**

Master of Business Administration (MBA) students seeking an emphasis in Accounting must complete a minimum of 9 hours of Accounting electives beyond ACCTNG 5400. (ACCTNG 5400 does not count toward the Emphasis in Accounting.) The following 4000-level Accounting classes may be counted toward the emphasis: ACCTNG 4401-Financial Accounting & Reporting III, ACCTNG 4402- Financial Accounting & Reporting IV, ACCTNG 4435-Auditing. A maximum of 15 hours in any functional area will count toward degree requirements. Only courses that are substantially different from courses taken for credit in a student’s undergraduate program will be acceptable.

**Learning Outcomes**

Upon completion of the program, graduates will be able to:

- Demonstrate knowledge of core business content in accounting, finance, information systems, supply chain analytics, management, and marketing.
- Apply core business content and principles for effective business decision making.
- Demonstrate analytical skills to solve business problems and evaluate the conditions of corporations and markets.
- Effectively communicate business insights using oral and written formats.
- Identify legal/ethical issues and implications, and make informed decisions.
- Expand leadership skills to effectively engage with stakeholders in a professional manner.
- Demonstrate a global mindset needed to effectively navigate the interconnected nature of today’s business environment.
- Understand the Accounting cycle from analysis of transaction through financial statements.
- Apply key financial accounting topics related to balance sheet and income statement accounts.
- Demonstrate appropriate concepts of managerial accounting.

**Business Administration MBA, Cybersecurity Emphasis**

- Completion of BUS AD 5900

The Economics requirement can be satisfied by any one of the following:

- Evidence of prior coursework
- Completion of BUS AD 5000
- Completion of Economics boot camp

The Statistics requirement can be satisfied by any one of the following:

- Evidence of prior coursework
- Completion of SCMA 5300
- Completion of Statistics boot camp

Assurance of Learning

All MBA students are required to participate in the BUS AD 6991 Graduate Business Assessment Testing class during their last semester. This learning assessment course is not for credit.

Business Core (18 credit hours)

The following courses or their equivalents are required of all degree candidates.

<table>
<thead>
<tr>

1 Students with prior business degrees take advanced courses in each of the functional areas listed in the Business Core, as advised by the Graduate Business Advisors assigned to the students. Based on a formal review and evaluation by the Graduate Business Programs Office, students may be granted waivers in the Business Core section. Waivers depend on the applicability of, and performance in, prior coursework. Regardless of the number of courses waived, all students must complete at least 30 credit hours to earn the MBA degree.

Strategic Management Required (3 credit hours)

Take one of the following:

- BUS AD 6990 Strategy Formulation and Implementation 3
- INTL BUS 5289 International Business Strategies 3
- MGMT 4614 Entrepreneurship/Small Business Management 3

2 Students with a non-business undergraduate degree are required to take BUS AD 6990 to satisfy the Strategic Management requirement.

Electives (9 credit hours)

Students may choose to pursue an Emphasis Area to satisfy the 9 credit hour Electives requirement or pursue an MBA with no emphasis area. No course may be used for more than one emphasis area. If no emphasis area is chosen, students have the flexibility to customize their MBA by choosing from a large collection of elective graduate courses within the College of Business Administration, in consultation with their Graduate Business academic advisor.

Emphasis Area Requirements

Master of Business Administration (MBA) students seeking an emphasis in Finance must complete a minimum of 9 hours of Finance electives beyond FINANCE 6500 (FINANCE 6500 does not count toward the emphasis in Finance). A maximum of 15 hours in any functional area will count toward degree requirements. Only courses that are substantially different from courses taken for credit in a student’s undergraduate program will be acceptable.

Learning Outcomes

Upon completion of the program, graduates will be able to:

- Demonstrate knowledge of core business content in accounting, finance, information systems, supply chain analytics, management, and marketing.
- Apply core business content and principles for effective business decision making.
- Demonstrate analytical skills to solve business problems and evaluate the conditions of corporations and markets.
• Effectively communicate business insights using oral and written formats.
• Identify legal/ethical issues and implications, and make informed decisions.
• Expand leadership skills to effectively engage with stakeholders in a professional manner.
• Demonstrate a global mindset needed to effectively navigate the interconnected nature of today’s business environment.
• Understand the technology governance role of the Chief Information Officer.
• Appreciate the impacts of IT on organizations, society, and the global economy.
• Prioritize and propose managerial practices to develop and deploy technological innovations that produce business advantage.
• Apply the core financial concepts, principles, and theories in valuation and wealth maximization.
• Demonstrate critical thinking and problem-solving skills to analyze data for informed decision-making.
• Apply analytic tools and modern technologies in solving real-world financial problems.

Business Administration MBA, Information Systems Emphasis

Admission Requirements

The admissions decision is based on a combination of factors. Consideration is given to a candidate’s academic record, scores on the Graduate Management Admissions Test (GMAT), work and leadership experience, a personal narrative on the application form and recommendation letters.

Applicants are generally required to submit Graduate Management Admissions Test (GMAT) scores. A waiver of GMAT requirement may be requested if applicants meet certain criteria. Please see petition to waive the GMAT: http://mba.umsl.edu/files/pdfs/GMAT-waiver.pdf.

Degree Requirements

Depending on the student’s previous background, programs will require a minimum of 30 hours. Coursework must be completed within a maximum six-year period. At least 2/3 of coursework must be taken while enrolled as an MBA candidate at UMSL.

All students must satisfy the following requirements in professional written and oral communication, business law and ethics/and social responsibility, economics, and business statistics. The Graduate Business Office in collaboration with department chairs will determine whether a student satisfies these requirements. In general:

The Professional and Written Communications skills requirement can be satisfied by any one of the following:

• Evidence of prior coursework
• Completion of BUS AD 5000

The Business Law and Ethics/Social Responsibility requirements can be satisfied by any one of the following:

• Evidence of prior coursework
• Completion of BUS AD 5900

The Economics requirement can be satisfied by any one of the following:

• Evidence of prior coursework
• Completion of BUS AD 5000
• Completion of Economics boot camp

The Statistics requirement can be satisfied by any one of the following:

• Evidence of prior coursework
• Completion of SCMA 5300
• Completion of Statistics boot camp

### Electives (9 credit hours)

Students may choose to pursue an Emphasis Area to satisfy the 9 credit hour Electives requirement or pursue an MBA with no emphasis area. No course may be used for more than one emphasis area. If no emphasis area is chosen, students have the flexibility to customize their MBA by choosing from a large collection of elective graduate courses within the College of Business Administration, in consultation with their Graduate Business academic advisor.

### International MBA Program

An international version of the MBA program also exists as an alternative to the Flex MBA program. This program is a two-year, full-time program. Students take courses the first year outside the U.S. at a partner university and then take courses the second year on the University of Missouri–St. Louis campus.

### Degree Requirements

All participants in the International MBA program must meet the same general and core requirements as those in the Flex MBA program. In addition, the International MBA program may entail an internship (outside the U.S. for Americans and in the U.S. for all others). The program also requires proficiency in the language spoken at the destination university. Coursework at the partner-schools is typically in English.

### Learning Outcomes

Upon completion of the program, graduates will be able to:

- Demonstrate knowledge of core business content in accounting, finance, information systems, supply chain analytics, management, and marketing.
- Apply core business content and principles for effective business decision making.
- Demonstrate analytical skills to solve business problems and evaluate the conditions of corporations and markets.
- Effectively communicate business insights using oral and written formats.
- Identify legal/ethical issues and implications, and make informed decisions.
- Expand leadership skills to effectively engage with stakeholders in a professional manner.
- Demonstrate a global mindset needed to effectively navigate the interconnected nature of today’s business environment.

¹ Students with prior business degrees take advanced courses in each of the functional areas listed in the Business Core, as advised by the Graduate Business Advisors assigned to the students. Based on a formal review and evaluation by the Graduate Business Programs Office, students may be granted waivers in the Business Core section. Waivers depend on the applicability of, and performance in, prior coursework. Regardless of the number of courses waived, all students must complete at least 30 credit hours to earn the MBA degree.

Strategic Management Required (3 credit hours)

Take one of the following²:

- BUS AD 6990 Strategy Formulation and Implementation 3
- INTL BUS 5289 International Business Strategies 3
- MGMT 4614 Entrepreneurship/Small Business Management 3

² Students with a non-business undergraduate degree are required to take BUS AD 6990 to satisfy the Strategic Management requirement.

Electives (9 credit hours)

Students may choose to pursue an Emphasis Area to satisfy the 9 credit hour Electives requirement or pursue an MBA with no emphasis area. No course may be used for more than one emphasis area. If no emphasis area is chosen, students have the flexibility to customize their MBA by choosing from a large collection of elective graduate courses within the College of Business Administration, in consultation with their Graduate Business academic advisor.

Professional MBA Program

A weekend-based Internet-enhanced version of the MBA program exists as an alternative to the traditional part-time evening program. This program is a 42 credit hour program for professionals with busy work or travel schedules. Students meet on campus monthly, with the remainder of the interaction between instructor and students taking place online. Students proceed through the program as part of a cohort and complete the requirements for the degree in less than two years.

The first 24 hours of the Internet-based program consist of the core courses required in the Flex program plus BUS AD 5100 Managerial Communication. The remaining 18 hours consist of the following courses:

<table>
<thead>
<tr>

<tr>
<td>MKTG 5795</td>
<td>Seminar in Marketing</td>
<td>3</td>
</tr>
</tbody>
</table>

An international trip of 7 to 12 days is a degree requirement and takes place during the second year of the program.

Learning Outcomes

Upon completion of the program, graduates will be able to:

- Demonstrate knowledge of core business content in accounting, finance, information systems, supply chain analytics, management, and marketing.
- Apply core business content and principles for effective business decision making.
- Demonstrate analytical skills to solve business problems and evaluate the conditions of corporations and markets.
- Effectively communicate business insights using oral and written formats.
- Identify legal/ethical issues and implications, and make informed decisions.
• Expand leadership skills to effectively engage with stakeholders in a professional manner.
• Demonstrate a global mindset needed to effectively navigate the interconnected nature of today’s business environment.

Business Administration Minor

General Requirements

• All minors are 15 credit hours or 5 courses, including business core courses.
• Students must attain a 2.0 grade point average for all courses in the minor.
• Students must attain a minimum grade of C- in each course included in the minor.
• All courses in the minor must be on a graded basis.
• A minimum of 9 credit hours of coursework included in the minor must be taken in residence at UMSL.
• One must complete a baccalaureate degree at UMSL in order for a minor to be conferred.
• A minor may be added for up to two years following completion of the baccalaureate degree

Specific Requirements for the Minor

This minor is available only to students seeking a baccalaureate degree outside the College of Business Administration.

Select five of the following:

Total Hours: 15

Business Intelligence Graduate Certificate

The Graduate Certificate in Business Intelligence (BI) prepares students to support better business decision-making by providing internal data and external data in a useful and usable format. Using BI, decision makers are able to examine the value of business processes and products while watching for competitive opportunities in the marketplace. BI technologies provide historical, descriptive, predictive, and prescriptive views of business operations. The BI Certificate blends analytics and information technology in a unique program during which students work on industry datasets and learn to appreciate the difficulties of large-scale, unstructured data as well as the need for nuanced solutions.

This 12 credit hour certificate program also counts toward the 30 credit hour Master of Science in Information Systems and Technology degree program requirements. Students may choose to combine this certificate with other courses and/or certificates to obtain the Master of Science in Information Systems and Technology degree.

Admission Requirements

Applicants must meet general University of Missouri-St. Louis Graduate School admissions requirements.

Certificate Requirements

All course prerequisites and all course waivers are applicable. Substitute courses may be approved by the appropriate department chairperson and the Director of Graduate Business Programs.

Required Courses

</tr>
</tbody>
</table>

Total Hours: 12

The required courses may be substituted with other courses with the approval of the Chair of the Information Systems and Technology Department.

Learning Outcomes

Upon completion of the program, certificate earners will be able to:
• Apply contemporary data programming techniques
• Structure and visualize data in useful and usable formats for business insights
• Utilize business intelligence technologies to provide historical, descriptive, predictive, and prescriptive views of business operations
• Communicate business intelligence insights to stakeholders

Business PhD, Logistics and Supply Chain Management Emphasis

Admissions Requirements

Admission decisions are made on the basis of past academic record, intellectual ability, GMAT or GRE scores, and career commitment. Applications are accepted from students who have baccalaureate or graduate degrees. Past graduate work may be credited toward degree requirements where appropriate. Applicants must submit:
II. Supporting Field Requirement (9 credit hours)

Students must take 9 credit hours of graduate-level courses beyond foundation course work in a supporting field approved by the Ph.D. Coordinator. Supporting fields may include courses within or outside the College of Business Administration and are designed in consultation with the Ph.D. Coordinator.

III. Emphasis Area Requirements

Logistics & Supply Chain Management (LSCM) Emphasis

The Logistics & Supply Chain Management emphasis requirement includes 33 credit hours.

Students are required to take the following six courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

</tr>
</tbody>
</table>

Total Hours 33

IV. Other Requirements

• Upon completion of coursework, students are advanced to candidacy by successfully completing a comprehensive examination in their area of emphasis and a supporting field examination in their chosen area. Students admitted to the program with a relevant master’s degree should pass the comprehensive examination and the supporting field examination within three years of admission to the Ph.D. program. Students admitted to the program with an undergraduate business degree should pass the comprehensive examination and the supporting field examination within four years of admission to the Ph.D. program. Students admitted to the program with an undergraduate degree outside of business should pass the comprehensive examination and the supporting field examination within five years of admission to the Ph.D. program. In these cases, prior coursework will be evaluated for equivalency to Section I course requirements. Exceptions may be made, contingent on approval by the Ph.D. Coordinator.

• Students will be evaluated annually for satisfactory progress. Students deemed not to be making adequate progress are subject to the policies of the College of Business Administration regarding continuation of their assistantship. Students deemed not to be making adequate progress are subject to the policies of the Graduate School and the College of Business Administration regarding probation and dismissal from the program.
• Students are required to take a minimum of 6 dissertation credit hours and to defend a dissertation proposal within one year of advancement to candidacy.
• The following requirements are to be completed before or after admission to candidacy:
  • Students are required to present one paper at a regional, national, or international conference.
  • Students are required to submit one paper, approved by his/her dissertation advisor, to a refereed journal.
• At least two semesters of supervised teaching in the College of Business Administration are required of all doctoral students.
• Students are required to demonstrate competency in teaching during the first year in which they teach in the College of Business Administration. This requirement may be met by successfully completing one or more courses.
• The degree is awarded upon successful completion and defense of the Ph.D. dissertation and satisfaction of all Graduate School requirements. The dissertation must be defended within three years of approval of a Ph.D. dissertation proposal.

Character and Citizenship Education Graduate Certificate

The three program goals of the Character and Citizenship Education (CCE) graduate certificate program are: (a) the understanding of theory and research in citizenship education as it relates to civic participation, concepts of democracy, the democratic purposes of education, and the development of civic identity and political thinking, attitudes, and engagement as well as the competence to apply this knowledge to analysis and design of practical programs in citizenship education; (b) the understanding of character development and character education in childhood and adolescence, including the empirical and conceptual study of the nature of how moral character develops, as well as how it can be fostered in schools by school reform, curriculum development, professional development, and practical pedagogical methods; and (c) the understanding of the connections between character and citizenship development and education.

The Sanford N. McDonnell Professor of Character Education and the Teresa M. Fischer Professor of Citizenship Education serve as program directors.

Admission Requirements

Requirements for admission to the CCE certificate program are current good standing in an UMSL graduate program or all three of the following:

1. Undergraduate degree with a GPA of 3.0 or better
2. Two letters of recommendation with at least one from a current or former college-level instructor
3. Two-page personal statement explaining the applicant's personal and professional goal

The CCE certificate may be pursued as a stand-alone credential or in conjunction with the Master’s Degree in Education and/or the Ph.D. in Education. With advance planning, all 18 credit hours from the CCE certificate can be applied to these degrees. Completion of the CCE certificate, however, does not guarantee acceptance into any of those degree programs, which requires a separate application.

Credit Requirements

A minimum of 18 credit hours of graduate course work is required for the graduate certificate. Twelve of these hours must consist of the four core courses in character and citizenship education. A minimum of six additional hours are to be chosen from the list of electives. At least twelve hours must be completed in residence at UMSL.

1 Course-embedded capstone assessments occur in ED PSY 6417 and ED PSY 6450.
2 Course instructor approval required.

Chemistry BA

The St. Louis metropolitan area has long been a major center for industrial chemistry, and in the past decade it has also become vibrant in life sciences research and development. A bachelor's degree in chemistry provides a student with the professional training needed to contribute to this dynamic industry. The B.A. degree provides a well-rounded academic background and includes a language requirement. Students who earn this degree are well prepared for a career in the chemical industry, graduate work in the chemical sciences, health sciences, medicine, business or law.

General Education Requirements

Students must satisfy the university and college general education requirements (p. 51). Courses in chemistry may be used to meet the university’s science and mathematics area requirement. The college’s
Candidates must complete the following chemistry courses:

**Related Area Requirements**

**Bachelor of Arts and Bachelor of Science in Chemistry**

Candidates for both degrees must also complete:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

</tbody>
</table>

Satisfactory/Unsatisfactory Restrictions

Chemistry majors may not take required chemistry, mathematics, or physics courses on a satisfactory/unsatisfactory basis.

Declaring the Chemistry Major

Students seeking to major in chemistry are first designated as ‘pre-chemistry majors’ until they have completed both CHEM 1111 and CHEM 1121 or equivalent courses. Upon successful completion of CHEM 1111 and CHEM 1121 with grades of C or better, students will be allowed to declare chemistry as their major. Each of these courses must be completed successfully within two attempts.

Bachelor of Arts in Chemistry with a Biochemistry Certificate

The university offers a certificate program for science majors who are interested in careers in biochemistry. This is an interdisciplinary program that involves additional courses in biochemistry and biology. In addition to the usual requirements for the B.A. degree in chemistry, the student must take the following courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Total Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 4233</td>
<td>Laboratory in Instrumental Analysis</td>
<td></td>
</tr>
<tr>
<td>CHEM 4343</td>
<td>Physical Chemistry Laboratory II</td>
<td></td>
</tr>
<tr>
<td>CHEM 4433</td>
<td>Inorganic Chemistry Laboratory</td>
<td></td>
</tr>
<tr>
<td>CHEM 4733</td>
<td>Biochemistry Laboratory</td>
<td>33</td>
</tr>
</tbody>
</table>

No more than 45 hours in chemistry may be applied toward the degree. Each chemistry major must present a seminar and pass a comprehensive examination during the senior year. At least 12 credits at the 3000 level or higher must be completed at UMSL. The Department of Chemistry and Biochemistry may require students to pass a tracking test in order to enroll in the next level course, provided this or an equivalent test is administered to all students seeking to enroll in that course.

B.S. Ed. in Secondary Education with Emphasis in Chemistry

The B.S. Ed. is a professional education degree designed for students who wish to pursue a teaching career in secondary schools. Much of the discipline-specific coursework parallels the B.A. or B.S. degree in the discipline; however, the Missouri Department of Elementary and Secondary Education (DESE) requires specific coursework for teacher certification. Therefore, students interested in the B.S. Ed. should contact the advising office (OASIS) 314-516-5937 in the College of Education for discipline-specific requirements. **Note:** To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.
B.A. or B.S. in Chemistry with Master’s Level Coursework for Secondary Teacher Certification

In addition to the B.S. Ed., students may opt to complete a B.A. or B.S. degree in their discipline as an undergraduate, followed by admission to the Graduate School for Master’s level teaching certification. The College of Education has a one-year accelerated program for post-graduate certification called Teach in 12, or students can choose a traditional path to certification. Graduate coursework for certification can apply towards a Master’s Degree in Secondary Education, with additional coursework. Students interested in Master’s Level teacher certification should contact the advising office (OASIS) 314-516-5937 in the College of Education.

Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

Learning Outcomes

Upon completion of the program, graduates will be able to:

- Demonstrate proficiency at an in-depth level in organic chemistry and physical chemistry.
- Apply appropriate concepts and investigative and quantitative methods as used in all sub-disciplines of chemistry research.
- Critically evaluate existing scientific studies to integrate and apply that body of knowledge to the design of studies to test specific hypotheses addressing unsolved problems in the chemical and life sciences.
- Use computers and the required scientific software in data acquisition, processing, presentation or analysis, including statistical and regression analysis.
- Demonstrate basic skills associated with safely performing and properly documenting laboratory experiments in chemistry following a broad introduction of commonly used equipment and procedures.
- Demonstrate the ability to work either independently or as a part of a small team.
- Identify the need for information, procure the information from relevant scientific literature publications and databases, properly cite the information, and critically evaluate reliability, validity, accuracy, authority, timeliness, and point of view or bias.
- Effectively communicate orally, visually and in writing about the processes of the chemical sciences and the results of scientific inquiry.
- Follow ethical practices in research, experimental interpretation, presentation, citation and application of research.

Total Hours: 120

¹ INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

PLEASE NOTE: This plan is an example of what a four year plan could look like for a typical full-time student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Chemistry BS

The St. Louis metropolitan area has long been a major center for industrial chemistry, and in the past decade it has also become vibrant in life sciences research and development. A bachelor’s degree in chemistry provides a student with the professional training needed to contribute to this dynamic industry. The B.S. degree is THE professional degree in chemistry, and students who earn the B.S. degree are well prepared for a career in the chemical industry, graduate work in the chemical sciences, medicine, business or law. The department provides opportunities for undergraduates to become involved in ongoing research projects.

General Education Requirements

Students must satisfy the university and college general education requirements (p. 51). Courses in chemistry may be used to meet the university’s science and mathematics area requirement. The college’s foreign language requirement fulfills the departmental requirements for B.A. candidates. B.S. degree candidates are not required to take a foreign language: however, the American Chemical Society (ACS) states that the study of a foreign language is recommended, especially for students planning to pursue graduate studies in chemistry.
Satisfactory/Unsatisfactory Restrictions
Chemistry majors may not take required chemistry, mathematics, or physics courses on a satisfactory/unsatisfactory basis.

Declaring the Chemistry Major
Students seeking to major in chemistry are first designated as ‘pre-chemistry majors’ until they have completed both CHEM 1111 and CHEM 1121 or equivalent courses. Upon successful completion of CHEM 1111 and CHEM 1121 with grades of C or better, students will be allowed to declare chemistry as their major. Each of these courses must be completed successfully within two attempts.

Total Hours: 25

Bachelor of Science in Chemistry
This degree may be taken as a terminal degree by students intending to become professional chemists or for preparation for graduate work in chemistry or biochemistry. Students may choose to specialize in chemistry or biochemistry.

</tr>
<tr>
<td>CHEM 4712</td>
<td>Biochemistry</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Hours: 18

No more than 45 hours in chemistry may be applied toward the degree. Each chemistry major must present a seminar and pass a comprehensive examination during the senior year. At least 12 credits at the 3000 level or higher must be completed at UMSL. The Department of Chemistry and Biochemistry may require students to pass a tracking test in order to enroll in the next level course, provided this or an equivalent test is administered to all students seeking to enroll in that course.

Biochemistry Option
In addition to the requirements above, the following chemistry and biology courses are required:

Chemistry

Total Hours: 19
If either research option is chosen, the project must be in biochemistry and must include a written final report submitted to the Department of Chemistry and Biochemistry.

**B.S. Ed. in Secondary Education with Emphasis in Chemistry**

The B.S. Ed. is a professional education degree designed for students who wish to pursue a teaching career in secondary schools. Much of the discipline-specific coursework parallels the B.A. or B.S. degree in the discipline; however, the Missouri Department of Elementary and Secondary Education (DESE) requires specific coursework for teacher certification. Therefore, students interested in the B.S. Ed. should contact the advising office (OASIS) 314-516-5937 in the College of Education for discipline-specific requirements. **Note:** To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

**B.A. or B.S. in Chemistry with Master’s Level Coursework for Secondary Teacher Certification**

In addition to the B.S. Ed., students may opt to complete a B.A. or B.S. degree in their discipline as an undergraduate, followed by admission to the Graduate School for Master’s level teaching certification. The College of Education has a one-year accelerated program for post-graduate certification called Teach in 12, or students can choose a traditional path to certification. Graduate coursework for certification can apply towards a Master’s Degree in Secondary Education, with additional coursework. Students interested in Master’s Level teacher certification should contact the advising office (OASIS) 314-516-5937 in the College of Education. **Note:** To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

- B.S. degree students will demonstrate a clear understanding of the essential principles of the five foundational areas of chemistry and be able to apply them to solve chemical problems. The foundational areas of chemistry are specified as analytical, organic, inorganic, physical and biochemistry and include both the study of small molecules and macromolecules. B.A. degree students do not need to meet this outcome in biochemistry. Demonstrating understanding and application at the foundational level requires a thorough comprehension of basic chemical concepts from the introductory course sequence including stoichiometry, states of matter, molecular structure and bonding, thermodynamics, equilibria and kinetics. B.S. degree graduates will demonstrate proficiency in at least four of the foundational areas at an in-depth level. B.A. degree graduates will demonstrate proficiency at an in-depth level in organic chemistry and physical chemistry.
- Students will apply appropriate concepts and investigative and quantitative methods as used in all sub-disciplines of chemistry research.
- Students will critically evaluate existing scientific studies to integrate and apply that body of knowledge to the design of studies to test specific hypotheses addressing unsolved problems in the chemical and life sciences.
- Students will use computers and the required scientific software in data acquisition, processing, presentation or analysis, including statistical and regression analysis.
- Students will demonstrate basic skills associated with safely performing and properly documenting laboratory experiments in chemistry following a broad introduction of commonly used equipment and procedures. B.S. degree graduates will demonstrate skills in performing laboratory experiments using advanced and specialized instrumentation related to the areas of chemistry that are studied in depth. Students will demonstrate the ability to work either independently or as a part of a small team.
- Students will be able to identify the need for information, procure the information from relevant scientific literature publications and databases, properly cite the information, and critically evaluate reliability, validity, accuracy, authority, timeliness, and point of view or bias.
- Students will effectively communicate orally, visually and in writing about the processes of the chemical sciences and the results of scientific inquiry.
- Students will follow ethical practices in research, experimental interpretation, presentation, citation and application of research.

Total Hours: 120
1 INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

PLEASE NOTE: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

### Chemistry Minor

#### Requirements for the Minor

Students may earn a minor in chemistry by completing the following program. The following five courses are required:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 1111</td>
<td>Introductory Chemistry I (MOTR CHEM 150L)</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 1121</td>
<td>Introductory Chemistry II</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 2223</td>
<td>Quantitative Analysis</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 2612</td>
<td>Organic Chemistry I</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 2633</td>
<td>Organic Chemistry Laboratory</td>
<td>2</td>
</tr>
</tbody>
</table>

Select one of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 2622</td>
<td>Organic Chemistry II</td>
<td>2-3</td>
</tr>
<tr>
<td>CHEM 3312</td>
<td>Physical Chemistry I</td>
<td>1</td>
</tr>
<tr>
<td>CHEM 3412</td>
<td>Basic Inorganic Chemistry</td>
<td>1</td>
</tr>
<tr>
<td>CHEM/BIOL 4712</td>
<td>Biochemistry</td>
<td>1</td>
</tr>
</tbody>
</table>

Total Hours: 20-21

Courses, which are prerequisites to subsequent courses in the minor, may not be taken on a satisfactory/unsatisfactory basis. A GPA of at least 2.0 is required for the courses presented for the minor. At least three courses toward the minor must be completed at UMSL.

### Chemistry MS

#### Admission Requirements

Individuals with at least the equivalent of the B.A. degree in the natural sciences may be admitted to the Graduate School as candidates for the M.S. degree or as precandidates for the Ph.D. degree in chemistry. A student in the M.S. program may request to transfer to the Ph.D. program by petition to the department.

The department admissions committee considers applicants’ grade point averages and normally requires above-average performance in all areas of chemistry as well as physics and mathematics, or other evidence of high aptitude for graduate work in chemistry. Applicants’ GRE scores, letters of recommendation, and academic programs are also considered. In some cases the committee may require successful completion of undergraduate course work as a condition of enrollment as a regular student.

Students with bachelor’s degrees in fields other than chemistry may be admitted to pursue graduate studies in chemistry, but they must make up background deficiencies, usually by taking undergraduate course work.

#### Financial Support

Teaching assistantships are available to qualified applicants. Research assistantships and fellowships are available for advanced students. Departmental support is not normally available beyond the fifth year in the program. For further information, contact the Department of Chemistry & Biochemistry Graduate Admissions.

#### Preliminary Advisement

Students who have been admitted for graduate work in chemistry will be contacted by the Director of Graduate Studies in order to develop a tentative plan of study which takes into consideration the student’s background and interests. Entering students are required to demonstrate

---

1 INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

PLEASE NOTE: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.
proficiency at the undergraduate level in four areas of chemistry (biochemistry, organic, inorganic, physical, and analytical).

Proficiency may be demonstrated in one of the following ways:

- Outstanding performance in recent undergraduate course work.
- Satisfactory performance in standardized placement examinations. These examinations are given twice a year, approximately one week before the beginning of the fall and winter semesters.
- Successful completion of assigned course work.

The ultimate choice of whether students may enroll in the M.S. or Ph.D. degree programs resides with the chemistry faculty.

Degree Requirements

Within two years of initial enrollment, candidates for the M.S. degree in chemistry must demonstrate proficiency at the undergraduate level in four of the following five areas: biochemistry, organic, inorganic, physical, and analytical chemistry.

A minimum of 30 hours is required, normally including 3 hours in CHEM 6897 Chemistry Colloquium. No more than 3 hours in CHEM 6897 may be applied toward the 30 credit hours.

Distribution Requirement

Students may choose to focus their coursework efforts in one of four broadly defined subdiscipline areas (biochemistry, inorganic, organic, or physical chemistry). At least 6 hours of chemistry coursework in one (or more) sub-disciplines(s) outside of their major emphasis area must be completed. The following courses do not fulfill the distribution requirement:

- CHEM 4212 Instrumental Analysis 3
- CHEM 4233 Laboratory in Instrumental Analysis 2
- CHEM 4302 Survey of Physical Chemistry with Applications to the Life Sciences 3
- CHEM 4343 Physical Chemistry Laboratory II 2
- CHEM 4412 Advanced Inorganic Chemistry 3
- CHEM 4433 Inorganic Chemistry Laboratory 2
- CHEM 4712 Biochemistry 3
- CHEM 4733 Biochemistry Laboratory 2

Master of Science in Chemistry with Thesis

Students selecting this option must be enrolled full-time for at least two consecutive semesters. During this time, students are expected to enroll in CHEM 6905, Graduate Research in Chemistry, and conduct their thesis research. A maximum of 12 hours of may be applied toward the required 30 hours. At least 9 hours must be at the 5000 level, excluding CHEM 6905. A maximum of 9 hours in 3000 level or above courses outside the department may be accepted with prior approval of the Director of Graduate Studies.

Master of Science without Thesis

Unlike the thesis option, students need not be enrolled full-time. Of the required 30 hours, 15 credits must be at the 5000 level. A maximum of 6 credits of CHEM 6905, Graduate Research in Chemistry, may be included in place of 4000 level courses; a maximum of 12 hours taken in 3000 level or above courses outside the department may be accepted with prior approval of the Director of Graduate Studies.

Master of Science Degrees for Doctoral Students

Doctoral students may receive a Master’s degree in their program for work completed towards the doctoral degree. To receive a Master’s degree, doctoral students must complete 30 credit hours of courses, with at least 15 of these credit hours in courses numbered at or above the 5000 level.

There are no distribution requirements for the Master's degree for Doctoral students.

The non-dissertation courses presented for the M.S. degree may not include any of the following courses:

- CHEM 4212 Instrumental Analysis 3
- CHEM 4233 Laboratory in Instrumental Analysis 2
- CHEM 4302 Survey of Physical Chemistry with Applications to the Life Sciences 3
- CHEM 4343 Physical Chemistry Laboratory II 2
- CHEM 4412 Advanced Inorganic Chemistry 3
- CHEM 4433 Inorganic Chemistry Laboratory 2
- CHEM 4712 Biochemistry 3
- CHEM 4733 Biochemistry Laboratory 2

Learning Outcomes

Upon completion of the program, graduates will be able to:

- Demonstrate an advanced conceptual understanding of several chemistry sub-disciplines including organic, inorganic, physical, biological and analytical chemistry
- Demonstrate an understanding of important principles that underlie techniques used in chemical and biochemical research, thereby possessing the ability to analyze and interpret data, and make conclusions.
- Explain phenomena by means of accepted chemical principles, theories or laws in particular areas of the chemical sciences with a high degree of sophistication.
- Demonstrate knowledge of chemical nomenclature, structure, and function and be able to effectively communicate this information to both scientists and the public.
- Formulate hypotheses based on an advanced knowledge of chemistry and the current published literature.
- Demonstrate a mastery of literature resources and published findings in chemistry for the preparation of papers, reports, or summaries within a particular subfield of chemistry.

Chemistry MS, Professional Science Emphasis

Admission Requirements

Individuals with at least the equivalent of the B.A. degree in the natural sciences may be admitted to the Graduate School as candidates for the M.S. degree or as precandidates for the Ph.D. degree in chemistry. A
student in the M.S. program may request to transfer to the Ph.D. program by petition to the department.

The department admissions committee considers applicants' grade point averages and normally requires above-average performance in all areas of chemistry as well as physics and mathematics, or other evidence of high aptitude for graduate work in chemistry. Applicants' GRE scores, letters of recommendation, and academic programs are also considered. In some cases the committee may require successful completion of undergraduate course work as a condition of enrollment as a regular student.

Students with bachelor's degrees in fields other than chemistry may be admitted to pursue graduate studies in chemistry, but they must make up background deficiencies, usually by taking undergraduate course work.

Financial Support

Teaching assistantships are available to qualified applicants. Research assistantships and fellowships are available for advanced students. Departmental support is not normally available beyond the fifth year in the program. For further information, contact the Department of Chemistry & Biochemistry Graduate Admissions.

Preliminary Advisement

Students who have been admitted for graduate work in chemistry will be contacted by the Director of Graduate Studies in order to develop a tentative plan of study which takes into consideration the student's background and interests. Entering students are required to demonstrate proficiency at the undergraduate level in four areas of chemistry (biochemistry, organic, inorganic, physical, and analytical).

Proficiency may be demonstrated in one of the following ways:

- Outstanding performance in recent undergraduate course work.
- Satisfactory performance in standardized placement examinations. These examinations are given twice a year, approximately one week before the beginning of the fall and winter semesters.
- Successful completion of assigned course work.

The ultimate choice of whether students may enroll in the M.S. or Ph.D. degree programs resides with the chemistry faculty.

Degree Requirements

This option requires a minimum of 32 hours, of which 16 credit hours must be at or above the 5000 level. Students must take 21 credit hours of chemistry, 9 hours in business, and 2 credits hours of internship or practicum. A maximum of 3 credits of CHEM 6897 may be applied toward the required minimum of number of chemistry credits (21 hours).

The courses presented for the Master's degree (professional science emphasis) may not include any of the following:

Chemistry PhD

Admission Requirements

Individuals with at least the equivalent of the B.A. degree in the natural sciences may be admitted to the Graduate School as candidates for the M.S. degree or as precandidates for the Ph.D. degree in chemistry. A student in the M.S. program may request to transfer to the Ph.D. program by petition to the department.

The department admissions committee considers applicants' grade point averages and normally requires above-average performance in all areas of chemistry as well as physics and mathematics, or other evidence of high aptitude for graduate work in chemistry. Applicants' GRE scores, letters of recommendation, and academic programs are also considered. In some cases the committee may require successful completion of undergraduate course work as a condition of enrollment as a regular student.

Students with bachelor's degrees in fields other than chemistry may be admitted to pursue graduate studies in chemistry, but they must make up background deficiencies, usually by taking undergraduate course work.

Financial Support

Teaching assistantships are available to qualified applicants. Research assistantships and fellowships are available for advanced students. Departmental support is not normally available beyond the fifth year in the program. For further information, contact the Department of Chemistry & Biochemistry Graduate Admissions.
Preliminary Advisement

Students who have been admitted for graduate work in chemistry will be contacted by the Director of Graduate Studies in order to develop a tentative plan of study which takes into consideration the student’s background and interests. Entering students are required to demonstrate proficiency at the undergraduate level in four areas of chemistry (biochemistry, organic, inorganic, physical, and analytical).

Proficiency may be demonstrated in one of the following ways:

- Outstanding performance in recent undergraduate course work.
- Satisfactory performance in standardized placement examinations. These examinations are given twice a year, approximately one week before the beginning of the fall and winter semesters.
- Successful completion of assigned course work.

The ultimate choice of whether students may enroll in the M.S. or Ph.D. degree programs resides with the chemistry faculty.

Doctoral Degree Requirements

Within one year of initial enrollment, incoming doctoral students must demonstrate proficiency in four of the following five areas: biochemistry, organic, inorganic, physical, and analytical chemistry. A minimum of 60 credit hours is required, including research hours.

Comprehensive Exam Committee

Before the end of the second regular semester of study, the doctoral student and his/her research advisor will select a comprehensive exam committee. The student should prepare Graduate School form D-1, which should be signed by the research advisor and the Director of Graduate Studies, and filed with the graduate school.

In the Department of Chemistry & Biochemistry, the comprehensive exam committee also serves as a mentoring committee for the student. The committee will meet with the student at the end of each spring semester to review progress in coursework and research. A written report summarizing their assessment and recommendations will be provided to the student and the Director of Graduate Studies.

Comprehensive Examinations

Each student seeking the Ph.D. degree must successfully complete a comprehensive examination prior to advancement to candidacy. The comprehensive exam is typically taken when formal coursework has been completed, but it must be completed before the start of the fifth regular semester.

The comprehensive exam consists of writing an original research proposal and an oral defense that will be evaluated by the student’s committee. The student will select a topic that is not directly related to the expected research area. The research advisor must approve the topic. The specific format for the proposal is described in the Department of Chemistry & Biochemistry Handbook of Graduate Studies.

Dissertation Proposal

Doctoral students must prepare and defend a Dissertation Proposal before the student has completed the equivalent of 6 regular semesters of full-time study. The proposal should be defended within six months following successful completion of the Comprehensive Examination.

The Dissertation Proposal includes both a written and oral component. Both components will be evaluated by the student’s Comprehensive Examination committee. The written proposal will be submitted to the Comprehensive Examination committee and will be presented as a seminar to the Department. After the seminar, the student will defend the proposal before the Comprehensive Examination committee.

Advancement to Candidacy

In addition to general Graduate School requirements for advancement to candidacy, students must complete the following:

1. 18 hours of non-dissertation work.

This may not include:

<table>
<thead>
<tr>

<td>Chemistry Colloquium</td>
<td>1</td>
</tr>
</tbody>
</table>

At least 9 of the 18 credits of non-dissertation coursework must be at the 5000 level. Courses in areas other than chemistry may be included with prior departmental approval.

2. Successfully pass a Comprehensive Examination.
3. Successfully present and defend a dissertation proposal.
4. Submit the proposal for approval to the Graduate School.
5. Be in good standing.

Seminar Requirement

Students must enroll in CHEM 6897, Chemistry Colloquium, each semester they are in residence. In their final semester in the program, each student will present an “exit seminar” to the Department describing the results of their dissertation research.

Dissertation

One copy of the dissertation must be submitted upon completion of the graduate research problem.

Probation and Dismissal

Students are dismissed from the Ph.D. program if they fail to pass their Comprehensive Examination or otherwise fail to meet the academic
and professional standards set forth by the Graduate School and the Department of Chemistry and Biochemistry.

Child Advocacy Studies Minor

Minor in Child Advocacy Studies

The undergraduate minor in Child Advocacy Studies (CAST) is an interdisciplinary program requiring 15 credits of training in Child Advocacy Studies. The CAST minor encompasses a group of courses focused on children, youth, and traumatic stress. The CAST minor is appropriate for students who want to explore working in a variety of professional settings with children and adolescents, many of whom may have experienced trauma.

Most courses required by the minor in Child Advocacy Studies have prerequisites. Some students may satisfy prerequisites by virtue of their prior curriculum. When this is not the case, students are responsible for satisfying the prerequisites. All required courses must be taken in residence at UM-St. Louis.

Required courses:

Total Hours | 15 |

Learning Outcomes

- Demonstrate the ethical behavior and values of their discipline in the context of traumatic stress.
- Integrate the current fund of traumatic stress knowledge into their professional role.
- Generate effective responses to traumatic stress and child maltreatment using trauma-informed decision-making processes.
- Create trauma-sensitive relationships with diverse consumers.
- Interact effectively with professionals across multiple disciplines.
- Communicate effectively with the community about traumatic stress and child maltreatment.

Child Advocacy Studies Undergraduate Certificate

The undergraduate Certificate Program in Child Advocacy Studies (CAST) is an interdisciplinary program requiring 19 credits of training in Child Advocacy Studies. The CAST certificate encompasses a group of courses focused on children, youth, and traumatic stress capped by a field experience. The CAST certificate is appropriate for students who want to specialize in working in a variety of professional settings with children and adolescents, many of whom may have experienced trauma.

Most courses required by the Certificate Program in Child Advocacy Studies have prerequisites. Some students may satisfy prerequisites by virtue of their prior curriculum. When this is not the case, students are responsible for satisfying the prerequisites. All students must take at least one course outside their home department. All required courses must be taken in residence at UM-St. Louis.

Learning Outcomes

- Demonstrate the ethical behavior and values of their discipline in the context of traumatic stress.
- Integrate the current fund of traumatic stress knowledge into their professional role.
- Generate effective responses to traumatic stress and child maltreatment using trauma-informed decision-making processes.
- Create trauma-sensitive relationships with diverse consumers.
- Interact effectively with professionals across multiple disciplines.
- Communicate effectively with the community about traumatic stress and child maltreatment.
Field Experience Options

A field experience in a child-related field, approved and supervised by the student's home department, is the final part of the certificate. All required CAST courses should be completed, though concurrent enrollment in one CAST course is permitted. Additionally, students must receive prior approval from the CAST program director.

CAST 4698 Internship in Child Advocacy Studies
CRIMIN 3280 Internship in Criminology and Criminal Justice
EDUC 4989 Internship in Education
GS 4353 Internship in Gender Studies
SOC 4385 Internship in Sociology
SOC WK 4800/4850 Supervised Field Experience in Social Work

Seminar
CAST 4700 Field Education Seminar in Child Advocacy Studies

Total Hours 19

Learning Outcomes

Upon completion of the program, certificate earners should be able to:

- Demonstrate the ethical behavior and values of their discipline in the context of traumatic stress.
- Integrate the current fund of knowledge about traumatic stress into their professional role.
- Generate effective responses to traumatic stress and child maltreatment using trauma-informed decision-making processes.
- Create trauma-sensitive relationships with diverse consumers.
- Use knowledge to increase consumer access to trauma-informed services.
- Formulate service strategies that reduce the impact of trauma and promote well-being.
- Interact effectively with professionals across multiple disciplines.
- Produce trauma-sensitive written and verbal communication consistent with discipline standards.
- Recommend trauma-informed policy changes within their work setting.

Civil Engineering BSCIE

Admission

Students are admitted to the upper-division program after they have completed an acceptable pre-engineering program. The pre-engineering program can be taken at University of Missouri-St. Louis or at community colleges in the area. Normally, admission is granted to persons who have completed the pre-engineering program with a minimum grade point average of 2.75 over all their mathematics, chemistry, physics, and introductory (statics and dynamics) engineering courses. Students with less than a 2.75 grade point average, but at least a C, in all their science, engineering and mathematics courses may be admitted on a conditional basis.

For more information, please contact the program advisor at (314) 516-7018.

Degree Requirements

A program of 132 semester hours is required for the Bachelor of Science in Civil Engineering.

Majors must complete the University General Education (p. 51) and Graduation (p. 19) requirements, the Pre-Engineering Requirements, the Core Engineering Requirements, and Major Requirements.

A minimum grade of C- is necessary to meet the prerequisite requirement for any course.

General Education and Graduation Requirements

The following courses fulfill general education and graduation requirements and are required of Civil Engineering majors:

PHIL 2259 Engineering Ethics 3
PHIL 3380 Philosophy of Science 3
HIST 1001 American Civilization to 1865 (MOTR HIST 101) 3
or HIST 1002 American Civilization 1865 to Present (MOTR HIST 102) 3

Three additional Social Science courses 9

Total Hours 18

1 One course must meet the Cultural Diversity requirement, and one course must meet the engineering Valuing Skill requirement. Humanities and social sciences electives must meet both the University of Missouri-St. Louis General Education Requirements and the Humanities and Social Sciences Requirements of the Joint Undergraduate Engineering Program. Check with your advisor for details.
Pre-Engineering Requirements

Students seeking to major in engineering are first designated as 'Undeclared with an interest in Engineering majors' until they have completed Math 1800 Analytical Geometry & Calculus I. Upon successful completion of Math 1800 with a grade of C or better, students will be allowed to declare pre-engineering as their major. Math 1800 must be completed successfully within two attempts.

MATH 1800 Analytic Geometry and Calculus I 5
MATH 1900 Analytic Geometry and Calculus II 5
MATH 2000 Analytic Geometry and Calculus III 5
MATH 2020 Introduction to Differential Equations 3
CHEM 1111 Introductory Chemistry I (MOTR CHEM 150L) 5
GEOL 1001 General Geology 3
PHYSICS 2111 Physics: Mechanics and Heat 4
PHYSICS 2111L Mechanics and Heat Laboratory 1
PHYSICS 2112 Physics: Electricity, Magnetism, and Optics 4
PHYSICS 2112L Electricity, Magnetism, and Optics Laboratory 1
ENGR 2310 Statics 3
ENGR 2320 Dynamics 3
ENGL 1100 First-Year Writing (MOTR ENGL 200) 3

Total Hours 45

Engineering Core Requirements

Total Hours: 133

1. Course does not count toward 132 credit hours for degree.
2. Course should also satisfy the Cultural Diversity Requirement.

**PLEASE NOTE:** This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

J C ENGR 4720 Legal Aspects of Construction
J C ENGR 4730 Construction Operations and Management
J C ENGR 4740 Economic Decisions in Engineering

Total Hours 18

Communication BA

The BA in Communication is a flexible degree program that students can tailor to meet personal, professional, or academic goals through elective courses in interpersonal, mass, strategic, and visual communication. Students explore how messages are constructed, delivered, and perceived by audiences. Whether the intent is to inform, influence, or entertain, students will use research and theory to improve message effectiveness and achieve desired outcomes in interpersonal and mass-mediated communication. In addition, students can find a creative outlet in courses that focus on content creation and its consequences and significance.

Students majoring in communication must complete a minimum of 36 credit-hours in communication courses. Students may complete either a general communication degree or they may select one of four different
emphasis areas as a focus for their studies: Interpersonal Communication, Mass Communication, Applied Visual Communication, or Strategic Communication. To complete the degree with one of these emphases, the student must complete the 21 credit-hour core and at least 15 hours of electives from within the selected emphasis area. In addition, the skills and knowledge applied in the required Practicum/Internship should be consistent with the selected emphasis area. Students seeking a general communication degree must complete the 21 credit-hour core and can select elective courses from any combination of the emphasis areas.

General Education Requirements
Majors must satisfy the university and college general education requirements (p. 51). The college's foreign language requirement may be taken in any language. Communication courses may not be taken on a satisfactory/unsatisfactory basis.

Degree Requirements
At least 18 credit hours must be taken at UMSL. Furthermore, at least 12 credit hours of the communication courses completed must be numbered 3000-4999 for students seeking a general communication degree, as well as for students pursuing an emphasis area. All students must earn a C or better in each of the required core courses of the major and maintain a 2.0 grade point average in all of the courses applied to the communication degree.

Communication BA, Applied Visual Communication Emphasis

This emphasis area covers digital audiovisual media production, helping students master the art of telling stories and effectively communicating information through digital media. Students receive practical instruction in areas such as camera work, location shooting, digital video editing, directing, and performance for the camera, typically in small, applied skills courses. This coursework is complemented by instruction in areas such as interpersonal, intercultural, and professional communication that help students gain jobs, advance in the workplace, and better connect with diverse audiences.

Career Outlook
New graduates often enter this career path as video editors or camera operators. According the U.S. Bureau of Labor Statistics, employment in these occupations is expected to grow faster than average, in part because of increasing demand for audio-visual media on internet-only platforms such as streaming services. The job outlook for more experienced positions in the field, such as producers and directors, is also robust. Successful alumni have gone
Students majoring in communication must complete a minimum of 36 credit-hours in communication courses. **Learning Outcomes**

- Recognize and apply the fundamental principles of effective visual communication
- Design, implement, and critique media content based on appropriate production, design, and aesthetic principles
- Light, block and record digital video footage in studio and location settings
- Edit digital footage into a coherent narrative or persuasive message, including the addition of titles and graphic effects
- Produce work that contributes knowledge and creativity with effective communication skills in all forms of media: written, visual, and oral
- Effectively work in groups as both leaders and collaborators

Communication BA, Interpersonal Communication Emphasis

The Interpersonal Communication emphasis area focuses on communication processes in personal relationships. Students in this emphasis area will master the ability to communicate meaningfully with colleagues, clients, and loved ones in a variety of settings. Strong interpersonal skills are needed in almost any type of job and can truly transform your career and your life. Our faculty members are actively engaged in research and our students benefit from first-hand knowledge not currently offered at other institutions. Many faculty members have been recognized for excellence or innovation in teaching.

Students majoring in communication must complete a minimum of 36 credit-hours in communication courses. Students may complete either a general communication degree or they may select one of four different emphasis areas as a focus for their studies: Interpersonal Communication, Mass Communication, Applied Visual Communication, or Strategic Communication. To complete the degree with one of these emphases, the student must complete the 21 credit-hour core and at least 15 hours of electives from within the selected emphasis area. In addition, the skills and knowledge applied in the required Practicum/Internship should be consistent with the selected emphasis area. Students seeking a general communication degree must complete the 21 credit-hour core and can select elective courses from any combination of the emphasis areas.

\[1\] INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

PLEASE NOTE: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Emphasis Area Requirements

The interpersonal emphasis area focuses on communication between individuals and the impact of verbal and nonverbal communication on personal relationships. 15 credits are needed.

Up to six credit hours of Special Topics Courses, Directed Readings courses, and Supervised Research courses offered by the Communication and Media Department can be applied to the emphasis area if the specific topic of the course is relevant to the emphasis area.

Choose five of the following courses:

Emphasis Area Requirements

The Mass Communication emphasis area focuses on the effects of mass media and the processes through which users create, distribute, and interpret these messages. 15 credits are needed.

Up to six credit hours of Special Topics Courses, Directed Readings courses, and Supervised Research courses offered by the Communication and Media Department can be applied to the emphasis area if the specific topic of the course is relevant to the emphasis area.

Communication BA, Mass Communication Emphasis

This emphasis area focuses on forms of communication that seek to reach broad audiences, such as news, movies, entertainment programming, video games, advertising, and social media. Courses address business strategies behind these forms of mass communication, how they are created, and how they affect individuals and society. Students pursuing this emphasis area gain a deeper understanding of some of the most fascinating and influential institutions in today's society.

Students majoring in communication must complete a minimum of 36 credit-hours in communication courses. Students may complete either a general communication degree or they may select one of four different emphasis areas as a focus for their studies: Interpersonal Communication, Mass Communication, Applied Visual Communication, or Strategic Communication. To complete the degree with one of these emphases, the student must complete the 21 credit-hour core and at least 15 hours of electives from within the selected emphasis area. In addition, the skills and knowledge applied in the required Practicum/Internship should be consistent with the selected emphasis area. Students seeking a general communication degree must complete the 21 credit-hour core and can select elective courses from any combination of the emphasis areas.
Learning Outcomes
- Learn how media industries, such as television, film, video games, radio, recorded music, and advertising, function as businesses and as forms of creative expression
- Understand how the growth of digital technology and social media have affected and changed media industries
- Appreciate how media content plays a role in socialization and learning
- Explore ways in which media content and technologies impact people's behaviors, thoughts, and emotions
- Recognize the various ways individuals interact with media, what needs media fulfill for them, and how this affects their experience with media

Please Note: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Communication BA, Strategic Communication Emphasis

Strategic Communication aims to persuade and inform. Corporations, nonprofits, government agencies, and small businesses use strategic communication tactics to deliver messages to the public in order to encourage individuals to take action. It is an interdisciplinary approach that can incorporate elements from public relations, advertising, health, and organizational communication. Courses in this emphasis area target the skills students need to communicate with audiences through writing, content development, and strategic messaging. Professions that may apply strategic communication principles include advertising, public relations or any profession that communicates with the public for a specific purpose.

Students majoring in communication must complete a minimum of 36 credit-hours in communication courses. Students may complete either a general communication degree or they may select one of four different emphasis areas as a focus for their studies: Interpersonal Communication, Mass Communication, Applied Visual Communication, or Strategic Communication. To complete the degree with one of these emphases, the student must complete the 21 credit-hour core and at least 15 hours of electives from within the selected emphasis area. In addition, the skills and knowledge applied in the required Practicum/Internship should be consistent with the selected emphasis area. Students seeking a general communication degree must complete the 21 credit-hour core and can select elective courses from any combination of the emphasis areas.

General Education Requirements

Majors must satisfy the university and college general education requirements (p. 51). The college’s foreign language requirement may be taken in any language. Communication courses may not be taken on a satisfactory/unsatisfactory basis.

Degree Requirements

At least 18 credit hours must be taken at UMSL. Furthermore, at least 12 credit hours of the communication courses completed must be numbered 3000-4999 for students seeking a general communication degree, as well as for students pursuing an emphasis area. All students must earn a C or better in each of the required core courses of the major and maintain a 2.0 grade point average in all of the courses applied to the communication degree.

Required Courses

| COMM 1030 | Interpersonal Communication I (MOTR COMM 120) | 3 |
| COMM 1050 | Introduction to Mass Communication | 3 |
| COMM 2231 | Communication in the Organization | 3 |

| COMM 2235 | Professional Communication | 3 |
| COMM 3330 | Research Methods in Communication I | 3 |
| COMM 4920 | Practicum in Applied Communication | 3 |

1 INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.
Emphasis Area Requirements
The strategic communication emphasis area deals with public and inter-organizational communication intended to serve a specific company goal or purpose. It is an interdisciplinary emphasis that can incorporate areas from public relations, advertising, and organizational communication. 15 credits are needed.

Up to six credit hours of Special Topics Courses, Directed Readings courses, and Supervised Research courses offered by the Communication and Media Department can be applied to the emphasis area if the specific topic of the course is relevant to the emphasis area.

Total Hours: 15

Learning Outcomes
- Create high-quality print, digital, and video products
- Design high-impact messages tailored to specific audiences
- Learn the fundamental skills necessary to be competitive in the ever-changing communication field
- Interpret and apply strategic communication principles to design, research, and plan strategic communication campaigns
- Compose written materials in a clear and concise format following the appropriate style utilizing the best communication channel
- Create ethically sound, legally and socially responsible strategic communication tactics

Please Note: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Communication BA/MA Dual Degree Program

The 2+3 Combined BA/MA program in Communication provides an opportunity for students of recognized academic ability and educational maturity to complete the requirements for both degrees in 5 years of full-time study. When all the requirements of the B.A./M.A. program
have been completed, students will be awarded both the B.A. and M.A. degrees.

The combined program requires a minimum of 135 credit hours of which at least 30 must be at the graduate level. In qualifying for the BA, students must meet all University and College requirements.

Student should apply to the Department for admission to the 2+3 combined degree program in Communication during the semester they will complete 60 undergraduate credit hours. A cumulative grade point average of 3.25 or higher and three letters of recommendation from faculty are required. Students will be admitted to the 2+3 program under provisional status until they have completed 15 hours in that program with a grade point average of 3.0 or higher. After completion of the provisional period, with the recommendation of the Graduate Director, students can be granted full admission into the 2+3 program. Students must maintain a grade point average of 3.0 or higher throughout the combined program. Students who officially withdraw from the Combined Program who have successfully completed all the requirements for the B.A. degrees will be awarded the B.A. degree.

All of the Masters coursework must be taken under graduate status. However, with advance permission (Graduate Form C-1), students may take up to 6 credit hours of 5000/6000 level courses while still classified as an undergraduate. No 4000-level courses taken as an undergraduate may be applied to the Master’s degree. This means all combined section classes must be taken as graduate courses in order to count for the graduate degree. These 6 hours will be treated by the Graduate School as ‘undergraduate status’ and they may be counted toward a master’s degree. Up to 15 credit hours of graduate courses can be applied to the undergraduate degree.

---

### Communication MA

#### Admission Requirements

Applicants must have a baccalaureate in communication or a related discipline by the end of the semester in which they apply. The minimum cumulative GPA required for regular admission to the graduate program in communication is 3.25 on a 4-point scale. In addition, three letters of recommendation, at least two of which address the applicant’s potential to succeed in graduate studies in communication, are also required. Finally, international students who are non-native speakers of English must obtain a TOEFL iBT score of 100 to be considered for admission. Applicants with GPAs that do not meet the admission criterion may elect to submit other materials, such as scores on the Graduate Record Exam (GRE), to offset these deficiencies. Contact the Graduate Program Director for more information.

#### Degree Requirements

The MA in Communication requires either 30 or 36 credit hours of coursework, depending on the exit project. Candidates approved for a thesis or internship will complete at least 30 semester hours of approved study, at least 21 of which must be taken in courses offered by the department. Candidates completing the non-thesis, non-internship option must complete 36 semester hours of approved study, 27 of which must be taken in courses offered by the department. However, students who choose this option may be eligible to waive up to 6 hours if justified by prior coursework or professional experience. Please contact the Graduate Program Coordinator for additional details.

All students complete a 15 credit-hour core. This includes two required courses focusing on the fundamental theories and basic research methods within the field. To complete the core, students will select at least three of four ‘applications’ courses dealing with communication processes within a particular context.

#### Required Courses:

<table>

<td>COMM 6700</td>
<td>Seminar in Mass Communication</td>
<td>3</td>
</tr>
<tr>
<td>COMM 6800</td>
<td>Seminar in Health Communication</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Hours 15

Students who choose the internship or thesis option must identify a prospective committee, including a chairperson and two additional committee members, who will consult in development of an appropriate exit project. The expectation for each internship varies by project and committee, but submission of an essay in which the coursework and internship experiences are integrated is typically required. Internship exit projects and theses must be approved by the student’s committee and assigned a grade by the advisor. Students who complete a thesis or internship must complete no less than a 3 hour internship or 6 credit hour thesis.
Communication Minor

Coursework for a minor in Communication consists of 15 semester hours of the core requirements for the major. Credit hours in and/or COMM 3395 may be substituted for credit hours listed below with written consent of the communication department chairperson.

Core Requirements:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 1030</td>
<td>Interpersonal Communication I (MOTR COMM 120)</td>
<td>3</td>

<td>Intercultural Communication</td>
<td>3</td>
</tr>
<tr>
<td>COMM 3330</td>
<td>Research Methods in Communication I</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Hours: 15

At least 9 of the 15 hours required for the minor must be taken at UMSL.

Students must earn at least a C for all communication courses applied to the minor. A minimum GPA of 2.5 is required in the minor.

Community College Leadership Graduate Certificate

Effective Fall 2019, The Community College Leadership Graduate Certificate will no longer be accepting applications

Certificate Requirements

The certificate program will allow participating candidates to develop skills and knowledge through completing the 18 hour curriculum outlined in the following section:

Computer Programming Education Undergraduate Certificate

The undergraduate certificate in Computer Programming Education is a 15 credit hour program. It is designed to provide a quick, yet broad training in technologies leading to secure and interesting careers in computer programming or education. Students majoring or minoring in Computer Science may not earn this certificate. A minimum GPA of 2.5 is required for admission.

A minimum of three courses must be taken from UMSL. Courses may be substituted with the permission of the certificate coordinator. For more information, students can contact the department chair or email info@arch.edu.

Computer Science BS

The BS in Computer Science is designed for those interested in software and computer systems on the technical side. Graduating seniors can find fulfilling careers in many related areas such as cybersecurity, networks, Internet programming, software and mobile apps development, data science, AI, graphics, or pursue additional graduate studies in computer science or in a more specialized area. Some courses are available online, and the entire program can be completed in the evening.

General Education Requirements

All department majors must satisfy the university and appropriate school or college general education requirements (p. 51). All mathematics courses may be used to meet the university’s general education breadth of study requirement in natural sciences and mathematics.

Satisfactory/Unsatisfactory Restrictions

All department majors may not take mathematical sciences or related area courses on a satisfactory/unsatisfactory basis. Students considering graduate study should consult with their advisers about taking work on a satisfactory/unsatisfactory basis.

Degree Requirements

All courses of the department presented to meet the degree requirements must be completed with a grade of C- or better. At least four courses numbered 3000 or above must be taken in residence. Students must have a 2.0 grade point average in the mathematical sciences courses completed.

Students enrolling in introductory mathematics courses should check the prerequisites to determine if a satisfactory score on the Mathematics Placement Test is necessary. Placement into introductory courses assumes a mastery of two years of high school algebra.

A minimum grade of C- is required to meet the prerequisite requirement for any course except with permission of the department.

Total Hours: 15

Note: Courses that are prerequisites for higher-level courses may not be taken for credit or quality points if the higher-level course has been satisfactorily completed.

Many students are qualified, as a result of having studied calculus in high school, to begin their major with MATH 1900, Analytic Geometry and Calculus I, or MATH 2000, Analytic Geometry and Calculus II. These students are urged to consult with the department before planning their programs. Credit for MATH 1800, Analytic Geometry and Calculus I, will be granted to those students who complete MATH 1900 with a grade of C- or better.

Similarly, students who are ready to begin their computer science studies with CMP SCI 2250, Programming and Data Structures, will be granted credit for CMP SCI 1250, Introduction to Computing, once they complete CMP SCI 2250 with a grade of C- or better.

Declaring the Computer Science Major

Students seeking to major in computer science are first designated as “pre-computer science majors” until they have completed CMP SCI 2750 or equivalent course. Upon successful completion of this course with a grade of C- or better, students will be allowed to declare computer science as their major. This course must be completed successfully within two attempts.

Degree Requirements in Computer Science

Candidates for the B. S. Computer Science degree must complete the following work:

1) Computer Science Core

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>

</tbody>
</table>
Four Year Plan

Upon completion of the program, graduates will be able to:

- Apply logical reasoning, algorithmic and mathematical principles, and computer science theory to understand and solve a wide variety of computational problems
- Analyze computing problems, their size and scope, and input-output requirements
- Analyze, evaluate, and compare alternative solutions to computing problems, with particular reference to computational complexity, scalability, and usability
- Compare multiple general-purpose programming languages and select and use the appropriate languages for specific applications
- Design, implement (code) and document solutions to computational problems
- Create software systems following specific design and performance requirements within practical constraints
- Implement Internet applications on client and server sides
- Work effectively in teams to design, implement and evaluate solutions to computational problems
- Effectively communicate computer science concepts and solutions, verbally and in writing
- Recognize and promote the professional, social, ethical and legal issues and responsibilities in the computing / software profession

Learning Outcomes

There are no related area requirements for majors in Computer Science

Total Hours: 120

1 INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

Please Note: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Computer Science BS/MS Dual Degree Program

BS and MS Dual Degree in Computer Science

The Integrated BS/MS (‘2+3’) dual degree program involves dual credit for qualified undergraduate Computer Science students. It allows the students to concurrently earn credit for some graduate courses while working on their undergraduate degree, reducing the total hours needed for the subsequent MS degree by up to 12 credit hours.

Entry Requirements

Undergraduate majors can apply for provisional admission to this program if:

1. They have completed at least 60 credit hours of coursework.
2. Their overall GPA is 3.0 or higher.
3. Non-CS majors must at the same time become CS majors.

Upon acceptance to the program in the provisional status, the student continues to work toward his/her undergraduate degree in computer science.

After completion of a minimum of 90 hours and no more than 30 hours away from the undergraduate degree, a provisionally admitted student applies for formal admission to the graduate program. At this point, the student must meet the entry requirements for admission to the M.S. degree in Computer Science.

Degree Requirements

After acceptance into the program, the student continues to complete his/her undergraduate degree. The student is reclassified as a graduate student from the next semester and must pay graduate fees. The student will be assigned a graduate adviser to help optimize the transition to the graduate program. The student continues taking the undergraduate courses but is also allowed to take courses reserved for graduate students. The student completes all the courses to fulfill the requirements to complete his/her M.S. degree in Computer Science – but must also complete the undergraduate requirements. Up to 12 credit hours can
be counted towards both the undergraduate and graduate degrees, substantially reducing the hours needed to complete the graduate program by itself.

A student may file for and receive the undergraduate degree at any time when all the requirements are completed, before or in the same semester in which the Master’s degree is completed. A student must still complete all the requirements to get a B.S. degree, regardless of whether the student files for the degree or not. A student may choose to finish the studies just with a B.S.

**Computer Science Minor**

All courses presented for this minor must be completed with a grade of C- or better.

The requirements for the minor are:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CMP SCI 1250</td>
<td>Introduction to Computing</td>
<td>3</td>
</tr>
<tr>
<td>CMP SCI 2250</td>
<td>Programming and Data Structures</td>
<td>3</td>
</tr>
<tr>
<td>Select three additional computer science courses numbered 2000 or above.</td>
<td>9</td>
<td></td>
</tr>
</tbody>
</table>

Total Hours: 15

A minimum of two computer science courses numbered above 2000 must be taken in residence in the Department of Mathematics and Computer Science at UMSL.

**Learning Outcomes**

Upon completion of a Minor in Computer Science at the University of Missouri St. Louis, students will be able to:

- Identify and interpret the basic computational issues in problem solving
- Apply the tools and techniques necessary for programming practice
- Use at least two general-purpose programming languages for solving computational problems
- Design, implement (code) and document solutions to computational problems

**Computer Science MS**

**Admission Requirements**

Applicants must meet the general graduate admission requirements of the Graduate School, described in the UMSL Bulletin. Students are considered for admission to the graduate program in Computer Science only after they have formally applied for admission through the Graduate School. Applications are completed on-line. Additional requirements are listed below.

Applicants must demonstrate significant proficiency in computer science by showing competence (demonstrating related academic or professional experience) in the following areas. Courses in parentheses are UMSL recommended undergraduate courses that would satisfy the requirements.

1. Programming skills in C or C++ and Java (CMP SCI 1250 or CMP SCI 2250, and CMP SCI 2261)
2. Proficiency with Object-Oriented concepts and terminology (CMP SCI 2261)
3. Proficiency with dynamic data structures (CMP SCI 2250)
4. Proficiency with computer organization, architecture, or assembly level programming (CMP SCI 2700)
5. Proficiency with design and time/space analysis of algorithms (CMP SCI 3130)
6. Familiarity with Unix/Linux/OSX and with command-line processing, file system and permissions, shell and script programming (CMP SCI 2750)

Students must also have satisfactorily completed mathematics courses equivalent to the following UMSL courses:

1. One semester of calculus (MATH 1800)
2. A course in discrete mathematics (MATH 3000)
3. An elementary course in probability or statistics (MATH 1320)

An applicant missing some of the above requirements may be admitted on restricted status if there is strong supportive evidence in other areas. Such restricted students would have to take the suggested courses for the missing requirements or otherwise demonstrate proficiency. Special regulations of the Graduate School that apply to students on restricted status are described in the UMSL Bulletin.

**Degree Requirements**

Students choose one of the following options.

1. Traditional Computer Science option
2. Certificate option

Students must complete the following common requirements and additional specific requirements specific to the chosen option.

Candidates for the M.S. degree in Computer Science must complete 30 credit hours of course work in CMP SCI, subject to the Graduate School regulations. Up to 6 hours can be completed outside CMP SCI in a related field, based on student’s interests, with permission of the Graduate Director. Up to 9 graduate credit hours can be transferred into the program.

At least 18 credit hours must be numbered 5000 or above, and at least 3 credit hours must be at the 6000-level (research courses or thesis). All courses numbered below 5000 must be completed with a grade of at least B-.

All students must complete the following core courses

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CMP SCI 4250</td>
<td>Programming Languages</td>
<td>3</td>
</tr>
<tr>
<td>CMP SCI 5130</td>
<td>Advanced Data Structures and Algorithms</td>
<td>3</td>
</tr>
<tr>
<td>CMP SCI 5500</td>
<td>Software Engineering</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Hours: 9

Students having prior similar courses may apply for a waiver if the course was passed at the undergraduate level (students will replace the core course with another) or credit if the course was passed at the graduate level. Students may also request a waiver based on demonstrated similar experience or a combination of courses and experience.

Students may choose to write an M.S. thesis under the direction of a faculty member in the Department of Mathematics and Computer Science (CMP SCI 6900). A student writing an M.S. thesis must defend the
thesis in an oral exam administered by a committee of three department members which includes the thesis director.

Additionally, students must attend at least five different seminars or colloquium presentations in the department prior to applying for graduation.

**Traditional Computer Science Option**

This option allows students to complete a traditional computer science graduate program. In addition to the common core requirements, students must also complete the following courses as part of the minimum 30 hours:

- CMP SCI 4760 Operating Systems 3
- CMP SCI 5700 Computer Systems 3

**Certificate Option**

This option is for students interested in a very specific area of study as indicated by a certificate. In addition to the common core requirements, students must complete any of the graduate certificates in the department as part of the minimum 30 hours.

For a list of current certificates visit the Mathematics and Department page in the University Bulletin.

For further information about our Graduate Degrees in Mathematics and Computer Science, financial aid, and the regulations of the Graduate School, see our page on advanced degrees.

**Computing Technology BS**

The B.S. in computing technology favors exposure to a wide variety of tools and technologies over the traditional computer science background. This degree is designed for those interested in broad and deep computing education but without some traditional advanced courses. It is meant for those who want to focus more on technologies and transition to fulfilling careers, or those interested in future graduate study in an area related to computer science.

**General Education Requirements**

All department majors must satisfy the university and appropriate school or college general education requirements (p. 51). All mathematics courses may be used to meet the university’s general education breadth of study requirement in natural sciences and mathematics.

**Satisfactory/Unsatisfactory Restrictions**

All department majors may not take mathematical sciences or related area courses on a satisfactory/unsatisfactory basis. Students considering graduate study should consult with their advisers about taking work on a satisfactory/unsatisfactory basis.

**Degree Requirements**

All courses of the department presented to meet the degree requirements must be completed with a grade of C- or better. At least four courses numbered 3000 or above must be taken in residence. Students must have a 2.0 grade point average in the mathematical sciences courses completed.

Students enrolling in introductory mathematics courses should check the prerequisites to determine if a satisfactory score on the Mathematics Placement Test is necessary. Placement into introductory courses assumes mastery of two years of high school algebra.

A minimum grade of C- is required to meet the prerequisite requirement for any course except with permission of the department.

**Note:** Courses that are prerequisites for higher-level courses may not be taken for credit or quality points if the higher-level course has been satisfactorily completed.

Many students are qualified, as a result of having studied calculus in high school, to begin their major with MATH 1900, Analytic Geometry and Calculus II, or MATH 2000, Analytic Geometry and Calculus III. These students are urged to consult with the department before planning their programs. Credit for MATH 1800, Analytic Geometry and Calculus I, will be granted to those students who complete MATH 1900 with a grade of C- or better.

Similarly, students who are ready to begin their computer science studies with CMP SCI 2250, Programming and Data Structures, will be granted credit for CMP SCI 1250, Introduction to Computing, once they complete CMP SCI 2250 with a grade of C- or better.

Candidates for the B.S. Computing Technology degree must complete the following courses:

**Core**

- CMP SCI 1000 Computer Science Experiences 1
- CMP SCI 1250 Introduction to Computing 3
- CMP SCI 2250 Programming and Data Structures 3
- CMP SCI 2261 Object-Oriented Programming 3
- CMP SCI 2700 Computer Organization and Architecture 3
- CMP SCI 2750 Linux Environment and Programming 3
- CMP SCI 3010 Web Programming 3
- CMP SCI 3702 Introduction to Cyber Threats and Defense 3
- or CMP SCI 3780 Software Security 3
- CMP SCI 4010 Advanced Web Development with Java 3
- CMP SCI 4500 Introduction to the Software Profession 3
- CMP SCI 4610 Database Management Systems 3
- INFSYS 3844 Developing Business Applications in .NET 3
- INFSYS 3868 Secure Software Development 3

**Computer Science Electives**

Select six more elective computer science courses, numbered 3000 and above. (May use up to two information system courses as part of this requirement with permission of the department chair.) 18

**Mathematics and Statistics**

- MATH 1320 Introduction to Probability and Statistics 3
- MATH 3000 Discrete Structures 3
- MATH 1100 Basic Calculus 3
- or MATH 1800 Analytic Geometry and Calculus I 3-5

**Additional Skills**
Learning Outcomes

Upon completion of the program, graduates will be able to:

- Apply algorithmic principles to solve a variety of computational problems
- Analyze computing problems, their size and scope, and input-output requirements
- Compare alternative solutions to computing problems
- Use multiple general-purpose programming languages for solving computational problems
- Design, implement (code) and document solutions to computational problems, especially for business applications
- Design, evaluate, and manage information technology infrastructure in an organization
- Create secure software systems that meet specified needs
- Work effectively in teams to design and implement solutions to computational problems
- Effectively communicate computing technology concepts and solutions, verbally and in writing
- Recognize and promote the professional, social, ethical and legal issues and responsibilities in the computing / software profession

Total Hours: 123

<sup>1</sup> INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

Please Note: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Conservation Biology Undergraduate Certificate

The Certificate in Conservation Biology is a multidisciplinary program of study integrating theoretical and applied topics associated with conservation biology. The certificate is intended for undergraduate students with majors in biology or in any other field who wish to develop a specialization in conservation. The certificate is offered by the Department of Biology in cooperation with the departments of Anthropology, Economics, History, Philosophy, and Political Science. Building on a core curriculum, students can elect courses from these departments to complete their requirements. Regularly enrolled undergraduates at UMSL or individuals with baccalaureate degrees who wish to receive a Certificate in Conservation Biology are eligible to participate in the conservation certificate program. To participate, students should design their program in consultation with their regular academic advisor and the Biology faculty professor of record for the certificate program. Guidelines for admission to the certificate program are also available. Individuals with baccalaureate degrees who are interested in this certificate must apply to the university as unclassified undergraduates. The certificate requires completion of 21 credit hours, outlined below. Students should consult the Bulletin with regard to prerequisites for any of the courses listed here.

Learning Outcomes

Upon successful completion of the Conservation Biology Certificate program, students will be able to:

- Demonstrate knowledge of the principles of evolution, and wildlife and conservation biology and how they are used to manage wildlife and solve environmental problems
- Integrate aspects of social, political, and economic sciences to recognize and solve problems related to biological conservation
- Design conservation biology focused experiments and research protocols
- Collect field data using best-practice procedures
- Analyze conservation data and present evidence to scientific and lay audiences
- Synthesize conservation plans that incorporate traditional knowledge and diverse perspectives
- Apply research findings to the practical realities of managing regulated species

Corporate Controllership Graduate Certificate

Program Description

The Graduate Certificate in Corporate Controllership provides students with the skills to succeed in corporate financial management. Topics emphasized include cost behavior and control, budgeting, forecasting, financial analysis, and business analytics.

Admission Requirements

Applicants must meet general University of Missouri-St. Louis Graduate School admissions requirements.

Certificate Requirements

All course prerequisites and all course waivers are applicable. Substitute courses may be approved by the appropriate department chairperson and the Director of Graduate Business Programs. All 12 credit hours taken as part of this certificate transfer to the MBA degree program.

Counseling MEd, Clinical Mental Health Emphasis

Mission

The Clinical Mental Health Counseling Program of the Department of Education Sciences and Professional Programs prepares professional counselors, including mental health, career, addictions, couples/family, and child and adolescent counselors, to serve the mental health needs of culturally diverse individuals, groups, couples, and families in need. The program’s outreach extends to schools, colleges and universities, community based organizations, business and industry, as well as independent practice. The program strives to develop a culturally diverse student population and to draw students from local, regional, national, and international locations.

Purpose

The M.Ed. in Clinical Mental Health Counseling program prepares clinical mental health counselors for positions in community colleges, universities, employment agencies, vocational rehabilitation agencies, probation and parole work, juvenile detention, alcoholism and drug abuse clinics, career planning and placement centers, community mental health agencies, family and children services, and various federally funded public service projects. Additionally, graduates are employed in career development, and business and industry positions, especially in training and personnel areas. Others have moved into roles calling for research and evaluation skills. The program is designed to fulfill entry-level program standards of preparation. It also is intended to enable program graduates to apply for the Missouri License for Professional Counselors.

Admission

In addition to meeting the general admission requirements of the Graduate School, applicants to the M.Ed. must complete the program supplemental application, have two completed references on file, have an undergraduate GPA of 3.0, and upon admission will take CNS ED 6010, Theories of Counseling, in their first semester. Admissions will be conducted twice a year. The deadlines for application are March 1 for the fall semester and October 1 for the spring semester.

Since it is the objective of the counseling faculty to identify students with low potential for competent practice as early as possible and to initiate the necessary procedures for dealing with such students, faculty of the counseling program reserve the right to review students at any stage of their coursework. A U (Unsatisfactory) in any clinical course or any grade less than a B- in these core counseling courses will automatically trigger a review process by the Counseling Review Board.

Restrictions for graduate students (see the “graduate study” rules in this Bulletin) must attain a 3.0 GPA in the 12 hours of course work at UMSL. Restricted students must include the following course in the first 12 hours of coursework: CNS ED 6010: Theories of Counseling and CNS ED 6020: Ethical and Professional Issues in Counseling. A student on restricted status earning any grade less than a B- in either of these courses but still maintaining a 3.0 GPA, will be allowed to repeat the course one time and must earn a grade of B- or better to be fully admitted.

Master of Education: Emphasis in Clinical Mental Health Counseling

The clinical mental health counseling emphasis prepares professionals for work in community settings, universities, and businesses. Graduates are eligible for the Missouri Licensed Professional Counselor and National Certified Counselor credentials.

One course from the advanced multicultural cognate which includes:

- CNS ED 6810: Integrating Religion and Spirituality in Counseling
- CNS ED 6820: Counseling Women Toward Empowerment
- CNS ED 6830: Counseling African American Clients
The candidate learning outcomes of the school and clinical mental health counseling programs are to:

1. Be self-aware and sensitive to their clients as people who exist in the context of different cultures and races and people who are potentially at risk.
2. Be able to flexibly and skillfully construct and apply theory and techniques to fit the changing needs of clients both individually and in groups, within school, community, and/or clinical mental health settings.
3. Be proficient with the understanding and human relations skills necessary to consult as part of a team effort, within a school, community, and/or mental health setting.
4. Be prepared to help individuals meet developmental concerns and needs both individually and in a variety of developmental group programs, within a school, community, or clinical mental health setting.
5. Be knowledgeable about career development and the use of appraisal instruments and test interpretation and their impact on individual planning.
6. Be knowledgeable about research methods and research literature.
7. Value developing professional expertise as a lifelong process.

### Counseling MEd, Elementary Emphasis

#### Mission

The School Counseling Program of the Department of Education Sciences and Professional Programs prepares professional school counselors to serve the academic, career, and personal/social needs of culturally diverse students in the elementary, middle, and secondary schools. The Counseling Program strives to develop a culturally diverse student population and to draw students from local, regional, national, and international locations.

#### Purpose

The M.Ed. in School Counseling degree prepares students to work as school counselors in public or private elementary, middle, or high school settings. Preparation is designed to enable students to deliver counseling services to schools and their extended communities. Students are trained to apply principles of learning, human development, counseling, research, and measurement within the schools. The program is approved by the Missouri Department of Elementary and Secondary Education. Students wishing to receive Missouri certification in Elementary School Counseling or Secondary School Counseling must complete all required courses. Students not possessing a teaching certificate must complete additional coursework to complete their certification requirements.

#### Admission

In addition to meeting the general admission requirements of the Graduate School, applicants to the M.Ed. must complete the program supplemental application, have two completed references on file, have an undergraduate GPA of 3.0, and upon admission will take CNS ED 6010, Theories of Counseling, in their first semester. Admissions will be conducted twice a year. The deadlines for application are March 1 for the fall semester and October 1 for the spring semester.

Since it is the objective of the counseling faculty to identify students with low potential for competent practice as early as possible and to initiate the necessary procedures for dealing with such students, faculty of the counseling program reserve the right to review students at any stage of their coursework. A U (Unsatisfactory) in any clinical course or any grade less than a B- in these core counseling courses will automatically trigger a review process by the Counseling Review Board.
CNS ED 6380  Clinical Mental Health Counseling Field Experience

The Counseling Review Board process, however initiated, may result in the termination of the student’s degree program or other required or recommended remedies to address deficiencies judged by the Counseling Review Board as related to the skills that are essential to the development of competent and ethical practices as a professional counselor.

Students admitted to the M.Ed. degree programs in counseling as "restricted graduate students" (see the "graduate study" rules in this Bulletin) must attain a 3.0 GPA in the 12 hours of course work at UMSL. Restricted students must include the following courses in the first 12 hours of coursework: CNS ED 6010: Theories of Counseling and CNS ED 6020: Ethical and Professional Issues in Counseling. A student on restricted status earning any grade less than a B- in either of these courses but still maintaining a 3.0 GPA, will be allowed to repeat the course one time and must earn a grade of B- or better to be fully admitted.

The courses listed below meet the coursework requirements for the M.Ed. degree, state certification as a school counselor, and licensing as a professional counselor:

Psychological Foundations and Human Development
Counselors have professional preparation in the theory and practice of counseling, treatment planning, and career development.

The candidate learning outcomes of the school and clinical mental health counseling programs are to:

- Be prepared to function effectively and ethically as counselors in a variety of professional settings which includes school, community, and clinical mental health settings.
- Be self-aware and sensitive to their clients as people who exist in the context of different cultures and races and people who are potentially at risk.
- Be able to flexibly and skillfully construct and apply theory and techniques to fit the changing needs of clients both individually and in groups, within school, community, and/or clinical mental health settings.
- Be proficient with the understanding and human relations skills necessary to consult as part of a team effort, within a school, community, and/or mental health setting.
- Be prepared to help individuals meet developmental concerns and needs both individually and in a variety of developmental group programs, within a school, community, or clinical mental health setting.
- Be knowledgeable about career development and the use of appraisal instruments and test interpretation and their impact on individual planning.
- Be knowledgeable about research methods and research literature.
- Value developing professional expertise as a lifelong process.

Creative Writing MFA

Master of Fine Arts in Creative Writing

The application process is identical to that for the master of arts degree, with these exceptions: there is one annual deadline for all applications, Feb. 15; a writing sample is required (15-20 poems or 20-40 pages of fiction); the GRE test is required only if the applicant seeks financial aid or a teaching assistantship.

In addition to the Graduate School requirements, students must complete at least 39 hours, 30 of which must be in 5000-level courses. Nine hours may be taken in 4000-level courses approved by the department and Graduate School. Students will specialize in one genre, poetry or fiction. They must complete the following course work: 15 hours of fiction; the GRE test is required only if the applicant seeks financial aid or a teaching assistantship.

State Certification

Although not a degree requirement, a passing score on the relevant examinations required by the Missouri Department of Elementary and Secondary Education is also required for state certification as a school counselor and must be achieved before the student can be recommended by the Counseling Program for such certification. In addition, students who do not hold a state certification as a teacher must also take the following courses in addition to their M.Ed. in School Counseling program in order to be recommended by the Counseling Program as a school counselor.

Learning Outcomes

The Master of Education in Counseling programs prepare professionals to work in educational settings - elementary, middle, or high schools - as school counselors or in clinical settings - clinics, community mental health centers, or private practice - as clinical mental health counselors.
5. ENGL 5190, literary journal editing, a second time
6. Any other graduate level class in literature, linguistics, or composition offered by the Department of English
7. 5200-MFA readings course, or an independent study-IF you can find someone to work with you.
8. Up to 3 (9 hours) of 4000 level undergrad lit or linguistics classes offered by the Department of English, recommended especially for those without an English background.
9. One three hour class outside the Department of English, at least a 4000 level, and with all needed permissions from both departments that will enhance the student’s writing.

Complete information may be found in The Master of Fine Arts in Creative Writing, available from the English department.

Creative Writing Undergraduate Certificate

Requirements

Students earn the Certificate in Creative Writing by completing 18 hours in selected writing courses with a grade point average of 3.0 or better. Twelve of the 18 hours must be taken at the University of Missouri-St. Louis. Courses may not be taken on a satisfactory/unsatisfactory basis.

Students in the creative writing emphasis produce original fiction or poetry. Courses in creative nonfiction, editing, feature writing and copywriting may also be taken for this emphasis.

Students should choose courses for the certificate with the guidance of the Writing Certificate Coordinator. Students electing ENGL 4890 as part of the certificate should meet with the coordinator to arrange the internship.

To receive this certificate, the student must take 18 hours chosen from the courses listed below, including a Capstone course.

Select at least two of the following courses (at least one must be a 4000-level course):

<table>
<thead>
<tr>
<th>Course</th>

<td>Feature Writing</td>
<td>3</td>
</tr>
<tr>
<td>ENGL 4860</td>
<td>Editing and the Production Process</td>
<td>3</td>
</tr>
</tbody>
</table>

Capstone Course

Students may use ENGL 4895, ENGL 4890, ENGL 4140, or ENGL 4130 as their capstone course. If ENGL 4890 is used, it will be an internship in literary publishing, feature writing, or advertising copywriting. To use ENGL 4130 or ENGL 4140, the student must obtain the teacher’s permission and do extra work in the course. The Editing ‘Litmag course, ENGL 4895, may also be used as the final course for this certificate.

When the student has completed requirements for the certificate, the coordinator will notify the university registrar and the college from which the student will graduate. Upon the student’s graduation, completion of the Creative Writing Certificate will be noted on the official transcript and a certificate will be mailed to the student’s residence. Students who have graduated before completing the Creative Writing Certificate will receive the certificate in the mail and will have the certificate entered on their official transcripts.

Learning Outcomes

Upon completion of the program, certificate earners will be able to:

- Identify and execute particular techniques of the genre, such as characterization, plot, dialogue, metaphor, meter, and rhyme
- Improve, sharpen, and extend these techniques in their own writing through revision
- Demonstrate practice in multiple creative writing genres
- Reflect on their own work in the context of literary traditions and aesthetic points of view
- Possess the ability to critically read and analyze the work of others
- Incorporate constructive criticism into the revising process
- Provide critical feedback to other writers during their creative process
- Experiment with literary traditions to break tradition
- Explain how different genres inform and intersect with one another
- Pursue ideas, techniques, and forms that are outside their comfort zone
- Demonstrate how professional publishing and editing functions, including how and where to send their work for publication
- Market their skills set as creative writers for employment
Criminology and Criminal Justice BS

The interdisciplinary curricula unify a body of knowledge from criminology, social science, law, public administration, and corrections, and provide the student with an understanding of the assumptions, values, and processes of the system of justice. Many pre-law students choose criminology and criminal justice as an undergraduate major because of the excellent preparation offered for law school.

General Education Requirements

Majors must satisfy the university and college general education requirements (p. 51). Foreign language proficiency is not required, although students are encouraged to take foreign language courses. Majors may not take the following courses on a satisfactory/unsatisfactory basis: criminology and criminal justice courses; SOC 3220, Quantitative Techniques in Sociology; or SOC 3230, Research Methods. Additionally, substitutions approved by departmental advisers for these courses may not be taken on a satisfactory/unsatisfactory basis.

Declaring the Criminology and Criminal Justice Major

Students must complete the following courses before declaring the major:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CRIMIN 1100</td>
<td>Introduction to Criminology and Criminal Justice</td>
<td>3</td>
</tr>
<tr>
<td>CRIMIN 1110</td>
<td>Theories of Crime</td>
<td>3</td>
</tr>
<tr>
<td>CRIMIN 2210</td>
<td>Research Methods in Criminology and Criminal Justice</td>
<td>3</td>
</tr>
<tr>
<td>CRIMIN 2220</td>
<td>Statistical Analysis in Criminology and Criminal Justice</td>
<td>4</td>
</tr>
</tbody>
</table>

1 Students must successfully complete CRIMIN 2220 with a grade of C- or better within three attempts.

Degree Requirements

Courses used to fulfill the social science or state requirements may not be taken from courses in the major. Students may register for 3000-5000 level courses only after completing ENGL 3100 (Advanced Expository Writing).

Students may register for 3000-5000 level courses only after prerequisites have been satisfied or after obtaining a signature from the adviser in criminology and criminal justice or consent of the instructor.

Criminology majors may not take course numbers 1100, 2260, or 3345 offered through UM-Independent Studies to fulfill degree requirements in the major.

Core Curriculum

Bachelor of Science in Criminology and Criminal Justice candidates must complete the core curriculum listed below:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CRIMIN 1100</td>
<td>Introduction to Criminology and Criminal Justice</td>
<td>3</td>
</tr>
<tr>
<td>CRIMIN 1110</td>
<td>Theories of Crime</td>
<td>3</td>
</tr>
</tbody>
</table>

Expected Learning Outcomes

- Students will demonstrate critical thinking to reflect a depth, breadth and integration of knowledge in the key areas of criminology and criminal justice, law, theory, research methods, statistics, and criminal justice policy.
- Students will demonstrate an understanding of the three areas of the criminal justice system: policing, courts, and corrections.
- Students will analyze the role that class, race, gender and culture play in crime and criminal justice.
- Students will be able to evaluate and report research findings and data in a professional and ethical manner.
- Graduates will be able to formulate and assess research questions, recognize the need for information and the knowledge to procure that information from relevant scholarly literature and
In Criminology and Criminal Justice in as few as 10 semesters. The BS program that allows students to simultaneously earn their BS and their MA degree.

The Department of Criminology and Criminal Justice offers a 2+3 degree BS/MA Dual Degree Program.

Students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Total Hours: 120

1. INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

PLEASE NOTE: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

### Eligibility

Students will need to have fulfilled the core curriculum requirements (p. 400) prior to applying for the 2+3 program, with the exception of CRIMIN 4390 (Seminar in Criminology and Criminal Justice).

#### Junior/Senior Year Courses (taken in graduate status)

<table>

</thead>
<tbody>
<tr>
<td>CRIMIN 6410</td>
<td>Statistical Applications in Criminology and Criminal Justice</td>
<td>3</td>
</tr>
</tbody>
</table>

Any two 6000-level electives in CRIMIN: 6

Total Hours: 18

NOTE: A student must obtain permission from the 2+3 Program Director to take a 4000-level course and 6000-level course as two separate courses when they have the same name (e.g., CRIMIN 4350 Victimology and CRIMIN 6448 Victimology).

### Admission

Admission to the 2+3 Program is a two-step process.

#### Provisional Admission

Applicants are considered for provisional admission if they meet the following four criteria:

1. earned 60 hours as an undergraduate
2. completed the core curriculum requirements for the Criminology and Criminal Justice major, with the exception of CRIMIN 4390
3. have a minimum GPA of 3.0, with a B or better in CRIMIN 2220 (Statistics) and CRIMIN 2210 (Research Methods)
4. have met with both the Undergraduate and 2+3 Directors in CRIMIN. Second semester seniors will not be considered for the 2+3 degree program.

The 2+3 Program Director, in consultation with the Undergraduate Director, will determine whether the student can apply for provisional status. Courses taken in provisional status do not count towards the 30 credit hours needed for the 2+3 degree. Therefore, it is recommended to apply for provisional status as a junior, preferably in the first semester of junior year.

**Formal Admission**

Applicants are considered for formal admission to the graduate school each semester after being granted provisional status. Thus, students should meet with the 2+3 Program Director each semester.

Applicants are considered for formal admission if they meet the following four criteria:

1. earned at least 90 hours as an undergraduate;
2. have a minimum GPA of 3.0 since being granted provisional status;
3. submitted at least one letter of recommendation from an UMSL Criminology and Criminal Justice professor; and
4. have met with the 2+3 Program Director in Criminology and Criminal Justice.

The 2+3 Program Director, in consultation with the Undergraduate Director, will determine whether the student can apply for formal admission. Final decisions concerning formal admission are made by the Program Director in consultation with the Graduate School. Students admitted at this stage are conferred graduate status and may take courses intended for graduate credit at this time. Students in graduate status are required to pay graduate student tuition fees.

Both the Bachelor’s and Master’s degrees will be awarded at the end of the 2+3 program. Formal 2+3 Program students must maintain a cumulative GPA of 3.0 or higher throughout the 30 credit hours of the combined program. Students may resign from the 2+3 Program and apply for the Bachelor’s degree. However, once the Bachelor’s degree is awarded, the benefit of “double counting” courses will be lost. Any course used to meet a degree requirement for an undergraduate degree cannot be applied to a subsequent Master’s degree.

**Criminology and Criminal Justice MA**

The department offers a Master of Arts degree in Criminology and Criminal Justice, which provides students with advanced theoretical and methodological training for research and management careers in criminal justice.

**Admission Requirements**

The minimum GPA for regular admission to graduate study is 3.0 on a 4-point scale and students are expected to begin their course of study in the Fall semester. Admission is competitive.

**Degree Requirements**

The M.A. in Criminology and Criminal Justice requires the completion of 30 credit hours, at least 21 of which are required to be in courses housed in the Department of Criminology and Criminal Justice. 12 of these hours represent the core of the curriculum. Students may choose between a thesis and nonthesis course of study. Students whose cumulative GPAs fall below 3.0 after 9 or more hours of work will be placed on probation and given one semester to raise their cumulative GPAs to at least the 3.0 threshold.

**Expected Learning Outcomes**

- Develop a comprehensive understanding of the theories, methods and substance of issues in criminology and criminal justice and demonstrate an ability to synthesize knowledge in these areas.
- Develop a comprehensive understanding of interdisciplinary underpinnings (e.g., from sociology, psychology, political science, economics) of criminology and criminal justice issues and policies.
- Develop critical thinking and communication skills through the application of criminological theory and social science research methods.
- Develop a comprehensive understanding of the structure and functioning of the fundamental institutions (e.g., legislatures, police, punishment, supervisory) that are part of criminal justice systems.
- Develop comprehensive understanding of the role of research and its application for informing policies about criminal justice issues.

**Plan of Study**

- Required Coursework (12 hours)
  
  | CRIMIN 5415 | Foundations of Criminological Theory (core) | 3 |
  | CRIMIN 6400 | Proseminar (core) | 3 |
  | CRIMIN 6405 | Methods (core) | 3 |
  | CRIMIN 6410 | Statistical Applications in Criminology and Criminal Justice (core) | 3 |

- Electives (9 hours)
  
  Nine elective hours of coursework are required; some or all of these credits may be earned in Criminology and Criminal Justice 6000 level seminars not counted toward the 21 hour requirement. Students may take a maximum of two 4000-level courses in partial fulfillment of this requirement but they must have the prior approval of the Graduate Committee. All electives taken outside the College of Arts and Sciences also must receive prior approval of the Graduate Committee.

**Transfer Courses**

Transfer courses are evaluated for acceptance on a case-by-case basis subject to the rules and regulations of the Graduate School. A maximum of 10 credit hours earned at other institutions can be credited toward the UMSL M.A. degree in Criminology and Criminal Justice.

**Learning Outcomes**

**Without Thesis**

Upon completion of the program, graduates will be able to:

- Demonstrate a thorough understanding of theory, methods, and substantive literature of criminology and criminal justice, and the interconnections between social theory, research, and policy.
- Demonstrate a thorough understanding of the research methods of criminology and criminal justice.
• Demonstrate a thorough understanding of the structure and functioning of the fundamental institutions (e.g., legislatures, police, punishment, supervisory) that are part of criminal justice system
• Analyze the role that social structure (e.g. race, class, gender, etc.) plays in crime and criminal justice
• Assess research questions, recognize the need for information and the knowledge to procure that information from relevant scholarly literature and databases, design research projects grounded in theory and scholarship, and evaluate data critically
• Be knowledgeable users of scientific research related to a wide range of criminology and criminal justice issues

With Thesis

Upon completion of the program, graduates will be able to:

• Demonstrate a thorough understanding of theory, methods, and substantive literature of criminology and criminal justice, and the interconnections between social theory, research, and policy
• Analyze the role that social structure (e.g. race, class, gender, etc.) plays in crime and criminal justice
• Formulate and assess research questions, recognize the need for information and the knowledge to procure that information from relevant scholarly literature and databases, design research projects grounded in theory and scholarship, and evaluate data critically
• Use scientific research related to a wide range of criminology and criminal justice issues
• Apply scientific research methods to produce original, theoretically relevant, and socially important criminological research
• Conduct research in accordance with the highest ethical standards and scientific integrity
• Effectively translate and communicate scientific findings effectively, in both oral and written forms

Criminology and Criminal Justice Minor

Requirements for the Minor

The minor has been designed to ground students in the basics of criminology and criminal justice.

All minor candidates must take: 3

| CRIMIN 1100 | Introduction to Criminology and Criminal Justice |
| CRIMIN 1110 | Theories of Crime |
| CRIMIN 1120 | Criminal Law |
| CRIMIN 2130 | Criminal Justice Policy |

The candidate must then select two of the following: 6

| CRIMIN 2220 | Statistical Analysis in Criminology and Criminal Justice |
| CRIMIN 4390 | Seminar in Criminology and Criminal Justice |

Candidates must then complete 6 hours of criminology and criminal justice course work at the 2000 level or above. 6

Total Hours 15

If used for the minor, candidates must earn a minimum grade of (C-) in the following courses: CRIMIN 2220 Statistical Analysis in Criminology and Criminal Justice, and CRIMIN 4390 Seminar in Criminology and Criminal Justice

Candidates must also have a cumulative grade point average of 2.0 or better in the minor. None of the courses may be taken on a satisfactory/unsatisfactory (s/u) basis.

Expected Learning Outcomes

A Minor in Criminology and Criminal Justice (CCJ) will expose students to some of the same learning outcomes as the BA, thereby providing a foundation for pursuit of the BA if desired. The Minor in CCJ will also offer students the opportunity to advance their current criminology or criminal justice careers or pursue a new or more advanced career path.

• Students will be able to describe the structure and functioning of the fundamental institutions (e.g., police, courts, corrections) that comprise the criminal justice system in the United States.
• Students will be able to define basic laws, legal concepts, constitutional requirements, and legal procedures relevant to criminal justice professionals in the United States.
• Students will critically assess and evaluate contemporary issues and research in criminology and criminal justice.
• Students will be able to define and explain the major criminological and criminal justice theories, thereby helping them to better understand causes of crime and criminal behavior.
• Students will actively apply their theoretical knowledge and academic skills by formulating basic research hypotheses, conducting basic criminological research, and completing academic writing assignments and exams.

Criminology and Criminal Justice PhD

Ph.D. Program in Criminology and Criminal Justice

Eligibility

Undergraduate applicants must have a baccalaureate degree or expect one by the end of the academic year in which they apply. Applicants must have a grade point average of 3.0 or greater (on a scale of A = 4.0) for the last 60 hours of undergraduate work. Admission is competitive.

Graduate applicants who have or will have a master's degree must have a grade point average of 3.0 or greater (on a scale of A = 4.0) for their graduate course work.

Application

To consider an applicant for admission, the Department of Criminology and Criminal Justice must have transcripts, three letters of recommendations, GRE scores, statement of purpose, and a writing sample. Applicants with master's degrees should include a chapter of their thesis. International students whose native language is not English are required to submit scores from the TOEFL examination.

Amount of Course Work

Sixty post-baccalaureate hours of graduate work are required for the Ph.D. More than half of these hours must be completed in residence. A minimum of six credit hours of dissertation research (CRIMIN 7499) are required. Students may enroll for dissertation credits (CRIMIN 7499) only when all other degree requirements have been completed.

</tr>
</tbody>
</table>

Area Courses

At least nine hours beyond those required must be taken at the 5000-level or higher within the CCJ Department.

Electives

Three additional courses beyond the above requirements are taken as elective courses.

Qualifying Examination

Graduate students in the Ph.D. program do not become recognized as Ph.D. candidates until they have passed the qualifying examination. The goals of the qualifying examination are to assess the student's familiarity with substantive literature, theory and methods of criminology and criminal justice and to evaluate the student's intellectual imagination and ability to apply knowledge to broad criminological questions.

Further information about the qualifying exam is available from the department.

The Dissertation

The dissertation is required of all Ph.D. candidates and demonstrates the student's scholarly expertise. The dissertation process formally begins when all other requirements of the Ph.D. program have been met. The dissertation committee assists in selecting and developing the research problem and evaluates the student's work on that problem.

Learning Outcomes

Upon completion of the program, graduates will be able to:

- Demonstrate a mastery of theory, methods, and substantive literature of criminology and criminal justice, and the interconnections between social theory, research, and policy
- Analyze the role that social structure (e.g., race, class, gender, etc.) plays in crime and criminal justice
- Critically synthesize and analyze the nature, scope, and determinants of major criminological problems and identify gaps for further inquiry
- Independently apply scientific research methods and empirical analyses to produce high-quality original, theoretically relevant, and socially important criminological research
- Conduct independent high-quality research in accordance with the highest ethical standards and scientific integrity
- Effectively translate and communicate scientific findings effectively, in both oral and written forms

Expected Learning Outcomes

The Certificate in Criminology and Criminal Justice (CCJ), which is three more hours than the Minor, provides students the opportunity to identify and select more advanced (higher level) courses than required for the Minor, thereby allowing students the opportunity to grasp a more comprehensive theoretical understanding of crime and responses to it.

Students earning a Certificate in CCJ Students will have greater latitude, than provided by the Minor, to select courses that focus in specific areas in CCJ. This includes courses that address subjects such as: criminal justice policy; the role and experience of the victim; the role that race, gender and/or culture play in crime and criminal behavior; focusing on specific forms of criminal behavior (e.g., violent, property, drug, computer…).
• Students will acquire knowledge to employ critical thinking skills when evaluating issues in criminology and criminal justice
• Students will be able to describe the structure and functioning of the fundamental institutions (e.g., police, courts, corrections) that comprise the criminal justice system in the United States.
• Students will critically assess and evaluate contemporary issues and research in criminology and criminal justice.
• Students will be able to draw on relevant criminological theory and assess the application of such theory to the complexity of crime analysis.
• Students earning a Certificate in CCJ will be able to develop an assessment plan for an academic major or program and/or assist them in selecting a career path.
• Students earning a Certificate in CCJ will explore and focus on specific advanced areas of crime and criminal justice that are appropriate for graduate school preparation and career advancement.

Cybersecurity BS, Computer Science Emphasis

Bachelor of Science (B.S.) in Cybersecurity

Degree Requirements

Students must choose one of the following emphasis areas at the time of application for admission.

• Computer Science (CS) Emphasis (total 120 credit hours)
• Information Systems (IS) Emphasis (total 123 credit hours)

Degree requirements vary depending on the chosen emphasis area (see common and emphasis area required courses and credit hours below).

General Education Requirements

Students must satisfy the university general education requirements. (p. 51) Many of the courses for the degree may be used to fulfill general education requirements. There is no foreign language requirement for this degree.

Satisfactory/Unsatisfactory Option

Courses required for the major may not be taken on a satisfactory/unsatisfactory basis.

Required Courses

The degree requires 33 credit hours of core coursework applicable to both emphasis areas. Emphasis specific required courses are listed below. Please see 4-year degree plans for recommend course sequences within each emphasis.

Computer Science Emphasis

In addition to the 33 credit hours of core required coursework, the B.S. Cybersecurity degree with Computer Science emphasis requires 42-44 credit hours of emphasis specific course work. Thus, candidates for the B.S. in Cybersecurity degree with Computer Science emphasis must complete a major program of 75-77 (33 core + 42-44 emphasis specific) credit hours of required courses.

For the Computer Science emphasis all general degree requirements from the College of Arts and Science apply.

INFSYS 3858  Advanced Security and Information Systems
INFSYS 3898  Seminar in Information Systems
Other electives upon approval of Computer Science department chair

Total Hours  42-44

Information Systems Emphasis
In addition to the 33 credit hours of core required coursework, the B.S. Cybersecurity degree with Information Systems emphasis requires 75 credit hours of emphasis specific coursework (48 general business + 27 program specific). Thus, candidates for the B.S. in Cybersecurity degree with Information Systems emphasis must complete a program of 108 (33 core + 75 emphasis specific) credit hours of required courses.

For the Information Systems emphasis all general degree requirements from the College of Business Administration apply.

INFSYS 3820  Introduction to Systems Administration  3
INFSYS 3842  Data Networks and Security  3
INFSYS 3806  Managerial Applications of Object-Oriented Programming I  3
INFSYS 3815  Object-Oriented Applications in Business  3
INFSYS 3845  Database Management Systems  3
INFSYS 3858  Advanced Security and Information Systems  3
SCMA 4347  Introduction to Project Management  3

Major Specific Electives (choose 2 from following)  6
BUS AD 3090  Internship in Business Administration
INFSYS 3830  Data Programming
INFSYS 3862  Artificial Intelligence Applications for Business
INFSYS 3864  Applied Cryptography for Business
INFSYS 3898  Seminar in Information Systems  1
CMP SCI 4782  Information Security
CMP SCI 4750  Introduction to Cloud Computing
SCMA 3345  Predictive Analytics and Data Mining
SCMA 4350  Prescriptive Analytics and Optimization
SCMA 3376/MKTG 3776  Transportation Security and Risk
Other electives upon approval of Information Systems department chair

Total Hours  27

1  If course is offered and topic is approved by the Information Systems department chair

Learning Outcomes
1. Understand and describe the Confidentiality, Integrity, and Availability security objectives and key security principles that enable the development of security mechanisms
2. Demonstrate an understanding of physical, data link, network, transport, and application layers of data networking and identify potential information security pitfalls at each layer
3. Describe important secure software development principles and common web application security vulnerabilities
4. Describe common applications of cryptographic, network, application, and systems security defense mechanisms to improve information security
5. Understand the role of systematic information security risk management in fostering information security within organizations and the role of management and control frameworks such as NIST Special Publications and ISO 27000 series standards in doing so.

Total Hours: 120
INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

PLEASE NOTE: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Cybersecurity BS, Information Systems Emphasis

Bachelor of Science (B.S.) in Cybersecurity

Degree Requirements

Students must choose one of the following emphasis areas at the time of application for admission.

- Computer Science (CS) Emphasis (total 120 credit hours)
- Information Systems (IS) Emphasis (total 123 credit hours)

Degree requirements vary depending on the chosen emphasis area (see common and emphasis area required courses and credit hours below).

General Education Requirements

Students must satisfy the university general education requirements. Many of the courses for the degree may be used to fulfill general education requirements. There is no foreign language requirement for this degree.

Satisfactory/Unsatisfactory Option

Courses required for the major may not be taken on a satisfactory/unsatisfactory basis.

Required Courses

The degree requires 33 credit hours of core coursework applicable to both emphasis areas. Emphasis specific required courses are listed below. Please see 4-year degree plans for recommend course sequences within each emphasis.

**Required Core Courses**

**Computer Science Emphasis**

In addition to the 33 credit hours of core required coursework, the B.S. Cybersecurity degree with Computer Science emphasis requires 42-44 credit hours of emphasis specific course work. Thus, candidates for the B.S. in Cybersecurity degree with Computer Science emphasis must complete a major program of 75-77 (33 core + 42-44 emphasis specific) credit hours of required courses.

For the Computer Science emphasis all general degree requirements from the College of Arts and Sciences apply.

Total Hours 42-44
Information Systems Emphasis

In addition to the 33 credit hours of core required coursework, the B.S. Cybersecurity degree with Information Systems emphasis requires 75 credit hours of emphasis specific coursework (48 general business + 27 program specific). Thus, candidates for the B.S. in Cybersecurity degree with Information Systems emphasis must complete a program of 108 (33 core + 75 emphasis specific) credit hours of required courses.

For the Information Systems emphasis all general degree requirements from the College of Business Administration apply.

INFSYS 3820 Introduction to Systems Administration 3
INFSYS 3842 Data Networks and Security 3
INFSYS 3806 Managerial Applications of Object-Oriented Programming 3
INFSYS 3815 Object-Oriented Applications in Business 3
INFSYS 3845 Database Management Systems 3
INFSYS 3858 Advanced Security and Information Systems 3
SCMA 4347 Introduction to Project Management 3

Major Specific Electives (choose 2 from following) 6
BUS AD 3090 Internship in Business Administration
INFSYS 3830 Data Programming
INFSYS 3862 Artificial Intelligence Applications for Business
INFSYS 3864 Applied Cryptography for Business
INFSYS 3898 Seminar in Information Systems 1
CMP SCI 4782 Information Security
CMP SCI 4750 Introduction to Cloud Computing
SCMA 3345 Predictive Analytics and Data Mining
SCMA 4350 Prescriptive Analytics and Optimization
SCMA 3376/MKTG 3776 Transportation Security and Risk Other electives upon approval of Information Systems department chair

Total Hours 27

1 If course is offered and topic is approved by the Information Systems department chair

Learning Outcomes

Upon completion of the program, graduates will be able to:

- Analyze a complex cybersecurity problem and apply principles of cybersecurity and business decision making to identify potential solutions.
- Design, implement, and evaluate a cybersecurity-based solution to meet a given set of cybersecurity and business requirements.
- Communicate cybersecurity issues effectively in a variety of professional contexts.
- Recognize professional responsibilities and make informed judgments in cybersecurity practice based on legal and ethical principles.
- Function effectively as a member of a team engaged in activities appropriate to the cybersecurity discipline.

- Apply security principles and practices to maintain business operations in the presence of risks and threats.

Total Hours: 127

1 INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

Please Note: This is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Cybersecurity Graduate Certificate

Information security is currently one of the most critical issues facing individuals, organizations, governments, and society. Media reports are replete with breaches of information security and the adverse consequences for all stakeholders involved. Thus, demand for professionals who understand the managerial and technical aspects of information security is growing. However, security is a rather broad field and includes a plethora of interconnected sub-specialties. Students or professionals seeking an entry into this field are often overwhelmed by
its vastness. Further, since security is both a management issue and a technological issue, it is critical that students think about it from both perspectives and develop skills at their intersection.

This multidisciplinary certificate program is designed for students from diverse backgrounds who wish to get a foundation in information security. Given its flexible structure, it allows students to pursue either more technical courses throughout their program or have a mixture of technical and non-technical courses to match their interests and skill-sets.

The University of Missouri-St. Louis holds the prestigious National Center of Academic Excellence in Cyber Defense Education (CAE-CDE) designation granted by the National Security Agency and the U.S. Department of Homeland Security. We are currently one of only two institutions that hold such a designation in the state of Missouri and the only CAE-CDE in the Saint Louis region. UMSL also holds an additional CAE-CDE designation in the Security Policy Development and Compliance focus area.

For more information, please visit http://cybersecurity.umsl.edu or contact the program directors at cybersecurity@umsl.edu.

Admissions Requirements

Applicants must meet the following program admission requirements in addition to the general requirements of the Graduate School.

By the time of enrollment, prospective students must have obtained a baccalaureate degree or the equivalent from an accredited college or university. A minimum GPA of 3.0 on a 4.0 scale is required to be considered for regular admission. This GPA is higher than the minimum for the Graduate School. An undergraduate GPA below 3.0 will be considered on an individual basis for restricted admission. Applicants must demonstrate proficiency in college algebra or the equivalent. Graduate coursework also will be taken into consideration.

Applicants must obtain three letters of recommendation. The letters should be from those who are familiar with your professional and/or academic skills. At least one of the letters must be from a current or former college-level instructor. Written letters of recommendation must accompany the downloadable recommendation forms from the Graduate School. These materials should be sent by the letter writer directly to the Cybersecurity program director of either Computer Science or Information Systems.

Applicants must submit official transcripts to the graduate admissions office documenting the baccalaureate degree and all other prior college and graduate-level coursework completed.

For more information on the program and contact information please visit cybersecurity.umsl.edu.

Certificate Requirements

The Graduate Certificate in Cybersecurity is a six-course (18 credit hours) multidisciplinary program housed in the Graduate School. It is designed to help students from all backgrounds achieve a foundation in information security. It provides students the flexibility to focus on technical and/or managerial aspects of computer, software, network, and information security. With primary courses offered by Computer Science and Information Systems departments, the program also allows students to choose from a range of electives based on student interests. This certificate serves a broad group of managers, technical specialists, and professionals with a bachelor’s degree. A prior background in information security is not required to enter this program.

Requirements

All students must take three required courses and three electives (at least one elective course must be in Computer Science)

Required Courses

- INFSYS 6828 Principles of Information Security 3
- CMP SCI 4730 Computer Networks and Communications 3
  or INFSYS 6836 Management of Data Networks and Security
- CMP SCI 5782 Advanced Information Security 3
  or INFSYS 6858 Advanced Cybersecurity Concepts

Electives

Choose three of the following (at least one must be a CMP SCI course):

- CMP SCI 4700 Computer Forensics
- CMP SCI 4780 Computer and Network Security
- CMP SCI 4792 Mobile and Ubiquitous Computing
- CMP SCI 5020 Android Apps: Android Fundamentals
- CMP SCI 5222 Advanced iOS Apps
- CMP SCI 5732 Cryptography for Computer Security
- CMP SCI 5750 Cloud Computing
- CMP SCI 5794 Security of IoT Systems
- INFSYS 6868 Software Assurance
- INFSYS 6878 Management of Information Security

Total Hours 18

Students may substitute the above courses with other courses upon approval by the graduate program director of either the Computer Science or Information Systems Department. In all cases, 18 hours are needed to complete the Graduate Certificate in Cybersecurity.

A maximum of two (2) 4000-level courses can be taken as part of the graduate certificate. A minimum of four courses must be taken in residence at UMSL. Students may not receive both the Undergraduate and the Graduate Certificate in Cybersecurity.

For more information, students can contact the program directors at cybersecurityUMSL@umsl.edu.

Learning Outcomes

Upon completion of the program, graduates will be able to:

- apply fundamental security principles and formal security models to solve problems in cybersecurity
- develop, maintain, and update an organization’s information security policies to meet security and compliance requirements
- select and execute appropriate security mechanisms to implement security policies of an organization
- communicate cybersecurity issues effectively to a range of audiences and work effectively in a team environment

Cybersecurity Minor

General Requirements
• All minors are 15 credit hours or 5 courses, including business core courses.
• Students must attain a 2.0 grade point average for all courses in the minor.
• Students must attain a minimum grade of C- in each course included in the minor.
• All courses in the minor must be on a graded basis.
• A minimum of 9 credit hours of coursework included in the minor must be taken in residence at UMSL.
• One must complete a baccalaureate degree at UMSL in order for a minor to be conferred.
• A minor may be added for up to two years following completion of the baccalaureate degree.

Specific Requirements for the Minor

The Undergraduate Minor in Cybersecurity is a five-course (15 credit hours) program. It is designed to help students from all backgrounds achieve a foundation in Cybersecurity. It provides students the flexibility to focus on technical and/or managerial aspects of Cybersecurity. The program also allows students to choose from a range of electives based on student interests. This minor serves a broad group of managers, technical specialists, and professionals enrolled in any baccalaureate program also allows students to choose from a range of electives based on student interests. This minor serves a broad group of managers, technical specialists, and professionals enrolled in any baccalaureate degree at UMSL. A prior background in information security is not required to enter this program. This minor may be added for up to two years following completion of the baccalaureate degree.

Requirements: All students must take four required courses and one elective.

Total Hours: 15

Students may substitute the above courses with other courses upon approval by the Chair of the Information Systems department. In all cases, 15 hours are needed to complete the Undergraduate Minor in Cybersecurity. A minimum of four courses must be taken in residence at UMSL.

Learning Outcomes

Upon completion of the program, graduates will be able to:

• Analyze a complex cybersecurity problem and apply principles of cybersecurity and business decision making to identify potential solutions.
• Design, implement, and evaluate a cybersecurity-based solution to meet a given set of cybersecurity and business requirements.
• Describe professional responsibilities and make informed judgments in cybersecurity practice based on legal and ethical principles.
• Communicate with a wide range of audiences about critical challenges and solutions related to cybersecurity.
• Function effectively as a member of a team engaged in activities appropriate to the cybersecurity discipline.

Cybersecurity MS, Computer Science Emphasis

Admission Requirements

Applicants must have at least a bachelor’s degree, preferably in cybersecurity, computer science, information systems, or a related area. Applicants with bachelor’s degrees outside of specified areas must demonstrate significant proficiency by showing competence (proving related academic or professional experience, or taking a test) in the following areas. Courses in parenthesis are UMSL courses that can be used to fulfill the requirement.

1. Programming skills in C/C++ and Java with at least three college semesters or comparable experience (CMP SCI 1250; CMP SCI 2250 and CMP SCI 2261; or INFSYS 3806 and INFSYS 3816)
2. Proficiency with computer organization, architecture, or assembly level programming (CMP SCI 2700)
3. Familiarity with Unix/Linux/OSX and with command-line scripting with tools (CMP SCI 2750)

Students must also have satisfactorily completed mathematics courses equivalent to the following UMSL courses:

1. Survey Calculus or Calculus I (MATH 1100 or MATH 1800)
2. An elementary course in probability or statistics (MATH 1320)
3. A course in discrete mathematics (MATH 3000)

A student missing some of the above requirements may be admitted on restricted status if there is strong supportive evidence in other areas. The student will have to take the missing courses, or otherwise demonstrate proficiency. Special regulations of the Graduate School that apply to students on restricted status are described in the UMSL Bulletin.

Entrance examinations

• The Graduate Record Examination (GRE) General Test is required only to apply for an assistantship (see http://www.gre.org/ttindex.html).
• International students are required to document English proficiency by providing scores from an internationally accepted standardized examination before a decision is made on admission.

Coursework

Candidates for the M.S. in Cybersecurity with Computer Science emphasis must complete 30 credit-hours of graduate coursework, subject to the Graduate School regulations. Of these, at least 18 hours must be numbered 5000 or above. All courses numbered below 5000 must be completed with grades of at least B-. Outside computer science and information systems, up to 6 hours of related course work is allowed upon permission of the Graduate Director.

</tr>
</tbody>
</table>
Admission Requirements

In addition to Graduate School admission requirements, the following requirements apply.

Applicants must have an undergraduate degree with a minimum cumulative GPA of 3.0. Students whose GPAs are between 2.75 and 2.9 may be admitted under a restricted status within the terms specified by the Graduate School.

Prior to entry, students must demonstrate competence in the following areas (through prior course work or professional experience) or take coursework at UMSL to fulfill the entry requirements.

- Business Statistics (similar to undergraduate course SCMA 3300). Students without a background in statistics could take SCMA 5300 as a graduate student to fulfill this requirement.
- At least one semester of computer programming coursework or application development work experience (similar to undergraduate courses INFYS 3806 or INFYS 3844). Students without programming background can take either INFYS 6805 or INFYS 6806 as a graduate student to fulfill this requirement.

Entrance examinations

- The Graduate Management Admission Test (GMAT) is not required for admission. However, it may be used by students when their overall GPA is below 3.0 to strengthen their application.
- International students are required to document English proficiency by providing scores from an internationally accepted standardized examination before a decision is made on admission.

Coursework

Candidates for the M.S. in Cybersecurity with Information Systems Emphasis must complete 30 credit hours of graduate coursework subject to Graduate School requirements.

Additional emphasis specific requirements are listed below.

Cybersecurity MS, Information Systems Emphasis

Students must meet all general University of Missouri-St. Louis Graduate School admission and degree requirements.

Students must choose one of the following emphasis areas at the time of application for admission:

1. Information Systems Emphasis or
2. Computer Science Emphasis

Degree requirements vary depending on the chosen emphasis area.

Applicants must meet the general graduate admission requirements of the Graduate School, described in the UMSL catalog. Students are considered for admission to the graduate program in Cybersecurity only after they have formally applied for admission through the Graduate School. Applications may be completed on-line.

Additional emphasis specific requirements are listed below.

Learning Outcomes

Upon completion of the program, graduates will be able to:

- Apply fundamental security principles and formal security models to solve many complex problems in cybersecurity.
- Develop, maintain, and update an organization’s information security policies to meet security and compliance requirements.
- Select and execute appropriate security mechanisms to implement security policies of an organization.
Cybersecurity Undergraduate Certificate

Certificate Requirements

The Undergraduate Certificate in Cybersecurity is a six-course (18 credit hours) interdisciplinary studies program. It is designed to help students from all backgrounds achieve a foundation in information security. It provides the flexibility to focus on technical and/or managerial aspects of computer, software, network, and information security. With primary courses offered by Computer Science and Information Systems departments, the program also allows students to choose from a range of electives based on student interests. This certificate serves a broad group of managers, technical specialists, and professionals with or without a bachelor’s degree. A prior background in information security is not required to enter this program. A minimum GPA of 2.5 is required for admission.

Requirements

All students must take three required courses and three electives (at least one elective must be in Computer Science)

Total Hours: 18

Students may substitute the above courses with other courses upon approval by the program adviser in either the Computer Science or Information Systems department. In all cases, 18 hours are needed to complete the Undergraduate Certificate in Cybersecurity. A minimum of four courses must be taken in residence at UMSL. Students may not receive both the Undergraduate and the Graduate Certificate in Cybersecurity.

For more information, students can contact the program directors at cybersecurityUMSL@umsl.edu.

Learning Outcomes

Upon completion of the program, certificate earners will be able to:

• Analyze a cybersecurity problem and apply principles of cybersecurity and business decision making to identify potential solutions
• Design, implement, and evaluate a cybersecurity-based solution to meet a given set of cybersecurity and business requirements
• Describe professional responsibilities and make informed judgments in cybersecurity practice based on legal and ethical principles
• Function effectively as a member of a team engaged in activities appropriate to the cybersecurity discipline

Data Science Graduate Certificate

The graduate certificate in Data Science is a four-course (12 credit hour) program. It provides skills, both statistical and computational, and technologies for the growing and popular fields involving data science and analysis. All students must take two required courses and two electives.

A minimum of three courses must be taken from UMSL. A maximum of two courses can be used from the 4000-level. Courses may be substituted with the permission of the certificate coordinator. For more information, students can contact the department chair or email info@arch.umsl.edu.

Total Hours: 12
Data Science Undergraduate Certificate

Certificate Requirements
The undergraduate certificate in Data Science is a five-course (15 credit hour) program. It provides skills, both statistical and computational, and technologies for the growing and popular fields involving data science and analysis. A student pursuing this certificate can choose from one of the two tracks, the computational track or the statistical track. Each track consists of three required courses (9 credit hours) and two additional elective courses (6 credit hours).

Computational Track

<table>
<thead>
<tr>
<th>Required Courses</th>
<th></th>

<td>3</td>
</tr>
<tr>
<td>CMP SCI 4342</td>
<td>Introduction to Data Mining</td>
<td>3</td>
</tr>
</tbody>
</table>

Electives
Choose two of the following courses: 6

- CMP SCI 4030: Introduction to Intelligent Web
- CMP SCI 4300: Introduction to Artificial Intelligence
- CMP SCI 4320: Introduction to Evolutionary Computation
- CMP SCI 4370: Introduction to Biological Data Science
- CMP SCI 4390: Introduction to Deep Learning
- MATH 4005: Exploratory Data Analysis with R
- MATH 4090: Introduction to High-dimensional Data Analysis
- MATH 4200: Mathematical Statistics I
- MATH 4210: Mathematical Statistics II
- MATH 4220: Bayesian Statistical Methods
- MATH 4225: Introduction to Statistical Computing
- MATH 4250: Introduction to Statistical Methods in Learning and Modeling
- MATH 4260: Introduction to Stochastic Processes

Total Hours 15

A minimum of three courses must be taken from UMSL. Courses may be substituted with the permission of the certificate coordinator. For more information, contact the department chair or email info@arch.umsl.edu.

Learning Outcomes
Upon completion the program, certificate earners will be able to:

- Identify, interpret, and manage the computational issues involved in the handling of large volumes of data
- Apply algorithmic principles and statistical theories to analyze data-sets
- Build and evaluate data-based models
- Apply machine learning techniques to data-mining problems

Digital and Social Media Marketing Graduate Certificate

The Graduate Certificate in Digital and Social Media Marketing is designed to provide a focused, intensive study of the applications of digital and social media marketing management within organizations. Topics include web analytics, search engine optimization, paid search techniques, user experience, social media applications and best practices, content management and creation, video production and podcasting. Based on course selection, they can further their knowledge in CRM techniques including Salesforce and Hubspot as well as LinkedIn B2B marketing strategies or advanced Facebook advertising. This certificate is suitable for those seeking their MBA or those with an undergraduate degree who are working professionals seeking to gain experience in this exciting and complex field.

All 12 credit hours taken as part of this certificate transfer to the MBA degree program.

Admission Requirements
Applicants must meet general University of Missouri-St. Louis Graduate School admissions requirements.
## Certificate Requirements

All course prerequisites and all course waivers are applicable. Substitute courses may be approved by the appropriate department chairperson and the Director of Graduate Business Programs.

### Required Courses

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

<tbody>
<tr>
<td>MKTG 5710</td>
<td>Consumer Motivation and Behavior</td>
<td></td>
</tr>
<tr>
<td>MKTG 5733</td>
<td>Customer Relationship Management Strategies</td>
<td></td>
</tr>
</tbody>
</table>

Total Hours 12

### Learning Outcomes

Upon completion of the program, certificate earners will be able to:

- Assess the role and practice of marketing within an organization, including theoretical and applied aspects of the marketing discipline (MKTG 5700)
- Demonstrate fluency in digital marketing technologies such as web analytics, search engine optimization and paid search techniques (MKTG 5721)
- Design and measure the effectiveness of social marketing campaigns leveraging social networks to develop social media content to meet specific marketing objectives (MKTG 5722)
- Examine advanced customer relationship marketing techniques to reach new audiences and refine marketing campaigns (MKTG 5733).

---

## Digital Marketing Communications Minor

This minor in Digital Marketing Communications is a 15-hour program designed to provide a focused, intensive study of the applications of digital and social media marketing communications, advertising and branding within organizations. This program serves marketing managers who want to understand a true integrated marketing and communication approach to sales, brand management, promotion, and consumer behavior.

### General Requirements

- All minors are 15 credit hours or 5 courses, including business core courses.
- Students must attain a 2.0 grade point average for all courses in the minor.
- Students must attain a minimum grade of C- in each course included in the minor.
- All courses in the minor must be on a graded basis.
- A minimum of 9 credit hours of coursework included in the minor must be taken in residence at UMSL.
- One must complete a baccalaureate degree at UMSL in order for a minor to be conferred.

### Specific Requirements for the Minor

To obtain this minor, students must successfully complete the following four “core” marketing courses.

### Required Courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MKTG 3700</td>
<td>Basic Marketing</td>
<td>3</td>

<tr>
<td>MKTG 3720</td>
<td>Management of Promotion</td>
<td>3</td>
</tr>
<tr>
<td>MKTG 3721</td>
<td>Introduction to Digital Marketing Strategies</td>
<td>3</td>
</tr>
<tr>
<td>MKTG 3722</td>
<td>Introduction to Social Media Marketing</td>
<td>3</td>
</tr>
</tbody>
</table>

### Electives:

Choose one of the following courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MKTG 3731</td>
<td>Digital and Social Media Marketing Lab (Internship)</td>
<td></td>
</tr>
<tr>
<td>MKTG 3740</td>
<td>Marketing Analysis</td>
<td></td>
</tr>
<tr>
<td>MKTG 3790</td>
<td>Internship in Marketing</td>
<td></td>
</tr>
</tbody>
</table>

Total Hours 15

### Learning Outcomes

Upon completion of the program, graduates will be able to:

- Develop knowledge of the general digital industry landscape.
- Elaborate new online consumer behaviors made possible by digital technologies and identify firms’ strategies to cope with the new behaviors.
- Perform analysis of digital marketing strategies.
- Develop problem-solving skills using digital measurement and analytics.

---

## Doctor of Business Administration (DBA)

### Admission Requirements

Candidates must be committed to a rigorous program of study requiring periodic residence at the University of Missouri-St. Louis College of Business Administration as well as substantial reading and academic inquiry throughout the program. Applicants are expected to hold an MBA or other relevant advanced degree from an acceptable academic institution and to have ten years of significant professional and/or senior level management experience with high levels of responsibility. In exceptional cases, individuals without an advanced degree but other forms of advanced education and substantial managerial experience may be considered; other experience or qualifications may also compensate for less than 10 years of professional or managerial experience. Applicants must submit:

- Most recent transcript(s). Scanned transcripts will be sufficient for the preliminary application. Official Transcripts in sealed envelopes will be required for final acceptance.
- Résumé or Curriculum Vitae (C.V.)
- Names and contact information of two people who can provide insights into the applicant’s academic potential and ability to think critically.
• Two essays (Statement of Commitment & Statement of Research Interest)

For more information and application deadlines, please go to http://dba.umsl.edu.

Degree Requirements

The DBA in the College of Business Administration requires completion of 60 credit hours. To ensure sufficient background for doctoral-level courses, students must demonstrate appropriate competence in quantitative reasoning, which is evidenced through completion of BUS AD 7301 and BUS AD 7109 or their equivalent to be determined by the DBA Director.

Course Requirements

Students are required to take:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BUS AD 7301</td>
<td>Statistical Modeling</td>
<td>1-3</td>
</tr>
<tr>
<td>BUS AD 7100</td>
<td>Scientific Inquiry in Business</td>
<td>1-3</td>
</tr>
<tr>
<td>BUS AD 7101</td>
<td>Quantitative Research Methods I in Business Administration</td>
<td>3</td>
</tr>
<tr>
<td>BUS AD 7102</td>
<td>Quantitative Research Methods II in Business Administration</td>
<td>3</td>
</tr>
<tr>
<td>BUS AD 7103</td>
<td>Quantitative Research Methods III in Business Administration</td>
<td>3</td>
</tr>
<tr>

</tr>
<tr>
<td>BUS AD 7108</td>
<td>Research Practicum in Business Administration (three semesters)</td>
<td>18</td>
</tr>
</tbody>
</table>

Total Hours 57-63

Other Requirements

Students will be evaluated annually for satisfactory progress. Students deemed not to be making adequate progress are subject to the policies of the Graduate School and the College of Business Administration regarding probation and dismissal from the program.

Learning Outcomes

Upon completion of the program, graduates should be able to:

• Design research studies based on sound methodological considerations
• Exhibit expertise in a stream of academic research
• Apply theory to address business problems
• Apply advanced quantitative methods to conduct original research
• Apply advanced qualitative methods to conduct original research
• Communicate research findings in both oral and written formats in a public forum
• Develop pedagogical skills for disseminating information in educational settings

Doctor of Education (Ed.D.)

The Ed.D. in Educational Practice degree is designed for educational practitioners interested in: (1) leading critical analyses of existing problems of practice and (2) proposing solutions to those problems of practice that can be assessed for effectiveness. Students are admitted to a learning community of practice, under the mentorship of a faculty team that focuses on an area of educational practice (theme).

Students seeking the Ed.D. degree are expected to meet the Graduate School’s (p. 243) relevant practitioner doctoral degree requirements and procedures.

Degree requirements

1. Learning Community of Practice Seminars 15-20
   - EDUC 7600 Learning Community of Practice I
   - EDUC 7610 Learning Community of Practice II
   - EDUC 7620 Learning Community of Practice III
   - EDUC 7630 Learning Community of Practice IV
   - EDUC 7640 Learning Community of Practice V
   - EDUC 7650 Learning Community of Practice VI

2. Laboratory of Practice
   - EDUC 7889 Laboratory of Practice 3

3. Required Common Courses
   - EDUC 7215 Data Analysis for Educational Practitioners 1
   - EDUC 7395 Research Proposal Development for Educational Practitioners 1
   - EDUC 7605 Scholarship of Teaching and Learning in Educational Practice 2
   - EDUC 7615 Evaluation of Educational Programs 2
   - EDUC 7625 Building Socially Just and Ethical Educational Communities 2
   - EDUC 7710 Research Methods and Design for Educational Practitioners 3
   - ED REM 7781 Qualitative Methods in Educational Research I 3

4. Tools Courses
   - EDUC 7310 Integrating Technology in Learning for Educational Practitioners 1
   - EDUC 7325 Grant Writing for Educational Practitioners 1

5. Specialization 30-60
   Courses in an area of specialization (can include Master’s or Education Specialist work)
Learning Outcomes

Upon completion of the program, graduates will be able to:

• Design solutions to complex problems of practice related to educational practices that are equitable, ethical, and socially just.
• Construct and apply educational practice knowledge to make a positive difference in the lives of individuals, families, organizations, or communities.
• Demonstrate effective collaboration and communication skills when working with diverse communities and building partnerships.
• Integrate practical and research knowledge with systemic and systematic inquiry in educational practice.
• Create solutions to problems of practice by generating, transforming, and using professional knowledge and practices related to educational practice.
• Take part in and develop communities of practice highlighting their value and function.
• Implement change in their professional practice and within educational practice organizations using critical reflective practice.

Early Childhood Education BSEd

Undergraduate educator preparation is both engaging and innovative. Our high quality undergraduate educator preparation programs are designed around research-based scholarship and practical community-based contexts. To prepare our undergraduate students as the highest quality educators for our region, we contribute to and harness the resources of our deep community partnerships. The community-based experiences broaden candidates’ understanding of their own identity as educators as well as enhancing their ability to build relationships, extend their skills, and understand family/community dynamics and interactions.

The Bachelor of Science in Education (B.S.Ed.) in Early Childhood Education prepares those who desire to teach birth through grade 3. Students electing this program will work directly with young children as a part of the professional courses offered. The curriculum provides learning background, applied knowledge, and best practice interventions for children of diverse populations who demonstrate varied abilities and levels of developmental growth.

Early Childhood Education with an emphasis in Early Childhood Special Education can be achieved with courses satisfactorily completed in this program of study. The core courses are combined with the emphasis area in Early Childhood Special Education. Please see the degree requirements listed below.

General Education Requirements

B.S.Ed. degree candidates must complete the following General Education courses (p. 51) required by the College of Education and the Missouri Department of Elementary and Secondary Education.

Core Areas:

First Year Writing
ENGL 1100 First-Year Writing (MOTR ENGL 200) 3

Core Areas:

First Year Writing
ENGL 1100 First-Year Writing (MOTR ENGL 200) 3

Related Area Requirements

MATH 1150 Structure of Mathematical Systems I 3
MATH 2510 Structure of Mathematical Systems II 3
ECON 1052 Microeconomics for the School Curriculum 3
ATM SCI 1001 Elementary Meteorology 4
or ASTRON 1001 Cosmic Evolution Introductory Astronomy (MOTR ASTR 100)
HLTH PE 3432 Teaching Health and Physical Education in Elementary Schools 3
ENGL 3100 Junior-Level Writing 3

Program Requirements

All students must complete the program requirements as well as the emphasis area courses.

Professional education courses must be completed with a grade point average of 3.0 and no grade lower than a C.
Note: Beginning with those students graduating in May, 2017 and receiving teacher certification, the Missouri Department of Elementary and Secondary Education requires a 3.0 GPA in professional education courses, a 3.0 GPA in the teaching content field, and a 2.75 overall GPA.

Students must pass the relevant exit test to receive the B.S.Ed. degree.

Learning Outcomes

Upon completion of the program, graduates will be able to:

- Continually reflect on professional growth to improve student learning outcomes/enhance student learning.
- Integrate technology to create meaningful student learning within the context of a global digital society.
- Apply content and pedagogical knowledge to create authentic and deep learning experiences.
- Use learning science principles to design, implement, and evaluate curriculum based on learning standards.
- Foster effective working relationships with students, school colleagues, families, and community members to enhance student learning and well-being.
- Design and establish a safe, inclusive, and respectful learning environment that nurtures the intellectual, social, and personal development of all students.
- Use equitable frameworks and inclusive practices to create a variety of instructional and assessment opportunities adapted to diverse learners to encourage all students' critical thinking, problem solving, and performance skills.

Departmental Honors
A student may earn departmental honors with a GPA of 3.6 in economics and the recommendation of the department.

Complementary Areas of Study
The department encourages all majors to develop breadth in related disciplines. Course work and minors are available in a number of areas such as business administration, computer science, statistics, and political science. In addition, courses offered by the department are required for the B.S. in Actuarial Science (p. 311) and help satisfy the prerequisites for courses required for the Certificate in Actuarial Studies (p. 313) and have been approved by the Society of Actuaries (SOA) to satisfy the VEE requirements in Economics. Students should check with their advisers for recommendations concerning courses in these areas. The department suggests the following supplemental course work for students interested in pursuing doctoral-level graduate work in economics or careers in general business. It also encourages all students to obtain work experience by enrolling in the Internship in Applied Economics (ECON 4990).

General Business Preparation
It is recommended that students interested in pursuing careers in business also take:

ACCTNG 2400  Fundamentals of Financial Accounting 3
ACCTNG 2410  Managerial Accounting 3
BUS AD 2900  Legal Environment of Business 3
FINANCE 3500  Financial Management 3
MKTG 3700  Basic Marketing 3

Learning Outcomes
- Use economic reasoning to interpret and evaluate social, political, and economic arguments, and policies.
- Use mathematical methods to construct and analyze economic models and to analyze and interpret economic phenomena.
• Understand key market institutions such as property rights and contracts and economic organizations such as the Federal Reserve System and the International Monetary Fund and apply this knowledge to analyze economic behavior and evaluate public policy.

• Identify the causes and consequences of poverty and prosperity across and within societies.

• Predict changes in key macroeconomic variables in response to changes in social, political, and economic policy as well as non-economic events such as terrorist attacks, natural disasters, and changes in consumer confidence.

• Use basic statistical methods and statistical software to interpret and analyze economic data and relationships.

• Acquire a historical perspective through knowledge of the development of the U.S. economy and its key institutions.

Total Hours: 120

INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

Please Note: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Economics BS

Nearly every decision a person, business, or government makes involves trade-offs and can fall under the purview of economic analysis. In coursework for the Economics BS, students develop analytical and quantitative skills and apply their knowledge to a range of topics such as economic modeling, financial markets, and market analysis. Students also study the economy as a whole and analyze the sources of growth, recessions, and inflation, as well as government policies. The study of economics is an excellent way to learn how to apply analytical and quantitative skills to a range of interesting economic problems.

General Education Requirements

All undergraduate economics majors must meet the university and college general education requirements (p. 51). Candidates for the B.A. degree may take any foreign language to meet this requirement. Candidates for the B.S. degree take mathematics and quantitative courses instead of the foreign language requirement. Courses in economics may be used to meet the university social sciences requirement.

Satisfactory/Unsatisfactory Option

Courses outside the major field and ECON 1001, Principles of Microeconomics, and ECON 1002, Principles of Macroeconomics, may be taken on a satisfactory/unsatisfactory basis.

Prerequisites

All prerequisites for economics courses must be completed with a C- or better.

Degree Requirements

Candidates for the B.S. degree must complete at least 36, but no more than 50, hours in economics. At least 30 hours must be at or above the 2000 level. All core courses for the major must be completed with a grade of C- or better.

The following core courses are required:

- ECON 1001 Principles of Microeconomics (MOTR ECON 102) 3
- ECON 1002 Principles of Macroeconomics (MOTR ECON 101) 3
- ECON 3001 Intermediate Microeconomics 3
- ECON 3002 Intermediate Macroeconomics 3
- ECON 3100 Economic Statistics 3
- ECON 4100 Introduction to Econometrics 4
- MATH 1800 Analytic Geometry and Calculus I (strongly recommended) 3-5
  or MATH 1100 Basic Calculus

Select two of the following quantitative courses: 6-8

- ECON 4030 Managerial Economics
- ECON 4040 Analysis of Business Cycles
- ECON 4110 Applied Econometrics
- ECON 4120 Time Series Econometrics for Economics and Finance
- ECON 4130 Business and Economic Forecasting
ECON 4150  Mathematical Economics
ECON 4160  Geospatial Analysis in the Social Sciences
ECON 4170  Fundamentals of Cost-Benefit Analysis

Mathematics courses numbered 1900 or above with consent of advisor

1 Note: mathematics courses used for this requirement do not count towards the 36 hours in economics requirement

**Departmental Honors**

A student may earn departmental honors with a GPA of 3.6 in economics and the recommendation of the department.

**Complementary Areas of Study**

The department encourages all majors to develop breadth in related disciplines. Course work and minors are available in a number of areas such as business administration, computer science, statistics, and political science. In addition, courses offered by the department are required for the B.S. in Actuarial Science (p. 311) and help satisfy the prerequisites for courses required for the Certificate in Actuarial Studies (p. 313) and have been approved by the Society of Actuaries (SOA) to satisfy the VEE requirements in Economics. Students should check with their advisers for recommendations concerning courses in these areas. The department suggests the following supplemental course work for students interested in pursuing doctoral-level graduate work in economics or careers in general business. It also encourages all students to obtain work experience by enrolling in the Internship in Applied Economics (ECON 4990).

**Graduate School Preparation**

It is recommended that students considering doctoral-level graduate work in economics also take:

- MATH 1900  Analytic Geometry and Calculus II
- MATH 2000  Analytic Geometry and Calculus III
- MATH 2020  Introduction to Differential Equations
- MATH 2450  Elementary Linear Algebra
- MATH 4100  Real Analysis I
- MATH 4200  Mathematical Statistics I

**Learning Outcomes**

- Use economic reasoning to interpret and evaluate social, political and economic arguments, and policies.
- Use mathematical methods to construct and analyze economic models and to analyze and interpret economic phenomena.
- Understand key market institutions such as property rights and contracts and economic organizations such as the Federal Reserve System and the International Monetary Fund and apply this knowledge to analyze economic behavior and evaluate public policy.
- Identify the causes and consequences of poverty and prosperity across and within societies.
- Predict changes in key macroeconomic variables in response to changes in social, political, and economic policy as well as non-economic events such as terrorist attacks, natural disasters, and changes in consumer confidence.

- Estimate, analyze, and interpret economic relationships using appropriate regression analysis techniques applied to economic data for use in business and policy applications.
- Write a research paper that employs sound economic reasoning and economic data that demonstrates the ability to model and interpret regression analysis of an economic relationship.

**Total Hours: 120**

1 INTDSC 1003 is required only for first-time freshmen and transfer students with less than 26 college credits.

Please Note: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

**Economics BS/MA Dual Degree Program**

The B.S./M.A. (also known as the “2+3”) program is an accelerated program that allows students to complete a B.S. and a M.A. in economics in five years. The program allows students to apply 12 of the M.A. credit hours towards the B.S., reducing the overall required hours for the two
degrees from the standard 150 (120 for the B.S. plus 30 for the M.A.) to 138 hours.

The M.A. in Economics requires 30 credit hours; at least 21 hours must be completed in residence.

The following 3 courses (9 credit hours) are required:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 5001</td>
<td>Microeconomic Analysis</td>
<td>3</td>
</tr>
<tr>
<td>ECON 5002</td>
<td>Macroeconomic Analysis</td>
<td>3</td>
</tr>
<tr>
<td>ECON 5100</td>
<td>Econometric Theory and Methods</td>
<td>3</td>
</tr>
</tbody>
</table>

In addition, 21 credit hours of electives must be completed. At most, six of these credit hours may be economics courses at the 4000 level (excluding ECON 4100 and ECON 4150 which cannot be utilized as part of the M.A. degree); all other electives must be at the 5000 level or higher.

Of the 30 hours taken in the M.A. program, 12 of these hours (per the approval of the Graduate Director) will also count toward the undergraduate B.S. requirements. All other requirements for the B.S. degree remain in effect.

**Admission Requirements**

Applicants must have completed between 60 and 108 credit hours. Applicants must have a minimum G.P.A. of 3.0 (both overall and in economics courses) and must be nominated by a full-time regular economics faculty member. Applicants must have completed all of the general education requirements as well as college algebra (or a higher level mathematics course), introductory microeconomics and introductory macroeconomics. Those accepted with fewer than 90 semester credit hours are accepted only on a provisional basis. Once the student has completed 90 semester hours of coursework (typically including ECON 3001, ECON 3002, ECON 3100, ECON 3200, MATH 1800, and preferably ECON 4100) with a satisfactory G.P.A. (minimum G.P.A. of 3.0 overall and in economics courses) the provisional status is dropped.

It is recommended that applicants apply when they have completed 90 credit hours; further, it is recommended that applicants should complete intermediate microeconomics (ECON 3001) and/or introductory econometrics (ECON 4100) before applying.

**Awarding of Degree**

Both degrees (the B.S. and M.A.) will be awarded when all requirements for the entire program have been completed. In other words, the B.S. and M.A. degrees will be simultaneously awarded at the completion of study.

Students who officially withdraw from the B.S./M.A. Dual Degree Program in Economics and who have successfully completed all of the requirements for the B.S. degree will be awarded the B.S. degree.

**Economics MA**

**Admission Requirements**

An undergraduate major in economics is not required for acceptance into the program. Application for admission may be submitted at any time, although class work formally begins in late August, mid-January, and mid-June. Candidates must meet the general admission requirements of the Graduate School, submit GRE scores (Advanced Economics optional), and submit two letters of recommendation from persons qualified to judge the candidate's potential for success in the program.

The admissions decision is based on the applicant's academic transcript, GRE scores, letters of recommendation, and a personal narrative on the application form.

**Degree Requirements**

The M.A. in Economics requires 30 credit hours; at least 21 hours must be completed in residence.

Candidates need not have an undergraduate degree in economics. However, students are expected to have taken intermediate micro- and macro-economics, mathematical economics, and introductory econometrics prior to the beginning of the core curriculum. Students that do not have these courses will take these courses first; credits earned in these courses do not count toward the 30 hours required for the MA.

**Required Core Courses**

The following courses or their equivalents are required for the M.A. in Economics. Students with previous education in economics or business may waive some of these courses.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 5001</td>
<td>Microeconomic Analysis</td>
<td>3</td>
</tr>
<tr>
<td>ECON 5002</td>
<td>Macroeconomic Analysis</td>
<td>3</td>
</tr>
<tr>
<td>ECON 5100</td>
<td>Econometric Theory and Methods</td>
<td>3</td>
</tr>
</tbody>
</table>

**Electives**

Candidates must complete at least 21 hours of electives. A maximum of 6 hours of economics electives may be taken at the 4000 level. With the approval of the graduate coordinator, students may take up to 9 hours of graduate courses outside the Department of Economics. In particular, students interested in business economics may take up to three approved graduate business courses for their electives.

**Departmental Honors**

A student may earn departmental honors with a GPA of 3.75 in all required courses for the M.A. degree and the recommendation of the department.

**Complementary Areas of Study**

Students with a public policy focus can complete the M.A. in Economics and the Public Policy Administration (PPA) Graduate Certificate in Policy and Program Evaluation (PPE) (p. 579). It is possible to earn the Certificate without any additional coursework beyond what is required for the M.A. alone.

**Learning Outcomes**

Upon completion of the program, graduates will be able to:

- Interpret and analyze economic models and assess their validity.
- Use theoretical and empirical tools to design effective business and government policies.
- Use econometric methods to interpret and analyze economic data, to assess the empirical validity of economic propositions, to evaluate policies, and to help inform business decisions.
- Develop at least one topic area of expertise through familiarity with the relevant scholarly and professional literatures, policy issues, institutions, and current data trends.
- Develop at least one methodological area of expertise through the acquisition of the theoretical and empirical tools needed to understand scholarly and professional contributions to the
Economics MA, Business Economics Emphasis

Admission Requirements

An undergraduate major in economics is not required for acceptance into the program. Application for admission may be submitted at any time, although class work formally begins in late August, mid-January, and mid-June. Candidates must meet the general admission requirements of the Graduate School, submit GRE scores (Advanced Economics optional), and submit two letters of recommendation from persons qualified to judge the candidate’s potential for success in the program.

The admissions decision is based on the applicant’s academic transcript, GRE scores, letters of recommendation, and a personal narrative on the application form.

Degree Requirements

Like the General Option of the Economics MA, the Business Economics option requires 30 credit hours. Subject to approval from the Director of Graduate Studies, as many as nine credit hours may be waived based on previously completed graduate education. Independent of any waived courses, the 30 credit-hour program must be completed within a six-year period. A minimum of 21 credit hours must be completed while enrolled in the MA program at UMSL.

Other Electives (Choose 1 or 2 courses)

- Any Economics 5000-level course not used above and approved by the Department Director of Graduate Studies
- Any Economics 4000-level elective approved by Department Director of Graduate Studies

Total Hours 30

Departmental Honors

A student may earn departmental honors with a GPA of 3.75 in all required courses for the M.A. degree and the recommendation of the department.

Complementary Areas of Study

Students with a public policy focus can complete the M.A. in Economics and the Public Policy Administration (PPA) Graduate Certificate in Policy and Program Evaluation (PPE) (p. 579). It is possible to earn the Certificate without any additional coursework beyond what is required for the M.A. alone.

Economics Minor

Candidates for a minor in economics must take a minimum of 15 hours in economics.

The following courses are required:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 1001</td>
<td>Principles of Microeconomics</td>
<td>3</td>

<tr>
<td>ECON 1002</td>
<td>Principles of Macroeconomics</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>(MOTR ECON 101)</td>
<td></td>
</tr>
</tbody>
</table>

For the remaining 9 hours, 3 hours must be at or above the 2000 level and 6 hours must be at or above the 3000 level. It is recommended that students take ECON 3001, Intermediate Economic Theory: Microeconomics and/or ECON 3002, Intermediate Economic Theory: Macroeconomics. ECON 3100, Economic Statistics, cannot be counted towards the economics minor if the student has also taken SCMA 3300 or the equivalent.

A GPA of 2.0 or better is required for courses presented for the minor. The satisfactory/unsatisfactory (s/u) option may be applied to ECON 1001 and only.

Learning Outcomes

- Apply the concepts of choice and opportunity cost to basic situations involving scarcity, and be able to clearly identify feasible choices.
- Understand supply, demand, and how markets operate and be able to identify welfare outcomes for consumers and producers.
- Understand the determination of the growth and short-run fluctuations of an economy.
- Appraise how government policies, monetary policies and fiscal policies in particular, affect output, unemployment, inflation and growth.

Education Administration EdS

Education Specialist (Ed.S.) in Education Administration

The Education Specialist Degree (Ed.S.) in Education Administration is a logical extension of the UMSL M.Ed. in Education Administration and is designed to prepare administrators to serve in school settings from Kindergarten to grade twelve and central office administration. The Ed.S. in Education Administration requires at least sixty (60) graduate credit hours of a planned program and may include no more than thirty-six (36) credit hours of an approved NCATE accredited master’s degree. One-half (15 credit hours) must be completed within the COE after being admitted.
Admission Standards
To be admitted to the Ed.S. in Education Administration program students must meet the following criteria:

1. Be admitted without qualification to the UMSL Graduate School;
2. Have a graduate grade point average of at least 3.25 on a scale of 4.00.
3. Have on file at least three (3) recommendations including the following: one (1) from an educator presently occupying a position equal or similar to that which the applicant aspires upon completing the Ed.S., one (1) from a university professors with direct knowledge of the applicant's graduate degree work, and one (1) from someone other than a member of the applicant's family who can comment on the applicant's character.
4. Students already possessing a master's degree from an NCATE accredited institution may transfer those credit hours into the Ed.S. degree program; however, at least twenty-four (24) credit hours must be completed after acceptance into the program.

Degree Program
There are three (3) phases to this degree program. Phase 1.00 must be completed by students not possessing a UMSL M.Ed. in Education Administration and those wanting to transfer appropriate grade courses from other NCATE institutions. Phase 2.00 applies to those students meeting all of the requirements in Phase 1.00. There are two (2) sections to Phase 2.00--- Section 2.10 Technical Aspects of Education Administration and Section 2.20 Human Aspects of Education Administration. Courses in these two sections may be taken simultaneously. There are two (2) sections to Phase 3.00--- Section 3.10 Writing Exit Requirements and Section 3.20 Examination Exit Requirements. Both sections must be completed no sooner than one (1) semester before completing all degree requirements. Students seeking the superintendent certification must complete ten (10) specifically required courses.

Phase 1.00 Elementary and Secondary School Education Emphases

1.10 Contexts Core:
- ED ADM 6201 Knowledge Contexts of Education Administration and Policy 3
- ED ADM 6202 Race and Culture in Educational Reform and Policy 3
- ED ADM 6203 Economic Contexts of Education 3
- ED ADM 6204 Legal Contexts of Education 3
- ED ADM 6205 Legal Contexts of Education 3

1.20 Research/Change Core:
- ED REM 6707 Classroom Measurement and Evaluation 3
- ED ADM 6301 Education Policy Analysis 3

1.30 School Specialization Core
Select 1.31 or 1.32 listed below:

1.31 Elementary School Administration:
- ED ADM 6301 Elementary School Administration
- ED ADM 6401 School Staff Development and Supervision
- ELE ED 6411 Curriculum Leadership Elementary Programs
- ED ADM 6900 Internship (3 credit hours) 2

1.32 Secondary School Administration:
- ED ADM 6304 Secondary School Administration
- ED ADM 6401 School Staff Development and Supervision
- SPEC ED 6415 The Law and Special Education
- ED ADM 6900 Internship (3 credit hours) 2

Total Hours 36

1 Required if student had no equivalent course at the undergraduate level
2 This course must be taken within the last nine (9) semester hours of completion of Phase 1.00

Phase 2.00

Section 2.10 Technical Aspects of Education Administration
At least 12 graduate semester hours are required from the following list of recommended courses: 1

- ED ADM 6303 Middle School Administration
- ED ADM 6305 School District Administration
- ED ADM 6407 School Staff Development & Supervision- Special Ed Administration
- ED ADM 6501 Principles of Public School Finance in Missouri
- ED ADM 6502 School Buildings and Sites
- ELE ED 6411 Curriculum Leadership Elementary Programs
- ED ADM 6315 Middle School Educational Philosophy
- SEC ED 6415 Curriculum Leadership in Education
- SEC ED 6420 Improving Teaching and Learning
- ED ADM 6306 Special Education Administration
- ED TECH 5340 Selection and Utilization of Educational Multimedia
- ED TECH 6449 Using Technology in Administration Processes
- ED ADM 6709 Organizational Change in Education 3

Section 2.20 Human Aspects of Education Administration
At least 12 graduate semester hours are required from the following list of recommended courses: 1

- ED ADM 6307 Integrated Curriculum for Special Education Administrators
- ED ADM 6317 Supervision and The Middle School Child
- ED ADM 6402 School Personnel Administration
Education Minor

A minor in education consists of 18 hours of course work. A total of 15 hours must be taken at or above the 2000 level including at least 2 courses at or above the 3000 level from the following curricular designations: ART ED, ECH ED, ED PSY, ED TECH, EDUC, ELE ED, MUS ED, PHYS ED, SEC ED, SPEC ED, and TCH ED. In addition, a 3 hour capstone course must be selected from the following:

- **ECH ED 4989** Practicum I: Early Childhood Education/Early Childhood Special Education Site Based Experience 3
- **EDUC 4989** Internship I 3
- **ELE ED 4992** Practicum I: Elementary/Special Education Site-Based Experience 3
- **ELE ED 4994** Practicum I: Elementary/TESOL Site Based Experience 3
- **MID ED 4989** Practicum I: Middle Level Education Site Based Experience 3
- **SEC ED 4989** Practicum I: Site-Based Experience 3

Total Hours: 27

1 Other courses must be approved by the student’s advisor and ELAPS department chairperson.

TOTAL Education Specialist Degree in Education Administration.................. 60 (inclusive of a maximum of 36 credit hours from an M.Ed. in education administration.)

**Phase 3.00 Writing Exit Requirements**

**Section 3.10 Writing Requirements**

At least two (2) months before the completion of all course work for the degree, each student must present to the ELAPS Department K-12 Regular faculty Ed.S. Writing Committee a scholarly paper on a topic approved by the student’s academic advisor. The paper submitted may be original in that it has been written especially for this requirement or it may be a more comprehensive version of a paper written for a class taken after being admitted to the Ed.S. program. The paper must conform to the writing standards found in the booklet PS K-12 Writing Requirements-Form and Style.

**Education PhD, Counseling Emphasis**

**Admission Requirements**

In addition to meeting the application and admissions requirements of the Graduate School, students must submit:

- Three letters of recommendation (at least two from individuals with earned doctorates, preferably prior instructors).
- A copy of a paper you have written on a scholarly topic, as a writing sample.
- A professional resume.
- Evidence of above-average academic records. A GPA of 3.5 or higher is preferred.
- GRE scores. Quantitative and verbal scores at or above the 50th percentile are preferred. An analytical writing score of 4.0 or higher is preferred.
- Answers to these three questions (limit responses to 300 words or less per question), sent to CounselingDocApps@umsl.edu:
  - How do you envision the UMSL doctoral program preparing you to meet your career goals?
  - What are your experiences working with diverse populations and what you have learned from these experiences?
  - What personal qualities do you possess that relate to your interest in doctoral education in counseling?

Admission is competitive, and a favorable vote of an admission interview committee, composed of faculty in the emphasis area, is required.

**Degree Program**

- Coursework: A minimum of 60 credit hours is required beyond the Master’s degree, including 6 hours of dissertation research. A minimum of 42 of these hours must be completed in residence.
- Dissertation: All students must defend orally a written dissertation proposal to their dissertation committee. A dissertation embodying the results of original research must be accepted by the dissertation committee and the Graduate School.

**Admission Application**

To ensure time for review and decision, applicants should submit the Graduate School application, college transcripts, and any program-specific materials (e.g., supplemental application, letters of recommendation, etc.) well in advance of the December 1st deadline. Please note that unofficial transcripts can be uploaded with the Graduate School application to expedite admissions decisions; however, official transcripts must be received directly from all prior institutions attended before regular admission to any program will be granted. In addition, applicants are urged to request transcripts and letters or recommendation two weeks before completing the online application. Consideration of applications cannot be undertaken until all materials are available.

**Degree Requirements**

Students in the Counseling emphasis area complete the following requirements:

**Total Hours:** 90

¹ These courses are normally part of a master’s program. Equivalent graduate coursework may count as transfer credit toward the degree with approval of the Ph.D. program.

### Learning Outcomes

Upon completion of the program, graduates will be able to:

- Demonstrate and apply the ethical and culturally relevant practice of counseling
- Be adept at conceptualizing clients using theory and integrating theory and research into counseling practice
- Demonstrate skills in the process and practice of clinical supervision and consultation, including the use of theory, assessment, gatekeeping, and ethical and culturally relevant strategies
- Develop skills in teaching, including course design, assessment, andragogy, differentiation, and gatekeeping
- Demonstrate the ethical practice of conducting rigorous and intentionally designed counseling research
- Develop and refine scholarship skills through advanced qualitative and quantitative coursework to be able to disseminate findings through professional presentations or publications
- Demonstrate abilities to serve as leaders in the field and advocates for the profession, for clients, and with marginalized populations to stand up against issues of systemic inequity

## Education PhD, Educational Leadership and Policy Studies Emphasis

### Admission and General Requirements

In addition to meeting the application and admissions requirements of the Graduate School, students must submit:

- Three letters of recommendation (at least two from individuals with earned doctorates, preferably prior instructors).
- An original essay.
- A professional resume.
- Evidence of above-average academic records. A GPA of 3.5 or higher is preferred.
- GRE scores. Quantitative and verbal scores at or above the 50th percentile are preferred. An analytical writing score of 4.0 or higher is preferred.

Admission is competitive, and a favorable vote of an admission interview committee, composed of faculty in the emphasis area, is required.

### Degree Program

- Coursework: A minimum of 60 credit hours is required beyond the Master’s degree, including 6 hours of dissertation research. A minimum of 42 of these hours must be completed in residence. For students who have not completed a Master’s degree, a minimum of 90 hours, postbaccalaureate, is required, including 6 hours of dissertation research (the Graduate School’s residency requirement applies). Students in the Counseling emphasis area complete the following requirements: a minimum 90 hours, postbaccalaureate, including 12 hours of dissertation research (the Graduate School’s residency requirement applies).
• Dissertation: All students must defend orally a written dissertation proposal to their dissertation committee. A dissertation embodying the results of original research must be accepted by the dissertation committee and the Graduate School.

Admission Application
To ensure time for review and decision, applicants should submit the Graduate School application, college transcripts, and any program-specific materials (e.g. supplemental application, letters of recommendation, etc.) well in advance of the December 1st deadline. Please note that unofficial transcripts can be uploaded with the Graduate School application to expedite admissions decisions; however, official transcripts must be received directly from all prior institutions attended before regular admission to any program will be granted. In addition, applicants are urged to request transcripts and letters or recommendation two weeks before completing the online application. Consideration of applications cannot be undertaken until all materials are available.

Degree Requirements
Students in the Teaching-Learning Processes, Educational Leadership and Policy Studies, and Educational Psychology emphasis areas complete the following requirements.

1. Research Methods 15-18
Students in the Teaching –Learning Processes, Educational Leadership and Policy Studies, and Educational Psychology emphasis areas should complete the following research methods courses (or equivalent).

Learning Outcomes
Upon completion of the program, graduates will be able to:

• Access, critically examine, and use theoretically informed literature in human development, the science of learning, and sociocultural factors that explain variation in learning and developmental pathways.
• Examine and apply complex interrelationships that affect issues of diversity, equity and social justice from multiple and cross-disciplinary perspectives to teaching and learning processes contexts.
• Formulate questions, increase knowledge, use statistics intelligently, and make ethical decisions integrating multiple perspectives using reason, evidence, and teaching and learning processes contexts.
• Analyze, categorize, and evaluate qualitative, quantitative, and/or mixed methods approaches within an education context.
• Design and produce rigorous research projects as an independent scholar using qualitative, quantitative, and/or mixed methods approaches.
• Apply and demonstrate leadership skills to promote community engagement or civic action to benefit the public good related to teaching and learning processes settings.
• Communicate effectively and engage with others constructively across contexts, languages, and media.

Educational Administration MEd,
Community Education Emphasis
The M.Ed. in Administration, Community Education will not be accepting applications for the 2020-2021 Academic Year due to curricular revisions.

Master of Education: Educational Administration with Emphasis in Community Education
This is a 32-credit hour program for students interested in Community Education.

Competencies/Expectations/Outcomes that all students must demonstrate to complete the program successfully:

• School Administrator candidates in the College of Education are held to the Interstate School Leaders Licensure Consortium's Standards for School Leaders (ISLLC)
• A school administrator is an educational leader who promotes the success of all students by facilitating the development, articulation, implementation, and stewardship of a vision of learning that is shared and supported by the school community.
• A school administrator is an educational leader who promotes the success of all students by advocating, nurturing, and sustaining a school culture and instructional program conducive to student learning and staff professional growth.
• A school administrator is an educational leader who promotes the success of all students by ensuring management of the organization, operations, and resources for a safe, efficient, and effective learning environment.
• A school administrator is an educational leader who promotes the success of all students by collaborating with families and community...
members, responding to diverse community interests and needs, and mobilizing community resources.

- A school administrator is an educational leader who promotes the success of all students by acting with integrity, fairness and in an ethical manner.
- A school administrator is an educational leader who promotes the success of all students by understanding, responding to, and influencing the larger political, social, economic, legal and cultural context.
- A school administrator is an educational leader who promotes the effective use of technology to maximize student learning and efficiently manage school operations.

The ISLLC standards pertain to Elementary and Secondary Administration and Community Education.

^3 This course will not be offered in 2014-2015. Please contact the department for more information.

**Educational Administration MEd, School Administration Emphasis**

**Description**

The Master of Education in Education Administration with emphasis in School Administration is intended for K-12 teachers interested in the School Leadership Preparation Program. The program partially fulfills Missouri Department of Elementary and Secondary Education requirements for licensure. This innovative curriculum is based on current research and best practices in leader development. It is designed to prepare highly effective administrators who engage in reflective practice, drive gains in student achievement and development, create equitable and efficacious school cultures, and utilize strategic planning to organize adults and continuously track progress toward goals. Participants are prepared to meet any challenge facing the school leaders of today.

Students admitted to the program become members of a cohort that begins study in the fall semester. Those who maintain enrollment complete the degree in two years.

This program consists of 36 credit hours and is rich in field experiences. Six visits to successful schools are scheduled during the first year. The second year of the program features a 600-clock-hour field experience as a school leader. Principals in area schools and UMSL faculty members provide mentorship and coaching throughout the program. Residency assessments track progress toward the goal of becoming a highly effective leader.

**Admission**

Admission to the Master of Education in Education Administration degree program is competitive. All application materials should be submitted by April 30th. Applicants are notified of the final admission decisions approximately June 15th and commence a defined, sequential course plan in the fall semester. In order to graduate in two years, students must remain with their cohort.

An undergraduate graduate point average (GPA) of 2.75 in the major and overall, and if applicable a graduate GPA of 3.0, are required. To apply, potential students must:

- Complete an Application to the Graduate School (found through links on the UMSL home page, www.umsl.edu)
- Have transcripts of all prior work in higher education sent to the Graduate Admissions Office
- Complete and submit a Supplemental Application to the M.Ed. in Education Administration. The Supplemental Application and list of accompanying materials can be located on the program web page, coe.umsl.edu

Review of applications is a three-stage process ending with an interview.

1 Pending Faculty Senate approval.

Candidates must take all courses in sequence. Courses are offered only in the semesters indicated. As a sequential program, prerequisites for any semester are all courses offered in the previous semesters. Courses cannot be taken out of sequence.

**Learning Outcomes**

Upon completion of the program, graduates will be able to:

- Develop and implement a vision for a school in order to guide the learning of all students. (Visionary Leadership)
- Promote effective instructional practices, utilize effective assessments, and ensure professional growth among school faculty. (Instructional Leadership)
- Implement operational systems, oversee personnel, and ensure equitable and strategic use of resources. (Managerial Leadership)
- Interact professionally with students, staff, family, and community, respecting and embracing diversity and inclusion. (Relational Leadership)
- Actively engage in reflective practice and apply new knowledge and understanding in order to drive appropriate change. (Innovative Leadership)

**Educational Psychology MEd**

The Department of Education Sciences and Professional Programs provides training in the theory, research, and practice of the psychological mechanisms underlying teaching, learning, and human development of students as well as the related school processes and structures. The department also specializes in educational research, psychoeducational assessment, and school psychology.

The M.Ed. in Educational Psychology is a flexible degree that allows candidates to tailor the program curriculum to meet individual interests and career goals. The degree is not associated with any particular position or career; rather, it is intended to enhance current performance in a variety of educational and community-based settings and roles, to facilitate advancement within one’s current position, and to prepare candidates for other advanced degrees in education or psychology. The M.Ed. in Educational Psychology degree consists of 30 hours of graduate coursework in the following areas:

A. Foundations (15 hours)
B. Electives (12 hours)
C. Capstone Experience (3 hours)

The foundations courses consist of 6 hours of study regarding the educational and psychological foundations, 3 hours of human development, and 6 hours of educational research and evaluation methods. The specific courses chosen within each category, the electives, and capstone experience will vary according to the candidate’s interests.

**Admissions Requirements**

Admissions requirements include an earned baccalaureate degree from an accredited college or university with an overall grade point average of 3.0 or higher, a completed UMSL Graduate School Application Form, official transcripts from all colleges and universities attended, and two letters of recommendation.

Educational Studies BES, Early Childhood Emphasis

The Bachelor of Educational Studies (BES) is perfect for students excited about education, but looking for challenges outside the traditional classroom. The BES will prepare you for a career as an educator in many agencies. Many institutions emphasize informal learning and many different settings. Employers at these institutions are eager to hire people who have training and relevant experience in education, management, marketing, and technology. This degree is designed to be a creative, flexible, and inter-disciplinary bachelor’s degree that emphasizes practical skills in multiple settings.

General Education Requirements

Students follow the University’s General Education Requirements (p. 51), Mathematical Skills, Advanced Expository Writing, American History and Government, and Cultural Diversity Requirements. Due to prerequisites of required courses all students must take PSYCH 1003 and POL SCI 1100. Students pursuing the Exercise Science emphasis area must take BIOL 1012, BIOL 1013, and MATH 1030.

Learning Outcomes

Upon completion of the program, graduates will be able to:

- Engage their clients while adding diverse perspectives that articulate how difference shapes experience and human identity.
- Apply their unique understanding of social justice by addressing institutional and social barriers that limit access, equity, and achievement.
- Conduct themselves in a respectful and professional manner that views failure as an opportunity to learn, as they effectively work on multiple projects.
- Apply reasoning and critical thinking while making connections between information, data, and arguments to synthesize and interpret information, forming valid conclusions.
• Apply unique leadership, management and communication skills to articulate thoughts/ideas effectively using oral, written, nonverbal, and visual communication skills in a variety of formats and contexts.
• Apply knowledge and skills as innovative childhood educators, managers, directors, program planners, or curriculum developers to effectively manage early childhood programs.
• Demonstrate a unique application of best practices of teaching young children outside a traditional classroom setting.

Educational Studies BES, Exercise Science and Wellness Emphasis

Total Hours  32

**Emphasis Area Requirements**

Students must complete the requirements for one Academic Minor chosen in consultation with the advisor. The minor and electives in a related area must total 21 hours.
Suggested Minors

- Child Advocacy Studies (p. 375)
- Criminology and Criminal Justice (p. 403)
- Gender Studies (p. 464)
- Gerontology (p. 465)
- Public Policy Administration (p. 603)
- Social Work (p. 624)

Learning Outcomes

Upon completion of the program, graduates will be able to:

- Engage their clients while adding diverse perspectives that articulate how difference shapes experience and human identity.
- Apply their unique understanding of social justice by addressing institutional and social barriers that limit access, equity, and achievement.
- Conduct themselves in a respectful and professional manner that views failure as an opportunity to learn, as they effectively work on multiple projects.
- Apply reasoning and critical thinking while making connections between information, data, and arguments to synthesize and interpret information, forming valid conclusions.
- Apply unique leadership, management and communication skills to articulate thoughts/ideas effectively using oral, written, nonverbal, and visual communication skills in a variety of formats and contexts.
- Integrate knowledge from disciplines such as child advocacy, gerontology, social work, and public policy administration to deliver effective youth and adult programs.
- Apply knowledge of educational theories and practice in relation to not-for-profit and non-government institutions, to deliver sustainable youth and adult programs.

Electrical Engineering BSEE

Admission

Students are admitted to the upper-division program after they have completed an acceptable pre-engineering program. The pre-engineering program can be taken at University of Missouri-St. Louis or at community colleges in the area. Normally, admission is granted to persons who have completed the pre-engineering program with a minimum grade point average of 2.75 over all their science, mathematics, engineering, and mathematics courses. Students with a grade point average below 2.75 but at least a C, in all their science, engineering and mathematics courses may be admitted on a conditional basis.

For more information, please contact the program advisor at (314) 516-7018.

Degree Requirements

A program of 124 semester hours is required for the Bachelor of Science in Electrical Engineering.

- Majors must complete the University General Education (p. 51) and Graduation (p. 19) requirements, the Pre-Engineering Requirements, the Core Engineering Requirements, and Major Requirements.
- Majors must first complete J E MATH 3170, Engineering Mathematics, with a minimum grade of C-.
- Majors must also complete J E ENGR 2300, Introduction to Electrical Networks, with a minimum grade of C-.
- A minimum grade of C- is necessary to meet the prerequisite requirement for any course.

General Education and Graduation Requirements

The following courses fulfill general education and graduation requirements and are required of Electrical Engineering majors:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHIL 2259</td>
<td>Engineering Ethics</td>
<td>3</td>
</tr>
<tr>

<td>3</td>
</tr>
<tr>
<td></td>
<td>Three additional Social Science courses</td>
<td>9</td>
</tr>
<tr>
<td></td>
<td>Total Hours</td>
<td>18</td>
</tr>
</tbody>
</table>

1 One course must meet the Cultural Diversity requirement, and one course must meet the engineering Valuing Skill requirement. Humanities and social sciences electives must meet both the University of Missouri-St. Louis General Education Requirements and the Humanities and Social Sciences Requirements of the Joint Undergraduate Engineering Program. Check with your advisor for details.

Pre-Engineering Requirements

Students seeking to major in engineering are first designated as 'Undeclared with an interest in Engineering majors' until they have completed Math 1800 Analytical Geometry & Calculus I. Upon successful completion of Math 1800 with a grade of C or better, students will be allowed to declare pre-engineering as their major. Math 1800 must be completed successfully within two attempts.

Electrical Engineering Minor

Minor in Electrical Engineering

Admission to the Joint Engineering program is required. A minimum of 18 credit hours in Joint Electrical Engineering courses are required.

**Required Courses:**
- J E ENGR 2300 Introduction to Electrical Networks 3
- J E ENGR 2330 Electrical and Electronic Circuits Laboratory 3

*Take three courses from the following list: 9*
- J E ENGR 2320 Introduction to Electronic Circuits
- J E ENGR 2600 Introduction to Digital Logic and Computer Design
- J E ENGR 3300 Engineering Electromagnetic Principles
- J E ENGR 3310 Electronics Laboratory
- J E ENGR 3320 Power, Energy and Polyphase Circuits
- J E ENGR 3510 Signals and Systems
- J E ENGR 4350 Electrical Energy Laboratory
- J E ENGR 4410 Control Systems I

*At least one additional J E ENGR Course 3*

Elementary and Special Education Teaching Graduate Certificate

This program of study is for individuals with a Bachelor's degree who would like to prepare for teacher certification in Elementary Education and Special Education. This graduate certificate program option leads to Missouri Initial Teacher Certification in Elementary Teaching 1-6 with an add-on in Mild/Moderate Cross-Categorical Disabilities, K-12 Special Education. These courses are also what DESE requires for the elementary and special education certifications.

**Admission Requirements for the Graduate Certificate in Elementary and Special Education School Teaching:**

- A passing score on the designated Missouri Content Examination or an approved program of study
- A 2.75 or higher overall GPA
- Approved results of the Family Care Safety Registry
- A clear TB test or chest x-ray, if appropriate
- Students must meet the application deadlines set by the Graduate School

Graduate Certificate in Elementary and Special Education (56 Credit Hours = 41 Elementary + 15 Special Education)

contexts. To prepare our undergraduate students as the highest quality educator preparation programs are designed to foster effective working relationships with students, school colleagues, families, and community members to enhance student learning and well-being. The focus of candidates’ work is to explore challenges of student learning, envision solutions based on their research-based coursework, recent school initiatives, and carefully studied practices, and then enact innovative solutions to increase student learning. Candidates inquire deeply into how their students are learning, and use data to inform their instruction. Teacher candidates participate in all appropriate school and district professional development and school-wide activities, thereby becoming professionals who are part of the fabric of a studio school, not just a temporary teacher candidate. Graduating educators have experienced an innovative education which prepares them for their future career as educational leaders in our region and beyond. This area of specialization in elementary education prepares students to teach in grades 5-9.

### University General Education and Graduation Requirements

B.S. Ed. degree candidates must complete the following General Education Requirements and Graduation Requirements of the University as outlined in this Bulletin.

The courses listed below fulfill general education requirements and best prepare students for advanced education coursework and licensure exams.

### Humanities and Fine Arts

#### Elementary Education BSEd, Middle School Education Emphasis

The Bachelor of Science in Education (B.S.Ed.) in Elementary Education prepares those who desire to teach grades 1 - 6. The core courses are combined with one of three emphasis areas: Special Education, Teaching English to Speakers of Other Languages (TESOL), or Middle School. It is also possible to select the Special Education emphasis area and take the TESOL courses for TESOL endorsement. Please see each of the Emphasis Area Requirements listed below.

Undergraduate educator preparation is both engaging and innovative. Our high quality undergraduate educator preparation programs are designed around research-based scholarship and practical community-based contexts. To prepare our undergraduate students as the highest quality educators for our region, we contribute to and harness the resources of our deep community partnerships. The community-based experiences broaden candidates’ understanding of their own identity as educators as well as enhancing their ability to build relationships, extend their skills, and understand family/community dynamics and interactions.

For their final year-long practicum, teacher candidates are immersed in Studio Schools. These partnering K-12 schools participate in our innovative, collaborative approach to educator preparation. Rather than being placed as individuals with one cooperating teacher, our candidates work with multiple teachers learning from each one, this process is supported and facilitated on-site by a specially trained UMSL clinical educator who leads a weekly seminar, conducts observations and provides candidates with regular feedback to guide their growth. The focus of candidates’ work is to explore challenges of student learning, envision solutions based on their research-based coursework, recent school initiatives, and carefully studied practices, and then enact innovative solutions to increase student learning. Candidates inquire deeply into how their students are learning, and use data to inform their instruction. Teacher candidates participate in all appropriate school and district professional development and school-wide activities, thereby becoming professionals who are part of the fabric of a studio school, not just a temporary teacher candidate. Graduating educators have experienced an innovative education which prepares them for their future career as educational leaders in our region and beyond.

This area of specialization in elementary education prepares students to teach in grades 5-9.

**Learning Outcomes**

Upon completion of the program, graduates will be able to:

- Continually reflect on professional growth to improve student learning outcomes/enhance student learning.
- Integrate technology to create meaningful student learning within the context of a global digital society.
- Apply content and pedagogical knowledge to create authentic and deep learning experiences.
- Use learning science principles to design, implement, and evaluate curriculum based on learning standards.
- Foster effective working relationships with students, school colleagues, families, and community members to enhance student learning and well-being.
- Design and establish a safe, inclusive, and respectful learning environment that nurtures the intellectual, social, and personal development of all students.
- Use equitable frameworks and inclusive practices to create a variety of instructional and assessment opportunities adapted to diverse learners to encourage all students’ critical thinking, problem solving, and performance skills.

---

### Program Requirements

All students in the B.S.Ed. in Elementary Education program are required to take the following Teacher Education courses, as well as the required courses for the selected emphasis area. Each student must also complete all required courses and certification assessments as specified by the Missouri Department of Elementary and Secondary Education.

### Grade Requirement

Professional Education courses must be completed with a grade of C or better (a grade of C- or below must be retaken).

### GPA Requirement

Beginning with those students graduating in May 2017 who will also receive teaching certification, the Missouri Department of Elementary and Secondary Education requires a 3.0 GPA in professional education courses, a 3.0 GPA in the teaching content field, and a 2.75 overall GPA.

### Assessment Requirement

Students must pass the required DESE certification assessments to receive the B.S.Ed. degree.

### Preparing for the Teacher Education Program

The following courses must be completed prior to applying for admission to the teacher education program:

### Teacher Education Program

The following courses are completed after acceptance into the teacher education program:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>TCH ED 3001</td>
<td>Mid-Level Clinical Experience: Diverse Learners</td>
<td>1</td>
</tr>
<tr>
<td>TCH ED 3212</td>
<td>Sociolinguistics and Communication in the Classroom</td>
<td>3</td>
</tr>
<tr>
<td>ED PSY 3312</td>
<td>Psychology of Learning, Instruction, and Assessment</td>
<td>3</td>
</tr>
<tr>
<td>SPEC ED 3318</td>
<td>Inclusive Classrooms</td>
<td>3</td>
</tr>
</tbody>
</table>
In addition to the above courses, students must select at least one emphasis area and complete all required coursework for the emphasis area.

The program will culminate in the completion of two sequential site-based practicum experience courses.

**Emphasis Area Requirements**

This emphasis area in elementary education prepares students for teaching in inclusive classrooms and for teaching English to speakers of other languages (TESOL).

All candidates must complete the Beginning Teacher Education Program and Teacher Education Program course work above in the College of Education.

Elementary education majors must also complete the following Teacher Education Program courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ART ED 2179</td>
<td>Visual Art Activities for Elementary School</td>

<td>12</td>
</tr>
</tbody>
</table>

**Total Credit Hours: 140**

**Learning Outcomes**

Upon completion of the program, graduates will be able to:

- Continually reflect on professional growth to improve student learning outcomes/enhance student learning.
- Integrate technology to create meaningful student learning within the context of a global digital society.
- Apply content and pedagogical knowledge to create authentic and deep learning experiences.
- Use learning science principles to design, implement, and evaluate curriculum based on learning standards.
- Foster effective working relationships with students, school colleagues, families, and community members to enhance student learning and well-being.
- Design and establish a safe, inclusive, and respectful learning environment that nurtures the intellectual, social, and personal development of all students.
- Use equitable frameworks and inclusive practices to create a variety of instructional and assessment opportunities adapted to diverse learners to encourage all students’ critical thinking, problem solving, and performance skills.

**Elementary Education BSEd, Special Education Emphasis**

The Bachelor of Science in Education (B.S.Ed.) in Elementary Education prepares those who desire to teach grades 1 - 6. The core courses are combined with one of three emphasis areas: Special Education, Teaching English to Speakers of Other Languages (TESOL), or Middle School. It is also possible to select the Special Education emphasis area and take the TESOL courses for TESOL endorsement. Please see each of the Emphasis Area Requirements listed below.

Undergraduate educator preparation is both engaging and innovative. Our high quality undergraduate educator preparation programs are designed around research-based scholarship and practical community-based contexts. To prepare our undergraduate students as the highest quality educators for our region, we contribute to and harness the resources of our deep community partnerships. The community-based experiences broaden candidates’ understanding of their own identity as educators as
well as enhancing their ability to build relationships, extend their skills, and understand family/community dynamics and interactions.

For their final year-long practicum, teacher candidates are immersed in Studio Schools. These partnering K-12 schools participate in our innovative, collaborative approach to educator preparation. Rather than being placed as individuals with one cooperating teacher, our candidates work with multiple teachers learning from each one, this process is supported and facilitated on-site by a specially trained UMSL clinical educator who leads a weekly seminar, conducts observations and provides candidates with regular feedback to guide their growth.

The focus of candidates’ work is to explore challenges of student learning, envision solutions based on their research-based coursework, recent school initiatives, and carefully studied practices, and then enact innovative solutions to increase student learning. Candidates inquire deeply into how their students are learning, and use data to inform their instruction. Teacher candidates participate in all appropriate school and district professional development and school-wide activities, thereby becoming professionals who are part of the fabric of a studio school, not a just a temporary teacher candidate. Graduating educators have experienced an innovative education which prepares them for their future career as educational leaders in our region and beyond.

The Bachelor’s of Science in Elementary Education degree prepares students to teach in elementary or middle school settings. This program requires the selection and completion of required coursework in one of the following emphasis areas: Special Education; Teaching English to Speakers of Other Languages (TESOL); Special Education and TESOL; or Middle School.

### University General Education and Graduation Requirements

B.S.Ed. degree candidates must complete the following General Education Requirements (p. 51) and Graduation Requirements (p. 19) of the University as outlined in this Bulletin.

The courses listed below fulfill these requirements and best prepare students for advanced education coursework and licensure exams.

#### First Year Writing

### Program Requirements

All students in the B.S.Ed. in Elementary Education program are required to take the following Teacher Education courses, as well as the required courses for the selected emphasis area. Each student must also complete all required courses and certification assessments as specified by the Missouri Department of Elementary and Secondary Education.

#### Grade Requirement

Professional Education courses must be completed with a grade of C or better (a grade of C- or below must be retaken).

#### GPA Requirement

Beginning with those students graduating in May 2017 who will also receive teaching certification, the Missouri Department of Elementary and Secondary Education requires a 3.0 GPA in professional education courses, a 3.0 GPA in the teaching content field, and a 2.75 overall GPA.

### Assessment Requirement

Students must pass the required DESE certification assessments to receive the B.S.Ed. degree.

### Preparing for the Teacher Education Program

The following courses must be completed prior to applying for admission to the teacher education program:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>TCH ED 1000</td>

**Elementary Education MEd**

**Master of Education: Elementary Education**

- Early Childhood emphasis
- General emphasis
- Reading emphasis

The Masters in Elementary Education is appropriate for early childhood and elementary teachers, specialists, department chairpersons, and those who work in informal or international educational settings. Candidates choose two 9 hour concentration areas that will support their personal growth and development as an educational leader. It is important that both students and advisors plan ahead to insure courses in concentration areas are taken when they are offered in the 3 year rotation schedule. Programs must be planned with the academic advisor and meet the approval of the faculty advisor, adhering to the College of Education and UMSL Graduate School policies.

Concentration area choices will appear at the end of the M.Ed. transcript.

**General Emphasis Program for ELE ED**

The M.Ed. in Elementary Education consists of 15 required hours (5 courses) plus student choice of two 9 hour concentrations from the list below. The General emphasis requirements are met by (a) completing three required foundational courses (9 hrs.) toward the beginning of the M.Ed. program, (b) completing the coursework for two choice concentration areas (2*9 hrs each), and (c) completing the two exit capstone research classes (6 hrs.) for a total of 33 hours.

Concentration areas indicate zero to three REQUIRED courses; some then offer a list of course CHOICE selections as a menu to choose your remaining hours for that concentration. ALL Concentration choices total nine hours of graduate credit.

An Elective Concentration allows students, with advisor sign-off, to construct an individualized set of target courses for 1 of their 2 concentration areas. Transfer graduate credit from another institution could also fit into this concentration choice. Finally, those who want to take 9 graduate hours in an academic content area may use the Discipline Content Area Concentration to integrate this advanced work into their M.Ed. program.

**Reading and Early Childhood Emphasis Areas for ELE ED**
Students who applied to the reading or early childhood emphasis areas and wish to focus intensively (e.g. 18 hrs) in one area of expertise are required to sign up for two sequential 9 hour concentrations. Those in reading should select the Literacy I and II concentrations. Those in early childhood should select the Early Childhood I and II concentrations. Additional coursework may be required for licensure.

1) Required Core (9 hours)

Students are required to complete the following courses within the first 15 hours of study.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>TCH ED 6010</td>
<td>Examining History, Community and Social Justice in Education</td>
<td>3</td>
</tr>
<tr>
<td>TCH ED 6020</td>
<td>Teacher Action, Advocacy and Leadership</td>
<td>3</td>
</tr>
<tr>
<td>ED PSY 6030</td>
<td>Instruction, Learning and Assessment</td>
<td>3</td>
</tr>
</tbody>
</table>

2) Required Research Course (6 hours)

These two research courses should be taken in sequence (not together) at the end of your program since the first course prepares you with the knowledge and skills to successfully complete an Action Research project in the capstone exit course. You will design and execute a piece of original practitioner research and present your findings in a public forum.

TCH ED 6909 Teacher Action Research I 3
TCH ED 6910 Teacher Action Research Capstone 3

1 This course is not offered in summer sessions.

3) 9 hour Concentration Choices (CHOOSE 2 or both Concentrations I & II under an emphasis option as indicated)

- a) Early Childhood Concentrations I and II (Option A or B)
- b) Curriculum and Instruction Concentration
- c) Literacy Concentrations I and II (Certificates in Reading and Writing available)
- d) Special Education Concentration
- e) Social Justice Issues Concentration (Social Justice in Education Certificate available)
- f) Leadership in Education Concentration
- g) STEM Concentration
- h) Discipline Content Area Concentration

Early Childhood Education Concentration I and II (Options A & B): 9 hours each

Designed to enable candidates to further their competencies as teachers or program administrators in public and private early childhood program, early childhood education also prepares people for positions in community agencies that support families and young children. Job opportunities working with young children continue to expand. New research tools have altered our understanding of learning processes in young children with the plasticity of the brain and children’s gift for inquiry in systematic ways. Language acquisition and numeracy are acquired in social communities of practice. Explore this exciting field. Concentration I is designed for those who want to increase knowledge and skills in working with young children in school, after school, and home settings. Concentration II is geared for professionals in field.

Early Childhood Concentration I: *Courses offered online*

Curriculum and Instruction Concentration: 9 hours

In order for all students to optimally achieve, teachers must develop integrated, standards-based, innovative curriculum delivered as engaging instruction that equips students to develop the knowledge and skills for a global society. This concentration explores common issues in curriculum design and implementation. Educators will create curriculum and design instruction for their own educational settings.

Literacy Concentrations I: 9 hours

Concentration I is designed for educators who want a deeper understanding of reading and writing processes across the lifespan. This area emphasizes the preparation of leaders in a wide range of school and community settings, including literacy coaches or grade-level leaders. Concentration I emphasizes cutting-edge theory, research and instructional practices in literacy education. Concentration II, for those wanting a Literacy endorsement, applies these understandings through a variety of readings, writings and experiences, both in Clinical and online settings. There are two choices for Concentration II: Writing and Reading. Students who complete Concentrations I and II in Literacy can apply these courses to a K-12 DESE reading certificate or the UMSL Graduate...
Certificate in the Teaching of Writing, but additional coursework may be required.

**Literacy Concentration II: 9 hours Choice A:**

**Courses to complete the Reading Emphasis Certification**

The M.Ed. program with emphasis in reading (literacy) is designed to enable candidates to further their competencies as teachers of reading, writing, and the other communication arts. The program also prepares them for positions as literacy coaches, reading specialists, curriculum specialists in communication arts and reading areas, consultants in areas of communication arts, and/or for further graduate study. Concentration II enables a student to earn a master's degree in education with credit towards an emphasis in reading as per requirements laid out by the Department of Elementary and Secondary Education (DESE) for special reading certification in Missouri. Students must complete the required 15 hours of M.Ed. courses, an educational psychology course, plus 18 hours of literacy courses.

- **ELE ED 6493** Reading Specialist Practicum I 3
- **ELE ED 6494** Reading Specialist Practicum II 3
- **TCH ED 4391** Literacy for Adolescent Learners in Content Areas 3

**Concentration II: 9 hours Choice B:**

**Courses to complete the Graduate Certificate in the Teaching of Writing**

**Admission**

Applicants who wish to earn a Graduate Certificate in the Teaching of Writing must apply for admission to the certificate program. Applicants must have a 2.75 GPA in undergraduate coursework to be admitted. A background in K-12 or adult education is desirable.

- **TCH ED 6880** Gateway Writing Project 6
- **TCH ED 6890** Seminar in Professional Writing for Teachers 3

**Special Education Concentration: 9 hours**

For educators who are not receiving a degree in Special Education, but would like to expand their understanding of Special Education law and the needs of students with cross-categorical disabilities and those with Autism Spectrum Disorders, this concentration offers coursework on the characteristics and effective strategies for teaching students with varied abilities in educational settings. Those interested in the M.Ed. in Special Education or the Graduate Certificate in Autism and Developmental Disabilities should choose concentrations in those designated programs under the Masters in Special Education or Autism Certificate links in Bulletin.

- **SPEC ED 6325** Advanced Studies in Classroom & Behavior Management 3
- **SPEC ED 6345** Characteristics and Education of Students with High-Incidence Disabilities 3
- **SPEC ED 6415** The Law and Special Education 3
- **SPEC ED 6437** Applied Behavior Analysis: Functional Assessment and Interventions 3

**Social Justice Issues Concentration: 9 hours**

Educators need to challenge themselves to understand the variety of assets diverse students and their families bring to educational contexts. An interdisciplinary group of courses is offered for this concentration that invite personal growth and academic knowledge in the area of social justice. An emphasis on engagement and action permeates the course activities. (With completion of TCH ED 6010, TCH ED 6020 and TCH ED 6910 and 9 hours from the list below, students will meet requirements for the Social Justice in Education Certificate. (Applicants who wish to earn a Graduate Certificate in Social Justice in Education must apply for admission to the certificate program.)

Choose three of the following:

- **CNS ED 6520** Counseling Women Toward Empowerment 3
- **CNS ED 6550** Social Class and Poverty Issues In Counseling 3
- **ED FND 6203** Political Contexts of Education 3
- **GS 5053** Advanced Studies In African-American History 3
- **TCH ED 6230** Cross-Cultural Communication in the Classroom 3

**Leadership in Education Concentration: 9 hours**

Organizations need leaders who understand the complexities of systems and working with diverse staff and families within situated communities in a dynamic and changing educational environment. Leadership skills can be taught and nurtured. This Leadership in Education concentration allows educators in various roles and career levels to apply principles of leadership to creating effective communities of practice.

**Required Courses:**

- **ED ADM 6053** Organizational Change in Education 3

Choose two of the following:

- **ED FND 6200** Demographic Contexts of Education 3
- **ED FND 6203** Political Contexts of Education 3
- **ED ADM 6205** Legal Contexts of Education 3
- **ED ADM 6401** School Staff Development and Supervision 3

**STEM Concentration: 9 hours**

Many challenges remain in the attraction and preparation of youth for the careers in fields of science, technology, engineering and mathematics (STEM). Those who teach in these areas need to continually work toward developing and implementing relevant curricula and develop new instructional strategies as well as revise and upgrade current methodology. The STEM Concentration focuses on professional development with respect to instructional research and best practices for all involved in enhancing STEM literacy.
Educators recognize the importance of staying current in their field of teaching. This Discipline Content Concentration allows for 9 hours of graduate level credit in a content area related to one’s field of practice. This includes graduate credit in areas such as history, English, math, science, foreign language, health and PE, and art and music. Courses for this concentration need to be approved by advisors before they are included on the M-1 program form.

Elective Concentration: 9 hours
To insure maximum flexibility in course selection to meet the individual needs of professional educator’s development, this concentration represents an opportunity to select three unique courses from the various concentration areas in an eclectic and personalized way. Choices to include in this concentration need to be approved by advisors and signed off on by the program director.

Supporting Language Learners: TESOL Concentration I: 9 hours
This concentration is designed for those who want to better understand Second Language Acquisition (SLA) and Teaching English to Speakers of Other Languages (TESOL) processes. Courses emphasize the theoretical foundations of Second Language Acquisition and TESOL and their practical application to practice. Concentration I is open to all Masters in Education students. A TESOL endorsement from DESE is available under the SEC ED M.Ed. options.

Middle School Education Concentration: 9 hours
The concentration in middle level education is designed for graduate students who would like to further their competencies as a middle level educator.

Learning Outcomes
Upon completion of the program, graduates will be able to:

- Continually and systematically reflect on professional growth to enhance student learning.
- Integrate technology to create meaningful student learning within the context of a global digital society.
- Apply advanced content and pedagogical knowledge to create authentic and deep learning experiences.
- Extend learning science principles to design, implement, and evaluate curriculum based on learning standards.
- Create and foster effective working relationships with students, school colleagues, families, and community members to enhance student learning and well-being.
- Design and establish a safe, inclusive, and respectful learning environment that nurtures the intellectual, social, and personal development of all students.
- Utilize equitable frameworks and inclusive practices to expertly create a variety of instructional and assessment opportunities adapted to diverse learners to encourage all students' critical thinking, problem solving, and performance skills.

Elementary Education MEd with Elementary and Special Education Teacher Certification
This program of study is for individuals with a Bachelor's degree who would like to prepare for teacher certification in Elementary Education and Special Education. This option leads to Missouri Initial Teacher Certification in Elementary Teaching 1-6 with an add-on in Mild/Moderate Cross-Categorical Disabilities, K-12 Special Education.

Admission Requirements for the Option in Elementary Teacher Certification with an add-on in Mild/Moderate Cross-Categorical Disabilities, K-12 Special Education:
- A passing score on the designated Missouri Content Examination or an approved program of study
- A 2.75 or higher overall GPA
- Approved results of the Family Care Safety Registry
- A clear TB test or chest x-ray, if appropriate
- Students must meet the application deadlines set by the Graduate School

Learning Outcomes
Upon completion of the program, graduates will be able to:

- Continually and systematically reflect on professional growth to enhance student learning.
- Integrate technology to create meaningful student learning within the context of a global digital society.
- Apply advanced content and pedagogical knowledge to create authentic and deep learning experiences.
- Extend learning science principles to design, implement, and evaluate curriculum based on learning standards.
- Create and foster effective working relationships with students, school colleagues, families, and community members to enhance student learning and well-being.
- Design and establish a safe, inclusive, and respectful learning environment that nurtures the intellectual, social, and personal development of all students.
- Utilize equitable frameworks and inclusive practices to expertly create a variety of instructional and assessment opportunities adapted to diverse learners to encourage all students’ critical thinking, problem solving, and performance skills.

Elementary Education MEd, Early Childhood Emphasis

Master of Education: Elementary Education

- Early Childhood emphasis
- General emphasis
- Reading emphasis

The Masters in Elementary Education is appropriate for early childhood and elementary teachers, specialists, department chairpersons, and those who work in informal or international educational settings. Candidates choose two 9 hour concentration areas that will support their personal growth and development as an educational leader. It is important that both students and advisors plan ahead to insure courses in concentration areas are taken when they are offered in the 3 year rotation schedule. Programs must be planned with the academic advisor and meet the approval of the faculty advisor, adhering to the College of Education and UMSL Graduate School policies.

Concentration area choices will appear at the end of the M.Ed. transcript.

General Emphasis Program for ELE ED

The M.Ed. in Elementary Education consists of 15 required hours (5 courses) plus student choice of two 9 hour concentrations from the list below. The General emphasis requirements are met by (a) completing three required foundational courses (9 hrs.) toward the beginning of the M.Ed. program, (b) completing the coursework for two choice concentration areas (2*9 hrs each), and (c) completing the two exit capstone research classes (6 hrs.) for a total of 33 hours.

Concentration areas indicate zero to three REQUIRED courses; some then offer a list of course CHOICE selections as a menu to choose your remaining hours for that concentration. ALL Concentration choices total nine hours of graduate credit.

An Elective Concentration allows students, with advisor sign-off, to construct an individualized set of target courses for 1 of their 2 concentration areas. Transfer graduate credit from another institution could also fit into this concentration choice. Finally, those who want to take 9 graduate hours in an academic content area may use the Discipline Content Area Concentration to integrate this advanced work into their M.Ed. program.

Reading and Early Childhood Emphasis Areas for ELE ED

Students who applied to the reading or early childhood emphasis areas and wish to focus intensively (e.g. 18 hrs) in one area of expertise are required to sign up for two sequential 9 hour concentrations. Those in reading should select the Literacy I and II concentrations. Those in early childhood should select the Early Childhood I and II concentrations. Additional coursework may be required for licensure.

1) Required Core (9 hours)
Students are required to complete the following courses within the first 15 hours of study.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>TCH ED 6010</td>
<td>Examining History, Community and Social Justice in Education</td>
<td>3</td>
</tr>
<tr>
<td>TCH ED 6020</td>
<td>Teacher Action, Advocacy and Leadership</td>
<td>3</td>
</tr>
<tr>
<td>ED PSY 6030</td>
<td>Instruction, Learning and Assessment</td>
<td>3</td>
</tr>
</tbody>
</table>

2) Required Research Course (6 hours)
These two research courses should be taken in sequence (not together) at the end of your program since the first course prepares you with the knowledge and skills to successfully complete an Action Research project in the capstone exit course. You will design and execute a piece of original practitioner research and present your findings in a public forum.

</tbody>
</table>

1 This course is not offered in summer sessions.

3) 9 hour Concentration Choices (CHOOSE 2 or both Concentrations I & II under an emphasis option as indicated)

- a) Early Childhood Concentrations I and II (Option A or B)
- b) Curriculum and Instruction Concentration
- c) Literacy Concentrations I and II (Certificates in Reading and Writing available)
- d) Special Education Concentration
- e) Social Justice Issues Concentration (Social Justice in Education Certificate available)
- f) Leadership in Education Concentration
- g) STEM Concentration
- h) Discipline Content Area Concentration
Early Childhood Education Concentration I and II (Options A & B): 9 hours each

Designed to enable candidates to further their competencies as teachers or program administrators in public and private early childhood program, early childhood education also prepares people for positions in community agencies that support families and young children. Job opportunities working with young children continue to expand. New research tools have altered our understanding of learning processes in young children with the plasticity of the brain and children's gift for inquiry in systematic ways. Language acquisition and numeracy are acquired in social communities of practice. Explore this exciting field. Concentration I is designed for those who want to increase knowledge and skills in working with young children in school, after school, and home settings. Concentration II is geared for professionals in field.

Early Childhood Concentration I: *Courses offered online*

Required Courses:
- ECH ED 6412 Foundations of Early Childhood Education 3
- ECH ED 6413 Educational Role of Play 3
- ED PSY 6215 Psychology of Early Childhood Development 3

Early Childhood Concentration II: Choice A: 9 hours *Courses offered online*

- ECH ED 6321 Parent and Community Resources in Early Childhood Education 3
- ECH ED 6415 Organization and Development of Early Childhood Programs 3
- EDUC 6404 Seminar 1-10

Early Childhood Special Education Concentration II: Choice B: 9 hours *Courses are NOT offered online*

- SPEC ED 6372 Screening and Diagnosis of Developmental Delays: Birth to 5 Years 3
- SPEC ED 6462 Introduction to Early Childhood Special Education 3
- SPEC ED 6463 Curriculum, Methods, and Materials for Early Childhood Special Ed 3

Curriculum and Instruction Concentration: 9 hours

In order for all students to optimally achieve, teachers must develop integrated, standards-based, innovative curriculum delivered as engaging instruction that equips students to develop the knowledge and skills for a global society. This concentration explores common issues in curriculum design and implementation. Educators will create curriculum and design instruction for their own educational settings.

Literacy Concentrations I: 9 hours

Concentration I is designed for educators who want a deeper understanding of reading and writing processes across the lifespan. This area emphasizes the preparation of leaders in a wide range of school and community settings, including literacy coaches or grade-level leaders. Concentration I emphasizes cutting-edge theory, research and instructional practices in literacy education. Concentration II, for those wanting a Literacy endorsement, applies these understandings through a variety of readings, writings and experiences, both in Clinical and online settings. There are two choices for Concentration II: Writing and Reading. Students who complete Concentrations I and II in Literacy can apply these courses to a K-12 DESE reading certificate or the UMSL Graduate Certificate in the Teaching of Writing, but additional coursework may be required.

- ELE ED 6387 Literacy Acquisition and Learning for Diverse Students 3
- ELE ED 6684 Instructional Strategies for Teaching Reading 3
- ELE ED 6686 Analysis and Correction of Reading Disabilities 3

Literacy Concentration II: 9 hours Choice A: Courses to complete the Reading Emphasis Certification

The M.Ed. program with emphasis in reading (literacy) is designed to enable candidates to further their competencies as teachers of reading, writing, and the other communication arts. The program also prepares them for positions as literacy coaches, reading specialists, curriculum specialists in communication arts and reading areas, consultants in areas of communication arts, and/or for further graduate study. Concentration II enables a student to earn a master's degree in education with credit towards an emphasis in reading as per requirements laid out by the Department of Elementary and Secondary Education (DESE) for special reading certification in Missouri. Students must complete the required 15 hours of M.Ed. courses, an educational psychology course, plus 18 hours of literacy courses.

- ELE ED 6493 Reading Specialist Practicum I 3
- ELE ED 6494 Reading Specialist Practicum II 3
- TCH ED 4391 Literacy for Adolescent Learners in Content Areas 3

Concentration II: 9 hours Choice B: Courses to complete the Graduate Certificate in the Teaching of Writing

Admission

Applicants who wish to earn a Graduate Certificate in the Teaching of Writing must apply for admission to the certificate program. Applicants must have a 2.75 GPA in undergraduate coursework to be admitted. A background in K-12 or adult education is desirable.
Leadership in Education Concentration: 9 hours

Organizations need leaders who understand the complexities of systems and working with diverse staff and families within situated communities in a dynamic and changing educational environment. Leadership skills can be taught and nurtured. This Leadership in Education concentration allows educators in various roles and career levels to apply principles of leadership to creating effective communities of practice.

Special Education Concentration: 9 hours

For educators who are not receiving a degree in Special Education, but would like to expand their understanding of Special Education law and the needs of students with cross-categorical disabilities and those with Autism Spectrum Disorders, this concentration offers coursework on the characteristics and effective strategies for teaching students with varied abilities in educational settings. Those interested in the M.Ed. in Special Education or the Graduate Certificate in Autism and Developmental Disabilities should choose concentrations in those designated programs under the Masters in Special Education or Autism Certificate links in Bulletin.

Social Justice Issues Concentration: 9 hours

Educators need to challenge themselves to understand the variety of assets diverse students and their families bring to educational contexts. An interdisciplinary group of courses is offered for this concentration that invite personal growth and academic knowledge in the area of social justice. An emphasis on engagement and action permeates the course activities. (With completion of TCH ED 6010,TCH ED 6020 and TCH ED 6910 and 9 hours from the list below, students will meet requirements for the Social Justice in Education Certificate. (Applicants who wish to earn a Graduate Certificate in Social Justice in Education must apply for admission to the certificate program.)

STEM Concentration: 9 hours

Many challenges remain in the attraction and preparation of youth for the careers in fields of science, technology, engineering and mathematics (STEM). Those who teach in these areas need to continually work toward developing and implementing relevant curricula and develop new instructional strategies as well as revise and upgrade current methodology. The STEM Concentration focuses on professional development with respect to instructional research and best practices for all involved in enhancing STEM literacy.

Discipline Content Area Concentration: 9 hours

Educators recognize the importance of staying current in their field of teaching. This Discipline Content Concentration allows for 9 hours of graduate level credit in a content area related to one’s field of practice. This includes graduate credit in areas such as history, English, math, science, foreign language, health and PE, and art and music. Courses for this concentration need to be approved by advisors before they are included on the M-1 program form.

Elective Concentration: 9 hours

To insure maximum flexibility in course selection to meet the individual needs of professional educator’s development, this concentration represents an opportunity to select three unique courses from the various concentration areas in an eclectic and personalized way. Choices to include in this concentration need to be approved by advisors and signed off on by the program director.

Supporting Language Learners: TESOL Concentration I: 9 hours

This concentration is designed for those who want to better understand Second Language Acquisition (SLA) and Teaching English to Speakers of Other Languages (TESOL) processes. Courses emphasize the theoretical foundations of Second Language Acquisition and TESOL and their practical application to practice. Concentration I is open to all Masters in Education students. A TESOL endorsement from DESE is available under the SEC ED M.Ed. options.
TCH ED 6210  Foundations of Teaching English to Speakers of Other Languages  3
TCH ED 6220  Principles of Second/Foreign Language Acquisition  3
TCH ED 6230  Cross-Cultural Communication in the Classroom  3

Middle School Education Concentration: 9 hours

The concentration in middle level education is designed for graduate students who would like to further their competencies as a middle level educator.

Choose three of the following:

TCH ED 5312  Teaching Reading in the Content Areas  3
ED PSY 6222  Advanced Studies in Child and Adolescent Development  3
ED ADM 6401  School Staff Development and Supervision  3
SEC ED 6416  Curriculum Design for Educational Programs  3

Emphasis Area Requirements

The M.Ed. program with an emphasis in early childhood education is designed to enable candidates to further their competencies as teachers or program administrators in public and private early childhood program. The program also prepares them for positions in community agencies that support families and young children. The minimum required and recommended courses are as follows. Students must complete the required Core Competencies and Capstone Course as listed above.

Required:
ECH ED 6412  Foundations of Early Childhood Education  3
ECH ED 6413  Educational Role of Play  3
ECH ED 6415  Organization and Development of Early Childhood Programs  3

Elective hours  6

Total: 33 hours

Learning Outcomes

Upon completion of the program graduates will be able to:

- Continually and systematically reflect on professional growth to enhance student learning.
- Integrate technology to create meaningful student learning within the context of a global digital society.
- Apply advanced content and pedagogical knowledge to create authentic and deep learning experiences.
- Extend learning science principles to design, implement, and evaluate curriculum based on learning standards.
- Create and foster effective working relationships with students, school colleagues, families, and community members to enhance student learning and well-being.
- Design and establish a safe, inclusive, and respectful learning environment that nurtures the intellectual, social, and personal development of all students.

- Utilize equitable frameworks and inclusive practices to expertly create a variety of instructional and assessment opportunities adapted to diverse learners to encourage all students’ critical thinking, problem solving, and performance skills.

Elementary Education MEd, Reading Emphasis

Emphasis in Reading

The M.Ed. program with emphasis in reading (literacy) is designed to enable candidates to further their competencies as teachers of reading, writing, and the other communication arts. The program also prepares them for positions as literacy coaches, reading specialists, curriculum specialist in communication arts and reading areas, consultants in areas of communication arts, and/or for further graduate study. The following program enables the student to earn a M.Ed. with an emphasis in Reading while fulfilling the Department of Elementary and Secondary Education’s requirements for special reading certification in Missouri. Students must complete the first two levels of the Required Core, an educational psychology course, an approved educational research course, 18 hours of literacy courses, and an action research capstone course. The minimum required and recommended courses are as follows:

Required Core (9 hours)

TCH ED 6010  Examining History, Community and Social Justice in Education  3
TCH ED 6020  Teacher Action, Advocacy and Leadership  3
ED PSY 6030  Instruction, Learning and Assessment  3

Required Research Course – Evaluation of Abilities and Achievement (3 hours)
Choose one course. Dependent on student needs and interests.  3
ED REM 6707  Classroom Measurement and Evaluation
ED REM 6709
ED REM 6716  Academic Assessment and Intervention

Reading Concentration (18 hours):

Required Courses
ELE ED 6387  Literacy Acquisition and Learning for Diverse Students  3
ELE ED 6684  Instructional Strategies for Teaching Reading
ELE ED 6686  Analysis and Correction of Reading Disabilities  3
ELE ED 6493  Reading Specialist Practicum I  3
ELE ED 6494  Reading Specialist Practicum II  3

And at least one course from the literacy-related elective list or from the certification-related elective list below (min. 3 hrs):

Literacy Related Electives
ELE ED 6436  Children’s Literature I: Survey and Analysis  3
ELE ED 6688
ENGL 6880  Gateway Writing Project  3-6
TCH ED 5312  Teaching Reading in the Content Areas  4
To be recommended for Missouri Department of Elementary and Secondary Education special reading certification, teachers must have a valid Missouri teacher's certificate and two years of classroom teaching experience, and they must have had the following at either the undergraduate or graduate level: two additional courses in reading; language acquisition or development; classroom management techniques; counseling techniques (to include exceptional children and their families: child AND adolescent psychology; and testing, evaluation, and achievement. These certification requirements might be in addition to the courses listed in the program of study above. See your graduate advisor for information about these courses. M. Ed. Students needing any of the above can elect to take these courses at the graduate level where available and apply them to their concentration area.

*Only one 4000 level course can be applied to the M.Ed.*

**Learning Outcomes**

Upon completion of the program, graduates will be able to:

- Continually and systematically reflect on professional growth to enhance student learning.
- Integrate technology to create meaningful student learning within the context of a global digital society.
- Apply advanced content and pedagogical knowledge to create authentic and deep learning experiences.
- Extend learning science principles to design, implement, and evaluate curriculum based on learning standards.
- Create and foster effective working relationships with students, school colleagues, families, and community members to enhance student learning and well-being.
- Design and establish a safe, inclusive, and respectful learning environment that nurtures the intellectual, social, and personal development of all students.
- Utilize equitable frameworks and inclusive practices to expertly create a variety of instructional and assessment opportunities adapted to diverse learners to encourage all students' critical thinking, problem solving, and performance skills.

**Elementary School Teaching Graduate Certificate**

The Graduate Certificate in Elementary School Teaching prepares those with at least a bachelor's degree, who are not pursuing an M.Ed., for teaching in the Elementary classroom.

**Admission Requirements for the Graduate Certificate in Elementary School Teaching:**

- A passing score on the designated Missouri Content Examination or an approved program of study
- A 2.75 or higher overall GPA
- Approved results of the Family Care Safety Registry
- A clear TB test or chest x-ray, if appropriate
- Students must meet the application deadlines set by the Graduate School

Learning Outcomes

Upon completion of the program, graduates will be able to:

- Continually reflect on professional growth to improve student learning outcomes/enhance student learning.
- Integrate technology to create meaningful student learning within the context of a global digital society.
- Apply content and pedagogical knowledge to create authentic and deep learning experiences.
- Use learning science principles to design, implement, and evaluate curriculum based on learning standards.
- Foster effective working relationships with students, school colleagues, families, and community members to enhance student learning and well-being.
- Design and establish a safe, inclusive, and respectful learning environment that nurtures the intellectual, social, and personal development of all students.
- Use equitable frameworks and inclusive practices to create a variety of instructional and assessment opportunities adapted to diverse learners to encourage all students' critical thinking, problem solving, and performance skills.

English BA

Engaging with and changing the world starts with reading and writing your way through it. The Department of English offers classroom, research, internship, and creative opportunities that will help you critically approach and insightfully analyze the diverse texts and situations you encounter every day. From reading and discussing important literary works, to impressing people with your outstanding writing, to becoming a more critical consumer and composer of digital media, the English BA positions you to advocate for awareness and change in both professional and public spheres. English majors love words, and our department offers insight into wielding their power and using them for the greater good.

General Education Requirements

All undergraduate english majors must meet the university and college general education requirements (p. 51).

The college's foreign language requirement may be met in any language.

Satisfactory/Unsatisfactory Option

Majors may take no more than 6 satisfactory/unsatisfactory hours in the department. Any English course may be taken on a satisfactory/unsatisfactory basis except the following:

<table>

Students majoring in English must take one three-hour 2000-level course in each of the following areas: Literature in English, Language and Language Studies, and Creative Writing. Collectively, the three 2000-level courses introduce all majors to the intellectual work people in English Studies do, and to explore the range of skills, processes, areas of knowledge, and practices we work with and the texts we produce.

3000 Level Major Courses: required total of 9 hours, at least six of which are literature.

Courses at this level feature a more narrow range of content, deepening the skills and habits of mind learned at the 2000 level.
Clarity and Utilize Effective Writing Processes. They Will:

• Experiment with and enact various textual and discursive forms
• Integrate audience expectations and/or needs into texts they create
• Challenge audience expectations when appropriate
• Construct purposeful texts
  • (i.e. texts may include but are not limited to: literature, rhetoric, language, film, music, and other media/interactions)

English BA Graduates Will Be Strong Writers, Compose Ideas with Outcomes

Senior level courses are more specialized in content and more challenging in the kinds of work students produce. A wide range of these is available, in literature in English, writing and language, and creative writing. A student can focus on one of those three areas or may remain a generalist.

Electives: 9 hours of English courses at any level, exclusive of courses used to satisfy the first-year and junior-level writing requirements.

B.S. Ed. in Secondary Education with Emphasis in English

The B.S. Ed. is a professional education degree designed for students who wish to pursue a teaching career in secondary schools. Much of the discipline-specific coursework parallels the B.A. or B.S. degree in the discipline; however, the Missouri Department of Elementary and Secondary Education (DESE) requires specific coursework for teacher certification. Therefore, students interested in the B.S. Ed. should contact the advising office (OASIS) 314-516-5937 in the College of Education for discipline-specific requirements. Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

B.A. in English with Master’s Level Coursework for Secondary Teacher Certification

In addition to the B.S. Ed., students may opt to complete a B.A. or B.S. degree in their discipline as an undergraduate, followed by admission to the Graduate School for Master’s level teaching certification. The College of Education has a one-year accelerated program for post-graduate certification called Teach in 12, or students can choose a traditional path to certification. Graduate coursework for certification can apply towards a Master’s Degree in Secondary Education, with additional coursework. Students interested in Master’s Level teacher certification should contact the advising office (OASIS) 314-516-5937 in the College of Education. Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

Bachelor of Arts (B.A.) in English Learning Outcomes

English BA Graduates Will Be Culturally and Historically Aware Citizens and Professionals. They will:

• Explore and explain the interrelatedness of texts with culture, race, ethnicity, gender, disability, sexuality, class, and power, and the intersectional and sometimes fluid nature of such concepts
• Articulate worldviews from varied perspectives and evidence-based positions
• Discuss the historical dimensions and contemporary implications of texts
• Explore the structure and history of the English language
• Demonstrate strong social awareness

English BA Graduates Will Be Strong Writers, Compose Ideas with Outcomes

English BA Graduates Participate in Conversations via Reading, Writing, Speaking, Listening, and Critical Thinking. They Will:

• Read, write, and interact with a variety of texts
  • Read broadly and widely
  • Read closely and critically
• Engage with increasingly complex texts as readers and writers
• Contribute their own perspectives to scholarly and public conversations involving texts they read
• Develop their own ideas and elaborate on them in relation to the ideas of others
  • Discuss texts thoughtfully, inside and outside of classrooms
  • Listen to others and synthesize perspectives when discussing texts
• Develop and master listening rhetorically, and listening to understand, not merely to argue against.

English BA Graduates Will Engage with a Wide Variety of Texts and Become Astute Analysts and Creators. They will:

• Define and describe texts
• Identify patterns in texts
• Analyze patterns in texts
• Make claims based on evidence found in texts
• Develop and propose alternative claims about texts
• Create original texts in response to texts
• Create and articulate original ideas in texts

15 15
Admission Requirements

To enter the graduate program in English a candidate must satisfy the requirements both of the Graduate School and the Department of English. A candidate should have a bachelor’s degree, with at least 18 hours in English above the freshmen level, 12 of which must be in literature. Normally, only students with a grade point average of 3.0 in undergraduate English courses and an overall undergraduate average of 2.75 will be considered. Though the English department welcomes scores from the Graduate Record Aptitude Exam and letters of recommendation, it does not require either of these. (Students applying for Teaching Assistantships, please see “Financial Aid and Teaching Assistantships.”)

The graduate coordinator of the English Department with the advice of the graduate committee will use the undergraduate record and, if available, the scores of the GRE general test as the basis for a decision. We welcome letters of recommendation from the applicant’s former English instructors and a sample of expository prose. Applications to the MA in English are considered at all times. However, because spaces in graduate courses are limited, it is strongly advised that prospective students submit their applications well before the semester begins in order to gain admission into their appropriate classes.

Degree Requirements

Master of Arts in English

In addition to the Graduate School requirements, students must complete at least 36 hours, 24 hours of which must be in 5000-level courses. Twelve hours may be taken in 4000-level courses. Required of both concentrations, literature and writing studies:

- ENGL 5000: Introduction to Graduate Study in English. Focuses upon bibliography, research methods, and literary criticism. Should be taken at the outset of the program, for graduate (not undergraduate) credit.

Students who choose a literature track must also take at least one course in each of the following six areas:

- Area 1, British literature before 1660
- Area 2, British literature between 1660 and 1900
- Area 3, Twentieth-century literature (British, American, post-colonial, or in translation)
- Area 4, American literature
- Area 5, Theories of writing, criticism, language, and/or culture
- Area 6, Literature in translation study of a particular literary genre, or a course in another relevant discipline

Students who choose the writing studies track must take:

- 18 hours in literature courses providing broad coverage rather than a narrow focus on a particular genre or historical period (ENGL 5000 constitutes three of these required literature credits)
- 18 hours in writing studies courses (including ENGL 5840)

If students choose the thesis option (6 hours) they will take 15 hours in literature and 15 hours in writing studies.

Teaching Assistantships

A number of teaching assistantships are available for qualified applicants. In addition to the undergraduate record and the scores on the GRE general test, applications should include two letters of recommendation from former English instructors. Applications should be submitted to the graduate coordinator of the English department no later than March 15 preceding the academic year for which the appointment is desired.

The thesis may be a critical study, theoretical exploration or descriptive

Writing Studies Emphasis: The final document will demonstrate significant familiarity with scholarship in Writing Studies through the critical analysis and clear synthesis of published research, observational data (where appropriate) and the student’s thoughts/ reflections/ positions. The thesis may be a critical study, theoretical exploration or descriptive
assessment of fieldwork drawing on writing, language, rhetorical, socio-cultural or reading theories; literacy; and the history of writing instruction; composition pedagogies; technologies.

## English Minor

### Minor in English

Students minoring in English may choose to specialize in literature, language and writing, or creative writing. Alternatively, students may choose a mixture of courses and remain generalists.

The minor will include a total of 18 hours of required English courses, exclusive of first-year composition and junior-level writing:

- One 2000-level core curriculum course in each of the following areas: one in literature, one in writing and language, and one in creative writing.
- Nine more hours of English courses of the student’s choosing. At least three of those hours must be at the 4000 level.

### Learning Outcomes

#### English Minor Graduates Will Be Able To:

- Demonstrate a knowledge that what counts as text is broader than traditionally assumed
- Interpret and compose for numerous contexts
- Demonstrate knowledge about audience and apply that understanding in shaping texts
- Compose purposeful texts
- Exhibit the ability to practice revision processes
- Make use of correct grammar and writing mechanics when rhetorically appropriate
- Engage with sources
- Analyze texts
- Develop and propose claims about texts
- Respond to texts with originality and purpose
- Contribute to scholarly and public conversations
- View the world from varied perspectives and evidence-based positions
- Apply skills and knowledge from the minor into their major course of study
- Discuss texts thoughtfully, inside and outside of classrooms
- Listen to others and synthesize perspectives when discussing texts

## Enterprise Systems Development Graduate Certificate

The Graduate Certificate in Enterprise Systems Development is designed to help students from all backgrounds achieve competence in the development and management of web-based or legacy information systems including the interface with contemporary programming languages, frameworks, platforms, testing methodologies, and security standards.

This 12 credit hour certificate program also counts toward the 30 credit hour Master of Science in Information Systems and Technology degree program requirements. Students may choose to combine this certificate with other courses and/or certificates to obtain the Master of Science in Information Systems and Technology degree.

### Admission Requirements

Applicants must meet general University of Missouri-St. Louis Graduate School admissions requirements.

### Certificate Requirements

All course prerequisites and all course waivers are applicable. Substitute courses may be approved by the appropriate department chairperson and the Director of Graduate Business Programs.

</tbody>
</table>

#### Total Hours

12

The required courses may be substituted with other courses with the approval of the Chair of the Information Systems and Technology Department.

### Learning Outcomes

Upon completion of the program, certificate earners will be able to:

- Develop business information systems
- Exhibit specialized technical expertise
- Apply software testing methodologies to ensure high quality business applications
- Apply software security standards in business applications
- Communicate effectively with information systems users

## Entrepreneurship Graduate Certificate

The Graduate Certificate in Entrepreneurship is an applied program of study designed for individuals who seek to develop skills enabling them to lead venture creation processes and sustainable growth efforts in all types of organizations. Course experiences will enable students to develop an entrepreneurial mindset and a deep understanding of problem identification, opportunity recognition, customer discovery, design thinking, and lean startup processes. Students may pursue a general track of study or may pursue either social or technology specialized tracks of study.

## Admission Requirements

Applicants must meet general University of Missouri-St. Louis Graduate School admissions requirements.

## Certificate Requirements

The Graduate Certificate in Entrepreneurship is an experientially-based 12-credit-hour program. Students complete 6 credit hours of required coursework and 6 credit hours of specialized track coursework. Students can select technology, social, or general entrepreneurship tracks. Students must complete both elective courses from the same track of study. All course prerequisites and all course waivers are applicable. Substitute courses may be approved by the appropriate department chairperson and the Director of Graduate Business Programs. All 12 credit hours taken as part of this certificate transfer to the MBA degree program.

### Elective Courses

Students must complete a minimum of nine hours, chosen from any of the following lists. The groupings are suggestions that would provide a concentrated focus in a specific area.

Additional courses that may meet this requirement:

1. a course designated as Entrepreneurship in transfer;
2. future courses, as approved by the director of entrepreneurship certificate.
Entrepreneurship in the Arts
ENT 2030 Business in the Arts 3

Entrepreneurship with Digital Marketing
CMP SCI 3010 Web Programming 3
CMP SCI 4010 Advanced Web Development with Java 3

INFSYS 3848 Introduction to Information Security 3
J E ENGR 4050 Reliability and Quality Control 3
J M ENGR 4900 Engineering Project Management 3

Learning Outcomes
Upon completion of the program, certificate earners will be able to:

• Understand and apply the language of entrepreneurship and innovation
• Apply entrepreneurship concepts in both personal and professional contexts
• Articulate and communicate new opportunities by writing and presenting elevator pitches, slide decks, and performing class presentations
• Use interdisciplinary theories and concepts to identify root causes and solve problems in any setting

Environmental Studies Minor

Minor in Environmental Studies
This is an interdisciplinary program that integrates the natural and physical sciences with the social sciences and humanities to study current environmental problems resulting from human population growth, global climate change, overuse of natural resources, pollution and biodiversity loss. A minimum 18 hours are required, 9 of which must be in the natural and physical sciences, including the listed Honors College courses, and 9 must be from the social sciences and humanities. Both BIOL 1202 (Environmental Biology) and POL SCI 3480 Environmental Politics must be completed as part of the total 18 hours. A total of 12 hours must be
taken at or above the 2000 level, with one additional course at or above the 3000 level besides POL SCI 3480. At least 9 hours must be taken while in residence at UMSL. A minimum GPA of 2.0 is required.

Students obtaining a minor in environmental studies will be able to integrate knowledge from multiple disciplines including natural sciences, physical sciences, social sciences, and economics as they pertain to environmental issues and policies.

Practical skills and problem solving
Students earning a minor in environmental studies will be able to appreciate the biological methods and applications to solving environmental issues while recognizing the cultural and ethical context of environmental issues. Moreover, the minor will be able to reflect on his or her contribution as a citizen and consumer to global environmental issues.

## Exercise Science Minor

A minor in Exercise Science is available for students pursuing any undergraduate degree program. It is intended for those who wish to join careers in prescribed physical activity such as personal training, strength and conditioning, rehabilitation and human performance. Students completing this minor could work with clients in recreational and wellness programs as well.

### Minor Requirements:

### Total Hours: 20-22

## Family Nurse Practitioner Post-Graduate Certificate

Post-graduate certificate (PGC) requirements are tailored to the individual student, depending on past academic work, experience, the student’s goals, and specialty requirements. Upon completion of the PGC requirements, a certificate is awarded by the College of Nursing (CON) and Graduate School. Graduates are eligible to apply to take board certification exams in the advanced practice role and population for which they have been prepared.

Due to higher education regulation changes, the University of Missouri–St. Louis cannot admit students from all states for online programs. Please see the Center for Teaching and Learning for additional information: http://www.umsl.edu/services/ctl/onlinelearning/state_authorization.html.

All students must complete 8 credit hours of Residency. Once credit hour is equivalent to 75 residency hours.

### Film Studies Undergraduate Certificate

The On-line Certificate Program in Film Studies is open to all St. Louis campus undergraduate and graduate students, as well as to graduates of UM-St. Louis and other colleges and universities.

To receive a Film Studies Certificate, a student must complete the required courses (18 credit hours) with an average grade of C or better. None of the courses may be taken on a satisfactory/unsatisfactory basis. Up to six credit hours of course work may be transferred from other institutions.

Total Hours: 18

### Finance Minor

#### General Requirements

- All minors are 15 credit hours or 5 courses, including business core courses.
- Students must attain a 2.0 grade point average for all courses in the minor.
- Students must attain a minimum grade of C- in each course included in the minor.
- All courses in the minor must be on a graded basis.
- A minimum of 9 credit hours of coursework included in the minor must be taken in residence at UMSL.

- One must complete a baccalaureate degree at UMSL in order for a minor to be conferred.
- A minor may be added for up to two years following completion of the baccalaureate degree

### Specific Requirements for the Minor

Available to all students except those pursuing the Bachelor of Science in Business Administration degree. Students must complete:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>FINANCE 3500</td>
<td>Financial Management</td>
<td>3</td>
</tr>
<tr>
<td>Select any four upper division finance electives</td>
<td>12</td>
<td></td>
</tr>
</tbody>
</table>

Total Hours: 15

### Learning Outcomes

Upon completion of the program, graduates will be able to:

- Describe fundamental concepts in finance.
- Interpret financial data and describe firm financial performance.
- Demonstrate competency to identify and assess financial risk and return.

### French Minor

A minor in French, German, Japanese or Spanish requires the completion of four courses in the language beyond the basic foundation sequence (Language 1001, Language 1002, and Language 2101). Transfer students must complete at least two courses for the minor at UMSL. All courses must be passed with a grade of C- or better.

</tbody>
</table>

Total Hours: 12

### Gender and Politics Minor

#### Requirements for Political Science Minors

A general minor in political science can be arranged, as well as specialized minors in eight different subfields of the discipline. Interested students should see a faculty adviser to plan a coherent program of study as a minor field.

Students must achieve a cumulative 2.0 GPA in the political science courses chosen to qualify for the minor. Students may count no more than 3 hours in political science taken on a satisfactory/unsatisfactory basis toward the minor. Students taking an internship (POL SCI 3940) may count no more than three hours of the internship toward the minor.

#### Specific Requirements for the Minor

Total Hours: 15
**Gender Studies Graduate Certificate**

**Requirements For Admission**
- Baccalaureate degree 2.75 G.P.A.
- Official transcripts of all previous undergraduate/graduate work
- Two letters of recommendation

If you are not currently enrolled at UMSL, you must apply through the Graduate School. This certificate is available to students with Bachelor’s or Master’s degrees and students enrolled in graduate degree programs. A student need not be enrolled in a degree program to earn the Gender Studies graduate certificate. Post B.A./B.S. students may enroll in the undergraduate or graduate certificate program.

**Certificate Requirements**

At least 18 hours of Gender Studies courses at the 4000, 5000, and/or 6000 level

1. 3 hours must include a graduate feminist or gender theory course, which may be GS 5033, Advanced Sexuality and Gender Theory, GS 5040 Feminist Critical Theory, or other theory course.
2. 3 hours must include either a graduate internship or practicum, or final writing project, which may be an independent study GS 6452 Special Readings in Gender Studies, or a substantial research and writing project for a GS graduate seminar, which may be GS 6450 Seminar in Gender Studies, or other cross-listed, 5000 or 6000-level seminar
3. 12 hours must be at the 5000 level or above, while up to 6 hours of 4000-level courses may be taken for graduate credit, as long as student completes graduate level work for the course.
4. No more than 6 hours may be taken as Directed or Independent Study credit.

Most Gender Studies courses are cross-listed with other departments and count toward a department’s degree requirements we well as toward the certificate.

---

### Learning Outcomes

Upon completion of the certificate earners will be able to:

**Knowledge**
- Contrast different theoretical approaches to understanding gender and their implications for advocacy and activism
- Develop in-depth knowledge of one aspect of gendered experience examined through the lens of a time period, literary genre, a geographic region, or other focus on a narrowed topic

**Writing Research and Communications**
- Apply feminist theories and methods to analyze, interpret, and discuss the role of gender in written, oral, visual, and/or multimedia texts
- Apply feminist research methods to identify and investigate a problem relating to gender in order to design an original research project that contributes to the scholarship on a topic in the field of Gender Studies by conducting a comprehensive and critical literature review, identifying and utilizing at least one appropriate method of original data collection, evaluating sources, and interpreting and disseminating the results

**Professional**
- Network with local and global leaders in the field of gender studies or fields appropriate to students’ interests and career goals
- Develop the skills and knowledge necessary to compete for and be successful in a wide range of fields both local and global including non-profit management, education, academia, social work, the sciences, business, law, and transnational feminist work

---

### Gender Studies Minor

For a Minor in Gender Studies, students must take at least 12 hours of Gender Studies courses. 9 hours must include 3 core courses:

1. GS 2102 Introduction to Gender Studies
2. GS 3033 Sexuality and Gender Theory or other 3000-5000 level course in feminist or gender theory.
3. Capstone experience: Students must complete a final research project or practicum. The Capstone requirement may be satisfied by GS 4352 Independent Study in Gender Studies, GS 4353 Internship in Gender Studies, or by a 4000-level Gender Studies course or other 4000-level seminar where student completes a final research and writing project that focuses on gender studies.

The remaining 3 hours may be cross-listed courses with the student’s major department or Gender Studies electives from various disciplines.

**Learning Outcomes**

Upon completion of the Gender Studies Minor and Undergraduate Certificate, a student will be able to:

**Knowledge**
- Analyze how gender affects individuals and society historically and currently, locally and globally, including how
systems of power and oppression operate and how gender intersects with other facets of identity such as ethnicity, nationality, class, sexuality, age, and ability

- Describe key figures, concepts, and debates within the discipline of gender studies, such as “the Other,” sex vs. gender, gender as a social construct vs. essentialism, and intersectionality
- Utilize gender as a variable to explain historical, social, cultural, technological, and/or symbolic phenomena
- Evaluate ideological assumptions underlying social institutions and systems of representation

**Writing Research and Communications**

- Articulate complex ideas coherently to diverse audiences.
- Relate how personal experience connects to institutions and systems of privilege and oppression.
- Apply traditional and new media literacies to locate, evaluate, utilize, and produce knowledge.
- Synthesize evidence obtained from research to compose texts that advance, support, and defend an argument about gender.

**Professional**

- Develop strategies for promoting equality and combating oppression
- Connect personal experience and the ideas explored in the classroom to apply the insights gained to other classes and personal and professional life
- Describe the importance of respect, civility, sensitivity, civic engagement, and appreciation for diversity and demonstrate these traits

**Gender Studies Undergraduate Certificate**

**Gender Studies Certificate Requirements For Admission**

Undergraduate certificate candidates must meet the University’s general education requirements. Applicants must have a cumulative G.P.A. of at least 2.5 and must maintain a minimum 2.5 G.P.A. in Gender Studies courses. Candidates for undergraduate certificates are asked to register with Gender Studies after taking one or two courses. Students will then be enrolled in the program and will be placed on our mailing list for class information and announcements of upcoming events.

**Certificate Requirements**

Students must take at least 18 hours in Gender Studies courses. 9 hours must include 3 core courses:

1. GS 2102 Introduction to Gender Studies
2. GS 3033 Sexuality and Gender Theory or other 3000-5000 level course in feminist or gender theory
3. Capstone Experience: Students must complete a final research project or practicum. The Capstone requirement may be satisfied by GS 4352 Independent Study in Gender Studies, GS 4353 Internship in Gender Studies, or by a 4000-level Gender Studies course or other 4000-level seminar where student completes a final research and writing project that focuses on gender studies.

9 hours may be cross-listed courses with student’s major department or Gender Studies electives from various disciplines.

**Learning Outcomes**

Upon completion of the program, certificate earners will be able to:

- Demonstrate an understanding of the complex ways gender and other culturally constructed categories inform social, cultural, economic, and political practices that both reproduce and resist hierarchies of power in the U.S. and global contexts.
- Articulate the central questions of gender studies scholarship, including foundational theories in feminist thought and action.
- Conduct interdisciplinary research that applies gender as a central category of analysis.
- Apply gained knowledge, research skills, and gender studies concepts in an independent study, experience of direct engagement with professionals in their field, and/or community service-oriented activity.

**German Minor**

A minor in French, German, Japanese or Spanish requires the completion of four courses in the language beyond the basic foundation sequence (Language 1001, Language 1002, and Language 2101). Transfer students must complete at least two courses for the minor at UMSL. All courses must be passed with a grade of C- or better.

**Gerontology Minor**

Students have many courses to choose from to create a personalized plan of study. All students must take a 3-credit introductory course — Aging in America: Concepts & Controversies (GERON 2170). At least 6 of the remaining 12 credits must be from courses at the 4000 level (see below). Students wishing to designate a course for capstone for the BLS must coordinate this with Program Director for Gerontology prior to starting the course.

Global Biodiversity Conservation and Leadership Graduate Certificate

The Graduate Certificate in Biodiversity Conservation and Leadership is intended for students who wish to pursue a career in conservation biology or ecology from either a research or practical standpoint. Cooperating institutions include the Missouri Botanical Garden, St. Louis Zoo, Center for International Studies at UMSL, and the Departments of Economics, History, Political Science, and Social Work.

The Graduate Certificate in Global Biodiversity Conservation and Leadership is intended for students who wish to pursue a career in conservation biology or ecology from either a research or practical standpoint. Cooperating institutions include the Missouri Botanical Garden, the Saint Louis Zoo, the Center for International Studies at UMSL, and the Departments of Economics, History, and Political Science, and the Business School.

Admission

Graduate students enrolled in UMSL who intend to receive a Graduate Certificate in Global Biodiversity Conservation and Leadership must complete the Application for Graduate Certificate (G10) once completing the required coursework. Students not enrolled in a course of graduate studies at UMSL who have a baccalaureate degree or are enrolled in graduate work elsewhere must apply for admission to the UMSL Graduate School as graduate certificate-seeking students. The minimum admission requirements include: (1) completion of a baccalaureate degree and the prerequisites of the certificate program; 2) at least a 3.0 GPA for undergraduate course work or a 3.2 GPA for 12 credit hours of graduate course work. The minimum prerequisites are undergraduate courses in ecology, evolution and genetics.

Requirements

The certificate is awarded after completion of 18 credit hours of core courses and electives with a minimum of 12 credits at the 5000 or 6000 level. Electives must include a minimum of 3 credits outside biology with a maximum of 7 outside biology. A maximum of 3 credits may be taken at institutions other than UMSL. Students may simultaneously earn a graduate degree and count credits earned in their degree program toward the certificate when appropriate.

Required Core Courses

BIOL 6250/POL SCI 6452  Public Policy of Conservation and Sustainable Development  3
BIOL 6299  Internship in Conservation Biology  2-4
BIOL 6222  Advanced Tropical Ecology and Conservation  3
BIOL 6889  Graduate Seminar

Electives  10

Biology

BIOL 4182  Population Biology
BIOL 4402  Ornithology
BIOL 4403  Ornithology Laboratory
BIOL 4422  Entomology
BIOL 4423  Entomology Laboratory
BIOL 4501  Flowering Plant Families: Phylogeny and Diversification
BIOL 5192  Community Ecology
BIOL 6182  Advanced Population Biology
BIOL 6192  Applications of Geographic Information Systems
BIOL 6222  Advanced Tropical Ecology and Conservation
BIOL 6270  Advanced Global Climate Change
BIOL 6889  Graduate Seminar

Economics

ECON 3500  The Economics of Government Spending and Taxation
ECON 4160  Geospatial Analysis in the Social Sciences
ECON 4170  Fundamentals of Cost-Benefit Analysis
ECON 4550  Natural Resource Economics

History

HIST 3000  Selected Topics in History

International Business

INTL BUS 4281  Entrepreneurship in the Global Environment

Political Science

POL SCI 3440  Public and NonProfit Budgeting
POL SCI 3480  Environmental Policy
POL SCI 3590  Women and Leadership Worldwide: Breaking the Glass Ceiling
POL SCI 3710  NonProfits, Civil Society and Volunteerism

### Health Communication Undergraduate Certificate

The Department of Communication and Media offers a certificate program for those students interested in careers in health communication. Our certificate program addresses the dynamics of health communication from varying perspectives. The core classes in the program focus on a breadth of health communication topics, such as the influence of mass media, interpersonal communication, organizational communication, and culture.

After completing the certificate, students will be able to recognize, analyze, and design effective communication strategies for promoting individual and public health.

The certificate program is comprised of 18 credit hours of coursework, as indicated. All students must earn a C or better in all courses applied to the certificate program.

### Core Course List:

</tr>
</tbody>
</table>

**Total Hours:** 18

1. COMM 4360 may count toward the internship credit for the BA in Communication.

For more information on this certificate, please contact the Department of Communication and Media’s Health Communication Certificate Coordinator.

### Learning Outcomes

Upon completion of the program, certificate earners will be able to:

- Effectively apply theory and best practices to design messages to enhance health
- Critically analyze and evaluate health strategies and messages using relevant theory and best practices
- Understand the roles of communication and other factors that contribute to and/or alleviate health issues
- Practice effective, professional communication in a variety of health-related settings

### History BA

Do you often ask “how” and “why”? Are you curious and analytical and up for a challenge? A History degree is for those who answer “Yes!” Studying history introduces you to the fascinating and familiar in ancient and modern societies, to cultures in faraway places, and to the complexities of our own neighborhoods. A history major will help you understand the present in new ways and build your professional future through hands-on research. By honing the skills demanded by employers in a wide variety of fields, history is a versatile and marketable major.

### General Education Requirements

History majors must meet the university and college general education requirements (p. 51).

Majors may not take required history courses on a satisfactory/unsatisfactory basis. Students enrolled in variable credit reading courses for 5 credit hours must complete a seminar paper.
Students may take any language that fulfills the college’s foreign language requirement.

**Degree Requirements**

Students are encouraged to move from introductory courses at the 1000 to more advanced content-oriented courses at the 2000 level then to skill oriented courses at the 3000 and 4000 levels. Majors must complete at least 33, but not more than 45, hours in history with no grade below C-.

**1000 Level**
Select three courses at the 1000 level 9

**2000 and 3000 Level**
Select an additional two to five courses at the 2000 and 3000 level. 6-15
HIST 3199 Introduction to Historical Inquiry 4

**4000 Level**
Select two to four of the following courses at the 4000 level. 6-14
HIST 4142 Inquiries in U.S. History
HIST 4143 Inquiries in World History
HIST 4999 Senior Seminar 1

1 Students seeking a degree with distinction must enroll in this course.

Undergraduate majors must complete a residency minimum of 15 hours of 2000/3000/4000 level History courses including 6 credit hours of 4000 level courses at UMSL.

**Alternative courses to satisfy the History requirements**

Some courses may satisfy the History requirement even though they are not listed as such, depending on what their content is. These include variable content courses, courses at the Honors College, and history of philosophy courses. If a course that deals with some aspect of History and might satisfy a requirement is not listed among those satisfying the requirements, you may do the following:

1. Obtain the description of what the course will cover.
2. Write a very short explanation of why the course ought to count toward satisfaction of the requirement, by showing how it deals with the relevant aspect of History.
3. Submit both to the History undergraduate advisor for approval.

**Departmental Honors**

Students majoring in history may be awarded departmental honors upon graduation if they have achieved the following: a) at least a 3.2 overall GPA; b) at least a 3.5 GPA for all hours attempted in history courses; and c) an outstanding research paper in the Senior Seminar as certified by the faculty member responsible for directing it.

**B.S. Ed. in Secondary Education with Emphasis in History**

The B.S. Ed. is a professional education degree designed for students who wish to pursue a teaching career in secondary schools. Much of the discipline-specific coursework parallels the B.A. degree in the discipline; however, the Missouri Department of Elementary and Secondary Education (DESE) requires specific coursework for teacher certification. Therefore, students interested in the B.S. Ed. should contact the advising office (OASIS) 314-516-5937 in the College of Education for discipline-specific requirements. **Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.**

**B.A. in History with Master’s Level Coursework for Secondary Teacher Certification**

In addition to the B.S. Ed., students may opt to complete a B.A. degree in their discipline as an undergraduate, followed by admission to the Graduate School for Master’s level teaching certification. The College of Education has a one-year accelerated program for post-graduate certification called Teach in 12, or students can choose a traditional path to certification. Graduate coursework for certification can apply towards a Master’s Degree in Secondary Education, with additional coursework. Students interested in Master’s Level teacher certification should contact the advising office (OASIS) 314-516-5937 in the College of Education. **Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.**

**B.A. in History Learning Outcomes**

Graduates of this program will be able to:

- Build historical knowledge.
- Gather and contextualize information in order to convey both the particularity of past lives and the scale of human experience.
- Recognize how humans in the past shaped their own unique historical moments and were shaped by those moments.
- Develop a body of historical knowledge with breadth of time and place—as well as depth of detail—in order to discern context.
- Distinguish the past from our very different present.
- Develop research methods.
- Recognize history as an interpretive account of the human past—one that historians create in the present from surviving evidence.
- Collect, sift, organize, question, synthesize, and interpret complex material.
- Practice ethical historical inquiry that makes use of and acknowledges sources from the past as well as the scholars who have interpreted that past.
- Develop empathy toward people in the context of their distinctive historical moments.
- Welcome contradictory perspectives and data, which enable us to provide more accurate accounts and construct stronger arguments.
- Describe past events from multiple perspectives.
- Explain and justify multiple causes of complex events and phenomena using conflicting sources.
- Identify, summarize, appraise, and synthesize other scholars’ historical arguments.
- **Apply the range of historical thinking skills to evidence that is often incomplete, complex, and contradictory.**
- Consider a variety of historical sources for credibility, position, perspective, and relevance.
- Evaluate historical arguments, explaining how they were constructed and might be improved.
- Revise analyses and narratives when new evidence requires it.
• Create historical arguments and narratives and effectively communicate them.
• Generate substantive, open-ended questions about the past and develop research strategies to answer them.
• Craft well-supported historical narratives, arguments, and reports of research findings in a variety of media for a variety of audiences.
• Use historical perspective as central to active citizenship.
• Apply historical knowledge and historical thinking to contemporary issues.
• Develop positions that reflect deliberation, cooperation, and diverse perspectives.

\(^1\) INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

History BA/MA Dual Degree Program

The 2+3 B.A./B.S. – Ed and M.A. in History enables students of demonstrated academic ability and educational maturity to complete the requirements for both degrees in five years of full-time study. Because of its accelerated nature, the program requires the completion of lower-division requirements (15 hours) before entry into the three-year portion of the program. It also has prerequisites numbered 5000-5999 for graduate readings courses numbered 6000-6999. When all the requirements of the B.A./B.S. – Ed. and M.A. program have been completed, students will be awarded both the baccalaureate and master’s degrees. A carefully designed program can permit a student to earn both degrees within as few as ten semesters.

The combined program requires a minimum of 137 hours, at least 5 of which must be at the senior level (HIST 4999) and at least 32 of which must be at the graduate level (courses numbered in the 5000 and 6000 range). In qualifying for the B.A. or B.S. – Ed., students must meet all university and college requirements, including the requirements of the undergraduate major. In qualifying for the M.A., students must meet all university and Graduate School requirements, including satisfactory completion of at least 32 credit hours at the graduate level.

The semester they will complete 62 undergraduate credit hours, (including 15 credit hours of appropriate 1000-level coursework in the History Department and ART ED 5588) interested students should apply to the Graduate Director of the Department of History for admission to the 2+3 combined degree program in History. A cumulative grade point average of 3.4 or higher in history courses, a writing sample, and three letters of recommendation from faculty are required for consideration. Students will be admitted to the 2+3 program under provisional status until they have completed 105 total credit hours toward their B.A degree with a grade point average of 3.0 or higher. After completion of the provisional period, and with the recommendation of the graduate director, and approval of the graduate dean, students can be granted full admission into the program. Students will not be admitted to the program, if they have accumulated more than 105 credits. Students in the 2+3 program begin to pay graduate credit hour fees once they exceed the 105 credit hour threshold. Students must maintain a grade point average of 3.0 or higher throughout the combined program. Students who officially withdraw from the 2+3 combined degree program will be awarded the B.A. or B.S. – Ed. Degree when they have successfully completed all the requirements for the degree.

Undergraduate History Requirements For Students in the 2+3 Program

The following requirements must be completed prior to enrolling in the 2+3 Program:

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Three 1000-level courses</td>
<td>9</td>
</tr>
<tr>
<td>HIST 3199 Introduction to Historical Inquiry</td>
<td>4</td>
</tr>
<tr>
<td>Two additional 2000-3000 level courses</td>
<td>6</td>
</tr>
<tr>
<td>Total Hours</td>
<td>19</td>
</tr>
</tbody>
</table>

Once admitted to the program students must take the following courses:

Additional Undergraduate History Requirements For Students in the 2+3 Program:
Graduate History Requirements For Students in the 2+3 Program

- Three courses at the 5000-level for 9 credit hours.
- Five courses at the 6000-level for 17 credits beginning with HIST 6000 (students must take two of their three 5000-level courses prior to enrolling in HIST 6000), followed by at least three courses in a major field of study and one 5-credit course.
- In addition to this core, each candidate must select one of the two following degree options:
  a. Thesis Option – 32 hours total
  b. Research Paper Option

In addition to the fulfilling the requirements listed above, the candidate choosing this option must enroll for 6 hours of thesis credit and submit an acceptable thesis. The thesis is based on original research in primary sources. Normally, theses do not exceed 100 pages of text. Candidates receive a grade for the thesis upon its approval by an advisory committee. The committee consists of professors selected by the candidate after consultation with the major professor. One member of the committee must be from the department but outside the candidate’s general area of study, and one may be outside the history department.

The advisory committee conducts an oral examination on the thesis during the candidate’s last semester of residence.

The committee decides whether the candidate shall pass, fail or fail with the option to repeat the oral examination at a later date. Students may not take the oral examination more than twice. The second examination must be held no less than one and no more than two semesters following the date of the first examination. Summer session may be counted as a semester under this procedure, but students should be aware of the difficulties involved in assembling faculty committees during the summer.

Thesis candidates must demonstrate competence in one foreign language or in quantitative methods as applied to historical study. Candidates shall demonstrate foreign language competence by translating, with the use of a dictionary, 500 words in one hour. A member of the history faculty will conduct this examination and choose the test for translation. Candidates shall demonstrate quantitative methods competence by satisfactory completion of either PSYCH 2201, Psychological Statistics or SOC 3220, Sociological Statistics, or their equivalent.

Program Requirements

All candidates for Graduate Certificate in History Education must complete:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIST 6013</td>
<td>Historical Thinking in Research and Practice</td>
<td>3</td>
</tr>
<tr>
<td>HIST/TCH ED 6115</td>
<td>Historical Thinking in Research and Practice</td>
<td>3</td>
</tr>
</tbody>
</table>

Students must take an additional twelve credits at the graduate level in History or Education courses as approved by the Program Director.

History MA

The History M.A. program offers study in U.S. History, World History, History Education, Public History and Cultural Heritage, and Museum Studies. All students receive disciplined advanced work in preparation for doctoral programs or advanced training leading to teaching or other careers. Students select one of two options for completing the Master of Arts degree: thesis or research papers. The first path requires a substantial master's thesis; this path emphasizes depth of knowledge and research competence. The second path requires several research papers. This path emphasizes breadth of historical knowledge. Students should consult with the Director of Graduate Studies to be sure that they have properly selected their fields of study.

Admission Requirements

Applicants must meet several departmental admission requirements in addition to the general criteria of the Graduate School. The applicant’s undergraduate studies need not have been in history, but they must demonstrate high academic potential. Normally, only students with a 3.2 grade point average (3.35 for the online degree) in their undergraduate major are admitted; most successful applicants have higher grades.

Applicants must submit three letters of recommendation, preferably from former teachers, and a sample of their written work. The History Department bases its admission decisions upon the undergraduate transcript, the letters of recommendation, and the sample of written work. The deadlines for applications are March 15th for the Fall semester and October 15th for the Spring semester. Applications will be accepted after these deadlines but admission for the upcoming semester is not guaranteed.

History Education Graduate Certificate

The Graduate Certificate in History Education is designed for practicing teachers, instructional coordinators, and history educators in the community who are seeking to deepen their knowledge of history education. It offers history and social studies educators a program that integrates historical and educational knowledge, theory, and practice. The purpose of the certificate is to improve the practice of history education in schools and the community, to introduce history educators to research in the field, to deepen their historical knowledge, and to encourage sophisticated teaching and curriculum development built on research at the intersection of history and the learning sciences.

Admission Requirements

Applicants wishing to pursue the Graduate Certificate in History Education in conjunction with an MA degree or an MED should follow the normal application procedures for their respective Master’s level program. Applicants wishing to pursue the Graduate Certificate in History Education alone normally must have a GPA of 3.0 or higher and should apply specifically for this certificate program and submit three letters of recommendation and a writing sample along with their application.
Core

All candidates for the M.A. degree in history must complete a core of 26 hours of course work (excluding thesis credit), with no more than nine hours of history and related fields at the 5000 level. This 26-hour core must include seven courses at 3 credit hours each (21 hours in all), and one 5-credit-hour writing seminar consisting of a 2-credit-hour research paper supplement to a 3-credit-hour, 6000-level history readings course.

To earn the 26-hour core, candidates must complete HIST 6000 and select at least one field of study with a minimum of three courses (each at 3 credit hours or more.) Students may use the remaining hours to complete a second field.

In addition to this core, each candidate must select one of the two following degree options:

1. Thesis Option—32 hours total

   In addition to the core, the candidate choosing this option must enroll for 6 hours of thesis credit and submit an acceptable thesis. The thesis is based on original research in primary sources. Normally, theses do not exceed 100 pages of text. Candidates receive a grade for the thesis upon its approval by an advisory committee. The committee consists of professors selected by the candidate after consultation with the major professor. One member of the committee must be from the department but outside the candidate's general area of study, and one may be outside the history department.

   The advisory committee conducts an oral examination on the thesis during the candidate's last semester of residence.

   The committee decides whether the candidate shall pass, fail, or fail with the option to repeat the oral examination at a later date. Students may not take the oral examination more than twice. The second examination must be held no less than one and no more than two semesters following the date of the first examination. Summer session may be counted as a semester under this procedure, but students should be aware of the difficulties involved in assembling faculty committees during the summer.

   Thesis candidates must demonstrate competence in one foreign language or in quantitative methods as applied to historical study. Candidates shall demonstrate foreign language competence by translating, with the use of a dictionary, 500 words in one hour. Normally a member of the history faculty will conduct this examination and choose the test for translation. Candidates shall demonstrate quantitative methods competence by satisfactory completion of either PSYCH 2201 Psychological Statistics or SOC 3220 Sociological Statistics, or their equivalent.

2. Research Paper Option—36 hours total

   To complete this option, the candidate must complete two 5-credit-hour seminars (each consisting of a 6000-level reading seminar plus 2 credit hours of supplementary work on a substantial research paper), in addition to the core. The candidate may choose a fourth field in addition to the three already represented in the core to complete this option.

Learning Outcomes

Upon completion of the program, graduates will be able to:

- Conduct empirical historical research based on primary source evidence
- Compose publishable-quality scholarship that makes an original contribution to knowledge
- Evaluate recent scholarship within chosen subfield of study in the context of historiographical trends
- Synthesize historical research in interpretive formats, including written papers and essays
- Demonstrate facility for presenting historical argument orally and describing research and findings to an audience
- Distinguish between different methodological approaches to historical research, writing, and interpretation

History MA, Museums, Heritage and Public History Emphasis

The MA in Museums, Heritage, and Public History joins theoretical and practical study at an advanced level to prepare students for careers in museums, heritage institutions, historic sites and societies, and related organizations. The program works closely with cultural resources in St Louis, particularly the city's many museums and historic sites. We focus on community engagement, the interdisciplinary and cross-cultural study of material culture, interpreting and debating the past, new media and public education, and research in archival and material collections. Our graduates work in art museums, history museums, science centers, historic house museums, and other cultural institutions across the United States and internationally.

Career Outlook for M. A. in Museums, Heritage, and Public History

According to the Institute of Museum and Library Services, there are more than 35,000 museums in the United States, employing more than 400,000 individuals. History museums constitute forty-eight percent of the total museums in the country; there are more than 16,800 historical societies and historic preservation organizations alone. While job requirements vary among individual institutions and specific professional roles, the MA degree offered by this program qualifies graduates for a wide range of careers in the museum and heritage field. Faculty and mentors in the Museum Studies Program provide students with placement assistance, counseling, and access to information on career opportunities. Our alumni are employed at institutions around the country, from Santa Fe to Philadelphia, Minneapolis to Dallas.

Admission Requirements

Prospective students for the Master of Arts in Museums, Heritage, and Public History must apply specifically for this program on the graduate application. Applications for the Master of Arts in Museums, Heritage, and Public History will be accepted only for the fall semester.

Prospective students must demonstrate high academic potential. Typically, the History department admits only students with at least a 3.2 grade point average in their undergraduate major; most successful applicants have higher grades. An undergraduate major in History is not required for admission to this program. Applicants must submit three letters of recommendation, preferably from former teachers and/or employers, and a sample of their written work. Applicants must also complete the Museums, Heritage, and Public History Supplemental Application, which includes a statement of career intent.
Admissions decisions are based on the undergraduate transcript, the letters of recommendation, the sample of written work, and the supplemental application. Applications must be received by the university no later than February 1.

Program Requirements
All candidates for the MA in Museums, Heritage, and Public History must complete the following core courses (20 hours):

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIST 6000</td>
<td>The Historian's Craft</td>
<td>3</td>
</tr>
<tr>
<td>HIST 6001</td>
<td>Introduction to Public History and Cultural Heritage</td>
<td>3</td>
</tr>
<tr>
<td>HIST 6002</td>
<td>Material Culture in Historical Context</td>
<td>3</td>
</tr>
<tr>
<td>or HIST 6134</td>
<td>History Curatorship</td>
<td></td>
</tr>
<tr>
<td>HIST 6131</td>
<td>Museum Origins and Evolution</td>
<td>3</td>
</tr>
<tr>
<td>HIST 6142</td>
<td>Readings in U.S. History</td>
<td>5</td>
</tr>
<tr>
<td>or HIST 6143</td>
<td>Readings in World History</td>
<td></td>
</tr>
</tbody>
</table>

Choose one of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIST 6125</td>
<td>Practicum in Public History and Cultural Heritage</td>
<td>3</td>
</tr>
<tr>
<td>HIST 6127</td>
<td>Museums and Communities</td>
<td></td>
</tr>
<tr>
<td>HIST 6129</td>
<td>Emerging Museum Practices</td>
<td></td>
</tr>
</tbody>
</table>

Total Hours: 20

Candidates must also complete 10 credit hours of elective courses. These may include courses listed above, if not already taken for the core, or additional courses which may include the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIST 6139</td>
<td>Practicum in Exhibit and Program Development</td>

</tbody>
</table>

History Minor
Students may minor in history by taking 19 hours of history courses as follows:

1. Three courses numbered 1000-1999 (9 credits)
2. Three courses numbered 2000-3999, including HIST 3199 (10 credits)

No course in which a grade below a C- is received shall count toward a minor.

Prerequisites
Some courses required by the Minor in History have prerequisites. Some students may satisfy prerequisites by virtue of their prior curriculum. When this is not the case, students are responsible for either satisfying the prerequisites by adding courses to their curriculum or obtaining a waiver from the instructor.

History of Art and Visual Culture Minor
A minor in History of Art and Visual Culture requires the completion of at least 18 hours with a GPA of 2.0 or better. Students must take ART HS 1100 and at least one course in non-Western art. They must also take at least two courses at the 2000-level and two courses at the 3000-level or above in History of Art and Visual Culture. A maximum of 3 hours of internship can be applied toward the minor in art history. At least nine of the 18 hours must be taken in residence at UMSL. All courses in the minor must receive a grade of C- or above.

<table>
<thead>
<tr>

</tbody>
</table>

Chose two 2000-level or above and two 3000-level or above from the following courses:

Total Hours: 12

Honors College Undergraduate Certificate, 2-year Program

Two year Program (22 credit hours total):

Students in this program will take a combination of Honors College seminars and honors independent study credit (usually for work done in their major fields). The 22 credit hours must include 6 credits of independent study, as for the four-year program.

Third Year

During the first year of the two-year program, students take three honors seminars, including HONORS 3100, Writing the City or HONORS 3160, Writing in the Sciences; one course from the Inquiries series (2000 level); one course from either the Advanced Seminar (3000 level) or Research Seminar (HONORS 3530 or HONORS 3535). In addition, 3 credit hours of independent study may be taken during this year, normally in or closely related to their major.

Fourth Year

The final year of the two-year program involves three courses chosen from the 3000 and 4000 level options, including HONORS 4100, the honors writing portfolio, and at least one course chosen from the 3000 level. In addition, students will complete their independent study requirements with 3 or 6 hours of project, internship, or research work.

Learning Outcomes

Upon completion of the program, certificate earners will be able to:

- Through coursework comparing and contrasting diverse cultural viewpoints, academic disciplinary approaches and information, Honors students will demonstrate the ability to synthesize knowledge from various perspectives.
- Honors students will exhibit the ability to communicate effectively in speech and writing:
  - by speaking in groups to present, reflect on and evaluate information and perspectives.
  - by completing the written assignments required in all Honors courses that focus on various perspectives, audiences and disciplinary approaches(demonstrating effective writing that employs correct diction, syntax, usage, grammar and mechanics.
  - by participating in internships, independent study and undergraduate research to develop and demonstrate advanced knowledge in a discipline, professional skills, and greater understanding of career and educational goals.
- by creating an Honors Writing Portfolio that demonstrates the ability to assess their writing skills and development; by revising documents for employment searches or graduate opportunities.
- Honors students will demonstrate skills in higher-order thinking, valuing and managing information:
  - by exhibiting the ability to distinguish among opinions, facts and inferences; by identifying underlying or implicit assumptions; by making informed judgments; and by solving problems through applying evaluative standards.
  - by locating, accessing, synthesizing and annotating information from print, electronic, and other sources; by distinguishing between scholarly and non-scholarly sources in preparation for higher-order thinking.
  - by analyzing and synthesizing information from a variety of sources, applying the results to resolving complex situations and problems, and defending conclusions using relevant evidence and reasoned argument.
  - by utilizing cultural, behavioral, and historical knowledge to clarify and articulate a personal value system while recognizing the ramifications of personal value decisions on the self and others.
  - by identifying conflicts within and between multiple perspectives and value systems; by recognizing and analyzing ethical issues in a variety of contexts; and by employing standards of logic to formulate a reasonable position among multiple perspectives.
- Honors students will select and participate in Honors courses in various disciplines and will demonstrate essential skills and approaches relevant to those disciplines: Students participating in Honors courses in disciplines such as the social sciences, life and physical sciences that rely upon the understanding of fundamental mathematical concepts and their applications will display a level of quantitative literacy that would enable them to understand and analyze data, draw conclusions, and solve problems.
- Students participating in Honors courses in the social and behavioral sciences will exhibit understanding of themselves and the world around them through the study of the content and methodologies used by historians and social and behavioral scientists to discover, describe, explain, and predict human behavior and social systems; they will demonstrate understanding of the diversities and complexities of the cultural and social world, past and present, and come to an informed sense of self and others.
- Students participating in Honors courses in the humanities and fine arts will exhibit understanding and critical analysis of the ways in which people have addressed their condition through literature and art; they will demonstrate their understanding of these cultural works and their historical circumstances; they will formulate aesthetic judgments of these works.
- Students participating in Honors courses focusing on life and physical sciences will demonstrate knowledge of scientific principles, research procedures and empirical methods of scientific enquiry; they will display their understanding of how scientific discoveries affect and are affected by theoretical views of the world and human history.
- Honors students will complete specific Honors requirements designed to develop their awareness of career and advanced study opportunities:
  - by participating in internships, independent study and undergraduate research to develop and demonstrate advanced knowledge in a discipline, professional skills, and greater understanding of career and educational goals.

school applications to enhance their ability to formulate and pursue specific career goals.

**Honors College Undergraduate Certificate, 4-year Program**

**Four Year Program (40 credit hours total):**

Approximately one-third of the 120 hours honors students earn toward graduation are taken in the Honors College. Most of these credits are associated with a sequence of honors courses designed specifically for the college, the majority of which are taken during the first two years. During this period, these students fulfill virtually all of the university's general education requirements (p. 51), usually in innovative ways. In their junior and senior years, honors students also may earn honors credit for work done within their major fields, work which includes the possibility of internships, independent study projects, and advanced undergraduate research.

**First Year**

Students take HONORS 1100, HONORS 1200, and HONORS 1201, and one course each from the Western Traditions and Non-Western Traditions seminar series. Students may take a seminar from the American Traditions series as an elective or in place of the Western Traditions seminar.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>HONORS 1110</td>
<td>Western Traditions: Humanities</td>
<td>3</td>
</tr>
<tr>
<td>HONORS 1200</td>
<td>Freshman Symposium: Cultural Traditions I - Humanities</td>
<td>3</td>
</tr>
<tr>
<td>HONORS 1201</td>
<td>Freshman Symposium: Cultural Traditions II - Humanities</td>
<td>3</td>
</tr>
<tr>
<td>HONORS 1130</td>
<td>Western Traditions: Social and Behavioral Sciences</td>
<td>3</td>
</tr>
<tr>
<td>HONORS 1230</td>
<td>American Traditions: Social and Behavioral Sciences</td>
<td>3</td>
</tr>
<tr>

<td>3</td>
</tr>
<tr>
<td>HONORS 1330</td>
<td>Non-Western Traditions Series-Social Sciences</td>
<td>3</td>
</tr>
</tbody>
</table>

1 Elective as an alternate to Western Traditions.

**Second Year**

Students take two of the following Honors classes:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>HONORS 2010</td>
<td>Inquiries in The Humanities</td>
<td>3</td>
</tr>
<tr>
<td>HONORS 2020</td>

<td>3</td>
</tr>
<tr>
<td>HONORS 2030</td>
<td>Inquiries in the Social and Behavioral Sciences</td>
<td>3</td>
</tr>
<tr>
<td>HONORS 2050</td>
<td>Inquiries in the Natural Sciences</td>
<td>1-3</td>
</tr>
<tr>
<td>HONORS 2060</td>
<td>Inquiries in Business</td>
<td>3</td>
</tr>
<tr>
<td>HONORS 2070</td>
<td>Inquiries in Education</td>
<td>3</td>
</tr>
<tr>
<td>HONORS 2071</td>
<td>Inquiries in Nursing</td>
<td>4</td>
</tr>
<tr>
<td>HONORS 2080</td>
<td>Inquiries in Nursing</td>
<td>3</td>
</tr>
</tbody>
</table>

During the first two years, honors students will take additional course work in other areas, such as mathematics, natural science, foreign language, and major prerequisite classes to satisfy various university, Honors College, and specific degree requirements.

**Third and Fourth Years**

Honors students in the four-year program take at least four seminars (12 credit hours) from the Advanced Seminar (3000 level series) and/or Research Seminar (HONORS 3530 or HONORS 3535). They may take more where this is compatible with their major and/or minor requirements. Honors students in the four year program who take HONORS 3100 (‘Writing the City’) or HONORS 3160 (‘Writing in the Sciences’) may present it for their honors certificate as one of their 3000-level seminars. They may also, depending on their major, present it to meet their graduation requirement for Junior-level composition.

<table>
<thead>
<tr>

<td>Advanced Honors Seminar in Humanities</td>
<td>4</td>
</tr>
</tbody>
</table>

In addition, honors students do 6 credit hours in independent study projects, normally in or closely related to their major field. These independent study projects normally carry credit in the major, but can be done as Honors College independent study or research projects (HONORS 4900, HONORS 4910, HONORS 4915). During the final year, students also take HONORS 4100, a one-hour capstone for the Honors College writing program; HONORS 4100 may be taken for two hours.

**Learning Outcomes**

Upon completion of the program, certificate earners will be able to:

- Through coursework comparing and contrasting diverse cultural viewpoints, academic disciplinary approaches and information, Honors students will demonstrate the ability to synthesize knowledge from various perspectives.
- Honors students will exhibit the ability to communicate effectively in speech and writing:
  - by speaking in groups to present, reflect on and evaluate information and perspectives.
  - by completing the written assignments required in all Honors courses that focus on various perspectives, audiences and disciplinary approaches/demonstrating effective writing that employs correct diction, syntax, usage, grammar and mechanics.
- Honors students will demonstrate skills in higher-order thinking, valuing and managing information:
  - by exhibiting the ability to distinguish among opinions, facts and inferences; by identifying underlying or implicit ins assumptions; by making informed judgments; and by solving problems through applying evaluative standards.
  - by locating, accessing, synthesizing and annotating information from print, electronic, and other sources; by distinguishing between scholarly and non-scholarly sources in preparation for higher-order thinking.
by analyzing and synthesizing information from a variety of sources, applying the results to resolving complex situations and problems, and defending conclusions using relevant evidence and reasoned argument.

- by utilizing cultural, behavioral, and historical knowledge to clarify and articulate a personal value system while recognizing the ramifications of personal value decisions on the self and others.
- by identifying conflicts within and between multiple perspectives and value systems; by recognizing and analyzing ethical issues in a variety of contexts; and by employing standards of logic to formulate a reasonable position among multiple perspectives.

- Honors students will select and participate in Honors courses in various disciplines and will demonstrate essential skills and approaches relevant to those disciplines: Students participating in Honors courses in disciplines such as the social sciences, life and physical sciences that rely upon the understanding of fundamental mathematical concepts and their applications will display a level of quantitative literacy that would enable them to understand and analyze quantitative data, draw conclusions, and solve problems.

- Students participating in Honors courses in the social and behavioral sciences will exhibit understanding of themselves and the world around them through the study of the content and methodologies used by historians and social and behavioral scientists to discover, describe, explain, and predict human behavior and social systems; they will demonstrate understanding of the diversities and complexities of the cultural and social world, past and present, and come to an informed sense of self and others.

- Students participating in Honors courses in the humanities and fine arts will exhibit understanding and critical analysis of the ways in which people have addressed their condition through literature and art; they will demonstrate their understanding of these cultural works and their historical circumstances; they will formulate aesthetic judgments of these works.

- Students participating in Honors courses focusing on life and physical sciences will demonstrate knowledge of scientific principles, research procedures and empirical methods of scientific inquiry; they will display their understanding of how scientific discoveries affect and are affected by theoretical views of the world and human history.

- Honors students will complete specific Honors requirements designed to develop their awareness of career and advanced study opportunities:

  - by participating in internships, independent study and undergraduate research to develop and demonstrate advanced knowledge in a discipline, professional skills, and greater understanding of career and educational goals.
  - by creating an Honors Writing Portfolio that demonstrates the ability to assess their writing skills and development; by devising and revising documents for employment searches or graduate school applications to enhance their ability to formulate and pursue specific career goals.

## Information Security Management and Auditing Graduate Certificate

The Graduate Certificate in Information Security Management and Auditing provides students an opportunity to pursue a focused study of core information security management principles and practices and auditing of information security programs and operations. Students first obtain basic technical background to understand core information security issues and principles. They then learn about designing, managing, assessing, and auditing security within organizational contexts. The program is suitable for candidates with undergraduate education and/or work experience in business related fields and who do not prior technical background. It’s also suitable for candidates with Information Technology and/or technical cybersecurity backgrounds who wish to broaden their skill-sets in the business and management aspects of information security.

### Admission Requirements

Applicants must meet general University of Missouri-St. Louis Graduate School admissions requirements.

### Certificate Requirements

All course prerequisites and all course waivers are applicable. Substitute courses may be approved by the appropriate department chairperson and the Director of Graduate Business Programs. This 12 credit hour certificate program also counts toward the 30 credit hour Master of Science in Information Systems and Technology degree program requirements. Students may choose to combine this certificate with other courses and/or certificates to obtain the Master of Science in Information Systems and Technology degree.

## Information Systems and Technology BS

The Information Systems (IS) area endeavors to prepare high-potential students of diverse backgrounds for successful careers in the IS profession. Careers in IS may include programming, systems analysis and design, database administration, end-user support, network administration, and management consulting. The goal is to provide students with the skills to deal with the challenges confronting IS through teaching, research, and service to the profession.

### General Education Requirements

All Business majors must meet the university general education requirements (p. 51). As part of meeting the university’s general education requirements, all Business majors must complete the prerequisite courses below:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>

1 Seminars and Independent Studies are restricted to those offered by and approved by the Area faculty and approved by the Area Coordinator.

Academic Tracks within the Information Systems and Technology Major

Information Systems and Technology majors may choose to focus their elective hours in a particular sub-discipline of information systems and technology, or academic track. These tracks are groups of departmental courses that fit within sub-disciplines of information systems and technology and are recommendations for students wanting to pursue careers in specific sub-disciplines. Academic tracks are NOT majors and are only intended to serve as guides for courses within a particular area of information systems and technology and are represented by current faculty expertise. Selecting an academic track does not prevent a student from taking courses in another track. Students should not expect to take all recommended courses for each academic track. Students may choose not to select an academic track.

### Legacy Systems (COBOL) Track
- INFSYS 3807: Legacy Systems 3
- INFSYS 3817: Advanced Legacy Systems 3

### Self-Directed Learning Track
- INFSYS 3890: Internship in Information Systems 1-3
- INFSYS 3899: Independent Study in Information Systems 1-3

### Web Design Track
- INFSYS 3847: Web Design 3
- INFSYS 3815: Object-Oriented Applications in Business 3

### Learning Outcomes
Upon completion of the program, graduates will be able to:

- Evaluate and implement effective IS leadership principles and strategy.
- Prioritize and propose managerial practices to develop and deploy technological innovations that produce business advantage.
- Explain best practices in systems analysis and design.
- Support and improve current best practices in application development, business intelligence, cybersecurity, and legacy systems.
- Exhibit specialized leadership and technical expertise.

**PLEASE NOTE:** This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor. All requirements are subject to change.

### Information Systems and Technology BS/MS Dual Degree Program

The 2+3 Combined BS/MS program in Information Systems and Technology provides an opportunity for students of recognized academic ability and educational maturity to complete the requirements for both degrees in 5 years of full-time study. The combined program allows students to complete both the undergraduate and graduate degrees in Information Systems and Technology with a total of 135 credit hours instead of the typical 150 credit hours if the degrees were pursued separately. When all the requirements of the BS/MS program have been completed, students will be awarded both the BS and MS degrees.

Students can apply to the Chair of the Information Systems and Technology Department for admission to the 2+3 combined degree program during the semester they will complete 60 undergraduate credit hours. A cumulative grade point average of 3.0 or higher is required. Students must also meet with a Graduate Business Programs academic advisor.

Students will be admitted to the 2+3 program under provisional status until they have completed the department-specified 15 hours in the program with a grade point average of 3.0 or higher. After completion of the provisional period, upon recommendation of the Department Chair, students can be granted formal admission into the 2+3 program, which involves admission to the Graduate School. After formal admission, the student will be classified as a graduate student, will pay graduate tuition for all courses, and must continue taking courses under graduate status until completion of the master’s degree. Students must maintain a grade point average of 3.0 or higher throughout the combined program.

Applicants are considered for formal admission into the 2+3 program, if they meet the following four criteria:

1. earned at least 90 hours as an undergraduate;
2. have a minimum GPA of 3.0 since being granted provisional status;
3. have submitted at least one letter of recommendation from an Information Systems and Technology faculty member; and
4. have met with a Graduate Business Programs academic advisor.

A total of 15 hours of graduate coursework may be counted both to meet the 120 credit hours required for the Bachelor’s degree and to
meet the requirements of the Master’s degree. Students may resign from the 2+3 Program and apply for the Bachelor’s degree. However, once the Bachelor’s degree is awarded, the benefit of “double counting” courses will be lost. Any course used to meet a degree requirement for an undergraduate degree cannot be applied to a subsequent Master’s degree.

Undergraduate BS in Information Systems and Technology students who choose to pursue the 2+3 BS/MS degree option will be required to take the following five graduate courses (15-credits). With permission (Graduate School Form C1), provisional 2+3 students may take up to 6 hours of 4000/5000/6000 level courses while still classified as an undergraduate. These 6 hours will be treated by the Graduate School as “undergraduate status”, and they may be counted toward a master’s degree.

If a student has completed the undergraduate equivalent of a course, they may not receive graduate credit. Students may request to substitute other courses, subject to approval of the Department Chair. In addition, 2+3 students will complete INFSYS 5800 and the requirements for one of the Graduate Certificates listed below.

- Graduate Certificate in Business Intelligence (p. 364)
- Graduate Certificate in Enterprise Systems Development (p. 459)
- Graduate Certificate in Information Security Management and Auditing

Information Systems and Technology Graduate Certificate

Program Description
The Graduate Certificate in Information Systems and Technology provides students with core technical skills in programming, database management, systems analysis, and systems design. These skills are a foundation for specialized domains of study in business intelligence, cybersecurity, and enterprise systems development.

Admission Requirements
Applicants must meet general University of Missouri-St. Louis Graduate School admissions requirements.

Certificate Requirements
All course prerequisites and all course waivers are applicable. Substitute courses may be approved by the appropriate department chairperson and the Director of Graduate Business Programs. This 12 credit hour certificate program also counts toward the 30 credit hour Master of Science in Information Systems and Technology degree program requirements.

Students may choose to combine this certificate with other courses and/or certificates to obtain the Master of Science in Information Systems and Technology degree.

Total Hours 12

Specific Requirements for the Minor

Available to all students except those pursuing the Bachelor of Science in Information Systems and Technology degree. A minimum of 15 credit hours are required for the minor. Students must complete INFSYS 2800 and four elective courses. At least three of the elective courses must be 3000-level or higher Information Systems and Technology (INFSYS) courses. The fourth course can be any related course from Accounting (ACCTNG), Entrepreneurship (ENT) Finance (FINANCE), International Business (INTL BUS) Management (MGMT), Marketing (MKTG), Supply Chain and Analytics (SCMA), Computer Science (CMP SCI), or a related discipline subject to approval from the department chair.

Learning Outcomes

Upon completion of the program, graduates will be able to:

- Analyze challenges confronting the management of information systems.
- Apply ethical, legal, privacy, and compliance perspectives to the design, development, maintenance, and use of information systems.
- Explain the analysis and design of information systems.
- Synthesize data for managerial decisions.
- Demonstrate specialized technical expertise.

Information Systems and Technology MS

The Master of Science in Information Systems and Technology (MSIST) is designed to provide the technical and managerial knowledge to work...
successfully in design, development, and leadership roles related to information technology (IT). Students have opportunities to gain skills in application development, business intelligence, cybersecurity, cloud computing, fintech, and other emerging areas that impact organizational IT strategies.

The program is designed for students and professionals with diverse undergraduate backgrounds including business, information systems and technology, computer science, engineering, and other disciplines. MSIST students interact extensively with their peers as well as with industry executives in a carefully curated academic environment to gain a well-rounded perspective on the role of IT in contemporary organizations. Flexible class schedules (day and evening, weekends, 8 or 16 week sessions) and course delivery formats (face-to-face, blended, and online) enable students to balance school, work, and life.

The MSIST program provides students with flexible pathways to complete the degree by combining two graduate certificates and taking two additional courses toward the MSIST degree.

The Master of Science in IS program is designed to provide the technical and managerial knowledge to operate successfully in careers associated with the design, development and management of computer-based information, telecommunications, and Internet applications. The program accommodates students with undergraduate degrees specializing in IS, business, and computer science, as well as students with undergraduate degrees outside business.

Admission Requirements

Applicants must meet the general graduate admission requirements of the Graduate School, described in the UMSL catalog. Students are considered for admission to the graduate program in Information Systems and Technology only after they have formally applied for admission through the Graduate School. Applications may be completed on-line.

In addition to Graduate School admission requirements, the following requirements apply for the MSIST program.

Applicants must have an undergraduate degree with a minimum cumulative GPA of 3.0. Students whose GPAs are between 2.75 and 2.9 may be admitted under a restricted status within the terms specified by the Graduate School.

Applicants must have foundational knowledge of data analysis and computer programming. This requirement can be fulfilled by providing evidence of prior coursework, training, or professional experience.

Applicants may also join the program without this background and complete the following coursework.

- Students without a background in data analysis could take SCMA 6300 as a graduate student to fulfill this requirement.
- Students without a background in computer programming can take INFSYS 6805 as a graduate student to fulfill this requirement.

Entrance Examinations

- This program generally requires the Graduate Management Admissions Test (GMAT) or Graduate Record Examination (GRE) scores. A waiver of this requirement may be requested if applicants meet certain criteria. Please see the petition to waive the GMAT: http://mba.umsl.edu/files/pdfs/GMAT-waiver.pdf.

- Non-native speakers of English must provide evidence of English language competency by submitting an official TOEFL or IELTS score. The minimum TOEFL score for graduate admission is 79 iBT. The minimum IELTS score is 6.0.

Degree Requirements

Candidates for the Master of Science in Information Systems and Technology must meet all Graduate School requirements including, but not limited to, requirements on admissions, enrollment, course policies, and academic standing as listed in the University Bulletin.

The program requires a total of 30 hours for students with either business or non-business undergraduate degrees.

Program Requirements

All students will complete:

- INFSYS 5800 (3 hours)
- The requirements for two of the certificates listed (24 hours):
  - Graduate Certificate in Enterprise Systems Development (p. 459)
  - Graduate Certificate in Information Security Management and Auditing
  - Graduate Certificate in Information Systems and Technology
  - Graduate Certificate in Business Intelligence (p. 364)
- One elective course from the list below or from the certificates above (3 hours). Courses may also be substituted with other courses upon approval from the Department Chair.

Learning Outcomes

Upon completion of the program, graduates should be able to:

- Evaluate and implement effective IS leadership principles and strategy.
- Prioritize and propose managerial practices to develop and deploy technological innovations that produce business advantage.
- Explain best practices in systems analysis and design.
of study must include at least nine hours at the 3000-level or above; these courses may be in one or more disciplines.

**Hour and Grade Requirements**
The degree requires completion of 120 semester hours with a 2.0 campus grade point average overall and in the area of study. No more than 15 hours may be taken in one department. At least 45 hours must be earned in courses beyond the introductory level. A minimum of 24 hours of graded credit must be completed in residence at UMSL, of which 15 hours must be in the area of study and completed after admission to the B.I.S. program. Each candidate must be in residence for 24 of the last 30 hours of graded credit (exclusive of courses taken on a satisfactory/unsatisfactory basis).

**Supervised Professional or Service Internship and Independent Research**
Credit not exceeding 6 hours may be earned for department-approved professional internship, service internship, or independent research. The projects or activities must be formulated by the student and carried out under the supervision of a faculty member with the approval of the adviser. Students must submit a written report approved by the supervisor upon completion of the projects or activities.

**Learning Outcomes**
Upon completion of the program, graduates will be able to:

- Communicate effectively and professionally, in writing, in preparing presentations, and in interactions with others in their field.
- Prepare persuasive reports and documents that are well-organized and carefully edited.
- Work with advanced technologies in settings appropriate to their current and future workplaces.
- Engage in informed dialogue about their chosen fields, and clearly articulate their aspirations for their future success.
- Conduct research for their areas of academic focus and on avenues for career advancement and evolving opportunities in their professions.
- Negotiate details related to planning for future steps toward their professional development, and work productively with advisors, mentors, and colleagues to maximize their strategic impact.
- Network with professionals in their field to prepare for the job market and gain a thoroughly realistic perception of their potential.
- Undertake a variety of projects independently, and develop coherent and innovative plans to launch those projects.
- Design innovative approaches to solving problems, and explore solutions that merge disparate ideas and concepts and encourage collaboration and risk-taking.

**International and Comparative Politics Minor**

**Requirements for Political Science Minors**
A general minor in political science can be arranged, as well as specialized minors in eight different subfields of the discipline. Interested
students should see a faculty adviser to plan a coherent program of study as a minor field.

Students must achieve a cumulative 2.0 GPA in the political science courses chosen to qualify for the minor. Students may count no more than 3 hours in political science taken on a satisfactory/unsatisfactory basis toward the minor. Students taking an internship POL SCI 3940 may count no more than three hours of the internship toward the minor.

**Minor in Comparative Politics**

Total Hours: 15

**Learning Outcomes**

- Evaluate critical issues within and between other countries
- Demonstrate cross-cultural competence and a global worldview.
- Compare and contrast the major political, economic, cultural, and geographic features of different regions of the world.
- Assess comparative and international political issues, formulate evidence-based recommendations, and communicate them with clarity and coherence.

**International Business Minor**

**General Requirements**

- All minors are 15 credit hours or 5 courses, including business core courses.
- Students must attain a 2.0 grade point average for all courses in the minor.
- Students must attain a minimum grade of C- in each course included in the minor.
- All courses in the minor must be on a graded basis.
- A minimum of 9 credit hours of coursework included in the minor must be taken in residence at UMSL.
- One must complete a baccalaureate degree at UMSL in order for a minor to be conferred.
- A minor may be added for up to two years following completion of the baccalaureate degree.

**Specific Requirements for the Minor**

Available to all students except those pursuing the Bachelor of Science in Business Administration degree with an emphasis in International Business. Students must complete any 5 courses in International Business.

**Learning Outcomes**

Upon completion of the program, graduates will be able to:

- Discuss the impact of globalization on international businesses operations;
- Examine the impact of cultural factors and develop the sensitivity and appreciation for cultural differences;
- Relate functional knowledge for a specific area of business with global operation.

**International Relations BA**

**Bachelor of Arts in International Relations**

**General Education Requirements**

Majors must satisfy the university and college general education requirements. Political science courses may be used to satisfy the social sciences requirement. The foreign language requirement for the B.A. degree may be satisfied in any language.

**Departmental Honors**

The department awards honors to students having a minimum grade point average (GPA) of 3.2 in the major, a minimum overall GPA of 3.2 (except in extraordinary circumstances), and successfully completed an honors thesis, project, or report.

**Degree Requirements**

All majors must complete at least 15 hours in Political Science at the 3000 level or above.

**Core Courses**

<table>

</tr>
</tbody>
</table>
**Learning Outcomes**

Graduates of this program will be able to:

- Identify key trends in international relations that are expected to impact life in the United States and other countries in the foreseeable future.
- Demonstrate cross-cultural competence and a global worldview.
- Apply major international relations theories and concepts to contemporary issues in global affairs.
- Analyze the foreign policy behavior of the United States and other major actors in world politics.
- Compare and contrast the major political, economic, cultural, and geographic features of different regions of the world.
- Assess international relations issues, formulate evidence-based recommendations, and communicate them with clarity and coherence.
- Plan, execute, and defend a major research project.

**Comparative Politics**

Select three of the following:

<table>

<td>Mega-Cities and Diasporas: Understanding Global Migration</td>
</tr>
</tbody>
</table>

**Departmental Honors**

The department awards honors to students having a grade point average (GPA) of 3.2 in the major, an overall GPA of 3.2 (except in extraordinary circumstances), and successfully completed an honors thesis, project, or report.

**Total Hours:** 36

It is recommended that majors take POL SCI 1500, POL SCI 1800, POL SCI 1820, and POL SCI 3000 as early as possible since these courses are designed to provide a substantive foundation as well as conceptual and analytical tools for subsequent course work.

Majors are strongly encouraged to broaden their academic experience by including relevant curricular experiences including study abroad, and minors or certificates in areas such as economics and foreign languages.

B.A. degree students may take a maximum of 3 hours of political science on a satisfactory/unsatisfactory basis; this can include any course except the four required courses in the core curriculum.

**Total Hours:** 120

1 INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

*Please Note: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.*
International Relations Minor

Requirements for Political Science Minors

A general minor in political science can be arranged, as well as specialized minors in eight different subfields of the discipline. Interested students should see a faculty adviser to plan a coherent program of study as a minor field.

Students must achieve a cumulative 2.0 GPA in the political science courses chosen to qualify for the minor. Students may count no more than 3 hours in political science taken on a satisfactory/unsatisfactory basis toward the minor. Students taking an internship POL SCI 3940 may count no more than three hours of the internship toward the minor.

Total Hours 15

International Studies Graduate Certificate

Applicants to the Certificate program must meet the general requirements for admission to Graduate School as explained in the graduate study section of this Bulletin. The Certificate is awarded after completion of 18 hours, including a minimum of 12 hours drawn from a list of core courses and an additional six hours selected from a wide variety of offerings in eight different disciplines. No more than 12 hours may be from any one discipline. Students may simultaneously earn a graduate degree and count credits earned in their degree program toward the Certificate when appropriate.

Requirements

Select four from the following list of core courses:

<table>
<thead>
<tr>
<th>Course</th>

</tr>
<tr>
<td>ECON 5301</td>
<td>International Monetary Analysis</td>
</tr>
<tr>
<td>History</td>
<td></td>
</tr>
</tbody>
</table>

Learning Outcomes

Upon completion of the program, certificate earners will be able to:

- Explain the major components of culture and how cultural differences affect conducting business abroad
- Integrate global awareness and cultural knowledge into business analysis
- Describe functional knowledge of global operation for a specific area of business, such as marketing or finance
- Assess the impact of cultural and environmental factors on international business operations

Internet and Web Undergraduate Certificate

Certificate Requirements

The undergraduate certificate in Internet and Web is a five-course (15 credit hour) program. It is designed to provide a broad training in technologies related to the Internet and Web, with flexibility allowing a student to satisfy specific interests. A minimum GPA of 2.5 is required for admission.

Japanese Minor

A minor in French, German, Japanese or Spanish requires the completion of four courses in the language beyond the basic foundation sequence (Language 1001, Language 1002, and Language 2101). Transfer students must complete at least two courses for the minor at UMSL. All courses must be passed with a grade of C- or better.

Select one course in Japanese Studies 3

Learning Outcomes

Graduates with a minor in Japanese from the University of Missouri-St. Louis can use the language to interact with native speakers on familiar topics related to their daily lives. They have an emerging understanding of Japanese culture fostered through engaging courses and opportunities such as study abroad. They can apply their linguistic and cultural competencies in real-life situations such as travel and work.

Skills and Knowledge Areas

Upon completion of the Japanese minor, students should be able to:

Linguistic Goals

- In listening/speaking:
  - demonstrate comprehension of the main ideas and supporting details of everyday conversations on familiar and concrete topics, both formal and informal;
  - take part in conversations on topics related to work, school, home, leisure activities, culture, and media;
  - narrate short anecdotes using Japanese conversational conventions; and,
  - function in real-world situations in culturally-appropriate ways.

- In reading/writing:
  - interpret basic authentic texts, such as menus and schedules;
  - apply reading strategies to glean key information from more challenging texts;
  - compose simple practical messages, such as personal emails and letters; and,
  - assess language reference resources and use them effectively.

Cultural Goals

- recognize and describe some of the key historical, social, economic, and political forces that shape Japanese society;
- analyze and critique the products of Japanese culture (film, media, literature, art, etc.) in socio-historical context.

The linguistic goals are based on the National Standards For Foreign Language Learning and the ACTFL Proficiency Guidelines. In speaking and listening, minors are expected to reach the Intermediate-Mid level proficiency at a minimum. For detailed descriptions of sublevels, see the ACTFL Proficiency Guidelines.

Jazz Studies Minor

Candidates must complete 22 credit hours from the following:

**Music Theory**

**Latina/Latino Studies Minor**

Latina/Latino Studies at the University of Missouri-St. Louis is an interdisciplinary program dedicated to the study of the historical, social, political, language, and cultural experiences of U.S. Latina/Latinos, their families and communities. Students in this program will examine how transnational understandings of race, ethnicity, politics, culture, and language are mapped onto and struggled over within the United States, the Midwest, and St. Louis.

In addition to two required courses—Introduction to Latina/Latino Studies and an internship/service learning Capstone Experience—students will select three electives to round out the minor, each from a different discipline, on topics such as immigration, bilingualism, cultural worldview, comparative politics, and history (more classes will be added as created). Students will combine courses across the disciplinary spectrum into an individualized program to gain a deeper understanding of Latina/

**Learning Outcomes**

Upon completion of the program, a certificate earner will be able to:

- Identify and apply techniques to research and analyze power relations, organizational structures, and effective action in workplace settings.
- Demonstrate knowledge about the economy, including wage, tax, and trade policy; historical disparities; and the role of corporations, unions, and other organizations.
- Assess, analyze and apply the skills of building cooperation and collaboration needed in negotiations and in alternative dispute resolution.
- Locate and clearly explain the laws and regulations affecting workers, workplaces, labor and community organizations.

**Learning Outcomes**

Upon completion of the program, graduates will be able to:

- Read, interpret evidence, and draw conclusions about the role and contributions of Latinxs to the history, culture, economy, language, politics, and social experiences of the United States;
- Communicate ideas about Latinxs, Latinx communities, and race, gender, class, and ethnicity in evidence-based presentations, writings, and new media;
- Apply a foundational understanding of Latinxs, Latinx communities, and complexities of race, gender, class, and ethnicity to new situations, questions, and concerns.

**Law and Philosophy Minor**

The undergraduate minor in Law and Philosophy requires five philosophy courses (15 credit hours). At least 6 hours must be at the 3000 level or above. A GPA of 2.0 or better is required in courses presented for the minor. Prospective minors are encouraged to consult with members of the department for advice in planning an appropriate sequence of courses.

PHIL 2252  Crime and Punishment  3
PHIL 4487  Topics in Philosophy of Law  3
PHIL 1160  or PHIL 3360  Critical Thinking (MOTR PHIL 101)  3

To obtain a Bachelor of Liberal Studies (BLS), a student must complete:

1. The BLS program is administered through the Department of Philosophy. In special cases, one of the 3000-level or higher courses may be taken outside of the UMSL Department of Philosophy; the course must (1) have a strong law and philosophy component and (2) have been pre-approved by the Pre-Law advisor.

### Learning Outcomes

An ideal graduate with a Minor in Law and Philosophy will:

- Demonstrate an ability to apply the distinctive methods of philosophy by reconstructing philosophical arguments and deliberating rationally over their merits
- Understand central theories about the nature of law and its role in society
- Be able to critically evaluate on moral and empirical grounds a range of common justifications for the use of punishment by the state
- Demonstrate competence with formal reasoning tools such as syllogistic logic, propositional logic and/or quantificational logic and show an ability to apply those tools in philosophical and everyday contexts
- Will have detailed knowledge of, and an ability to critically evaluate, the dominant positions in the history of legal philosophy on the nature and role of law
- Will be able to apply legal theory to contemporary ethical and social issues
- Will be able to think critically and ethically about issues in legal theory and express their thoughts in a clear and persuasive writing style

### Liberal Studies BLS

**Bachelor of Liberal Studies (BLS)**

The Bachelor of Liberal Studies is a degree program that enables students to combine structured areas of academic emphasis in ways more relevant to their interests than the standard academic major.

Students who participate in this program must declare their areas of study (two minors or a minor and undergraduate certificate) at the time they declare that BLS is their intended degree. The plan of study must be approved at the beginning of the program.

The BLS program is administered through the Department of Philosophy.

To obtain a Bachelor of Liberal Studies (BLS), a student must complete:

- UMSL General Education Requirements (consult General Education (p. 51) section of course listings)
- In addition, students must complete the State Requirement (3) and Cultural Diversity Requirement (3) if not met in General Education course selection
- The university requirement of proficiency in English Composition
  - ENGL 1100 - First Year Writing (to be completed in the first 24 credit hours at the university)
  - Junior Level Writing
- The university requirement of proficiency in Mathematics (to be completed in the first 24 credit hours at the university)
- Two courses in Philosophy  

Total Hours 15

1 PHIL 3000-level or higher courses must be taken in residence in the UMSL Department of Philosophy. In special cases, one of the 3000-level or higher courses may be taken outside of the UMSL Department of Philosophy; the course must (1) have a strong law and philosophy component and (2) have been pre-approved by the Pre-Law advisor.

Also Required

- Minimum of 45 credit hours in upper level course work (2000 or higher)
  - Electives 28-42
  - A minimum of 120 credit hours
  - Overall GPA of 2.0 or better
  - GPA of 2.0 or better in BLS combination areas (unless otherwise specified)
  - Minimum grade of C in all courses used in BLS combination areas unless otherwise specified by the department
  - Residency requirement, in addition to campus residency, unless otherwise specified, 9 graded hours in each minor and certificate at 2000 level or above and one capstone course

1 Note: Not all minors have a designated BLS capstone course so students must be careful to pair minors and certificates so that they have a capstone course.

The Colleges of Arts and Sciences (CAS), Business Administration (COBA), College of Education (COE), the Pierre Laclede Honors College (PLHC), and the School of Social Work (SW) have joined together to make available Liberal Studies combinations involving the following units:

- Department of Anthropology and Archaeology (CAS)
- Department of Art and Design (CAS)
- Department of Biology (CAS)
- College of Business Administration (COBA)
- College of Education (COE)
- Department of Chemistry and Biochemistry (CAS)
- Department of Communication and Media (CAS)
- Department of Criminology and Criminal Justice (CAS)
- Department of Economics (CAS)
- Department of English (CAS)
- Department of History (CAS)
- Pierre Laclede Honors College (PLHC)  
  - Department of Language and Cultural Studies (CAS)
- Department of Mathematics and Computer Science (CAS)
- Department of Music (CAS)
- Department of Philosophy (CAS)
- Department of Physics and Astronomy (CAS)
- Department of Political Science (CAS)
- Department of Psychological Sciences (CAS)
- Department of Sociology, Gerontology and Gender Studies (CAS)
- Department of Theatre Arts (CAS)
- School of Social Work (SW)
- Undergraduate certificates
**Bachelor of Liberal Studies: Capstone and Other Restrictions**

1. Students who are planning to earn a Bachelor of Liberal Studies degree should declare the BLS as their major within the first 90 hours of the program. Declaration past this time may prevent timely graduation as all capstone courses are not available every semester.

2. The College of Nursing and the Joint Engineering Program are not participants in the BLS program.

3. The following Colleges/Departments participate in the BLS program but do not offer a capstone course and must be paired with a minor from one of the areas listed below: Business, Studio Art, Theater Arts, Statistics, Undergraduate Certificates, and Interdisciplinary minors.

4. Students admitted to the Pierre Laclede Honors College who wish to present the Honors Certificate as a minor for the BLS must complete the Honors Capstone, (one or two credit hours) and also direct three to six hours of their Honors independent study requirement to work demonstrably relevant to their BLS program. Students should consult the BLS faculty advisor in the Honors College about this requirement.

5. The capstone is required in addition to the courses presented for the minor. A minimum grade of C must be earned in the capstone course. The capstone course is not counted toward the minor residency requirement.

6. Students choosing to combine the minor in History of Science and Technology with a minor in the Philosophy of Science and Technology may use the same course to satisfy the Logic and Methodology requirement for both minors and may select either PHIL 4491 or HIST 4999 as the capstone. However, students selecting HIST 4999 must have also taken HIST 2999.

7. The following have identified a Capstone, so at least one of these minors must be included in the BLS program:

<table>
<thead>
<tr>
<th>Minor</th>

Local Government Management Graduate Certificate

The Graduate Certificate in Local Government Management is designed for current professional staff, elected or non-elected local government officials, and those who are interested in pursuing a career in the local government sector. The certificate can be taken by itself or in conjunction with the Master of Public Policy Administration degree or other graduate degree. A separate application for the certificate program may be required when students in a degree program wish to incorporate the certificate program.

Requirements

The Graduate Certificate in Local Government Management requires the completion of 18 credit hours. Twelve of these are the following core courses:

- **P P ADM 6180** Governmental Budgeting and Financial Control 3
- **P P ADM 6340** Seminar in City Administration 3
- **P P ADM 6470** Seminar in Urban Politics 3
- **POL SCI 4950** Senior Seminar in Political Science 3
- **P P ADM 6350** Human Resources in the Public Sector 3
- **P P ADM 6490** Proseminar in Urban Politics 3
- **P P ADM 6680** Seminar in Public Administration 3
- **P P ADM 6690** Urban and Regional Planning and Public Policy 3
- **P P ADM 6600** Managing People in Organizations 3

Total Hours 12

Three hours of electives are to be taken from selected courses in business administration, criminal justice, economics, political science, and public policy administration. A student may choose among these courses or other courses approved by the program director. Electives will be chosen from the following course list:

Select one of the following: 1

- **CRIMIN 6442** Communities and Crime
- **ECON 4160** Geospatial Analysis in the Social Sciences
- **ECON 5700** Proseminar in Urban Politics
- **POL SCI 6470** Proseminar in Urban Politics
- **POL SCI 6471** Seminar in Urban Politics
- **P P ADM 6340** Seminar in City Administration
- **P P ADM 6350** Human Resources in the Public Sector
- **P P ADM 6490** Proseminar in Urban Politics
- **P P ADM 6680** Seminar in Public Administration

Total Hours 3

1 Must be admitted to Honors program.

Logistics and Supply Chain Management Graduate Certificate

The Graduate Certificate in Logistics and Supply Chain Management is an 18-hour program designed to provide a focused, intensive study of important issues within logistics and, more broadly, in supply chain management. Three required courses provide thorough background in operations, logistics and supply chain management. Three elective courses allow specialization in areas such as logistics and supply chain software, international logistics, operations research, e-commerce, and quality.

Program Description

The Graduate Certificate in Logistics and Supply Chain Management provides focused and intensive study of important topics in supply chain management including procurement, production, operations, logistics and transportation. Students first get introduced to the foundation and basic concepts of supply chain management. They then take in-depth studies into domain topics of global supply chain management, strategic sourcing and supply chain integration, in conjunction with analytical methodologies for various data-driven decision-making functions in supply chains, including facility location and layout, production planning, inventory control, scheduling and vehicle routing. The program is suitable for candidates with undergraduate or graduate education other than supply chain management. It is also suitable for professionals whose primary responsibility is in other business functions (e.g., finance, marketing, information system, accounting), but who wish to broaden their scope of knowledge and training in supply chains.

This 12 credit hour certificate program also counts toward MBA degree program with the Management, and Operations Management Emphasis.
Admission Requirements
Applicants must meet general University of Missouri-St. Louis Graduate School admissions requirements.

Certificate Requirements
All course prerequisites and all course waivers are applicable. Substitute courses may be approved by the appropriate department chairperson and the Director of Graduate Business Programs.

Required Course
- SCMA 5310 Supply Chain Strategies 3

Supply Chain Management Course
Choose one of the following courses:
- SCMA 5381 Global Supply Chain Management
- SCMA 6321 Strategic Sourcing
- SCMA 6360 Supply Chain Integration

Supply Chain Analytics Course
Choose one of the following courses:
- SCMA 5320 Supply Chain and Operations Management
- SCMA 6330 Business Logistics Systems
- SCMA 6331 Supply Chain Modeling

Elective
An additional course chosen from the remaining Supply Chain Management and Supply Chain Analytics courses 3

Total Hours 12

The required and elective courses may be substituted with other courses with the approval of the Chair of Supply Chain & Analytics Department.

Learning Outcomes
Upon completion of the program, certificate earners should be able to:
- Interpret foundational concepts in supply chain management including procurement/sourcing, production, operations and logistics, across domain contexts such as global supply chain management, strategic sourcing and supply chain integration
- Apply analytical methods for data-driven decision making in supply chain management

Management Minor

General Requirements
- All minors are 15 credit hours or 5 courses, including business core courses.
- Students must attain a 2.0 grade point average for all courses in the minor.
- Students must attain a minimum grade of C- in each course included in the minor.
- All courses in the minor must be on a graded basis.
- A minimum of 9 credit hours of coursework included in the minor must be taken in residence at UMSL.
- One must complete a baccalaureate degree at UMSL in order for a minor to be conferred.

- A minor may be added for up to two years following completion of the baccalaureate degree

Specific Requirements for the Minor
Available to all students except those pursuing the Bachelor of Science in Business Administration degree. Students must complete:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MGMT 3600</td>
<td>Management and Organizational Behavior</td>
<td>3</td>

<td>Advanced Management and Organizational Behavior</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Select any three upper division management and organizational behavior electives. 9</td>
<td></td>
</tr>
</tbody>
</table>

Learning Outcomes
Upon completion of the program, graduates will be able to:
- Demonstrate competence in applying management concepts and theories related to motivation, leadership, group process, decision making, job design, and organizational development.
- Demonstrate the ability to utilize a diversity-oriented mindset in business decision-making.
- Demonstrate the ability to apply human resource concepts regarding attracting, selecting, developing, motivating, evaluating and retaining employees.

Marketing Management Graduate Certificate

Effective Fall 2020, The Marketing Management Graduate Certificate will no longer be accepting applications

Requirements
Students must complete the following six courses or appropriate substitutes if course waivers are appropriate:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MKTG 5700</td>

<td>Marketing Communications</td>
<td>3</td>
</tr>
<tr>
<td>MKTG 5730</td>
<td>Clinical Study in Digital and Social Media Marketing</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Hours 18

All course prerequisites and all course waivers are applicable. The Marketing department chairperson and the director of Graduate Studies in Business must approve substitute courses. In all cases, 18 hours (including at least 12 hours in Marketing) are needed to complete the certificate.

Learning Outcomes
Upon completion of the program, certificate earners will be able to:
• Assess the role and practice of marketing within an organization, including theoretical and applied aspects of the marketing discipline (MKTG 5700)
• Demonstrate proficiency in marketing analytics and research skills (MKTG 5740)
• Describe how marketers design and adapt their campaigns and strategies based on the psychology of their buyers and the processes these buyers employ to learn about, select, use, and dispose of products (MKTG 5710)
• Develop, analyze, and evaluate strategic and tactical marketing plans and programs and to assess marketing performance (MKTG 5701)

Marketing Minor

General Requirements

• All minors are 15 credit hours or 5 courses, including business core courses.
• Students must attain a 2.0 grade point average for all courses in the minor.
• Students must attain a minimum grade of C- in each course included in the minor.
• All courses in the minor must be on a graded basis.
• A minimum of 9 credit hours of coursework included in the minor must be taken in residence at UMSL.
• One must complete a baccalaureate degree at UMSL in order for a minor to be conferred.

Specific Requirements for the Minor

Available to all students except those pursuing the Bachelor of Science in Business Administration degree. Students must complete:

MKTG 3700 Basic Marketing 3
Select any four additional upper division marketing electives. 12

Learning Outcomes

Upon completion of the program, graduates will be able to:

• Students will be able to develop knowledge about the definition of marketing, consumer, and environment.
• Students will be able to identify drivers of consumer behavior and market opportunities and threats.
• Students will be able to interpret marketing research results.
• Students will be able to explain product, price, place, and promotion strategies.

Mathematical and Computational Science PhD, Computer Science Emphasis

Admission Requirements

Applicants must have at least a bachelor’s degree in mathematics or in a field with significant mathematical content. Examples of such fields include computer science, data science, economics, engineering and physics. An applicant’s record should demonstrate superior achievement in undergraduate mathematics.

Individuals may apply for direct admission to either the M.A. or Ph.D. program. Candidates for the M.A. degree may choose an emphasis in mathematics or data science. Students in the M.A. program who want to transfer to the Ph.D. program upon successful completion of 15 credit hours must fill out a new application through Graduate Admissions.

Students intending to enter the Ph.D. program must have a working ability in modern programming technologies. A student with a deficiency in this area may be required to take courses at the undergraduate level in computer science.

Applicants for the Ph.D. program must, in addition, submit three letters of recommendation and scores from the Graduate Record Examination (GRE) general aptitude test.

Doctor of Philosophy in Mathematical and Computational Sciences

The program has three options:

1. Mathematics Option
2. Computer Science Option
3. Statistics Option

The requirements for the Ph.D. degree include the following:

1. Course work
2. Ph.D. candidacy
3. Doctoral dissertation

The requirements are described in detail below.

1. Course Work
   A minimum of 60 hours of courses numbered 4000 or above.
   In the Mathematics Option, at least 33 hours must be in courses numbered 5000 or above.
   In the Computer Science Option, at least 45 hours must be in courses numbered 5000 or above.
   In the Statistics Option, at least 33 hours must be in courses numbered 5000 or above.

At most 9 hours of a student’s enrollment in Dissertation Research may be counted. Students are expected to maintain a 3.0 average on a 4.0 scale. All courses numbered below 5000 must be completed with a grade of at least B. Courses outside the Department of Mathematics and Computer Science will require approval of the graduate director.

When students who have earned a Master’s degree are admitted to the doctoral program, appropriate credits of course work may be applied toward meeting the requirements for the doctoral degree, subject to Graduate School regulations and the approval of the graduate director. The same applied to those with some appropriate graduate credits but without a completed Master’s degree.

2. Ph.D. Candidacy
   Advancement to Ph.D. candidacy is a three-step process consisting of:
   a. Completing 18 hours of 5000 level courses other than Ph.D. Dissertation Research as appropriate for the selected option.
b. Passing the comprehensive examination.
c. Selecting a Ph.D. committee and preparing a dissertation proposal and defense of the proposal.

**Qualifying Examination**
A student must fulfill the following requirements.

**Basic Requirement**
Pass one written examination covering fundamental topics. This examination would normally take place within the first 12 credit hours of study after admission to the Ph.D. program.

**Mathematics Option**
Topics from real analysis, complex analysis, and linear algebra:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 4100</td>
<td>Real Analysis I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 4160</td>
<td>Complex Analysis I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 4450</td>
<td>Linear Algebra</td>
<td>3</td>
</tr>
<tr>
<td><strong>Total Hours</strong></td>
<td></td>
<td><strong>9</strong></td>
</tr>
</tbody>
</table>

**Computer Science Option**
Topics from the theory of programming languages, operating systems, analysis of algorithms, and computer systems:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CMP SCI 4250</td>
<td>Programming Languages</td>
<td>3</td>
</tr>
<tr>
<td>CMP SCI 4760</td>
<td>Operating Systems</td>
<td>3</td>
</tr>
<tr>
<td>CMP SCI 5130</td>
<td>Advanced Data Structures and Algorithms</td>
<td>3</td>
</tr>
<tr>
<td><strong>Total Hours</strong></td>
<td></td>
<td><strong>12</strong></td>
</tr>
</tbody>
</table>

**Statistics Option**
Topics from real analysis, linear algebra, and mathematical statistics:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 4100</td>
<td>Real Analysis I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 4450</td>
<td>Linear Algebra</td>
<td>3</td>

</tr>
<tr>
<td>MATH 4210</td>
<td>Mathematical Statistics II</td>
<td>3</td>
</tr>
<tr>
<td><strong>Total Hours</strong></td>
<td></td>
<td><strong>12</strong></td>
</tr>
</tbody>
</table>

**Additional Requirement**
After fulfilling the basic requirement above, the student must meet one of the following:

1. Pass a written examination in an area of the student’s interests. This area will be approved by the graduate committee and will be based on a set of two or more graduate courses taken by the student. This examination would normally take place within the first 24 credit hours of study after admission to the Ph.D. program.
2. Write a survey paper in a specialized area under the direction of a member of the graduate faculty. The student should propose to take this option when he/she has already finished at least 2 graduate level courses and has the approval of the graduate committee. The paper should be submitted within four semesters, at which time an oral examination given by a committee of at least three members of the graduate faculty must be passed.

In both parts 1) and 2), the graduate committee will determine if the topics are consistent with the option that the student is pursuing.

**Dissertation Committee and Dissertation Proposal**
After completing the comprehensive examinations, each student chooses a dissertation advisor and prepares a Dissertation Proposal. Usually students choose an advisor from contacts made through their course work. The dissertation committee will be formed, and the student will meet with this committee for an oral defense of his/her dissertation proposal. The dissertation proposal is a substantial document describing the problem to be worked on and the methods to be used, as well as demonstrating the student’s proficiency in written communication.

**Doctoral Dissertation**
Each Ph.D. candidate must write a dissertation that is an original contribution to the field on a topic approved by the candidate’s Ph.D. Committee and the department, and which meets the standards and requirements set by the Graduate School including the public defense of the dissertation. Students working on a dissertation may enroll in Ph.D. Dissertation Research, as appropriate for the selected option. A maximum of 9 hours Dissertation Research can be used toward the required hours of work in courses numbered 5000 or above.

**Mathematical and Computational Science PhD, Mathematics Emphasis**

**Admission Requirements**
Applicants must have at least a bachelor's degree in mathematics or in a field with significant mathematical content. Examples of such fields include computer science, data science, economics, engineering and physics. An applicant’s record should demonstrate superior achievement in undergraduate mathematics.

Individuals may apply for direct admission to either the M.A. or Ph.D. program. Candidates for the M.A. degree may choose an emphasis in mathematics or data science. Students in the M.A. program who want to transfer to the Ph.D. program upon successful completion of 15 credit hours must fill out a new application through Graduate Admissions.

Students intending to enter the Ph.D. program must have a working ability in modern programming technologies. A student with a deficiency in this area may be required to take courses at the undergraduate level in computer science.

Applicants for the Ph.D. program must, in addition, submit three letters of recommendation and scores from the Graduate Record Examination (GRE) general aptitude test.

**Preliminary Advisement**
Incoming students are assigned advisers with whom they should consult before each registration period to determine an appropriate course of study. If necessary, students may be required to complete undergraduate course work without receiving graduate credit.

Students interested in the Ph.D. program in mathematical and computational sciences with the computer science option must follow the requirements for that program and that option.
Doctor of Philosophy in Mathematical and Computational Sciences

The program has three options:

1. Mathematics Option
2. Computer Science Option
3. Statistics Option

The requirements for the Ph.D. degree include the following:

1. Course work
2. Ph.D. candidacy
3. Doctoral dissertation

The requirements are described in detail below.

1. Course Work
   A minimum of 60 hours of courses numbered 4000 or above.
   - In the Mathematics Option, at least 33 hours must be in courses numbered 5000 or above.
   - In the Computer Science Option, at least 45 hours must be in courses numbered 5000 or above.
   - In the Statistics Option, at least 33 hours must be in courses numbered 5000 or above.
   - At most 9 hours of a student's enrollment in Dissertation Research may be counted. Students are expected to maintain a 3.0 average on a 4.0 scale. All courses numbered below 5000 must be completed with a grade of at least B. Courses outside the Department of Mathematics and Computer Science will require approval of the graduate director.

When students who have earned a Master's degree are admitted to the doctoral program, appropriate credits of course work may be applied toward meeting the requirements for the doctoral degree, subject to Graduate School regulations and the approval of the graduate director. The same applied to those with some appropriate graduate credits but without a completed Master's degree.

2. Ph.D. Candidacy
   Advancement to Ph.D. candidacy is a three-step process consisting of:
   a. Completing 18 hours of 5000 level courses other than Ph.D. Dissertation Research as appropriate for the selected option.
   b. Passing the comprehensive examination.
   c. Selecting a Ph.D. committee and preparing a dissertation proposal and defense of the proposal.

Qualifying Examination

A student must fulfill the following requirements.

Basic Requirement

Pass one written examination covering fundamental topics. This examination would normally take place within the first 12 credit hours of study after admission to the Ph.D. program. 

Mathematics Option

Topics from real analysis, complex analysis, and linear algebra:

<td></td>
<td>12</td>
</tr>
</tbody>
</table>

Additional Requirement

After fulfilling the basic requirement above, the student must meet one of the following:

1. Pass a written examination in an area of the student's interests. This area will be approved by the graduate committee and will be based on a set of two or more graduate courses taken by the student. This examination would normally take place within the first 24 credit hours of study after admission to the Ph.D. program.

2. Write a survey paper in a specialized area under the direction of a member of the graduate faculty. The student should propose to take this option when he/she has already finished at least 2 graduate level courses and has the approval of the graduate committee. The paper should be submitted within four semesters, at which time an oral examination given by a committee of at least three members of the graduate faculty must be passed.

In both parts 1) and 2), the graduate committee will determine if the topics are consistent with the option that the student is pursuing.

Dissertation Committee and Dissertation Proposal

After completing the comprehensive examinations, each student chooses a dissertation advisor and prepares a Dissertation Proposal. Usually students choose an advisor from contacts made through their course work. The dissertation committee will be formed, and the student will meet with this committee for an oral defense of his/her dissertation proposal. The dissertation proposal is a substantial document describing the problem to be worked on and the methods to be used, as well as demonstrating the student's proficiency in written communication.
Doctoral Dissertation

Each Ph.D. candidate must write a dissertation that is an original contribution to the field on a topic approved by the candidate’s Ph.D. Committee and the department, and which meets the standards and requirements set by the Graduate School including the public defense of the dissertation. Students working on a dissertation may enroll in Ph.D. Dissertation Research, as appropriate for the selected option. A maximum of 9 hours Dissertation Research can be used toward the required hours of work in courses numbered 5000 or above.

Financial Assistance

Any student who intends to apply for financial assistance, in the form of a teaching assistantship or a research assistantship, is required to have three letters of recommendation submitted with the application to the graduate program in Mathematics or Computer Science. The application must include scores on the GRE general aptitude test. Applicants are also encouraged to submit scores in the GRE subject area test in Mathematics or Computer Science. Applications for financial assistance should be submitted before February 15 prior to the academic year in which the student expects to begin graduate study. Notifications of awards are generally made March 15, and students awarded financial assistance are expected to return letters of acceptance by April 15.

Mathematical and Computational Science PhD, Statistics Emphasis

Admission Requirements

Applicants must have at least a bachelor's degree in mathematics or in a field with significant mathematical content. Examples of such fields include computer science, data science, economics, engineering and physics. An applicant’s record should demonstrate superior achievement in undergraduate mathematics.

Individuals may apply for direct admission to either the M.A. or Ph.D. program. Candidates for the M.A. degree may choose an emphasis in mathematics or data science. Students in the M.A. program who want to transfer to the Ph.D. program upon successful completion of 15 credit hours must fill out a new application through Graduate Admissions.

Students intending to enter the Ph.D. program must have a working ability in modern programming technologies. A student with a deficiency in this area may be required to take courses at the undergraduate level in computer science.

Applicants for the Ph.D. program must, in addition, submit three letters of recommendation and scores from the Graduate Record Examination (GRE) general aptitude test.

Doctor of Philosophy in Mathematical and Computational Sciences

The program has three options:
1. Mathematics Option
2. Computer Science Option
3. Statistics Option

The requirements for the Ph.D. degree include the following:

1. Course work
2. Ph.D. candidacy
3. Doctoral dissertation

The requirements are described in detail below.

1. Course Work
A minimum of 60 hours of courses numbered 4000 or above.
In the Mathematics Option, at least 33 hours must be in courses numbered 5000 or above.
In the Computer Science Option, at least 45 hours must be in courses numbered 5000 or above.
In the Statistics Option, at least 33 hours must be in courses numbered 5000 or above.
At most 9 hours of a student’s enrollment in Dissertation Research may be counted. Students are expected to maintain a 3.0 average on a 4.0 scale. All courses numbered below 5000 must be completed with a grade of at least B. Courses outside the Department of Mathematics and Computer Science will require approval of the graduate director.

Students working on a dissertation may enroll in Ph.D. Dissertation Research, as appropriate for the selected option. A maximum of 9 hours Dissertation Research can be used toward the required hours of work in courses numbered 5000 or above.

Mathematics BA

General Education Requirements

All department majors must satisfy the university and appropriate school or college general education requirements (p. 51). All mathematics courses may be used to meet the university's general education breadth of study requirement in natural sciences and mathematics.

Satisfactory/Unsatisfactory Restrictions

All department majors may not take mathematical sciences or related area courses on a satisfactory/unsatisfactory basis. Students considering graduate study should consult with their advisers about taking work on a satisfactory/unsatisfactory basis.

Degree Requirements

All courses of the department presented to meet the degree requirements must be completed with a grade of C- or better. At least four courses numbered 3000 or above must be taken in residence. Students must have a 2.0 grade point average in the mathematical sciences courses completed.

Students enrolling in introductory mathematics courses should check the prerequisites to determine if a satisfactory score on the Mathematics Placement Test is necessary. Placement into introductory courses assumes a mastery of two years of high school algebra.

A minimum grade of C- is required to meet the prerequisite requirement for any course except with permission of the department.

Note: Courses that are prerequisites for higher-level courses may not be taken for credit or quality points if the higher-level course has been satisfactorily completed.

Many students are qualified, as a result of having studied calculus in high school, to begin their major with MATH 1900, Analytic Geometry and Calculus II, or MATH 2000, Analytic Geometry and Calculus III. These students are urged to consult with the department before planning their programs. Credit for MATH 1800, Analytic Geometry and Calculus I, will be granted to those students who complete MATH 1900 with a grade of C- or better.

Similarly, students who are ready to begin their computer science studies with CMP SCI 2250, Programming and Data Structures, will be granted credit for CMP SCI 1250, Introduction to Computing, once they complete CMP SCI 2250 with a grade of C- or better.

Declaring the Mathematics Major

Students seeking to major in mathematics are first designated as "pre-mathematics majors" until they have completed both MATH 1900 and MATH 2000 or equivalent courses. Upon successful completion of these two courses with grades of C or better, students will be allowed to declare mathematics as their major. Each of these courses must be completed successfully within two attempts.

Degree Requirements in Mathematics

All mathematics majors in all undergraduate programs must complete the mathematics core requirements.
Core Requirements

1. The following courses are required:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CMP SCI 1250</td>
<td>Introduction to Computing</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1320</td>
<td>Introduction to Probability and Statistics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1800</td>
<td>Analytic Geometry and Calculus I</td>
<td>5</td>
</tr>
<tr>
<td>MATH 1900</td>
<td>Analytic Geometry and Calculus II</td>
<td>5</td>
</tr>
<tr>
<td>MATH 2000</td>
<td>Analytic Geometry and Calculus III</td>
<td>5</td>
</tr>
<tr>
<td>MATH 2020</td>
<td>Introduction to Differential Equations</td>
<td>3</td>
</tr>
<tr>
<td>MATH 2450</td>
<td>Elementary Linear Algebra</td>
<td>3</td>
</tr>
<tr>
<td>MATH 3250</td>
<td>Foundations of Mathematics</td>
<td>3</td>
</tr>
<tr>
<td>or CMP SCI 3130</td>
<td>Design and Analysis of Algorithms</td>
<td></td>
</tr>
<tr>
<td>MATH 4100</td>
<td>Real Analysis I</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Hours: 33

2. The related area requirements as described below must be satisfied.
Students seeking a double degree, either within this department or with another department, do not have to fulfill the related area requirements.

Related Area Requirements for majors in Mathematics

Candidates for the B.A. in Mathematics must satisfy the requirements in one of the groups below with a grade of C- or better. Candidates for the B.S.Ed. in Mathematics and B.S. in Mathematics must satisfy the requirements in two of the groups below with a grade of C- or better.

If candidates choose group 2, then they cannot apply either of the two courses listed in that group towards the additional 4000 level mathematics courses (beyond the core requirements) that must be completed for each of these degrees.

Students seeking a double degree, either within this department or with another department do not have to fulfill the related area requirements.

Related Area Courses

1) Computer Science

In addition to the core requirements and the College of Arts and Sciences’ foreign language requirement, three mathematics courses at the 4000 level or higher must be completed. Of these, one must be MATH 4400, Introduction to Abstract Algebra

B.S. Ed. in Secondary Education with Emphasis in Mathematics

The B.S. Ed. is a professional education degree designed for students who wish to pursue a teaching career in secondary schools. Much of the discipline-specific coursework parallels the B.A. or B.S. degree in the discipline; however, the Missouri Department of Elementary and Secondary Education (DESE) requires specific coursework for teacher certification. Therefore, students interested in the B.S. Ed. should contact the advising office (OASIS) 314-516-5937 in the College of Education for discipline-specific requirements. Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

B.A. or B.S. in Mathematics with Master’s Level Coursework for Secondary Teacher Certification

In addition to the B.S. Ed., students may opt to complete a B.A. or B.S. degree in their discipline as an undergraduate, followed by admission to
the Graduate School for Master’s level teaching certification. The College of Education has a one-year accelerated program for post-graduate certification called Teach in 12, or students can choose a traditional path to certification. Graduate coursework for certification can apply towards a Master’s Degree in Secondary Education, with additional coursework. Students interested in Master’s Level teacher certification should contact the advising office (OASIS) 314-516-5937 in the College of Education. Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

Learning Outcomes

- A successful undergraduate should, upon completion, be able to:
  - Write clear, logically consistent proofs.
  - Read, understand and assess the veracity of logical arguments or mathematical proofs.
  - Reformulate problems or questions in relevant mathematical terms.
  - Solve problems which involve analysis, algebra or linear algebra, elementary number theory, elementary probability or statistics.
  - Demonstrate basic proficiency in speaking, reading and writing in a language in addition to English.

Total Hours: 120

\(^1\) INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

Please Note: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Mathematics BA or BS/MA Dual Degree Program

**BA/BS and MA Dual Degree Program in Mathematics**

This is an integrated BA/BS and MA (‘2+3’) dual degree program in Mathematics: it is designed to provide an opportunity for mathematics majors at the University of Missouri-St Louis (UMSL) with a strong academic record to start earning graduate work credit before actually completing their undergraduate degree and to shorten, or accelerate, the time required as graduate students to earn their master’s degree. A student in this program can apply up to 12 credit hours of 4000-and-above level courses towards both programs.

**Entry Requirements**

- Undergraduate math majors can apply for provisional admission for this program if:
  1. They have completed at least 60 credit hours of coursework and
  2. Their GPA is 3.0 or higher.

Students submit their applications to the department. Once a student is admitted in this provisional status, the student continues to work toward his/her undergraduate degree until the student completes 90-102 undergraduate credit hours. Meanwhile the student will be advised to complete the required courses for graduate admission.

- A provisionally admitted student is reviewed for formal admission after completing 90 undergraduate credit hours. Minimal requirements for admission include:
  1. GPA of 3.0 or higher at the time of the review
  2. MATH 1320, MATH 2020, MATH 2450, MATH 3250 - all completed with a grade of B- or higher.

A student’s application meeting the minimal requirements does not mean the student is automatically admitted in this program. The math graduate committee will review the application and make a decision. In case the application is approved, the student needs to complete a formal application for admission into the graduate program and is recommended for admission by the graduate committee.

**Degree Program**

1. The current separate requirements for BA/BS and MA in math remain unchanged.
2. Once the student is admitted in this program, the student is allowed to take graduate courses (paid with graduate fees).
3. The student in this program can apply up to 12 credit hours of 4000-and-above level courses towards both the bachelor and master’s degrees. The student may get the BA/BS and MA degrees at the same time.
4. In case a student cannot complete the master’s degree for some reason, up to 12 credit hours of graduate level courses can be applied towards the BA/BS degree.

5. Students will pay graduate fees for all courses after being admitted and starting the program.

Mathematics BS

General Education Requirements

All department majors must satisfy the university and appropriate school or college general education requirements (p. 51). All mathematics courses may be used to meet the university’s general education breadth of study requirement in natural sciences and mathematics.

Satisfactory/Unsatisfactory Restrictions

All department majors may not take mathematical sciences or related area courses on a satisfactory/unsatisfactory basis. Students considering graduate study should consult with their advisers about taking work on a satisfactory/unsatisfactory basis.

Degree Requirements

All courses of the department presented to meet the degree requirements must be completed with a grade of C- or better. At least four courses numbered 3000 or above must be taken in residence. Students must have a 2.0 grade point average in the mathematical sciences courses completed.

Students enrolling in introductory mathematics courses should check the prerequisites to determine if a satisfactory score on the Mathematics Placement Test is necessary. Placement into introductory courses assumes a mastery of two years of high school algebra.

A minimum grade of C- is required to meet the prerequisite requirement for any course except with permission of the department.

Note: Courses that are prerequisites for higher-level courses may not be taken for credit or quality points if the higher-level course has been satisfactorily completed.

Many students are qualified, as a result of having studied calculus in high school, to begin their major with MATH 1900, Analytic Geometry and Calculus II, or MATH 2000, Analytic Geometry and Calculus III. These students are urged to consult with the department before planning their programs. Credit for MATH 1800, Analytic Geometry and Calculus I, will be granted to those students who complete MATH 1900 with a grade of C- or better.

Similarly, students who are ready to begin their computer science studies with CMP SCI 2250, Programming and Data Structures, will be granted credit for CMP SCI 1250, Introduction to Computing, once they complete CMP SCI 2250 with a grade of C- or better.

Declaring the Mathematics Major

Students seeking to major in mathematics are first designated as “pre-mathematics majors” until they have completed both MATH 1900 and MATH 2000 or equivalent courses. Upon successful completion of these two courses with grades of C or better, students will be allowed to declare mathematics as their major. Each of these courses must be completed successfully within two attempts.

Degree Requirements in Mathematics

All mathematics majors in all undergraduate programs must complete the mathematics core requirements.

Core Requirements

1. The following courses are required:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 1320</td>
<td>Introduction to Probability and Statistics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1800</td>
<td>Analytic Geometry and Calculus I</td>
<td>5</td>
</tr>
<tr>
<td>MATH 1900</td>
<td>Analytic Geometry and Calculus II</td>
<td>5</td>
</tr>
<tr>
<td>MATH 2000</td>
<td>Analytic Geometry and Calculus III</td>
<td>5</td>
</tr>
<tr>
<td>MATH 2020</td>
<td>Introduction to Differential Equations</td>
<td>3</td>
</tr>
<tr>
<td>MATH 2450</td>
<td>Elementary Linear Algebra</td>
<td>3</td>
</tr>
<tr>
<td>MATH 3250</td>
<td>Foundations of Mathematics</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 3130</td>

<td></td>
</tr>
<tr>
<td>MATH 4100</td>
<td>Real Analysis I</td>
<td>3</td>
</tr>
<tr>
<td>Total Hours</td>
<td></td>
<td>33</td>
</tr>
</tbody>
</table>

2. The related area requirements as described below must be satisfied. Students seeking a double degree, either within this department or with another department, do not have to fulfill the related area requirements.

Related Area Requirements for majors in Mathematics

Candidates for the B.A. in Mathematics must satisfy the requirements in one of the groups below with a grade of C-or better. Candidates for the B.S.Ed. in Mathematics and B.S. in Mathematics must satisfy the requirements in two of the groups below with a grade of C-or better.

If candidates choose group 2, then they cannot apply either of the two courses listed in that group towards the additional 4000 level mathematics courses (beyond the core requirements) that must be completed for each of these degrees.

Students seeking a double degree, either within this department or with another department do not have to fulfill the related area requirements.

Related Area Courses

1) Computer Science

Select two of the following: 6

In addition to the B.S. Ed., students may opt to complete a B.A. or B.S. degree in their discipline as an undergraduate, followed by admission to the Graduate School for Master's level teaching certification. The College of Education has a one-year accelerated program for post-graduate certification called Teach in 12, or students can choose a traditional path to certification. Graduate coursework for certification can apply towards a Master's Degree in Secondary Education, with additional coursework. Students interested in Master's Level teacher certification should contact the advising office (OASIS) 314-516-5937 in the College of Education for certification. Graduate coursework for certification can apply towards a Master's Degree in Secondary Education, with additional coursework. Students interested in Master’s Level teacher certification should contact the advising office (OASIS) 314-516-5937 in the College of Education for certification. Therefore, students interested in the B.S. Ed. should contact the advising office (OASIS) 314-516-5937 in the College of Education for discipline-specific requirements. Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

B.A. or B.S. in Mathematics with Master’s Level Coursework for Secondary Teacher Certification

In addition to the B.S. Ed., students may opt to complete a B.A. or B.S. degree in their discipline as an undergraduate, followed by admission to the Graduate School for Master’s level teaching certification. The College of Education has a one-year accelerated program for post-graduate certification called Teach in 12, or students can choose a traditional path to certification. Graduate coursework for certification can apply towards a Master’s Degree in Secondary Education, with additional coursework. Students interested in Master’s Level teacher certification should contact the advising office (OASIS) 314-516-5937 in the College of Education. Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

Learning Outcomes

A successful undergraduate should, upon completion, be able to:

- Write clear, logically consistent proofs.
- Read, understand and assess the veracity of logical arguments or mathematical proofs.
- Reformulate problems or questions in relevant mathematical terms.
- Solve problems which involve analysis, algebra or linear algebra, elementary number theory.
- Interpret, formulate and solve applied problems in probability and statistics.
- Interpret, formulate and solve applied problems in mathematics relating to annuities, bonds and derivative investments.

Elective Requirements 12

Choose two courses from the following list and two additional courses in mathematics, statistics or computer science numbered above 4000:

- MATH 3320: Applied Statistics
- MATH 4080: Introduction to Scientific Computation
- MATH 4090: Introduction to High-dimensional Data Analysis
- MATH 4220: Bayesian Statistical Methods
- MATH 4225: Introduction to Statistical Computing
- MATH 4260: Introduction to Stochastic Processes
- MATH 4450: Linear Algebra

There are no related area requirements.

Computer Science majors who would like to pursue the B.S. in Mathematics (Emphasis in Data Science) are not required to take MATH 2020 and must:

a) complete all courses in the core requirements, except for MATH 4100 and may substitute MATH 3000 for MATH 3250

b) complete all courses in the specialized requirements and one from elective requirements.

B.S. Ed. in Secondary Education with Emphasis in Mathematics

The B.S. Ed. is a professional education degree designed for students who wish to pursue a teaching career in secondary schools. Much of the discipline-specific coursework parallels the B.A. or B.S. degree in the discipline; however, the Missouri Department of Elementary and Secondary Education (DESE) requires specific coursework for teacher certification. Therefore, students interested in the B.S. Ed. should contact the advising office (OASIS) 314-516-5937 in the College of Education for discipline-specific requirements. Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

B.A. or B.S. in Mathematics with Master’s Level Coursework for Secondary Teacher Certification

In addition to the B.S. Ed., students may opt to complete a B.A. or B.S. degree in their discipline as an undergraduate, followed by admission to the Graduate School for Master’s level teaching certification. The College of Education has a one-year accelerated program for postgraduate certification called Teach in 12, or students can choose a traditional path to certification. Graduate coursework for certification can apply towards a Master’s Degree in Secondary Education, with additional coursework. Students interested in Master’s Level teacher certification should contact the advising office (OASIS) 314-516-5937 in the College of Education.

Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

Learning Outcomes

A successful undergraduate should, upon completion, be able to:

- Write clear, logically consistent proofs.
- Read, understand and assess the veracity of logical arguments or mathematical proofs.
- Reformulate problems or questions in relevant mathematical terms.
- Solve problems which involve analysis, algebra or linear algebra, elementary number theory.
- Interpret, formulate and solve problems and assess data related questions from an advanced probabilistic and statistical viewpoint.

Total Hours 60
Similarly, students who are ready to begin their computer science studies with CMP SCI 2250, Programming and Data Structures, will be granted credit for CMP SCI 1250, Introduction to Computing, once they complete CMP SCI 2250 with a grade of C- or better.

 Declaring the Mathematics Major

Students seeking to major in mathematics are first designated as "pre-mathematics majors" until they have completed both MATH 1900 and MATH 2000 or equivalent courses. Upon successful completion of these two courses with grades of C or better, students will be allowed to declare mathematics as their major. Each of these courses must be completed successfully within two attempts.

 Degree Requirements in Mathematics

All mathematics majors in all undergraduate programs must complete the mathematics core requirements.

 Core Requirements

1. The following courses are required:

<table>
<thead>
<tr>
<th>Course</th>
<th>Hours</th>
<th>Description</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CMP SCI 1250</td>
<td>3</td>
<td>Introduction to Computing</td>

</tr>
</tbody>
</table>

Total Hours: 33

2. The related area requirements as described below must be satisfied. Students seeking a double degree, either within this department or with another department, do not have to fulfill the related area requirements.

 Related Area Requirements for majors in Mathematics

Candidates for the B.A. in Mathematics must satisfy the requirements in one of the groups below with a grade of C or better. Candidates for the B.S.Ed. in Mathematics and B.S. in Mathematics must satisfy the requirements in two of the groups below with a grade of C or better.

If candidates choose group 2, then they cannot apply either of the two courses listed in that group towards the additional 4000 level mathematics courses (beyond the core requirements) that must be completed for each of these degrees.

Students seeking a double degree, either within this department or with another department do not have to fulfill the related area requirements.

 Related Area Courses

1) Computer Science
Select two of the following:

2) Statistics
MATH 4200  Mathematical Statistics I  3
MATH 4210  Mathematical Statistics II  3

3) Biology
BIOL 2102  General Ecology  3
BIOL 2103  General Ecology Laboratory  2

4) Biology
BIOL 2012  Genetics  3
BIOL 4182  Population Biology  3

5) Chemistry
CHEM 1111  Introductory Chemistry I (MOTR CHEM 150L)  5
CHEM 1121  Introductory Chemistry II  5

6) Chemistry
CHEM 3312  Physical Chemistry I  3
And another 3000-level, or above, chemistry course.  3

7) Economics
ECON 1001  Principles of Microeconomics (MOTR ECON 102)  3
ECON 1002  Principles of Macroeconomics (MOTR ECON 101)  3
ECON 4100  Introduction to Econometrics  4

8) Philosophy
PHIL 3360  Formal Logic  3
PHIL 3380  Philosophy of Science  3

9) Physics
PHYSICS 2111  Physics: Mechanics and Heat (MOTR PHYS 200L)  5
PHYSICS 2112  Physics: Electricity, Magnetism, and Optics  5

10) Physics
PHYSICS 3221  Mechanics  3
And another 3000 level, or above, physics course.  3

11) Business Administration
SCMA 3320  Advanced Supply Chain and Operations Management  3
SCMA 4350  Prescriptive Analytics and Optimization  3

12) Engineering
ENGR 2310  Statics  3
ENGR 2320  Dynamics  3

Emphasis Area Requirements
MATH 1320  Introduction to Probability and Statistics  3
MATH 1800  Analytic Geometry and Calculus I  5
MATH 1900  Analytic Geometry and Calculus II  5
MATH 2000  Analytic Geometry and Calculus III  5
MATH 2020  Introduction to Differential Equations  3
MATH 2450  Elementary Linear Algebra  3
MATH 3250  Foundations of Mathematics  3
MATH 4200  Mathematical Statistics I  3
MATH 4210  Mathematical Statistics II  3

Specialized Requirements
MATH 4010  Financial Mathematics I  3
MATH 4020  Financial Mathematics II  3
FINANCE 3500  Financial Management  3
MATH 4005  Exploratory Data Analysis with R  3

In addition, two further courses in mathematics, statistics or computer science numbered above 4000.

Related Requirements
ECON 4100  Introduction to Econometrics  4
ECON 4110  Applied Econometrics  4
or ECON 4130  Business and Economic Forecasting  4
Complete two of the following courses:  6
FINANCE 3503  Computer Applications in Finance  3
FINANCE 3520  Investments  3
FINANCE 3521  Financial Engineering: Applying Derivatives  3
FINANCE 3523  Fixed Income Analysis  3
FINANCE 3540  Introduction to Financial Institutions and Financial Markets  3

Total Hours 65

B.S. Ed. in Secondary Education with Emphasis in Mathematics

The B.S. Ed. is a professional education degree designed for students who wish to pursue a teaching career in secondary schools. Much of the discipline-specific coursework parallels the B.A. or B.S. degree in the discipline; however, the Missouri Department of Elementary and Secondary Education (DESE) requires specific coursework for teacher certification. Therefore, students interested in the B.S. Ed. should contact the advising office (OASIS) 314-516-5937 in the College of Education for discipline-specific requirements.

Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

B.A. or B.S. in Mathematics with Master’s Level Coursework for Secondary Teacher Certification

In addition to the B.S. Ed., students may opt to complete a B.A. or B.S. degree in their discipline as an undergraduate, followed by admission to the Graduate School for Master’s level teaching certification. The College of Education has a one-year accelerated program for post-graduate certification called Teach in 12, or students can choose a traditional path to certification. Graduate coursework for certification can apply towards a Master’s Degree in Secondary Education, with additional coursework. Students interested in Master’s Level teacher certification should contact the advising office (OASIS) 314-516-5937 in the College of Education.

Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.
Learning Outcomes
A successful undergraduate should, upon completion, be able to:

- Write clear, logically consistent proofs.
- Read, understand and assess the veracity of logical arguments or mathematical proofs.
- Reformulate problems or questions in relevant mathematical terms.
- Solve problems which involve analysis, algebra or linear algebra, elementary number theory.
- Interpret, formulate and solve applied problems in probability and statistics.
- Interpret, formulate and solve applied problems in mathematics relating to annuities, bonds and derivative investments.

Total Hours: 120

\(^1\) INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

Please Note: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Mathematics MA

Admission Requirements
Applicants must have at least a bachelor’s degree in mathematics or in a field with significant mathematical content. Examples of such fields include computer science, data science, economics, engineering and physics. An applicant’s record should demonstrate superior achievement in undergraduate mathematics.

Individuals may apply for direct admission to either the M.A. or Ph.D. program. Candidates for the M.A. degree may choose an emphasis in mathematics or data science. Students in the M.A. program who want to transfer to the Ph.D. program upon successful completion of 15 credit hours must fill out a new application through Graduate Admissions.

Students intending to enter the Ph.D. program must have a working ability in modern programming technologies. A student with a deficiency in this area may be required to take courses at the undergraduate level in computer science.

Applicants for the Ph.D. program must, in addition, submit three letters of recommendation and scores from the Graduate Record Examination (GRE) general aptitude test.

Preliminary Advisement
Incoming students are assigned advisers with whom they should consult before each registration period to determine an appropriate course of study. If necessary, students may be required to complete undergraduate course work without receiving graduate credit.

Students interested in the Ph.D. program in mathematical and computational sciences with the computer science option must follow the requirements for that program and that option.

Degree Requirements
Candidates for the M.A. degree must complete 30 hours of course work with at least 15 hours of courses numbered 5000 or above. All courses numbered below 5000 must be completed with grades of at least B. The selections of the courses numbered 5000 or above need the prior approval of the graduate advisor. The courses taken must include those listed below in the mathematics core and other seven mathematics courses numbered 4000 or higher with at least five courses numbered 5000 or above.

Students who have already completed courses equivalent to those in the core may substitute other courses numbered above 4000. All substitutions of courses for those listed in the core require the prior approval of the graduate director.

Thesis Option
Either for the mathematics option or for the data science option, the non-core course work may consist of an M.A. thesis written under the direction of a faculty member in the Department of Mathematics and Computer Science. A thesis is not, however, required for this degree. A student who wishes to write a thesis should enroll in 6 hours of MATH 6900, M.A. Thesis. Students writing an M.A. thesis must defend their thesis in an oral exam administered by a committee of three department members which includes the thesis director.

Core Courses

| MATH 4100 | Real Analysis I | 3 |
Selections of the courses numbered 5000 or above need the prior approval of the graduate advisor. The courses taken must include those listed below in the mathematics core and other seven mathematics courses numbered 4000 or higher with at least five courses numbered 5000 or above. For the data science option, the courses taken must include the data-science core courses listed below and five elective courses chosen from the listed below in the data-science electives. Up to 2 courses in the data-science electives can be substituted with other courses upon student’s request and graduate program director’s approval.

Financial Assistance

Any student who intends to apply for financial assistance, in the form of a teaching assistantship or a research assistantship, is required to have three letters of recommendation submitted with the application to the graduate program in Mathematics or Computer Science. The application must include scores on the GRE general aptitude test. Applicants are also encouraged to submit scores in the GRE subject area test in Mathematics or Computer Science. Applications for financial assistance should be submitted before February 15 prior to the academic year in which the student expects to begin graduate study. Notifications of awards are generally made March 15, and students awarded financial assistance are expected to return letters of acceptance by April 15.

Mathematics MA, Data Science Emphasis

Admission Requirements

Applicants must have at least a bachelor’s degree in mathematics or in a field with significant mathematical content. Examples of such fields include computer science, data science, economics, engineering and physics. An applicant’s record should demonstrate superior achievement in undergraduate mathematics.

Individuals may apply for direct admission to either the M.A. or Ph.D. program. Candidates for the M.A. degree may choose an emphasis in mathematics or data science. Students in the M.A. program who want to transfer to the Ph.D. program upon successful completion of 15 credit hours must fill out a new application through Graduate Admissions.

Students intending to enter the Ph.D. program must have a working ability in modern programming technologies. A student with a deficiency in this area may be required to take courses at the undergraduate level in computer science.

Applicants for the Ph.D. program must, in addition, submit three letters of recommendation and scores from the Graduate Record Examination (GRE) general aptitude test.

Preliminary Advisement

Incoming students are assigned advisers with whom they should consult before each registration period to determine an appropriate course of study. If necessary, students may be required to complete undergraduate course work without receiving graduate credit.

Students interested in the Ph.D. program in mathematical and computational sciences with the computer science option must follow the requirements for that program and that option.

Candidates for the M.A. degree must complete 30 hours of course work with at least 15 hours of courses numbered 5000 or above. All courses numbered below 5000 must be completed with grades of at least B. The selections of the courses numbered 5000 or above need the prior approval of the graduate advisor. The courses taken must include those listed below in the mathematics core and other seven mathematics courses numbered 4000 or higher with at least five courses numbered 5000 or above. For the data science option, the courses taken must include the data-science core courses listed below and five elective courses chosen from the listed below in the data-science electives. Up to 2 courses in the data-science electives can be substituted with other courses upon student’s request and graduate program director’s approval.

Students who have already completed courses equivalent to those in the core may substitute other courses numbered above 4000. All substitutions of courses for those listed in the core require the prior approval of the graduate director.

generally made March 15, and students awarded financial assistance are expected to return letters of acceptance by April 15.

Mathematics Minor

Minor Requirements

The department offers minors in computer science, mathematics, and statistics. All courses presented for any of these minors must be completed with a grade of C- or better.

Minor in Mathematics

The requirements for the minor are:

MATH 1800 Analytic Geometry and Calculus I  5
MATH 1900 Analytic Geometry and Calculus II  5
MATH 2000 Analytic Geometry and Calculus III  5
Select two additional three-hour mathematics courses numbered above 2400  6

1 excluding MATH 2510

A minimum of two mathematics courses numbered 2000 or above must be taken in residence in the Department of Mathematics and Computer Science at UMSL.

Learning Outcomes

A successful undergraduate should, upon completion, be able to:

• Reformulate problems or questions in relevant mathematical terms.
• Solve problems which involve algebra or calculus (of one or several variables).

Mechanical Engineering BSME

Admission

Students are admitted to the upper-division program after they have completed an acceptable pre-engineering program. The pre-engineering program can be taken at University of Missouri-St. Louis or at community colleges in the area. Normally, admission is granted to persons who have completed the pre-engineering program with a minimum grade point average of 2.75 over all their mathematics, chemistry, physics, and introductory (statics and dynamics) engineering courses. Students with less than a 2.75 grade point average, but at least a C, in all their science, engineering and mathematics courses may be admitted on a conditional basis.

For more information, please contact the program advisor at (314) 516-7018.

Degree Requirements

A program of 132 semester hours is required for the Bachelor of Science in Mechanical Engineering.

• Majors must complete the University General Education (p. 51) and Graduation (p. 19) requirements, the Pre-Engineering Requirements, the Core Engineering Requirements, and Major Requirements.

• Majors must first complete J E MATH 3170, Engineering Mathematics, with a minimum grade of C-.

• Majors must also complete J E ENGR 2300, Introduction to Electrical Networks, with a minimum grade of C-.

• A minimum grade of C- is necessary to meet the prerequisite requirement for any course.

General Education and Graduation Requirements

The following courses fulfill general education and graduation requirements and are required of Mechanical Engineering majors:

PHIL 2259 Engineering Ethics  3
PHIL 3380 Philosophy of Science  3
HIST 1001 American Civilization to 1865 (MOTR HIST 101)  3
or HIST 1002 American Civilization 1865 to Present (MOTR HIST 102)  3

Three additional Social Science courses  9

Total Hours  18

1 One course must meet the Cultural Diversity requirement, and one course must meet the engineering Valuing Skill requirement. Humanities and social sciences electives must meet both the University of Missouri-St. Louis General Education Requirements and the Humanities and Social Sciences Requirements of the Joint Undergraduate Engineering Program. Check with your advisor for details.

Pre-Engineering Requirements

Students seeking to major in engineering are first designated as ‘Undeclared with an interest in Engineering majors’ until they have completed Math 1800 Analytical Geometry & Calculus I. Upon successful completion of Math 1800 with a grade of C or better, students will be allowed to declare pre-engineering as their major. Math 1800 must be completed successfully within two attempts.

MATH 1800 Analytic Geometry and Calculus I  5
MATH 1900 Analytic Geometry and Calculus II  5
MATH 2000 Analytic Geometry and Calculus III  5
MATH 2020 Introduction to Differential Equations  3
CHEM 1111 Introductory Chemistry I (MOTR CHEM 150L)  5
PHYSICS 2111 Physics: Mechanics and Heat  4
PHYSICS 2111L Mechanics and Heat Laboratory  1
PHYSICS 2112 Physics: Electricity, Magnetism, and Optics  4
PHYSICS 2112L Electricity, Magnetism, and Optics Laboratory  1
ENGR 2310 Statics  3
ENGR 2320 Dynamics  3
ENGL 1100 First-Year Writing (MOTR ENGL 200)  3

Total Hours  42

Engineering Core Requirements

CMP SCI 1250 Introduction to Computing  3
J E COMM 2000 Engineering Studio I  1

Total Hours: 133

1. Course does not count toward 132 credit hours for the degree.
2. Course should also satisfy the Cultural Diversity Requirement.
3. Course is an example J M ENGR elective. Four are required for a total of 12 hours.

PLEASE NOTE: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Mechanical Engineering Minor

Admission to the Joint Engineering program is required. A minimum of 19 credit hours in Joint Mechanical Engineering and Engineering courses are required.

Required Courses

ENGR 2310  Statics  3
ENGR 2320  Dynamics  3
J M ENGR 2410  Mechanics of Deformable Bodies  3

Choose at least one of the following four options for an additional 10 credit hours:

- J M ENGR 4170 Dynamic Response of Physical Systems
- J M ENGR 4180 Dynamic Response Laboratory
  or any other J M ENGR course for 7 credit hours

Total Hours 19

Media Production Undergraduate Certificate

The Certificate in Media Production provides a sequence of courses designed to develop multi-channel and multi-media skill sets that can be used by students to record, edit, and produce media for artistic, personal, or commercial applications. Students will develop a portfolio of work that will reflect both independent and client-centered content. Students who complete the Certificate in Media Production will develop the knowledge and skills needed in a rapidly changing media environment.

The Certificate in Media Production is composed of 18 hours of coursework. Students must complete at least 12 hours at UMSL and earn at least a B in any course applied to the certificate.

Required Coursework

Total Hours 18

Learning Outcomes

Upon completion of the program, certificate earners will be able to:

- Demonstrate an understanding of available media technology and its applications.
- Develop a substantial foundation in all aspects of media production.
- Establish and nurture a working application in evolving production techniques.
- Learn to utilize external information design in order to extend experiences in production techniques and standards.
- Become prepared to perform as a production specialist in all areas of media.
- Develop a skill set in Media Production that will certify competence in all levels of pre-production, production, and post-production.

Media Studies BS

Effective Fall 2019, the Bachelor of Science in Media Studies will no longer be accepting applications.

Bachelor of Science in Media Studies

General Education Requirements

All Media Studies majors must satisfy the University and the College of Arts and Sciences’ 42-hour General Education core requirements, which include ENGL 1100 and the Math proficiency requirement.

A Junior-level writing class is required.

The Cultural Diversity requirements may be satisfied by General Education courses or other lower- or-upper level courses in various departments.

State Government/History graduation requirements may be satisfied by General Education courses or by other lower-or-upper level courses in various departments.

There is no foreign language requirement, but foreign language proficiency is recommended.

Degree Requirements

Media Studies majors must complete 36 hours as part of the degree. At least 24 hours must be taken at UMSL. A core of 21 hours is required.

Required Core Courses for all media studies majors:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

<tr>
<td>Internship in Media Studies</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Students must also complete 15 credit hours of electives. Of these, at least six credit hours must be 2000 or higher and another six must be 3000 and higher. Practicum and Internship courses may be repeated for credit and a combined total of six credit hours in Practicum/Internship can be applied to the major. A limit of 20 hours of Practicum/Internship courses will be accepted towards the 120 hour degree. Students may apply up to three of the approved communication courses listed below toward the major as media studies electives.

</tr>
</tbody>
</table>

The elective courses may consist of any media studies course or any communication course that counts towards the media studies major as either an elective or a requirement. At least 3 credit hours must be at the 3000 level or above. At least 9 of the 18 hours required for the minor must be taken at UMSL.

Students must earn at least a C for all media studies courses applied to the minor. A minimum GPA of 2.5 is required in the minor.

**Mobil Apps and Computing Graduate Certificate**

The graduate certificate in Mobile Apps and Computing is a five-course (15 credit hour) program. It is designed to provide training in technologies and frameworks for mobile apps and computing. A minimum of four courses must be taken in residence in the Department of Mathematics and Computer Science at UMSL. A minimum of three courses must be at the 5000-level or higher. Courses may be substituted with the permission of the program director.

**Core**

<td></td>
<td>15</td>
</tr>
</tbody>
</table>

A minimum of three courses must be taken from UMSL. Courses may be substituted with the permission of the certificate coordinator. For more information, students can contact the department chair or email info@arch.umsl.edu.

**Learning Outcomes**

Upon completion of the program, certificate earners will be able to:

- Identify and implement techniques for communicating complex information in the Internet, particularly for mobile and wireless platforms
- Use appropriate programming languages and tools to integrate media and user interaction
• Design and develop applications in mobile and wireless computing, using representative mobile devices and platforms
• Assess and implement security principles in mobile applications
• Evaluate the quality and performance of mobile applications

# Modern European Studies Undergraduate Certificate

Four semesters of college work or the equivalent in a modern European foreign language.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIST 1032</td>
<td>Topics in European Civilization: 1715 to the Present (MOTR WCIV 102)</td>
<td>3</td>
</tr>
</tbody>
</table>

Select one course each from at least four of the following areas:

### Anthropology
- ANTHRO 2192 Anthropological Perspectives on Western Culture

### Art and Art History
- ART HS 2250 Rococo to Realism
- ART HS 2280 Modern to Contemporary Art
- ART HS 4455 Topics in Modern Art

### English
- ENGL 3530 Contemporary World Literature
- ENGL 4450 The Eighteenth-Century English Novel
- ENGL 4540 The Nineteenth-Century English Novel
- ENGL 4580 Literature of the Late Nineteenth and Early Twentieth Centuries
- ENGL 4750 Modern British Fiction
- ENGL 4920 Major Works Of European Fiction

### History
- HIST 3092 War and Upheaval in Europe, 1900-1950
- HIST 3093 Europe in Peace and Prosperity, 1950-Present

### Languages and Cultural Studies

#### French
- FRENCH 3211 Contemporary French Culture
- FRENCH 4360 Studies in Nineteenth-Century French Literature and Culture

#### German
- GERMAN 2180 Intermediate Readings in German
- GERMAN 3210 German Culture and Civilization
- GERMAN 4311 Special Topics in German Culture

#### Spanish
- SPANISH 4311 Special Topics in Hispanic Culture
- SPANISH 4325 Poetry And Drama Of The Golden Age

#### Music
- M H L T 4240 Music of the Classic Period
- M H L T 4250 Music of the Romantic Period

#### Philosophy
- PHIL 1111 Western Philosophy II: Descartes to the Present
- PHIL 3303 Early Modern Philosophy
- PHIL 3304 19th and 20th Century Philosophy

### Political Science
- POL SCI 2510 The Politics of European Union
- POL SCI 3595 Studies in Comparative Politics
- POL SCI 3890 Workers and Globalization

### Independent Study Course

Students seeking the certificate must complete an independent study course in which a research paper will be written focusing upon aspect of Modern European Studies. The topics should be approved in advance by International Studies and Programs.

### Total Hours

| Total Hours | 38 |

Note: Students should consult International Studies and Programs advisers to determine how these courses can best be arranged to meet their interests.

# Modern Language BA, Dual Language Emphasis Professional

To meet the increasing demand for multilingual professionals, the Department offers students the option of the Dual Language Professional Track as part of the B.A. in Modern Languages. Students interested in pursuing intermediate studies in more than one language may combine the study of any two of the following languages: French, Japanese, or Spanish. Coursework focuses on developing language proficiency, intercultural competency, and professional skills. Students in the dual-language concentration also benefit from numerous study abroad opportunities to further refine their linguistic and cultural competencies.

### General Education Requirements

Each language major must satisfy the general education requirements (p. 51) of the university and the general education requirements of the College of Arts and Sciences.

### Specific Requirements or Restrictions

Students entering with no high school language units must enroll in Language 1001 or may enroll in Language 2115. Language 2115 (a, b, and c) is the intensive study of a language and will satisfy the foreign language requirement. 2115a, 2115b, and 2115c are co-requisites and must be taken concurrently. To satisfy the foreign language requirement all three sections must be completed with a grade of C- or better.

A grade of D in a Language 1001 course is a passing grade but not an entrance grade for a Language 1002 course. A grade of D in a Language 1002 course is a passing grade but not an entrance grade for a Language 2101 course or its equivalent. A grade of D in a Language 2101 course fulfills the language requirement, but is not an entrance grade for a higher-level course.

Demonstration of a high level of proficiency may affect the number of hours required for the major. Native or heritage speakers of a language should consult with the department concerning appropriate placement and advising. Students with previous language coursework should contact the department for language placement testing and advising. Students may not take for credit an elementary course if they have already completed a
higher-level course for which the elementary course, or its equivalent, is a prerequisite.

**Degree Requirements**

All courses for the major must be passed with a grade of C- or better. No course required for the major may be taken on a satisfactory/unsatisfactory (s/u) basis with the exception of those taken abroad as part of a university program that has received departmental approval.

**Bachelor of Arts**

All students seeking a B.A. in a Modern Language must successfully complete FL 2100 Languages and World View, and must meet the departmental requirement of a minimum of 33 hours in French or 33 hours in German or 37 hours in Japanese or 35 hours in Spanish (excluding Language 1001 and 1002). The maximum number of hours that may be taken in the major is 45 (including Language 1001 and 1002). In addition, students seeking the B.A. in a Modern Language who desire a teaching certificate must also take FGN LANG 4589 (same as SEC ED 4589), Curriculum and Methods of Teaching Foreign Languages, FGN LANG 4590 (same as SEC ED 4590), and fulfill the professional secondary education requirements of the College of Education.

**Transfer Students**

Transfer students majoring in one of the modern languages must complete at UMSL a minimum of 12 graded hours in language courses at the 3000 level or above with a grade point average of 2.0 or better in those courses.

**Native Speakers**

Native speakers must complete at least two courses at the 3000 level and four courses at the 4000 level to obtain a major in their native language.

**Emphasis Area Requirements**

<table>
<thead>
<tr>
<th>Course</th>

**French**

- FRENCH 2170: Intermediate French Language and Culture
- FRENCH 2180: Readings in French
  - Three courses at the 3000-level or higher, at least one of which must be business/professions-focused

**German**

- GERMAN 2170: Intermediate Practice in Speaking and Writing German
- GERMAN 2180: Intermediate Readings In German
  - Three courses at the 3000-level or higher

**Japanese**

- JAPAN 2102: Intermediate Japanese II
  - Choose two of the following courses:
    - JAPAN 2170: Kanji: A Radical Approach
    - JAPAN 3202: Intermediate Japanese IV
    - JAPAN 3210: Japanese Culture and Society
    - JAPAN 3211: Topics in Japanese Culture
    - JAPAN 3280: Readings in Japanese
    - JAPAN 3201: Intermediate Japanese III

**B.S. Ed. in Secondary Education with Emphasis in a Foreign Language**

The B.S. Ed. is a professional education degree designed for students who wish to pursue a teaching career in secondary schools. Much of the discipline-specific coursework parallels the B.A. degree in the language; however, the Missouri Department of Elementary and Secondary Education (DESE) requires specific coursework for teacher certification. Therefore, students interested in the B.S. Ed. should contact the advising office (OASIS) 314-516-5937 in the College of Education for discipline-specific requirements. Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

**B.A. in a Foreign Language with Master’s Level Coursework for Secondary Teacher Certification**

In addition to the B.S. Ed., students may opt to complete a B.A. or B.S. degree in their discipline as an undergraduate, followed by admission to the Graduate School for Master’s level teaching certification. The College of Education has a one-year accelerated program for post-graduate certification called Teach in 12, or students can choose a traditional path to certification. Graduate coursework for certification can apply towards a Master’s Degree in Secondary Education, with additional coursework. Students interested in Master’s Level teacher certification should contact the advising office (OASIS) 314-516-5937 in the College of Education for discipline-specific requirements. Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

Transfer students majoring in one of the modern languages must complete at UMSL a minimum of 12 graded hours in language courses at the 3000 level or above with a grade point average of 2.0 or better in those courses.

Native Speakers

Native speakers must complete at least two courses at the 3000 level and four courses at the 4000 level to obtain a major in their native language.

Specific Requirements for Concentration in French

Each major with a French concentration must complete the following courses:

<table>
<thead>
<tr>
<th>Course</th>

</table>

Select four additional courses at the 3000-level 12
Select three courses at the 4000-level 9

Total Hours 33

Career Outlook

Career options for graduates with a major or minor in modern languages include the following fields: teaching, social work, nursing, engineering, business, communications, government, journalism, travel industry, translation, and research. Our graduates have been especially successful when they combine advanced study in a modern language with another major. They are then able to add proficiency in a foreign language and culture to their knowledge and skills in another specialty. Experience with

Total Hours: 120

1 INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

PLEASE NOTE: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.
world cultures makes our graduates more adaptable and better prepared to meet the challenges of a global and increasingly diverse job market.

B.S. Ed. in Secondary Education with Emphasis in a Foreign Language

The B.S. Ed. is a professional education degree designed for students who wish to pursue a teaching career in secondary schools. Much of the discipline-specific coursework parallels the B.A. degree in the language; however, the Missouri Department of Elementary and Secondary Education (DESE) requires specific coursework for teacher certification. Therefore, students interested in the B.S. Ed. should contact the advising office (OASIS) 314-516-5937 in the College of Education for discipline-specific requirements. Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

B.A. in a Foreign Language with Master’s Level Coursework for Secondary Teacher Certification

In addition to the B.S. Ed., students may opt to complete a B.A. or B.S. degree in their discipline as an undergraduate, followed by admission to the Graduate School for Master’s level teaching certification. The College of Education has a one-year accelerated program for post-graduate certification called Teach in 12, or students can choose a traditional path to certification. Graduate coursework for certification can apply towards a Master’s Degree in Secondary Education, with additional coursework. Students interested in Master’s Level teacher certification should contact the advising office (OASIS) 314-516-5937 in the College of Education. Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

Learning Outcomes

Graduates of the BA in Modern Languages from the University of Missouri-St. Louis possess the necessary linguistic and cultural competencies to interact with native speakers in culturally appropriate ways. They are able to use the target language in a variety of academic, social, and professional situations and have a rich understanding of the target culture(s) fostered through engaging topic-based courses and opportunities such as study abroad, service learning, and internships. Recognizing the interconnection between languages and world views, they can critically explore their own assumptions, value alternative perspectives, and act with cultural sensitivity. They are empowered with the tools to meet the challenges of a globalized world and continue developing their skills as lifelong learners.

Skills and Knowledge Areas

Upon completion of the major, students should be able to:

Linguistic and Critical Thinking Goals:

• In listening and speaking,
  • demonstrate comprehension of the main ideas and supporting details of narrative and descriptive texts on familiar and concrete topics, such as those on radio, television, and podcasts;
  • discuss topics related to work, school, home, leisure activities, culture, and a variety of media;
  • use the target language in real-world situations in culturally-appropriate ways;

• produce narrations and descriptions on familiar topics in present, past, and future time frames and;
• summarize research in oral presentations.

• In reading and writing,
  • demonstrate comprehension of the main idea, supporting details, argumentative structure, and perspective in authentic texts of various genres;
  • produce narrations and descriptions in present, past, and future time frames employing connected discourse;
  • summarize, analyze, and synthesize content, and begin to express supported opinions;
  • assess language reference resources and use them effectively and;
  • conduct independent research and present findings.

Cultural and Global Awareness Goals:

• demonstrate an awareness of the linguistic, ethnic, racial, religious, cultural, and social diversity of the target cultures;
• recognize and describe some of the key historical, social, economic, and political forces in the target cultures;
• analyze and critique film, media, literature, art, etc. in their socio-historical contexts;
• compare and contrast their own cultural beliefs, behaviors, and norms with those of other cultures;
• describe how language and culture impact one’s world view;
• explain the skills acquired through language study and their benefits to a potential employer.

The linguistic goals are based on the National Standards For Foreign Language Learning and the American Council on the Teaching of Foreign Languages (ACTFL) Proficiency Guidelines. In speaking and listening, graduates are expected to reach the Advanced-Low level proficiency, in writing the Advanced-Mid level proficiency, and in reading the Advanced-High level proficiency. For detailed descriptions of sublevels, see the ACTFL Proficiency Guidelines.

Demonstration of a high level of proficiency may affect the number of hours required for the major. Native or heritage speakers of a language fulfill the language requirement, but is not an entrance grade for a higher-level course. A grade of D in a Language 2101 course is a passing grade but not an entrance grade for a Language 1002 course. A grade of D in a Language 1002 course is a passing grade but not an entrance grade for a Language 1001 course. A grade of D in a Language 1002 course is a passing grade but not an entrance grade for a Language 2101 course or its equivalent. A grade of D in a Language 2101 course fulfills the language requirement, but is not an entrance grade for a higher-level course.

Demonstration of a high level of proficiency may affect the number of hours required for the major. Native or heritage speakers of a language should consult with the department concerning appropriate placement and advising. Students with previous language coursework should contact the department for language placement testing and advising. Students may not take for credit an elementary course if they have already completed a higher-level course for which the elementary course, or its equivalent, is a prerequisite.

**Degree Requirements**

All courses for the major must be passed with a grade of C- or better. No course required for the major may be taken on a satisfactory/unsatisfactory (s/u) basis with the exception of those taken abroad as part of a university program that has received departmental approval.

**Bachelor of Arts**

All students seeking a B.A. in a Modern Language must successfully complete FL 2100 Languages and World View, and must meet the departmental requirement of a minimum of 33 hours in French or 33 hours in German or 37 hours in Japanese or 35 hours in Spanish (excluding Language 1001 and 1002). The maximum number of hours that may be taken in the major is 45 (including Language 1001 and 1002). In addition, students seeking the B.A. in a Modern Language who desire a teaching certificate must also take FGN LANG 4589 (same as SEC ED 4589), Curriculum and Methods of Teaching Foreign Languages, FGN LANG 4590 (same as SEC ED 4590), and fulfill the professional secondary education requirements of the College of Education.

**Transfer Students**

Transfer students majoring in one of the modern languages must complete at UMSL a minimum of 12 graded hours in language courses at the 3000 level or above with a grade point average of 2.0 or better in those courses.

**Native Speakers**

Native speakers must complete at least two courses at the 3000 level and four courses at the 4000 level to obtain a major in their native language.

**Specific Requirements for the Concentration in German**

Each major with a concentration in German must complete the following courses:

<table>

**Learning Outcomes**

Graduates of the BA in Modern Languages from the University of Missouri-St. Louis possess the necessary linguistic and cultural competencies to interact with native speakers in culturally appropriate ways. They are able to use the target language in a variety of academic, social, and professional situations and have a rich understanding of the target culture(s) fostered through engaging topic-based courses and opportunities such as study abroad, service learning, and internships. Recognizing the interconnection between languages and world views,
they can critically explore their own assumptions, value alternative perspectives, and act with cultural sensitivity. They are empowered with the tools to meet the challenges of a globalized world and continue developing their skills as lifelong learners.

Skills and Knowledge Areas
Upon completion of the major, students should be able to:

Linguistic and Critical Thinking Goals:
- In listening and speaking,
  - demonstrate comprehension of the main ideas and supporting details of narrative and descriptive texts on familiar and concrete topics, such as those on radio, television, and podcasts;
  - discuss topics related to work, school, home, leisure activities, culture, and a variety of media;
  - use the target language in real-world situations in culturally-appropriate ways;
  - produce narrations and descriptions on familiar topics in present, past, and future time frames and;
  - summarize research in oral presentations.
- In reading and writing,
  - demonstrate comprehension of the main idea, supporting details, argumentative structure, and perspective in authentic texts of various genres;
  - produce narrations and descriptions in present, past, and future time frames employing connected discourse;
  - summarize, analyze, and synthesize content, and begin to express supported opinions;
  - assess language reference resources and use them effectively and;
  - conduct independent research and present findings.

Cultural and Global Awareness Goals:
- demonstrate an awareness of the linguistic, ethnic, racial, religious, cultural, and social diversity of the target cultures;
- recognize and describe some of the key historical, social, economic, and political forces in the target cultures;
- analyze and critique film, media, literature, art, etc. in their socio-historical contexts;
- compare and contrast their own cultural beliefs, behaviors, and norms with those of other cultures;
- describe how language and culture impact one’s world view;
- explain the skills acquired through language study and their benefits to a potential employer.

The linguistic goals are based on the National Standards For Foreign Language Learning and the American Council on the Teaching of Foreign Languages (ACTFL) Proficiency Guidelines. In speaking and listening, graduates are expected to reach the Advanced-Low level proficiency, in writing the Advanced-Mid level proficiency, and in reading the Advanced-High level proficiency. For detailed descriptions of sublevels, see the ACTFL Proficiency Guidelines.

Modern Language BA, Japanese Emphasis
Knowledge of Japanese will empower you to dive deep into Japan’s rich cultural heritage, which spans from “The Tale of Genji” to “Attack on Titan” and beyond. Students who choose to study Japanese at UMSL benefit from faculty who are dedicated to creating a challenging but supportive learning environment. You will engage with the language and culture in the classroom, out of the classroom through on-campus events and Japan-America Student Association involvement, and in a variety of study abroad opportunities.

General Education Requirements
Each language major must satisfy the general education requirements (p. 51) of the university and the general education requirements of the College of Arts and Sciences.

Specific Requirements or Restrictions
Students entering with no high school language units must enroll in Language 1001 or may enroll in Language 2115. Language 2115 (a, b, and c) is the intensive study of a language and will satisfy the foreign language requirement. 2115a, 2115b, and 2115c are co-requisites and must be taken concurrently. To satisfy the foreign language requirement all three sections must be completed with a grade of C- or better.

A grade of D in a Language 1001 course is a passing grade but not an entrance grade for a Language 1002 course. A grade of D in a Language 1002 course is a passing grade but not an entrance grade for a Language 2101 course or its equivalent. A grade of D in a Language 2101 course fulfills the language requirement, but is not an entrance grade for a higher-level course.

Demonstration of a high level of proficiency may affect the number of hours required for the major. Native or heritage speakers of a language should consult with the department concerning appropriate placement and advising. Students with previous language coursework should contact the department for language placement testing and advising. Students may not take for credit an elementary course if they have already completed a higher-level course for which the elementary course, or its equivalent, is a prerequisite.

Degree Requirements
All courses for the major must be passed with a grade of C- or better. No course required for the major may be taken on a satisfactory/unsatisfactory (s/u) basis with the exception of those taken abroad as part of a university program that has received departmental approval.

Bachelor of Arts
All students seeking a B.A. in a Modern Language must successfully complete FL 2100 Languages and World View, and must meet the departmental requirement of a minimum of 33 hours in French or 33 hours in German or 37 hours in Japanese or 35 hours in Spanish (excluding Language 1001 and 1002). The maximum number of hours that may be taken in the major is 45 (including Language 1001 and 1002). In addition, students seeking the B.A. in a Modern Language who desire a teaching certificate must also take FGN LANG 4598 (same as SEC ED 4589), Curriculum and Methods of Teaching Foreign Languages, FGN LANG 4590 (same as SEC ED 4590), and fulfill the professional secondary education requirements of the College of Education.
Transfer Students

Transfer students majoring in one of the modern languages must complete at UMSL a minimum of 12 graded hours in language courses at the 3000 level or above with a grade point average of 2.0 or better in those courses.

Native Speakers

Native speakers must complete at least two courses at the 3000 level and four courses at the 4000 level to obtain a major in their native language.

Specific Requirements for the Emphasis in Japanese

Each major with an emphasis in Japanese must complete the following courses:

1. Only three hours may be taken at the 1000 level.

Career Outlook

Career options for graduates with a major or minor in modern languages include the following fields: teaching, social work, nursing, engineering, business, communications, government, journalism, travel industry, translation, and research. Our graduates have been especially successful when they combine advanced study in a modern language with another major. They are then able to add proficiency in a foreign language and culture to their knowledge and skills in another specialty. Experience with world cultures makes our graduates more adaptable and better prepared to meet the challenges of a global and increasingly diverse job market.

B.S. Ed. in Secondary Education with Emphasis in a Foreign Language

The B.S. Ed. is a professional education degree designed for students who wish to pursue a teaching career in secondary schools. Much of the discipline-specific coursework parallels the B.A. degree in the language; however, the Missouri Department of Elementary and Secondary Education (DESE) requires specific coursework for teacher certification. Therefore, students interested in the B.S. Ed. should contact the advising office (OASIS) 314-516-5937 in the College of Education for discipline-specific requirements. Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

B.A. in a Foreign Language with Master’s Level Coursework for Secondary Teacher Certification

In addition to the B.S. Ed., students may opt to complete a B.A. or B.S. degree in their discipline as an undergraduate, followed by admission to the Graduate School for Master’s level teaching certification. The College of Education has a one-year accelerated program for post-graduate certification called Teach in 12, or students can choose a traditional path to certification. Graduate coursework for certification can apply towards a Master’s Degree in Secondary Education, with additional coursework. Students interested in Master’s Level teacher certification should contact the advising office (OASIS) 314-516-5937 in the College of Education. Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

Learning Outcomes

Graduates with a BA in Modern Languages (Japanese) from the University of Missouri-St. Louis possess the necessary linguistic and cultural competencies to interact with native speakers in culturally appropriate ways. They are able to use the target language in a variety of academic, social, and professional situations and have a rich understanding of the culture that has been fostered through engaging courses and opportunities such as study abroad, service learning, and internships. Recognizing the interconnection between languages and world views, they can critically explore their own assumptions, value alternative perspectives, and act with cultural sensitivity. They are empowered with the tools to meet the challenges of a globalized world and continue developing their skills as lifelong learners.

Skills and Knowledge Areas

Upon completion of the Japanese major, students should be able to:

Linguistic and Critical Thinking Goals

- In listening/speaking:
  - demonstrate comprehension of the main ideas and supporting details of everyday conversations on familiar and concrete topics, both formal and informal;
  - discuss topics related to work, school, home, leisure activities, culture, and media;
  - narrate short anecdotes using Japanese conversational conventions;
  - summarize research in oral presentations; and,
• function in real-world situations in culturally-appropriate ways.

• In reading/writing:
  • identify the main idea, supporting details, argumentative structure, and perspective in authentic texts of various genres;
  • apply reading strategies to glean key information from more challenging texts;
  • summarize and analyze content, and begin to express supported opinions;
  • assess language reference resources and use them effectively; and,
  • conduct independent research and present findings.

Cultural and Global Awareness Goals

• recognize and describe some of the key historical, social, economic, and political forces that shape Japanese society;
• analyze and critique products of Japanese culture (film, media, literature, art, etc.) in their socio-historical contexts;
• compare and contrast their own cultural beliefs, behaviors, and norms with those of other cultures;
• describe how language and culture impact one’s world view; and,
• explain the skills acquired through language study and their benefits to a potential employer.

The linguistic program goals are based on the National Standards For Foreign Language Learning and the ACTFL Proficiency Guidelines. Graduates are expected to reach the Intermediate-High level proficiency at a minimum. For detailed descriptions of sublevels, see the ACTFL Proficiency Guidelines.

**Total Hours: 120**

1 INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

Please Note: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of course work may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Modern Language BA, Spanish Emphasis

The BA in Modern Languages with emphasis in Spanish develops learners who are both linguistically and culturally competent and ready to become global citizens. We offer a broad range of coursework in Spanish, from foundational courses in language and culture to courses focused on literature, linguistics, creative writing, and professions, all aimed at developing competencies for the 21st century. Our introductory-level courses are taught in different delivery modes: in person, hybrid, and online. We encourage study abroad through our short-term faculty-led programs in Costa Rica and Barcelona, as well as through year-long programs in partner institutions.

General Education Requirements

Each language major must satisfy the general education requirements (p. 51) of the university and the general education requirements of the College of Arts and Sciences.

Specific Requirements or Restrictions

Students entering with no high school language units must enroll in Language 1001 or may enroll in Language 2115. Language 2115 (a, b, and c) is the intensive study of a language and will satisfy the foreign language requirement. 2115a, 2115b, and 2115c are co-requisites and must be taken concurrently. To satisfy the foreign language requirement all three sections must be completed with a grade of C- or better.

A grade of D in a Language 1001 course is a passing grade but not an entrance grade for a Language 1002 course. A grade of D in a Language 1002 course is a passing grade but not an entrance grade for a Language 2101 course or its equivalent. A grade of D in a Language 2101 course fulfills the language requirement, but is not an entrance grade for a higher-level course.

Demonstration of a high level of proficiency may affect the number of hours required for the major. Native or heritage speakers of a language should consult with the department concerning appropriate placement and advising. Students with previous language coursework should contact the department for language placement testing and advising. Students may...
not take for credit an elementary course if they have already completed a higher-level course for which the elementary course, or its equivalent, is a prerequisite.

Degree Requirements

All courses for the major must be passed with a grade of C- or better. No course required for the major may be taken on a satisfactory/unsatisfactory (s/u) basis with the exception of those taken abroad as part of a university program that has received departmental approval.

Bachelor of Arts

All students seeking a B.A. in a Modern Language must successfully complete FL 2100 Languages and World View, and must meet the departmental requirement of a minimum of 33 hours in French or 33 hours in German or 37 hours in Japanese or 35 hours in Spanish (excluding Language 1001 and 1002). The maximum number of hours that may be taken in the major is 45 (including Language 1001 and 1002). In addition, students seeking the B.A. in a Modern Language who desire a teaching certificate must also take FGN LANG 4589 (same as SEC ED 4589), Curriculum and Methods of Teaching Foreign Languages. FGN LANG 4590 (same as SEC ED 4590), and fulfill the professional secondary education requirements of the College of Education.

Transfer Students

Transfer students majoring in one of the modern languages must complete at UMSL a minimum of 12 graded hours in language courses at the 3000 level or above with a grade point average of 2.0 or better in those courses.

Native Speakers

Native speakers must complete at least two courses at the 3000 level and four courses at the 4000 level to obtain a major in their native language.

Specific Requirements for Concentration in Spanish

Each major with a Spanish concentration must complete the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>

</table>

Select one additional course at the 3000-level (see course descriptions for more detail) 3
Select three courses at the 4000-level 9

Career Hours

Select an additional course at the 2000-level, 3000-level, or 4000-level. The selected course must be consistent with the student's level of study.

Total Hours 35

Career Outlook

Career options for graduates with a major or minor in modern languages include the following fields: teaching, social work, nursing, engineering, business, communications, government, journalism, travel industry, translation, and research. Our graduates have been especially successful when they combine advanced study in a modern language with another major. They are then able to add proficiency in a foreign language and culture to their knowledge and skills in another specialty. Experience with world cultures makes our graduates more adaptable and better prepared to meet the challenges of a global and increasingly diverse job market.

Learning Outcomes

Graduates of the BA in Modern Languages from the University of Missouri-St. Louis possess the necessary linguistic and cultural competencies to interact with native speakers in culturally appropriate ways. They are able to use the target language in a variety of academic, social, and professional situations and have a rich understanding of the target culture(s) fostered through engaging topic-based courses and opportunities such as study abroad, service learning, and internships. Recognizing the interconnection between languages and world views, they can critically explore their own assumptions, value alternative perspectives, and act with cultural sensitivity. They are empowered with the tools to meet the challenges of a globalized world and continue developing their skills as lifelong learners.

Skills and Knowledge Areas

Upon completion of the major, students should be able to:

Linguistic and Critical Thinking Goals:

- In listening and speaking,
  - demonstrate comprehension of the main ideas and supporting details of narrative and descriptive texts on familiar and concrete topics, such as those on radio, television, and podcasts;
  - discuss topics related to work, school, home, leisure activities, culture, and a variety of media;
  - use the target language in real-world situations in culturally-appropriate ways;
  - produce narrations and descriptions on familiar topics in present, past, and future time frames and;
  - summarize research in oral presentations.

- In reading and writing,
  - demonstrate comprehension of the main idea, supporting details, argumentative structure, and perspective in authentic texts of various genres;
  - produce narrations and descriptions in present, past, and future time frames employing connected discourse;
  - summarize, analyze, and synthesize content, and begin to express supported opinions;
  - assess language reference resources and use them effectively and;
The linguistic goals are based on the National Standards For Foreign Language Learning and the American Council on the Teaching of Foreign Languages (ACTFL) Proficiency Guidelines. In speaking and listening, graduates are expected to reach the Advanced-Low level proficiency, in writing the Advanced-Mid level proficiency, and in reading the Advanced-High level proficiency. For detailed descriptions of sublevels, see the ACTFL Proficiency Guidelines.

**Total Hours: 120**

<sup>1</sup> INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

PLEASE NOTE: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

### Modern Languages Minor

A minor in Modern Languages requires the completion of 4 courses beyond the introductory sequence (1001, 1002 and 2101), two in each of two different languages. For students who are seeking a B.A. in a Modern Language, the two languages must be different from the language in which they are majoring.

### Museums Heritage and Public History Graduate Certificate

The Graduate Certificate in Museums, Heritage, and Public History provides interdisciplinary professional and academic training for museum professionals and others who seek to develop their practical skills and knowledge to work in the heritage sector.

All those who wish to be considered for the Graduate Certificate in Museums, Heritage, and Public History should designate this certificate program on their application to the graduate school, submit three letters of recommendation and a writing sample, and complete the Museums, Heritage, and Public History supplemental application with their application for graduate work. Applicants who wish to pursue the Graduate Certificate in Museums, Heritage, and Public History normally must have a Master’s degree and a GPA of 3.2 or higher. Prospective students who wish to pursue the Graduate Certificate in Museums, Heritage, and Public History in conjunction with another graduate program should follow the normal application procedures for that program in addition to those for this certificate.

Admissions decisions are based on transcripts, the letters of recommendation, the sample of written work, and the supplemental application.

The program will accept applications twice per year, once for the fall semester and once for the spring.

### Program Requirements (18 hours)

All candidates for Graduate Certificate in Museums, Heritage, and Public History must complete the following core courses (12 hours):

<table>
<thead>
<tr>
<th>Course Code</th>

<td>3</td>
</tr>
<tr>
<td>HIST 6131</td>
<td>Museum Origins and Evolution</td>
<td>3</td>
</tr>
</tbody>
</table>

Choose one of the following: 3
Music BA

Degree Requirements

Admission to all Music degree programs is by audition to demonstrate musical aptitude and potential, moderate technical proficiency, and seriousness in selecting music as a four-year course of study. In addition to the applied music audition, placement examinations in music theory and music history may be required to confirm students’ prior experience in these areas. Auditions are scheduled from January to May for the fall semester; a limited number are held in December for the spring/summer semester. Students in applied music must pass a junior-standing examination to confirm their level of performance skills for enrollment in AP MUS 3440 – AP MUS 3459 or AP MUS 4440 – AP MUS 4459. This examination is usually taken at the same time as the applied music jury for the fourth semester of enrollment in AP MUS 1440 - AP MUS 1459.

Evidence of sound musicianship, a close acquaintance with an appropriate portion of musical literature, and the ability to bring it to actual performance are required for graduation in all Music degree programs. Students in the B.M.: Performance Emphasis fulfill this requirement with junior and senior recitals. Students in all other degree programs fulfill this requirement with a senior recital. In some cases, upon the recommendation of the student’s applied teacher, the senior recital (or non-performance majors only) may be replaced by participating in three regularly scheduled student recitals during the last two semesters of applied music study, or by performing for a special panel of faculty members.

General Education Requirements

General education requirements (p. 51) apply to all majors, except the students in the B.M. with Elective Studies in Business and B.M. in Music Education degree programs are not required to take a foreign language. Courses required for degree programs may not be taken on a satisfactory/unsatisfactory basis. Students must receive at least a C in each music course and maintain a cumulative GPA of 2.5 (music education 2.7) in all music courses to meet degree requirements.

Non-Music majors may complete no more than 8 hours in music-performing organizations (EN PER 1400, University Chorus; EN PER 1410, University Concert Band; EN PER 1500, University Orchestra; EN PER 1520, University Symphonic Band, et. seq.) toward graduation, including credit transferred. Courses in applied music (private lessons and performing organizations) do not fulfill the humanities general education requirement. M H L T 1150, Drumming Cultures of the World; M H L T 1160, Musical Journey through Latin America; M H L T 1170, Musical Journey through the Far East; or M H L T 1180, Musical Journey through Africa will meet the non-Euro-American study requirement.

Other Requirements

Music majors are required to enroll in an approved ensemble [University Chorus, University Symphonic Band, University Wind Ensemble, University Singers, University Orchestra, or Jazz Orchestra (for Jazz Studies majors)] each semester, to study one applied area progressively each semester, and to enroll in the appropriate Pedagogy and Literature Seminar each semester of the degree program. Music Education majors are exempt from these requirements during the student teaching semester. The following specific ensemble enrollments, depending upon the applied music area, are required:

- Wind and Percussion students—University Symphonic Band or University Wind Ensemble;
- String students—University Orchestra;
- Voice students—University Singers or University Chorus;
- Keyboard and Guitar students—any approved ensemble, but those in the bachelor of music in music education program must successfully audition for and enroll in an ensemble compatible with the teaching certification they are pursuing;
- Instrumental students may be required to participate in additional ensembles to enhance their musical development;
- Jazz Studies majors (any instrument)—Jazz Orchestra.

Majors are required to appear in performance at the department’s discretion and to attend a prescribed number of departmental recitals. Non-keyboard players are required to pass an exam in piano proficiency: PRACTM 2180, Piano Proficiency IV, or the equivalent.

The music department may require students to pass a placement test to enroll in the next level course, provided this or an equivalent test is administered to all students seeking to enroll in that course.

Core Curriculum

The following core courses are required for all Music majors:

**Music Theory**

<table>

Upon completion of the program, graduates will:

- Have the technical skills requisite for artistic self-expression (Performance)
- Understand the common elements and organizational patterns of music and their interaction (Musicianship Skills and Analysis)
- Have a rudimentary capacity to create original or derivative music (Composition/Improvisation)
- Have a basic knowledge of music history and repertories through the present time (History and Repertory)
- Have the ability to work on musical problems by combining their capabilities in performance, aural, verbal and visual analysis; composition/improvisation; history and repertory (Synthesis)

Total Hours: 120

¹ INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.
PLEASE NOTE: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Music BM, Elective Studies in Business Emphasis

Degree Requirements

Admission to all Music degree programs is by audition to demonstrate musical aptitude and potential, moderate technical proficiency, and seriousness in selecting music as a four-year course of study. In addition to the applied music audition, placement examinations in music theory and music history may be required to confirm students’ prior experience in these areas. Auditions are scheduled from January to May for the fall semester; a limited number are held in December for the spring/ winter semester. Students in applied music must pass a junior-standing examination to confirm their level of performance skills for enrollment in AP MUS 3440 – AP MUS 3439 or AP MUS 4440 – AP MUS 4459. This examination is usually taken at the same time as the applied music jury for the fourth semester of enrollment in AP MUS 1440 - AP MUS 1459.

Evidence of sound musicianship, a close acquaintance with an appropriate portion of musical literature, and the ability to bring it to actual performance are required for graduation in all Music degree programs. Students in the B.M.: Performance Emphasis fulfill this requirement with junior and senior recitals. Students in all other degree programs fulfill this requirement with a senior recital. In some cases, upon the recommendation of the student’s applied teacher, the senior recital (for non-performance majors only) may be replaced by participating in three regularly scheduled student recitals during the last two semesters of applied music study, or by performing for a special panel of faculty members.

General Education Requirements

General education requirements (p. 51) apply to all majors, except the students in the B.M. with Elective Studies in Business and B.M. in Music Education degree programs are not required to take a foreign language. Courses required for degree programs may not be taken on a satisfactory/unsatisfactory basis. Students must receive at least a C in each music course and maintain a cumulative GPA of 2.5 (music education 2.7) in all music courses to meet degree requirements.

Non-Music majors may complete no more than 8 hours in music-performing organizations (EN PER 1400, University Chorus; EN PER 1410, University Concert Band; EN PER 1500, University Orchestra; EN PER 1520, University Symphonic Band, et. seq.) toward graduation, including credit transferred. Courses in applied music (private lessons and performing organizations) do not fulfill the humanities general education requirement. MHL T 1150, Drumming Cultures of the World; MHL T 1160, Musical Journey through Latin America; MHL T 1170, Musical Journey through the Far East; or MHL T 1180, Musical Journey through Africa will meet the non-Euro-American study requirement.

Other Requirements

Music majors are required to enroll in an approved ensemble [University Chorus, University Symphonic Band, University Wind Ensemble, University Singers, University Orchestra, or Jazz Orchestra (for Jazz Studies majors)] each semester, to study one applied area progressively each semester, and to enroll in the appropriate Pedagogy and Literature Seminar each semester of the degree program. Music Education majors are exempt from these requirements during the student teaching semester. The following specific ensemble enrollments, depending upon the applied music area, are required:

- Wind and Percussion students—University Symphonic Band or University Wind Ensemble;
- String students—University Orchestra;
- Voice students—University Singers or University Chorus;
- Keyboard and Guitar students—any approved ensemble, but those in the bachelor of music in music education program must successfully audition for and enroll in an ensemble compatible with the teaching certification they are pursuing;
- Instrumental students may be required to participate in additional ensembles to enhance their musical development;
- Jazz Studies majors (any instrument)—Jazz Orchestra.

Majors are required to appear in performance at the department’s discretion and to attend a prescribed number of departmental recitals. Non-keyboard players are required to pass an exam in piano proficiency: PRACTM 2180, Piano Proficiency IV, or the equivalent.

The music department may require students to pass a placement test to enroll in the next level course, provided this or an equivalent test is administered to all students seeking to enroll in that course.

Core Curriculum

The following core courses are required for all Music majors:

Music Theory

---

1 Prerequisites to the required business administration courses.

**Learning Outcomes**

Upon completion of the program, graduates will:

Have technical skills requisite for artistic self-expression (Performance)

Understand the common elements and organizational patterns of music and their interaction (Musicianship Skills and Analysis)

Have a rudimentary capacity to create original or derivative music (Composition/Improvisation)

Have basic knowledge of music history and repertories through the present time (History and Repertory)

Be Able to work on musical problems by combining their capabilities in performance, aural, verbal and visual analysis; composition/improvisation; history and repertory (Synthesis)

Be Able to develop necessary professional abilities and dispositions in order function in a field-based business internship (e.g. marketing, management, public relations, etc.)
Courses required for degree programs may not be taken on a satisfactory/education degree programs are not required to take a foreign language. Students in the B.M. with Elective Studies in Business and B.M. in Music.

**General Education Requirements**

- Evidence of sound musicianship, a close acquaintance with an appropriate portion of musical literature, and the ability to bring it to actual performance are required for graduation in all Music degree programs. Students in the B.M.: Performance Emphasis fulfill this requirement with junior and senior recitals. Students in all other degree programs fulfill this requirement with a senior recital. In some cases, upon the recommendation of the student's applied teacher, the senior recital (for non-performance majors only) may be replaced by participating in three regularly scheduled student recitals during the last two semesters of applied music study, or by performing for a special panel of faculty members.

- **General Education Requirements**
  - General education requirements (p. 51) apply to all majors, except the students in the B.M. with Elective Studies in Business and B.M. in Music. Education degree programs are not required to take a foreign language. Courses required for degree programs may not be taken on a satisfactory/unsatisfactory basis. Students must receive at least a C in each music course and maintain a cumulative GPA of 2.5 (music education 2.7) in all music courses to meet degree requirements.

- Non-Music majors may complete no more than 8 hours in music-performing organizations (EN PER 1400, University Chorus; EN PER 1410, University Concert Band; EN PER 1500, University Orchestra; EN PER 1520, University Symphonic Band, et seq.) toward graduation, including credit transferred. Courses in applied music (private lessons and performing organizations) do not fulfill the humanities general education requirement. M H L T 1150, Drumming Cultures of the World; M H L T 1160, Musical Journey through Latin America; M H L T 1170, Musical Journey through the Far East; or M H L T 1180, Musical Journey through Africa will meet the non-Euro-American study requirement.

**Other Requirements**

Music majors are required to enroll in an approved ensemble (University Chorus, University Symphonic Band, University Wind Ensemble, University Singers, University Orchestra, or Jazz Orchestra [for Jazz Studies majors]) each semester, to study one applied area progressively each semester, and to enroll in the appropriate Pedagogy and Literature Seminar each semester of the degree program. Music Education majors are exempt from these requirements during the student teaching semester. The following specific ensemble enrollments, depending upon the applied music area, are required:

- **Wind and Percussion students—University Symphonic Band or University Wind Ensemble;**
- **String students—University Orchestra;**
- **Voice students—University Singers or University Chorus;**
- **Keyboard and Guitar students—any approved ensemble, but those in the bachelor of music in music education program must successfully audition for and enroll in an ensemble compatible with the teaching certification they are pursuing;**
- **Instrumental students may be required to participate in additional ensembles to enhance their musical development;**
- **Jazz Studies majors (any instrument)—Jazz Orchestra.**

 Majors are required to appear in performance at the department's discretion and to attend a prescribed number of departmental recitals. Non-keyboard players are required to pass an exam in piano proficiency: PRACTM 2180, Piano Proficiency IV, or the equivalent.

The music department may require students to pass a placement test to enroll in the next level course, provided this or an equivalent test is administered to all students seeking to enroll in that course.

**Core Curriculum**

The following core courses are required for all Music majors:

**Music Theory**

<table>

Music Theory

Core Curriculum

The following core courses are required for all Music majors:

Music BM, Music Composition Emphasis

Degree Requirements

Admission to all Music degree programs is by audition to demonstrate musical aptitude and potential, moderate technical proficiency, and seriousness in selecting music as a four-year course of study. In addition to the applied music audition, placement examinations in music theory and music history may be required to confirm students’ prior experience in these areas. Auditions are scheduled from January to May for the fall semester; a limited number are held in December for the spring/winter semester. Students in applied music must pass a junior-standing examination to confirm their level of performance skills for enrollment in AP MUS 3440 – AP MUS 3459 or AP MUS 4440 – AP MUS 4459. This examination is usually taken at the same time as the applied music jury for the fourth semester of enrollment in AP MUS 1440 - AP MUS 1459.

Evidence of sound musicianship, a close acquaintance with an appropriate portion of musical literature, and the ability to bring it to actual performance are required for graduation in all Music degree programs. Students in the B.M.: Performance Emphasis fulfill this requirement with junior and senior recitals. Students in all other degree programs fulfill this requirement with a senior recital. In some cases, upon the recommendation of the student’s applied teacher, the senior recital (for non-performance majors only) may be replaced by participating in three regularly scheduled student recitals during the last two semesters of applied music study, or by performing for a special panel of faculty members.

General Education Requirements

General education requirements (p. 51) apply to all majors, except the students in the B.M. with Elective Studies in Business and B.M. in Music Education degree programs are not required to take a foreign language. Courses required for degree programs may not be taken on a satisfactory/unsatisfactory basis. Students must receive at least a C in each music course and maintain a cumulative GPA of 2.5 (music education 2.7) in all music courses to meet degree requirements.

Non-Music majors may complete no more than 8 hours in music-performing organizations (EN PER 1400, University Chorus; EN PER 1410, University Concert Band; EN PER 1500, University Orchestra; EN PER 1520, University Symphonic Band, et. seq.) toward graduation, including credit transferred. Courses in applied music (private lessons and performing organizations) do not fulfill the humanities general education requirement. M H L T 1150, Drumming Cultures of the World; M H L T 1160, Musical Journey through Latin America; M H L T 1170, Musical Journey through the Far East; or M H L T 1180, Musical Journey through Africa will meet the non-Euro-American study requirement.

Other Requirements

Music majors are required to enroll in an approved ensemble [University Chorus, University Symphonic Band, University Wind Ensemble, University Singers, University Orchestra, or Jazz Orchestra (for Jazz Studies majors)] each semester, to study one applied area progressively each semester, and to enroll in the appropriate Pedagogy and Literature Seminar each semester of the degree program. Music Education majors are exempt from these requirements during the student teaching semester. The following specific ensemble enrollments, depending upon the applied music area, are required:

• Wind and Percussion students—University Symphonic Band or University Wind Ensemble;
• String students--University Orchestra;
• Voice students--University Singers or University Chorus;
• Keyboard and Guitar students--any approved ensemble, but those in the bachelor of music in music education program must successfully audition for and enroll in an ensemble compatible with the teaching certification they are pursuing;
• Instrumental students may be required to participate in additional ensembles to enhance their musical development;
• Jazz Studies majors (any instrument)--Jazz Orchestra.

Majors are required to appear in performance at the department's discretion and to attend a prescribed number of departmental recitals. Non-keyboard players are required to pass an exam in piano proficiency: PRACTM 2180, Piano Proficiency IV, or the equivalent.

The music department may require students to pass a placement test to enroll in the next level course, provided this or an equivalent test is administered to all students seeking to enroll in that course.

Core Curriculum

The following core courses are required for all Music majors:

Music Theory

2

PLEASE NOTE: This plan is an example of what a four year plan could look like for a typical full-time student. Placement exam scores in math and science will determine the appropriate course level. Early placement in core mathematics and sciences is important to follow the timeline. A student with less than 24 college credits must take the placement exam used by all departments.

INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

Core Curriculum

Other Requirements

Music majors are required to enroll in an approved ensemble [University Chorus, University Symphonic Band, University Wind Ensemble, University Singers, University Orchestra, or Jazz Orchestra (for Jazz Studies majors)] each semester, to study one applied area progressively each semester, and to enroll in the appropriate Pedagogy and Literature Seminar each semester of the degree program. Music Education majors are exempt from these requirements during the student teaching semester. The following specific ensemble enrollments, depending upon the applied music area, are required:

• Wind and Percussion students—University Symphonic Band or University Wind Ensemble;
• String students--University Orchestra;
• Voice students--University Singers or University Chorus;
• Keyboard and Guitar students--any approved ensemble, but those in the bachelor of music in music education program must successfully audition for and enroll in an ensemble compatible with the teaching certification they are pursuing;
• Instrumental students may be required to participate in additional ensembles to enhance their musical development;
• Jazz Studies majors (any instrument)--Jazz Orchestra.

Majors are required to appear in performance at the department's discretion and to attend a prescribed number of departmental recitals. Non-keyboard players are required to pass an exam in piano proficiency: PRACTM 2180, Piano Proficiency IV, or the equivalent.

The music department may require students to pass a placement test to enroll in the next level course, provided this or an equivalent test is administered to all students seeking to enroll in that course.

Other Requirements

Music BM, Music Composition Emphasis

### Piano Proficiency
- **PRACTM 1140** Piano Proficiency I 1
- **PRACTM 2160** Piano Proficiency III 3
- **PRACTM 2180** Piano Proficiency IV 4

### Conducting
- **PRACTM 2510** Conducting I 2

### Music History and Literature
- **MHLT 2010** History of Western Music I (MOTR MUSC 103) 3
- **MHLT 2020** History of Western Music II (MOTR MUSC 104) 3

Choose one of the following courses:
- **MHLT 1150** Drumming Cultures of the World (MOTR MUSC 102) 3
- **MHLT 1160** Musical Journey through Latin America
- **MHLT 1170** Musical Journey through the Far East
- **MHLT 1180** Musical Journey Through Africa

### Applied Music
- **AP MUS 1460** Seminar in Pedagogy and Literature 0
- **AP MUS 34XX** Seminar in Pedagogy and Literature 0
- **AP MUS 3510** Senior Recital 0

Total Hours 36

1. Students in the BM Jazz Studies program will take THRY COM 2313 instead.
2. Students in the BM Jazz Studies program will take THRY COM 2314 instead.
3. Students in the BM Jazz Studies program will take PRACTM 2170 instead.
4. Students in the BM Jazz Studies program will take PRACTM 2171 instead.

### Emphasis Area Requirements

#### Theory and Composition
- **THRY COM 3110** Analysis of Music from 1900 to Present 2
- **THRY COM 3120** Tonal Counterpoint 2
- **THRY COM 3300** Seminar in Composition (two semesters) 2
- **THRY COM 3310** Studio Composition (four semesters) 4
- **THRY COM 3410** Orchestration 3
- **THRY COM 3420** Choral Arranging 2
- **THRY COM 3130** Advanced Analytical Techniques 2
- **or THRY COM 3140** Readings in Music Theory

#### Music History and Literature
Select two upper level courses MHLT 4000-MHLT 4280 6

#### Practicum
- **PRACTM 3521** Conducting II - Instrumental 2
- **or PRACTM 3522** Conducting II - Choral

### PRAC TM 4100 Senior Project in Theory/Composition 2-4

#### Applied Area
- 1 hour every semester in progress toward degree with a minimum of 8 credit hours

#### Ensemble
- Must be enrolled every semester in progress toward degree with a minimum of 4 credit hours

Total Hours 39-41

### Learning Outcomes
Upon completion of the program, graduates will:

- Have technical skills requisite for artistic self-expression (Performance)
- Understand the common elements and organizational patterns of music and their interaction (Musicianship Skills and Analysis)
- Have a rudimentary capacity to create original or derivative music (Composition/Improvisation)
- Have basic knowledge of music history and repertories through the present time (History and Repertory)
- Be able to work on musical problems by combining their capabilities in performance, aural, verbal and visual analysis; composition/improvisation; history and repertory (Synthesis)

Admission to all Music degree programs is by audition to demonstrate musical aptitude and potential, moderate technical proficiency, and seriousness in selecting music as a four-year course of study. In addition to the applied music audition, placement examinations in music theory and music history may be required to confirm students’ prior experience in these areas. Auditions are scheduled from January to May for the fall semester; a limited number are held in December for the spring/winter semester. Students in applied music must pass a junior-standing examination to confirm their level of performance skills for enrollment in AP MUS 3440 – AP MUS 3459 or AP MUS 4440 – AP MUS 4459. This examination is usually taken at the same time as the applied music jury for the fourth semester of enrollment in AP MUS 1440 - AP MUS 1459.

Evidence of sound musicianship, a close acquaintance with an appropriate portion of musical literature, and the ability to bring it to actual performance are required for graduation in all Music degree programs. Students in the B.M.: Performance Emphasis fulfill this requirement with junior and senior recitals. Students in all other degree programs fulfill this requirement with a senior recital. In some cases, upon the recommendation of the student’s applied teacher, the senior recital (for non-performance majors only) may be replaced by participating in three regularly scheduled departmental recitals during the last two semesters of applied music study, or by performing for a special panel of faculty members.

General Education Requirements

General education requirements (p. 51) apply to all majors, except the students in the B.M. with Elective Studies in Business and B.M. in Music Education degree programs are not required to take a foreign language. Courses required for degree programs may not be taken on a satisfactory/unsatisfactory basis. Students must receive at least a C in each music course and maintain a cumulative GPA of 2.5 (music education 2.7) in all music courses to meet degree requirements.

Non-Music majors may complete no more than 8 hours in music-performing organizations (EN PER 1400, University Chorus; EN PER 1410, University Concert Band; EN PER 1500, University Orchestra; EN PER 1520, University Symphonic Band, et. seq.) toward graduation, including credit transferred. Courses in applied music (private lessons and performing organizations) do not fulfill the humanities general education requirement. M H L T 1150, Drumming Cultures of the World; M H L T 1160, Musical Journey through Latin America; M H L T 1170, Musical Journey through the Far East; or M H L T 1180, Musical Journey through Africa will meet the non-Euro-American study requirement.

Other Requirements

Music majors are required to enroll in an approved ensemble [University Chorus, University Symphonic Band, University Wind Ensemble, University Singers, University Orchestra, or Jazz Orchestra (for Jazz Studies majors)] each semester, to study one applied area progressively each semester, and to enroll in the appropriate Pedagogy and Literature Seminar each semester of the degree program. Music Education majors are exempt from these requirements during the student teaching semester. The following specific ensemble enrollments, depending upon the applied music area, are required:

- Wind and Percussion students—University Symphonic Band or University Wind Ensemble;
- String students—University Orchestra;
- Voice students—University Singers or University Chorus;
- Keyboard and Guitar students—any approved ensemble, but those in the bachelor of music in music education program must successfully audition for and enroll in an ensemble compatible with the teaching certification they are pursuing;
- Instrumental students may be required to participate in additional ensembles to enhance their musical development;
- Jazz Studies majors (any instrument)—Jazz Orchestra.

Majors are required to appear in performance at the department’s discretion and to attend a prescribed number of departmental recitals. Non-keyboard players are required to pass an exam in piano proficiency: PRACTM 2180, Piano Proficiency IV, or the equivalent.

The music department may require students to pass a placement test to enroll in the next level course, provided this or an equivalent test is administered to all students seeking to enroll in that course.

Core Curriculum

The following core courses are required for all Music majors:

### Music Theory

<table>
<thead>

### Total Hours
- **36**

---

1. Students in the BM Jazz Studies program will take THRY COM 2313 instead.
2. Students in the BM Jazz Studies program will take THRY COM 2314 instead.
3. Students in the BM Jazz Studies program will take PRACTM 2170 instead.
4. Students in the BM Jazz Studies program will take PRACTM 2171 instead.

In addition to the requirement for a successful audition on their primary instrument, piano and guitar students applying for the BM: Music Education program must also successfully audition for the full participation in (1) Applied Music (seven hours) and University Singers (for those seeking vocal/choral certification), or (2) Symphonic Band, Wind Ensemble, or Orchestra (for those seeking instrumental certification).

In addition to the required music core curriculum, candidates must complete the following:

### Other General Education Requirements

All B.M. in Music Education majors must meet the university and college general education requirements.

### GPA Requirement

Students enrolled in B.M. in music education must maintain minimum GPAs (2.75 cumulative; 3.0 music; and 3.0 professional education).

### Proficiency Exam

Students working toward certification in choral/vocal or instrumental music K-12 are required to pass a keyboard proficiency examination before admission to student teaching in music, usually before or during the sixth semester of their program.

1. All of the courses in the General Education Requirement Area must be a minimum of two semester hours.

Total Hours: 140

PLEASE NOTE: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

**PLEASE NOTE:** This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

### Music BM, Music Theory Emphasis

#### Degree Requirements

Admission to all Music degree programs is by audition to demonstrate musical aptitude and potential, moderate technical proficiency, and seriousness in selecting music as a four-year course of study. In addition to the applied music audition, placement examinations in music theory and music history may be required to confirm students’ prior experience in these areas. Auditions are scheduled from January to May for the fall semester; a limited number are held in December for the spring/summer semester. Students in applied music must pass a junior-standing examination to confirm their level of performance skills for enrollment in AP MUS 3440 – AP MUS 3459 or AP MUS 4440 – AP MUS 4459. This examination is usually taken at the same time as the applied music jury for the fourth semester of enrollment in AP MUS 1440 - AP MUS 1459.

Evidence of sound musicianship, a close acquaintance with an appropriate portion of musical literature, and the ability to bring it to actual performance are required for graduation in all Music degree programs. Students in the B.M.: Performance Emphasis fulfill this requirement with junior and senior recitals. Students in all other degree programs fulfill this requirement with a senior recital. In some cases, upon the recommendation of the student's applied teacher, the senior recital (for non-performance majors only) may be replaced by participating in three regularly scheduled student recitals during the last two semesters of applied music study, or by performing for a special panel of faculty members.

#### General Education Requirements

General education requirements (p. 51) apply to all majors, except the students in the B.M. with Elective Studies in Business and B.M. in Music Education degree programs are not required to take a foreign language. Courses required for degree programs may not be taken on a satisfactory/unsatisfactory basis. Students must receive at least a C in each music course and maintain a cumulative GPA of 2.5 (music education 2.7) in all music courses to meet degree requirements.

Non-Music majors may complete no more than 8 hours in music-performing organizations (EN PER 1400, University Chorus; EN PER 1410, University Concert Band; EN PER 1500, University Orchestra; EN PER 1520, University Symphonic Band, et seq.) toward graduation, including credit transferred. Courses in applied music (private lessons and performing organizations) do not fulfill the humanities general education requirement. M H L T 1150, Drumming Cultures of the World; M H L T 1160, Musical Journey through Latin America; M H L T 1170, Musical Journey through the Far East; or M H L T 1180, Musical Journey through Africa will meet the non-Euro-American study requirement.

#### Other Requirements

Music majors are required to enroll in an approved ensemble [University Chorus, University Symphonic Band, University Wind Ensemble, University Singers, University Orchestra, or Jazz Orchestra (for Jazz Studies majors)] each semester, to study one applied area progressively each semester, and to enroll in the appropriate Pedagogy and Literature Seminar each semester of the degree program. Music Education majors are exempt from these requirements during the student teaching
semester. The following specific ensemble enrollments, depending upon the applied music area, are required:

- Wind and Percussion students—University Symphonic Band or University Wind Ensemble;
- String students—University Orchestra;
- Voice students—University Singers or University Chorus;
- Keyboard and Guitar students—any approved ensemble, but those in the bachelor of music in music education program must successfully audition for and enroll in an ensemble compatible with the teaching certification they are pursuing;
- Instrumental students may be required to participate in additional ensembles to enhance their musical development;
- Jazz Studies majors (any instrument)—Jazz Orchestra.

Majors are required to appear in performance at the department’s discretion and to attend a prescribed number of departmental recitals. Non-keyboard players are required to pass an exam in piano proficiency: PRACTM 2180, Piano Proficiency IV, or the equivalent.

The music department may require students to pass a placement test to enroll in the next level course, provided this or an equivalent test is administered to all students seeking to enroll in that course.

**Core Curriculum**

The following core courses are required for all Music majors:

**Music Theory**

**Applied Area**

1 hour every semester in progress toward degree with a minimum of 8 credit hours.

**Ensemble**

Must be enrolled every semester in progress toward degree with a minimum of 4 credit hours.

Total Hours: 36-38

**Learning Outcomes**

Upon completion of the program, graduates will:

- Have technical skills requisite for artistic self-expression (Performance)
- Understand the common elements and organizational patterns of music and their interaction (Musicianship Skills and Analysis)
- Have a rudimentary capacity to create original or derivative music (Composition/Improvisation)
- Have basic knowledge of music history and repertories through the present time (History and Repertory)
- Be able to work on musical problems by combining their capabilities in performance, aural, verbal and visual analysis; composition/improvisation; history and repertory (Synthesis)
• Develop requisite knowledge, skills, and disposition needed to engage in scholarly dialogue through research and analysis

Total Hours: 120

1 INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

PLEASE NOTE: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Music BM, Performance Emphasis

Degree Requirements

Admission to all Music degree programs is by audition to demonstrate musical aptitude and potential, moderate technical proficiency, and seriousness in selecting music as a four-year course of study. In addition to the applied music audition, placement examinations in music theory and music history may be required to confirm students' prior experience in these areas. Auditions are scheduled from January to May for the fall semester; a limited number are held in December for the spring/summer semester. Students in applied music must pass a junior-standing examination to confirm their level of performance skills for enrollment in AP MUS 3440 – AP MUS 3459 or AP MUS 4440 – AP MUS 4459. This examination is usually taken at the same time as the applied music jury for the fourth semester of enrollment in AP MUS 1440 - AP MUS 1459.

Evidence of sound musicianship, a close acquaintance with an appropriate portion of musical literature, and the ability to bring it to actual performance are required for graduation in all Music degree programs. Students in the B.M.: Performance Emphasis fulfill this requirement with junior and senior recitals. Students in all other degree programs fulfill this requirement with a senior recital. In some cases, upon the recommendation of the student's applied teacher, the senior recital (for non-performance majors only) may be replaced by participating in three regularly scheduled student recitals during the last two semesters of applied music study, or by performing for a special panel of faculty members.

General Education Requirements

General education requirements (p. 51) apply to all majors, except the students in the B.M. with Elective Studies in Business and B.M. in Music Education degree programs are not required to take a foreign language. Courses required for degree programs may not be taken on a satisfactory/unsatisfactory basis. Students must receive at least a C in each music course and maintain a cumulative GPA of 2.5 (music education 2.7) in all music courses to meet degree requirements.

Non-Music majors may complete no more than 8 hours in music-performing organizations (EN PER 1400, University Chorus; EN PER 1410, University Concert Band; EN PER 1500, University Orchestra; EN PER 1520, University Symphonic Band, et seq.) toward graduation, including credit transferred. Courses in applied music (private lessons and performing organizations) do not fulfill the humanities general education requirement. M H L T 1150, Drumming Cultures of the World; M H L T 1160, Musical Journey through Latin America; M H L T 1170, Musical Journey through the Far East; or M H L T 1180, Musical Journey through Africa will meet the non-Euro-American study requirement.

Other Requirements

Music majors are required to enroll in an approved ensemble [University Chorus, University Symphonic Band, University Wind Ensemble, University Singers, University Orchestra, or Jazz Orchestra] of Jazz Studies majors] each semester, to study one applied area progressively each semester, and to enroll in the appropriate Pedagogy and Literature Seminar each semester of the degree program. Music Education majors are exempt from these requirements during the student teaching
semester. The following specific ensemble enrollments, depending upon the applied music area, are required:

- Wind and Percussion students—University Symphonic Band or University Wind Ensemble;
- String students—University Orchestra;
- Voice students—University Singers or University Chorus;
- Keyboard and Guitar students—any approved ensemble, but those in the bachelor of music in music education program must successfully audition for and enroll in an ensemble compatible with the teaching certification they are pursuing;
- Instrumental students may be required to participate in additional ensembles to enhance their musical development;
- Jazz Studies majors (any instrument)—Jazz Orchestra.

Majors are required to appear in performance at the department’s discretion and to attend a prescribed number of departmental recitals. Non-keyboard players are required to pass an exam in piano proficiency: PRACTM 2180, Piano Proficiency IV, or the equivalent.

The music department may require students to pass a placement test to enroll in the next level course, provided this or an equivalent test is administered to all students seeking to enroll in that course.

**Core Curriculum**

### Foreign Language Requirement

Candidates pursuing the performance emphasis area with an applied area in voice must complete two semesters of one foreign language selected from French, German, or Italian.

### Learning Outcomes

Upon completion of the program, graduates will:

- Have technical skills requisite for artistic self-expression (Performance)
- Understand the common elements and organizational patterns of music and their interaction (Musicianship Skills and Analysis)
- Have a rudimentary capacity to create original or derivative music (Composition/Improvisation)
- Have basic knowledge of music history and repertories through the present time (History and Repertory)
- Be able to work on musical problems by combining their capabilities in performance, aural, verbal and visual analysis; composition/improvisation; history and repertory (Synthesis)

2. Choose two of the following: THRY COM 3110 (odd spring), THRY COM 3120 (even spring), THRY COM 3130 (odd fall), and THRY COM 3140 (even fall)

PLEASE NOTE: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Bachelor of Music with an Emphasis in Performance (Voice)
**Music Education MME**

**Effective Fall of 2018, the Department will no longer accept applicants for the Master of Music Education.**

**Master of Music Education**

The master of music education degree is designed to enable music specialists in grades K-12 to pursue continued professional growth in an emphasis area of their choice.

**Admission Requirements**

Admission to the program requires a bachelor of music in music education (or equivalent) degree, admission to the Graduate School, and two letters of recommendation. Student should also submit a resume, a statement of purpose, and a 20 - 30 minute video of their teaching directly to the Director of the MME program.

The program requires completion of 30 hours of graduate credit, 20 of which must be earned in residence.

**Required Courses and Options:**

The minimum 30-hour program includes the following requirements.

### Music Education Core (12 credit hours)

- **MUS ED 5810** Foundations of Music Education 3
- **MUS ED 5830** Contemporary Music Education 3
- **MUS ED 5910** Music Education Research 3
- **MUS ED 5990** Master's Project in Music Education 3

### Music Education Electives (6 credits from following)

- **MUS ED 5060** Graduate Workshop in Music Education 1-5
- **MUS ED 5510** Graduate Instrumental Methods 3
- **MUS ED 5610** Graduate Choral Methods 3
- **MUS ED 5620** Guitar in the Classroom 3
- **MUS ED 5710** General Music: A Model for Multi-Faceted Learning 3
- **MUS ED 5840** Teaching Music in an Urban Setting 3
- **MUS ED 5920** Psychology of Music 3
- **PDGOGY 5110** Graduate Jazz Pedagogy 3
- **PRACTM 5020**  
- **PRACTM 5035**  
- **PRACTM 5210** Graduate Conducting 3
- **THRY COM 5110** Scoring and Arranging 3

### Education Electives (6 credits from the following)  

<table>

</tr>
</tbody>
</table>

### Free Electives (6 credits from the following)  

- **ED REM 6710** Educational Research Methods and Design 3
- **ED REM 6716** Academic Assessment and Intervention 3
- **SPEC ED 6345** Characteristics and Education of Students with High-Incidence Disabilities 3
- **SPEC ED 6412** Psychology of Exceptional Children 3
- **SEC ED 6415** Curriculum Leadership in Education 3
- **TCH ED 5312** Teaching Reading in the Content Areas 4
- **TCH ED 6010** Examining History, Community and Social Justice in Education 3
- **TCH ED 6020** Teacher Action, Advocacy and Leadership 3

### Music Minor

Candidates must complete the following courses (28 hours):

#### Music Theory

- **THRY COM 1301** Theory of Music I 3
- **THRY COM 1302** Aural Training I 2
- **THRY COM 1311** Theory of Music II 3
- **THRY COM 1312** Aural Training II 2

#### Music History and Literature

- **M H L T 1010** History of Western Music I (MOTR MUSC 103) 3
  
  or **M H L T 1020** History of Western Music II (MOTR MUSC 104) 3

Select any M H L T course 4220-4280 3

#### Applied Area

- **Private Lessons** 4

#### Ensemble

- **Ensemble (4 hours maximum credit)** 2
- **Select six credit hours from the following:** 6
  
<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>PRACTM 2160</strong></td>
<td>Piano Proficiency III (Prerequisite: PRACTM 1150)</td>
</tr>
</tbody>
</table>
Music education methods courses and instrumental techniques courses may not be taken to complete this minor.

Non-keyboard players are required to pass an exam of piano proficiency or equivalent.

A GPA of 2.5 for all music hours is required to complete this minor.

**Neuroscience Undergraduate Certificate**

**Certificate in Neuroscience**

The undergraduate Certificate Program in Neuroscience is an interdisciplinary program requiring 20 credits of training in Neuroscience. The Program provides a group of related courses capped by a research experience. The Program is likely to be of particular interest to students who want to pursue graduate or professional training, but it is intended to appeal to any student interested in Neuroscience.

Courses taken for the certificate in the lower division (1000 and 2000 level) may satisfy general education requirements (that is, breadth requirements), if they are approved general education courses. Courses in the upper division (3000 level and above) may satisfy requirements for the student’s major, consistently with the major’s requirements. All required courses must be completed with a “B-” average or higher. Pass/Fail grades do not count.

Most courses required by the Certificate Program in Neuroscience have prerequisites. Some students may satisfy prerequisites by virtue of their prior curriculum. When this is not the case, students are responsible for satisfying the prerequisites.

**Requirements**

**The two entry level courses:**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 1831</td>
<td>Introductory Biology: From Molecules to Organisms (MOTR BIOL 150L)</td>
</tr>
<tr>
<td>or BIOL 1012</td>
<td>General Biology (MOTR BIOL 100)</td>
</tr>
<tr>
<td>or BIOL 1102</td>
<td>Human Biology (MOTR LIFS 150)</td>
</tr>
<tr>
<td>PSYCH 2211</td>
<td>Introduction to Biological Psychology</td>
</tr>
</tbody>
</table>

Select one of the following statistics courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 4122</td>
<td>Biometry</td>
</tr>
<tr>
<td>MATH 1320</td>
<td>Introduction to Probability and Statistics</td>
</tr>
<tr>
<td>PSYCH 2201</td>
<td>Psychological Statistics</td>
</tr>
<tr>
<td>SOC 3220</td>
<td>Social Statistics</td>
</tr>
</tbody>
</table>

**Electives**

Select two of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 3102</td>
<td>Animal Behavior</td>
</tr>
</tbody>
</table>

**Total Hours**

Music education methods courses and instrumental techniques courses may not be taken to complete this minor.

1 BIOL 1831 is strongly recommended, especially for those considering taking BIOL 4822 Introduction to Neurosciences towards their Neuroscience Certificate (BIOL 1831 is a prerequisite for BIOL 4822)*

2 At least one elective must be taken outside the student’s major

3 This requires completion of a Directed Research Assistantship with a Neuroscience faculty member within any of the participating departments. The research project must be approved in advance by the undergraduate advisor with the assistance of a committee of Neuroscience faculty. It is expected that this research will lead to a presentation of the research (e.g., at the UM-St. Louis Neuroscience seminar or the Undergraduate Research Symposium).

**Learning Outcomes**

Upon completion of the program, certificate earners will be able to:

- Describe the molecular, cellular, and tissue-level organization of the central and peripheral nervous system.
- Understand the properties of cells that make up the nervous system including the propagation of electrical signals used for cellular communication.
- Relate the properties of individual cells to their function in organized neural circuits and systems.
- Explain how the interaction of cells and neural circuits leads to higher level activities such as cognition and behavior.
- Engage in research, generate testable scientific hypotheses, design experiments, and collect, analyze, and interpret data through collaborative research projects, lab work, internships, and coursework.
- Demonstrate critical thinking skills by analyzing and evaluating neuroscience primary literature.
• Effectively communicate scientific information in written and oral formats; prepare and formally present a scientific paper or poster about neuroscience research, including communication of quantitative data in statistics, graphs and tables.
• Create a career development plan that matches an accurate self-assessment of abilities, achievement, motivation and work habits with specific job opportunities in the neurosciences.

Nonprofit Administration Minor

Requirements for Political Science Minors

A general minor in political science can be arranged, as well as specialized minors in eight different subfields of the discipline. Interested students should see a faculty adviser to plan a coherent program of study as a minor field.

Students must achieve a cumulative 2.0 GPA in the political science courses chosen to qualify for the minor. Students may count no more than 3 hours in political science taken on a satisfactory/unsatisfactory basis toward the minor. Students taking an internship POL SCI 3940 may count no more than three hours of the internship toward the minor.

Specific Requirements for the Minor

Course List
Select five of the following: 15

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>POL SCI 3420</td>
<td>Public and NonProfit Personnel Management</td>
<td>3</td>
</tr>
<tr>
<td>POL SCI 3440</td>
<td>Public and NonProfit Budgeting</td>

</tr>
<tr>
<td>POL SCI 2400</td>
<td>Public Administration</td>
<td>1</td>
</tr>
<tr>
<td>POL SCI 3700</td>
<td>NonProfit Organizations and Public Policy</td>
<td>1</td>
</tr>
<tr>
<td>POL SCI 3710</td>
<td>NonProfits, Civil Society and Voluntarism</td>
<td>1</td>
</tr>
<tr>
<td>POL SCI 3940</td>
<td>Public Affairs Internship (must be conducted through a nonprofit organization)</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Hours 15

Learning Outcomes
• Demonstrate an understanding of theories, concepts and practices relevant to nonprofit administration.
• Assess issues in the nonprofit sector, formulate evidence-based solutions, and communicate them with clarity and coherence.

Nonprofit Organization Management and Leadership Graduate Certificate

Through the Public Policy Administration Program, UMSL offers the Graduate Certificate in Nonprofit Organization Management and Leadership for students who are current professional staff, board members, and other leaders of nonprofit and voluntary organizations, as well as those who plan to work in the field. The NPML certificate is the only nonprofit program in the St. Louis region that has full membership in the Nonprofit Academic Centers Council (NACC). The certificate can be taken by itself or in conjunction with the Master of Public Policy Administration degree or a graduate degree in another field. Course credits earned in the certificate program can be applied to the MPPA, but a separate application to the master's program is required.

Requirements

The Graduate Certificate in Nonprofit Organization Management and Leadership requires the completion of 18 credit hours. Nine of these include the following core courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>P P ADM/SOC WK 6300</td>
<td>Leadership and Management in Nonprofit Organizations</td>

<td>Legal Issues in Managing Nonprofit Organizations</td>
<td>1</td>
</tr>
<tr>
<td>P P ADM/SOC WK 6313</td>
<td>Financial Issues in Managing Nonprofit Organizations</td>
<td>1</td>
</tr>
</tbody>
</table>

Total Hours 9

Six hours of electives are to be taken from approved courses in accounting, business administration, economics, management, marketing, political science, psychology, public policy administration, and sociology. A student may choose among these courses or other courses approved by the program director.

Three hours of internship are also required. Students who have significant relevant field experience in the nonprofit sector may request that the internship requirement be waived. To request a waiver, students must submit a written request outlining the student’s professional or managerial field experience with appropriate documentation. Any request for a waiver from the internship requirement must be approved by the program director.

Students who receive a waiver must take an additional three hours of electives in lieu of the internship.

Requirements for admission to the graduate certificate program include an undergraduate degree and a GPA of 3.0 or better. Applicants must submit two letters of recommendation. At least one of the letters should be from a current or former college-level instructor. Applicants must submit a two-page personal statement explaining how the certificate program fits in the applicant’s educational and professional goals. The letters and personal statement should be sent directly to the Public Policy Administration office.

Nursing BSN

Freshman Guaranteed Clinical Criteria

Applicants to the nursing freshmen guaranteed clinical program will be holistically reviewed using criteria such as high school GPA, ACT test scores, a personal statement, an essay, extra-curricular activities, honors, award recognitions, leadership roles, work/volunteer experiences.

First-time freshmen and applicants with fewer than 24 transferable college credit hours from a regionally accredited college or university who meet the following minimum criteria may earn a guaranteed clinical space in the Traditional Full-Time Option:
• Admission to the University by completing the UMSL Undergraduate Application
• Minimum ACT score of 24
Minimum high school GPA of 3.0 (as calculated by UMSL's Office of Admissions)

Complete the Traditional BSN Nursing Supplemental Application

Pre-Clinical Transfer Student Admission Criteria

Transfer students who meet the following minimum criteria are eligible to declare Nursing as their major. Such students must still apply competitively for a clinical space during their last semester of general education coursework (see Clinical Admission Criteria below).

- Admission to the University by completing the UMSL Undergraduate Application
- Minimum cumulative GPA of 2.75 (including all transferable courses)

Clinical Admission Criteria: Traditional Full-Time and Traditional Part-Time

- Admission to the University by completing the UMSL Undergraduate Application
- Complete the Traditional BSN Nursing Supplemental Application
- Minimum cumulative GPA of 2.75 (including all transferable courses)
- Satisfactory completion of all general education course requirements
- Grade of B- or higher within 5 years of enrollment in the clinical major for the following courses: Chemistry, Anatomy & Physiology I, Anatomy & Physiology II, Microbiology
- Grade of C- or higher in all prerequisite courses except in the case of the above-listed science courses

Clinical spaces are awarded on a competitive and space-available basis for each admission period. Admission to the UMSL and the College of Nursing (as a pre-clinical student) does not guarantee admission into the clinical track of any of the Pre-Licensure BSN Options (Traditional Full-Time, Traditional Part-Time, or Accelerated), unless a student is admitted to the Traditional Full-Time Option under the Freshman Guaranteed Clinical Criteria (see above).

General Education Course Requirements

Nursing majors must complete all general education requirements (p. 51) of the university as outlined in this Bulletin.

As part of meeting the university’s general education requirements, the prerequisite courses listed under 1) Natural science course work, 2) Behavioral and social science course work, 3) Information literacy, and 4) Humanities, must be completed prior to beginning the clinical track. See a curriculum planning guide for specific courses and proper sequencing.

Total Hours: 57

All undergraduate nursing students must have access to transportation to their clinical practice experiences. Students must provide their own transportation to and from clinical agencies, which may be scheduled throughout the St. Louis metropolitan area, including Jefferson County and Illinois. Students who must use public transportation must inform their Program Director.
**Satisfactory/Unsatisfactory (Pass/Fail) Grading**
Undergraduate nursing majors may not take required prerequisite general education or nursing courses on a satisfactory/unsatisfactory basis.

**Credit by Transfer Examination**
Credit may be granted for selected general studies. Please contact an advisor for information.

**Latin Honor Requirements**
In accordance with the University’s Latin Honors policy (p. 26), candidates graduating from the College of Nursing in the 2020-2021 Academic Year must meet the following GPA qualifications:
- Summa Cum Laude: 3.966
- Magna Cum Laude: 3.891
- Cum Laude: 3.751

**Learning Outcomes**
- Integrate into practice theories and evidence-based concepts from nursing, the arts, sciences, and humanities to provide comprehensive nursing care in a variety of settings.
- Integrate clinical reasoning and problem solving in professional practice.
- Administer culturally competent, compassionate, holistic care to promote healthy outcomes for diverse individuals, families, communities, and populations during all life phases.
- Use evidence-based practices to promote health, manage illness, and prevent injury among individuals, families, communities, and populations.
- Utilize communication skills to enhance relationships with patients and families and collaboration among members of the health care team.
- Assume responsibility and accountability for decisions and actions based on professional intrapersonal values, ethical and legal obligations, standards of practice, social justice, and economics.
- Integrate principles of health education, management, leadership, quality care, and patient safety when organizing, coordinating, and engaging in professional practice.
- Demonstrate knowledge of health care policies and finance in a regulatory environment and their influence on health care access and quality.
- Exhibit motivation and self-direction in activities that contribute to lifelong personal, professional, and intellectual development.
- Utilize health care technology and information management systems to promote quality care and patient safety.

**BSN Traditional Full-Time Study Plan**
(for Students Admitted as Freshmen)

Students who were admitted prior to Fall 2018 should follow the plan from the year they were admitted. Four Year plans for each catalog year prior to Fall 2018 can be found in the Archives Section.

### First Year
**Fall**
- ENGL 1100: 3
- MATH 1030: 3
- BIOL 1102: 3
- PSYCH 1003: 3

**Spring**
- NURSE 1050: 3

### Second Year
**Fall**
- BIOL 1141: 4
- MATH 1105: 3
- PSYCH 2268: 3
- NURSE 2000: 3
- EXPLORE: Humanities & Fine Arts: 3

**Spring**
- NURSE 2050: 3

### Third Year
**Fall**
- NURSE 3000: 3
- NURSE 3030: 3
- NURSE 3040: 3

**Spring**
- NURSE 3106: 3

### Fourth Year
**Fall**
- NURSE 3010: 3
- NURSE 4025: 2

**Spring**
- NURSE 3070: 5

PLEASE NOTE: This plan is an example of what an academic plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor. All requirements are subject to change.

**BSN Traditional Part-Time Study Plan**
This plan assumes that a student has completed all prerequisites for admission.

### First Year
**Fall**
- Prerequisite courses added: 54

**Spring**
- NURSE 3111: 3

### Second Year
**Fall**
- NURSE 3101: 4

**Spring**
- NURSE 3020: 4

### Third Year
**Fall**
- NURSE 3205: 4

### Fourth Year
**Fall**
- NURSE 4310: 6
Nursing BSN, Accelerated Curriculum

The UMSL College of Nursing is committed to admitting a diverse group of students who will become nurse leaders responsive to the specific needs of the communities and populations we serve. We value diversity, intellectual discourse and rigor, caring, professionalism, mutual respect and support, innovation, collaboration, and transparency. Applicants will be selected using inclusive and balanced admission criteria that measure their potential in nursing practice, education, research, and scholarship. We measure our success by graduates who become lifelong learners and leaders in their communities and in the profession of nursing.

Applicants to the accelerated nursing clinical program will be holistically reviewed using criteria such as GPA, academic performance in required pre-nursing courses, a personal statement, an essay, extra-curricular activities, honors, award recognitions, leadership roles, and work/volunteer experiences.

Clinical Admission Criteria: Accelerated BSN

Clinical track spaces are limited and are awarded to qualified students on a competitive basis. Only students who submit the required clinical application by the appropriate deadline will be considered. Applicants must meet the following minimum criteria in order to be considered for clinical admission. Please note that meeting the following minimum criteria does not guarantee that a student will earn a clinical space in the Accelerated Option.

- Admission to the University by completing the UMSL Undergraduate Application
- Transcripts from all previous institutions
- A bachelor’s or graduate degree
- Minimum cumulative GPA of 3.25 (including all transferable courses)
- Grade of B- or higher within 5 years of clinical enrollment in the following courses: Chemistry, Anatomy & Physiology I, Anatomy & Physiology II, Microbiology, Human Growth and Development.
- Grade of C- or higher in all prerequisite courses except in the case of the above-listed science courses
- Completion of the Accelerated BSN Program Supplemental Application

Note: Admission criteria are subject to change.

General Education Course Requirements

General Education Course Requirements for Students with a Bachelor’s Degree

Students must have a Bachelor’s Degree or a graduate degree to be admitted to the Accelerated BSN program. Students must also have completed the following courses with a grade of B- or higher within 5 years of clinical enrollment.

Nursing BSN, RN to BSN Curriculum

The UMSL College of Nursing is committed to admitting a diverse group of students who will become nurse leaders responsive to the specific needs of the communities and populations we serve. We value diversity, intellectual discourse and rigor, caring, professionalism, mutual respect and support, innovation, collaboration, and transparency. Applicants will be selected using inclusive and balanced admission criteria that demonstrate their potential in nursing practice, education, research, and scholarship. We measure our success by graduates who become lifelong learners and leaders in their communities and in the profession of nursing.

Applicants to the RN to BSN program will be holistically reviewed using criteria such as GPA, a personal statement, an essay, work/volunteer experiences, professional activities, leadership roles, honors, award recognitions, etc.

Due to higher education regulation changes, the University of Missouri–St. Louis cannot admit students from all states for online programs. Please see the Center for Teaching and Learning for additional information: http://www.umsl.edu/services/ctl/onlinelearning/state_authorization.html

Admissions Criteria

- Admission to the University by completing the UMSL Undergraduate Application
- Graduate of either an accredited diploma or associate degree program in nursing
- Evidence of current RN licensure or eligibility for RN licensure if in the final year of an associate degree program for dual admission applicants
- Cumulative GPA of 2.5 (4.0 scale) on a minimum of 30 transferable credit hours (excluding nursing course work)
- Complete the RN to BSN Nursing Supplemental Application

General Education Course Requirements

Nursing majors must complete all general education requirements (p. 51) of the university as outlined in this Bulletin.

As part of meeting the university’s general education requirements, the prerequisite courses listed under 1) Natural science course work and 2) Behavioral and social science course work must be completed prior to beginning the clinical major. See a curriculum planning guide for specific courses and proper sequencing.

Students must be in residence for at least 24 of the last 30 hours or graded credit (exclusive of courses graded on a satisfactory/unsatisfactory basis), except under unusual circumstances, to be decided by the dean.

1) Natural science course work

| BIOL 1131 | Human Physiology and Anatomy I | 4 |
| BIOL 1141 | Human Physiology and Anatomy II | 4 |
| BIOL 1162 | General Microbiology            | 3 |
| CHEM 1052 | Chemistry for the Health Professions (MOTR CHEM 100) | 4 |

2) Behavioral and social science course work
Learning Outcomes

- Integrate into practice theories and evidence-based concepts from nursing, the arts, sciences, and humanities to provide comprehensive nursing care in a variety of settings.

- Utilize communication skills to enhance relationships with patients and families and collaboration among members of the health care team.
- Assume responsibility and accountability for decisions and actions based on professional intrapersonal values, ethical and legal obligations, standards of practice, social justice, and economics.
- Integrate principles of health education, management, leadership, quality care, and patient safety when organizing, coordinating, and engaging in professional practice.
- Demonstrate knowledge of health care policies and finance in a regulatory environment and their influence on health care access and quality.
- Exhibit motivation and self-direction in activities that contribute to lifelong personal, professional, and intellectual development.
- Utilize health care technology and information management systems to promote quality care and patient safety.

Sample Study Plan

This plan assumes that a student has completed all prerequisites for admission:

General Education and Prerequisites: 50 credit hours

Lower Division Nursing: 39 credit hours

Total Hours: 30

PLEASE NOTE: This plan is an example of what an academic plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor. All requirements are subject to change.

Nursing DNP, Acute Care Pediatric Nurse Practitioner Emphasis

The UMSL College of Nursing is committed to admitting a diverse group of students who will become nurse leaders responsive to the specific needs of the communities and populations we serve. We value diversity, intellectual discourse and rigor, caring, professionalism, mutual respect and support, innovation, collaboration, and transparency. Applicants will be selected using inclusive and balanced admission criteria that measure their potential in nursing practice, education, research, and scholarship.
We measure our success by graduates who become lifelong learners and leaders in their communities and in the profession of nursing.

Applicants to the DNP program will be holistically reviewed using criteria such as GPA, a personal statement, an essay, work/volunteer experiences, professional activities, leadership roles, honors, award recognitions, etc.

Due to higher education regulation changes, the University of Missouri–St. Louis cannot admit students from all states for online programs. Please see the Center for Teaching and Learning for additional information: http://www.umsl.edu/services/ctl/onlinelearning/state_authorization.html

Admission Criteria

BSN to DNP
The post-baccalaureate entry point is designed for registered nurses who have completed a Bachelor’s of Science in Nursing degree and desire to obtain a doctoral degree in nursing practice. The student will develop the knowledge, skills, and expertise to become clinical scholars, clinical experts, and transformational leaders who will function at the highest level of nursing practice.

General Admission Criteria:
- Admission to the University by completing the UMSL Graduate School application
- Completion of College of Nursing supplemental application
- BSN from a nationally accredited nursing program
- BSN 3.0 GPA (calculated on last 60 hours of BSN coursework)
- Current professional licensure
- Completion of an undergraduate general statistics course

Direct Admit BSN to DNP Option
Direct admission to the BSN to DNP program is selective and open to students who have earned a BSN from UMSL or completed the UMSL CON Externship in Nursing Summer program and earned a BSN degree from a nationally accredited nursing program.

Admission Criteria:
Admission to the University by completing the UMSL Graduate School application
- Completion of College of Nursing supplemental application
- BSN from UMSL OR completed the UMSL CON Externship in Nursing Summer Program and earned a BSN degree from a nationally accredited nursing program
- 3.75 GPA in last 60 hours of BSN coursework

Once admitted, students must maintain a 3.0 GPA.

Spaces in the BSN to DNP program are limited and are first awarded to guaranteed applicants. Based on space availability, applications will be accepted until the class is full.

Degree Requirements

Core Content for BSN to DNP program
Completion of the BSN to DNP program has seven program emphasis areas: six Nurse Practitioner emphasis areas and a Leadership in Healthcare Systems emphasis area. All programs include coursework in Foundational Concepts, Clinical Expertise, and Integration of Practice.

Total Hours 14

1 All students must complete a minimum of 8 hours of residency. One credit hour is equivalent to 75 residency hours.

Prior to completion of the DNP program, students will complete a clinical scholarship project that satisfies the graduate school requirement.
Specific Requirements for the Emphasis Area
For all Nurse Practitioner emphasis areas, a student must complete both focus content above and specialty courses based on area of specialty as listed below.

Diagnosis and Management Foundations
NURSE 6723 Foundations of Pediatric Health 3

Diagnosis and Management I
NURSE 6743 Pediatric Health I: Acute and Chronic Care 4

Diagnosis and Management II
NURSE 6745 Pediatric Health II: Complex Acute Care 4

Total Hours 11

Total credit hours in degree program: 70

Learning Outcomes
- Integrate informatics, research, and ethical/legal principles to provide excellence in advanced clinical nursing practice.
- Translate research to improve healthcare delivery and health outcomes.
- Generate strategies for multidisciplinary leadership through analysis of critical indicators and/or healthcare delivery systems to optimize patient care and safety.
- Demonstrate an understanding of strategies to influence health policy-making to improve health outcomes, shape healthcare delivery, and remove barriers to healthcare.
- Evaluate approaches to practice utilizing both nursing theories and other health system theories.

**Learning Outcomes**

- Integrate informatics, research, and ethical/legal principles to provide excellence in advanced clinical nursing practice.
- Translate research to improve healthcare delivery and health outcomes.
- Generate strategies for multidisciplinary leadership through analysis of critical indicators and/or healthcare delivery systems to optimize patient care and safety.
- Demonstrate an understanding of strategies to influence health policy-making to improve health outcomes, shape healthcare delivery, and remove barriers to healthcare.
- Evaluate approaches to practice utilizing both nursing theories and other health system theories.

**Nursing DNP, MSN to DNP Curriculum**

The post master's entry point is designed for graduate-prepared nurses who want to develop the knowledge, skills, and expertise to become clinical scholars, transformational leaders, and function at the highest level of nursing practice while obtaining a terminal degree in nursing practice.

**Admission Criteria**

- Admission to the University by completing the UMSL Graduate School application
- Completion of College of Nursing supplemental application
- MSN from a nationally accredited nursing program
- MSN 3.0 GPA
- Current professional licensure
- Completion of an undergraduate general statistics course or graduate level general statistics course

See the UMSL College of Nursing's website for the application process and specific program deadlines.

Prior to completion of the DNP program, students will complete a clinical scholarship project that satisfies the graduate school requirement.

**Learning Outcomes**

- Integrate informatics, research, and ethical/legal principles to provide excellence in advanced clinical nursing practice.
- Translate research to improve healthcare delivery and health outcomes.
- Generate strategies for multidisciplinary leadership through analysis of critical indicators and/or healthcare delivery systems to optimize patient care and safety.
- Demonstrate an understanding of strategies to influence health policy-making to improve health outcomes, shape healthcare delivery, and remove barriers to healthcare.
- Evaluate approaches to practice utilizing both nursing theories and other health system theories.

**Nursing DNP, Primary Pediatric Nurse Practitioner Emphasis**

The UMSL College of Nursing is committed to admitting a diverse group of students who will become nurse leaders responsive to the specific needs of the communities and populations we serve. We value diversity, intellectual discourse and rigor, caring, professionalism, mutual respect and support, innovation, collaboration, and transparency. Applicants will be selected using inclusive and balanced admission criteria that measure their potential in nursing practice, education, research, and scholarship. We measure our success by graduates who become lifelong learners and leaders in their communities and in the profession of nursing.

Applicants to the DNP program will be holistically reviewed using criteria such as GPA, a personal statement, an essay, work/volunteer experiences, professional activities, leadership roles, honors, award recognitions, etc.

Due to higher education regulation changes, the University of Missouri–St. Louis cannot admit students from all states for online programs. Please see the Center for Teaching and Learning for additional information: http://www.umsl.edu/services/ctl/onlinelearning/state_authorization.html

**Admission Criteria**

**BSN to DNP**

The post-baccalaureate entry point is designed for registered nurses who have completed a Bachelor’s of Science in Nursing degree and desire to obtain a doctoral degree in nursing practice. The student will develop the knowledge, skills, and expertise to become clinical scholars, clinical experts, and transformational leaders who will function at the highest level of nursing practice.

**General Admission Criteria:**

- Admission to the University by completing the UMSL Graduate School application
- Completion of College of Nursing supplemental application
- BSN from a nationally accredited nursing program
- BSN 3.0 GPA (calculated on last 60 hours of BSN coursework)
- Current professional licensure
- Completion of an undergraduate general statistics course

**Direct Admit BSN to DNP Option**

Direct admission to the BSN to DNP program is selective and open to students who have earned a BSN from UMSL or completed the UMSL CON Externship in Nursing Summer program and earned a BSN degree from a nationally accredited nursing program.

**Admission Criteria:**

Admission to the University by completing the UMSL Graduate School application

- Completion of College of Nursing supplemental application
- BSN from UMSL OR completed the UMSL CON Externship in Nursing Summer Program and earned a BSN degree from a nationally accredited nursing program
- 3.75 GPA in last 60 hours of BSN coursework

Once admitted, students must maintain a 3.0 GPA.

Spaces in the BSN to DNP program are limited and are first awarded to guaranteed applicants. Based on space availability, applications will be accepted until the class is full.

**Degree Requirements**

**Core Content for BSN to DNP program**

Completion of the BSN to DNP program has seven program emphasis areas: six Nurse Practitioner emphasis areas and a Leadership in Healthcare Systems emphasis area. All programs include coursework in Foundational Concepts, Clinical Expertise, and Integration of Practice.

¹ All students must complete a minimum of 8 hours of residency. One credit hour is equivalent to 75 residency hours.

Prior to completion of the DNP program, students will complete a clinical scholarship project that satisfies the graduate school requirement.
Specific Requirements for the Emphasis Area
For all Nurse Practitioner emphasis areas, a student must complete both focus content above and as listed below.

Diagnosis and Management Foundations
NURSE 6722 Foundations of Adolescent and Geriatric Health 3

Diagnosis and Management I
NURSE 6739 Adult Health I 4

Diagnosis and Management II
NURSE 6740 Adult Health II 4

Total Hours 11

Total number of hours in degree program: 70

Learning Outcomes
- Integrate informatics, research, and ethical/legal principles to provide excellence in advanced clinical nursing practice.
- Translate research to improve healthcare delivery and health outcomes.
- Generate strategies for multidisciplinary leadership through analysis of critical indicators and/or healthcare delivery systems to optimize patient care and safety.
- Demonstrate an understanding of strategies to influence health policy-making to improve health outcomes, shape healthcare delivery, and remove barriers to healthcare.
- Evaluate approaches to practice utilizing both nursing theories and other health system theories.

Nursing MSN
Effective Fall 2016, The MSN program is no longer accepting applications.

MSN and Post-MSN Program Requirements
- BSN or MSN from a nationally accredited nursing program
- Minimum cumulative grade point average of 3.0 (4.0 scale)
- Current professional licensure with eligibility for Missouri license
- Successful completion of an undergraduate general statistics course
- Successful completion of an undergraduate health assessment course or equivalent
- Two letters of reference regarding the applicant's academic potential (NP option)
- Narrative outlining goals (NP functional role or nurse educator)
- Two years of clinical experience with chosen population are preferred prior to starting clinicals. (NP functional role)
- Computer literacy and access
- Must reside in the United States

Availability of clinical resources may limit the number of applicants accepted to the practitioner options. NURSE 6954 (p. 217) and NURSE 6955 (p. 217). Deadline for fall admission is February 15th.

Degree Requirements
Core Content
Completion of the MSN Nurse Practitioner and Nurse Educator programs require the completion of the following core content for all emphasis areas:

NURSE 6106 Policy, Organization and Financing in Health Care 3
NURSE 6111 Healthcare Systems Concepts and Theory 3
NURSE 6120 Population-Based Foundations of Health 3
NURSE 6130 Research, Interventions and Evidence-Based Practice 3
NURSE 6518 Pathophysiology for Advanced Nursing Practice 3
NURSE 6520 Pharmacology for Advanced Nursing Practice 3
NURSE 6524 Health Assessment For Advanced Nursing Practice 3
NURSE 6530 Clinical Diagnostics for Advanced Nursing Practice 3
NURSE 7443 Healthcare Policy 3

Nursing PhD
Applicants to the Ph.D. program will be holistically reviewed using criteria such as GPA, a personal statement, an essay, work/volunteer experiences, professional activities, leadership roles, honors, award recognitions, etc.

Due to higher education regulation changes, the University of Missouri–St. Louis cannot admit students from all states for online programs. Please see the Center for Teaching and Learning for additional information: http://www.umsl.edu/services/ctl/onlinelearning/state_authorization.html

Admission Criteria
- Admission to the University by completing the UMSL Graduate School Application
- Completion of the College of Nursing supplemental application
- Graduation from a nationally accredited baccalaureate or master's nursing program with 3.25 minimum GPA (4.0 scale)
- Completion of a basic undergraduate statistics course

International applicants must meet minimum requirements on tests of written and spoken English (TOEFL, Minimum iBT score of 79 or better is desired). International students must also apply through the International Student Services Office.

See the UMSL College of Nursing's website for the application process and specific program deadlines.

Degree Requirements
While each program of study is individualized, BSN to Ph.D. students complete a minimum of 60 credit hours of graduate-level course work and an additional 12 credit hours of dissertation, which equal the 72 total credit hours required for the Ph.D. program. MSN to Ph.D. students complete a minimum of 45 post-MSN credit hours and an additional 12 credit hours of
dissertation. These 57 credit hours, in addition to 15 credit hours earned from Master’s level work, equal the 72 credit hours required for a Ph.D.

Nursing Science, Theory, and Discipline of Nursing:

NURSE 6424 Social Determinants of Health 3
NURSE 7200 State of the Science in Nursing Research and Practice 3
NURSE 7403 Development of the Nurse Scientist 3
NURSE 7443 Healthcare Policy 3
NURSE 7481 Development of Nursing Science and Theory 3
NURSE 7491 Advanced Nursing Theory Development and Validation 3

Total Hours 18

Nursing Research Methods:

NURSE 7211 Biostatistics I 3
NURSE 7488 Introduction to Qualitative Research Methodologies and Methods 3
NURSE 7212 Biostatistics II 3
NURSE 7490 Advanced Nursing Research Designs and Methods 3
NURSE 7495 Mixed Methods Research in Health Care 3

Select one of the following: 3
NURSE 7497 Design, Implementation and Evaluation of Health Interventions
NURSE 7213 Biostatistics III - Structural Equation Modeling
NURSE 7496 Seminar in Advanced Qualitative Research Methods

Total Hours 18

Cognates:

All Ph.D. students (BSN to Ph.D. and MSN to Ph.D.) are required to take a minimum of 9 credit hours of cognates in the related area of research. The advisor must approve the cognate to ensure it meets the College of Nursing guidelines.

- OPTOM 8790 External Rotation in Ocular Disease Patient Care

**Category 4 Community**
- OPTOM 8730 Community Service Patient Care Rotation A
- OPTOM 8770 Community Service Patient Care Rotation C

**Category 5 Specialty**
- OPTOM 8800 External Rotation in Pediatric/ Binocular Vision Patient Care
- OPTOM 8810 External Rotation in Contact Lens Patient Care
- OPTOM 8811 External Rotation in Ophthalmic Surgical Patient Care
- OPTOM 8812 External Rotation in Geriatric Patient Care
- OPTOM 8813 External Rotation in Ophthalmic Sports Vision
- OPTOM 8814 External Rotation in Primary Care
- OPTOM 8815 External Rotation in Pathology and Treatment
- OPTOM 8816 External Rotation in Ophthalmic Laser Treatment
- OPTOM 8817 External Rotation in Rehabilitative Patient Care
- OPTOM 8820 External Rotation in Low Vision Patient Care

**Category 6 Elective**
- OPTOM 8830 External Rotation in General Patient Care
- OPTOM 8840 External Supplementary Rotation in General Patient Care

1 Must enroll in OPTOM 8700, OPTOM 8710 and OPTOM 8720 concurrently.

Organizational Leadership BA

The Organizational Leadership major is designed to provide adult students with the knowledge, skills, and credentials necessary to advance in a rapidly changing workplace. This program will help students understand theoretical and practical aspects of leadership across disciplines, while allowing them to focus on a specific Area of Concentration that interests them.

This program is most appropriate for students who have completed at least 40 transferable credit hours at the undergraduate level or have been awarded an A.A. or A.S. degree (or A.A.S. degree with a general education emphasis).

General Education Requirements

Majors must satisfy the university and college general education requirements (p. 51). The foreign language requirement for a B.A. must also be satisfied.

Total Hours 33

Students Seeking a B.A. in Organizational Leadership must complete one of the following areas of concentration:

A. Business Management
   MGMT 3611 Advanced Management and Organizational Behavior 3
   MGMT 3612 Professional Skills Development 3
   MGMT 3625 Leadership in Organization 3
   Total Hours 9

B. Community Studies
   SOC 1040 Social Problems 3
   SOC 2302 The City 3
   SOC 2160 Social Psychology 3
   Total Hours 9

C. Corporate Communication
   COMM 1150 Introduction to Public Relations 3
   COMM 3150 Crisis, Disaster, and Risk Communication 3
   COMM 3370 Social Media in Public Relations 3
   Total Hours 9

D. Criminal Justice
   CRIMIN 1100 Introduction to Criminology and Criminal Justice 3
   CRIMIN 2240 Policing 3
   CRIMIN 2250 Courts 3
   Total Hours 9

E. Health Communication
   COMM 1369 Introduction to Health Communication 3
   COMM 3150 Crisis, Disaster, and Risk Communication 3
   COMM 3368 Advanced Health Communication 3
   COMM 3368 Advanced Health Communication 3
   Total Hours 15

F. Information Systems
   INFSYS 2800 Information Systems Concepts and Applications 3
   INFSYS 3841 Enterprise Information Systems 3
   INFSYS 3842 Data Networks and Security 3
   Total Hours 9
Supply Chain Management

</tbody>
</table>

Total Hours 9

1 These courses carry a prerequisite of MATH 1105 or higher.

Individual courses may be substituted with the approval of the program adviser.

Each concentration area is designed such that the completion of 2-3 additional elective courses could lead to the completion of a minor or certificate in that field.

Additional areas of concentration (9-hour course sequence) can be designed to suit an individual student’s personal or professional needs. These concentrations must be approved by the program adviser.

All required courses for the major must be completed with a grade of C- or better. Courses counting toward the major requirements may not be taken on a satisfactory/unsatisfactory basis. The minimum number of hours required for the B.A. degree is 39 (30 core, 9 concentration).

Learning Outcomes

Upon completion of the program, graduates will be able to:

- Articulate a personal leadership style and evaluate her/his own performance for self-improvement
- Demonstrate an understanding of organizational leadership theory as it relates to individuals, communities and wider societies
- Communicate effectively with a variety of audiences in written, oral and non-verbal mediums
- Demonstrate critical thinking and problem solving abilities regarding organizational challenges within the chosen area of concentration
- Use tools specific to the area of concentration to manage systems and organizational resources
- Demonstrate an understanding of the ethical principles underlying effective organizational leadership
- Lead teams in the development of innovative solutions to organizational challenges and opportunities within the chosen area of concentration

Philosophy BA

Philosophy is about hard questions: Are we free? Is there a God? What is knowledge? What should I do with my life? In addressing these questions, philosophy develops your skills in thinking, analysis, writing, argumentation and critical reading. Studying philosophy makes you more open-minded: you’ll encounter the ideas of people that have lived lives very different from yours, and you’ll be impressed by them. Philosophy is enormously interesting and rewarding. If anyone ever asks you “why study philosophy” you’ll answer “why haven’t you started yet?”

The undergraduate major in philosophy requires 30 hours of philosophy coursework. Candidates for the B.A. degree may take any foreign language to meet the foreign language requirement. Students who double major with a B.A. in Philosophy and a B.S. degree in Biology, Biochemistry and Biotechnology, Chemistry, Computer Science, Mathematics, or Physics may waive the foreign language requirement. Physics may waive the foreign language requirement. A minimum of 18 hours in Philosophy must be taken from the UMSL Department of Philosophy. Courses above the 3000-level taken elsewhere do not count toward the major. Philosophy majors must complete all required courses (under Course Requirements) with a grade of “C-” or higher and maintain a 2.0 GPA for all their Philosophy coursework.

General Education Requirements

Majors must meet the university and college general education requirements. Candidates for the B.A. degree may take any foreign language to meet the foreign language requirement. Students who double major with a B.A. in Philosophy and a B.S. degree in Biology, Biochemistry and Biotechnology, Chemistry, Computer Science, Mathematics, or Physics may waive the foreign language requirement.

Course Requirements

History of Philosophy

Select one of the following: 3

- PHIL 1110 Western Philosophy I: Antiquity to the Renaissance
- PHIL 3301 Ancient Philosophy
- PHIL 3302 Medieval Philosophy

And one of the following: 3

- PHIL 1111 Western Philosophy II: Descartes to the Present
- PHIL 3303 Early Modern Philosophy
- PHIL 3304 19th and 20th Century Philosophy

Logic

Select one of the following: 3

- PHIL 1160 Critical Thinking (MOTR PHIL 101)
- PHIL 3360 Formal Logic

Normative Philosophy

Select one of the following: 3

- PHIL 1030 Present Moral Problems
- PHIL 1130 Approaches to Ethics (MOTR PHIL 102)
- PHIL 4430 Social and Political Philosophy
- PHIL 4435 Classical Ethical Theory
- PHIL 4438 Recent Ethical Theory

Junior Level Requirement

Select one of the following: 3

- Any 3000 level Philosophy course not used to satisfy a requirement above, excluding PHIL 3320

Metaphysics and Epistemology Requirement

Select one of the following: 3

- PHIL 3340 Knowledge and Reality
- PHIL 4440 Theories of Knowledge
- PHIL 4445 Metaphysics

Senior Capstone Requirement

Select any 4000 level Philosophy course, excluding PHIL 4458 and PHIL 4465, that has not been used to satisfy a requirement above

Elective Hours 9

Total Hours 30
Departmental Honors

Majors with a 3.2 or higher grade point average in all courses may, with
the department’s consent, earn departmental honors by:

1. Taking Introduction to Formal Logic;
2. Completing at least 3 hours of PHIL 4450, Special Readings in
   Philosophy;
3. Submitting an acceptable thesis before the end of the senior year.

Learning Outcomes

Upon completion of the program, graduates will be able to:

- Recall a broad range of philosophers and philosophies in both western
  and non-western traditions and understand their interrelations and
  historical significance
- Demonstrate an ability to read and engage critically with historical and
  contemporary philosophical texts
- Demonstrate an ability to apply the distinctive methods of philosophy
  by reconstructing philosophical arguments and deliberating rationally
  over their merits
- Understand fundamental moral theories and demonstrate an ability to
  apply them to ethical problems and practical pursuits
- Demonstrate competence with formal reasoning tools such as
  syllogistic logic, propositional logic, quantificational logic, or probability
  theory and show an ability to apply those to tools in philosophical and
  everyday contexts
- Apply philosophical concepts, analytical skills, and critical thinking to
  disciplines and issues outside of philosophy
- Create and defend their own philosophical views, both by writing in a
  clear and persuasive style and in oral discussion with other students,
  faculty and members of the community
- Apply research skills, including an ability to work with primary and
  secondary literature, in writing argumentative philosophical papers in a
  chosen area of advanced study

Total Hours: 120

Philosophy BA/MA Dual Degree Program

Requirements

The Combined B.A./M.A. Program in Philosophy provides an opportunity
for students of recognized academic ability and educational maturity to
fulfill integrated requirements of undergraduate and master’s degree
programs in three years from the beginning of their junior year. When all
the requirements of the B.A./M.A. program have been completed, students
will be awarded both the B.A. and M.A. degrees. With a carefully designed
program, a student can earn both degrees within as few as ten semesters.

The Combined Program requires a minimum of 138 university credit hours,
of which at least 30 must be at the upper division level course numbers
in the 4000-5999 range (excluding PHIL 5495). In qualifying for the B.A.,
students must meet all university and college requirements, including
all the requirements of the regular undergraduate major in philosophy
described above. Students will normally take PHIL 3360: Formal Logic
and two courses in the 3301-3307: History of Philosophy sequence in
their junior years, along with electives. Any courses still needed to satisfy
college foreign language and expository writing requirements would
also be taken during this year. The Senior Capstone Requirement and
more specialized courses are taken in the senior year. In the fifth year,
students take advanced electives and such required courses as are
needed to fulfill remaining university, Graduate School, and departmental
requirements for the M.A. This includes satisfactory completion of 30
graduate credit hours, at least 18 of which must be in courses numbered
above 5000 and among which must be at least three in each of the four
subject areas listed for the regular M.A. program, and one of which must
be PHIL 5400: Proseminar in Philosophy. Up to 12 graduate credit hours
may be applied simultaneously to both the B.A. and M.A. requirements.
In addition to the above coursework, students must also write a thesis,
in which case at least three hours must be taken in PHIL 5495. Students
should apply to the Graduate Committee for admission to the Combined
B.A./M.A. Program in Philosophy the semester they will complete sixty
undergraduate credit hours or as soon thereafter as possible. It is also
recommended that students complete the foreign language requirement
and the junior-level writing requirement before

Students should apply to the Graduate Committee for admission to
the Combined B.A./M.A. Program in Philosophy the semester they will
complete sixty undergraduate credit hours or as soon thereafter as
possible. It is also recommended that students complete the foreign
language requirement and the junior-level writing requirement before
applying. A cumulative grade point average of 3.0 or higher and three letters of recommendation from faculty are required for consideration.

Students will be admitted to the Combined Program under provisional status until they have completed fifteen credit hours in it with a grade point average of 3.0 or higher. After the completion of the provisional period, and with the recommendation of the Graduate Committee, students can be granted full admission into the program. Students must maintain a grade point average of 3.0 or higher throughout the Combined Program. Students who officially withdraw from the Combined Program who have successfully completed all the requirements for the B.A. degrees will be awarded the B.A. degree.

Philosophy Requirements for Students in the 2+3 Program

1. To be taken in the junior year (after 60 credits completed):
   Select four courses (12 credit hours) from the following:
   a. PHIL 3360: Formal Logic
   b. Two courses in the History of Philosophy, each at the 2000 level or above.
   c. One additional Philosophy course, at the 2000 level or above.

2. To be taken in the senior year (after 90 credits completed):
   PHIL 4445 Metaphysics
   or PHIL 4440 Theories of Knowledge
   Two History courses, each at the upper division
   One course from the PHIL 4470-PHIL 4487 sequence
   Select one of the following:
   PHIL 4430 Social and Political Philosophy
   PHIL 4435 Classical Ethical Theory
   PHIL 4438 Recent Ethical Theory

Total Hours 15

3. Graduate level courses to be taken in the final year of the program (after 90+ credits completed):
   Six courses (18 credit hours)
   a. At least five of these courses must be at or above the 5000 level.
   b. Courses must be selected so that the student has taken at least one and preferably two courses from each of the four subject areas in the course of completing the 2 + 3 program:
      • Value Theory
      • History of Philosophy
      • Logic/Philosophy of Science
      • Epistemology/Metaphysics
   c. PHIL 5400: Proseminar in Philosophy

Philosophy MA

To earn a M.A. in philosophy, students must complete at least 30 hours of graduate-level course work. In addition, students must write a thesis, for which they must take three to six credit hours of Thesis Research. Entering students must demonstrate a competence in logic, either by having passed the relevant course prior to admission or by taking PHIL 5561: Graduate Formal Logic here at UMSL. Students should take PHIL 5400: Proseminar in Philosophy in the first year of residency. At least two-thirds of the course work must be completed in residence at UMSL. In addition, the courses taken are subject to two distribution requirements:

1. At least half of the courses must be at the 5000 level.
2. Two courses (6 credit hours) must be chosen from each of the following four subject areas:
   • Value Theory
   • History of Philosophy
   • Logic/Philosophy of Science
   • Epistemology/Metaphysics

Cooperative arrangement with Saint Louis University

The strengths of the UMSL Department of Philosophy are complemented by those of the Saint Louis University Philosophy Department, which has strengths in the history of philosophy as well as in philosophy of religion. To enhance students' opportunities for instruction and expertise, the two departments have worked out a cooperative arrangement that permits graduate philosophy students on each campus to take up to four courses at the partner institution. In any given semester, UMSL graduate students must take at least half of their courses at their home institution. Students admitted to the M.A. program on a probationary basis must take all their courses at UMSL during their first semester.

Expected Learning Outcomes

- Acquire advanced knowledge of traditional philosophical issues in the western tradition.
- Develop critical thinking skills based on knowledge of the standards governing logical reasoning.
- Acquire familiarity with philosophical issues that arise in some other disciplines (e.g. biology, art, education, etc.).
- Acquire a basic understanding of ethical principles and their role in resolving ethical disputes.
- Acquire the knowledge and skills required to write a paper identifying a philosophical issue and presenting arguments supporting a thesis for resolving it.

Philosophy Minor

Requirements

The undergraduate minor in philosophy requires any five philosophy courses, at least three of which must be taken at the 3000 level or higher. Students with particular interests are encouraged to use the tracks above to organize their minor. At least 6 hours of course work for the minor at the 2000 level or higher must be taken in residence in the UMSL Department of Philosophy.

A GPA of 2.0 or better is required in courses presented for the minor. Prospective minors are encouraged to consult with members of the department for advice in planning an appropriate sequence of courses.

Learning Outcomes

An ideal graduate with a Minor in Philosophy will:

- Be familiar with a range of philosophers and philosophies and understand their interrelations and historical significance.
- Demonstrate an ability to read and engage critically with historical and contemporary philosophical texts.
- Demonstrate an ability to apply the distinctive methods of philosophy by reconstructing philosophical arguments and deliberating rationally over their merits.
• Apply conceptual understanding and critical thinking in writing argumentative essay in a clear and persuasive style in some chosen area of advanced study

**Philosophy of Science and Technology Minor**

The Minor in Philosophy of Science and Technology (PST) is an interdisciplinary program requiring a minimum of 18 credits in PST.

All required courses must be completed with a “C” or higher. The satisfactory/unsatisfactory option may not be used. No transfer courses may be used towards the PST Minor. A minimum of 12 hours must be taken at 2000 and above with 9 of those hours being at 3000 or above. Courses in the upper division may satisfy requirements for the student’s major, consistently with the major’s requirements.

**Requirements**

**Math**

Select one of the following courses in either statistics or calculus: 3

- BIOL 4122: Biometry
- ECON 3100: Economic Data and Statistics
- MATH 1320: Introduction to Probability and Statistics
- MATH 1800: Analytic Geometry and Calculus I
- PSYCH 2201: Psychological Statistics
- SOC 3220: Quantitative Data Analysis in Social Science Research

**Logic and Methodology**

Select one of the following courses in either logic or methodology: 3-4

- ANTHRO 4310: Laboratory Methods in Archaeology
- HIST 3199: Introduction to Historical Inquiry
- PHIL 3360: Formal Logic
- PHIL 4460: Advanced Formal Logic
- PSYCH 2219: Research Methods in Psychological Science
- SOC 3230: Research Methods

**Philosophy**

PHIL 3380: Philosophy of Science 3

Select one of the following in the philosophy of science and technology: 3

- PHIL 2280: Minds, Brains, and Machines
- PHIL 3380: Philosophy of Science
- PHIL 4452: Feminism And Science
- PHIL 4479: Philosophy of Cognitive Science
- PHIL 4480: Topics in Philosophy of Science
- PHIL 4482: Philosophy Of Social Science
- PHIL 4483: Topics In History And Philosophy Of Science

**Science**

Select 6 credit in the mathematical, physical, life, behavioral, or social sciences. 1

</tbody>
</table>

**Total Hours** 18-19

1 The science courses must be in addition to those satisfying the Gen Ed requirements and conditional upon their acceptance by the PST undergraduate advisor.

**Prerequisites**

Some courses required by the Minor in PST have prerequisites. Some students may satisfy prerequisites by virtue of their prior curriculum. When this is not the case, students are responsible for either satisfying the prerequisites by adding courses to their curriculum or obtaining a waiver from the instructor.

**Physical Education BSEd PK-12 Emphasis**

Through this degree teacher candidates are prepared to effectively teach health and physical education in K-12 settings. The requirements are listed below.

**Degree Requirements**

B.S.Ed. degree candidates must complete the following General Education courses required by the College of Education and the Missouri Department of Elementary and Secondary Education.

**General Education and University Requirements:**

**CORE AREAS:**

**First Year Writing**

<table>

**Program Requirements**

Beginning with those students graduating in May, 2017 and receiving teacher certification, the Missouri Department of Elementary and Secondary Education requires a 3.0 GPA in professional education courses, a 3.0 GPA in the teaching content field, and a 2.75 overall GPA.

Professional Education courses must be completed with a grade of C or better (a grade of C- or below is unacceptable).

Students must pass the required DESE certification assessments to receive the B.S.Ed. degree.

B.S.Ed. and B.A. degrees with certification candidates must complete the following:

**Introduction to Education**

<table>

<td>3</td>
</tr>
</tbody>
</table>

**Total Hours**

Minimum 124 hours

**Learning Outcomes**

Upon completion of the program, graduates will be able to:

- Design learning experiences appropriate for curriculum goals and relevant to learners based on principles of effective instruction.
- Demonstrate professional dispositions and culturally and linguistically responsive strategies to engage all learners, recognizing inequalities in educational opportunity.
- Construct a curriculum that demonstrates the knowledge and disposition to differentiate instruction and adapt instruction for diverse student needs including accommodations and/or modifications for student exceptionalities and specialized needs.
- Design instruction that integrates technology, and varied formative and summative assessment tools to inform practice.
- Critically examine professional practice through systematic, reflective inquiry that can improve learning opportunities for all students.
- Utilize character and citizenship education principles in decision-making and classroom management.
- Practice ethics of the profession of teaching to increase resilience through engaged dialogue with colleagues.
Physics BA

Physicists investigate fundamental nature of the forces and particles, and the resultant states of matter, that make up the physical world. The Department of Physics and Astronomy at UMSL provides undergraduates with a broad-based education in the fundamental concepts of physics and the experimental and theoretical skills essential to practicing scientists. The BA degree offers students an opportunity to combine the rigorous study of physics with additional studies of languages and the liberal arts. This degree is an ideal preparation for a career that combines science with other fields, such as science journalism, science policy, or patent law.

General Education Requirements

Majors must complete the university and college general education requirements (p. 51). Any of the following courses may be used to satisfy the physical science requirement:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ASTRON 1001</td>
<td>Cosmic Evolution Introductory Astronomy</td>

</tbody>
</table>

Declaring the Physics Major

Students seeking to major in physics are first designated as ‘pre-physics majors’ until they have completed both PHYSICS 2111 and PHYSICS 2112 or equivalent courses. Upon successful completion of PHYSICS 2111 and PHYSICS 2112 with grades of C- or better, students will be allowed to declare physics as their major. Each of these courses must be completed successfully within two attempts.

Degree Requirements

All physics majors in all programs must complete the physics core curriculum with the exception that majors pursuing the Physics Education option are not required to take PHYSICS 1099 and CMP SCI 1250. In addition to the core courses, each individual program has its own specific requirements. Required Physics, Mathematics, Chemistry, Biology, and Computer Science courses for a major or minor in physics may not be taken on a satisfactory/unsatisfactory grading basis.

Core Curriculum

The following physics courses are required:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYSICS 1099</td>
<td>Windows on Physics</td>
<td>2</td>
</tr>

<td>Introductory Chemistry I (MOTR CHEM 150L)</td>
<td>3</td>
</tr>
<tr>
<td>CMP SCI 1250</td>
<td>Introduction to Computing</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Hours: 49

Note: Students are urged to begin the calculus sequence [MATH 1800, Analytic Geometry and Calculus I] as soon as possible to avoid delays in graduation.

Students with experience in digital computer programming may be excused from CMP SCI 1250.

Bachelor of Arts in Physics

The B.A. program is tailored to students wishing to preserve the option for specialization in graduate school without sacrificing the advantages of a liberal arts education. In addition to the core curriculum, including the foreign language requirement, at least three electives at the 3000 or 4000 levels must be completed. It is recommended that at least one of these three electives include ASTRON 4322, PHYSICS 4311, or PHYSICS 4347 for the required capstone course. The Department of Physics and Astronomy will accept the three-course sequence in American Sign Language as a substitution for the foreign language requirement for the degree. At least 31 hours of physics courses, but no more than 45 hours, are required.

B.S. Ed. in Secondary Education with Emphasis in Physics

The B.S. Ed. is a professional education degree designed for students who wish to pursue a teaching career in secondary schools. Much of the discipline-specific coursework parallels the B.A. or B.S. degree in the discipline; however, the Missouri Department of Elementary and Secondary Education (DESE) requires specific coursework for teacher certification. Therefore, students interested in the B.S. Ed. should contact the advising office (OASIS) 314-516-5937 in the College of Education for discipline-specific requirements. Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.
B.A. or B.S. in Physics with Master’s Level Coursework for Secondary Teacher Certification

In addition to the B.S. Ed., students may opt to complete a B.A. or B.S. degree in their discipline as an undergraduate, followed by admission to the Graduate School for Master’s level teaching certification. The College of Education has a one-year accelerated program for post-graduate certification called Teach in 12, or students can choose a traditional path to certification. Graduate coursework for certification can apply towards a Master’s Degree in Secondary Education, with additional coursework. Students interested in Master’s Level teacher certification should contact the advising office (OASIS) 314-516-5937 in the College of Education.

Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

Program Purpose

The purpose of the B.A. in Physics program at the University of Missouri at St. Louis is to prepare students for a professional career and/or graduate or professional studies in a field that combines the physical sciences with aspects of the humanities or other professions, such as science advocacy, science policy, patent law, or science journalism.

Learning Outcomes

- Students will be able to demonstrate an of basic physics concepts including classical mechanics, electricity and magnetism, and modern physics
- Students will demonstrate proficiency in a foreign language
- Students will be able to demonstrate an understanding several advanced undergraduate areas of physics/astronomy, such as observational astrophysics, biophysics, quantum mechanics, or experimental design
- Students will be skilled in problem-solving, critical thinking and analytical reasoning as applied to scientific problems
- Students will be proficient in both written and oral communication of the results of scientific work
- Students will have the skills necessary for conducting original scientific research as part of an interdisciplinary problem-solving team
- Students will have the skills necessary to identify possible errors in scientific data, and to assess the significance of observed results

Total Hours: 120-122

1 INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

Please Note: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Physics BS, Astrophysics Emphasis

The study of astrophysics aims to understand the universe and everything within it in terms of the fundamental nature of forces and particles. The Department of Physics and Astronomy at UMSL is devoted to providing undergraduates with a broad-based education in astrophysics with the experimental, observational, and theoretical skills essential to practicing astronomers and astrophysicists. Undergraduate education in astrophysics prepares students for both graduate study and professional careers in astronomy, atmospheric science, image processing, cosmology, and instrumentation.

General Education Requirements

Majors must complete the university and college general education requirements (p. 51). Any of the following courses may be used to satisfy the physical science requirement:

- ASTRON 1001 Cosmic Evolution Introductory Astronomy
- ASTRON 1011 Planets and Life in the Universe
- ASTRON 1012 The Violent Universe and the New Astronomy
- ASTRON 1050 Introduction to Astronomy I (MOTR ASTR 100)
- ASTRON 1051 Introduction to Astronomy II
- ATM SCI 1001 Elementary Meteorology
GEOL 1001  General Geology  3

Declaring the Physics Major

Students seeking to major in physics are first designated as 'pre-physics majors' until they have completed both PHYSICS 2111 and PHYSICS 2112 or equivalent courses. Upon successful completion of PHYSICS 2111 and PHYSICS 2112 with grades of C- or better, students will be allowed to declare physics as their major. Each of these courses must be completed successfully within two attempts.

Degree Requirements

All physics majors in all programs must complete the physics core curriculum with the exception that majors pursuing the Physics Education option are not required to take PHYSICS 1099 and CMP SCI 1250. In addition to the core courses, each individual program has its own specific requirements. Required Physics, Mathematics, Chemistry, Biology, and Computer Science courses for a major or minor in physics may not be taken on a satisfactory/unsatisfactory grading basis.

Core Curriculum

The following physics courses are required:  23

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYSICS 1099</td>
<td>Windows on Physics</td>
<td>3</td>
</tr>

</tr>
</tbody>
</table>

Total Hours  49

Note: Students are urged to begin the calculus sequence [MATH 1800, Analytic Geometry and Calculus I] as soon as possible to avoid delays in graduation.

Students with experience in digital computer programming may be excused from CMP SCI 1250.

Astrophysics Option

Students who have interests in the aerospace sciences or anticipate graduate studies in astrophysics may elect this option. At least 48 hours must be taken. In addition to the core curriculum, the following physics courses are required:

Physics

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

Total Hours  31

1 With consent of the astronomy adviser, there may be substitution of ASTRON 1001, ASTRON 1011 or ASTRON 1012 for ASTRON 1050 or ASTRON 1051.

Program Purpose

The purpose of the B.S. in Physics (Astrophysics Option) program at the University of Missouri at St. Louis is to prepare students for a professional career in astrophysics or a related field, or for graduate studies in astrophysics.

Learning Outcomes

- Students will be able to demonstrate an understanding of basic physics concepts including classical mechanics, electricity and magnetism, thermal and statistical physics, modern optics, and quantum mechanics
- Students will be able to demonstrate an understanding of basic principles and concepts of modern astrophysics and observational astronomy
- Students will be able to perform astronomical observations, reduce and critically interpret their data
- Students will be skilled in problem-solving, critical thinking and analytical reasoning as applied to scientific problems
- Students will be proficient in both written and oral communication of the results of scientific work
- Students will have the skills necessary for conducting original scientific research as part of a problem-solving team
- Students will have the skills necessary to identify possible errors in scientific data, and to assess the significance of observed results
The study of astrophysics aims to understand the universe and everything within it in terms of the fundamental nature of forces and particles. The Department of Physics and Astronomy at UMSL is devoted to providing undergraduates with a broad-based education in astrophysics with the experimental, observational, and theoretical skills essential to practicing astronomers and astrophysicists. Undergraduate education in astrophysics prepares students for both graduate study and professional careers in astronomy, atmospheric science, image processing, cosmology, and instrumentation.
Learning Outcomes

- Students will have an understanding of basic biological concepts, from organ systems to biochemistry
- Students will have an understanding of the basic concepts of biophysics, and the various areas of interdisciplinary science where biophysics concepts and techniques are applicable
- Students will be skilled in problem-solving, critical thinking and analytical reasoning as applied to scientific problems
- Students will be proficient in both written and oral communication of the results of scientific work
- Students will have the skills necessary for conducting original scientific research as part of an interdisciplinary problem-solving team
- Students will have the skills necessary to identify possible errors in scientific data, and to assess the significance of observed results

Note: Students are urged to begin the calculus sequence [MATH 1800, Analytic Geometry and Calculus I] as soon as possible to avoid delays in graduation.

Students with experience in digital computer programming may be excused from CMP SCI 1250.

### Biophysics Option

This option is designed for students who are interested in careers in various medical fields or biophysics. This option provides a strong preparation in physics, mathematics, chemistry, and biology for students who intend to apply for admission to medical schools. At least 41 hours of physics and biology combined, but no more than 51, are required. In addition to the core curriculum, the following physics and biology courses are required:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYSICS 4310</td>
<td>Modern Electronics</td>
<td>3</td>
</tr>
<tr>

<td>3</td>
</tr>
</tbody>
</table>

**Total Hours:** 36

### Program Purpose

The purpose of the B.S. in Physics (Biophysics Emphasis) program at the University of Missouri at St. Louis is to prepare students for a professional career in biophysics, biological physics, or a related interdisciplinary field, for graduate studies in in biophysics, biological physics, or a related interdisciplinary field, for training as a medical physicist, or for professional training such as medical school.

1 **INTDSC 1003** is required only for first-time freshmen and transfer students with less than 24 college credits.

Please Note: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are
encouraged to meet with their advisor each semester. All requirements are subject to change.

Physics BS, Engineering Physics Emphasis

Physicists strive to understand the fundamental nature of the forces and particles, and the resultant states of matter, that make up the physical world. Our Engineering Physics degree provides a grounding in this approach with an added emphasis on practical applications. The Department of Physics and Astronomy at UMSL provides a broad-based education in the fundamental concepts of engineering physics, with the experimental and theoretical skills essential to practicing scientists. Undergraduate education in physics prepares students for both graduate study and a wide variety of professional careers in fields such as physics and engineering.

General Education Requirements

 Majors must complete the university and college general education requirements (p. 51). Any of the following courses may be used to satisfy the physical science requirement:

<table>
<thead>
<tr>

B.S. Ed. in Secondary Education with Emphasis in Physics

The B.S. Ed. is a professional education degree designed for students who wish to pursue a teaching career in secondary schools. Much of the discipline-specific coursework parallels the B.A. or B.S. degree in the discipline; however, the Missouri Department of Elementary and Secondary Education (DESE) requires specific coursework for teacher certification. Therefore, students interested in the B.S. Ed. should contact the advising office (OASIS) 314-516-5937 in the College of Education for certification.  Therefore, students interested in the B.S. Ed. should contact the advising office (OASIS) 314-516-5937 in the College of Education for discipline-specific requirements. Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

B.A. or B.S. in Physics with Master’s Level Coursework for Secondary Teacher Certification

In addition to the B.S. Ed., students may opt to complete a B.A. or B.S. degree in their discipline as an undergraduate, followed by admission to the Graduate School for Master’s level teaching certification. The College of Education has a one-year accelerated program for post-graduate certification called Teach in 12, or students can choose a traditional path to certification. Graduate coursework for certification can apply towards a Master’s Degree in Secondary Education, with additional coursework. Students interested in Master’s Level teacher certification should contact the advising office (OASIS) 314-516-5937 in the College of Education. Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

Program Purpose

The purpose of the B.S. in Physics (General Physics Option) program at the University of Missouri at St. Louis is to prepare students for a
Learning Outcomes

- Students will be able to demonstrate an understanding of basic physics concepts including classical mechanics, electricity and magnetism, thermal and statistical physics, quantum mechanics, and modern electronics.
- Students will be able to design and perform basic physics experiments, assess the significance of their results, and interpret the observed outcomes.
- Students will be able to demonstrate an understanding of some areas of the most recent physics research, such as advances in materials physics or nanoscience.
- Students will be skilled in problem-solving, critical thinking and analytical reasoning as applied to scientific problems.
- Students will have the skills necessary to identify possible errors in scientific data, and to assess the significance of observed results.

Total Hours: 123

1. INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.
2. This General Education course must also fulfill the Cultural Diversity Requirement.

Please Note: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Physics Minor

Students may complete a minor in physics with the flexibility of emphasis on classical physics, modern physics, or a combination of the two areas. The following physics courses are required:

- PHYSICS 1099 Windows on Physics 1
- PHYSICS 2111 Physics: Mechanics and Heat 4
- PHYSICS 2112 Physics: Electricity, Magnetism, and Optics 4
- PHYSICS 3200 Mathematical Methods of Theoretical Physics 3

Select two additional emphasis courses from the following: 6

- PHYSICS 3221 Mechanics
- PHYSICS 3223 Electricity and Magnetism
- PHYSICS 3231 Introduction to Modern Physics I
- PHYSICS 4310 Modern Electronics

Total Hours: 18

A GPA of at least 2.0 is required in courses presented for a minor. It is required that a student completes a minimum of 6 hours of graded work in 2000 level or above courses on the UMSL campus.

Program Purpose

The purpose of the Minor in Physics at the University of Missouri at St. Louis is to provide students with a core knowledge of physics concepts to complement their major degree program.

Learning Outcomes

- Students will be able to demonstrate an understanding of basic physics concepts such as classical mechanics, electricity and magnetism, modern physics, and modern electronics.
- Students will be skilled in problem-solving, critical thinking and analytical reasoning as applied to scientific problems.
- Students will have the skills necessary to identify possible errors in scientific data, and to assess the significance of observed results.
Physics MS

Admission Requirements
The Department requires applicants to have adequate backgrounds in such areas as mechanics, thermodynamics, electromagnetism, optics, electronics, and modern physics. Students admitted to the program with deficiencies in these areas are required to take appropriate undergraduate courses. If necessary, a remedial program is determined in consultation with the department graduate studies director at the time of application for admission.

Degree Requirements
A student must complete 30 credit hours in graduate physics courses with at least 15 of these at the 5000 or 6000 level. Writing a thesis is optional. A maximum of six (3) credit hours of Research, PHYSICS 6490, may be counted toward the minimum 15 hours with (or without) the thesis option. Students must pass a comprehensive examination, which includes a defense of the thesis for students who have chosen to write one. A grade point average of 3.0 must be maintained during each academic year. Students must complete their degree program within 130 percent of the semester hour requirements for the degree. The requirements must be fulfilled within six years from the time of admission. Two-thirds of required graduate credit must be taken in residence. There is no foreign language requirement.

Physics PhD

Admission Requirements
The Department requires applicants to have adequate backgrounds in such areas as mechanics, thermodynamics, electromagnetism, optics, electronics, and modern physics. Students admitted to the program with deficiencies in these areas are required to take appropriate undergraduate courses. If necessary, a remedial program is determined in consultation with the department graduate studies director at the time of application for admission.

Degree Requirements
Students must complete a minimum of 48 hours past the master's degree with satisfactory performance. The university has a residency requirement of three years/six semesters (for those with master's degree, two years/four semesters) at UMSL and/or Missouri S&T. The Ph.D. qualifying exam, dissertation, and dissertation exam are administered in cooperation with Missouri S&T. All graduate work requires B grades or better. The dissertation may be written in absentia, and there is no foreign language requirement.

Policy and Program Evaluation Graduate Certificate
The Graduate Certificate in Policy and Program Evaluation (PPE) provides students the opportunity to gain expertise in policy and program evaluation methods, including completion of an applied evaluation project. In addition to the public and nonprofit sectors, the certificate is appropriate for individuals in disciplines such as criminology, education, economics, gerontology, social work, and sociology who need to conduct assessments of the programs for which they are responsible.

Requirements
This program consists of a six-course sequence (18 credits): 5 required courses (15 credits) and 1 elective (3 credits). The Certificate may be taken by non-degree students or in conjunction with 1) the Master's in Public Policy Administration degree program; 2) the Master's in Social Work/Master's in Gerontology degree programs; or 3) the Master's in Economics.

Students with sufficient job experience in program/policy evaluation may submit a written request to waive the Applied Evaluation Project requirement. If granted, this requirement will be replaced with a three-credit elective.

Students pursuing a graduate degree along with the certificate should check with their graduate advisor regarding which courses will also count towards their degree.

A maximum of two courses at the 4000 level can count towards the Certificate.

At least 12 of the 18 credits must be taken in residence at UMSL.

Pol Sci 6403 Advanced Techniques in Policy Research
Pol Sci 6404 Multi-Method Research Design

Total Hours 18

1 Soc wk 6800 or Soc wk 6850 must include an evaluation project.

Requirements for admission to the graduate certificate program include an undergraduate degree and a GPA of 3.0 or better. Applicants must submit two letters of recommendation, preferably with at least one from a current or former college-level instructor. Applicants must submit a personal statement explaining how the certificate program fits in with the applicant’s educational and professional goals. The letters and the personal statement should be sent directly to the Public Policy Administration Program.

Political Science BA

A degree in Political Science is the perfect choice for students who want to change the world. Our students gain knowledge about politics and policy, and develop sought-after skills—such as information-gathering and processing, analysis, research, decision making, and oral and written communication—that are transferable to many career paths after graduation. Areas of concentration include American politics, international and comparative politics, urban politics, public law, public policy and administration, and gender and politics. In addition to formal course work, internships are available in which the student can apply classroom learning and gain practical field experience.

Career Outlook

Our graduates work in a variety of settings, as lawyers in the legal system, staff for government agencies, legislatures, and political campaigns, managers of public, private and nonprofit organizations, and advocates for a wide variety of social, environmental, and economic organizations. The variety of skills students develop, coupled with internship experience, make our graduates strong candidates on the job market. Early and mid-career Political Science graduates enjoy higher average salaries than those in Business Management and other fields. Political Science is also a path to graduate school and the top major of law school applicants.

General Education Requirements

Majors must satisfy the university and college general education requirements (p. 51). Political science courses may be used to satisfy the social sciences requirement. The foreign language requirement for the B.A. degree may be satisfied in any language.

Degree Requirements

All majors must complete at least 36, but no more than 51, hours of political science. All students are required to take the following core curriculum:

Political Science

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>POL SCI 1100</td>
<td>Introduction to American Politics (MOTR POSC 101)</td>

<td>World Politics (MOTR POSC 201)</td>
<td>3</td>
</tr>
<tr>
<td>POL SCI 3000</td>
<td>Political Analysis</td>
<td>3</td>
</tr>
</tbody>
</table>

At least 15 hours of political science course work must be at the 3000 or 4000 level, including POL SCI 4950 Senior Seminar. B.A. degree students may take a maximum of 3 hours of political science on a satisfactory/unsatisfactory basis; this can include any course except the required courses in the core curriculum.

Note: As early as possible, students should determine their educational objectives and consult with an adviser regarding a plan of study. Those students who are uncertain of their future plans are urged to include in their 36-45 hours of political science a broad set of courses in American politics, public policy and administration, public law, comparative politics, international politics, political theory, and methodology. In addition to this general course of study in political science, the department offers B.A. degree students several specialized programs of study in political science geared to various student academic and career interests.

Departmental Honors

The department awards honors to students having a grade point average (GPA) of 3.2 in the major, an overall GPA of 3.2 (except in extraordinary circumstances), and successfully completed an honors thesis, project, or report.

B.S. Ed. in Secondary Education with Emphasis in Social Studies

The B.S. Ed. is a professional education degree designed for students who wish to pursue a teaching career in secondary schools. Much of the discipline-specific coursework parallels the B.A. degree in the discipline; however, the Missouri Department of Elementary and Secondary Education (DESE) requires specific coursework for teacher certification. Therefore, students interested in the B.S. Ed. should contact the advising office (OASIS) 314-516-5937 in the College of Education for
discipline-specific requirements. Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

B.A. in Political Science with Master’s Level Coursework for Secondary Teacher Certification

In addition to the B.S. Ed., students may opt to complete a B.A. degree in their discipline as an undergraduate, followed by admission to the Graduate School for Master’s level teaching certification. The College of Education has a one-year accelerated program for post-graduate certification called Teach in 12, or students can choose a traditional path to certification. Graduate coursework for certification can apply towards a Master’s Degree in Secondary Education, with additional coursework. Students interested in Master’s Level teacher certification should contact the advising office (OASIS) 314-516-5937 in the College of Education. Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

Learning Outcomes

Graduates of this program will be able to:

- Explain the history, characteristics, and impact of legal, economic, and political institutions and systems, including international, national, state, and local governance.
- Apply various methods, tools, and sources applicable to the discipline of political science to answer important policy and political questions.
- Compare and contrast different ideologies, theories, and interpretations of politics.
- Assess political issues, formulate evidence-based recommendations, and communicate them with clarity and coherence.
- Plan, execute, and defend a major research project.

Total Hours: 120

1 INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

Please Note: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Political Science BA/MA Dual Degree Program

The 2+3 Combined BA/MA program in Political Science provides an opportunity for students of recognized academic ability and educational maturity to complete the requirements for both degrees in 5 years of full-time study.

The combined program requires a minimum of 140 credit hours of which at least 33 must be at the graduate level in political science. In qualifying for the BA, students must meet all University and College requirements. Students in the combined 2+3 who successfully complete the requirements for the MA degree will be awarded a BA degree simultaneously upon completion of at least 107 hours of undergraduate credit.

Student should apply to the Department for admission to the 2+3 combined degree program in Political Science during the semester they will complete 60 undergraduate credit hours. A cumulative grade point average of 3.0 or higher and two letters of recommendation from faculty are required. Students will be admitted to the 2+3 program under provisional status until they have completed 30 hours in that program with a grade point of 3.0 or higher. After completion of the provisional period, with the recommendation of the Graduate Director, students can be granted full admission into the 2+3 program.

Students must maintain a grade point average of 3.0 or higher throughout the combined program. Students who officially withdraw from the 2+3 combined degree program, who have successfully completed all the
regular requirements for the BA degree (120 hours) will be awarded their BA degree.

**Total Hours** 12

Students can plan their degree program to reflect the following six emphasis areas:

- American Politics
- Comparative Politics
- International Politics

**Summary of Credits in Political Science:**

- BA: 27 hours
- MA: 33 hours at the graduate level
- TOTAL: 60 hours in Political Science classes

**Political Science MA**

Admission Requirements: For admission, a student should have a baccalaureate degree with a minimum grade point average of 2.75 and an undergraduate background in the social sciences. The GRE is required, and scores should be submitted at the time of application. Two letters of recommendation are also requested for each student applying to the program. Students who do not meet these requirements may be admitted upon approval of the department and the dean of the Graduate School. Application materials may be obtained from and should be returned to the office of the director of admissions.

Deadlines are July 1 for the fall semester; December 1 for the winter semester; and May 1 for the summer term.

**Degree Requirements**

Beyond the general requirements of the Graduate School, the department requires a minimum of 27 semester hours of course work, of which 18 hours must be at the 6400 level and 12 hours must be in core courses in political science, including:

<table>

</tr>
<tr>
<td>POL SCI 6480</td>
<td>Proseminar in International Relations</td>
<td>3</td>
</tr>
</tbody>
</table>

**Total Hours** 12

Students should select an emphasis in American Politics, Public Policy, Comparative Politics, Political Theory, or International Relations.
Students must also select one of the following exit projects: a six-hour thesis, a six-hour internship, or six hours of additional course work and an approved paper. Students will have a mid-program review at the end of 12-15 hours of course work, at which time they will discuss their academic performance and program with a faculty committee and determine the most appropriate exit project. Each candidate is given a final oral review conducted by a faculty committee and focused on the course work completed and the student's chosen exit project.

Political Science Minor

Requirements for Political Science Minors

A general minor in political science can be arranged, as well as specialized minors in eight different subfields of the discipline. Interested students should see a faculty adviser to plan a coherent program of study as a minor field.

Students must achieve a cumulative 2.0 GPA in the political science courses chosen to qualify for the minor. Students may count no more than 3 hours in political science taken on a satisfactory/unsatisfactory basis toward the minor. Students taking an internship POL SCI 3940 may count no more than three hours of the internship toward the minor.

Specific Requirements for the Minor

Fifteen hours, chosen from among all political science courses.

Learning Outcomes

- Explain the characteristics and impact of political institutions and systems.
- Analyze the actions of political actors and their motives.
- Assess political issues, formulate evidence-based recommendations, and communicate them with clarity and coherence.

Political Science PhD

The doctoral program emphasizes theoretical, analytic, and substantive approaches to public policy analysis and administration. Students are provided an opportunity to link core skills in policy analysis and political science with substantive emphasis in specific policy areas. The program is designed to prepare pre-career and mid-career students for advanced positions in policy research and administration, as well as for academic research and teaching.

Admission Requirements

Admission and financial aid decisions are made on the basis of past academic record, intellectual ability, and career commitment and performance. Applications are accepted from students who have either baccalaureate or master's degrees. Past graduate work will be credited toward degree requirements as appropriate. Applicants must submit:

1. complete academic transcripts,
2. three letters of recommendation,
3. aptitude tests of the GRE and
4. a statement of objectives for the course of study.

Application materials may be obtained from and should be returned to the office of the director of admissions. Applications for fall semester should be submitted by February 15 and for winter semester by October 15.

Graduate Assistantships Stipends for teaching and research assistantships (nine month/20 hours per week) are awarded on a competitive basis. Out-of-state educational fees are waived for graduate assistants.

Degree Requirements

The department requires 60 credit hours beyond the baccalaureate degree for completion of the Ph.D. To ensure sufficient background for doctoral-level policy courses, students must demonstrate appropriate competence in computing and data analysis during their course of study. Course requirements are as follows:

Core courses

(18 credit hours)

- 18 credit hours will be required in the areas of research methods, and policy process and institutions. Contact the department for specific courses.
- Additional Requirements (12 credit hours)
- In addition, students will select a minimum of 12 credit hours in public policy, theory, or process as they apply to major subfields in political science.

Policy Concentration

(24 credit hours)

Students, in consultation with the program director, will develop expertise in a substantive policy area. Policy concentrations (many interdisciplinary) include but are not limited to:

- American National Policy
- Urban Politics and Planning
- Comparative/International Policy
- Policy Analysis and Research Social Welfare

Internship

(6 credit hours) optional

The Ph.D. intern program offers an opportunity to gain first-hand experience in select research and administrative positions.

General Examination and Dissertation

Upon completion of course work, students are advanced to candidacy by successfully completing three general examinations,

1. public policy institutions, processes, and analysis,
2. methodology, and
3. the student's chosen subfield and area of policy concentration.

The degree is awarded upon completion and defense of the Ph.D. dissertation.
Primary Care Pediatric Post-Graduate Certificate

Post-graduate certificate (PGC) requirements are tailored to the individual student, depending on past academic work, experience, the student’s goals, and specialty requirements. Upon completion of the PGC requirements, a certificate is awarded by the College of Nursing (CON) and Graduate School. Graduates are eligible to apply to take board certification exams in the advanced practice role and population for which they have been prepared.

Due to higher education regulation changes, the University of Missouri–St. Louis cannot admit students from all states for online programs. Please see the Center for Teaching and Learning for additional information: http://www.umsl.edu/services/ctl/onlinelearning/state_authorization.html.

Professional Writing Undergraduate Certificate

Requirements

Students earn the Professional Writing Certificate by completing 18 hours in selected writing courses with a grade point average of 3.0 or better. Twelve of the 18 hours must be taken at the University of Missouri-St. Louis. Courses may not be taken on a satisfactory/unsatisfactory basis.

Students may take a combination of Professional, Academic, and Creative Writing courses leading up to a Capstone course.

Students who wish to pursue a technical writing emphasis should contact the Coordinator for information about appropriate courses and internships.

When the student has completed requirements for the certificate, the coordinator will notify the university registrar and the college from which the student will graduate. Upon the student’s graduation, completion of the Professional Writing Certificate will be noted on the official transcript and a certificate will be mailed to the student’s residence. Students who have graduated before completing the Professional Writing Certificate will receive the certificate in the mail and will have the certificate entered on their official transcripts.

Learning Outcomes

Upon completion of the program, certificate earners will be able to:

- Write clearly, correctly, and concisely
- Develop knowledge of how writing impacts work and behavior in professional settings
- Employ a repertoire of writing strategies and practices in the workplace
- Effectively adapt content to a variety of professional audiences
Discern the appropriate tone, style, and format needed for a given writing purpose, audience, and context

• Demonstrate advanced knowledge of rhetorical strategies to achieve specific results

• Practice solid revision and editing skills

• Integrate expectations about professional standards and persuasive, content-based thinking into their written communication

• Recognize and adjust to expectations in the global workplace setting.

• Develop a portfolio of professional writing that would serve in a job search

• Work independently and collaboratively on complex professional documents

• Adapt to new writing challenges quickly

Program Evaluation in Education Graduate Certificate

The Graduate Certificate in Program Evaluation in Education provides specialized study in the theory and practice of program evaluation. The program will build on the content area knowledge base of the individual’s bachelors and masters degree. The focus of the Program Evaluation in Education certificate will be on the skills delineated in the standards and guidelines of the American Evaluation Association and the Joint Committee on Standards in Educational Evaluation.

The certificate will consist of 18 hours of core courses and internship experiences. Graduate credits earned in equivalent courses in Education or related Social Science disciplines may meet some of these requirements.

Research Methods

ED REM 6750 Advanced Research Design in Education 3

ED REM 7771 Quantitative Research Methods I 3

ED REM 7781 Qualitative Methods in Educational Research I 3

Program Evaluation

ED REM 6730 Educational Program Development and Evaluation 3

ED REM 6732 Advanced Educational Program Development and Evaluation 3

ED REM 6990 Internship 1-10

Total Hours 16-25

Graduate Certificate programs are a minimum of 18 credit hours.

Psychiatric Mental Health Nurse Practitioner Post-Graduate Certificate

Post-graduate certificate (PGC) requirements are tailored to the individual student, depending on past academic work, experience, the student’s goals, and specialty requirements. Upon completion of the PGC requirements, a certificate is awarded by the College of Nursing (CON) and Graduate School. Graduates are eligible to apply to take board certification exams in the advanced practice role and population for which they have been prepared.

Due to higher education regulation changes, the University of Missouri–St. Louis cannot admit students from all states for online programs. Please see the Center for Teaching and Learning for additional information: http://www.umsl.edu/services/ctl/onlinelearning/state_authorization.html.

Psychology BA

The Bachelor of Arts degree in Psychology is a large, diverse program ideal for students interested in understanding and solving problems in many different areas of behavior. Students earning a Bachelor of Arts degree in psychological sciences learn to write and speak about complex behavioral explanations that rely on scientific reasoning and evidence rather than anecdotes or common myths/misconceptions. Advanced coursework in the major can focus on a range of subdisciplines, including child/lifespan development, mental health, and business / workplace psychology.

General Education Requirements

 Majors must satisfy the university and college General Education curricular requirements (p. 51). Selected courses in Psychology may be used to meet General Education Social and Behavioral Sciences requirements.

Degree Requirements

PSYCH 1000 Choosing A Career In Psychology 1 1

PSYCH 1003 General Psychology (MOTR PSYC 100) 3

PSYCH 2201 Psychological Statistics 4

PSYCH 2211 Introduction to Biological Psychology 3

PSYCH 2219 Research Methods 3

PSYCH 2245 Abnormal Psychology 3

PSYCH 4999 Integrated Psychology 2

PSYCH 2268 Human Growth and Development (MOTR PSYC 200) 3
program at UM-St. Louis will be able to

Upon completion of the degree, graduates of the BA in Psychology

Learning Outcomes

Upon completion of the degree, graduates of the BA in Psychology program at UM-St. Louis will be able to:

1. Demonstrate an integrative understanding of psychological concepts, theories, research, and historical trends in psychology and the prediction of behavior across the scientific subdisciplines (e.g., behavioral neuroscience, clinical, developmental, industrial/organizational, social, etc.). (Psychological Science Knowledge Base)

   - Summarize and explain use of the scientific approach to solve behavioral problems and articulate how behavioral explanations rely on critical thinking, scientific reasoning, weighing evidence and tolerating ambiguity. (Critical Thinking)
   - Identify and evaluate appropriate research methods in psychology, including research design, data analysis (i.e., selecting, conducting, and interpreting basic statistical tests) and data interpretation. (Scientific Inquiry)
   - Communicate using a variety of formats in a clear, concise way. (Communication)
   - Demonstrate respect for members of diverse groups with sensitivity to issues of power, privilege and discrimination, while adopting social and ethical values that build community at local, national and global levels. (Ethical and Social Responsibility)
   - Display professionalism and ownership of professional growth and learning through an evolving career development plan tailored to one’s accurate self-assessment of abilities, achievements, motivations and work habits. (Professional Development)

1. INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.
Degree Requirements

Majors must satisfy the university and college General Education Course Requirements. Students earning a Bachelor of Science degree in psychological sciences learn to analyze data, communicate complex information, understand human behavior and think and write scientifically. The BS degree involves the application of foundational knowledge and skills from math and the natural sciences to the study of behavior. Students can concentrate their advanced coursework in a specific disciplinary subfield, including behavioral neuroscience, child psychology, clinical psychology, health psychology/pre-health, business & work psychology.

General Education Course Requirements

Please Note: This plan is an example of what a four year plan could look like for a typical student pursuing the B.A. degree. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Psychology BS

The Psychological Sciences involve the study of mental processes, the brain, and behavior in human and other animals. Students earning a Bachelor of Science degree in psychological sciences learn to analyze data, communicate complex information, understand human behavior and think and write scientifically. The BS degree involves the application of foundational knowledge and skills from math and the natural sciences to the study of behavior. Students can concentrate their advanced coursework in a specific disciplinary subfield, including behavioral neuroscience, child psychology, clinical psychology, health psychology/pre-health, business & work psychology.

Math and Natural Science 4-5

Choose one of the following:

Social Science 3

Select one course from Anthropology, Criminology & Criminal Justice, Economics, Political Science, and Sociology

Total Hours 55-56

Candidates for the B.S. in Psychology must complete at least 40, but no more than 50, hours of courses taught by or cross-listed with the Department of Psychological Sciences. In addition to the above courses, students must complete the following:

1 Students who test into MATH 1045 may meet the math core requirement in lieu of taking MATH 1030 and MATH 1035.
2 No more than 3 hours can be PSYCH 3295 or PSYCH 3390.
3 PSYCH 1000 requirement must be satisfied before the student completes 24 hours of course work.

Candidates must have a cumulative grade point average of 2.0 or higher in the major overall, and must earn a C- or above in each of the courses comprising the 40 credits applied to the B.S. degree in Psychology. Failure to earn a C- or above in the these required courses will necessitate repeating them for a satisfactory completion of the C- requirement in all 40 hours. No Psychology courses taken on a satisfactory/unsatisfactory basis may be applied to the major.

Graduate School Preparation

In addition to the required courses listed above, students interested in applying to graduate school in Psychology are strongly encouraged to become involved in a research project with a Psychology faculty member by securing enrollment in PSYCH 3390, Directed Studies. These positions
are available on a limited and competitive basis. No enrollments in PSYCH 3390 are possible without special Instructor permission. Those invited to participate must obtain a special consent form from the instructor in order to enroll. Contact the Psychology Academic Advising office for more information on such positions (psy_advising@umsl.edu).

Learning Outcomes
Upon completion of the degree, graduates of the BS in Psychology program at UM-St. Louis will be able to:

- Demonstrate an integrative understanding of psychological concepts, theories, research, and historical trends in psychology and the prediction of behavior across the scientific subdisciplines (e.g., behavioral neuroscience, clinical, developmental, industrial/organizational, social, etc.). (Psychological Science Knowledge Base)
- Summarize and explain use of the scientific approach to solve behavioral problems and articulate how behavioral explanations rely on critical thinking, scientific reasoning, weighing evidence and tolerating ambiguity. (Critical Thinking)
- Evaluate and identify appropriate research methods in psychology and at least one other STEM discipline, including research design, data analysis (i.e., selecting, conducting, and interpreting basic statistical tests) and data interpretation. (Scientific Inquiry)
- Communicate using a variety of formats in a clear, concise way. (Communication)
- Demonstrate respect for members of diverse groups with sensitivity to issues of power, privilege and discrimination, while adopting social and ethical values that build community at local, national and global levels. (Ethical and Social Responsibility)
- Display professionalism and ownership of professional growth and learning through an evolving career development plan tailored to one’s accurate self-assessment of abilities, achievements, motivations and work habits. (Professional Development)

Total Hours: 121

1 INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

Please Note: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Psychology Clinical-Respecialization Graduate Certificate

This program is designed for graduates of accredited doctoral programs in psychology who wish to receive training in the specialty field of clinical psychology. Respecialization students are trained within the context of the UMSL Clinical Psychology Doctoral Program, which is accredited by the American Psychological Association. The program provides an integrated sequence of training experiences, including didactic course work and practicum placements. Core graduate-level psychology educational requirements not completed elsewhere are included in the respecialization student’s course of study.

Psychology MA, Behavioral Neuroscience Emphasis

The University of Missouri-St. Louis offers a program of studies leading to a Master of Arts Degree in Psychology with a specialization in Behavioral Neuroscience. Masters students take classes with Doctoral level students. Students will choose between a thesis and a non-thesis option.

Thesis students conduct research in a core area of study including neurophysiological correlates of posttraumatic stress disorder, self-reflection and default mode network, the neurocognition of emotion and romantic love, prejudice and discrimination, and health disparities. We soon will have training on the neuroscience of substance abuse and addiction. Students are enrolled into a research group headed by a faculty member with research interests in one of the areas identified above. That professor serves as the student’s primary mentor throughout their graduate training, though communication and collaboration with other laboratories are encouraged.
Research Facilities: The Department is equipped with several EEG systems, physiological research suites including eye-tracking, cardiovascular measures, and skin conductance. Many faculty have connections to facilities with magnetic resonance imaging equipment.

Degree Requirements

A total of 32 credit hours is required for the MA degree with an emphasis in the behavioral-neuroscience field of experimental psychology. Students will choose between a thesis and a non-thesis option.

Thesis Option

Students are required to complete a master's thesis for this program. Theses should follow the procedures in the Behavioral-Neuroscience Handbook and on the Graduate School website.

Psychology MA, Industrial/ Organizational Emphasis

Effective Fall 2018, the Industrial Organizational Psychology program will no longer be accepting applications.

Master of Arts in Psychology

The psychology department at the University of Missouri-St. Louis offers a program of studies leading to the Master of Arts degree with a specialization in either Behavioral Neuroscience or Industrial/ Organizational Psychology. The M.A. degree is a terminal degree and is separate from the Ph.D. program in Psychology. There is no thesis or language requirement. The M.A. degree does not constitute a license to practice in Missouri or elsewhere as a professional Psychologist. The M.A. program does not offer course work in Counseling or Clinical Psychology.

The M.A. in Psychology requires a total of 32 semester hours of graduate course work in Behavioral Neuroscience or 45 semester hours of course work in Industrial/Organizational Psychology. All students in the Master's program must take the course work prescribed by their emphasis area. All programs of study for M.A. students require the approval of the Director of the Behavioral Neuroscience program or Director of the Industrial/ Organization program.

Emphasis in Industrial/Organizational Psychology

Effective Fall 2018, the Industrial Organizational Psychology program will no longer be accepting applications.

The University of Missouri-St. Louis offers a program of studies leading to a Masters of Arts degree in Psychology with an emphasis in Industrial/ Organizational Psychology. This program embraces the scientist-practitioner model and provides a balanced training in I/O. This emphasis provides 'industrial' training in areas such as personnel selection, training, and test development/validation, as well as 'organizational' training in areas such as work motivation, leadership, mentoring, and group processes. Conducting research with faculty and other training experiences are also incorporated. Masters students take 45 hours of courses. Completion of the Masters program does not qualify one for admittance to the doctoral program. Masters students must reapply for consideration to the doctoral program. Additionally, Masters students are not required to complete an empirical research thesis.

Psychology Minor

Requirements for the Minor
Candidates must complete a minimum of 15 hours of courses taught by or cross-listed with the Psychology Department, including at least 6 hours at the 3000 or 4000 level (no more than 3 of these can be PSYCH 3390). Candidates must have a cumulative grade point average of 2.0 or higher in the minor. Psychology courses taken on a satisfactory/unsatisfactory basis may not be applied to the minor.

Learning Outcomes
Graduates of the Minor in Psychology at UM-St. Louis will be able to:

**Psychological Sciences Knowledge Base:**
- Apply basic psychological terminology, concepts and theories to explain behavior and mental processes.
- Discuss practical applications of psychological principles and science within their major area of study and to everyday life.

**Scientific Inquiry and Critical Thinking:**
- Identify and describe the potential for flaws in behavioral explanations based on simplistic, personal theories and demonstrate an appreciation for psychology as a science.
- Summarize criteria and strategies for identifying objective sources of psychological information.

**Communication:**
- Express in writing basic concepts and findings from the psychological sciences.
- Interpret quantitative data displayed in graphs and tables.

**Ethical and Social Responsibility:**
- Consider ethical issues that reflect principles in the APA Ethics Code.

**Professional Development:**
- Describe how knowledge and skills from the psychological sciences apply to business, health care, educational, and other workplace settings.

---

Psychology PhD, Behavioral Neuroscience Emphasis

The Behavioral Neuroscience program provides opportunities for study, research, and training in various areas including psychophysiology, psychopharmacology, neuroendocrinology, cognitive neuroscience, and neuropsychology. This program prepares students for research careers in academia or industries, such as pharmaceutical firms and medical schools. Full-time enrollment is required.

Admission Requirements
In addition to meeting the general admission requirements of the Graduate School, applicants should have completed undergraduate courses at minimum in general psychology, psychological statistics, and research methods. Each doctoral program has additional admission requirements specific to that program.

The Application Deadline for the Behavioral Neuroscience Program is January 15.

Teaching and Research Assistantships
Stipends for teaching and research assistantships are available for the doctoral programs only.

Learning Outcomes for the Ph.D. in Behavioral Neuroscience

The graduate program in Behavioral Neuroscience has the following goals. Outcome measures for each goal allow the faculty to assess the students.

**Goal 1.** Students will gain a broad-based foundation of terminology and basic and conceptual knowledge necessary for teaching and research in the Behavioral Neuroscience field. Outcome measures include grades in coursework, performance on both the written and oral segments of the qualifying exam, as well as active participation in our journal reading groups.

**Goal 2.** Beginning early in their studies, students will learn the basic skills to conduct research in a variety of different paradigms. Outcome measures include successful accomplishments in the laboratories of mentor professors.

**Goal 3.** Beginning early in their studies, students will come to recognize the key to success in the Behavioral Neuroscience field is publishing and seeking grant support. Outcome measures include an easily observable mindset that assesses all scholarly activities in regard to possible publication and/ or a suitable idea for submission to a grant agency. Also, regular attendance is expected at all relevant colloquia on campus and at the grant writing seminars offered by the Behavioral Neuroscience faculty.

**Goal 4.** Students will come to recognize the importance of writing and will be constantly developing their writing skills as applied to manuscript preparations and grant applications. Outcome measures are the numbers of manuscripts written and submitted to journals or grant agencies each year.

**Goal 5.** As they progress through the program, students will show increasing self-reliance to initiate a research project and carry it to its completion. Outcome measures are numbers and quality of self-initiated research projects.
Goal 6. At the end of their graduate studies, the students will have grown into full colleagues of the faculty and be ready for careers in research and teaching. Outcome measures are a quality dissertation that is successfully defended before peers and being hired for a suitable position (post-doc, assistant professor, junior-level researcher) in the field.

Psychology PhD, Clinical Community Psychology Emphasis

The Clinical Psychology program has been fully accredited by the American Psychological Association since 1977 and is patterned upon the scientist-practitioner model of clinical training. Students are not considered for admission on a part-time basis. Through the medium of courses, practicums, and research experiences, this emphasis area prepares Clinical Psychologists for careers in research, teaching, and clinical practice.

Admission Requirements

In addition to meeting the general admission requirements of the Graduate School, applicants should have completed undergraduate courses at minimum in general psychology, psychological statistics, and research methods. Each doctoral program has additional admission requirements specific to that program.

The Application Deadline for the Clinical Psychology Program is January 15.

Teaching and Research Assistantships

Stipends for teaching and research assistantships are available for the doctoral programs only.

Degree Requirements

Students in the Clinical Psychology program participate for three years in the Psychology Department's Community Psychological Services clinic. This facility provides psychological services to the public and consultation to outside agencies. Students also receive clinical experience in clerkships and during a full-time, year-long internship. Research requirements include an initial independent research project, a major critical review of research in a specialty area, and a dissertation.

The Clinical Psychology graduate program is accredited by the American Psychological Association and the course offerings fulfill specific training domains associated with APA accreditation.

I. Broad-based foundation of knowledge and conceptual skills necessary for psychological research and practice.

Psychology PhD, Industrial and Organizational Psychology Emphasis

Effective Fall 2018, the Industrial Organizational Psychology program will no longer be accepting applications.
Industrial/Organizational Psychology

The Industrial/Organizational Psychology program is offered in cooperation with selected faculty from the College of Business to prepare students for careers in industry or academia. This program embraces the scientist-practitioner model and provides a balanced training in I/O. This emphasis provides 'industrial' training in areas such as personnel selection, training, and test development/validation, as well as 'organizational' training in areas such as work motivation, leadership, and group processes. Research and other training experiences in various settings are also incorporated.

Learning Outcomes for the Ph.D. in Industrial/Organizational Psychology:
The Ph.D. in Industrial/Organizational (IO) Psychology has the following goals:

Goal 1. Students will gain a broad-based foundation of knowledge and conceptual skills necessary for applied psychological research and practice.

Goal 2. Students will develop the ability to evaluate and conduct methodologically sound research of potential benefit to the theory and practice of psychology.

Goal 3. Students will develop the ability to apply psychological principles that are theory-based and research-supported to individuals and groups in organizational settings.

Goal 4. Students will develop a firm basis for ethical decision-making in research and practice.

Goal 5. Students will display adaptability in their applications of research, assessment and practical psychological approaches to individuals and groups in organizational settings.

Public Administration Minor

Requirements for Political Science Minors

A general minor in political science can be arranged, as well as specialized minors in eight different subfields of the discipline. Interested students should see a faculty adviser to plan a coherent program of study as a minor field.

Students must achieve a cumulative 2.0 GPA in the political science courses chosen to qualify for the minor. Students may count no more than 3 hours in political science taken on a satisfactory/unsatisfactory basis toward the minor. Students taking an internship POL SCI 3940 may count no more than three hours of the internship toward the minor.

Specific Requirements for the Minor

Select five of the following:

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Total Hours 15

Learning Outcomes

Upon completion of the program, graduates will be able to:

- Explain key topics concerning public law.

- Describe the evolution of legal principles to used to determine the liberties and rights of individuals and groups.
In addition, students must provide a demonstration of computer proficiency.

Public Policy Administration
BSPPA

The BSPPA degree has two emphasis areas and a track. The first is a public administration emphasis, which emphasizes management in both the public and nonprofit sectors; it may produce a terminal degree or be a precursor to graduate training. The second is a public policy emphasis in which a student may focus on a particular policy area and also acquire specialized analytic training and research skills, in preparation for relevant entry-level jobs in the public or the voluntary sector as well as in certain parts of the private sector. The track area focuses explicitly on the administrative and leadership concerns of organizations in the nonprofit sector, which constitutes a growing field of research and employment opportunities.

General Education Requirements

Majors must satisfy the university and college general education requirements (p. 51). Political science courses may be used to satisfy the social sciences requirement.

Degree Requirements

All BSPPA majors must complete at least 33 but no more than 51, hours in political science. The following core curriculum is required of all BSPPA majors:

- **Political Science**
  - POL SCI 1100: Introduction to American Politics (MOTR POSC 101) 3
  - POL SCI 1500: Introduction to Comparative Politics (MOTR POSC 202) 3
  - POL SCI 3000: Political Analysis 3
  - POL SCI 2400: Public Administration 3
  - POL SCI 2420: Introduction to Public Policy 3
  - POL SCI 3940: Public Affairs Internship 1-6
  - POL SCI 4950: Senior Seminar in Political Science 3
  - ECON 1001: Principles of Microeconomics (MOTR ECON 102) 3
  - ECON 1002: Principles of Macroeconomics (MOTR ECON 101) 3

  Total Hours: 25-30

In addition, students must provide a demonstration of computer proficiency through one of the following:

- INFYS 1800 Computers and Information Systems, extension courses, or other study approved by the BSPPA coordinator.
- BSPPA students may take a maximum of 3 hours of political science on a satisfactory/unsatisfactory basis, except for the following (which may not be taken on a satisfactory/unsatisfactory basis):
  - POL SCI 1100: Introduction to American Politics (MOTR POSC 101) 3
  - POL SCI 1500: Introduction to Comparative Politics (MOTR POSC 202) 3

Nonprofit Track

In addition to the core curriculum requirements for all BSPPA majors, students in the nonprofit academic track are required to complete the following courses:

- POL SCI 3420: Public and NonProfit Personnel Management 3
- POL SCI 3440 or POL SCI 2400: Public Administration 3
- POL SCI 3700: NonProfit Organizations and Public Policy 3
- POL SCI 3710: NonProfits, Civil Society and Volunteerism 3

Total Hours: 12

In addition, the Public Affairs Internship (POL SCI 3940) required for the BSPPA must be conducted through a nonprofit organization.

Note: Students considering the B.S. in public policy and administration should see a political science adviser as early as possible to plan their program.

Learning Outcomes

Upon completion of the program, graduates will be able to:

- Explain the characteristics and impact of policy-making institutions and systems, including national, state, and local governments.
- Demonstrate an understanding of administrative systems and processes.
- Apply various methods, tools, and sources to answer important management and policy questions.
- Analyze policies, programs, and relevant issues, formulate evidence-based recommendations, and communicate them with clarity and coherence.
- Apply public policy administration knowledge and engage in real-world problem solving through an internship.
- Plan, execute, and defend a major research project.

The BSPPA degree is designed for students who are interested in working in government or nonprofit organizations, and who have a passion for making a positive impact on society. In this program, students gain an understanding of public and nonprofit administration and policymaking in the United States. Students will develop skills for leading in public and nonprofit organizations, and will have the chance to utilize those skills in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Public Policy Administration BSPPA, Public Administration Emphasis

The BSPPA degree has two emphasis areas and a track. The first is a public administration emphasis, which emphasizes management in both the public and nonprofit sectors; it may produce a terminal degree or be a precursor to graduate training. The second is a public policy emphasis in which a student may focus on a particular policy area and also acquire specialized analytic training and research skills, in preparation for relevant entry-level jobs in the public or the voluntary sector as well as in certain parts of the private sector. The track area focuses explicitly on the administrative and leadership concerns of organizations in the nonprofit sector, which constitutes a growing field of research and employment opportunities.

**Degree Requirements**

All BSPPA majors must complete at least 33 but no more than 51, hours in political science. The following course curriculum is required of all BSPPA majors:

### Political Science

<table>
<thead>
<tr>
<th>Course Code</th>

</tbody>
</table>

Total Hours: 25-30

In addition, students must provide a demonstration of computer proficiency through one of the following:

- INFSYS 1800 Computers and Information Systems, extension courses, or other study approved by the BSPPA coordinator.
- BSPPA students may take a maximum of 3 hours of political science on a satisfactory/unsatisfactory basis, except for the following (which may not be taken on a satisfactory/unsatisfactory basis):

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>

<td>POL SCI 3440</td>
<td>Public and Nonprofit Budgeting</td>
<td>3</td>
</tr>
<tr>
<td>POL SCI 3450</td>
<td>Urban Administration</td>
<td>3</td>
</tr>
</tbody>
</table>
Upon completion of the program, graduates will be able to:

- Explain the characteristics and impact of policy-making institutions and systems, including national, state, and local governments.
- Demonstrate an understanding of administrative systems and processes.
- Analyze policies, programs, and relevant issues, formulate evidence-based recommendations, and communicate them with clarity and coherence.
- Apply critical skills for working in public administration such as interpreting budget documents and making budget choices, creating communications plans, and developing recruitment and hiring policies.
- Demonstrate an understanding of theories, concepts and practices relevant to public administration.
- Plan, execute, and defend a major research project. 
- Apply public policy administration knowledge and engage in real-world problem solving through an internship.
- Apply various methods, tools, and sources to answer important questions.

1. INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

**Public Policy Administration BSPPA, Public Policy Emphasis**

The BSPPA degree is designed for students who are interested in understanding and influencing public policy and administration, and who have a passion for making a positive impact on society. Students will gain understanding of developing, implementing, and evaluating public policy, and leading in public and nonprofit organizations. Students will have the chance to utilize those skills through an internship. In the public policy track, students work with a faculty advisor to develop a focus on a particular policy area in preparation for relevant jobs in the public, nonprofit or private sector.

The BSPPA degree has two emphasis areas and a track. The first is a public administration emphasis, which emphasizes management in both the public and nonprofit sectors; it may produce a terminal degree or be a precursor to graduate training. The second is a public policy emphasis in which a student may focus on a particular policy area and also acquire specialized analytic training and research skills, in preparation for relevant entry-level jobs in the public or the voluntary sector as well as in certain parts of the private sector. The track area focuses explicitly on the administrative and leadership concerns of organizations in the nonprofit sector, which constitutes a growing field of research and employment opportunities.

### General Education Requirements

Majors must satisfy the university and college general education requirements (p. 51). Political science courses may be used to satisfy the social sciences requirement.

### Degree Requirements

All BSPPA majors must complete at least 33 but no more then 51, hours in political science. The following core curriculum is required of all BSPPA majors:

#### Political Science

<table>

Upon completion of the program, graduates will be able to:

Learning Outcomes

- Explain the characteristics and impact of policy-making institutions and systems, including national, state, and local governments.
- Demonstrate an understanding of administrative systems and processes.
- Apply various methods, tools, and sources to answer important management and policy questions.
- Analyze policies, programs, and relevant issues, formulate evidence-based recommendations, and communicate them with clarity and coherence.
- Apply public policy administration knowledge and engage in real-world problem solving through an internship.
- Plan, execute, and defend a major research project.
- Demonstrate an understanding of theories, concepts and practices relevant to the student’s chosen policy area.
- Compare and contrast different approaches and frameworks relevant to the student’s chosen policy area.

Public Policy Emphasis Area

Students will adopt a policy concentration of at least 15 credit hours with approval from the BSPPA coordinator. Possible areas of specialization include, but are not limited to, environmental policy, government and business, society and the legal system, urban policy, labor studies, health care, human services, and nonprofit service provision. In fulfilling the concentration requirement, students, in consultation with the BSPPA coordinator, will select courses from related disciplines including at least two political science courses related to the policy area.

In addition, students must provide a demonstration of computer proficiency through one of the following:

- INFSYS 1800 Computers and Information Systems, extension courses, or other study approved by the BSPPA coordinator.
- BSPPA students may take a maximum of 3 hours of political science on a satisfactory/unsatisfactory basis, except for the following (which may not be taken on a satisfactory/unsatisfactory basis):

Public Policy Administration BSPPA/MPPA Dual Degree Program

The BSPPA / MPPA 2+3 program is an accelerated program that allows outstanding BSPPA students to complete a baccalaureate degree and Master of Public Policy Administration (MPPA) degree in five years. The program allows students to apply 12 of the MPPA credit hours towards the BSPPA at UMSL, reducing the overall required hours for the two degrees.
from the standard 160 – 120 for the BS plus 40 for the MPPA – to 148 hours.

Core Curriculum

All candidates for the MPPA degree must complete 25 hours in the core curriculum sequence composed of the following public policy administration courses:

**Policy Analysis and Economics**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
</tbody>
</table>

**Total Hours**

25

A thesis is not required to complete the program. However, writing is an important component of the degree, and students will complete written analyses as part of their coursework and/or internships.

Electives

Twelve credit hours are taken as electives based on a student’s interest. The electives are organized into emphasis areas, listed above in the MPPA program.

For each student in this program, the MPPA Director and the BSPPA advisor in the Department of Political Science at UMSL, will jointly identify and approve four MPPA courses (totaling 12 credits) that cover, at a more advanced level, undergraduate courses that would otherwise be taken for the BSPPA degree. These courses will substitute for (and should not duplicate) BSPPA courses, and will count toward completion of both BSPPA and MPPA requirements.

Degree requirements remain the same for the two degrees, but students admitted into this accelerated program will be able to earn 12 graduate credits prior to completing their undergraduate degrees. Upon completion of the required coursework for the MPPA, the BSPPA and MPPA degrees will be awarded.

Admission Requirements

BSPPA majors must have completed between 60 and 108 credit hours before applying for admission into this dual degree program. It is recommended that applicants apply after completing 90 credit hours. Applicants must have a minimum 3.0 overall GPA as well as a minimum 3.0 GPA in the major. Applications will be submitted to the Master of Public Policy Administration program and decisions will be made by the director in consultation with the BSPPA advisor in the Department of Political Science. Applicants must demonstrate proficiency in college algebra or equivalent. The application must be accompanied by three letters of recommendation, including at least one from a current, full-time faculty member, and a two- to three-page statement explaining how the BSPPA/MPPA program fits in with the applicant’s educational and professional goals.

Public Policy Administration MPPA

Admissions Requirements

Applicants must meet the following program admission requirements in addition to the general requirements of the Graduate School.

The MPPA admissions committee carefully evaluates each applicant record using the five following criteria:

- **Bachelor’s Degree** by the time of enrollment, prospective students must have obtained a baccalaureate degree or the equivalent from an accredited college or university. Applicants must submit official transcripts documenting the baccalaureate degree and all other prior college and graduate-level coursework completed.

- **Grade Point Average:** A minimum GPA of 3.0 on a 4.0 scale is required to be considered for regular admission. This GPA is higher than the minimum for the Graduate School. An undergraduate GPA below 3.0 will be considered on an individual basis for restricted admission.

- **Demonstrated proficiency in college algebra or the equivalent.** Applicants must demonstrate proficiency in college algebra or the equivalent. Graduate coursework also will be taken into consideration. Applicants who do not meet these criteria may be admitted on a restricted basis and asked to satisfactorily complete a math proficiency test.

- **Letters of Recommendation.** Applicants must obtain three letters of recommendation. The letters should be from those who are familiar with your professional and/or academic skills. At least one of the letters must be from a current or former college-level instructor.

- **Personal Statement.** Applicants are required to submit a 2-3 page personal statement to demonstrate competence in writing. The statement should explain how the MPPA program fits in with the applicant’s educational and professional goals. This personal statement may be sent directly to the MPPA program; a short statement of purpose in the web-based admission application is not sufficient.

Degree Requirements

The MPPA degree consists of 40 credit hours, 25 of which are taken as part of the core curriculum and 15 that are electives. Students who complete the degree must demonstrate the following:

- Design, research, write, and defend analyses of substantive public policy problems and/or potential solutions
- Use data and sophisticated analytic tools (qualitative and quantitative) to conduct research in public policy and administration
- Understand the policy and internal/external environments of public and nonprofit organizations
- Develop expertise in a substantive area of public policy administration
Curriculum

All candidates for the MPPA degree must complete 25 hours in the core curriculum sequence composed of the following public policy administration courses:

Policy Analysis and Economics

P P ADM 6000 Introduction to Policy Analysis 3
ECON 5550 Economics for Public Policy Analysis 3
P P ADM 6900 Cases in Public Policy Administration 3

Public Administration and Budgeting

P P ADM 6400 Public Administration: Theory & Practice 3
P P ADM 6490 Human Resources in the Public Sector 3
P P ADM 6180 Governmental Budgeting and Financial Control 3

Statistics, Research Methods, and Information Technology

P P ADM 6010 Introduction to Policy Research 3
P P ADM 6750 Applied Research Design 3
P P ADM 6850 E-Governance in the Public Sector 1

Total Hours 25

A thesis is not required to complete the program. However, writing is an important component of the degree, and students will complete written analyses as part of their coursework and/or internship.

P P ADM 6000 should be taken at the beginning of the program. It is strongly recommended that P P ADM 6010 and ECON 5550 be taken early in a student’s course plan. P P ADM 6900 is a capstone course and must be taken toward the end of the program.

Students may select one of three emphasis areas in which to concentrate their advanced studies:

- Policy Research and Analysis,
- Local Government Management,
- Nonprofit Organization Management.

Students may also select an individualized emphasis area in consultation with their advisor and with approval of the Director.

Prior to the completion of 15 hours in the MPPA program, students should identify an emphasis area. In each of the emphasis areas students may be able to substitute another course for a specified elective, with the MPPA Director’s approval. Specific requirements for each emphasis area are as follows:

Internships

An internship is required for students without substantial experience in the public or nonprofit sectors. Interns may be placed in planning agencies, city managers’ offices, administrative departments, or nonprofit agencies. Credit is granted after successful completion of the internship and a written paper at the end of the semester.

MPPA students currently employed in public agencies or nonprofit organizations can receive 3 hours of credit for internships with their employer. To do so, students must develop, in consultation with the internship coordinator, special research projects outside the scope of their regular employment duties.

Students who have significant relevant experience in the public or nonprofit sector may request the internship requirement be waived. To request a waiver, students must submit a written request outlining the student’s professional or managerial field experience with appropriate documentation. Any request for a waiver from the internship requirement must be approved by the program director. Students who receive a waiver must take an additional 3 hours of electives in lieu of the internship.

Prior to the completion of 15 hours in the MPPA program, the student must present a proposal for 15 hours of specific coursework for approval by the student’s advisor and the MPPA program director. The 15 hours must include P P ADM 6950, Internship (in an assignment relevant to the emphasis area). Students with significant public or nonprofit sector experience may request permission to waive the internship and replace it with an additional three-credit hour elective.

Public Policy Administration MPPA, Individualized Emphasis

Admissions Requirements

Applicants must meet the following program admission requirements in addition to the general requirements of the Graduate School.

The MPPA admissions committee carefully evaluates each applicant record using the five following criteria:

- Bachelor’s Degree by the time of enrollment, prospective students must have obtained a baccalaureate degree or the equivalent from an accredited college or university. Applicants must submit official transcripts documenting the baccalaureate degree and all other prior college and graduate-level coursework completed.

- Grade Point Average: A minimum GPA of 3.0 on a 4.0 scale is required to be considered for regular admission. This GPA is higher than the minimum for the Graduate School. An undergraduate GPA below 3.0 will be considered on an individual basis for restricted admission.

- Demonstrated proficiency in college algebra or the equivalent. Applicants must demonstrate proficiency in college algebra or the equivalent. Graduate coursework also will be taken into consideration. Applicants who do not meet these criteria may be admitted on a restricted basis and asked to satisfactorily complete a math proficiency test.

- Letters of Recommendation. Applicants must obtain three letters of recommendation. The letters should be from those who are familiar with your professional and/or academic skills. At least one of the letters must be from a current or former college-level instructor.

- Personal Statement. Applicants are required to submit a 2-3 page personal statement to demonstrate competence in writing. The statement should explain how the MPPA program fits in with the applicant’s educational and professional goals. This personal statement may be sent directly to the MPPA program; a short statement of purpose in the web-based admission application is not sufficient.
Degree Requirements

The MPPA degree consists of 40 credit hours, 25 of which are taken as part of the core curriculum and 15 that are electives. Students who complete the degree must demonstrate the following:

**Total Hours:** 25

A thesis is not required to complete the program. However, writing is an important component of the degree, and students will complete written analyses as part of their coursework and/or internship.

P P ADM 6000 should be taken at the beginning of the program. It is strongly recommended that P P ADM 6010 and ECON 5550 be taken early in a student’s course plan. P P ADM 6900 is a capstone course and must be taken toward the end of the program.

Students may select one of three emphasis areas in which to concentrate their advanced studies:

- Policy Research and Analysis,
- Local Government Management,
- Nonprofit Organization Management.

Students may also select an individualized emphasis area in consultation with their advisor and with approval of the Director.

Prior to the completion of 15 hours in the MPPA program, students should identify an emphasis area. In each of the emphasis areas students may be able to substitute another course for a specified elective, with the MPPA Director’s approval. Specific requirements for each emphasis area are as follows:

### Internships

An internship is required for students without substantial experience in the public or nonprofit sectors. Interns may be placed in planning agencies, city managers’ offices, administrative departments, or nonprofit agencies. Credit is granted after successful completion of the internship and a written paper at the end of the semester.

MPPA students currently employed in public agencies or nonprofit organizations can receive 3 hours of credit for internships with their employer. To do so, students must develop, in consultation with the internship coordinator, special research projects outside the scope of their regular employment duties.

Students who have significant relevant experience in the public or nonprofit sector may request the internship requirement be waived. To request a waiver, students must submit a written request outlining the student’s professional or managerial field experience with appropriate documentation. Any request for a waiver from the internship requirement must be approved by the program director. Students who receive a waiver must take an additional 3 hours of electives in lieu of the internship.

Public Policy Administration
MPPA, Nonprofit Organization Management Emphasis

Admissions Requirements
Applicants must meet the following program admission requirements in addition to the general requirements of the Graduate School.

The MPPA admissions committee carefully evaluates each applicant record using the five following criteria:

• **Bachelor’s Degree** by the time of enrollment, prospective students must have obtained a baccalaureate degree or the equivalent from an accredited college or university. Applicants must submit official transcripts documenting the baccalaureate degree and all other prior college and graduate-level coursework completed.

• **Grade Point Average:** A minimum GPA of 3.0 on a 4.0 scale is required to be considered for regular admission. This GPA is higher than the minimum for the Graduate School. An undergraduate GPA below 3.0 will be considered on an individual basis for restricted admission.

• **Demonstrated proficiency in college algebra or the equivalent.** Applicants must demonstrate proficiency in college algebra or the equivalent. Graduate coursework also will be taken into consideration. Applicants who do not meet these criteria may be admitted on a restricted basis and asked to satisfactorily complete a math proficiency test.

• **Letters of Recommendation.** Applicants must obtain three letters of recommendation. The letters should be from those who are familiar with your professional and/or academic skills. At least one of the letters must be from a current or former college-level instructor.

• **Personal Statement.** Applicants are required to submit a 2-3 page personal statement to demonstrate competence in writing. The statement should explain how the MPPA program fits in with the applicant’s educational and professional goals. This personal statement may be sent directly to the MPPA program; a short statement of purpose in the web-based admission application is not sufficient.

Degree Requirements
The MPPA degree consists of 40 credit hours, 25 of which are taken as part of the core curriculum and 15 that are electives. Students who complete the degree must demonstrate the following:

• Design, research, write, and defend analyses of substantive public policy problems and/or potential solutions

• Use data and sophisticated analytic tools (qualitative and quantitative) to conduct research in public policy and administration

• Understand the policy and internal/external environments of public and nonprofit organizations

• Develop expertise in a substantive area of public policy administration

Curriculum
All candidates for the MPPA degree must complete 25 hours in the core curriculum sequence composed of the following public policy administration courses:

**Policy Analysis and Economics**

### Public Policy Minor

**Requirements for Political Science Minors**

A general minor in political science can be arranged, as well as specialized minors in eight different subfields of the discipline. Interested students should see a faculty adviser to plan a coherent program of study as a minor field.

Students must achieve a cumulative 2.0 GPA in the political science courses chosen to qualify for the minor. Students may count no more than 3 hours in political science taken on a satisfactory/unsatisfactory basis toward the minor. Students taking an internship POL SCI 3940 may count no more than three hours of the internship toward the minor.

### Learning Outcomes

- Demonstrate understanding of theories, concepts and practices relevant to public policy.
- Describe and apply the models used to analyze and create public policy.
• Assess public policy issues, formulate evidence-based recommendations, and communicate them with clarity and coherence.

Public Relations Undergraduate Certificate

The Certificate in Public Relations offers a sequence of courses that will prepare students for a successful career in public relations. This writing-intensive certificate program includes a selection of required and elective courses that integrate practical knowledge of the public relations industry with communication planning and research tactics needed in today’s ever-changing world. The sequence of courses is based upon the latest report from the Commission on Public Relations Education and the certification requirements of the Public Relations Society of America. To earn the certificate, student must complete a minimum of 21 credits in the designated courses with a grade of “C” or better.

Total Hours 21

Comm 4199 may count toward internship credit for the BA Communication degree.

For more information on this certificate, please contact the Department of Communication and Media’s Public Relations Coordinator.

Learning Outcomes

Students will be able to:

• Interpret and apply basic public relations principles to design, research and plan public relations campaigns.
• Compose written public relations materials that are written in a clear, brief, concise format following the appropriate format and style.
• Make use of broad knowledge combined with principles of public relations in order to evaluate and create effective public relations campaigns.
• Plan and implement research projects; read and interpret research data as applied to public relations campaigns and message strategy.
• Create and conduct ethically sound and socially responsible public relations strategies and campaigns.

School Psychology EdS

The Educational Specialist in School Psychology (Ed.S.) degree program at the University of Missouri-St. Louis is a National Association of School Psychologists-approved program whose primary goal is to prepare future school psychologists to assume a wide array of professional roles in schools. Built upon a foundation of data-based decision making and problem solving methodology, the program highlights the critical importance of providing timely prevention, early intervention, and intensive research-based interventions to address academic and mental/behavioral health difficulties within a framework of multitiered systems of support.

Degree Requirements

The Ed. S. in School Psychology degree program consists of 60 graduate semester hours that includes coursework in psychological and educational foundations, psychoeducational assessment, and direct and indirect service delivery. Prevention and early intervention of academic, behavioral, and social-emotional problems through consultation, interdisciplinary collaboration, and systems-level interventions are highlighted throughout the program. The Ed. S. degree is a small-cohort program consisting of 10-12 candidates per cohort that maximizes close relationships with faculty and field-based practitioners to develop professional skills and competencies.

Admission requirements include a 3.0 undergraduate GPA, current GRE General Test scores (Verbal, Quantitative and Analytical Writing scores at or above the 50th percentile), three letters of recommendation, a personal statement describing personal goals (not to exceed five double-spaced typed pages) and a curriculum vita detailing relevant experience with children, adolescents, and families. Prerequisite coursework in the areas of Developmental Psychology, and Psychological Statistics is required for admission. Following initial screening, finalists will be invited for an on-campus interview with the School Psychology Program faculty and current Ed. S. candidates. All required application materials will be considered equally when making admission decisions. Applications are reviewed annually with a January 15 deadline. The program may review additional applications until all spaces in the cohort are filled.

Transfer credit may be granted for graduate coursework completed prior to entering the program, but strict limitations apply. The Ed. S. in School Psychology degree program involves a minimum of three years of intensive study. Though it is possible to complete the first year of the curriculum on a part-time basis, please note that practicum during the second year involves two days per week working in a school with a school psychologist, and internship is a yearlong fulltime supervised experience. Consequently, full-time study is recommended and preferred. Graduates of the program are immediately eligible for School Psychologist Certification from the Missouri Department of Elementary and Secondary Education and the Nationally Certified School Psychologist credential from the National Association of School Psychologists. As such, graduates from the program will meet or exceed certification requirements in the majority if not all states in the country.

Learning Outcomes
The UMSL School Psychology Program promotes development of advanced student- and systems-level knowledge and skills to support all students via the following learning outcomes:

**A. Improved Academic and Mental/Behavioral Health Outcomes**

Candidates will develop advanced skills in the areas of multifaceted assessment and data collection techniques, treatment planning and implementation, and evaluation of student responses to academic and mental/behavioral health prevention and intervention efforts.

**B. Culturally-Responsive Practice and Social Justice**

Candidates will understand identity development and develop the skills necessary to work with and advocate for culturally- and linguistically-diverse students and families in a competent and socially-just manner.

**C. Program Development and Evaluation**

Candidates will learn qualitative, quantitative, and mixed methods data collection and research methodologies that will enable them to develop, implement, and evaluate a wide array of school-based interventions and programs for students, educators, and parents.

**D. Facilitation of Organizational/Systems Change**

Candidates will acquire a systems-level perspective of the educational, social, and political influences on development and will use this knowledge to promote systemic and policy changes that will improve educational and psychological outcomes for all students.

---

**Secondary Education BSEd**

**English Emphasis**

The Bachelor’s of Science in Secondary Education degree prepares students to teach in secondary school settings, grades 9-12. This program requires the selection and completion of required coursework in a specific content area.

**University General Education and Graduation Requirements**

B.S.Ed. degree candidates must complete the following General Education requirements (p. 51) and Graduation requirements (p. 19) of the University as outlined in this Bulletin.

The courses listed below fulfill General Education requirements and best prepare students for advanced education coursework and licensure exams.

**Core Areas:**

**First Year Writing**
ENGL 1100  First-Year Writing (MOTR ENGL 200)  3

**Communication Proficiency**
EDUC 2222  Interpretation: Connecting Audiences and Meaning  3
or COMM 1040  Introduction to Public Speaking (MOTR COMM 110)  3

**Math Proficiency**
MATH 1020  Contemporary Mathematics (MOTR MATH 120)  3
or MATH 1030  College Algebra (MOTR MATH 130)  3

**Information Literacy**
ED TECH 2230  Information Literacy  3

**American History or Government**
POL SCI 1100  Introduction to American Politics (MOTR POSC 101)  3
or HIST 1001  American Civilization to 1865 (MOTR HIST 101)  3

**Humanities and Fine Arts**
Choose any 9 hours from approved fields.  9

**Social Science**
Choose any 9 hours. At least one course must meet the cultural diversity requirement  9

**Math and Life/Natural Sciences**
Choose any 9 hours.  9

**Junior Level Writing**
ENGL 3100  Junior-Level Writing  3

**Total Hours**  45

**Program Requirements**

All students in the B.S.Ed. in Secondary Education program are required to take the following Teacher Education courses. Each student must also select a content area and complete the required courses and certification assessments for that area as specified by the Missouri Department of Elementary and Secondary Education.
Grade Requirement
Professional Education courses must be completed with a grade of C or better (courses completed with a grade of C- or below must be retaken).

GPA Requirement
Beginning with those students graduating in May 2017 who will also receive teaching certification, the Missouri Department of Elementary and Secondary Education requires a 3.0 GPA in professional education courses, a 3.0 GPA in the teaching content field, and a 2.75 overall GPA.

Assessment Requirement
Students must pass the required DESE certification assessments to receive the B.S.Ed. degree.

Preparing for the Teacher Education Program
The following courses must be completed prior to applying for admission to the teacher education program:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>TCH ED 1000</td>
<td>Building Community, Culture, and Learning in Education</td>
<td>1</td>
</tr>
<tr>
<td>TCH ED 1001</td>
<td>Early Clinical Experience: Community Agency</td>
<td>1</td>
</tr>
<tr>
<td>TCH ED 2000</td>
<td>Becoming a Professional Educator</td>
<td>1</td>
</tr>
<tr>

Total Credit Hours: 120 Minimum

B.S. Ed. in Secondary Education with Emphasis in English
The B.S. Ed. is a professional education degree designed for students who wish to pursue a teaching career in secondary schools. Much of the discipline-specific coursework parallels the B.A. or B.S. degree in the discipline; however, the Missouri Department of Elementary and Secondary Education (DESE) requires specific coursework for teacher certification. Therefore, students interested in the B.S. Ed. should contact the advising office (OASIS) 314-516-5937 in the College of Education for curriculum based on learning standards.

Graduate coursework for certification can apply towards a Master’s Degree in Secondary Education (DESE) requires specific coursework for teacher certification. Therefore, students interested in the B.S. Ed. should contact the advising office (OASIS) 314-516-5937 in the College of Education for curriculum based on learning standards.  Graduate coursework for certification can apply towards a Master’s Degree in Secondary Education, with additional coursework. Students interested in Master’s Level teacher certification should contact the advising office (OASIS) 314-516-5937 in the College of Education.

Learning Outcomes
Upon completion of the program, graduates will be able to:

- Continually reflect on professional growth to improve student learning outcomes/enhance student learning.
- Integrate technology to create meaningful student learning within the context of a global digital society.
- Apply content and pedagogical knowledge to create authentic and deep learning experiences.
- Use learning science principles to design, implement, and evaluate curriculum based on learning standards.
- Foster effective working relationships with students, school colleagues, families, and community members to enhance student learning and well-being.
• Design and establish a safe, inclusive, and respectful learning environment that nurtures the intellectual, social, and personal development of all students.

• Use equitable frameworks and inclusive practices to create a variety of instructional and assessment opportunities adapted to diverse learners to encourage all students' critical thinking, problem solving, and performance skills.

Secondary Education BSEd Mathematics Emphasis

The Bachelor’s of Science in Secondary Education degree prepares students to teach in secondary school settings, grades 9-12. This program requires the selection and completion of required coursework in a specific content area.

University General Education and Graduation Requirements

B.S.Ed. degree candidates must complete the following General Education (p. 51) requirements (p. 51) and Graduation requirements (p. 19) of the University as outlined in this Bulletin.

The courses listed below fulfill General Education requirements and best prepare students for advanced education coursework and licensure exams.

**Core Areas:**

**First Year Writing**
ENGL 1100 First-Year Writing (MOTR ENGL 200) 3

**Communication Proficiency**
EDUC 2222 Interpretation: Connecting Audiences and Meaning 3

or COMM 1040 Introduction to Public Speaking (MOTR COMM 110) 3

**Math Proficiency**
MATH 1020 Contemporary Mathematics (MOTR MATH 120) 3

or MATH 1030 College Algebra (MOTR MATH 130) 3

**Information Literacy**
ED TECH 2230 Information Literacy 3

**American History or Government**
POL SCI 1100 Introduction to American Politics (MOTR POSC 101) 3

or HIST 1001 American Civilization to 1865 (MOTR HIST 101) 3

**Humanities and Fine Arts**
Choose any 9 hours from approved fields. 9

**Social Science**
Choose any 9 hours. At least one course must meet the cultural diversity requirement 9

**Math and Life/Natural Sciences**
Choose any 9 hours. 9

**Junior Level Writing**
ENGL 3100 Junior-Level Writing 3

Total Hours 45

**Total Credit Hours: 120 Minimum**

**B.S. Ed. in Secondary Education with Emphasis in Biology**

The B.S. Ed. is a professional education degree designed for students who wish to pursue a teaching career in secondary schools. Much of the discipline-specific coursework parallels the B.A. or B.S. degree in the discipline; however, the Missouri Department of Elementary and Secondary Education (DESE) requires specific coursework for teacher certification. Therefore, students interested in the B.S. Ed. should contact the advising office (OASIS) 314-516-5937 in the College of Education for discipline-specific requirements. **Note:** To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.
B.A. or B.S. in Biology with Master's Level Coursework for Secondary Teacher Certification

In addition to the B.S. Ed., students may opt to complete a B.A. or B.S. degree in their discipline as an undergraduate, followed by admission to the Graduate School for Master's level teaching certification. The College of Education has a one-year accelerated program for post-graduate certification called Teach in 12, or students can choose a traditional path to certification. Graduate coursework for certification can apply towards a Master's Degree in Secondary Education, with additional coursework. Students interested in Master's Level teacher certification should contact the advising office (OASIS) 314-516-5937 in the College of Education. Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

Learning Outcomes

Upon completion of the program, graduates will be able to:

- Continually reflect on professional growth to improve student learning outcomes/enhance student learning.
- Integrate technology to create meaningful student learning within the context of a global digital society.
- Apply content and pedagogical knowledge to create authentic and deep learning experiences.
- Use learning science principles to design, implement, and evaluate curriculum based on learning standards.
- Foster effective working relationships with students, school colleagues, families, and community members to enhance student learning and well-being.
- Design and establish a safe, inclusive, and respectful learning environment that nurtures the intellectual, social, and personal development of all students.
- Use equitable frameworks and inclusive practices to create a variety of instructional and assessment opportunities adapted to diverse learners to encourage all students' critical thinking, problem solving, and performance skills.

Secondary Education BSEd Science-Chemistry Emphasis

The Bachelor's of Science in Secondary Education degree prepares students to teach in secondary school settings, grades 9-12. This program requires the selection and completion of required coursework in a specific content area.

University General Education and Graduation Requirements

B.S.Ed. degree candidates must complete the following General Education (p. 51) requirements (p. 51) and Graduation requirements (p. 19) of the University as outlined in this Bulletin.

The courses listed below fulfill General Education requirements and best prepare students for advanced education coursework and licensure exams.

Program Requirements

All students in the B.S.Ed. in Secondary Education program are required to take the following Teacher Education courses. Each student must also select a content area and complete the required courses and certification assessments for that area as specified by the Missouri Department of Elementary and Secondary Education.

Grade Requirement

Professional Education courses must be completed with a grade of C or better (courses completed with a grade of C- or below must be retaken).

GPA Requirement

Beginning with those students graduating in May 2017 who will also receive teaching certification, the Missouri Department of Elementary and Secondary Education requires a 3.0 GPA in professional education courses, a 3.0 GPA in the teaching content field, and a 2.75 overall GPA.

Assessment Requirement

Students must pass the required DESE certification assessments to receive the B.S.Ed. degree.

Total Credit Hours: 120 Minimum
B.S. Ed. in Secondary Education with Emphasis in Physics

The B.S. Ed. is a professional education degree designed for students who wish to pursue a teaching career in secondary schools. Much of the discipline-specific coursework parallels the B.A. or B.S. degree in the discipline; however, the Missouri Department of Elementary and Secondary Education (DESE) requires specific coursework for teacher certification. Therefore, students interested in the B.S. Ed. should contact the advising office (OASIS) 314-516-5937 in the College of Education for discipline-specific requirements. Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

B.A. or B.S. in Physics with Master’s Level Coursework for Secondary Teacher Certification

In addition to the B.S. Ed., students may opt to complete a B.A. or B.S. degree in their discipline as an undergraduate, followed by admission to the Graduate School for Master’s level teaching certification. The College of Education has a one-year accelerated program for post-graduate certification called Teach in 12, or students can choose a traditional path to certification. Graduate coursework for certification can apply towards a Master’s Degree in Secondary Education, with additional coursework. Students interested in Master’s Level teacher certification should contact the advising office (OASIS) 314-516-5937 in the College of Education. Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

Learning Outcomes

Upon completion of the program, graduates will be able to:

• Continually reflect on professional growth to improve student learning outcomes/enhance student learning.
• Integrate technology to create meaningful student learning within the context of a global digital society.
• Apply content and pedagogical knowledge to create authentic and deep learning experiences.
• Use learning science principles to design, implement, and evaluate curriculum based on learning standards.
• Foster effective working relationships with students, school colleagues, families, and community members to enhance student learning and well-being.
• Design and establish a safe, inclusive, and respectful learning environment that nurtures the intellectual, social, and personal development of all students.
• Use equitable frameworks and inclusive practices to create a variety of instructional and assessment opportunities adapted to diverse learners to encourage all students’ critical thinking, problem solving, and performance skills.

Secondary Education BSEd Social Studies Emphasis

The Bachelor’s of Science in Secondary Education degree prepares students to teach in secondary school settings, grades 9-12. This program requires the selection and completion of required coursework in a specific content area.

University General Education and Graduation Requirements

B.S.Ed. degree candidates must complete the following General Education (p. 51) requirements (p. 51) and Graduation requirements (p. 19) of the University as outlined in this Bulletin.

The courses listed below fulfill General Education requirements and best prepare students for advanced education coursework and licensure exams.

- Use equitable frameworks and inclusive practices to create a variety of instructional and assessment opportunities adapted to diverse learners to encourage all students’ critical thinking, problem solving, and performance skills.

Secondary Education MEd
The Masters in Secondary Education, General emphasis program, is appropriate for secondary teachers, specialists, department chairpersons, and those who work in informal learning or international educational settings. Candidates choose concentration areas that will support their personal growth and development as an educational leader. It is important that both students and advisors plan ahead to ensure courses in concentration areas are taken when they are offered in the schedule. Programs must be planned with the academic advisor and meet the approval of the faculty advisor, adhering to the College of Education and UMSL Graduate School policies.

Concentration area choices will appear at the end of the M.Ed. transcript.

General Curricular Program for SEC ED areas
The M.Ed. in Secondary Education consists of 15 required hours (5 courses) plus student choice of two 9 hour concentrations from the list below. The general program option requirements are met by (a) completing three required foundation courses (9 hrs.) toward the beginning of the M.Ed. program, (b) completing the coursework for two choice concentration areas (18 hrs.), and (c) completing the two exit research capstone classes (6 hrs.) for a total of 33 hours.

Most concentration areas indicate 0-3 REQUIRED courses; a list of course CHOICE selections are then provided as a menu to choose your remaining hours for that concentration. In addition, an Elective Concentration allows students, with advisor sign-off, to construct an individualized set of target courses for 1 of their 2 concentration areas.
Transfer graduate credit from another institution could also fit into this concentration choice. Finally, those who want to take 9 graduate hours in an academic content area may use the Discipline Content Area Concentration to integrate this advanced work into their M.Ed. program.

Students who wish to focus intensively (18 hrs) in one area of expertise may choose a concentration that has two sequential Concentration blocks I & II. **Emphasis areas** offered in SEC ED include: Reading, Teaching English to Speakers of Other Languages (TESOL), Teaching of Writing, and Middle Level Education. Reading and TESOL require signing up for two 9 hour sequenced concentrations (Literacy I and II and TESOL I and II, respectively) and may require additional coursework for licensure, as noted. For a C & I emphasis, students just select the C & I concentration and an additional choice concentration.

Required 15 hours of M.Ed. core courses plus two 9-Hour Concentrations

### Required Core

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>TCH ED 6010</td>
<td>Examining History, Community and Social Justice in Education</td>
<td>3</td>
</tr>
<tr>
<td>TCH ED 6020</td>
<td>Teacher Action, Advocacy and Leadership</td>
<td>3</td>
</tr>
<tr>
<td>ED PSY 6030</td>
<td>Instruction, Learning and Assessment</td>
<td>3</td>
</tr>
</tbody>
</table>

### Required Research Courses

These two research courses should be taken in sequence (not together) at the end of your program since the first course prepares you with the knowledge and skills to successfully complete an Action Research project in the capstone exit course. You will design and execute a piece of original practitioner research and present your findings in a public forum.

Total Hours 15

1) This course not offered in summer sessions.

Students seeking a professional Masters in Education Degree choose two 9-hour concentrations in consultation with their advisors that will enhance teacher leadership capacity in practice. The following 9-hour concentrations include an interdepartmental range of concentration areas that can support a candidate’s development of a broad range of skills, knowledge, and dispositions.

### 3) 9 hour Concentration Choices

- a.) Curriculum and Instruction Concentration
- b.) Literacy Concentrations I and II (Certificates in Reading and Writing available)
- c.) Special Education Concentration
- d.) Social Justice Issues Concentration (College of Education Social Justice Certificate available)
- e.) Leadership in Education Concentration
- f.) Supporting Language Learners: TESOL Concentrations I and II (DESE TESOL endorsement available)
- g.) STEM Concentration
- h.) Discipline Content Area Concentration
- i.) Elective Concentration

### Curriculum and Instruction:

In order for all students to optimally achieve, teachers must develop integrated, standards based, innovative curriculum delivered as engaging instruction that equips students to develop the knowledge and skills for a global society. This concentration explores common issues in curriculum design and implementation. Educators will create curriculum and design instruction for their own educational settings.

</tbody>
</table>

### Literacy Concentrations I and II: 9 hours Each

Concentration I is designed for educators who want a deeper understanding of reading and writing processes across the lifespan. This area emphasizes the preparation of leaders in a wide range of school and community settings, including literacy coaches or grade-level leaders. Concentration I emphasizes cutting-edge theory, research and instructional practices in literacy education. Concentration II, for those wanting a Literacy endorsement, applies these understandings through a variety of readings, writings and experiences, both in Clinical and online settings. There are two choices for Concentration II: Writing and Reading. Students who complete Concentrations I and II in Literacy can apply these courses to a K-12 DESE Reading Certificate or the UMSL Graduate Certificate in the Teaching of Writing, but additional coursework may be required.

### Concentration II: Choice A:

**Courses to complete the Reading Certification emphasis**

The M.Ed. program with emphasis in reading (literacy) is designed to enable candidates to further their competencies as teachers of reading, writing, and the other communication arts. The program also prepares them for positions as literacy coaches, reading specialists, curriculum specialists in communication arts and reading areas, consultants in areas of communication arts, and/or for further graduate study. Concentration II enables a student to earn a master’s degree in education with credit towards an emphasis in reading as per requirements laid out by the Department of Elementary and Secondary Education (DESE) for special reading certification in Missouri. Students must complete the required 15 hours of M.Ed. courses, an educational psychology course, plus 18 hours of literacy courses.

Concentration II: Choice B: Courses to complete the Graduate Certificate in the Teaching of Writing

Admission
Applicants who wish to earn a Graduate Certificate in the Teaching of Writing must apply for admission to the certificate program. Applicants must have a 2.75 GPA in undergraduate coursework to be admitted. A background in K-12 or adult education is desirable.

- TCH ED 6880 Gateway Writing Project 6
- TCH ED 6890 Seminar in Professional Writing for Teachers 3

Special Education:
For educators who are not receiving a degree in Special Education, but would like to expand their understanding of Special Education law and the needs of students with cross-categorical disabilities and those with Autism Spectrum Disorders, this concentration offers coursework on the characteristics and effective strategies for teaching students with varied abilities in educational settings. Those interested in the M.Ed. in Special Education or the Graduate Certificate in Autism and Developmental Disabilities should choose concentrations in those designated programs under the Masters in Special Education.

Choose three of the following:
- SPEC ED 6325 Advanced Studies in Classroom & Behavior Management 3
- SPEC ED 6345 Characteristics and Education of Students with High-Incidence Disabilities 3
- SPEC ED 6415 The Law and Special Education 3
- SPEC ED 6610 Foundations of Autism Spectrum Disorder: Research to Practice 3

Social Justice Issues:
Educators need to challenge themselves to understand the variety of assets diverse students and their families bring to educational contexts. An interdisciplinary group of courses is offered for this concentration that invite personal growth and academic knowledge in the area of social justice. An emphasis on engagement and action permeates the course activities.

With completion of TCH ED 6010, TCH ED 6020 and TCH ED 6910 and these 9 hours, students will meet the requirements for the Social Justice in Education Certificate. Applicants who wish to earn a Graduate Certificate in Social Justice in Education must apply for admission to the certificate program.

Choose three of the following:
- CNS ED 6820 Counseling Women Toward Empowerment 3
- CNS ED 6850 Social Class and Poverty Issues in Counseling 3
- ED FND 6203 Political Contexts of Education 3
- GS 5053 Advanced Studies In African-American History 3
- TCH ED 6230 Cross-Cultural Communication in the Classroom 3

Leadership in Education:
Organizations need leaders who understand the complexities of systems and working with diverse staff and families within situated communities in a dynamic and changing educational environment. Leadership skills can be taught and nurtured. This Leadership in Education concentration allows educators in various roles and career levels to apply principles of leadership to creating effective communities of practice.

Required Courses:
- ED ADM 6503 Organizational Change in Education 3

Choose two of the following:
- ED ADM 6205 Legal Contexts of Education 3
- ED FND 6200 Demographic Contexts of Education 3
- ED FND 6203 Political Contexts of Education 3
- ED ADM 6401 School Staff Development and Supervision 3

Supporting Language Learners: TESOL Concentrations I and II: 9 hours each
This concentration is designed for those who want to better understand Second Language Acquisition (SLA) and Teaching English to Speakers of Other Languages (TESOL) processes. Courses emphasize the theoretical foundations of Second Language Acquisition and TESOL and their practical application to practice. Concentration I is open to all Masters in Education students.

In order to get a Missouri TESOL endorsement, complete BOTH Concentration I and Concentration II (18 hours). The graduate certificate in Teaching English to Speakers of Other Languages (TESOL) is intended for individuals with a bachelor’s degree who would like to advance their knowledge about language learning in culturally and linguistically diverse classrooms. The program is a combination of theory and practice, covering the key concepts, issues and innovative strategies required to apply this knowledge. Students may seek this Graduate Certificate simultaneously with the M.Ed. in Secondary Education with a specialization in TESOL.

Admission
Applicants who wish to earn a Graduate Certificate in TESOL must apply for admission to the certificate program and to the Graduate School at the UM-St. Louis as a non-degree student or as a master’s or doctoral student. Applicants must have a 2.75 GPA in undergraduate coursework to be admitted. A background in K-12 or adult education is desirable.

Requirements
Students must maintain a minimum GPA of 3.0 to remain in the certificate program. The DESE endorsement is awarded after completion of Concentrations I and II. A program of study, or M-1, should be filed in the first one-third of the program. Students should file the Intent to Complete a Graduate Certificate form at the beginning of their last semester. The Graduate Certificate in TESOL requires 18 credit hours of course work, including an entry course.

TESOL Concentration I:
- TCH ED 6210 Foundations of Teaching English to Speakers of Other Languages 3
- TCH ED 6220 Principles of Second/Foreign Language Acquisition 3
- TCH ED 6230 Cross-Cultural Communication in the Classroom 3
TESOL Concentration II:

- **TCH ED 6240** Assessment for Teaching English to Speakers of Other Languages (3)
- **TCH ED 6250** Methods and Materials for Teaching English to Speakers of Other Languages (3)
- **TCH ED 6260** Practicum in Teaching English to Speakers of Other Languages (3)

STEM Concentration:

Many challenges remain in the attraction and preparation of youth for the careers in fields of science, technology, engineering and mathematics (STEM). Those who teach in these areas need to continually work toward developing and implementing relevant curricula and develop new instructional strategies as well as revise and upgrade current methodology. The STEM Concentration focuses on professional development with respect to instructional research and best practices for all involved in enhancing STEM literacy.

- **SEC ED 6431** STEM Instruction in Secondary Education (3)
  or **ELE ED 6431** STEM Instruction in Elementary Education
- **ED TECH 5340** Selection and Utilization of Educational Multimedia (3)
- **ED TECH 6436** Computer-Mediated Communication in Education (3)
- **ED TECH 6448** Technology-Supported Inquiry Learning (3)

Discipline Content Area Concentration:

Educators recognize the importance of staying current in their field of teaching. This Discipline Content Concentration allows for 9 hours of graduate level credit in a content area related to one’s field of practice. This includes graduate credit in areas such as history, English, math, science, foreign language, health and PE, and art and music. Courses for this concentration need to be approved by advisors before they are included on the M-1 program form.

Elective Concentration:

To insure maximum flexibility in course selection to meet the individual needs of professional educator’s development, this concentration represents an opportunity to select three unique courses from the various concentration areas in an eclectic and personalized way. Choices to include in this concentration need to be approved by advisors and signed off on by the program director.

Learning Outcomes

Upon completion of the program, graduates will be able to:

- Continually and systematically reflect on professional growth to enhance student learning.
- Integrate technology to create meaningful student learning within the context of a global digital society.
- Apply advanced content and pedagogical knowledge to create authentic and deep learning experiences.
- Extend learning science principles to design, implement, and evaluate curriculum based on learning standards.
- Create and foster effective working relationships with students, school colleagues, families, and community members to enhance student learning and well-being.
- Design and establish a safe, inclusive, and respectful learning environment that nurtures the intellectual, social, and personal development of all students.
- Utilize equitable frameworks and inclusive practices to expertly create a variety of instructional and assessment opportunities adapted to diverse learners to encourage all students’ critical thinking, problem solving, and performance skills.

Secondary Education MEd with Teacher Certification

Those holding a baccalaureate degree or major in the teaching field who would like to pursue initial teacher preparation and a Master’s degree take the following program. The exact number of hours required will depend upon certification requirements for the chosen teaching field.

Admission Requirements for the Option in Teacher Certification:

1. A passing score on the designated Missouri Content Examination or an approved program of study
2. A 2.75 or higher overall GPA
3. Approved results of the Family Care Safety Registry
4. A clear TB test or chest x-ray, if appropriate

Application Deadline: April 1st

Total Hours 30

1 This course is not offered in summer sessions.

Learning Outcomes

Upon completion of the program, graduates will be able to:

- Continually and systematically reflect on professional growth to enhance student learning.
- Integrate technology to create meaningful student learning within the context of a global digital society.
- Apply advanced content and pedagogical knowledge to create authentic and deep learning experiences.
- Extend learning science principles to design, implement, and evaluate curriculum based on learning standards.
- Create and foster effective working relationships with students, school colleagues, families, and community members to enhance student learning and well-being.
- Design and establish a safe, inclusive, and respectful learning environment that nurtures the intellectual, social, and personal development of all students.
- Utilize equitable frameworks and inclusive practices to expertly create a variety of instructional and assessment opportunities adapted to diverse learners to encourage all students’ critical thinking, problem solving, and performance skills.

Secondary Education MEd, Reading Emphasis

The M.Ed. program with emphasis in reading (literacy) is designed to enable candidates to further their competencies as teachers of reading, writing and other communication arts. The program also prepares them for positions as literacy coaches, reading specialists, curriculum specialist in communication arts and reading areas, consultants in areas of communication arts, and/or for further graduate study. The following program enables the student to earn a M.Ed. with an emphasis in Reading while fulfilling the Department of Elementary and Secondary Education’s requirements for special reading certification in Missouri. A course in reading in the content area is required for secondary certification. If this has not been taken as an undergraduate, it must be selected as an elective in the program for a Masters in Secondary Education with a Reading Emphasis. The minimum required and recommended courses are as follows:

Required Core requirements

**Learning Outcomes**

Upon completion of the program, graduates will be able to:

- Continually and systematically reflect on professional growth to enhance student learning.
- Integrate technology to create meaningful student learning within the context of a global digital society.
- Apply advanced content and pedagogical knowledge to create authentic and deep learning experiences.
- Extend learning science principles to design, implement, and evaluate curriculum based on learning standards.
- Create and foster effective working relationships with students, school colleagues, families, and community members to enhance student learning and well-being.
- Design and establish a safe, inclusive, and respectful learning environment that nurtures the intellectual, social, and personal development of all students.
- Utilize equitable frameworks and inclusive practices to expertly create a variety of instructional and assessment opportunities adapted to diverse learners to encourage all students’ critical thinking, problem solving, and performance skills.
Admission Requirements for the Graduate Certificate in Secondary School Professional Teacher Certification in the specified discipline. This graduate certificate program option leads to Missouri Initial State Certification. This program of study is for individuals with a Bachelor's degree who are not simultaneously pursuing the M.Ed. and teacher certification. An approved program of study, which includes at least 6 credit hours in TCH ED 5310 or TCH ED 5311, must be completed prior to applying for the Graduate Certificate. The application deadline is set by the Graduate Admissions Office.

Learning Outcomes
Upon completion of the program, graduates will be able to:

- Continually and systematically reflect on professional growth to enhance student learning.
- Integrate technology to create meaningful student learning within the context of a global digital society.
- Apply advanced content and pedagogical knowledge to create authentic and deep learning experiences.
- Extend learning science principles to design, implement, and evaluate curriculum based on learning standards.
- Create and foster effective working relationships with students, school colleagues, families, and community members to enhance student learning and well-being.
- Design and establish a safe, inclusive, and respectful learning environment that nurtures the intellectual, social, and personal development of all students.
- Utilize equitable frameworks and inclusive practices to expertly create a variety of instructional and assessment opportunities adapted to diverse learners to encourage all students' critical thinking, problem solving, and performance skills.

Secondary School Teaching Graduate Certificate

The Graduate Certificate in Secondary School Teaching prepares those with at least a bachelor's degree for teaching in high school. Normally, this Graduate Certificate is taken by students who are not simultaneously pursuing the M.Ed. and teacher certification.

This program of study is for individuals with a Bachelor's degree who would like to prepare for teacher certification in Secondary School Teaching. This graduate certificate program option leads to Missouri Initial Professional Teacher Certification in the specified discipline.

Admission Requirements for the Graduate Certificate in Secondary School Teaching:

- A passing score on the designated Missouri Content Examination or an approved program of study
- A 2.75 or higher overall GPA
- Approved results of the Family Care Safety Registry
- A clear TB test or chest X-ray, if appropriate
- Students must meet the application deadlines set by the Graduate School

State Certification

For TESOL state certification, the students may need additional coursework. Please consult your academic or faculty advisor.

Social Justice in Education Graduate Certificate

The Graduate Certificate in Social Justice in Education supports the understanding, knowledge, and skills needed to create a just and equitable society. The curriculum focuses on institutional and personal processes, values, attitudes, and behaviors that sustain injustice while encouraging the development of positive educational, familial, community-centric, and social group advocacy and action.

The Graduate Certificate in Social Justice is an 18 credit hour program. To earn a certificate, one must a) complete 6 credit hours in the Foundations Choice Sequence, b) complete 12 credit hours in the Elective Choice Sequences, and as a capstone c) submit during the final semester of the program, for review by a faculty panel, an artifact/assignment from a Certificate course together with a written reflection that articulates in what ways it represents one’s learning to become more culturally competent and socially just.

Social Justice Electives

Select four courses from the list of electives. The elective courses are organized into three categories: Social Justice and Action, Diversity, and Culture and Context. You may select your electives from any or all categories.

Social Justice and Action Elective Courses

- CNS ED 6830 Counseling African American Clients
- CNS ED 6840 Counseling Sexual and Gender Minorities
- CNS ED 6850 Social Class and Poverty Issues In Counseling
- TCH ED 6020 Teacher Action, Advocacy and Leadership

Or other approved elective

Diversity Elective Courses

- CNS ED 6030 Foundations for Multicultural Counseling
- ED FND 6430 Ecological Context of Urban Education
- GS 4100 Introduction to Feminist and Gender Theory
- TCH ED 6010 Examining History, Community and Social Justice in Education
- TCH ED 6350 Gender, Language and Identity

Or other approved elective

Culture and Context Elective Courses

- CNS ED 6220 Counseling Individuals with Disabilities
- ED ADM 6200
- ED ADM 6203
- ED FND 6430 Ecological Context of Urban Education
- ED REM 7712 Discourse Analysis in Education
- ED TECH 6434 Technology and Privilege

Or other approved elective

1 Course not taken for the Foundations Sequence requirement may be taken as an Elective course.

Social Work BSW

General Education Requirements

Majors must satisfy the university and college general education requirements (p. 51), although proficiency in a foreign language is recommended but not required.

Courses required for the BSW degree may not be taken on a satisfactory/unsatisfactory basis except SOC WK 4800 and SOC WK 4850.

Admission Requirements

Students entering UMSL as freshman and as transfer students should indicate a pre-social work major. Students must apply to the program concurrently with SOC WK 3100. Admission to the program is conditional upon the successful completion of all necessary requirements.

Requirements for Admission to the Social Work program:

- Junior standing
- GPA of 2.75 or higher in social work related areas and an overall GPA of 2.5 or higher.
- Submission of:
  - Application for admission to the social work program.
  - Two letters of reference: one from a college or university professor and one other from a work or volunteer experience supervisor.
  - Completion of SOC WK 2000, SOC WK 2001, and SOC WK 2200 or their equivalents or completion of an A.A. in Human Services,
  - Completion of PSYCH 1003 and SOC 1010 with a C- or better.
  - Attendance at Professional Development Workshop held in the School of Social Work.

Applicants may be asked to meet with the Social Work Admissions Committee.

Degree Requirements

Students must have a minimum GPA of 2.5 in social work and related-area requirement courses to enter field practicum. Candidates for this degree program must complete the core requirements including the following social work courses:

SOC WK 2000 Social Work and Social Issues 3
SOC WK 2001 Social Work and Social Issues Lab 1
SOC WK 2200 Social Welfare as a Social Institution 3
SOC WK 3100 Introduction to Strategies for Social Work Practice 3
SOC WK 3210 Social Issues and Social Policy Development 3
SOC WK 3410 Research Design in Social Work 3
SOC WK 3510 Human Behavior in the Social Environment 3
SOC WK 3700 Diversity and Social Justice 3
SOC WK 4110 Social Work Practice with Individuals, Families, and Groups 3
SOC WK 4300 Social Work Practice with Communities 3
SOC WK 4350 Human Service Organizations 3
SOC WK 4800 Supervised Field Experience in Social Work I 8
SOC WK 4850 Supervised Field Experience in Social Work II 8
SOC WK 4801 Integrative Field Experience Seminar I 4
SOC WK 4851 Integrative Field Experience Seminar II 4

Total Hours 43

A minimum of 43 hours or a maximum of 50 hours must be taken in social work. A minimum of 30 hours is required in related area departments.

Evaluation of social work transfer credits will be done by a social work adviser on an individual basis.
Related Area Requirements

The following courses, or their alternatives, are required:

- ECON 1000: Economics in Everyday Life (MOTR ECON 100) 3
- or ECON 1005: Family Economics and Household Development
- POL SCI 1100: Introduction to American Politics (MOTR POSC 101) 3
- PSYCH 1003: General Psychology (MOTR PSYC 100) 3

Biology

Select one of the following: 3-4
- BIOL 1012: General Biology (MOTR BIOL 100)
- BIOL 1102: Human Biology (MOTR LIFS 150)
- BIOL 1131: Human Physiology and Anatomy I
- BIOL 1141: Human Physiology and Anatomy II

Sociology

SOC 1010: Introduction to Sociology (MOTR SOCI 101) 3
SOC 2160: Social Psychology 3

Select one of the following: 3-4
- SOC 3220: Social Statistics
- PSYCH 2201: Psychological Statistics
- CRIMIN 2220: Statistical Analysis In Criminology And Criminal Justice

At least 9 additional hours must be taken in social work, sociology, political science, psychology, gender studies, anthropology, criminology and criminal justice, economics, gerontology, or child advocacy studies at the 2000 level or above.

Objectives of the BSW Program

The BSW program has the following educational outcomes. Students who graduate with a BSW will be generalist practitioners who:

- Identify as professional social workers and conduct themselves accordingly.
- Understand the values and ethics of the social work profession and the relationship between personal beliefs and values, professional values and ethics, and professional social work practice.
- Utilize critical thinking, capacity building, and analytical and communication skills to synthesize and analyze information to inform social work practice.
- Understand the importance of diversity, difference, power, and privilege in shaping life experiences for diversity-competent practice.
- Possess the knowledge and skills to fight effectively against human oppression, discrimination, and social inequality and to formulate and foster social change initiatives to advance social and economic justice.
- Engage in research-informed practice and practice-informed research to evaluate professional practice and/or the professional practice of others.
- Apply knowledge of human behavior and the social environment to guide assessment and intervention.
- Understand major social and welfare policies and analyze and formulate policies to advocate for social and economic justice.
- Use leadership skills to respond to the changing context of social work practice.
- Utilize skills of engagement, assessment, intervention and evaluation, including theory and practice skills, across all levels of practice.

Latin Honors Requirements

In accordance with the University’s Latin Honors policy (p. 26), candidates graduating from the School of Social Work in the 2020-2021 Academic Year must meet the following GPA qualifications:

- Summa Cum Laude: 3.984
- Magna Cum Laude: 3.884
- Cum Laude: 3.645

Hours taken in social work will apply toward the maximum of 50 hours that may be taken in social work courses. The Social Work program may require students to pass a placement test to enroll in the next level course, provided this test or its equivalent is administered to all students seeking to enroll in that course.

Social work majors must have a grade of C- or better and maintain a cumulative grade point average of 2.5 or better in all course work specifically required for the major, with satisfactory grades in practicum.

Note: Anthropology, biological sciences, economics, and Spanish courses are strongly recommended by graduate schools of social work.
requirements to be considered for admission:
of Social Work. Applicants to the program must meet the following

</tbody>
</table>

Total Hours: 15

1 Nine hours must be taken in SOC WK, ANTHRO, CAST, CRIMIN, ECON, GERON, GS, MVS, POL SCI, PSYCH or SOC at the 2000 level or above.

Please Note: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are required to meet with their advisor each semester. All requirements are subject to change.

Social Work MSW
Master of Social Work
Admission Requirements
Admission to the MSW Program requires admission to the University of Missouri-St. Louis Graduate School and acceptance by the School of Social Work. Applicants to the program must meet the following requirements to be considered for admission:

- Completion of a bachelor's degree from a college or university accredited by a recognized regional accrediting organization.
- Completion of a liberal arts education including courses in the humanities, the social and behavioral sciences, and the physical sciences. These courses must include one in statistics.
- Attainment of a cumulative grade point average of at least 3.0 on a 4.0 scale for all undergraduate course work and a grade point average of 3.0 on a 4.0 scale in the major field.
- Submission of the following documents by the admission deadline:
  - A completed application to the UMSL Graduate School and a completed MSW supplemental application.
  - Two written essays.
  - Three letters of reference. – One from a professor in your major field of study, and one from a work or volunteer supervisor or other professional reference. Letters from employees/supervisees, friends, and family may not be used.
  - Official transcripts from all colleges and university attended.
  - Applicable fees.

Application Deadline
The deadline for application to the MSW program is March 1 for admission in the following fall semester and October 15 for admission in the following Spring semester. See School of Social Work's website for more details.

Admissions to the Program with Advanced Standing
Applicants with a BSW, BASW, or BSSW, from an accredited social work program may be given up to 24 credit hours of advanced standing for foundation social work courses. Admission to the advanced standing program is available to applicants who meet the general admission requirements and who:

1. have earned a bachelor's degree in social work from a program accredited by the Council on Social Work Education within five years of applying to the MSW Program, and
2. have earned a grade point average of at least 3.0 on a 4.0 scale in the social work foundation curriculum, and no less than a B in all courses that are applicable.

Course Waivers
A student who does not have a bachelor's degree in social work but who can document successful completion (with at least a B) of foundation courses from an accredited BSW program within the last five years will be given course waivers and be allowed to replace these courses with electives.

Students from non-accredited BSW programs or students who have taken comparable course work in other undergraduate programs may take test-out examinations for select foundation courses; waivers will be given if students successfully pass test-out examinations. The waiver does not provide graduate credit; it is a mechanism for allowing elective courses to be substituted for required foundation courses.

Academic credit cannot be given for life experience and/or previous work experience, in whole or in part, in lieu of field practicum or foundation year courses.

Degree Requirements
The MSW is a two-year program comprising a foundation year and a concentration year. All students are required to take the foundation year courses. These provide a common base of knowledge across all practice settings and populations. Beyond the general requirements of the Graduate School, the department requires a minimum of 60 semester hours of course work, of which 48 must be at the 5000 or 6000 level and 48 must be in social work or cross-listed with social work, including the following foundation courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>

</tr>
<tr>
<td>SOC WK 5450</td>
<td>Social Work Research Methods and Analysis II</td>
<td>3</td>
</tr>
</tbody>
</table>
Upon completion of the 30 credits of foundation year requirements, students move into a year of advanced study, called the concentration. The concentration year requires 30 hours of course work that includes up to 12 hours of elective graduate-level courses approved by the adviser. Students plan their degree program to reflect their career interests in the following concentration areas:

- Family Practice
- Leadership and Social Change

Additionally, if students choose, they may elect to participate in one of the following areas of emphasis:

- Aging and Social Work Practice
- Health & Behavioral Health
- School Social Work

To remain in good standing, students must maintain a cumulative GPA of 3.0 or better.

The field practicum is an integral part of the concentration year. Students will complete 300 hours (20 hours of work per week) of MSW supervised practice in an agency during the second semester of the foundation year and 600 hours total (20 hours of work per week) in the concentration year. A student must receive a grade of B or better in the first-year field practicum course in order to be eligible to enter the second year field practicum. S/U grades are given for the concentration practicum.

### Part Time Status

Students who enter the program as part-time students complete the foundation year in two years and the concentration course work in an additional two years.

All students must complete the MSW in four years.

### Goals of the Master of Social Work

The goals of the MSW program of the University of Missouri- St. Louis are consistent with the land-grant public service mission of the University, the MSW feasibility study, and the educational policy statement of CSWE and are to:

- Prepare students with the professional knowledge, skills, values and ethics for effective social work practice.
- Prepare students to utilize critical thinking and capacity building skills at all levels of social work practice.
- Prepare students to analyze and address dynamic issues and challenges facing diverse populations and to promote social justice and positive social change.
- Prepare students to conduct and utilize research to respond effectively to dynamic social contexts, issues and problems found in social work practice.
- Assist and support faculty in the advancement of social work knowledge, teaching, and service.
- Develop and participate in collaborative activities with social agencies, communities, organizations, and governments that will enhance student learning, enrich faculty research and teaching, and promote human and societal well-being.

### Sociology BA

Sociology will enable you to see the world in a new light; it is the scientific study of human social relationships, interactions, and institutions. Whether they be friendships, families, church groups, socioeconomic classes, complex organizations, or nations, much of our lives are socially constructed. And in a society where individualism is celebrated, it is easy to forget that the way we behave and feel is socially produced. This is the basic premise of sociology. After your core courses, a BA in Sociology will focus on qualitative tools like interviews, stories, and community engagement to answer that critical question “What is this all about?”

### General Education Requirements

Majors must satisfy the university and college general education requirements (p. 51). Any foreign language may be used to meet the language requirement for the B.A. degree.

All required courses for the major must be completed with a grade of C- or better. Courses counting toward the major requirements may not be taken on a satisfactory/unsatisfactory basis.

The minimum number of Sociology hours required for the B.A. degree is 36.

**Core Courses: 21 hours**
- Concentration Courses: 9 hours
- Elective Courses: 6 hours

C. Gender and Families
SOC/GS 2102 Introduction to Gender Studies 3
SOC/GS 2103 Gender Roles in Society 3
SOC 3243 Marriage, Family and Kinship 3
Total Hours 9

Electives (6 hours)
Students must complete at least 3 hours of SOC at the 4000-level and an additional 3 hours of SOC at the 2000-level or above. GERON, GS, MVS or other courses may be substituted with approval of the faculty advisor.

Sociology Program Learning Outcomes
The Sociology Gerontology and Gender Department offers the following programs and has identified what students will know and be able to do after completing each program. Explore this page to learn more about the opportunities each program provides. Click the shortcut to jump down to view the outcomes for minor.

BA and BS in Sociology (p. 628)
Sociology Minor (p. 628)

Bachelor of Arts (B.A.) and Bachelor of Science (B.S.) in Sociology
Upon Completion of the Bachelor of Arts, or Bachelor of Science in Sociology, a student will be able to:

Identify and apply sociological theories to understand social phenomena by:

- Recognizing the differences between “folk” explanations of social phenomena and sociological theories of those phenomena
- Distinguishing modes of sociological inquiry from other disciplinary modes of inquiry
- Applying key concepts and key themes in sociological theory to analyze social phenomena

Apply scientific principles to understand the social world by:

- Effectively utilizing evidence-based knowledge and sociological theories and concepts to generate research questions and/or hypotheses
- Identifying the strengths and weaknesses of scientific methodology and methods for analyzing social phenomena in different contexts
- Explaining disciplinary standards for the qualitative and quantitative analysis of data

Critically evaluate explanations of human behavior and social phenomena by:

- Identifying and appraising major theoretical perspectives, including their assumptions, key concepts, and main arguments in terms of historical context and interpretive and explanatory capacities
- Employing the sociological imagination to analyze social problems in context and evaluate solutions to social problems

Use sociological knowledge to inform social change by:

- Engaging with the world around them, including everyday life, work, policy debates, stakeholders, and the public
- Constructing and proposing real world solutions to social issues;
- Expressing sociological ideas in a clear and coherent manner in written and oral communication
- Demonstrating informal, technological, qualitative, and quantitative literacy

Minor in Sociology
Upon completion of the Minor in Sociology, a student will be able to:

Identify and apply sociological theories to understand social phenomena by:

- Recognizing the differences between “folk” explanations of social phenomena and sociological theories of those phenomena
- Distinguishing modes of sociological inquiry from other disciplinary modes of inquiry
- Applying key concepts and key themes in sociological theory to analyze social phenomena
- Discerning the role of social structures in creating and reproducing social inequality and examining how social structures change
- Distinguishing among micro, meso, and macro levels of observation, inquiry, and analysis

Apply scientific principles to understand the social world by:
- Effectively utilizing evidence-based knowledge and sociological theories and concepts to generate research questions and/or hypotheses
- Identifying the strengths and weaknesses of scientific methodology and methods for analyzing social phenomena in different contexts
- Explaining disciplinary standards for the qualitative and quantitative analysis of data

Critically evaluate explanations of human behavior and social phenomena by:

- Identifying and appraising major theoretical perspectives, including their assumptions, key concepts, and main arguments in terms of historical context and interpretive and explanatory capacities
- Employing the sociological imagination to analyze social problems in context and evaluate solutions to social problems

Sociology BS

Sociology will enable you to see the world in a new light; it is the scientific study of human social relationships, interactions, and institutions. Whether they be friendships, families, church groups, socioeconomic classes, complex organizations, or nations, much of our lives are socially constructed. And in a society where individualism is celebrated, it is easy to forget that the way we behave and feel is socially produced. This is the basic premise of sociology. After your core courses, a BS in Sociology will focus on quantitative research tools like surveys, statistics, and data analysis to answer that critical question “What is this all about?”

General Education Requirements

 Majors must satisfy the university and college general education requirements (p. 51). Foreign language proficiency is not required, although students are encouraged to take foreign language courses.

All required courses for the major must be completed with a grade of C- or better. Courses counting toward the major requirements may not be taken on a satisfactory/unsatisfactory basis.

The minimum number of Sociology hours required for the B.S. degree is 36.

Core Courses: 21 hours

Concentration Courses: 9 hours

Sociology B.S. Core (21 hours)

¹ INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.
A statistics class from another social science department may be substituted with approval of the faculty advisor.

**Concentration (9 hours)**

Students seeking a B.S. in Sociology must complete one of the following concentration choices:

A. Urban Sociology

B. Sociology of Health and Aging

C. Gender and Families

D. Military Sociology

**A. Urban Sociology**

<table>

</tr>
</tbody>
</table>

**Electives (6 hours)**

Students must complete at least 3 hours of SOC at the 4000-level and an additional 3 hours of SOC at the 2000-level or above. GER, GS, MVS or other courses may be substituted with approval of the faculty advisor.

Pursuing a second concentration is encouraged.

**Learning Outcomes**

Upon completion of the program, graduates will be able to:

- Identify and apply sociological theories to understand social phenomena by:
  - Recognizing the differences between “folk” explanations of social phenomena and sociological theories of those phenomena
  - Distinguishing modes of sociological inquiry from other disciplinary modes of inquiry
  - Applying key concepts and key themes in sociological theory to analyze social phenomena
  - Discerning the role of social structures in creating and reproducing social inequality and examining how social structures change
  - Distinguishing among micro, meso, and macro levels of observation, inquiry, and analysis

- Apply scientific principles to understand the social world by:
  - Effectively utilizing evidence-based knowledge and sociological theories and concepts to generate research questions and/or hypotheses
  - Identifying the strengths and weaknesses of scientific methodology and methods for analyzing social phenomena in different contexts
  - Explaining disciplinary standards for the qualitative and quantitative analysis of data

- Critically evaluate explanations of human behavior and social phenomena by:
  - Identifying and appraising major theoretical perspectives, including their assumptions, key concepts, and main arguments in terms of historical context and interpretive and explanatory capacities
  - Employing the sociological imagination to analyze social problems in context and evaluate solutions to social problems

- Use sociological knowledge to inform social change by:
  - Engaging with the world around them, including everyday life, work, policy debates, stakeholders, and the public
  - Constructing and proposing real world solutions to social issues;
  - Expressing sociological ideas in a clear and coherent manner in written and oral communication
  - Demonstrating informal, technological, qualitative, and quantitative literacy

**Sample Four Year Plans**

Total Hours: 120

1. INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

Please Note: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Sociology Minor

Requirements for the Minor

A minor in sociology requires 15 hours of course work: 12 hours of required courses and 3 hours of electives.

Candidates must have a cumulative grade point average of 2.0 or better in the minor. Courses taken on a satisfactory/unsatisfactory basis may not be applied to the minor.

Required Courses

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOC 1010</td>
<td>Introduction to Sociology (MOTR SOCI 101)</td>
</tr>
<tr>
<td>SOC 1040 or SOC 1241</td>
<td>Social Problems</td>
</tr>
<tr>
<td>SOC 2160</td>
<td>Globalization and Social Change</td>
</tr>
<tr>
<td>SOC 3210</td>
<td>Social Psychology</td>
</tr>
<tr>
<td>SOC 3210</td>
<td>Sociological Theory</td>
</tr>
</tbody>
</table>

Elective Course(s):

Select three additional sociology hours at the 3000 level or above. Special topics courses or other courses relevant to sociology may be included as electives when approved in advance by the faculty advisor.

Students in the Bachelor of Liberal Studies program must take one additional 4000 level course in Sociology not used in the minor, excluding SOC 4350 (Special Study) or SOC 4385 (Internship) for the capstone course requirement.

Learning Outcomes

Upon completion of the Minor in Sociology, a student will be able to:

Identify and apply sociological theories to understand social phenomena by:

- Recognizing the differences between “folk” explanations of social phenomena and sociological theories of those phenomena
- Distinguishing modes of sociological inquiry from other disciplinary modes of inquiry
- Applying key concepts and key themes in sociological theory to analyze social phenomena
- Discerning the role of social structures in creating and reproducing social inequality and examining how social structures change
- Distinguishing among micro, meso, and macro levels of observation, inquiry, and analysis

Apply scientific principles to understand the social world by:

- Effectively utilizing evidence-based knowledge and sociological theories and concepts to generate research questions and/or hypotheses
- Identifying the strengths and weaknesses of scientific methodology and methods for analyzing social phenomena in different contexts

Gender Studies Minor or Elective 3 Elective or minor 3
Elective or minor 3 Elective or minor 3
Elective or minor 3 Elective or minor 2

Total: 120
Upon completion of the minor, students should be able to:

Skills and Knowledge Areas
- apply reading strategies to glean key information from more challenging texts;
- compose simple practical texts, such as messages and letters, requests for information, and notes on topics of personal and professional interest and;
- assess language reference resources and use them effectively.

Cultural Goals:
- recognize some of the key historical, social, economic, and political forces in the target cultures;
- demonstrate awareness of some of the linguistic, ethnic, racial, religious, cultural, and social diversity of the target cultures and;
- discuss film, media, literature, art, etc. in their socio-historical contexts.

The specific language minor goals are based on the National Standards for Foreign Language Learning and the American Council on the Teaching of Foreign Languages (ACTFL) Proficiency Guidelines. Minors are expected to reach the Intermediate-Mid level proficiency in speaking, listening, reading and writing, according to the ACTFL Proficiency Guidelines.

Spanish Minor

A minor in French, German, Japanese or Spanish requires the completion of four courses in the language beyond the basic foundation sequence (Language 1001, Language 1002, and Language 2101). Transfer students must complete at least two courses for the minor at UMSL. All courses must be passed with a grade of C- or better.

Specific Requirements for the Spanish Minor

Select two of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPANISH 2172</td>
<td>Spanish Composition</td>
</tr>
<tr>
<td>SPANISH 2180</td>
<td>Readings In Spanish</td>
</tr>
<tr>
<td>SPANISH 2199</td>
<td>Special Topics: Language Immersion: Spanish</td>
</tr>
</tbody>
</table>

Plus two Spanish courses on the 3000-level or above 6

Total Hours 13-14

Minimum total hours required for the minor in Spanish is 12 beyond SPANISH 2101.

Learning Outcomes

Graduates with a minor in French, German, Spanish, or Modern Languages from the University of Missouri-St. Louis can use the language to interact with native speakers on familiar topics related to their daily lives. They have an emerging understanding of the target cultures fostered through engaging courses and opportunities such as study abroad. They can apply their linguistic and cultural competencies in real-life situations such as travel and work.

Skills and Knowledge Areas

Upon completion of the minor, students should be able to:

Linguistic Goals:
- In listening/speaking:
  - identify the main ideas and supporting details of texts about familiar and concrete topics, such as those on radio, television, and podcasts;
  - take part in basic conversations on topics related to work, school, home, leisure activities, and culture and,
  - produce uncomplicated descriptions and narrations on familiar topics.
- In reading/writing:
  - identify the main idea and supporting details in a variety of non-complex authentic texts of various genres;
  - critically evaluate explanations of human behavior and social phenomena by:
    - identifying and appraising major theoretical perspectives, including their assumptions, key concepts, and main arguments in terms of historical context and interpretive and explanatory capacities
    - employing the sociological imagination to analyze social problems in context and evaluate solutions to social problems
• a life-perspective of students with exceptional learning needs, both young children who transition into kindergarten and those transitioning into adulthood.

### Required Foundation Courses

Students are required to complete the following courses within the first 15 hours of study.

<table>
<thead>
<tr>
<th>Course Code</th>

### Special Education MEd, Cross Categorical Disabilities Emphasis

The M. Ed. Program in Special Education explores important core knowledge in Special Education. The program's primary goal is to empower professionals as thoughtful educators who use best practices when assisting and empowering students with disabilities. Research and data-based decision-making are emphasized throughout the program. Graduate students will apply learned and evaluated research into practice in their courses, and learn to analyze multiple types of assessment data. The M.Ed. Program in Special Education consists of an initial required core of courses, a concentration area corresponding to the chosen emphasis area, and a capstone or exit course block.

When graduate students are accepted into the program, their transcripts may be reviewed, as necessary, to identify compliance with state education certification guidelines. Students who wish to be certified in the education of children with cross-categorical disabilities will be required to fulfill general certification requirements, as well as graduate coursework. Upon completion of this advanced degree, professionals will have developed an in-depth knowledge-base related to

- various learning contexts within and outside of the school setting
- the multiple influences on educational practices in schools
- the characteristics and instructional needs of learners with disabilities
- assessment strategies for monitoring instruction
- instructional best practices
- using research to inform practice in the classroom
- diversity awareness
- contexts that affect student learning
- the powerful interactions between setting events and specific learner outcomes
- a life-perspective of students with exceptional learning needs, both young children who transition into kindergarten and those transitioning into adulthood.

### Required Foundation Courses

Students are required to complete the following courses within the first 15 hours of study.

<table>
<thead>

</tr>
</tbody>
</table>

### Total Hours

30
Upon completion of the program, graduates will be able to:

### Learning Outcomes

- Identify a variety of formal and informal assessments, data sources, and practices to implement and guide educational decisions for individuals with disabilities.
- Select, adapt, and implement a repertoire of evidence-based practices to advance learning and quality of life of individuals with disabilities.
- Collaborate with families as well as partners in the school system, service system, and community to improve student and post-school outcomes.
- Develop essential skills and dispositions (e.g., attitudes, perceptions, values, and beliefs) to guide professional practice, engage in lifelong learning, and advance positive change as leaders in classrooms and communities.
- Utilize inclusive frameworks, strategies, and practices, including alignment of individualized education program goals, in grade level curriculum/standards and assessments within an inclusive educational environment;
- Analyze policies and research to guide the use of inclusive education evidence-based practices as well as to support advocacy skills as a leader in the field;
- Develop collaborative partnerships with families, educators, related service providers, and paraprofessionals to support academic and social inclusion for individuals with disabilities.

### Special Education MEd, Early Childhood Special Education Emphasis

The M. Ed. Program in Special Education explores important core knowledge in Special Education. The program's primary goal is to empower professionals as thoughtful educators who use best practices when assisting and empowering students with disabilities. Research and data-based decision-making are emphasized throughout the program. Graduate students will apply learned and evaluated research into practice in their courses, and learn to analyze multiple types of assessment data. The M.Ed. Program in Special Education consists of an initial required core of courses, a concentration area corresponding to the chosen emphasis area, and a capstone or exit course block.

When graduate students are accepted into the program, their transcripts may be reviewed, as necessary, to identify compliance with state education certification guidelines. Students who wish to be certified in the education of children with cross-categorical disabilities will be required to fulfill general certification requirements, as well as graduate coursework. Upon completion of this advanced degree, professionals will have developed an in-depth knowledge-base related to:

- various learning contexts within and outside of the school setting
- the multiple influences on educational practices in schools
- the characteristics and instructional needs of learners with disabilities
- assessment strategies for monitoring instruction
- instructional best practices
- using research to inform practice in the classroom
- diversity awareness
- contexts that affect student learning
- the powerful interactions between setting events and specific learner outcomes

**Statistics Minor**

**Minor Requirements**

The department offers minors in computer science, mathematics, and statistics. All courses presented for any of these minors must be completed with a grade of C- or better.

The requirements for the minor are:

- **MATH 4200** Mathematical Statistics I
- **MATH 4210** Mathematical Statistics II
- Select two additional courses in statistics numbered above 3000

Total Hours: 12

A minimum of two statistics courses numbered above 3000 must be taken in residence in the Department of Mathematics and Computer Science at UMSL.

**Learning Outcomes**

A successful undergraduate should, upon completion, be able to:

- Reformulate problems or questions in relevant statistical terms.
- Solve problems which involve probability or statistical concepts and procedures.

**Student Affairs Administration and Leadership Graduate Certificate**

The Graduate Certificate in Student Affairs Administration & Leadership (SAAL) would prepare participants to develop the knowledge, skills and abilities necessary to pursue entry-level staff and administrative positions with a concentrated emphasis in student affairs administration and leadership.

Students would develop the requisite knowledge and skills upon completion of an 18-hour curriculum which is outlined below:

- **HIGHED 5402** Student Affairs Administration (Introductory course)
- **HIGHED 6406** Governance of Higher Education
- **HIGHED 6408** Legal Issues in Student Affairs
- **HIGHED 6409** Critical Issues in Student Affairs
- **HIGHED 6410** Ethics in Higher Education Administration
Studio Art BFA, Art Education Emphasis

This degree prepares students for a career in Art Education; students who successfully complete the program will be eligible for K-12 Art teacher certification in Missouri. Art Education students complete a foundation art program plus additional courses that provide experience with a broad range of studio processes.

Candidates for the B.F.A. degree must complete a Foundation and Core Art Program (which is largely satisfied by the A.F.A. degree) and an emphasis area in one of the following: art education, graphic design, or general fine arts studio practice. Studio Art majors are required to take 69 hours in studio art (this includes 27 hours in the foundation and core art program) and 12 hours in Art History. The final 30 hours must be completed in residence at UMSL. Graduating students must also pass a faculty portfolio review.

Advanced Placement in Studio Art Classes: Studio Art Majors who have professional Graphic Design or other professional studio experience may wish to submit a portfolio to a committee of Studio Art faculty. Depending on the nature and the quality of the student’s portfolio, they may be able to obtain exemptions from selected lower level Studio Art courses. Students applying for these exemptions must submit their portfolios prior to the first day of class of their first semester in the BFA Program. Students will be notified in writing if an exemption is granted. Students informed of these waivers will be advised of their requirements in the studio art major. All decisions of the portfolio reviews are final.

General Education

Majors in Studio Art must meet the college and university general education requirements (p. 51). A foreign language is not required. Studio Art courses required for the degree may not be taken on a satisfactory/unsatisfactory (S/U) basis. A minimum of 120 hours is required for graduation. Certain Studio Art courses fulfill the humanities and fine arts general education requirement.

An art education emphasis leading toward K-12 Art teacher certification is available. Students choosing this option must complete degree requirements for the B.F.A. Students must complete ENGL 3100 (Advanced Expository Writing) and the general education requirements of the College of Education. A foreign language is not required.

Students will take a specialized program of Foundation Art (30 hours) that includes courses required for certification to teach art. They will also take studio art electives, including a minimum of three courses in one of the studio emphasis areas: drawing, graphic design, painting, photography, or printmaking. A minimum of 50 credit hours must be completed in studio art. In addition, students must complete 15 hours of art history. The final 30 hours of coursework must be completed in residence at UMSL. Major area courses, including studio art, art history, art education, teacher education, and secondary education, must be completed with a minimum grade point average of 2.5; no grade lower than a C is acceptable in major area coursework.

Beginning with those students graduating in May 2017 and receiving teacher certification, the Missouri Department of Elementary and Secondary Education requires a 3.0 GPA in professional education courses, a 3.0 GPA in the teaching content field, and a 2.75 overall GPA.

**Learning Outcomes**

Upon completion of the program, graduates will be able to:

- To develop visual and verbal responses to visual phenomena, and organize perceptions and conceptualizations both rationally and intuitively
- To explain the major achievements in the history of art and design, including the works and intentions of leading artists and designers in the past and present
- To develop the capacity to identify and/or solve visual problems within a variety of physical, technological, social, and cultural contexts
- To explain and evaluate contemporary thinking about art or design
- To develop competence in a number of art or design techniques
- To make valid assessments of quality and effectiveness in design projects and works of art, especially their own

#### BIOL 1012  3

### Studio Art BFA, Graphic Design Emphasis

The Art & Design department at UMSL welcomes students to explore essential cultural and professional systems through creative visual practice. Students encounter both traditional and new technologies as means to study and create the visual world in which we live. Students in the Graphic Design program enjoy the benefits of close relationships with the St. Louis graphic design professional community. Our professors maintain a rigorous program that prepares students for immediate employment as creative design professionals.

### Career Outlook

Students with degrees in studio art (Graphic Design emphasis) find careers as graphic designers, art directors, creative directors, marketing professionals, user experience designers, web designers and other creative professionals.

Candidates for the B.F.A. degree must complete a Foundation and Core Art Program (which is largely satisfied by the A.F.A. degree) and an emphasis area in one of the following: art education, graphic design, or general fine arts studio practice. Studio Art majors are required to take 68 hours in studio art (this includes 27 hours in the foundation and core art program) and 12 hours in Art History. The final 30 hours must be completed in residence at UMSL. Graduating students must also pass a faculty portfolio review.

### Advanced Placement in Studio Art Classes: Studio Art Majors who have professional Graphic Design or other professional studio experience may wish to submit a portfolio to a committee of Studio Art faculty. Depending on the nature and the quality of the student’s portfolio, they may be able to obtain exemptions from selected lower level Studio Art courses. Students applying for these exemptions must submit their portfolios prior to the first day of class of their first semester in the BFA Program. Students will be notified in writing if an exemption is granted.
General Education

Majors in Studio Art must meet the college and university general education requirements (p. 51). A foreign language is not required. Studio Art courses required for the degree may not be taken on a satisfactory/unsatisfactory (S/U) basis. A minimum of 120 hours is required for graduation. Certain Studio Art courses fulfill the humanities and fine arts general education requirement.

Total Hours: 81

Learning Outcomes

Upon completion of the program, graduates will be able to:

- Develop visual and verbal responses to visual phenomena, and organize perceptions and conceptualizations both rationally and intuitively
- Explain the major achievements in the history of art and design, including the works and intentions of leading artists and designers in the past and present
- Develop the capacity to identify and/or solve visual problems within a variety of physical, technological, social, and cultural contexts
- Explain and evaluate contemporary thinking about art or design
- Develop competence in a number of art or design techniques
- Make valid assessments of quality and effectiveness in design projects and works of art, especially their own

Please Note: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

### Studio Art BFA, Studio Practice Emphasis

The Art & Design department at UMSL welcomes students to explore essential cultural and professional systems through creative visual practice. Students encounter both traditional and new technologies as means to study and create the visual world in which we live. Students in the Studio Practice program enjoy the benefits of close relationships with the St. Louis visual arts professional community. Our professors maintain a rigorous program that prepares students for immediate employment as creative professionals and enriches lives through creative practice.

Candidates for the B.F.A. degree must complete a Foundation and Core Art Program (which is largely satisfied by the A.F.A. degree) and an emphasis area in one of the following: art education, graphic design, or general fine arts studio practice. Studio Art majors are required to take 69 hours in studio art (this includes 27 hours in the foundation and core art program) and 12 hours in Art History. The final 30 hours must be completed in residence at UMSL. Graduating students must also pass a faculty portfolio review.

**Advanced Placement in Studio Art Classes:** Studio Art Majors who have professional Graphic Design or other professional studio experience may wish to submit a portfolio to a committee of Studio Art faculty. Depending on the nature and the quality of the student’s portfolio, they may be able to obtain exemptions from selected lower level Studio Art courses. Students applying for these exemptions must submit their portfolios prior to the first day of class of their first semester in the BFA Program. Students will be notified in writing if an exemption is granted. Students informed of these waivers will be advised of their requirements in the studio art major. All decisions of the portfolio reviews are final.

**General Education**

Majors in Studio Art must meet the college and university general education requirements (p. 51). A foreign language is not required. Studio Art courses required for the degree may not be taken on a satisfactory/unsatisfactory (S/U) basis. A minimum of 120 hours is required for graduation. Certain Studio Art courses fulfill the humanities and fine arts general education requirement.

</tr>
<tr>
<td>ST ART 1150</td>
<td>Design I</td>
</tr>
<tr>
<td>ST ART 1151</td>
<td>Design II</td>
</tr>
</tbody>
</table>

Select two consecutive courses in any single area from the following:

- Painting
- Printmaking (any one subfield)
- Photography
- Graphic Design
- Advanced Drawing

Total Hours: 18

**Supply Chain Management Minor**

**General Requirements**

- All minors are 15 credit hours or 5 courses, including business core courses.
- Students must attain a 2.0 grade point average for all courses in the minor.
- Students must attain a minimum grade of C- in each course included in the minor.
- All courses in the minor must be on a graded basis.
- A minimum of 9 credit hours of coursework included in the minor must be taken in residence at UMSL.
- One must complete a baccalaureate degree at UMSL in order for a minor to be conferred.
- A minor may be added for up to two years following completion of the baccalaureate degree

**Specific Requirements for the Minor**

Available to all students except those pursuing the Bachelor of Science in Business Administration degree. Students must complete:

<table>
<thead>
<tr>
<th>Course</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>SCMA 3301</td>
<td>Introduction to Supply Chain Management</td>
</tr>
</tbody>
</table>
Select any four additional 3000 level and higher Supply Chain Management and Analytics courses.

Total Hours: 15

Learning Outcomes

Upon completion of the program, graduates will be able to:

- Interpret basic concepts in supply chain management such as purchasing, production, operations, logistics, integration and reverse supply chains.
- Describe analytical methods for decision-making in supply chains, such as demand planning, supply chain network design, production planning, inventory control and transportation.
- Describe the role of global supply chains, and principles of effective supply chain management, in the economy to match supply and demand.
- Describe the role of data, analytics and technology in modern supply chains.

Talent Management Graduate Certificate

The Graduate Certificate in Talent Management is designed for both Human Resource professionals at all levels and non-Human Resource professionals who plan on taking on Human Resource positions with an interest in enhancing their Human Resource competencies to meet current workplace challenges and advancing their careers. The certificate will help you to develop a deep understanding of the Human Resource field so that you can effectively lead and manage talent in business, nonprofit, union and government organizations by evaluating HR systems and aligning HR systems with overall business strategies.

Admission Requirements

Applicants must meet general University of Missouri-St. Louis Graduate School admissions requirements.

Certificate Requirements

All course prerequisites and all course waivers are applicable. Substitute courses may be approved by the appropriate department chairperson and the Director of Graduate Business Programs. All 12 credit hours taken as part of this certificate transfer to the MBA degree program.

Choose four of the following courses:

<table>
<thead>

Teaching English to Speakers of Other Languages Graduate Certificate

The Graduate Certificate in Secondary School Teaching prepares those with at least a bachelor's degree for teaching in high school. Normally this Graduate Certificate is taken by students who are not simultaneously pursuing the M.Ed. and teacher certification.

The M.Ed. program with emphasis in Teaching English to Speakers of Other Languages (TESOL) is designed to meet the need for teachers who can apply knowledge about language learning to their culturally and linguistically diverse classrooms. This program meets the requirements for a Missouri Department of Elementary and Secondary Education Teaching endorsement in English to Speakers of Other Languages (ESOL).

Required Core

Students are required to complete the following courses within the first 15 hours of study:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>TCH ED 6010</td>
<td>Examining History, Community and Social Justice in Education</td>
<td>3</td>
</tr>
<tr>
<td>ED PSY 6030</td>
<td>Instruction, Learning and Assessment</td>
<td>3</td>
</tr>
</tbody>
</table>

Required Research Courses

These two research courses should be taken in sequence (not concurrently) at the end of the program. Candidates will design and execute a piece of original practitioner research and present their findings in a public forum.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>TCH ED 6909</td>
<td>Teacher Action Research I (Take semester prior to Teacher Action Research Capstone, TCH ED 6910.)</td>
<td>3</td>
</tr>
<tr>
<td>TCH ED 6910</td>
<td>Teacher Action Research Capstone</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Hours: 12
In addition to the Required Core (12 hours), Candidates seeking an emphasis in TESOL are required to complete the following coursework (18 hours), a program total of 30 hours.

**TESOL Core**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

</tr>
<tr>
<td>TCH ED 6250</td>
<td>Methods and Materials for Teaching English to Speakers of Other Languages</td>
<td>3</td>
</tr>
<tr>
<td>TCH ED 6260</td>
<td>Practicum in Teaching English to Speakers of Other Languages</td>
<td>3</td>
</tr>
</tbody>
</table>

**Total Hours** 18

### State Certification

For TESOL state certification, the students need to add TCH ED 6224, and ELE ED 6338 for those who have the middle and the secondary school teaching certificates. Those who have the elementary teaching certificates need to add TCH ED 6224 if they are UMSL teacher education graduates. Otherwise, please consult the faculty advisor and/or academic advisor.

### Learning Outcomes

Upon completion of the program, certificate earners will be able to:

- Continually reflect on professional growth to improve student learning outcomes/enhance student learning.
- Integrate technology to create meaningful student learning within the context of a global digital society.
- Apply content and pedagogical knowledge to create authentic and deep learning experiences.
- Use learning science principles to design, implement, and evaluate curriculum based on learning standards.
- Foster effective working relationships with students, school colleagues, families, and community members to enhance student learning and well-being.
- Design and establish a safe, inclusive, and respectful learning environment that nurtures the intellectual, social, and personal development of all students.
- Use equitable frameworks and inclusive practices to create a variety of instructional and assessment opportunities adapted to diverse learners to encourage all students’ critical thinking, problem solving, and performance skills.

### Teaching of Writing Graduate Certificate

**Teaching of Writing Graduate Certificate**

Jointly housed in the Division of Teaching and Learning and the Department of English, this Graduate Certificate prepares teachers at all levels (K-12, college, adult) to improve their students’ performance in writing. The program also emphasizes using writing as a means to promote learning in all content areas. All courses provide opportunities for teachers to write, revise, share feedback, and reflect on their own writing development. Based on the National Writing Project’s core belief that teachers of writing must themselves be writers, the Graduate Certificate in the Teaching of Writing brings together sound pedagogy, composition theory, and writing practice.

The Certificate is an 18-hour program through the Gateway Writing Project (GWP); it may also be coordinated with other graduate programs. Certificate courses may be applicable to the M.A. in English with emphasis in composition or to various M.Ed. programs. The GWP Certificate is especially appropriate for post-master’s candidates who wish to pursue a specialization in teaching writing. The Graduate Certificate in the Teaching of Writing requires a 12 semester-hour core of courses developed by the Gateway Writing Project: The GWP invitational institute (6 hrs), a designated “topics” course (3 hrs.), and an exit course (3 hrs.). The Certificate requires a minimum of 12 semester hours at the 5000 or 6000 level or above. Electives (6 hrs.) may be chosen from approved offerings in English or Education.

### Admission

Applicants must be admitted to Graduate School and be selected by the faculty admissions committee for the Gateway Writing Project’s Certificate in the Teaching of Writing. The committee will review candidates on the basis of an interview, an application essay, and supporting documentation. Criteria include experience teaching writing at any level and academic record, especially in writing and the teaching of writing.

### Prerequisites

**ENGL/SEC ED 4880** Writing for Teachers (or an equivalent course in teaching writing) 3

Coursework or competency in basic computer application.

### Required Core Courses

**ENGL 4850/TCH ED 5850** Topics in the Teaching of Writing (designated topics) 3
Electives
Electives may be chosen from other Gateway Writing Project offerings or from courses offered by the appropriate academic department with advisor’s approval. These electives must include at least one more 5000-6000 level course.

Electives
Suggested electives applicable to an MA in English with writing emphasis:

- ENGL 5800: Modern Linguistics
- ENGL 5840: Theories of Writing
- ENGL 5860: Writing/Reading Theory
- ENGL 5870: Composition Research
- ENGL 5890: Teaching College Writing

Suggested electives applicable to an M.Ed. in Elementary or Secondary Education ELE:

- ELE ED 6387: Literacy Acquisition and Learning for Diverse Students
- ELE ED 6482: Problems and Research in Teaching Elementary School
- ED REM 6714: Action Research In Education

Total Hours: 6

Courses in adult and higher education may also be appropriate. For complete information, see The Gateway Writing Project’s Graduate Certificate in Teaching Writing, available from the English Department, the Division of Teaching and Learning, and the GWP Director.

Learning Outcomes
Upon completion of the program, certificate earners will be able to:

- Write, revise, and prepare writing for publication and identify as a writer.
- Summarize current theory/research, especially research by teachers of writing.
- Design curriculum and assessment that uses writing to promote learning in all subject areas.
- Demonstrate leadership for promoting better writing in school settings.
- Reflect on own teaching and own writing in service of improving student writing.

Technical Writing Undergraduate Certificate

Requirements
Students earn the Online Certificate in Technical Writing by completing 18 hours in selected online writing courses with a grade point average of 3.0 or better, including a capstone course. Twelve of the 18 hours must be taken at the University of Missouri-St. Louis. Courses may not be taken on a satisfactory/unsatisfactory basis.

</tbody>
</table>

Students may use ENGL 4890, ENGL 4892, ENGL 4870, ENGL 4871, and ENGL 4872 as their capstone course.

When the student has completed requirements for the certificate, the coordinator will notify the university registrar and the college from which the student will graduate. Upon the student’s graduation, completion of the Online Technical Writing Certificate will be noted on the official transcript and a certificate will be mailed to the student’s residence. Students who have graduated before completing the Online Technical Writing Certificate will receive the certificate in the mail and will have the certificate entered on their official transcripts.

Learning Outcomes
Upon completion of the program, certificate earners will be able to:

- Revise and edit texts efficiently
- Adjust style, tone, and format to best suit a professional context
- Develop rhetorical flexibility as it pertains to shifting professional writing expectations
- Identify various readers and stakeholders, and the situations in which they both operate
- Accurately compose language that meets the needs of readers and stakeholders
- Identify and solve real world problems via writing/composition
- Design and create texts in various modes (e.g. digital, videos, alphabetic, auditory, and multiple/combined modes)
Demonstrate an ability to apply contextually appropriate rhetorical strategies and technologies to solve communication problems successfully and safely

Theatre Arts BA

Effective Fall 2018, the Bachelor of Arts in Theatre Arts will no longer be accepting applications.

Bachelor of Arts in Theatre Arts

General Education Requirements

All Theatre Arts majors must satisfy the University and College of Arts and Sciences’ 42-hour General Education (p. 51) core requirements, which include ENGL 1100 and the Math proficiency requirement.

Junior-level writing class is required.

The Cultural Diversity requirements may be satisfied by General Education (p. 51) courses or lower-or upper-level courses in various departments.

State Government/History graduation requirements may be satisfied by General Education (p. 51) courses or by other lower-or upper-level courses in various departments.

13 hours of a foreign language.

Degree Requirements

Theatre Arts majors must choose an emphasis area within the Department of Theatre and Cinema Arts. They may choose from the following options: Acting/Directing, Design, Playwriting/Screenwriting, and Cinema.

Each student must complete the required core courses as well as the requirements for each emphasis area. At least 24 hours in the major must be taken at UMSL and must include 6 hours at the 2000 or higher level and 9 hours at the 3000 or higher level. All courses required for the major must be completed with a minimum grade of C- to be accepted, and the overall total grade point average must be at least 2.0 to graduate. To be eligible to participate in Internship classes, each student must have a minimum overall grade point average of 3.0

In addition to the major’s required core curriculum and emphasis area requirements, all students must participate in the Department’s productions through their required credit hours in practicum each semester.

Transportation Studies Minor

General Requirements

• All minors are 15 credit hours or 5 courses, including business core courses.
• Students must attain a 2.0 grade point average for all courses in the minor.
• Students must attain a minimum grade of C- in each course included in the minor.
• All courses in the minor must be on a graded basis.
• A minimum of 9 credit hours of coursework included in the minor must be taken in residence at UMSL.

• One must complete a baccalaureate degree at UMSL in order for a minor to be conferred.
• A minor may be added for up to two years following completion of the baccalaureate degree

Specific Requirements for the Minor

Available to all students.

</tbody>
</table>

Total Hours 15

1 With approval of the Department chair of Supply Chain & Analytics.
2 With approval of the Department chair of Marketing.
3 No more than one approved independent study course may count towards the minor.

Learning Outcomes

Upon completion of the program, graduates will be able to:

• Explain the history and importance of global and domestic transportation on society from policy, regulatory, economic, legal, sustainability, and demographic perspectives.
• Describe the role of transportation in supply chain management, the key elements of transportation, basic processes in managing strategic and tactical transportation management operations, and digital transformation of transportation operations.
• Define and explain basic concepts of supply chain and transportation risk management, and their impacts on shareholder value and corporate performance.
• Explain the role of data, analytics and technology in transportation.

Emphasis in Playwriting/Screenwriting

In addition to the required Theatre Arts core curriculum, students must complete the following:

Total Hours 40

1 At least 5 hours must be completed at or above the 3000-level.
Trauma Studies Graduate Certificate

The graduate certificate is awarded upon the completion of 18 credit hours of graduate coursework on the topic of trauma studies. No more than nine hours of graduate level independent research or fieldwork may be used for the certificate. The coursework for the certificate must be taken in at least two departments and may include no more than three hours at the undergraduate 3000 or 4000 level.

Urban Politics Minor

Requirements for Political Science Minors

A general minor in political science can be arranged, as well as specialized minors in eight different subfields of the discipline. Interested students should see a faculty adviser to plan a coherent program of study as a minor field.

Students must achieve a cumulative 2.0 GPA in the political science courses chosen to qualify for the minor. Students may count no more than 3 hours in political science taken on a satisfactory/unsatisfactory basis toward the minor. Students taking an internship POL SCI 3940 may count no more than three hours of the internship toward the minor.

Minor in Urban Politics

POL SCI 2350 Introduction to Urban Politics 3
Select four of the following: 12
- POL SCI 2320 African Americans and the Political System
- POL SCI 3450 Urban Administration
- POL SCI 3460 The Politics of Poverty and Welfare
- POL SCI 3900 Special Readings (when appropriate)
- POL SCI 3940 Public Affairs Internship (when appropriate)
- POL SCI 4460

Total Hours 15

Learning Outcomes

- Explain key topics in urban politics.
- Demonstrate an understanding of events and factors that have influenced the development of urban politics in the US.
- Analyze the actions of political actors impacting urban politics and their motives.
- Assess issues facing urban communities, formulate evidence-based recommendations, and communicate them with clarity and coherence.

Urban Studies Minor

Requirements

A minor in urban studies requires 15 hours of course work. Candidates must have a cumulative grade point average of 2.0 or better in the minor. Courses taken on a satisfactory/unsatisfactory basis may not be applied to the minor. Special topics courses or other courses relevant to urban studies may be included as electives when approved in advance by the urban studies coordinator.

Students must take:

**Core Courses:**

Total Hours 15

Veterans Studies Minor

The Minor in Veterans Studies is a multi-disciplinary program whose course work enhances students’ majors to prepare them to work for or with veterans. It is also designed to encourage and enable veteran students to reflect more deeply on their service experiences. This minor includes a foundation course, a series of elective courses, and a capstone. Electives may be chosen from four areas, or from any MVS course above the 2000 level.

Cultural: exploring perspectives and experiences of veterans through various media

Relational: understanding how veterans relate among various aspects of our society

Institutional: understanding the context and structure of military service and veteran institutions now and in the past

Clinical: establishing effective skills to better serve for, with, and in veteran populations

Alternative elective courses could be included with the consent of the department chair. While it is encouraged, students are not required to limit their electives to a single area.

Women's Health Nurse Practitioner Post-Graduate Certificate

Post-graduate certificate (PGC) requirements are tailored to the individual student, depending on past academic work, experience, the student’s goals, and specialty requirements. Upon completion of the PGC requirements, a certificate is awarded by the College of Nursing (CON) and Graduate School. Graduates are eligible to apply to take board certification exams in the advanced practice role and population for which they have been prepared.

Due to higher education regulation changes, the University of Missouri–St. Louis cannot admit students from all states for online programs. Please see the Center for Teaching and Learning for additional information: http://www.umsl.edu/services/ctl/onlinelearning/state_authorization.html.

NURSE 6954 Advanced Practice Nursing: Residency I 2-4
NURSE 6955 Advanced Practice Nursing: Residency II 2-4
NURSE 7954 Advanced Practice Nursing: Residency III 2-4

All students must complete 8 credit hours of Residency. One credit hour is equivalent to 75 residency hours.

Workplace and Organizational Science Undergraduate Certificate

This certificate can prepare individuals for graduate studies in industrial-organizational psychology, management, or other areas with a focus on behavior in organizations. It also provides training relevant to managing individuals in organizations that can be applied broadly to business, military, non-profit, health care, law enforcement, and other settings.

Note: No more than 6 credit hours may be applied from the student’s major.

Required Courses

<tr>
<td>PSYCH 4250</td>
<td>Stereotyping, Prejudice, and Discrimination</td>
</tr>
</tbody>
</table>
Learning Outcomes

Upon completion of the program, certificate earners will be able to:

• Describe the application of theories and methods from workplace and organizational sciences to job analysis, recruitment/selection, training, retainment and performance appraisal processes.
• Identify factors that influence motivation and work performance of employees.
• Identify teamwork processes, challenges and strategies.
• Summarize models of leadership and fit for specific organizational needs.
• Compare and contrast at least two disciplinary specific (e.g., communications, industrial/organizational psychology, management, sociology) approaches to understanding workplace and organizational needs and challenges.
• Write and speak clearly and concisely about theories and research in workplace and organizational sciences.
• Evaluate appropriateness of quantitative and qualitative research methods for specific questions in workplace and organizational sciences.
• Relate concepts and empirical findings from workplace and organizational sciences to personal work experiences and career goals.
Courses of Instruction

Accounting

Courses

**ACCTNG 2400 Fundamentals of Financial Accounting: 3 semester hours**
Prerequisites: MATH 1030 and completion of 27 credit hours. MATH 1030 may be taken concurrently. This is a one semester course in financial accounting theory and practice. The primary emphasis is on the corporate financial statements of income, financial position and cash flow—their content and interpretation; and the impact of financial transactions upon them.

**ACCTNG 2410 Managerial Accounting: 3 semester hours**
Prerequisites: MATH 1030 and ACCTNG 2400. This is an advanced course that goes beyond the scope of a second-semester course in fundamentals of accounting. The development, interpretation, and use of relevant cost behavior, control, and traceability concepts for management planning, controlling and decision making are emphasized. Topics include: an introduction to product costing, the contribution concept, direct costing, performance standards and variance analysis, responsibility accounting, segment profitability, alternative choice decisions, and capital budgeting.

**ACCTNG 2430 Accounting Ethics: 3 semester hours**
Same as PHIL 2249. Prerequisites: ACCTNG 2400 and ACCTNG 2410 (may be taken concurrently). This course examines moral problems as they relate to the profession of accounting and the professional Codes of Conduct that govern the accounting profession. Students will apply the requirements of the Codes of Conduct to cases where ethical dilemmas or violations of professional standards may be present.

**ACCTNG 3401 Financial Accounting and Reporting I: 3 semester hours**
Prerequisites: MATH 1030, ACCTNG 2410, minimum 2.0 campus GPA and 57 credit hours. Review of the foundations of financial accounting theory and of the financial statement preparation process. Accounting theory and practice related to current assets (except for investments in securities). The course includes an emphasis on unstructured case problem solving skills, communication skills, and interpersonal skills.

**ACCTNG 3402 Financial Accounting and Reporting II: 3 semester hours**
Prerequisites: MATH 1030 and ACCTNG 3401, minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL and minimum campus GPA of 2.0. Accounting theory and practice related to topics such as investments in securities, operational assets, current and long-term liabilities, and leases. The course includes an emphasis on unstructured case problem solving skills, communication skills, and interpersonal skills.

**ACCTNG 3411 Cost Accounting: 3 semester hours**
Prerequisites: MATH 1030, ACCTNG 3401 and a minimum campus GPA of 2.0 and minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UM-St. Louis. The study of the basic principles of cost determination for, and control of, manufacturing and distribution activities. Topics include job-order costing, process costing, cost allocations, and the development and use of standard costs within a system of absorption costing.

**ACCTNG 3421 Accounting Information Systems: 3 semester hours**
Prerequisites: MATH 1030, INFSYS 2800, ACCTNG 2410, ACCTNG 3401, and a minimum campus GPA of 2.0. Examines the fundamentals of accounting information systems, including hardware and software considerations, internal controls, and transaction processing cycles. Also focuses upon the development of efficient spreadsheets as applied to financial and managerial accounting concepts.

**ACCTNG 3441 Income Taxes: 3 semester hours**
Prerequisites: MATH 1030 and ACCTNG 3401 and a minimum campus GPA of 2.0 and minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UM-St. Louis. Fundamentals of Federal income taxation. Topics include taxable entities, income, deductions, tax accounting methods, tax basis, and property transactions at both the conceptual and operational levels.

**ACCTNG 3451 Accounting for Governmental and Not-For-Profit Entities: 3 semester hours**
Prerequisites: MATH 1030, ACCTNG 3402, a minimum 2.3 GPA in all accounting courses at the 3000-level and above taken at UMSL and a minimum 2.0 campus GPA. Principles of fund accounting and financial reporting for governmental and nonprofit entities. This course includes an emphasis on unstructured case problem solving skills, communication skills, and interpersonal skills.

**ACCTNG 3490 Internship in Accounting: 1-3 semester hours**
Prerequisites: ACCTNG 3401, a minimum campus GPA of 2.0, a minimum GPA of 2.7 in all accounting courses at the 3000-level and above taken at UM-St. Louis, consent of supervising instructor and accounting internship coordinator. Students are employed in the field of Accounting where they apply the knowledge and skills learned in the classroom. Professional development and obtaining specialized work experience are primary goals. An accounting faculty member will monitor the student's program with the student providing a formal written report at the end of the project.

**ACCTNG 3495 Special Administration Problems - Accounting (VITA) Program: 1-3 semester hours**
Prerequisites: ACCTNG 2400, ACCTNG 2410 and ACCTNG 3401; minimum campus GPA of 2.0, minimum GPA of 2.2 in all accounting courses at the 2000-level and above taken at UMSL; completion of nine semester hours of accounting. Enrollment in the course is restricted to Volunteer Income Tax Assistance (VITA) program student participants. The class offers practical tax experience, networking opportunities, potential managerial experience, and personal satisfaction derived from community service. It is taken on a satisfactory/unsatisfactory basis. The course offers one to three hours of undergraduate business elective credit and may be repeated for up to 3 hours credit.

**ACCTNG 3499 Independent Study in Accounting: 1-3 semester hours**
Prerequisites: Minimum campus GPA of 2.0, a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL and approval by the supervising professor and the department chair. Special individual study in accounting under the supervision of a full-time accounting faculty member.

**ACCTNG 4401 Financial Accounting and Reporting III: 3 semester hours**
Prerequisites: MATH 1030; ACCTNG 3402; a minimum campus GPA of 2.0 and minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UM-St. Louis. Accounting theory and practice related to topics such as income taxes, pensions, owners' equity, earnings per share, and the statement of cash flows. The course includes an emphasis on unstructured case problem solving skills, communication skills, and interpersonal skills.
ACCTNG 4402 Financial Accounting and Reporting IV: 3 semester hours
Prerequisites: MATH 1030; ACCTNG 3402; a minimum campus GPA of 2.0 and minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UM-St. Louis. Accounting theory and practice related to topics such as business combinations, consolidated financial statements, multinational operations, foreign exchange transactions, and governmental and nonprofit organizations. The course includes an emphasis on unstructured problem solving skills, communication skills, and interpersonal skills.

ACCTNG 4405 Professional Accounting Research: 3 semester hours
Prerequisites: ACCTNG 4401, a minimum campus GPA of 2.0 and minimum GPA of 2.2 in all accounting courses at the 3000-level and above taken at UM-St. Louis. Discussion of the research tools and methods available to resolve questions concerning accounting standards and practices. Critical analysis of topics of current interest and importance in accounting practice is the focal point of the course.

ACCTNG 4435 Auditing: 3 semester hours
Prerequisites: MATH 1105; ACCTNG 3402; ACCTNG 3421 or INFSYS 3810; a minimum campus GPA of 2.0 and minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UM-St. Louis. An introduction to auditing practice. Includes the social role of auditing and the services offered by auditors in internal, governmental, and public accounting practice. Emphasis is on the financial auditing process, including professional ethics, audit risk assessment, study and evaluation of internal control, gathering and evaluating audit evidence, and audit reporting decisions.

ACCTNG 4441 Advanced Federal Income Tax: Business Taxation: 3 semester hours
Prerequisites: ACCTNG 3441 with a grade of B- or above; a minimum campus GPA of 2.0 and minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UM-St. Louis. Focuses on federal income taxation of corporations, S corporations, partnerships, LLCs and their owners.

ACCTNG 4450 Prescriptive Analytics and Optimization: 3 semester hours
Same as SCMA 4350. Prerequisites: MATH 1105 and a minimum campus GPA of 2.0. This course covers the construction and application of prescriptive analytical models for optimizing business decisions in a wide range of areas such as manufacturing, service, supply chains, logistics and finance. Topics include performance metrics, linear programming, integer programming, network optimization, simulation, and implementation using Excel.

ACCTNG 5400 Financial and Managerial Accounting: 3 semester hours
This course provides an introduction to accounting, with emphasis on preparation of financial statements for external parties (financial accounting) and accumulation of cost information to aid internal planning and control (managerial accounting). Topics covered include measurement of assets and liabilities, revenues and expenses, the accounting cycle, financial statements, cost terminology, cost behavior, product costing, and relevant costs for decision making. This course provides the necessary background for ACCTNG 5401.

ACCTNG 5401 Financial Reporting and Analysis: 3 semester hours
Prerequisites: ACCTNG 5400 or the equivalent. This course builds on the foundations covered in ACCTNG 5400, emphasizing in-depth analysis of published financial statements. The course begins with discussion of the role of financial accounting information in capital markets and contracting, and continues with examination of a number of specific accounting issues. Students are encouraged to look behind the numbers to better understand the economics of the underlying transactions, and properly interpret what the reported numbers mean about a firm's future prospects.

ACCTNG 5402 Professional Accounting Research: 3 semester hours
Prerequisites: ACCTNG 4401; a minimum campus GPA of 2.0; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. Discussion of the research tools and methods available to resolve questions concerning accounting standards and practices. Critical analysis of topics of current interest and importance in accounting practice.

ACCTNG 5403 Graduate Topics in Financial Accounting: 3 semester hours
Prerequisites: ACCTNG 4401; a minimum campus GPA of 2.0; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. A study of current financial reporting issues. Analysis of current problems and approaches pertaining to the communication of corporate financial information to the U.S. and international investment communities.

ACCTNG 5404 Professional Accountancy I: 3 semester hours
Prerequisites: MATH 1030; ACCTNG 2410; a minimum 2.0 campus GPA; graduate standing. This is the first professional-level course in financial reporting. The course includes a study of the conceptual framework underlying Generally Accepted Accounting Principles (GAAP) and issues pertaining to accounting for current assets and liabilities.

ACCTNG 5405 Professional Accountancy II: 3 semester hours
Prerequisites: MATH 1030; ACCTNG 3401; a minimum campus GPA of 2.0; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL; graduate standing. This is the second professional-level course in financial reporting. The course includes an in-depth study of issues pertaining to accounting for operational assets, liabilities and owners equity.

ACCTNG 5406 Research and Professional Writing in Accounting: 3 semester hours
Prerequisites: ACCTNG 4401 and enrollment in Master of Accounting Program. This course employs the professional accounting literature and authoritative databases to analyze contemporary issues in accounting. Students will refine their communication skills in preparation for leadership roles in the accounting profession.

ACCTNG 5408 Fraud Examination: 3 semester hours
Prerequisites: ACCTNG 3402 or ACCTNG 5405; a minimum campus GPA of 2.0; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. This course is designed for graduate students who are interested in fraud and its effects. Students will be introduced to theoretical concepts of fraud and practical responses to it. Course coverage includes an overview of the fraud problem; prevention and detection of fraud; elements of fraud investigation, interview techniques, fraud types, and laws governing the prosecution of fraud cases.
ACCTNG 5411 Cost Systems Analysis: 3 semester hours
Prerequisites: MATH 1030; ACCTNG 3401; a minimum campus GPA of 2.0; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL; graduate standing. The development, interpretation, and use of accounting reports and supplementary information for management planning, control and decision making. Emphasizes the application of relevant cost behavior, control and traceability concepts in the preparation of internal accounting reports, with a secondary emphasis upon product costing techniques as appropriate to financial accounting needs. Topics include break-even analysis, operational budgeting, direct costing, absorption costing, standard costs and variance analysis, business segment analysis, responsibility accounting distribution cost accounting, and gross profit analysis.

ACCTNG 5412 Graduate Topics in Management Accounting: Controllership: 3 semester hours
Prerequisite: ACCTNG 3411, or ACCTNG 5411; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. A study of advanced managerial accounting techniques useful in facilitating the planning and control process in the modern organization. Emphasis on the implementation and administration of these techniques, their integration with management information systems, and the organizational role of the corporate accountant.

ACCTNG 5421 Information Systems in Accounting: 3 semester hours
Prerequisites: MATH 1030; INFSYS 1800; ACCTNG 2410; ACCTNG 3401; a minimum campus GPA of 2.0; graduate standing. This is a professional-level course in accounting information systems. The course includes examination of transaction cycles, structured analysis and design of accounting information systems, and internal controls.

ACCTNG 5435 Graduate Topics in Auditing: 3 semester hours
Prerequisite: ACCTNG 4435; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. A study of advanced auditing and attestation issues, with an emphasis on operational auditing. Topics include professional ethics, risk analysis, internal control, fraud detection, analytical procedures, determining and assessing operational objectives, and reporting and implementing audit findings.

ACCTNG 5436 Systems Auditing: 3 semester hours
Prerequisite: ACCTNG 5400, INFSYS 6800 or consent of instructor. Study of techniques involved in the control and audit of computer-based systems. Emphasis on the review of internal controls at operational and administrative levels and on computer-assisted audit techniques.

ACCTNG 5441 Tax Research: 3 semester hours
Prerequisite: ACCTNG 3441; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL; or consent of instructor. Application of the research tools and methods available to resolve questions pertaining to the tax laws. Addresses techniques for locating and evaluating relevant authority. Students will be expected to complete written tax research memos. A basic understanding of federal income tax law is presumed.

ACCTNG 5444 Decision Support Systems for Business Intelligence: 3 semester hours
Same as INFSYS 6833. Prerequisites: SCMA 5300. This course examines the applications of data and analytics (models) to support the needs of decision makers. Descriptive, predictive and prescriptive analytics tools are coupled with big data and well-designed user interfaces to provide the necessary tools. Topics such as how to construct the data warehouse, how to clean and store data in the appropriate form, how to construct and implement a useful visualization of data, and how to construct and support decision makers are included. DSS component design in response to decision making and business intelligence needs are discussed. Credit cannot be granted for both INFSYS 3843 and INFSYS 6833.

ACCTNG 5444 Business Analytics and Data Mining: 3 semester hours
Same as SCMA 6345. Prerequisites: SCMA 5300 and INFSYS 5800. This course concentrates on methods for converting data into business intelligence. It provides knowledge of the principles and techniques for business analytics and data mining. Topics include clustering, pattern recognition, visualization of relationships, predictive modeling, optimization techniques and simulation.

ACCTNG 5446 Advanced Topics in Taxation: 3 semester hours
Prerequisites: ACCTNG 3441. Address advanced topics in taxation selected by the instructor.

ACCTNG 5447 Taxation of Individuals and Businesses: 3 semester hours
Prerequisites: MATH 1030; ACCTNG 3401 or both ACCTNG 5400 and FINANCE 6590 with the topic ‘Practice of Personal Financial Planning’ with grades of B or better in both; graduate standing. This is the first professional-level course in taxation. The course includes a general introduction to the concepts of taxation. It will enable students to understand the role of taxes in evaluating decisions typically confronted by individual taxpayers and businesses.

ACCTNG 5451 Accounting and Auditing in Governmental and Not-for-Profit Entities: 3 semester hours
Prerequisite: ACCTNG 3402 and graduate standing; a minimum campus GPA of 2.0 and minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. A study of accounting for use in the public sector and in not-for-profit organizations. Principles of fund accounting and financial reporting for governmental and not-for-profit entities, as well as auditing in the public sector.

ACCTNG 5465 Principles of Information Security: 3 semester hours
Prerequisites: INFSYS 5800 (may be taken concurrently) or permission of instructor. This course is a survey of the vast field of Information Security (InfoSec). It intersects both management and technical aspects of security as relevant to organizations, governments, individuals, and society. Topics covered include fundamental principles of InfoSec and cyber defense, the threat environment, management of InfoSec in organizations, technologies and tools in InfoSec, cryptography/cryptography, web application security, vulnerability management, and current issues. Hands-on labs expose students to basics of penetration testing, applications of cryptography, and vulnerability management. A graduate research paper is required. This course is open to all majors. Credit can only be granted for one of INFSYS 3848, INFSYS 6828, and ACCTNG 5465.
ACCTNG 5466 Management of Accounting Networks and Security: 3 semester hours
Prerequisites: INFSYS 5800 (may be taken concurrently) or permission of instructor. This course focuses on the "big-picture" implications and challenges of data networking and network security within contemporary Information Technology environments. It covers fundamentals of networking and security implications of data networks with hands-on exercises. Topics include networking layers and standardization of functionality across layers, wired and wireless Local Area Networks (LANs) along with switching and physical layer technologies, Internetworking, supporting and supervisory protocols, application layer protocols, network design and management, and fundamentals of network security. Students will also learn about network protocol analyzers such as Wireshark, virtualization, networking in virtual environments, and how some common networked applications operate by utilizing the network infrastructure. Credit can only be granted for one of INFSYS 3842, INFSYS 6836, and ACCTNG 5466.

ACCTNG 5467 Advanced Data Security Concepts: 3 semester hours
Prerequisites: ACCTNG 5465 or INFSYS 6828. This course provides an in-depth examination of advanced principles of cybersecurity. A broad range of topics are covered, including penetration testing, formal verification of systems, formal models of information flow and protection, distributed system authentication, protocol design and attack, computer viruses and malware, as well as intrusion and anomaly detection models. Multi-level security architecture, active defenses, investigation and forensics, network firewalls, virtualization, anonymity and identity, mobile security, and database security models and mechanisms are also studied. The course content is largely influenced by the latest research in the field. Credit can only be granted for one of INFSYS 3858, INFSYS 6858, and ACCTNG 5467.

ACCTNG 5468 Accounting Software Assurance: 3 semester hours
Prerequisites: INFSYS 6805 or INFSYS 6806 or permission of instructor. This course provides an overview of the vast field of software assurance. The goal is to make students aware of the fundamentals of the secure software lifecycle enabling them to apply principles of secure software development and management. The course also provides practical applications that allow the learners to experience the secure software lifecycle process by developing concrete artifacts. Credit can only be granted for one of INFSYS 3868, INFSYS 6868, and ACCTNG 5468.

ACCTNG 5469 Management of Accounting Data Security: 3 semester hours
Prerequisites: ACCTNG 5465 or INFSYS 6828. This course provides students the necessary background knowledge and skills to develop and run a systematic information security management program that is in line with organization strategy, structure, processes, and culture. Specifically, the course introduces governance, strategy, policies, implementation, operation, evaluation, and improvement of an organization's information security to achieve business objectives and be resilient to information security threats. Credit can only be granted for one of INFSYS 3878, INFSYS 6878, and ACCTNG 5469.

ACCTNG 5490 Graduate Internship in Accounting: 1-3 semester hours
Prerequisites: ACCTNG 3401 or ACCTNG 5404; a minimum graduate GPA of 3.0; a minimum GPA of 3.0 in all accounting courses at the 3000-level and above taken at UMSL; consent of supervising instructor and accounting internship coordinator. The student works in an accounting internship that contains sufficient content and rigor to merit graduate credit. The student's program will be monitored by a member of the Graduate Faculty in Accounting. The course requires several meetings with the faculty advisor and a graduate-level written assignment. The course will be graded on a Satisfactory/Unsatisfactory basis. A student who has previously taken ACCTNG 3490 may not take ACCTNG 5490.

ACCTNG 5498 Graduate Seminar in Accounting: 3 semester hours
Prerequisites: To be determined each time the course is offered and to include a minimum 2.0 overall GPA and a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. Study of selected special problems in accounting. May be repeated for credit with different topics.

ACCTNG 5499 Individual Research in Accounting: 1-3 semester hours
Prerequisites: Consent of instructor, department chair and graduate director; a minimum 3.0 graduate GPA; a minimum GPA of 3.0 in all accounting courses at the 3000-level and above taken at UMSL. Special individual research topics in Accounting under the guidance of a specific professor.

ACCTNG 6441 Graduate Topics in Taxation: 3 semester hours
Prerequisites: At least a B in ACCTNG 3441 or ACCTNG 5447; enrollment in Masters of Accountancy program; a minimum GPA of 2.3 in all accounting courses at the 3000-level and above taken at UMSL. This course examines the role taxes play in evaluating decisions confronted by individuals. Students will apply basic tools learned in accounting and finance to settings impacted by tax laws with the goal of not minimizing taxes but maximizing the present value of a taxpayer's wealth.

ACCTNG 6460 Advanced Data Integration: 3 semester hours
Same as INFSYS 6860. Prerequisites: Graduate standing. This course discusses the theories and techniques for blending unstructured and structured data including big data and social media streams with relational databases, data warehouses, spreadsheets, and other sources of data. It provides hands-on experience in integrating data from diverse sources, screening and cleaning it, and producing descriptive and visual summaries in tables, graphs, maps, and text for business intelligence. Students will be introduced to tools that integrate data from different sources and provide input to dashboards for rich visualization and advanced analytics. Students may receive credit for both INFSYS 3860 and INFSYS 6860.

Adult Education

Courses

ADULT ED 4311 Teaching Basic Reading Skills to Adults: 3 semester hours
A study of the reading process and of the characteristics of adult learners with a focus on instructional techniques and materials useful in upgrading the performance of adults with deficient reading skills.

ADULT ED 6230 Adult Learning and Development: 3 semester hours
Prerequisites: ED PSY 6210 or ED PSY 6111, or ADULT ED 6410. A study of how life stage theories and theories of learning pertain to the adult learner. The research bases of these theories will be explored in relationship to instructional practice with adult learners.
ADULT ED 6404 Seminar in Adult Education Research: 1-10 semester hours
Prerequisites: ADULT ED 6410 or consent of instructor. A review of current research on various topics in the field of adult education. An in-depth study of these research topics will be conducted. Application to the field of adult education will be considered. Special focus will be placed on assessing and improving competency in educational, corporate and community settings.

ADULT ED 6410 The Adult Learner: 3 semester hours
This course is designed for those who help adults learn in a variety of settings. A study will be made of the characteristics of Adult Learners and various theories of how they learn, as well as the implications of these characteristics and theories for Adult Education. Topics and issues will be explored.

ADULT ED 6411 History of Adult Education: 3 semester hours
Prerequisites: ADULT ED 6410. In this course the historical foundation of the field of Adult Education in America will be studied. This will include the major theorists and their contributions; together with the continuing education of the adult in a progressive social context.

ADULT ED 6412 Philosophical Foundations of Adult Education: 3 semester hours
Prerequisites: ADULT ED 6410 or consent of instructor. A comprehensive, systematic philosophical foundation for adult education. In this course the philosophical underpinnings of the various approaches to the education of adults will be explored. These include the role of the learner, the teacher, and overall objectives within each philosophy.

ADULT ED 6413 Improvement of Instruction in Adult Education: 3 semester hours
Prerequisite: ADULT ED 6410 or consent of instructor. A study of selected methods and instructional techniques appropriate for the teaching of adults. An examination of current research will be made as it relates to the problems of instructing adults.

ADULT ED 6414 Curriculum Theory and Development in Adult Education: 3 semester hours
Prerequisite: ADULT ED 6410 or consent of instructor. A study of curriculum theory and its application to adult education. Particular emphasis will be placed on the development of model curricula for various programs in adult education.

ADULT ED 6415 Adult Literacy Perspectives: 3 semester hours
Prerequisites: ADULT ED 6410. Students will draw upon a variety of disciplines in considering the ideological, political, economic, moral, and pedagogical dimensions of literacy education. This is significant since popular, as well as scholarly, views of literacy assert its importance to a variety of personal and societal goals. In addition to a theoretical perspective, students will explore practical applications of literacy.

ADULT ED 6416 Survey of Adult Distance Education: 3 semester hours
Prerequisites: ADULT ED 6410. This course is designed as a survey of distance education covering the concept, theories, history, present practice, delivery systems, major issues and future directions of the field of distance learning. Emphasis is on research and practice in the U.S.; however, since much of the literature in the field has been written by educators in other countries, the course will explore topics and issues in distance education from an international perspective, identifying similarities and differences among countries as they relate to adult learning.

ADULT ED 6417 Multicultural Issues in Adult Education: 3 semester hours
Prerequisites: ADULT ED 6410. In this course the learners will discuss cultural diversity from an adult education perspective. Topics include cultural self-awareness, challenges/issues in intercultural educational settings, theoretical perspectives of multicultural education, and practitioner concerns and strategies for implementing multiculturalism in adult education settings.

ADULT ED 6418 Assessment in the Adult Classroom: 3 semester hours
Prerequisites: ADULT ED 6410 and ED REM 6707 or consent of instructor. This course addresses assessing how effectively adult educators are facilitating adult learning. Emphasis will be on knowledge and skills, learner characteristics, and learner reactions to instruction through the use of formative assessment of both student learning and instructional effectiveness in the adult classroom. Special attention will focus on assessment in the adult classroom within educational, corporate, community, and non-formal settings.

ADULT ED 6419 Developing Intercultural Competence: 3 semester hours
Prerequisites: ADULT ED 6410. The focus of this course is on intercultural competence theories and concepts designed to build personal, academic, and professional skills. It is intended to enable the individual to function more successfully in a global environment.

ADULT ED 6420 Survey of Human Resource Development and Adult Education: 3 semester hours
Prerequisites: Graduate standing and permission of instructor. This course provides an overview of the fields of human resource development and adult education. The many societal contexts within which the training of adults and organization development occur will be examined. The systems theory that frames a discussion of adult education, training, and organization development is also explored. The unique characteristics of each field will be represented as well as the ways in which the two fields come together along some general concepts: Definitions, philosophies, goals, sponsoring agencies, professional roles, processes, participants, and resources.

ADULT ED 6440 Developing Critical Thinking Through Reading and Writing: 3 semester hours
Prerequisites: Graduate standing. A study of developing critical thinking through focusing upon reading and writing instructional techniques and materials useful in upgrading the performance of secondary, higher education, and adult learners.

ADULT ED 6494 Directed Readings in Adult Learning: 1-6 semester hours
Prerequisites: ADULT ED 6410, graduate standing, and consent of instructor. Self-directed learning, as a key concept in Adult Education, is encouraged as a means of understanding the adult experience, both personally and professionally, and is a recognized core competency in the field of Adult Education. This course consists of supervised, independent study into the current research, literature, and issues in the area of Adult Learning. Learners are given the opportunity to meet with other learners and the instructor on a regular basis to share resources, ideas, and to gain feedback.

ADULT ED 6497 Problems in Adult Education: 1-10 semester hours
Prerequisite: ADULT ED 6410 or consent of instructor. Independent study on topics in adult education.
ADULT ED 6990 Internship: 1-10 semester hours
Prerequisite: ADULT ED 6410 or consent of instructor. Closely supervised experience in a field setting under the direction of a graduate faculty member. An appropriate level of competence and evidence of growth in the professional role must be demonstrated by the intern. The internship will include planning, research, evaluation, and related professional activities.

ADULT ED 7820 Policy Issues in Adult Education: 3 semester hours
This course should be taken immediately after admittance into the doctoral program. In this course, students will engage in a systematic examination of issues related to adult education. This will include, but not be limited to, legislative policies, delivery systems, and occupational issues. Students will be expected to examine trends in adult education practice and/or related fields.

ADULT ED 7822 Advance Research in Adult Education: 3 semester hours
Prerequisites: ADULT ED 7820. This course will build on ADULT ED 7820 in which students will engage in a systematic and critical examination and discussion of research related to adult education and related area topics.

Air Science

Courses

AERO 1001 Heritage and Values of the US Air Force I: 2 semester hours
This course introduces students to contemporary military issues and overall Air Force structure. Contracting with AFROTC is not required for this course.

AERO 1002 Heritage and Values of the US Air Force II: 2 semester hours
This course introduces students to military concepts such as strategic offensive and defense forces, general purpose forces, aerospace support forces, and the Air Force relationship with U.S. Army forces. Contracting with AFROTC is not required for this course.

AERO 1500 Leadership Laboratory: 0 semester hours
Prerequisites: Students must be enrolled in an AERO course. Instruction is conducted within the framework of an organized cadet corps with a progression of experiences designed to develop each student’s leadership potential. Course work includes a study of Air Force customs and courtesies, drill and ceremonies, career opportunities in the Air Force, and the life and work of an Air Force junior officer. Students develop their leadership potential in a practical, supervised laboratory, which typically includes field trips to Air Force installations throughout the United States. This course is generally taught at St. Louis University. It is required for all AF ROTC students.

AERO 2001 Team Leadership Fundamentals I: 2 semester hours
This course lays the foundation for teams and leadership. The topics include skills that will allow cadets to improve their leadership on a personal level and within a team. The course will prepare cadets for their field training experience where they will be able to put the concepts learned into practice. The purpose is to instill a leadership mindset and to motivate sophomore students to transition from AFROTC cadet to AFROTC officer candidate.

AERO 2002 Team Leadership Fundamentals II: 2 semester hours
Prerequisites: AERO 2001 or consent of instructor. This course lays the foundation for Air Force leadership and prepares AFROTC students for their field training experience where they will be able to put the concepts learned into practice. Contracting with AFROTC is not required for this course.

AERO 3001 Leading People & Effective Communications I: 3 semester hours
Prerequisites: Membership in the AFROTC Program or consent of instructor. This course focuses on training students to be effective managers in Air Force context. Professional concepts that will be emphasized include the use of managerial processes involving decision-making and the use of analytic aids to support planning, organizing, and controlling systems in a changing environment.

AERO 3002 Leading People & Effective Communications II: 3 semester hours
Prerequisites: AERO 3001 and membership in the AFROTC Program, or consent of instructor. This course continues the management training from AERO 3001. Using actual Air Force cases, students focus on the management of forces in change and managerial strategy within the context of the military organization.

AERO 4001 Air Force in National Security Affairs I: 3 semester hours
Prerequisites: AERO 3002 and membership in the AFROTC Program, or consent of instructor. This course explores the role of the armed forces as an integral element of American society, including civil-military relations, defense policy, and Air Force responsibilities in national defense. It is part of the final educational experience for AF ROTC Cadets before commissioning.

AERO 4002 Air Force in National Security Affairs II: 3 semester hours
Prerequisites: AERO 4001 and membership in the AFROTC Program, or consent of instructor. This course explores the role of the armed forces as an integral element of American society, including civil-military relations, defense policy, and Air Force responsibilities in national defense. It is part of the final educational experience for AF ROTC Cadets before commissioning.

Anthropology

Courses

ANTHRO 1005 Introduction to Biological Anthropology: 4 semester hours
Topics include evolutionary theory and its development, the evolution/creationist debate, Mendelian & population genetics, the evolutionary place of humans within the animal kingdom, anatomical and behavioral characteristics of primates, fossilization, primate evolution, the human evolutionary fossil record, biological variability in modern humans, race as a biological concept, and applied biological anthropology. In addition to 3 hours of lecture, 1 hour per week is spent in lab classifying ancient human fossils, observing monkeys and apes at the zoo, and doing other projects. Satisfies the Natural Science and Mathematics (SM) breadth of study requirement.
ANTHRO 1011 Introduction to Cultural Anthropology (MOTR ANTH 201): 3 semester hours
Cultural anthropology is the study of human beings as creatures and creators of society. This course is an introduction to that study which aims to demonstrate how the basic concepts and techniques developed by cultural anthropologists help us to understand societies of various degrees of complexity, including our own. We will consider topics such as language, kinship, gender, ethnicity, economics, politics, religion, and social change in a broad comparative framework. Major goals are an increased awareness of the social and cultural dimensions of human experience, the diversity and flexibility of human cultures, and processes of intercultural communication and conflict. This course satisfies the Cultural Diversity requirement.

ANTHRO 1019 Introduction to Archaeology: 3 semester hours
Archaeology is a subfield of anthropology that studies past human societies from their material remains. Explores the development of archaeology as a scientific discipline. Archaeological methods and theories will be explained using case studies from the continents of Africa, Asia, Australia, Europe and the Americas. This course satisfies the Cultural Diversity requirement.

ANTHRO 1021 The Body in Culture: 3 semester hours
This course will compare uses of the body as a social signifier in Western and non-Western cultures. It will explore how culture shapes the images, uses and meanings of the human body. It concentrates on different historical and beliefs in five areas: how the body works; sex and gender; eating manners and food; pain and punishment; beauty and bodily mutilation. This course satisfies the Cultural Diversity requirement.

ANTHRO 1025 World Cultures: 3 semester hours
An ethnographic survey of the major culture areas of the world (Africa, North and South America, Europe and Oceania). This course satisfies the Cultural Diversity requirement.

ANTHRO 1030 Democracy and War: 3 semester hours
Using the world's first democracy in ancient Greece as a case study, this course will address questions about the origins of democracy, the key elements of a successful democratic government, the mechanisms by which democratic and non-democratic states go to war, the manner in which they cope with war and the psychological effects of war on warriors and civilian populations that will help us learn how our own democracy works and affects our lives.

ANTHRO 1033 World Archaeology: 3 semester hours
Discusses some of the greatest discoveries in archaeology from prehistoric cultures to ancient civilizations of Africa, Asia, Australia, Europe and the Americas. Archaeological examples may include early human origins at Olduvai Gorge in Tanzania, the pyramids of ancient Egypt, the Maya and Aztec of Mexico, the rise of civilization in Mesopotamia, England's Stonehenge, the Roman city of Pompeii, upper Paleolithic cave paintings in France and Spain, and American Indian pueblos of the Southwest. This introductory course is designed for non-anthropology majors, or for those who are considering the major. This course satisfies the Cultural Diversity requirement.

ANTHRO 1034 Introduction to Ancient Egypt and Its Civilization: 3 semester hours
Same as HIST 1034. This course will survey ancient Egyptian history and culture from predynastic times to Greco-Roman rule, roughly 3000 BCE to 30 BCE. Students will discuss archaeological sites, mummification, religion, architecture, texts, and more. Through comparing ancient Egyptian culture with our own, students will explore what has changed in the world and what has endured for millennia.

ANTHRO 1037 The Wonders of Greece: Introduction to Greek History and Culture: 3 semester hours
Same as HIST 1037. Our democracy and culture have been heavily influenced by Greek civilization. This course will introduce students to the culture and civilization of Greece in order to provide a better understanding of our own society. The course will cover the political and military history, art, literature, philosophy, and science of Greece from prehistoric to modern times, with special emphasis on Greek civilization's enduring democratic and cultural ideals. The course will include screening of films and use of online resources.

ANTHRO 1041 Sex and Gender Across Cultures: 3 semester hours
This course considers womanhood, manhood, third genders, and sexuality in a broad cross-cultural perspective. The focus of the course is on the diverse cultural logics that separate females, males, and sometimes third genders into different groups in different societies, with the male group usually being the more prestigious one. Focusing on the indigenous non-Western cultures, this course examines gender roles and sexuality within the broader cultural contexts of ritual and symbolism, family, marriage and kinship, economy, politics, and public life. This course will help students understand what is it like to be male or female in non-Western cultures. This course satisfies the Cultural Diversity Requirement.

ANTHRO 1091 Introductory Topics in Anthropology: 3 semester hours
May vary and the course may be repeated provided topic is different. This course satisfies the Cultural Diversity requirement.

ANTHRO 1093 World Archaeology: 3 semester hours
This course features special and current topics at the introductory level in the areas of social, cultural and physical anthropology and archaeology. The course examines the basic concepts and provides an understanding of the development of new trends and areas of study in the field of Anthropology. Topics will focus on the comparative study of non-Western cultures such as ecological practices in tribal societies; religious practices in prehistoric cultures; the roles of women across cultures; etc. Topics may vary and the course may be repeated provided topic is different. This course satisfies the Cultural Diversity requirement.

ANTHRO 1095 Brief Overview of the Four Fields of Anthropology: 1 semester hour
Through the use of videos, readings, and the online course management system, this course provides a brief overview of the four traditional fields of anthropology: biological, archaeological, cultural, and linguistic anthropology. This course is designed for video instruction and offers minimal direct interaction with the instructor.

ANTHRO 1271 Food and Drink: Anthropological Perspective: 3 semester hours
This course explores the social and cultural aspects of foods and drinks. Topics may include the origins of food production; the evolution of diets, foods, and productions systems around the world; the interrelationships between food and identity, gender, race, and class; food and globalization; food politics and food justice movements; water scarcity; and the push for a sustainable future. This course satisfies the Cultural Diversity requirement.

ANTHRO 2003 Careers in Health and Medicine: 1 semester hour
Same as INTDSC 2003, GERON 2003, SOC 2003. In this course, students will learn about occupations in such fields as medicine, the allied health professions, health non-profit organizations, and global healthcare delivery. Students will understand the education and skills necessary for various careers and for application to medical, professional, and graduate schools, and will become familiar with majors, certificates and minors that are available at UMSL. They will learn about employment opportunities in the healthcare industry in the St. Louis metropolitan area, and will be introduced to members of the local community who give guest lectures. Students will gain practical experience by shadowing a healthcare professional in their job.
ANTHRO 2035 Ancient Greek Civilization and Culture: 3 semester hours
A survey of the history, language, literature, art, science, and philosophy of the ancient Greeks from prehistory to the Roman conquest. It covers the glamorous Minoan-Mycenaean civilization, the rise of classical Greek civilization and the golden age, the history of the city states such as Athens and Sparta, and the Hellenistic period under Alexander the Great and his descendants. Examines the nature of the ancient Greek language, surveys literary classics such as the Iliad and the Odyssey, and describes the archaeology of Greek myths based on the ongoing UM-St. Louis archaeological project in Greece. Discusses the rise of humanism, the ancient Olympic Games, and the legacy of ancient Greece in Western civilization.

ANTHRO 2100 Languages and World View: 3 semester hours
Same as FGN LANG 2100 and SOC 2200. Prerequisites: Completion of two semesters of one foreign language at the college level. This course investigates the extent to which peoples’ linguistic and cultural background informs their understanding of the world. Experts on a variety of major Western and non-Western languages will introduce students to differences in ideas about time, space, human relationships, and other issues based on language. The course will also analyze common cultural misunderstandings among native speakers of English and speakers of other languages.

ANTHRO 2101 Girl Cultures: 3 semester hours
Same as HIST 2120. This course explores themes of identity and gender construction, media representation, and cultural production found in a spectrum of historic and modern international and US girl cultures. 1950s British Teddy Girls, 1970s Japanese Takanokozoku, 1990s American Riot Grisls, 2000s Mexican American Cholas, and other girl cultures teach us about the many strategies teens and young women use to construct their own forms of identity through music, language, zines, fashion, and other diverse activities. This course satisfies the Cultural Diversity requirement.

ANTHRO 2104 Medicine in Culture and History: 3 semester hours
Students will explore the diverse beliefs and practices related to anatomy, disease, sexual reproduction, gender, sport, and food. Western biomedicine will be compared with traditional Chinese medicine and other non-Western traditions such as shamanic, Native American, Tibetan, and Ayurvedic systems. The clash between traditional and modern medical systems will also be examined. This course satisfies the Cultural Diversity Requirement.

ANTHRO 2105 Human Variation: 3 semester hours
This course will look at the variation that exists within our own species, both between and within populations. It will investigate the evolutionary and genetic basis of human variation, as well as its diversity, adaptive significance, and distribution. Topics covered will include: body shape and physiology, blood groups, susceptibility to disease, and skin color. It will survey historical attempts to classify humans into different “races”; assess definitions of race as a solely cultural construct; and critique attempts to link race, intelligence and performance.

ANTHRO 2109 Archaeological Field School: 3-6 semester hours
Prerequisites: Consent of instructor. Introduction to field methods in archaeology and to the techniques of recording, storing, analyzing, and reporting archaeological findings. Experience is gained through participation in a field research project including excavation and survey projects. Emphasis is placed upon research design and implementation and upon the use of archaeological data in describing and explaining human behavior.

ANTHRO 2111 Cultures of East Asia: 3 semester hours
An ethnographic and historical survey of the various people of East Asia including Japan, China, North and South Korea, Hong Kong and Macau. Includes an examination of the varying cultural and social developments within and through the historical, geographical, and cultural environments. This course satisfies the Cultural Diversity requirement.

ANTHRO 2117 Greek History and Culture: 3 semester hours
Same as HIST 2117. Greek civilization has had a deep impact on contemporary society in art; social; political; and economic organization; philosophy; law; medicine; and science. This course covers major aspects of Greek history and culture from antiquity to the present. It considers the major political and military events of Greek history, as well as important aspects of Greek culture, including sports and the history of the Olympic Games, literature, philosophy, and mythology.

ANTHRO 2120 Native Peoples of North America: 3 semester hours
A survey of Native Peoples of North America including the prehistory, ethnographic and linguistic groupings, social organization, and cultural systems of these cultures.

ANTHRO 2124 Introduction to Contemporary African Cultures: 3 semester hours
This introductory course focuses on multiple representations within contemporary African cultures and societies. Students have an opportunity to study and learn about African cultural expressions in belief systems, gender constructions, nationality and ethnicity, socioeconomic class systems, politics, environmental challenges, and cultural adaptations and change. This course satisfies the Cultural Diversity requirement.

ANTHRO 2132 Archaeology of North America: 3 semester hours
Examines the archaeological record of human developments throughout prehistoric North America. Topics of discussion include the origins of human culture in America, the processes of prehistoric cultural development in the different regions of the continent, and archaeological approaches to explaining the behavior of North America's prehistoric inhabitants. Satisfies the Cultural Diversity requirement.

ANTHRO 2134 Archaeology of The Inca, Aztec, and Maya: 3 semester hours
Provides an overview of human social and cultural developments in Mesoamerica and Andean South America from the first settlements over 20,000 years ago to the Spanish conquest. Focuses on events leading to and including the establishment of Classic Mayan and Aztec societies, and discusses changes that led to what was perhaps the largest nation on earth for its time, the Inca. This course satisfies the Cultural Diversity requirement.

ANTHRO 2150 Zombies, Vampires, and Monsters: The Supernatural in Popular Culture: 3 semester hours
Beliefs in the unseen world are universal. Zombies, vampires, and monsters are all elements of the supernatural in popular culture that we can analyze to discover deeper meanings about what it means to be human. This course will also cover magic, witchcraft, ghosts, possession, exorcism, and other beliefs and practices that reveal the views that humans have about their place in the world. This course will use anthropological concepts to make the familiar strange, and the strange familiar.
ANTHRO 2191 Special Topics in Non-Western Culture: 3 semester hours
This course focuses on a specific non-western culture, or geographically related groups of cultures. Ethnographic and/or archaeological cultures are chosen and their ecological economic, social, religious, cosmological, political, ethnic, religious, linguistic and other cultural domains are examined. Students are exposed to basic concepts and knowledge for understanding diverse cultures in their historical and/or contemporary contexts of development and relationship. Topics will vary. Satisfies Cultural Diversity Requirement.

ANTHRO 2192 Anthropological Perspectives on Western Culture: 3 semester hours
This course focuses on a specific Western culture or geographically-related group of cultures utilizing ethnographic and/or archaeological sources. Ecological, economic, social, political, ethnic, religious, linguistic and cultural domains will be examined. Students are exposed to basic anthropological concepts for understanding diverse cultures in their historical and/or contemporary contexts. Topics will vary.

ANTHRO 2232 Analysis of Archaeological Artifacts: 3 semester hours
Prerequisites: ANTHRO 1019 or ANTHRO 2109 or consent of instructor. This course teaches the methods and techniques for analyzing the artifacts from an archaeological dig. Students learn to process, analyze, and interpret ceramics, stone tools, plant and animal debris according to form, design, use wear, and associations. This analysis will form the basis of interpretations about human behaviors and cultural and temporal affiliations. The student will prepare a report of the examined collection.

ANTHRO 2420 Maiko, Maids, and Masako: Women in Japanese Cultural History: 3 semester hours
Same as HIST 2420. This course offers perspectives on famous Japanese women who have captured the public eye at various historical junctures. Students will learn to critically assess representations of these mythological, religious, occupational, and subcultural figures, as well as their linkage to notions of nationhood and modernity. This course satisfies the cultural diversity requirement.

ANTHRO 2425 Food and Drink in Japan: A Cultural History: 3 semester hours
Same as HIST 2425. This course explores food and drink as core aspects of intimate and public life in Japan and as key elements of nationalism. It examines distinct class, ethnic, and regional dimensions of food and drink that have their own unique histories. Students will learn how food and drink encode a spectrum of historical meanings as well as great cultural hybridity. This course satisfies the Cultural Diversity requirement.

ANTHRO 2430 Ghosts, Goblins, and Godzillas: 3 semester hours
Same as HIST 2430. This course explores the spirits, ghouls, and animal tricksters who populate the historic and modern Japanese imagination. Students will learn about the supernatural beings, and the exceptional humans who interact with or control them, who are found in centuries of Japanese religion, folklore, literature, and art, and are also frequent themes in modern art, film, anime and manga. This course satisfies the Cultural Diversity requirement.

ANTHRO 2431 Writing Systems of the World: 3 semester hours
Same as HIST 3214. This course studies the writing systems from around the world leads to appreciation for one of humankind’s most important technological inventions. Students will explore the origins and development of writing systems over time, the linguistic classification of writing, and the transmission of writing across languages and cultures. This course satisfies the Cultural Diversity requirement.

ANTHRO 2432 Visual and Material Culture of Japan: 3 semester hours
Same as HIST 3218. This course offers students the opportunity to research Japanese visual genres and material artifacts, from the iconography of Buddhism and fifteenth century pottery to postwar political cartoons, advertising posters, and etiquette comics. Students will discover how artifacts and images provide a means for communicating cultural meaning, while also reflecting aesthetics, humor, and cultural norms. This course satisfies the Cultural Diversity requirement.

ANTHRO 2433 Medical Anthropology: 3 semester hours
Same as GERON 3212 and SOC 3212. Prerequisites: ANTHRO 1011 or GERON 2170 or PSYCH 1003 or SOC 1010 or consent of instructor or program director. An examination of the growing interaction between anthropology and medicine, and the increasing use of anthropologists in medical and health-care settings. In addition to teaching current theory in medical anthropology, the course focuses on anthropologically-based skills essential to those working in health-related fields.

ANTHRO 2434 Forensic Anthropology: 4 semester hours
Same as CRIMIN 3209. Prerequisites: ANTHRO 1005, or BIOL 1102, or junior standing, or consent of instructor. Students learn basic dental and skeletal anatomy and the methods used by biological anthropologists and archaeologists to collect and analyze human skeletal remains, including how to determine age and sex of skeletal remains, identify ethnic markers, determine stature and handedness, and identify the presence of trauma and/or pathology. Also covers the role of the forensic anthropologist in crime scene investigations and human rights issues. In the weekly lab section students will have an opportunity for hands-on application of techniques to analyze skeletal remains.

ANTHRO 2435 Aging Across Cultures: 3 semester hours
Same as GERON 3215. Prerequisites: ANTHRO 1011 or PSYCH 1003 or SOC 1010 or consent of instructor. This course examines the wide ranging variability in the roles of older people across different cultures and the effects these have on older people, their families, and their societies.

ANTHRO 3209 Forensic Anthropology: 4 semester hours
Same as CRIMIN 3209. Prerequisites: ANTHRO 1005, or BIOL 1102, or junior standing, or consent of instructor. Students learn basic dental and skeletal anatomy and the methods used by biological anthropologists and archaeologists to collect and analyze human skeletal remains, including how to determine age and sex of skeletal remains, identify ethnic markers, determine stature and handedness, and identify the presence of trauma and/or pathology. Also covers the role of the forensic anthropologist in crime scene investigations and human rights issues. In the weekly lab section students will have an opportunity for hands-on application of techniques to analyze skeletal remains.

ANTHRO 3212 Medical Anthropology: 3 semester hours
Same as GERON 3212 and SOC 3212. Prerequisites: ANTHRO 1011 or GERON 2170 or PSYCH 1003 or SOC 1010 or consent of instructor or program director. An examination of the growing interaction between anthropology and medicine, and the increasing use of anthropologists in medical and health-care settings. In addition to teaching current theory in medical anthropology, the course focuses on anthropologically-based skills essential to those working in health-related fields.

ANTHRO 3214 Writing Systems of the World: 3 semester hours
Same as HIST 3214. This course studies the writing systems from around the world leads to appreciation for one of humankind’s most important technological inventions. Students will explore the origins and development of writing systems over time, the linguistic classification of writing, and the transmission of writing across languages and cultures. This course satisfies the Cultural Diversity requirement.

ANTHRO 3215 Aging Across Cultures: 3 semester hours
Same as GERON 3215. Prerequisites: ANTHRO 1011 or PSYCH 1003 or SOC 1010, or consent of instructor. This course examines the wide ranging variability in the roles of older people across different cultures and the effects these have on older people, their families, and their societies.

ANTHRO 3218 Visual and Material Culture of Japan: 3 semester hours
Same as HIST 3218. This course offers students the opportunity to research Japanese visual genres and material artifacts, from the iconography of Buddhism and fifteenth century pottery to postwar political cartoons, advertising posters, and etiquette comics. Students will discover how artifacts and images provide a means for communicating cultural meaning, while also reflecting aesthetics, humor, and cultural norms. This course satisfies the Cultural Diversity requirement.

ANTHRO 3220 Quantitative Data Analysis in Social Science Research: 3 semester hours
Same as SOC 3220. Prerequisites: SOC 1010 or ANTHRO 1011 and MATH 1030 (or higher). This course examines issues and techniques of statistical analysis relevant to quantitative sociological research, such as elementary probability, measurements of central tendency and dispersion, measures of relationships including linear regression and correlation, inferential and nonparametric statistics. The course includes an introduction to computer-based statistical analysis.
ANTHRO 3228 People and Plants: 3 semester hours
Prerequisites: ANTHRO 1011 or ANTHRO 1019 or consent of instructor. This course is designed to introduce students to complex relationships between people and plants. We will focus on how plants are perceived, managed, and used across human societies. Topics span the ages and include collection of wild plants and ‘Stone Age’ diets; the origins of agriculture in Ancient Egypt, Mesopotamia, China, and the Americas; the development of crops and GMOs; industrial agriculture; organic gardening; and the wilderness-to-table movement. While emphasis will be on food plants, we will also discuss the use of plants as medicines, cosmetics, dyes, and construction materials.

ANTHRO 3235 Women in Subsaharan Africa: A Contemporary Perspective: 3 semester hours
Prerequisites: ANTHRO 1011, or introductory course in another social science, or consent of instructor. Examines important traditional concerns of anthropologists such as the nature of kinship obligation and privilege; gender as a basis for the division of labor; social organization for formal and informal networks; and ritual and ceremony. In addition we look closely at the changing role of African women, as related by African women testing the very limits of what is ‘socially and culturally acceptable.’ The roles women continue to play in politics, comprehensive development (i.e. cultural and economic), and evolving social structures are reviewed to gain an understanding of the historical and contemporary mandates for their social action. This course satisfies the Cultural Diversity requirement.

ANTHRO 3241 Myths and Monuments: 3 semester hours
This course will provide an overview of Greek myths and legends, as well as their reception in architecture, the visual arts, and literature. Particular emphasis will be given to: 1) the theology and the creation myths of the Greeks and how these relate to the Bible; 2) heroic myths from the Trojan War to Atlantis, and their historicity; 3) famous monuments, works of art, and texts from Greek and world literature, that advance our understanding of Greek myths and the culture that created them.

ANTHRO 3243 Marriage, Family, and Kinship: 3 semester hours
Same as SOC 3243 and GS 3243. Prerequisites: ANTHRO 1019, SOC 1010, or consent of the instructor. This course will examine the construction of kinship systems, marriages, families and other forms of intimate relationships from anthropological and sociological perspectives. The cross-cultural structure of this class will incorporate global case studies, including U.S. and European marriage and family structures. Students will have the opportunity to explore topics including love, dating, cohabitation, kinship calculation, alternative lifestyles, and divorce.

ANTHRO 3244 Religion, Magic and Science: 3 semester hours
Prerequisites: ANTHRO 1011, or introductory course in another social science, or consent of instructor. A consideration of the roles of religion, magic, and science in culture and social organization.

ANTHRO 3246 Medicine and Disease in the Ancient World: 3 semester hours
Prerequisites: ANTHRO 1005 or consent of the instructor. This course explores medicine and disease through case studies from civilizations of the ancient world such as Egypt, Greece, and Peru. Students will discuss how these cultures conceptualized disease, and, in turn, how they contended with illness. This course addresses different ways of identifying disease through medical texts, art, and human remains.

ANTHRO 3255 Oral History and Urban Culture in St. Louis: 3 semester hours
Prerequisites: ANTHRO 1011 or instructor's consent. This course involves students in background research and active fieldwork in urban anthropology within the metropolitan area. The focus will be on learning and applying oral history techniques in the city of St. Louis and its neighborhood. They will learn fieldwork methodologies and how to conduct social, cultural, and historical research in preparation for fieldwork. This includes learning to research, conduct, and process interviews. They will also learn to work in teams to construct a group project to be presented to the class.

ANTHRO 3290 Advanced Topics in Archaeology: 3 semester hours
Prerequisites: ANTHRO 1019, or consent of instructor. Selected topics in archeology with a strong theoretical and methodological approach. Requires substantial reading and writing. May be repeated with consent of department.

ANTHRO 3291 Current Issues in Anthropology: 3 semester hours
Prerequisites: ANTHRO 1011, or introductory course in another social science, or consent of instructor. Selected topics in social, cultural and physical anthropology, with emphasis on current issues and trends in the field of anthropology. May be repeated provided topic is different.

ANTHRO 4000 Ethnographic Field Research Methods: 3 semester hours
Prerequisites: ANTHRO 1011, SOC 1010, or consent of instructor. Examines important traditional concerns of anthropologists such as the nature of kinship obligation and privilege; gender as a basis for the division of labor; social organization for formal and informal networks; and ritual and ceremony. In addition we look closely at the changing role of African women, as related by African women testing the very limits of what is ‘socially and culturally acceptable.’ The roles women continue to play in politics, comprehensive development (i.e. cultural and economic), and evolving social structures are reviewed to gain an understanding of the historical and contemporary mandates for their social action. This course satisfies the Cultural Diversity requirement.

ANTHRO 4005 Special Research Methods in Cultural Anthropology: 1-3 semester hours
Prerequisites: ANTHRO 1011 or consent of instructor. Advanced instruction in specialized technical and analytical skills and methods used to conduct research in cultural anthropology and/or linguistic anthropology. May be repeated provided the topic is different.

ANTHRO 4015 Data Analytics in the Social Sciences: 3 semester hours
Same as SOC 4015. Prerequisites: MATH 1020 or higher. This course integrates traditional statistical methods with new software and original datasets relevant to students of the social sciences. Students will learn to load, clean, and describe datasets using common software packages and programming languages employed in data science and data analytics. Students will also learn basic descriptive and inferential statistics as well as the visualization tools to successfully graph outputs and present findings. Students with no background in statistics, data analytics, or programming are welcome in the course.

ANTHRO 4021 Anthropology of Current World Issues: 3 semester hours
Prerequisites: ANTHRO 1011. This course enhances your understanding of world issues by using an anthropological lens. Students will learn about human adaptations and rationalities, and the way in which anthropology can shed new perspectives on current world issues including ethics, food and water crises, and racial, ethnic, and gender disparities.
ANTHRO 4100 Field Methods in Archaeology: 3 semester hours
Prerequisites: ANTHRO 1019 or consent of instructor. Advanced instruction in archaeological field methods including techniques of recording, storing, analyzing, and reporting archaeological findings. Experience is gained through participation in excavations and/or surveys. Emphasis is placed upon research design and implementation and the use of archaeological data in describing and explaining human behavior.

ANTHRO 4105 Special Research Methods in Archaeology: 1-3 semester hours
Prerequisites: ANTHRO 1019 or consent of instructor. Advanced instruction in specialized technical and analytical skills and methods used to conduct research in archaeology. May be repeated provided the topic is different.

ANTHRO 4200 Field Methods in Biological Anthropology: 3 semester hours
Prerequisites: ANTHRO 1005 or consent of instructor. Course material is based on human skeletal biology and bioarchaeology. The course focuses on 1) training a biological anthropologist; 2) bibliographic research; 3) research methods including skeletal pathology, geographic morphological variants, and developmental changes; 4) giving academic presentations and writing research reports. Students are required to conduct self-directed research on human skeletal remains.

ANTHRO 4205 Special Research Methods in Biological Anthropology: 1-3 semester hours
Prerequisites: ANTHRO 1005 or consent of instructor. Advanced instruction in specialized technical and analytical skills and methods used to conduct research in biological anthropology. May be repeated provided the topic is different.

ANTHRO 4307 Community Based Research in Anthropology: 3 semester hours
Prerequisites: Junior standing, ANTHRO 1011, ANTHRO 3202, and completion of junior-level writing requirement. An advanced course in qualitative/ethnographic modes of inquiry, building on research and analytical skills learned in previous courses. Some quantitative methods may supplement the research when appropriate. Students experience the process of discovery, representation, presentation, and justification based on fieldwork and/or archival research. The focus is on applying anthropological knowledge to practical issues faced by communities and institutions in the St. Louis area. May be repeated provided the topic is repeated.

ANTHRO 4310 Laboratory Methods in Archaeology: 3 semester hours
Prerequisites: ANTHRO 1019, SOC 3220 or equivalent, or consent of instructor. An advanced laboratory analysis and curation methods class. The emphases are 1) mastery of general lab methods and procedures, and 2) development of independent analysis skills in one or more specialty areas such as lithics, ceramics, computer graphics, statistical methods, paleoethnobotany, experimental analysis, and soils.

ANTHRO 4314 The Archaeology of Death: 3 semester hours
Prerequisites: ANTHRO 1005 or consent of the instructor. This course will survey some of the different ways people have buried their dead over time. Using archaeology as their foundation, students will explore what burials can tell us about culture and society. During field trips to local cemeteries, they will study current perceptions of death and future archaeological records. Students will conduct demographic analysis of both local and global cemeteries to help them understand the relationships between death, burial, and aging.

ANTHRO 4315 Anthropology Past, Present, and Future: 3 semester hours
Prerequisites: Senior standing, one of the following method courses: ANTHRO 4000, ANTHRO 4100, ANTHRO 4200, and consent of the instructor. The capstone course for anthropology majors, ideally to be taken in the final semester of the senior year. In this course, students will 1) explore where anthropology has come from and where it may be going; 2) discuss a series of topics that can be addressed from the perspectives of different subfields by examining different theoretical positions, methods, and types of data; 3) learn to apply the knowledge and skills gained in previous courses to their future, professional careers. Final senior exit projects will be presented orally to Anthropology faculty members.

ANTHRO 4316 Senior Research Project: 3 semester hours
Prerequisites: Senior standing and consent of the instructor. For undergraduates who have excelled in their coursework and wish to conduct original research. Students will work with a faculty member with expertise relevant to the research topic. This course offers students the opportunity to build upon strong research, analytic and writing skills. Completion of this course will result in the writing of a thesis, publication of an article, presentation at a professional meeting, or other work that exemplifies high achievement.

ANTHRO 4325 Internship in Cultural Anthropology: 1-3 semester hours
Prerequisite: Recommendation of major advisor. Students will be assigned an internship on recommendation of their advisor. Internships will consist of a period of study, observation, and training in an appropriate public or private institution, business, or government office. Cultural Anthropology internships are aimed at providing students with opportunities to learn to apply their knowledge of social and cultural process and diversity to practical situations in the market place of ideas, goods, and services. Specific placements will be selected to match student's interests and career goals.

ANTHRO 4326 Internship in Archaeology: 1-6 semester hours
Prerequisite: Recommendation of major advisor. Students will be assigned an internship on recommendation of their advisor. Internships will consist of a period of study, observation, and training in an appropriate public or private institution, business, or government office. Archaeology internships are aimed at providing students with opportunities to work with professional archaeologists in public and private research environments including laboratories and curation centers. Specific placements will be selected to match student's interests and career goals.

ANTHRO 4328 Internship in Museum Studies: 1-3 semester hours
Prerequisite: Recommendation of major advisor. Students will be assigned an internship on recommendation of their advisor. Internships will consist of a period of study, observation, and training in an appropriate public or private institution, business, or government office. Cultural Anthropology internships are aimed at providing students with opportunities to learn to apply their knowledge of social and cultural process and diversity to practical situations in the market place of ideas, goods, and services. Specific placements will be selected to match student's interests and career goals.

ANTHRO 4329 Internship in Biological Anthropology: 1-3 semester hours
Prerequisite: Recommendation of major advisor. This course is an internship that consists of a period of study, observation and training in an appropriate institution, lab, or research setting related to forensics, primate behavior and biology, human genetics, population, environmental policy, and other domains related to biological anthropology. Students will be assigned an internship on recommendation of their advisor. This course may be repeated for a maximum of 6 credit hours.
ANTHRO 4350 Special Study: 1-3 semester hours
Prerequisite: Consent of instructor. Independent study through readings, reports, or field research. No student may take more than a cumulative total of 6 hours of Special Study.

ANTHRO 5440 Sociocultural Aspects of Aging: 3 semester hours
Same as GERON 5440. Prerequisites: Graduate status or consent of the instructor or program director. Focuses on the variety of solutions encountered in different sociocultural contexts for dealing with the problems, challenges and opportunities of growing old. It is organized around topics that are of concern to both anthropology and social gerontology: the status of the aged, intergenerational relations, aging in modernizing societies, ethnic dimensions of aging in complex societies, health in later life, death and dying. Both in-depth case studies and cross-cultural comparisons are examined in an effort to arrive at a culturally informed assessment of factors affecting aging and the aged in the United States.

ANTHRO 5592 The History of the Visual Arts in American Museums: 3 semester hours
Same as HIST 5592 and ART HS 5592. Prerequisites: Graduate standing and consent of instructor. This course is an introduction to selected topics in the history of museology, focusing on art and anthropology museums as sites for the interpretations of art and culture, and as contested meeting grounds for various views of history and culture.

ANTHRO 6138 Museum Studies Master’s Project: 5 semester hours
Same as ART HS 6038 and HIST 6138. Prerequisites: Consent of Director of Museum Studies Program. Research and writing/exhibit development on a selected topic.

Applied Music

Courses

AP MUS 1430 Secondary Applied Music: Jazz Studies: 1 semester hour
Prerequisite: By audition and consent of department. Individual instruction in jazz performance and literature on the designated instrument. Not applicable to the applied music requirement for music major or music minor degrees. May be repeated for credit.

AP MUS 1440 Bassoon: 1 semester hour
Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

AP MUS 1441 Clarinet: 1 semester hour
Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

AP MUS 1442 Classical Guitar: 1 semester hour
Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

AP MUS 1443 Euphonium: 1 semester hour
Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

AP MUS 1444 Flute: 1 semester hour
Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

AP MUS 1445 French Horn: 1 semester hour
Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

AP MUS 1446 Harp: 1 semester hour
Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

AP MUS 1447 Oboe: 1 semester hour
Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

AP MUS 1448 Organ: 1 semester hour
Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

AP MUS 1449 Percussion: 1 semester hour
Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

AP MUS 1450 Piano: 1 semester hour
Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

AP MUS 1451 Saxophone: 1 semester hour
Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

AP MUS 1452 Trombone: 1 semester hour
Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

AP MUS 1453 Trumpet: 1 semester hour
Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

AP MUS 1454 Tuba: 1 semester hour
Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

AP MUS 1455 Violin: 1 semester hour
Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

AP MUS 1456 Viola: 1 semester hour
Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

AP MUS 1457 Violoncello: 1 semester hour
Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

AP MUS 1458 String Bass: 1 semester hour
Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.
**AP MUS 1459 Voice: 1 semester hour**
Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

**AP MUS 1460 Seminar in Pedagogy and Literature: 0 semester hours**
Prerequisites: Concurrent registration with parallel Applied Music course is required. Seminars in pedagogy and literature are offered for all areas of Applied Music. May be taken on a satisfactory/unsatisfactory grading basis.

**AP MUS 3440 Bassoon: 1 semester hour**
Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3441 Clarinet: 1 semester hour**
Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3442 Classical Guitar: 1 semester hour**
Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3443 Euphonium: 1 semester hour**
Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3444 Flute: 1 semester hour**
Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3445 French Horn: 1 semester hour**
Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3446 Harp: 1 semester hour**
Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3447 Oboe: 1 semester hour**
Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3448 Organ: 1 semester hour**
Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3449 Percussion: 1 semester hour**
Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3450 Piano: 1 semester hour**
Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3451 Saxophone: 1 semester hour**
Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3452 Trombone: 1 semester hour**
Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3453 Trumpet: 1 semester hour**
Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3454 Tuba: 1 semester hour**
Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3455 Violin: 1 semester hour**
Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3456 Viola: 1 semester hour**
Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3457 Violoncello: 1 semester hour**
Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

**AP MUS 3458 String Bass: 1 semester hour**
Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.
AP MUS 3460 Seminar in Pedagogy and Literature: 0 semester hours
Prerequisites: Concurrent registration with a parallel Applied Music course is required. Seminars in pedagogy and literature are offered for all areas of Applied Music. May be taken on a satisfactory/unsatisfactory basis.

AP MUS 3500 Junior Recital: 0 semester hours
Prerequisites: Consent of instructor; concurrent registration in a 4000-level AP MUS course. Preparation and presentation of a Junior Recital. The student's preparation will be evaluated by means of a pre-recital hearing at least 5 weeks before the recital.

AP MUS 3510 Senior Recital: 0 semester hours
Prerequisites: Consent of instructor; concurrent registration in a 3000-level AP MUS course (for non-performance majors) or a 4000-level AP MUS course (for Music Performance majors). Preparation and presentation of a Senior Recital. The student's preparation will be evaluated by means of a pre-recital hearing at least 5 weeks before the recital.

AP MUS 4440 Bassoon: 2 semester hours
Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4441 Clarinet: 2 semester hours
Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4442 Classical Guitar: 2 semester hours
Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4443 Euphonium: 2 semester hours
Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4444 Flute: 2 semester hours
Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4445 French Horn: 2 semester hours
Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4446 Harp: 2 semester hours
Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4447 Oboe: 2 semester hours
Prerequisites: Completion of Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4448 Organ: 2 semester hours
Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4449 Percussion: 2 semester hours
Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4450 Piano: 2 semester hours
Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4451 Saxophone: 2 semester hours
Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4452 Trombone: 2 semester hours
Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4453 Trumpet: 2 semester hours
Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4454 Tuba: 2 semester hours
Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4455 Violin: 2 semester hours
Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4456 Viola: 2 semester hours
Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4457 Violoncello: 2 semester hours
Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4458 String Bass: 2 semester hours
Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.
AP MUS 4459 Voice: 2 semester hours
Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4460 Seminar in Pedagogy and Literature: 0 semester hours
Prerequisite: Concurrent registration with parallel Applied Music course is required. This course is a seminar in pedagogy and literature and is offered for all areas of Applied Music. It may be taken on a satisfactory/unsatisfactory grading basis.

AP MUS 5001 Graduate Performers Certificate Recital I: 1 semester hour
Prerequisites: Consent of department; concurrent registration in AP MUS 5440 is required. Preparation and presentation of a public recital at UMSL. Repertoire will be chosen with the approval of the applied instructor, and should include music from varying styles and eras. Recital should be 70-90 minutes in length.

AP MUS 5002 Graduate Performers Certificate Recital II: 1 semester hour
Prerequisites: AP MUS 5001; concurrent registration in AP MUS 5440 is required. Preparation and presentation of a public recital at UMSL. Repertoire will be chosen with the approval of the applied instructor, and should include music from varying styles and eras. Recital should be 70-90 minutes in length. Building on the skills gained through completion of AP MUS 5001, AP MUS 5002 should demonstrate a higher level of musical accomplishment.

AP MUS 5003 Graduate Performers Certificate Lecture Recital: 1 semester hour
Prerequisites: Concurrent registration in AP MUS 5440 is required. Preparation and presentation of a public lecture recital at UMSL. The presentation should consist of a balance between verbal and musical content, and convey a high quality of both intellectual understanding and musical performance. Designed in consultation with the applied instructor, the lecture recital should focus in detail on one work, topic, or genre, and last approximately 60 minutes, with a brief intermission.

AP MUS 5430 Special Applied Studies: 1 semester hour
Prerequisites: Graduate standing in music and consent of department. Individual instruction in the performance and literature of an applied area other than the student's primary performance study. No jury examination is required. May be repeated for credit.

AP MUS 5440 Graduate Applied Music: 1 semester hour
Prerequisites: Graduate standing in music and consent of department. Concurrent registration in EN PER 5490 is required for students enrolled in the Graduate Certificate in Music Performance. Instruction is offered in the following areas: bassoon, clarinet, classical guitar, euphonium, flute, French horn, harp oboe, organ, percussion, piano, saxophone, trombone, trumpet, tuba, violin, viola, violoncello, string bass and voice. May be repeated for credit.

Arabic

Courses

ARABIC 1001 Arabic I: 5 semester hours
Emphasis is placed upon the understanding, speaking, reading and writing of Arabic and upon the acquisition of the fundamentals of grammar and syntax.

ARABIC 1002 Arabic II: 5 semester hours
Prerequisites: ARABIC 1001 or equivalent. Emphasis is placed upon the understanding, speaking, reading and writing of Arabic. Continuation of acquisition of the fundamentals of grammar and syntax.

ARABIC 2101 Intermediate Arabic I: 5 semester hours
Prerequisites: ARABIC 1002 or equivalent. Students will advance their understanding of Arabic culture through discussions, readings and written work. Language skills will be further developed through meaningful communicative interaction.

ARABIC 2190 Special Readings: 1-3 semester hours
Prerequisites: ARABIC 2102 or consent of the department. Independent study through readings, reports and conferences.

Art Education

Courses

ART ED 2179 Visual Art Activities for Elementary School: 3 semester hours
Students will explore the purpose of visual arts in school settings and will encounter various media and materials through hands-on art experiences. Discussion of social, cultural, and historical influences on creative works will be encountered. Course content highlights the integration of visual art in teaching elementary subjects and emphasizes the role of art-making and imaginative experiences in child development. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ART ED 3328 Art Education: Theory to Practice: 3 semester hours
Prerequisites: Completion of Level I requirements and Foundation Art Program; concurrent enrollment in ART ED 4260 is required. Development and application of concepts related to comprehensive art education and standards-based curriculum in art education, with an examination of current theories, trends, publications, and on-line resources in the field.

ART ED 4260 Art Museum as Teaching Resource: 3 semester hours
Prerequisites: Completion of Level I requirements, 9 hours of ART HS, and completion of Foundation Art Program; concurrent enrollment in ART ED 3328 is required. Students will learn how to strengthen K-12 Art Education by utilizing the collections and resources of the St. Louis Art Museum. A variety of teaching approaches and learning activities for galleries and classrooms will be employed, focusing on art from around the world and throughout history.

ART ED 4273 Curriculum and Methods of Teaching Art: 3 semester hours
Prerequisites: ART ED 3328 and completion of, or concurrent enrollment in, ED PSY 3312, SPEC ED 3318, or TCH ED 4391. A study of the scope and sequence of art education in the school curriculum, with emphasis on the preparation, selection, organization and application of materials and methods of instruction and assessment. Attention is also given to learning the research tools of the scholar in the field of art education. Not available for graduate credit.

ART ED 4290 Special Study in Art Education: 1-6 semester hours
Prerequisites: Junior, senior, or graduate standing and consent of instructor. Independent study through readings, reports, field research, or special projects. May be repeated for credit, up to a maximum of 6 credit hours.
ART ED 5228 Foundation and Classroom Application of Art Education: 2 semester hours
Prerequisites: Graduate standing, admission to the Teacher Education Program, a passing score on the Missouri Content Exam (MoCA) in Art on file, and consent of instructor; concurrent enrollment in ART ED 5260 is required. Development, application, and research of concepts related to comprehensive art education and standards-based curriculum in art education, with an in-depth examination of current theories, trends, publications, and on-line resources in the field.

ART ED 5260 Museum Collections in the K-12 Curriculum: 2 semester hours
Prerequisites: Graduate standing. Students will research the value and application of utilizing the collections and resources of the St. Louis Art Museum to strengthen K-12 education. A variety of research-based teaching strategies and learning activities for galleries and classrooms will be employed; a broad cultural perspective and historical understanding of art will be used.

ART ED 5273 Advanced Methods and Curriculum Development of Teaching Art: 2 semester hours
Prerequisites: ART ED 5260 and ART ED 5228. An in-depth study of the scope and sequence of art education in the school curriculum, highlighting the preparation, selection, organization and application of materials and methods of instruction and assessment. Emphasis is placed on learning the research tools of the scholar in the field of art education and the role of the teacher as researcher on curriculum development.

ART ED 5334 Topics in Contemporary Art Education: 3 semester hours
Prerequisites: Graduate standing or permission of instructor. Intensive study for advanced students and art teachers, emphasizing specialized techniques and innovative concepts. Topics to be announced. May be repeated for credit, up to a maximum of 12 credit hours.

ART ED 5588 Museum Education and Visitor Research: 3 semester hours
Prerequisites: Consent of Director of Museum Studies Program. Development and operation of museum educational programs: learning theory; program design; relationships with exhibit development' programming for children and adults. Visitor research: theoretical foundations; research design; impact on programming and strategic planning.

ART ED 5590 Special Study in Art Education: 1-6 semester hours
Prerequisites: Graduate standing and consent of instructor. Independent study through readings, reports, field research, or special projects. May be repeated for credit.

Art History

Courses

ART HS 1100 Introduction to Western Art (MOTR ARTS 100): 3 semester hours
An introduction to major historical movements in Western art.

ART HS 1120 Global Art and Visual Culture (MOTR ARTS 101): 3 semester hours
This course explores transcultural perspectives in Art History. Students will be introduced to creative visual traditions from across the globe. The course examines themes such as death and the afterlife, religious practice, visual persuasion, and design aesthetic in historical Europe, Africa, Asia, the Indigenous Americas and Oceania. This course satisfies the Cultural Diversity requirement.

ART HS 1140 Indigenous Arts of the Americas: 3 semester hours
This course surveys the indigenous arts of the Americas from precontact through the present. Cultures to be covered may include Iroquois and Ojibway of the Northeast; Navajo and Pueblo of the Southwest; Kwagulth and Gitsxan of the Northwest Coast; and Inuit from the Arctic. The relationship of art to religion, philosophy, politics, and social life will be explored. This course satisfies the Cultural Diversity requirement.

ART HS 1150 Introduction to the Art and Visual Cultures of Africa: 3 semester hours
This course surveys major art forms of Africa and the African Diaspora. It addresses traditional media, such as architecture, masquerade, regalia, sculpture, metalwork, ceramics, and textiles, as well as contemporary sculpture, painting, photography, and performance. This course satisfies the Cultural Diversity requirement.

ART HS 1160 Introduction to the Art and Visual Cultures of Asia: 3 semester hours
This course surveys major achievements in architecture, sculpture, and painting of India, China, Japan, and Southeast Asia, with an emphasis on religious, historical, and social context of the arts. This course satisfies the Cultural Diversity requirement.

ART HS 1190 Ideas in the History of Art and Visual Culture: 3 semester hours
Prerequisites: ART HS 1100 or consent of instructor. This course studies selected works of art, with attention to the social and cultural factors surrounding their creation.

ART HS 2211 Art and Archaeology of The Ancient World: 3 semester hours
Prerequisite: ART HS 1100. A survey of art in Egypt, the ancient Near East, Greece, and Rome, beginning in the Neolithic era (8000-4000 BC) and ending with the Barbarian invasions of Italy in the fifth century A.D. The major highlights of architecture and city planning, sculpture, painting, pottery, and the minor arts will be covered.

ART HS 2212 Greek Art and Archaeology: 3 semester hours
General survey or material culture in the Aegean basin, beginning with the Bronze Age (Third Millennium B.C.) and terminating in the late Hellenistic period (Second Century B.C.). For the Hellenistic period the course will trace Greek developments and influences outside of the Aegean, for example in Italy and in Egypt.

ART HS 2225 Medieval Art: 3 semester hours
A survey of the art and architecture of the Mediterranean World and northern Europe from late antiquity to the late Gothic period (300-1300 A.D.). Focus on new styles and subject matter in painting, sculpture and architecture.

ART HS 2235 Renaissance and Baroque Art: 3 semester hours
Prerequisites: ART HS 1100 or consent of instructor. This course is an introduction to art and architecture in Europe from the fifteenth through the seventeenth centuries.

ART HS 2250 Rococo to Realism: 3 semester hours
Prerequisites: ART HS 1100 or consent of instructor. This course is an introduction to selected European artists and artworks from c. 1720 to 1860.

ART HS 2261 History of Graphic Design: 3 semester hours
This course examines the rapport of word, image, artist, client, and viewer that is unique to the genres of book arts and graphic design as studied in their historical and contemporary contexts.
ART HS 2265 History of Photography: 3 semester hours  
Prerequisite: ART HS 1100 or consent of instructor. A study of photography: its historical development, an examination of it as an art medium, and its influence on the development of modern art.

ART HS 2270 Art of the United States: 3 semester hours  
Prerequisites: ART HS 1100 or consent of instructor. This course is an overview of art and architecture in the United States from the colonial era through the twentieth century.

ART HS 2275 History of Illustration: 3 semester hours  
Prerequisites: ART HS 1100 or consent of instructor. This course will analyze the world of artists who specialized in illustration for prints, books, newspapers, magazines, and advertisements, emphasizing the 19th and 20th centuries in the United States. The course will cover topics such as idealizations of the American West and changing roles of women in society, as well as iconic characters and images that continue to inspire artists today.

ART HS 2280 Modern to Contemporary Art: 3 semester hours  
Prerequisite: ART HS 1100 or consent of instructor. This course presents an overview of avant-garde modern art in Europe and the United States from the mid-nineteenth century to the contemporary era. It explores traditional media such as painting and sculpture as well as newer forms such as performance and installation art in the context of changing ideas about art's traditions, social functions, and philosophical concerns.

ART HS 2291 Issues and Ideas in the History of Art and Visual Culture: 3 semester hours  
Prerequisites: ART HS 1100 or permission of instructor. This course is an intensive study of a few selected works from various eras and cultures, with special attention to the particular social and cultural factors surrounding their creation. This course may be repeated for credit with the permission of an advisor as long as the topic different.

ART HS 3350 Studies in Design: 3 semester hours  
Prerequisites: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. The course examines selected topics in the history of design, and may include genres such as architecture, material culture, or graphic design. May be repeated for credit with a different topic, for a maximum of 6 credit hours.

ART HS 3387 Professional Internship: 1-6 semester hours  
Prerequisites: Minimum of two 2000-level courses in art history and ENGL 3100 and consent of instructor. The internship provides experience in museums, historical societies, galleries, design firms, or visual resource collections. Students will assist in the diverse duties associated with the day-to-day functions of the institution, under the joint direction of a faculty advisor and a supervisor at the institution. Course requirements may include readings, research assignments, and/or a paper. This course may be counted for art history or studio art credit with the department's consent.

ART HS 3389 Visual Resources Management: 1-3 semester hours  
Prerequisites: Minimum of two 2000-level courses in Art History, ENGL 3100, and consent of instructor. A hands-on course in the Department of Art and Art History's media center that will cover collection development and management as well as technical and theoretical issues in the visual resources profession.

ART HS 3390 Special Study: 1-4 semester hours  
Prerequisite: Junior or senior standing. Consent of instructor and Art History advisor. Independent study through readings, reports or field research. May be repeated one time with consent of Art History advisor. May not be used for internship credit.

ART HS 3395 Selected Themes in the History of Art and Visual Culture: 3 semester hours  
Prerequisites: Two 2000-level ART HS courses or consent of instructor. This course is a study of a selected topic in visual culture. It may be repeated for credit with a different topic.

ART HS 4400 Topics in the History of Art and Visual Culture: 3 semester hours  
Prerequisites: One 3000-level ART HS course or consent of instructor. This course is the study of a selected topic in the history of art and visual culture. It may be repeated for credit with a different topic.

ART HS 4455 Topics in Modern Art: 3 semester hours  
Prerequisites: ART HS 2280 and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. Intensive study of selected topics in art of the nineteenth and/or twentieth centuries. May be repeated for credit with permission of instructor and advisor.

ART HS 4490 Special Study: 1-4 semester hours  
Prerequisite: Junior or senior standing, consent of instructor and Art History advisor. Independent study through readings, reports, or field research. May be repeated one time with consent of Art History advisor. May not be used for internship credit.

ART HS 4495 Senior Seminar: Methods of Art History: 3 semester hours  
Prerequisite: ART HS 3395, ENGL 3100 and senior standing in Art History or consent of instructor. An advanced class in the methods of art historical analysis. Theoretical perspectives will include connoisseurship, style, iconography, social history, and others.

ART HS 5590 Special Study in Art History: 1-6 semester hours  
Prerequisites: Graduate standing and consent of instructor. Independent study through readings, reports, discussions, and/or special projects. May be repeated for credit with consent of instructor.

ART HS 5592 The History of The Visual Arts in American Museums: 3 semester hours  
Same as ANTHRO 5592 and HIST 5592. Prerequisites: Graduate standing and consent of instructor. This course is an introduction to selected topics in the history of museology, focusing on art and anthropology museums as sites for the interpretations of art and culture, and as contested meeting grounds for various views of history and culture.

ART HS 5593 Museum Management and Curatorial Practice: 3 semester hours  
Prerequisites: Consent of the instructor and graduate standing. Museum Management and Curatorial Practice is designed to give students overlapping theoretical and practical experience that will be useful after entry into the museum profession. While exhibitions are at the core of the museum mission, it takes a broad range of skills from different team members to bring shows to fruition. The course provides students with grounded knowledge on how to curate an exhibition for their museum and understand all the elements that serve the mission-driven goals for that institution, and the obligation to uphold best practices as established by the American Alliance of Museums [AAM] and the Association of Art Museum Directors [AAMD] that provide guidance for the field. Students will become familiar with the different types of roles and functions that make museums run (although staffing levels will vary based on the size and budget of the organization), including: executive management, advancement, marketing, curatorial, collections management, education, and others (e.g., archivist, librarian, security, maintenance, groundskeeping, restaurant staff, parking).
ART HS 6038 Museum Studies Master's Project: 5 semester hours
Same as ANTHRO 6138 and HIST 6138. Prerequisites: Consent of Director of Museum Studies Program. Research and writing/exhibit development on a selected topic.

Astronomy

Courses

ASTRON 1001 Cosmic Evolution Introductory Astronomy (MOTR ASTR 100): 3 semester hours
This course presents an overview of astronomy from the planets to the Big Bang. Topics include the celestial motions, planets and the formation of the solar system, stars and stellar evolution, galaxies, and cosmology. Students will be introduced to the latest discoveries and how they affect our understanding of the universe.

ASTRON 1001A Cosmic Evolution/Introduction Astronomy (MOTR ASTR 100): 3 semester hours
Overview of astronomy, from the planets to the Big Bang. Topics include the celestial motions, planets and the formation of the solar system, stars and stellar evolution, galaxies, and cosmology. Students will be introduced to the latest discoveries and how they affect our understanding of the universe. Three classroom hours per week. Same as ASTRON 1001 without the laboratory.

ASTRON 1001L Introductory Astronomy Laboratory: 1 semester hour
Prerequisite: ASTRON 1001 (may be taken concurrently). An introductory Astronomy laboratory to accompany ASTRON 1001. The format is a 2-hour laboratory session per week to enhance lecture material.

ASTRON 1011 Planets and Life in the Universe: 3 semester hours
Man's concept of the solar system from Stonehenge to Einstein; geology and meteorology of the planets of our solar system, with particular attention to results from the space program; exobiology--study of the possibilities of life on other worlds and the best method of communicating with it. Three lecture hours per week.

ASTRON 1012 The Violent Universe and the New Astronomy: 3 semester hours
A nontechnical course focusing on recent results which larger telescopes and the space program have made available. Pulsars, x-ray stars, and black holes; radio astronomy, our galaxy, and interstellar molecules; exploding galaxies and quasars; origin of the expanding universe. Three lecture hours and one observing session per week.

ASTRON 1050 Introduction to Astronomy I (MOTR ASTR 100): 3 semester hours
Prerequisites: MATH 1030 and MATH 1035. A survey of the history of astronomy from the ancient times to present. Theories for the formation and evolution of the solar system and the general features of the solar system and planetary motions are discussed. The physical concept of gravity is presented. The detailed properties of the planets, comets, and asteroids are reviewed, concentrating on recent results from space missions.

ASTRON 1051 Introduction to Astronomy II: 3 semester hours
Prerequisites: MATH 1030 and MATH 1035. A survey of astronomy beyond the solar system. Topics include stars and stellar evolution, neutron stars, and black holes. The physical concept of light and the design of telescopes is discussed in detail. The structure of the Milky Way Galaxy and the large scale structure of the universe are explored. Dark matter, quasars, and active galactic nuclei are discussed in the context of theories for the formation and evolution of the universe. Course does not need to be taken in sequence with ASTRON 1050.

ASTRON 4301 Astrophysics: 3 semester hours
Prerequisite: PHYSICS 3231 or consent of instructor. A moderately technical introduction to astrophysics. Topics will include: physics of stellar interiors and atmospheres; interpretation of stellar spectra; stellar evolution; radio astronomy; and cosmology.

ASTRON 4322 Observational Astronomy: 4 semester hours
Prerequisite: ASTRON 1050, ASTRON 1051 and PHYSICS 3231; tools of the astronomer: telescopes, spectroscopy, photoelectric photometry. Students will work on a number of projects which will enable them to develop expertise in obtaining, reducing, and analyzing astronomical observations. Student night observing will be an important part of the course. This course is primarily for students who are astronomy or physics majors or who have some equivalent background.

ASTRON 5322 Intermediate Observational Astronomy: 4 semester hours
Prerequisites: ASTRON 1050, ASTRON 1051, and PHYSICS 3231; or graduate standing. This course covers the tools of the astronomer: telescopes, spectroscopy, photoelectric photometry. Students will work on a number of intermediate projects, which will enable them to develop expertise in obtaining, reducing, and analyzing astronomical observations. Student night observing will be an important part of this course. This course is primarily for astronomy or physics majors. Students may not receive credit for both ASTRON 4322 and ASTRON 5322.

Atmospheric Science

Courses

ATM SCI 1001 Elementary Meteorology: 3 semester hours
Prerequisites: MATH 1020 or equivalent. This course covers atmospheric phenomena, weather, and climate. Topics include temperature, pressure, and moisture distributions in the atmosphere and dynamical effects such as radiation, stability, storms, and general circulation.

ATM SCI 1001L Elementary Meteorology Laboratory: 1 semester hour
Prerequisite: Must be concurrently enrolled in ATM SCI 1001. An introductory meteorology laboratory to accompany ATM SCI 1001. The lab exercises consist of current weather studies to enhance the material in ATM SCI 1001.

ATM SCI 1002 Earth Climate Studies: 3 semester hours
Prerequisite: MATH 1020 or equivalent. This course covers the physical foundations of the Earth's climate system, scientific evidence for climate change and its causes, and the effects of climate change on the ecosystem of the Earth. This course satisfies the information literacy general education requirement.

Biology

Courses

BIOL 1010 Introduction to Student Research: 1-3 semester hours
Prerequisites: Minimum of four semesters of high school science and math courses and consent of the instructor. This course provides high school students an opportunity to develop individual research projects under faculty mentorship. It includes interdisciplinary lectures, demonstrations, seminars, and project guidance. Evaluation will be based on written and oral presentation of the research project and student portfolio.
BIOL 1012 General Biology (MOTR BIOL 100): 3 semester hours
Emphasis on fundamental principles of biology. BIOL 1012 can be applied toward fulfillment of the general education requirement in science. BIOL 1012 does not satisfy the prerequisite requirements in other courses in biology at the 2000 level or above. Students who plan to pursue a career in medicine or one of the medical-oriented professions should enroll in BIOL 1831 rather than BIOL 1012.

BIOL 1013 General Biology Laboratory: 1 semester hour
Prerequisite: BIOL 1012 (may be taken concurrently). This Laboratory course accompanies BIOL 1012. BIOL 1013 can be used to fulfill the general education requirements in a laboratory science. BIOL 1013 does not meet the prerequisite requirements for other courses in biology. Two and one-half hours of laboratory per week.

BIOL 1102 Human Biology (MOTR LIFS 150): 3 semester hours
Lectures and readings concerned with the reproduction, development, genetics, functional anatomy, behavior, ecology, and evolution of the human species. Three hours lecture per week. Fulfills Science/Math requirement.

BIOL 1110 Nutrition in Health: 3 semester hours
This course studies dietary nutrients essential for health, proper selection of foods to provide them and current issues affecting them.

BIOL 1131 Human Physiology and Anatomy I: 4 semester hours
Prerequisites: BIOL 1012 or equivalent or consent of instructor. This course covers the basic aspects of the structure of the healthy human body and how it functions. Special emphasis is on how the human body adapts itself to its environment and how changes affect physiological activities. Three hours lecture and two hours laboratory per week.

BIOL 1141 Human Physiology and Anatomy II: 4 semester hours
Prerequisite: BIOL 1131. A continuation of BIOL 1131. A study of the basic aspects of human physiology and anatomy. Three hours lecture and two hours laboratory per week.

BIOL 1162 General Microbiology: 3 semester hours
Prerequisite: BIOL 1012 or its equivalent. A survey of microbiology structure, genetics, and physiology. Special emphasis will be placed on the transmission and control of such organisms as it relates to the maintenance of human health. Three hours of lecture per week.

BIOL 1202 Environmental Biology: 3 semester hours
An examination of the biological basis of current environmental problems, with emphasis upon resources, energy, pollution and conservation. Three hours lecture per week. Fulfills Science/Math requirement.

BIOL 1212 Applied Environmental Sciences: 4 semester hours
In a combined lecture/laboratory setting, students will get hands-on experience collecting and testing environmental samples for abiotic factors such as contaminants, and experimentally assessing the impact of those contaminants on the biological communities contained within the samples. Important approaches include global positioning and information technologies, microscopy, microbiological techniques, genomics, and quantitative analytical measures for assessing the physical, biological and chemical properties of collected samples.

BIOL 1800 Introduction to the Biology Major: 1 semester hour
Prerequisites: Biology major or consent of the instructor. This course is an orientation to the field of biology for majors and for students who are considering declaring the major. This course introduces students to concepts, skills, and practices that are essential for success as a Biology major and must be completed by all freshman and transfer Biology majors during their first semester of study at UMSL.

BIOL 1821 Introductory Biology: Organisms and the Environment (MOTR BIOL 150L): 5 semester hours
Prerequisites: A minimum of high school chemistry, ENGL 1100 or equivalent (may be taken concurrently), and placement into college algebra or higher. Required for students intending to major in biology or take specified biology courses at the 2000 level or above. This course presents an introduction to some of the principles of biology and scientific methodology applied to the organism and supraorganism levels of biology. Topics to be covered include: ecology, evolution, diversity, and population biology. Three hours of lecture and one hour of discussion per week.

BIOL 1831 Introductory Biology: From Molecules to Organisms (MOTR BIOL 150L): 5 semester hours
Prerequisites: A minimum of high school chemistry and MATH 1030; ENGL 1100 or equivalent (may be taken concurrently). Required for students intending to major in biology or take specified biology courses at the 2000 level or above. This course presents and introduction to some of the principles of biology and scientific methodology applied to the molecular/ cellular through organ system levels of organization. Topics include: cell structure, metabolism, reproduction, heredity and major physiological processes regulated by organ systems. Three hours of lecture, three and one half hours of lab, and one hour of discussion per week.

BIOL 1920 Introductory Topics in Biology: 1-5 semester hours
Prerequisites: Consent of Instructor. The topics will vary each semester. See online course schedule for topics. Credit arranged. May be taken more than once for credit if topics are different. The applicability toward a Biology degree is dependent on the topic.

BIOL 1999 Evolution for Everyone: 3 semester hours
Evolution for Everyone explores the development of our current understanding by examining modern and ancient controversies, and by studying major processes by which change occurs. Lectures will present overviews and many examples on topics in history, mechanisms, and outcome of evolutionary change, and students will participate in classroom and online discussions based on readings, computer exercises, and data collection and analysis. Course may not be applied towards major in Biology. Not eligible for credit with BIOL 3302 (Introduction to Evolution) required for Biology majors.

BIOL 2010 Introduction to Inquiry Approaches to STEM Education (STEP I): 1 semester hour
Same as CHEM 2010, PHYSICS 2010, MATH 2010, and SEC ED 2010. Prerequisites: Concurrent enrollment BIOL 1831, BIOL 1821, CHEM 1111, CHEM 1121, PHYSICS 2111, PHYSICS 2112, MATH 1800, or MATH 1900 or have a declared STEM major. Students who want to explore teaching careers become familiar with lesson plan development by writing, teaching and observing lessons in a local school class. Students build and practice inquiry-based lesson design skills and become familiar with and practice classroom management in the school setting. As a result of the STEP I experiences students should be able to decide whether to continue to explore teaching as a career and ultimately finishing the remainder of the WE TEACH MO curriculum leading to teacher certification. The classroom observations and teaching represent a major field component and requires at least one two hour block of free time during the school day once a week.

BIOL 2011 Designing Inquiry-Based STEM Experiences (STEP II): 1 semester hour
BIOL 2012 Genetics: 3 semester hours
Prerequisites: BIOL 1831 (majors must also take BIOL 1821), MATH 1030, and CHEM 1111 or (CHEM 1081 plus CHEM 1091). Fundamental principles of inheritance, including classical genetic theory as well as recent advances in the molecular basis of heredity. Three hours of lecture per week. Fullfill Science/Math requirement.

BIOL 2013 Genetics Laboratory: 2 semester hours
Prerequisites: Concurrent registration in BIOL 2012, or consent of instructor. Laboratory to accompany BIOL 2012. Three and one-half hours of organized laboratory time per week. Students may need to return to the laboratory at unscheduled times to complete some exercises.

BIOL 2102 Ecology: 3 semester hours
Prerequisites: BIOL 1821 and BIOL 1831. This course examines the relationships between living organisms and their environment.

BIOL 2103 Ecology Laboratory: 2 semester hours
Prerequisites: BIOL 2102 may be taken concurrently); a general statistics course is strongly recommended. This laboratory course analyzes environmental factors influencing the abundance and distribution of living organisms. Some classes will be held at field sites in and around St. Louis.

BIOL 2402 Vertebrate Anatomy: 3 semester hours
Prerequisites: BIOL 1821 and BIOL 1831. Development, structure, function, interrelationships, and zoogeography of vertebrate animals with particular attention to phyllogenetic aspects. Three hours of lecture per week. Fullfills Science/Math requirement.

BIOL 2403 Vertebrate Anatomy Laboratory: 2 semester hours
Prerequisites: BIOL 2402 (may be taken concurrently). Laboratory to accompany BIOL 2402. Morphological analysis and systematic survey of major vertebrate groups. Overview of the vertebrate life forms and their adaptations to habitats and resources. Three and one-half hours of laboratory per week.

BIOL 2482 Microbiology: 3 semester hours
Prerequisites: BIOL 1831 (majors must also take BIOL 1821), MATH 1030, and CHEM 1111. Study of microorganisms, their metabolism, genetics, and their interaction with other forms of life. Three hours of lecture per week.

BIOL 2483 Microbiology Laboratory: 2 semester hours
Prerequisites: BIOL 2482 (may be taken concurrently). Experimental studies and procedures of microbiological techniques. Three and one-half hours of organized laboratory time per week. Students will need to return to the laboratory at unscheduled times to complete some exercises.

BIOL 2501 Biology of Plants: 5 semester hours
Prerequisites: BIOL 1821 and BIOL 1831. A general discussion of the plant groups from algae through angiosperms. Plant morphology, physiology, reproduction and ecology will be discussed in lecture (three hours per week). The laboratory (three and one half hours per week) involves examination of representatives of the plant kingdom and experimentation in plant physiology and genetics. Fullfills both a lecture and laboratory requirement.

BIOL 2820 Contemporary Topics in Biology: 1-5 semester hours
Prerequisites: Consent of instructor. The topics will vary each semester. See course schedule online for topics. Credit arranged. May be taken more than once for credit if topics are different.

BIOL 3001 Experiential Practicum in Biosciences: 1 semester hour
Prerequisites: Consent of Biology Curriculum Committee. Credit for off-campus bioscience projects providing extraordinary student experience and service to a community in need.

BIOL 3102 Animal Behavior: 3 semester hours
Prerequisites: BIOL 1821 and BIOL 1831. The study of invertebrate and vertebrate behavior, including neurophysiological, hormonal, developmental, genetic, ecological and evolutionary aspects of behavior; behavior interactions within and between populations. Three hours of lecture per week.

BIOL 3103 Animal Behavior Laboratory: 2 semester hours
Prerequisites: BIOL 3102 (may be taken concurrently). Observational and experimental studies of animal behavior in the field and laboratory. Three and one-half hours of formal laboratory time per week, but additional time may be required for independent projects. Some activities involve field trips or trips to the St. Louis Zoo.

BIOL 3202 Conservation Biology: 3 semester hours
Prerequisites: BIOL 1821 and BIOL 1831. Introduction to the principles and theories of conservation biology. Course topics include biodiversity, extinctions, population modeling, habitat fragmentation, conservation area management, restoration ecology, and social science elements of conservation strategies. Class sessions will include lectures, discussions, and simulation exercises. Three hours of lecture per week.

BIOL 3203 Conservation Biology Laboratory: 2 semester hours
Prerequisites: BIOL 3202 (recommended to be taken concurrently). Laboratory to accompany BIOL 3202. Laboratory will include computer simulations of conservation problems using existing software. 2-3 field trips to local conservation projects, and field interviews with governmental and nongovernmental agencies. Three and one-half hours of laboratory per week.

BIOL 3302 Evolution: 3 semester hours
Prerequisites: BIOL 1821, BIOL 1831, BIOL 2012, and MATH 1030. This course covers the theory, events, and processes of organic evolution.

BIOL 3622 Cell Biology: 3 semester hours
Prerequisites: BIOL 1831, BIOL 2012, CHEM 1121, and MATH 1030. This course examines the organization and basic processes of cells including tissues, organelles, glycolysis, respiration, photosynthesis, trafficking, cytoskeleton, signal transduction, and cell division.

BIOL 3631 Histology and Microtechniques: 5 semester hours
Prerequisites: BIOL 1831 (majors must also take BIOL 1821), BIOL 3622 recommended. The basic principles of histology. A survey of basic tissues and organ systems. Techniques associated with preparation of animal tissues for light microscopic studies. Three hours of lecture and 3 1/2 hours of laboratory per week. (Additional lab hours arranged). Fullfills both a lecture and a laboratory requirement.

BIOL 3699 Undergraduate Internship in Biotechnology: 1-4 semester hours
Prerequisites: BIOL 1821, BIOL 1831, and CHEM 1111 and CHEM 1121 and consent of instructor. Concurrent enrollment in CHEM 2612 or higher is strongly encouraged. A 2.5 GPA and enrollment in the undergraduate Biotechnology Certificate Program is required. Internship will consist of a period of observation, experimentation and on-the-job training in a biotechnology laboratory. The laboratory may be industrial or academic. Credit will be determined by the number of hours a student works each week and in consultation between the intern's supervisor and instructor. Internship assignments will be commensurate with the education and experience of the student. Two credits may be used to fulfill the lab requirement.
**BIOL 3802 Vertebrate Physiology: 3 semester hours**
Prerequisites: BIOL 1821 and BIOL 1831 and CHEM 1111 or CHEM 1081 plus CHEM 1091. Basic functional aspects of organ systems in relation to the physiochemical properties of protoplasm. Three hours lecture per week. Fulfills Science/Math requirement.

**BIOL 3803 Vertebrate Physiology Lab: 2 semester hours**
Prerequisite: BIOL 3802 (may be taken concurrently). Instrumental and experimental studies in physiology. Three and one-half hours laboratory per week.

**BIOL 3920 Special Topics in Biology: 1-5 semester hours**
Prerequisites: Consent of instructor. The topics will vary each semester. See course schedule online for topics. Credit arranged. May be taken more than once for credit if topics are different.

**BIOL 4102 Behavioral Ecology: 3 semester hours**
Prerequisite: BIOL 3102 (BIOL 3302 recommended). The evolution and ecology of animal behavior. Topics include the theoretical framework for making predictions, foraging, decision making, sensory ecology, sexual selection, mating systems, sociality and groups, cooperation, signal use and communication. Three hours of lecture per week. Students may not receive credit for both BIOL 4102 and BIOL 6102.

**BIOL 4122 Biometry: 3 semester hours**
Prerequisites: MATH 1030 and a minimum of 15 hours in biology. Reviews descriptive, analytical, and experimental methods useful for the statistical study of biological phenomena. Students will develop the skills needed to better appreciate and evaluate the published literature, as well as the ability to design their own research programs. Topics include: the collection and summarization of biological observations; development, design, and testing of hypothesis; analysis and presentation of data. Three hours of lecture per week. Fulfills the statistics requirement for the B.A. or B.S. degree in biology.

**BIOL 4182 Population Biology: 3 semester hours**
Prerequisite: BIOL 2102 and BIOL 2102 (BIOL 3302 recommended). Introduces concepts and mathematical models of population ecology and population genetics. By integrating the ecology and genetics of populations, the course goal is to understand the processes that contribute to microevolution of populations. Topics include: demography, metapopulation biology, natural selection, migration, gene flow, and genetic drift. Three hours of lecture per week. Students may not receive credit for both BIOL 4182 and BIOL 6182.

**BIOL 4192 Applications of Geographic Information Systems: 5 semester hours**
Prerequisites: BIOL 2102, BIOL 4122 or equivalent, and consent of instructor. Geographic Information Systems (GIS) are sophisticated computer-based systems for analysis, capture, presentation, and maintenance of geographically referenced data. This course provides a foundation in using GIS for spatial analysis. Although biological examples are primarily used, examples from a range of disciplines are employed to emphasize the use of GIS as a tool to support analysis and decision-making. Students will have hands-on use of GIS software during each session. An independent research project applying the spatial analysis tools learned in GIS to biological research will be required. Five hours of combined lecture and computer operations, plus 2-3 hours of open lab per week. Fulfills both a lecture and a laboratory requirement. Students may not receive credit for both BIOL 4192 and BIOL 6192.

**BIOL 4222 Tropical Ecology and Conservation: 3 semester hours**
Prerequisite: BIOL 2102, BIOL 4182, BIOL 5192, or equivalent. This course will cover research areas in tropical population, community and ecosystem ecology, with emphasis on inter-species and environment-organism interactions, population control factors, and genetic structure of populations. Topics include the current status and causes of tropical habitat destruction, ongoing attempts to manage those habitats, and development of strategies leading to sustained use of non-renewable resources. Three hours of lecture per week. Students may not receive credit for both BIOL 4222 and BIOL 6222.

**BIOL 4245 Field Biology: 3 semester hours**
Prerequisite: Three biology courses and consent of instructor. Intensive study of the flora and fauna of selected natural areas of North America, including an extended field trip. Details of the field trip and course schedule will be posted in the Biology department preceding registration for the term in which the course will be offered. Students will be required to pay costs of travel and of the field trip. This is a laboratory course appropriate for advanced undergraduates and non-thesis Master of Science students.

**BIOL 4270 Global Climate Change: 3 semester hours**
Prerequisites: BIOL 3302 or consent of instructor. Topics included are fundamental physical, meteorological, and biological circumstances of global climate change, as well as predictions of its future effects on biological diversity, including humans, and how those estimates are made. In addition, basic environmental economics and politics of climate change at local and global levels will be included. The course will be taught as a series of lectures and discussions led by guest experts in each of the subdisciplines covered. Students may not receive credit for both BIOL 4270 and BIOL 6270.

**BIOL 4299 Practicum in Conservation: 2 semester hours**
Prerequisites: BIOL 3202 and consent of instructor. This course is generally restricted to students officially enrolled in the Certificate Program in Conservation Biology. The course provides practical experience with conservation or environmental agencies. Specific placement will be selected according to student’s interests and career goals as well as availability of agency openings. Course requirements include practical experience and final report on practicum experience.

**BIOL 4402 Ornithology: 3 semester hours**
Prerequisites: BIOL 2102 and junior standing. Introduction to avian biology and ecology. Material to be covered will include basic adaptations of anatomy, physiology, and behavior of birds. There will be a strong emphasis on avian ecology and conservation. Specific topics will include flight, reproductive behavior, migration, foraging behavior, community structure, and current conservation concerns. The diversity of birds will be emphasized through comparisons between temperate and tropical regions. Three hours of lecture per week.

**BIOL 4403 Ornithology Laboratory: 2 semester hours**
Prerequisites: BIOL 4402 (may be taken concurrently), or consent of instructor. This course will introduce students to methods of identifying and studying birds. Labs will almost entirely be comprised of field trips to local areas and will emphasize diversity of birds, adaptations shown by different groups, and means of identification, particularly of birds found in Missouri. Field projects will focus on techniques for censusing birds, sampling foraging behavior, and studying habitat selection. Indoor periods will cover internal and external anatomy of birds. Slides and field trips to the St Louis Zoo will be used to survey the diversity of birds worldwide. Three and one-half hours of laboratory per week. Longer (e.g., Saturday) field trips will be made when appropriate.
BIOL 4422 Entomology: 3 semester hours
Prerequisites: BIOL 1821, BIOL 1831, 9 additional hours of biology and upper-division standing. Development, structure, function, behavior and ecology of insects, including a systematic survey of the orders of Insecta. Three hours of lecture per week.

BIOL 4423 Entomology Laboratory: 2 semester hours
Prerequisites: BIOL 4422 (may be taken concurrently). Laboratory to accompany BIOL 4422. Studies of the morphology, physiology, and behavior of insects to give a sampling of biological studies of the class Insecta. Formation of a collection of insects, comprising a systematic survey of orders and principal families, will be an integral part of the course and will require additional time beyond the official lab hours. Three and one-half hours of lab per week.

BIOL 4442 Developmental Biology: 3 semester hours
Prerequisites: BIOL 2012 and BIOL 3622. A study of the basic principles that shape the embryonic and post-embryonic development of animals with an emphasis on the underlying cellular and molecular mechanisms. Specific topics include fertilization, determination of cell fate and differentiation, cell migration, establishment of the body plan, formation of selected organs and organ systems, stem cells, and limb regeneration. Environmental influences on development and the impact of developmental biology on modern medicine are also discussed. Three hours of lecture/discussion per week. Students may not receive credit for both BIOL 4442 and BIOL 6442.

BIOL 4501 Flowering Plant Families: Phylogeny and Diversification: 5 semester hours
Prerequisites: BIOL 1821, BIOL 1831 and junior standing or consent of instructor. Focusing on the flowering plant families of North America, the aim of the course is to give an understanding of their phylogeny and diversification. Student will also gain an understanding of plant morphology and anatomy, a basis for further developing their knowledge of plants. Three hours of lecture and three to four hours of laboratory per week. Students may need to return to the laboratory at unscheduled times.

BIOL 4502 Evolution of Cognition: 3 semester hours
Prerequisites: BIOL 3102 or consent of instructor; BIOL 3302 and PSYCH 2211 are strongly recommended. The evolutionary ecology of animal cognitive abilities. Topics include learning, memory, perception, navigation, and communication from an evolutionary perspective. The focus is on cognitive abilities as adaptations, which have evolved to solve specific environmental problems. Topics include empirical methods for assessing cognitive ability, experimental design, theoretical approaches for generating predictions, and the parsimonious interpretation of data. Two hours of lecture and one hour of discussion per week.

BIOL 4550 Bacterial Pathogenesis: 3 semester hours
Prerequisites: BIOL 2012 and BIOL 2482. Examination of the strategies bacterial pathogens use to infect animals. Topics include host immune responses to infection, bacterial virulence factors, regulation of bacterial virulence, and the cellular and molecular approaches used to study host-parasite interactions. Three hours of lecture per week. Students may not receive credit for both BIOL 4550 and BIOL 6550.

BIOL 4602 Molecular Biology: 3 semester hours
Prerequisites: BIOL 2012 and CHEM 2612. This course is a survey of the principles of molecular biology, with emphasis on understanding the genetic regulation of DNA, RNA, and protein synthesis and function in eukaryotic cells.

BIOL 4608 Synthetic Biology: 3 semester hours
Prerequisites: BIOL 2012, BIOL 2482. A study of the molecular biology of microbial cells, in the context of synthetic biological systems. Topics include DNA replication, transcription, translation, gene regulation and protein structure as well as aspects of genetic engineering as they apply to the construction of novel biological systems. Following an introduction to the design of biological parts used in synthetic biology, students read, discuss and present recent journal articles in order to learn about current advances and applications of synthetic biology. Three hours of lecture per week. Students may not receive credit for BIOL 4608 and BIOL 6608.

BIOL 4614 Biotechnology Laboratory I: 4 semester hours
Prerequisites: BIOL 2012 or consent of instructor. An introduction to the fundamental concepts that underlie the field of biotechnology. Both the basic principles of molecular biology and hands-on experience with the techniques of the field will be addressed through lectures, discussions, and a series of laboratory exercises. Two hours of lecture and four hours of laboratory per week. Fulfills a laboratory requirement only; may not be used to fulfill the higher level (4000-5000) lecture course requirement for the B.A. or B.S. degree in biology. Students may not receive credit for BIOL 4614 and a comparable biotechnology course from another institution.

BIOL 4615 Biotechnology Laboratory II: 4 semester hours
Prerequisites: BIOL 4614 and either BIOL 4602 or BIOL 4612, or consent of instructor. An in-depth look at theory and practice of biotechnology. Lectures and discussion will examine the underlying principles, and laboratory exercises will present hands-on experience with current techniques. One hour of lecture and six hours of laboratory per week. Fulfills a laboratory requirement only; may not be used to fulfill the higher level (4000-5000) lecture course requirement for the B.A. or B.S. degree in biology. Students may not receive credit for BIOL 4615 and BIOL 6615.

BIOL 4622 Cellular Basis of Disease: 3 semester hours
Prerequisites: BIOL 3622. A study of the structural organization and processes of eukaryotic cells, focusing on how defects in cellular function lead to genetic diseases and cancer. Topics of discussion may include membrane dynamics, intracellular trafficking, signal transduction, and the cell cycle. Three hours of lecture per week. Students may not receive credit for both BIOL 4622 and BIOL 6622.

BIOL 4632 Nucleic Acid Structure and Function: 3 semester hours
Prerequisites: BIOL 2012 and BIOL 4712 or equivalent, or consent of instructor. A comprehensive view of the structural properties of DNA and RNA that promote molecular interactions and biological function. Topics will include the physical properties of nucleic acids, the formation and biological importance of higher order structures, RNA enzymatic activities, nucleic acid-protein interactions, and RNA metabolism. Three hours of lecture per week. Students may not receive credit for both BIOL 4632 and BIOL 6632.

BIOL 4642 Plant Molecular Biology and Biotechnology: 3 semester hours
Prerequisites: BIOL 2012, BIOL 3622. This course will introduce molecular biology principles that govern plant growth, development, and responses to stress. This course integrates the experimental approaches of genetics, molecular biology, and biochemistry, with a specific focus on biotechnology techniques and applications. Students may not receive credit for both BIOL 4642 and BIOL 6642.
BIOL 4652 Virology: 3 semester hours
Prerequisite: BIOL 2012 and BIOL 3622. This first half of the course entails a comparative study of the structure, replication, and molecular biology of viruses. The second half of the course focuses on the pathogenesis, control, and evolution of animal viruses. Three hours of lecture per week. Students may not receive credit for both BIOL 4652 and BIOL 6652.

BIOL 4662 Human Pathology: 3 semester hours
Prerequisites: BIOL 3622 or consent of the instructor. A study of disease processes as they affect the human body. The course will examine both the proximate causes and underlying mechanisms of disease. Specific conditions will be used to illustrate application of clinical approaches in determining the origin, development, and effects of a disease.

BIOL 4712 Biochemistry: 3 semester hours
Same as: CHEM 4712. Prerequisites: CHEM 2612 and either BIOL 1831 or CHEM 2622. Examines the chemistry and function of cell constituents, and the interaction and conversions of intracellular substances. Students may not receive credit for both BIOL 4712 and CHEM 4712.

BIOL 4713 Techniques in Biochemistry: 2 semester hours
Prerequisites: BIOL 4712 or CHEM 4712 (may be taken concurrently). Laboratory activities introducing fundamental qualitative and quantitative biochemical techniques. Student evaluation will be based on laboratory participation, student laboratory reports, and written examinations. Three and one-half hours of organized laboratory time per week. Students may need to return to the laboratory at unscheduled times to complete some experiments.

BIOL 4797 Biochemistry and Biotechnology Seminar: 1 semester hour
Same as CHEM 4797. Prerequisites: Senior standing in the Biochemistry and Biotechnology program and consent of faculty advisor. This course will focus on selected publications related to biochemistry and biotechnology from both refereed journals and news sources. Students are expected to participate in discussions and to prepare oral and written presentations. Completion of the Major Field Achievement Test in Biochemistry & Biotechnology is a course requirement. May not be taken for graduate credit.

BIOL 4822 Introduction to Neuroscience: 3 semester hours
Prerequisite: BIOL 3802 or consent of instructor. The study of nervous systems, featuring the cellular bases of initiation and conduction of the impulse, synaptic transmission, and the network integrative function of invertebrate and vertebrate nervous systems. This course emphasizes the multidisciplinary nature of the neurosciences, including anatomical, physiological and molecular approaches to understanding neural function. Three hours of lecture per week.

BIOL 4842 Immunobiology: 3 semester hours
Prerequisite: BIOL 3622 and CHEM 2612. The fundamental principles and concepts of immunology and immunochemistry. Emphasis on the relation of immunological phenomena to biological phenomena and biological problems. Three hours lecture per week.

BIOL 4889 Senior Seminar: 2 semester hours
Prerequisites: BIOL 1821, BIOL 1831, BIOL 2012, and BIOL 3302, with a total of at least 30 credits in Biology and the consent of your assigned Biology Advisor. Oral and written presentation by students of selected scientific papers or articles. Students are expected to participate in discussions of oral presentations by other students. May not be taken for graduate credit.

BIOL 4905 Research: 1-3 semester hours
Prerequisites: Consent of faculty research advisor. Research in an area selected by the student in consultation with and under the direct supervision of an UMSL biology faculty research adviser. Research opportunities are subject to availability and must be approved in advance of beginning research. The project may include the reading of pertinent literature, laboratory or field experience, including keeping of a logbook, and a summary paper and a presentation, all based on an average 8 hours per week per credit during a 15 week semester at the discretion of the instructor. Credit arranged. Course may be repeated for a total of up to 5 credit hours. A maximum of one lab requirement may be satisfied using any two BIOL 4905 credits. Additional credits may be applied toward the total biology hours required for the biology BA or BS. May not be taken for graduate credit.

BIOL 4915 Biology Internship: 1-3 semester hours
Prerequisites: Consent of faculty research advisor; generally restricted to junior and senior standing. Research in an area selected by the student to be conducted off-campus in a lab of a professional researcher or faculty person (the internship mentor) other than those in UMSL Biology. Research opportunities are subject to availability and must be approved in advance of beginning research by an UMSL biology faculty liaison and the internship mentor. The project normally includes the reading of pertinent literature, laboratory or field experience, including keeping of a logbook, and a summary paper and a presentation, all based on an average 8 hours per week per credit during a 15 week semester. Credit arranged. This course and BIOL 4905 may be repeated in any combination for a total of up to 5 credit hours. A maximum of one lab requirement may be satisfied using any two BIOL 4905 and/or BIOL 4915 credits. Additional credits may be applied toward the total biology hours required for the biology BA or BS.

BIOL 4920 Selected Topics in Biology: 3 semester hours
Prerequisites: Junior standing and consent of instructor. The topic for this course will vary each semester. Topics offered for the following semester will be posted in the departmental office. This course may be repeated once if the topic is different.

BIOL 5012 Advanced Genetics: 3 semester hours
Prerequisites: BIOL 2012 or consent of instructor. This course explores advanced topics in the study of genetics, including advanced principles of inheritance, classical genetic theory, advances in understanding the nature of genetic material, and the molecular basis of heredity. Variation between individuals and populations will be considered to emphasize the effects of genetics on both medical and evolutionary questions. A particular focus will be placed on identifying, analyzing, and communicating findings from recent primary literature.

BIOL 5059 Topics in Ecology, Evolution, and Systematics: 1 semester hour
Prerequisites: Graduate Standing. Presentation and discussion of faculty and student current research projects in behavior, ecology, evolution, and systematics. May be repeated.

BIOL 5069 Topics in Cellular and Molecular Biology: 1 semester hour
Prerequisite: Graduate standing or consent of instructor. Presentation and discussion of student and faculty research projects and/or current research articles in molecular, cellular and developmental biology. May be repeated. Course graded on a satisfactory/unsatisfactory basis.
BIOL 5079 Topics in Floristic Taxonomy: 1 semester hour
Prerequisite: BIOL 2501 or equivalent, and graduate standing. Seminar course in systematics of higher plants, arranged in the Cronquist sequence of families, covering morphology, anatomy, palynology, biogeography, chemosystematics, cytology, and other aspects of plant classification and phylogenetics. Given at the Missouri Botanical Garden. One hour per week.

BIOL 5089 Topics in Animal Behavior: 1 semester hour
Prerequisites: Graduate standing. Presentation and discussion of current research articles and/or student and faculty research projects in animal behavior, including ecology, evolution, genetics, and mechanisms of behavior. May be repeated.

BIOL 5099 Biology Colloquium: 1 semester hour
Prerequisites: Graduate standing. Attendance is required for the Biology weekly seminar series, consisting of research presentations by department faculty and invited speakers. Class sessions will include discussion of scientific research and presentation practices.

BIOL 5123 Advanced Tropical Resource Ecology Field Studies: 2 semester hours
Prerequisites: BIOL 5122 (may be taken concurrently). The field component to the lecture and seminar course. Examines the patterns of use and exploitation of resources in the topics by humans in the context of the theories of behavioral ecology. Two weeks of intensive field research and lectures in Guyana, South America during the second and third weeks of Summer Session I (trip costs to be borne by the student). Students may not receive credit for both BIOL 3123 and BIOL 5123. Offered in odd numbered years.

BIOL 5177 Graduate Research Writing Workshop in Biology: 1 semester hour
Prerequisites: Graduate standing. This hands-on course is designed to give Biology graduate students practical assistance and advice on writing, including grant proposal content and organization, writing succinctly but clearly, and editing. The course format will include both informational lectures with discussions and working sessions focused on writing and critiquing drafts. Students are recommended to begin the class ready to write at least one aim of a grant or thesis proposal. Course is graded on a satisfactory/unsatisfactory basis.

BIOL 5178 Introduction to Graduate Research in Biology: 1 semester hour
Prerequisites: Graduate standing or consent of instructor. A discussion-based class to introduce new PhD and thesis MS students to the Biology department, graduate school, and best research practices.

BIOL 5179 Ethical Issues in Biology: 1 semester hour
Prerequisites: Graduate Standing. Using readings and discussions, students will explore ethical issues in Biology in both professional and social realms. Professional topics include authorship, grants accounting, and academic misconduct; social topics include ethical foundations of basic and applied science, government regulation of science, environmental and individual protection, and current issues. Course graded on a satisfactory/unsatisfactory basis.

BIOL 5192 Community Ecology: 3 semester hours
Prerequisites: Graduate standing and either BIOL 2102 and BIOL 4182 or an equivalent course. Studies of structure and organization of natural communities stressing the abundance and distribution of species, the regulation of species diversity, and the evolution of demographic parameters in populations.

BIOL 5302 Advanced Evolution: 3 semester hours
Prerequisites: BIOL 3302 or graduate standing. Explores advanced topics in the study of adaptation and the origin of species. Covers phenomena both within populations (e.g., natural selection, sexual selection, and molecular evolution) and between populations (e.g., speciation, coevolution, competition, gene flow, biogeography, and comparative phylogenetics), with a particular focus on recent primary literature.

BIOL 5312 Theory of Systematics: 3 semester hours
Prerequisites: BIOL 1821, BIOL 1831 and at least one course beyond the introductory level dealing with animal, plant, or microbial diversity (such as BIOL 2482, BIOL 2501, BIOL 2402, BIOL 4482, BIOL 4501, BIOL 4402, BIOL 4422) or consent of instructor. Course investigates the theory of classification, phylogenetic analysis, systematic biology, and their relation to systematic practice. Will cover goals and schools of systematics, characters and homology, analysis of molecular and morphological data and underlying assumptions, species concepts, classification, nomenclature, and the connections between evolutionary biology and systematics. The course is appropriate for upper level undergraduates & graduate students in all disciplines, animal, plant, and microbial, as an introduction to systematic methods. Three hours of lecture per week.

BIOL 5436 Applied Bioinformatics: 3 semester hours
Prerequisites: BIOL 4712 or BIOL 4602 or consent of instructor. This course provides a survey of the various computational approaches that can be used to solve biological problems. Specific attention will be focused on biological databases and methods for using and interpreting database information, sequence alignments, functional genomics, structure prediction, high-throughput analyses, and proteomics. Three hours of lecture per week.

BIOL 5798 Practicum in Science in Business: 1-2 semester hours
Same As CHEM 5798. Prerequisites: Graduate standing and enrollment in a Professional Science emphasis in Chemistry, Biochemistry & Biotechnology, or Biology. Students will integrate and apply their scientific expertise to a practical, business-related problem. The course will emphasize interdisciplinary teamwork as well as both written and oral communication skills.

BIOL 5799 Internship in Sciences in Business: 1-2 semester hours
Same As CHEM 5799. Prerequisites: Graduate standing and enrollment in a Professional Science emphasis area in Chemistry, Biochemistry & Biotechnology, or Biology. The internship will consist of a period of on-the-job training at a local company. Credit hours will be determined by the number of hours the student works each week and in consultation between the intern's supervisor and the course instructor. Internship assignments will be commensurate with the education and experience of the student, with an emphasis on work at the interface between the scientific and business components of the company. A written report describing the internship project is required.

BIOL 6102 Advanced Topics in Behavioral Ecology: 3 semester hours
Prerequisite: BIOL 3102 (BIOL 3302 is recommended). The evolution and ecology of animal behavior. Topics include the theoretical framework for making predictions, foraging, decision making, sensory ecology, sexual selection, mating systems, sociality and groups, cooperation, and signal use and communication. Three hours of lecture per week. Assignments will include a heavy emphasis on theory and modelling approaches to behavioral ecology. Students may not receive credit for both BIOL 4102 and BIOL 6102.
**BIOL 6182 Advanced Population Biology: 3 semester hours**  
Prerequisites: BIOL 2012 (BIOL 3302 recommended). Introduces concepts and mathematical models of population ecology and population genetics. By integrating the ecology and genetics of population, the course goal is to understand the processes that contribute to microevolution of populations. Topics include: demography, metapopulation biology, natural selection, migration, gene flow, and genetic drift. A discussion section will focus on mathematical elements of population biology models. Three hours of discussion per week. Students may not receive credit for both BIOL 4182 and BIOL 6182.

**BIOL 6192 Applications of Geographic Information Systems: 5 semester hours**  
Prerequisites: BIOL 2102, BIOL 4122 or equivalent, and consent of instructor. Geographic Information Systems (GIS) are sophisticated computer-based systems for analysis, capture, presentation, and maintenance of geographically referenced data. This course provides a foundation in using GIS for spatial analysis. Although biological examples are primarily used, examples from a range of disciplines are employed to emphasize the use of GIS as a tool to support analysis and decision-making. Students will have hands-on use of GIS software using Windows 2000/NT based workstations during each session. An independent research project applying the spatial analysis tools learned in GIS to biological research will be required. Five hours of combined lecture and computer operations, plus 2-3 hours of open lab per week.

**BIOL 6222 Advanced Tropical Ecology and Conservation: 3 semester hours**  
Prerequisites: BIOL 2102, BIOL 4182, or BIOL 5192, or their equivalent. This course will cover research areas in tropical population, community and ecosystem ecology, with emphasis on inter-species and environment-organism interactions, population control factors, and genetic structure of populations. Topics include the current status and causes of tropical habitat destruction, ongoing attempts to manage those habitats, and development of strategies leading to sustained use of non-renewable resources. A research proposal designed to investigate a current topic in tropical ecology will be required. Students may not receive credit for BIOL 4222 and BIOL 6222. Three hours of lecture per week.

**BIOL 6250 Public Policy of Conservation and Sustainable Development: 3 semester hours**  
Same as POL SCI 6452. Prerequisite: Graduate standing in Biology or Political Science and consent of instructor. Prior course in ecology recommended. This course will introduce the student to concepts and techniques for formulating, implementing, and analyzing public policy with an emphasis on environmental concerns, conservation, and sustainable development. The course will be team taught by a political scientist and a biologist. Course materials will include case studies that demonstrate the special problems of environmental policymaking in developing and developed economies.

**BIOL 6270 Advanced Global Climate Change: 3 semester hours**  
Prerequisites: Graduate Standing or permission of the instructor. We will cover the fundamental physical, meteorological, and biological circumstances of global climate change, as well as predictions of its future effects on biological diversity, including humans, and how those estimates are made. We will also cover basic environmental economics and politics of climate change at local and global levels. The course will be taught as a series of lectures and discussions led by guest experts in each of the subdisciplines covered. Students may not receive credit for both BIOL 4270 and BIOL 6270.

**BIOL 6299 Internship in Conservation Biology: 1-4 semester hours**  
Prerequisite: BIOL 6250 or BIOL 6212 and consent of the director of graduate studies in biology. Internships will consist of a period of study, observation and on-the-job training at a conservation or environmental agency. Specific placements will be selected according to student's interests and career goals. Internships may vary from 2 weeks to 4 months in duration.

**BIOL 6442 Advanced Developmental Biology: 3 semester hours**  
Prerequisites: BIOL 2102 and BIOL 3622. A study of the basic principles that shape the embryonic and post-embryonic development of animals with an emphasis on the underlying cellular and molecular mechanisms. Specific topics include fertilization, determination of cell fate and differentiation, cell migration, establishment of the body plan, formation of selected organs and organ systems, stem cells, and limb regeneration. Environmental influences on development and the impact of developmental biology on modern medicine are also discussed. Three hours of lecture/discussion per week. Students may not receive credit for both BIOL 4442 and BIOL 6442.

**BIOL 6502 Advanced Evolution of Cognition: 3 semester hours**  
Prerequisites: BIOL 3102 and BIOL 3302, or consent of instructor; PSYCH 2211 strongly recommended. The evolutionary ecology of animal cognitive abilities. Topics include learning, memory, perception, navigation, and communication from an evolutionary perspective. The focus is on cognitive abilities as adaptations, which have evolved to solve specific environmental problems. Topics include empirical methods for assessing cognitive ability, experimental design, theoretical approaches for generating predictions, and the parsimonious interpretation of data. Two hours of lecture and one hour of discussion per week. Students may not receive credit for both BIOL 4502 and BIOL 6502.

**BIOL 6550 Advanced Bacterial Pathogenesis: 3 semester hours**  
Prerequisites: BIOL 2012 and BIOL 2482. Examination of the strategies bacterial pathogens use to infect animals. Topics include host immune responses to infection, bacterial virulence factors, regulation of bacterial virulence, and the cellular and molecular approaches used to study host-parasite interactions. Students may not receive credit for both BIOL 6550 and BIOL 4550. Students will be required to give an oral presentation and/or write an extra paper on a topic relevant to the course. Three hours of lecture per week.

**BIOL 6602 Advanced Molecular Biology: 3 semester hours**  
Prerequisites: BIOL 2012 and CHEM 2612, or consent of instructor. This course covers advanced principles of molecular biology, with an emphasis on primary literature. Students may be required to give an oral presentation and/or write papers on a topic relevant to the course. Students may not receive graduate credit for both BIOL 4602 and BIOL 6602.

**BIOL 6608 Advanced Synthetic Biology: 3 semester hours**  
Prerequisites: BIOL 2012, BIOL 2482. A study of the molecular biology of microbial cells, in the context of synthetic biological systems. Topics include DNA replication, transcription, translation, gene regulation and protein structure as well as aspects of genetic engineering as they apply to the construction of novel biological systems. Following an introduction to the design of biological parts used in synthetic biology, students read, discuss and present recent journal articles in order to learn about current advances and applications of synthetic biology. Three hours of lecture per week. Students may not receive credit for both BIOL 4608 and BIOL 6608.
BIOL 6615 Advanced Biotechnology Laboratory II: 4 semester hours
Prerequisites: BIOL 4614 and either BIOL 4602 or BIOL 4612, or consent of instructor. An in-depth look at the theory and practice of biotechnology. Lectures and discussion will examine the underlying principles, and laboratory exercises will present hands-on experience with current techniques. One hour of lecture and six hours of laboratory per week. Students will be required to give an oral presentation and/or write an extra paper on a topic relevant to the course. Students may not receive credit for both BIOL 6615 and BIOL 4615 or any course previously called Techniques in Molecular Biology or Advanced Techniques in Molecular Biology.

BIOL 6618 Practical Next-Generation Sequencing: 3 semester hours
Prerequisites: Consent of instructor. This is a laboratory course in practical next-generation sequencing. Roughly one-half of the course will focus on bench-top methods for generating sequencing libraries from total RNA as well as the use of next-generation sequencing instruments. The second half of the course will focus on computational methods for analyzing sequencing data, including data visualization and coding.

BIOL 6622 Advanced Cellular Basis of Disease: 3 semester hours
Prerequisites: BIOL 3622, or consent of instructor. A study of the structural organization and processes of eukaryotic cells, focusing on how defects in cellular function lead to genetic diseases and cancer. Topics of discussion may include membrane dynamics, intracellular trafficking, signal transduction, and the cell cycle. Three hours of lecture per week. Students may not receive credit for both BIOL 6622 and BIOL 4622.

BIOL 6632 Advanced Nucleic Acid Structure and Function: 3 semester hours
Prerequisites: BIOL 2012 and BIOL 4712 or equivalent, or consent of instructor. A comprehensive view of the structural properties of DNA and RNA that promote molecular interactions & biological function. Topics will include the physical properties of nucleic acids, the formation and biological importance of higher order structures, RNA enzymatic activities, nucleic acid-protein interactions, and RNA metabolism. Three hours of lecture and one hour of discussion per week. Students may not receive credit for both BIOL 4632 and BIOL 6632.

BIOL 6642 Advanced Plant Biology and Biotechnology: 3 semester hours
Prerequisites: Graduate standing. This course will introduce molecular biology principles that govern plant growth, development, and responses to stress. This course integrates the experimental approaches of genetics, molecular biology, and biochemistry, with a specific focus on biotechnology techniques and applications. Student may not receive credit for both BIOL 4642 and BIOL 6642.

BIOL 6652 Advanced Virology: 3 semester hours
Prerequisites: BIOL 2012, BIOL 3622, and graduate standing. This first half of the course entails a comparative study of the structure, replication, and molecular biology of viruses. The second half of the course focuses on the pathogenesis, control, and evolution of animal viruses. Three hours of lecture, one hour of discussion or seminar per week. Students may not receive credit for both BIOL 4652 and BIOL 6652.

BIOL 6699 Graduate Internship in Biotechnology: 1-4 semester hours
Prerequisites: Graduate standing and enrollment in graduate Biotechnology Certificate Program. 6 credit hours maximum (maximum of 8 combined credit hours of BIOL 6905 and internship) Internship will consist of period of observation, experimentation and on-the-job training in biotechnology laboratory. The laboratory may be industrial or academic. Credit will be determined by the number of hours the student works each week and in consultation between the intern's supervisor and the instructor. Internship assignments will be commensurate with the education and experience of the student.

BIOL 6889 Graduate Seminar: 2 semester hours
Presentation and discussion of various research problems in biology. Graduate student exposure to the seminar process.

BIOL 6905 Graduate Research in Biology: 1-10 semester hours
Research in area selected by student in consultation with faculty members.

BIOL 6915 Graduate Research Practicum: 1-2 semester hours
Prerequisite: Consent of instructor. This course is designed for graduate students wishing to pursue research experience in an area outside their dissertation topic. The project can be techniques-oriented or focused on a specific research question. The credit hours will depend on the time commitment to the project as decided by the supervisory faculty member.

BIOL 6920 Advanced Topics in Biology: 1-5 semester hours
Prerequisites: Graduate standing. In-depth studies of selected topics in contemporary biology. May be repeated.

Business Administration

Courses

BUS AD 1000 Introduction to Business: 3 semester hours
Overview of the functional business disciplines, including, but not limited to principles of Accounting, Finance, Information Systems, Law, Logistics and Operations Management, Management, and Marketing.

BUS AD 1900 Introduction to Personal Law: 3 semester hours
This course introduces students to the American legal system and the basic issues every individual must deal with in our society. The course will be of interest to anyone seeking a job, leasing an apartment, buying a car or house, borrowing money, buying insurance, getting married or divorced, entering contracts, filing a law suit, writing a will, or accumulating wealth. May not be used for credit in any undergraduate business program.

BUS AD 2000 Topics in Business Administration: 1-3 semester hours
Prerequisites: Vary with topic; contact the School of Business Administration. Study of selected special problems in business and administration. May be repeated for credit with different topics.

BUS AD 2900 Legal Environment of Business: 3 semester hours
Prerequisites: Sophomore standing. An introduction to the nature and meaning of law, sources of law, legal process and institutions. The legal environment of business is defined as: the attitude of the government toward business, the historical development of this attitude; current trends of public control in taxation, regulation of commerce and competition; freedom of contract, antitrust legislation and its relationship to marketing, mergers and acquisitions; and labor management relations.
BUS AD 3090 Internship in Business Administration: 1-3 semester hours
Prerequisites: Minimum campus GPA of 2.0; one must have completed and/or be currently enrolled in at least 6 hours of Business Administration electives, and a College of Business GPA of at least 2.5. Students are employed in the field of Business Administration where they apply the knowledge and skills learned in the classroom. Professional development and obtaining specialized work experience are the primary goals. A Business Administration faculty member will monitor the student's program with the student providing a formal written report at the end of the project. BUS AD 3090 may not be counted toward the minimum credit hours for any emphasis area.

BUS AD 3098 Independent Study In Business Administration: 1-3 semester hours
Prerequisites: Minimum campus GPA of 2.0 and approval by the supervising professor and the Associate Dean. Special individual study in business under the supervision of a full-time faculty member.

BUS AD 3990 Internship in Business Law: 1-3 semester hours
Prerequisites: BUS AD 2900, 3 credit hours of Business Law electives, and a Business College 2.5 GPA. Must have completed and/or be currently enrolled in at least 3 credit hour of Business Law electives and have consent of supervising instructor and Area Coordinator. Students are employed in the field of Business Law where the knowledge and skills learned in the classroom are applied. Professional development and obtaining specialized work experience are primary goals. A Business Law faculty member will monitor the student's program with the student providing a formal written report at the end of the project.

BUS AD 4001 Accelerate Capstone: 3 semester hours
Same as ENT 4001. Prerequisites: ENT 1001, and either EDUC 2002 or ENT 3040, or consent of instructor. This course provides students with a capstone experience taking an idea from planning to 'launch.' This should be the last course taken in the certificate sequence and may involve elements of an instructional seminar and a practicum. May be taken in conjunction with other courses within the certificate, but it is highly suggested as the final course in the sequence.

BUS AD 4198 Business Administration Senior Seminar: 1-10 semester hours
Prerequisites: To be determined each time the course is offered and to include minimum 2.0 campus GPA. An intensive study of a specific area of business administration, of some specific business or economic phenomenon, or a specific problem or theory. Several different courses may be offered under this course number. May be repeated for credit as long as the topic differs.

BUS AD 4325 Environmental Sustainability in Business Operations: 3 semester hours
Same as SCMA 4325. Prerequisites: SCMA 3301 or consent of instructor. This course studies the environmental impacts of business operations, and it focuses especially on the principles and methods of 'lean and green' operations, i.e., ways in which organizations can reduce their costs and increase profits, while reducing their environmental impacts. Specific topics include energy efficiency, resource reduction, waste reduction, design for the environment, externalities and internal pricing mechanisms, environmental technologies, life-cycle assessment, recycling, re-use, and re-manufacturing, as well as national and global environmental issues.

BUS AD 5000 Economics for Managers: 3 semester hours
Prerequisite: Graduate standing. The concepts and tools of economic analysis are applied to the production and distribution functions of organizations. The last portion is devoted to the macroeconomic influence of capital markets, the influence of interest rates, inflation, and the business cycle.

BUS AD 5001 Managerial Economic Analysis: 3 semester hours
Prerequisites: BUS AD 5000 or ECON 1001 and ECON 1002. Microeconomic analysis of consumers, firms, and government. The concepts and mathematical tools of economic analysis are applied to the production and distribution functions of organizations.

BUS AD 5002 Analysis Of National Economic Environment: 3 semester hours
Prerequisites: BUS AD 5000 or ECON 1001 and ECON 1002. The character and functioning of the national economic system; analyzing and forecasting fluctuations in national income and product, employment, and prices; the influence of monetary and fiscal policies. Emphasis is on the acquisition of knowledge concerning forces affecting all business firms.

BUS AD 5100 Managerial Communication: 3 semester hours
An analysis of business writing and speaking, and the communication conventions common in organizations. Emphasis is placed on developing skills critical to career advancement and necessary for effective organizational functioning. A second goal is to prepare students for assignments in other business courses. This course must be taken within the first 12 credit hours of study, preferably in the student's first semester.

BUS AD 5198 Seminar in Business Administration: 3 semester hours
An intensive study of a specific area of business administration of some specific business or economic phenomenon, or a specific problem or theory. Several different courses may be offered under this course number.

BUS AD 5299 Individual Research: 1-3 semester hours
Prerequisite: Consent of instructor and graduate director. Special individual research topics under the guidance of a specific professor.

BUS AD 5325 Environmental Analysis and Sustainability in Business Operations: 3 semester hours
Same as SCMA 5325. Prerequisites: SCMA 5310 or consent of instructor. This course analyzes the environmental impacts of business operations, and it focuses especially on the principles and methods of 'lean and green' operations, i.e., ways in which organizations can reduce their costs and increase profit, while reducing their environmental impacts. Specific topics include energy efficiency, resource reduction, waste reduction, design for the environment, externalities and internal pricing mechanisms, environmental technologies, life-cycle assessment, recycling, re-use, and re-manufacturing, as well as national and global environmental issues.

BUS AD 5450 Governmental Budgeting and Financial Control: 3 semester hours
Prerequisite: ACCTNG 5400. A study of municipal and federal financial control and budgeting procedures with emphasis on public policy. The impact of financial control on top management decisions and the effect of budget strategies on the allocations of public funds.

BUS AD 5900 Law, Ethics and Business: 3 semester hours
Analysis of the relationship between law and business with emphasis on the ability of, and extent to which, governments regulate business activities. Topics covered include the employer-employee relationship, protection of consumers, antitrust regulation, and securities law. Also discussed are ethical issues confronting management of the modern business enterprises.
BUS AD 6990 Strategy Formulation and Implementation: 3 semester hours
Prerequisites: FINANCE 6500, MGMT 5600, MKTG 5700, SCMA 5320 and special consent. Graduate program capstone course examining concepts and methods that integrate functional areas of business. The perspective is that of general management charged with directing the total enterprise. Interactions between the environment, organization, strategy, policies and the implementation of plans are explored. Special emphasis is given to globalization of business and ethical perspectives. This course should be taken during the semester prior to graduation. In no case may it be taken sooner than two semesters prior to graduation.

BUS AD 6991 Graduate Business Assessment Testing: 0 semester hours
Prerequisites: Consent of DBA program director. Graduate program capstone course examining concepts and methods that integrate functional areas of business. The perspective is that of general management charged with directing the total enterprise. Interactions between the environment, organization, strategy, policies and the implementation of plans are explored. Special emphasis is given to globalization of business and ethical perspectives. This course should be taken during the semester prior to graduation. In no case may it be taken sooner than two semesters prior to graduation.

BUS AD 7000 Doctoral Research: 1-12 semester hours
Prerequisite: Must have PhD Program Director or Area Coordinator approval. Investigation of an advanced nature culminating in preparation for comprehensive examinations and/or development of dissertation proposal. The course may be repeated for credit.

BUS AD 7002 Dissertation Research: 1-12 semester hours
Prerequisites: Must have Ph.D. Program Director or Area Coordinator approval. Investigation of an advanced nature culminating preparation of a doctoral dissertation. The course may be repeated.

BUS AD 7100 Scientific Inquiry in Business: 1-3 semester hours
Prerequisites: Consent of DBA program director and graduate standing. This course provides an overview of research methods for studying business problems including extraction of information from secondary sources, and primary data collection with surveys, interviews, participant observation, action research, field experiments, controlled experiments, case studies, design sciences and simulations. The course covers foundations of business research (substantive theories, formal theories, and frameworks). Students will learn the types of variables used to test theories and develop the skills required for reviewing the literature and conceptualizing research questions that are important for practice. Ethical issues related to conducting and publishing research will be discussed. Students will become nationally certified in protecting human research participants and in responsible research conduct.

BUS AD 7101 Quantitative Research Methods I in Business Administration: 3 semester hours
Prerequisites: Consent of DBA program director. This course provides an understanding of the application of quantitative analytical techniques to problems in the planning and management of business enterprises and service operations. The course provides experience in structuring analytical models and drawing inferences from their results. Topics include techniques for descriptive, predictive and diagnostic analytics, and may cover general linear statistical models, logistical regression, techniques for extrapolating time series, and statistical methods for testing conceptual models.

BUS AD 7102 Qualitative Research Methods I in Business Administration: 3 semester hours
Prerequisites: Consent of DBA program director and graduate standing. Working in groups, students will design and execute a qualitative research project using interviews or direct observations. During the course, students will prepare a qualitative research proposal that includes well-formed research questions, clearly positions the research as a contribution to knowledge, critically reviews the academic literature relevant to the student's topic, develops qualitative research instruments (such as an interview guide), executes the research, analyzes the data and writes up the report. Students will learn how to abstract their findings into lessons for scholars and/or practitioners. One important output of this seminar is a completed research paper suitable for publication in a respected practitioner or academic outlet.

BUS AD 7103 Quantitative Research Methods II in Business Administration: 3 semester hours
Prerequisites: Consent of DBA program director and graduate standing. This course provides an advanced understanding of quantitative research with special attention to prescriptive analytics. Emulating work in prior published studies, students identify and frame research questions, determine appropriate metrics, develop hypotheses, build and test quantitative models, and discuss the advantages and shortcomings of alternative quantitative approaches. One important output of this course is a completed research paper.

BUS AD 7104 Qualitative Research Methods II in Business Administration: 3 semester hours
Prerequisites: Consent of DBA program director and graduate standing. Working in groups, students design and execute a qualitative research study using a case study method or action research. Students prepare a qualitative research proposal that includes well-formed research questions, clearly positions the research as a contribution to knowledge, and critically reviews the academic literature relevant to the topic. Students develop qualitative research instruments (or design an experimental intervention), execute the research, analyze the data and produce a report that presents lessons for scholars and/or practitioners. An important product of this seminar is a completed research paper suitable for publication in a respected practitioner or academic outlet.

BUS AD 7105 Special Topics in Business Administration: 2 semester hours
Prerequisites: Consent of DBA program director. Special topics examined from the business administration perspective. Topics may vary by semester.

BUS AD 7106 Strategic Business Analysis: 2 semester hours
Prerequisites: Consent of DBA program director. The objective of this capstone course is to synthesize theoretical and empirical research from the different business disciplines (and other non-management sciences and disciplines) to give new insight for public policy or managerial practice. Course projects may address contemporary challenges in the global economy, regulatory processes, taxation, management of innovation, management of risk and disruptive events, consequences of international agreements, environmental issues, sustainability of business practices and business alliances, corporate governance, cultural challenges in international business relations, and other contemporary problems specific to students' places of employment.
BUS AD 7107 Capstone Project Research in Business Administration: 6 semester hours
Prerequisites: Consent of DBA program director. Students develop a formal proposal for their capstone research projects that includes a draft of all parts of the project that precede the data collection. This proposal includes research questions or hypotheses based on prior research, and the methodology to be employed for addressing the research questions or corroborating the hypotheses. This course will be coordinated by the Academic Director of the DBA Program, and attended by interested faculty, especially those serving as Chairs. By the conclusion of this course, each capstone project proposal is approved by a capstone project committee (consisting of the Chair of the capstone project committee and two other members).

BUS AD 7109 Doctoral Foundations Seminar: 1-3 semester hours
Prerequisites: Consent of DBA program director. This course will cover the foundation necessary to succeed in the DBA Program. This seminar will also provide the doctoral students with an understanding of the culture of research.

BUS AD 7300 Management of Supply Chains: 2 semester hours
Prerequisites: Consent of Program Director. This course provides a comprehensive overview of supply chain management, including procurement, sourcing, operations, production and logistics, with special attention to international issues. Topics include designing and operating multinational logistics systems; managerial issues and strategies for sourcing, transportation, and inventory management; legal and financial issues in import and export; risk identification and management; and the relationship of supply chain management to other activities. The course also provides students with an understanding of quantitative techniques used in the design and management of global supply chains.

BUS AD 7301 Statistical Modeling: 1-3 semester hours
Prerequisites: SCMA 5300; consent of DBA program director. Study of multivariate analytical techniques and their application to the analysis of business systems. Topics include the construction and adaptation of statistical models and extrapolative techniques to accommodate factor interactions, nonlinearities, and periodic effects. Methodologies include multiple regression, ANOVA, and general linear model, MANOVA, structural equation modeling, and time series modeling.

BUS AD 7400 The Role of Accounting Information in Firms and Markets: 2 semester hours
Prerequisites: Consent of DBA program director. This course provides insights into various accounting theories and practices, including financial analysis to identify opportunities, archival and behavioral inquiry in accounting, the role of accounting information in valuation, the role of accounting information in firm contracting, structural cost management, executive cost management, and governance and controls.

BUS AD 7500 Finance Theory and Applications Seminar: 2 semester hours
Prerequisites: Consent of DBA program director. This two-unit finance course addresses contemporary issues in corporate finance, investment, financial institutions and financial markets. Extensive reviews of the literature in different finance fields are conducted. Modigliani-Miller theorem, agency theory, capital asset pricing theory, and option pricing theory are discussed and applied in research analysis.

BUS AD 7600 Managing Talent for Strategic Advantage: 2 semester hours
Prerequisites: Consent of DBA program director. This course provides insight into research on topics that explore how organizational behavior and human resource management practices contribute to developing and sustaining effective and satisfying workplaces. Topics such as conflict management, change management, motivation, cultural intelligence, compensation strategies, selection and promotion decisions, performance management and legal issues in employment decision making, will be discussed.

BUS AD 7700 Contemporary Marketing Intelligence and Decision Making: 2 semester hours
Prerequisites: Consent of DBA program director. This course examines how firms generate valuable marketing intelligence for critical decisions in pursuit of marketing objectives. Marketing strategies and consumer behavior are studied through literature reviews and examination of case studies. Students challenge assumptions, frameworks, and findings and they discuss how marketing strategy is adapted in practice for various products and services. They also learn how data mining techniques are used in the development and execution of marketing strategies.

BUS AD 7800 Management of Sustaining and Disruptive Information Technologies: 2 semester hours
Prerequisites: Consent of DBA program director. This course provides insights into contemporary sustaining and disruptive information technologies and their strategic and supporting roles in organizations and society. This course provides the student with an understanding of the processes through which information systems are adopted and used by organizations, including their sourcing, design, development, implementation, and strategic management. The course will also examine best practices for managing new information technologies, such as social media, business intelligence, and the Internet of Things. Strategic opportunities, threats and processes for achieving cyber security will be considered as students discuss the impacts such technologies have on organizations, individuals, and society.

Center International Studies

Courses
C I ST 3200 Study Abroad, Non UM-St. Louis Program: 1-24 semester hours

C I ST 5200 Study Abroad Non UM-St Louis Program Grad: 1-15 semester hours

Chemistry

Courses
CHEM 1000 Chemistry: The Central Science: 1 semester hour
This course introduces chemistry majors to the broad nature of the chemical enterprise, including career areas for chemists, trends in chemistry related opportunities in research and industry, and provides an overview of the relevance of chemistry as a discipline. The course reviews the chemistry curriculum and the role of chemistry as a central science and includes presentations from selected current faculty and departmental alumni about research opportunities and other resources within the department. The course is required of all chemistry majors, and is to be taken no later than their second semester of enrollment as a chemistry major at UMSL.
**CHEM 1011 Chemistry in the Environment: 3 semester hours**
This course examines the role of chemistry in the environment and the application of chemistry to our understanding of society. The focus of the course will be the relationship between chemistry and the world around us including topics such as the chemistry of air, global climate change, water and energy. The course is designed for non-science, non-engineering and non-allied health majors and can be used to fulfill a general education requirement for undergraduate degrees. The course consists of two hours of lecture per week and, on alternate weeks, one hour of discussion or two hours of laboratory.

**CHEM 1021 Beer Brewing: Chemical and Biochemical Principles: 3 semester hours**
This course examines the process of beer brewing as it relates to general topics of chemistry, biochemistry and biology. Each aspect of the brewing process will be examined in detail and the underlying scientific principles identified and discussed. The course is designed for non-science, non-engineering and non-allied health majors and can be used to fulfill a general education requirement for undergraduate degrees. The course consists of two hours of lecture and three hours of lab per week.

**CHEM 1022 Principles of Fermentation Science: 3 semester hours**
Prerequisites: CHEM 1021 or a 3 credit-hour 1000 level science course or consent of instructor. This course is designed primarily for students that want to gain insight into the fermentation process from the initial ingredients to the final product. Students will be engaged in analysis of ingredients, impact on the process and evaluation of various styles of beer. Laboratory evaluation will include analysis of water, hops, carbohydrates, alcohol content and sensory science. The course consists of two hours of lecture and three hours of lab per week.

**CHEM 1052 Chemistry for the Health Professions (MOTR CHEM 100): 4 semester hours**
An introduction to general, nuclear, structural organic, organic reactions and biochemistry. This course is designed primarily for students in nursing and related health professions, and should not be taken by students majoring in the physical or biological sciences. Chemistry majors may include neither CHEM 1052 or CHEM 1062 in the 120 hours required for graduation. Four hours of lecture per week.

**CHEM 1062 Organic and Biochem for the Health Professions: 2 semester hours**
Prerequisites: Any college Chemistry course. An introduction to organic reactions and biochemistry. CHEM 1062 is offered during the second half of the semester. Four hours of lecture per week.

**CHEM 1081 Introductory Chemistry I-A (MOTR CHEM 100): 3 semester hours**
Prerequisites: MATH 1030 (or a score of 26 or higher on either the Math ACT or the Math Placement Test). This course is designed for students who want to have an in depth understanding of introductory concepts in Chemistry. CHEM 1081 covers the topics taught in the first half of CHEM 1111 but at a slower pace, thus allowing students time to fully integrate the concepts and thereby build a stronger foundation for their subsequent Chemistry courses. CHEM 1081 consists of the first half of CHEM 1111 (excluding laboratory experiments), whereas CHEM 1091 covers all the laboratory experiments and second half of lecture part of CHEM 1111. Three hours of lecture or workshop per week.

**CHEM 1091 Introductory Chemistry I-B (MOTR CHEM 150L): 3 semester hours**
Prerequisites: CHEM 1081. CHEM 1091 is the completion of CHEM 1111 for students who have completed CHEM 1081. The laboratory portion of this course will start at the beginning of the semester. The lecture part of the course starts in mid-semester and students join an ongoing CHEM 1111 class. Students who completed CHEM 1081 must complete CHEM 1091 to be considered as having completed the equivalent of CHEM 1111. Three hours of lecture and one and one half hours of workshop during the second half of the semester, and three hours of laboratory per week during the entire semester.

**CHEM 1111 Introductory Chemistry I (MOTR CHEM 150L): 5 semester hours**
Prerequisite: MATH 1030 (or a score of 26 or higher on either the Math ACT or the Missouri Math Placement Test). CHEM 1111 is the course for students who have completed CHEM 1081. CHEM 1111 is the completion of CHEM 1111 class. Students who completed CHEM 1081 must complete CHEM 1091 to be considered as having completed the equivalent of CHEM 1111. Three hours of lecture and one and one-half hours of workshop during the second half of the semester, and three hours of laboratory per week during the entire semester.

**CHEM 1111B CHEM 1111B-Introductory Chemistry 1 - Modular Format: 1 semester hour**
Prerequisites: MATH 1030 (or a score equivalent to completion of MATH 1030 on the UMSL mathematics placement assessment). These courses (1111A-1111L) are identical in content to CHEM 1111 but are offered in a modular format. Each credit hour deals with the lecture or laboratory material covered in CHEM 1111. Completion of all five modules with a grade in each of C- or above is equivalent to completion of CHEM 1111. CHEM 1111A covers the first quarter of lecture material covered in CHEM 1111.

**CHEM 1111B CHEM 1111B-Introductory Chemistry 1 - Modular Format: 1 semester hour**
Prerequisites: CHEM 1111A. Concurrent registration with CHEM 1111B is permitted. CHEM 1111B covers the second quarter of lecture material covered in CHEM 1111.

**CHEM 1111C CHEM 1111C-Introductory Chemistry 1 - Modular Format: 1 semester hour**
Prerequisites: CHEM 1111B. Concurrent registration with CHEM 1111C is permitted. CHEM 1111C covers the third quarter of lecture material covered in CHEM 1111.

**CHEM 1111D CHEM 1111D-Introductory Chemistry 1 - Modular Format: 1 semester hour**
Prerequisites: CHEM 1111C. Concurrent registration with CHEM 1111D is permitted. CHEM 1111D covers the final quarter of lecture material covered in CHEM 1111.

**CHEM 1111L CHEM 1111L-Introductory Chemistry 1 - Modular Format: 1 semester hour**
Prerequisites: CHEM 1111D. Concurrent registration with CHEM 1111L is permitted. CHEM 1111L covers laboratory portion of CHEM 1111.

**CHEM 1121 Introductory Chemistry II: 5 semester hours**
Prerequisite: CHEM 1111 or advanced placement. Lecture and laboratory are a continuation of CHEM 1111. Three hours of lecture, one and one-half hours of workshop and three hours laboratory per week.
CHEM 1134 Special Topics in Introductory Chemistry: 1-5 semester hours
Prerequisite: Consent of instructor. A lecture and/or laboratory course to assist transfer students to complete the equivalent of CHEM 1111 and CHEM 1121. Students enrolling in this course should contact the instructor prior to the first day of class for guidelines on course requirements, to choose a lab or workshop section, and to request enrollment in the course.

CHEM 2010 Introduction to Inquiry Approaches to STEM Education (STEP I): 1 semester hour
Prerequisites: Concurrent enrollment BIOL 1821, BIOL 1831, CHEM 1111, CHEM 1121, PHYSICS 2111, PHYSICS 2112, MATH 1800, or MATH 1900 or have a declared STEM major. Students who want to explore teaching careers become familiar with lesson plan development by writing, teaching and observing lessons in a local school class. Students build and practice inquiry-based lesson design skills and become familiar with and practice classroom management in the school setting. As a result of the STEP I experiences students should be able to decide whether to continue to explore teaching as a career and ultimately finishing the remainder of the WE TEACH MO curriculum leading to teacher certification. The classroom observations and teaching represent a major field component and requires at least one two hour block of free time during the school day once a week.

CHEM 2011 Designing Inquiry-Based STEM Experiences (STEP II): 1 semester hour
Prerequisites: BIOL 2010, CHEM 2010, PHYSICS 2010, MATH 2010, or SEC ED 2010. Students explore teaching careers, become familiar with STEM school setting through observing and discussing the school environment and by developing and teaching inquiry-based lessons.

CHEM 2223 Quantitative Analysis in Chemistry: 3 semester hours
Prerequisites: CHEM 1121. This course covers basic analytical chemistry theory and techniques, principles of experimental error analysis, and the application of statistics to data treatment. A significant proportion of the laboratory experiments emphasize quantification of unknown samples.

CHEM 2612 Organic Chemistry I: 3 semester hours
Prerequisite: CHEM 1121 (may be taken concurrently). An introduction to the structure, properties, synthesis, and reactions of aliphatic and aromatic carbon compounds. Three hours of lecture per week.

CHEM 2622 Organic Chemistry II: 3 semester hours
Prerequisite: CHEM 2612. A systematic study of organic reactions and their mechanisms; organic synthetic methods. Three hours of lecture per week.

CHEM 2633 Organic Chemistry Laboratory: 2 semester hours
Prerequisite: CHEM 2612. An introduction to laboratory techniques and procedures of synthetic organic chemistry including analysis of organic compounds. One hour of lecture and four and one-half hours of laboratory per week.

CHEM 3022 Introduction to Chemical Literature: 1 semester hour
Prerequisites: CHEM 2622 (CHEM 2622 may be taken concurrently). This course will familiarize the student with the literature of chemistry and its use. One hour of lecture per week.

CHEM 3302 Physical Chemistry for The Life Sciences: 3 semester hours
Prerequisites: CHEM 2612 and MATH 1800 or MATH 1100, and PHYSICS 1012. Principles and applications of physical chemistry appropriate to students pursuing degree programs in the life sciences. Topics will include thermodynamics, equilibria, kinetics, and spectroscopy. This course is intended for undergraduates seeking the B.S. degree in Biochemistry and Biotechnology and does not fulfill the physical chemistry required for other Chemistry B.A. and B.S. degree programs.

CHEM 3312 Physical Chemistry I: Thermodynamics and Kinetics: 3 semester hours
Prerequisites: CHEM 1121 and MATH 2000 (MATH 2000 may be taken concurrently), and PHYSICS 2111. This course discusses the principles of physical chemistry, focusing on thermodynamics, theory of gases, phase equilibria, solution behavior, and kinetics.

CHEM 3322 Physical Chemistry II: Quantum Chemistry and Spectroscopy: 3 semester hours
Prerequisites: CHEM 1121, MATH 2000 and PHYSICS 2111. This course discusses the principles of physical chemistry, focusing on atomic and molecular structure, spectroscopy, and quantum mechanics.

CHEM 3333 Physical Chemistry Laboratory I: 2 semester hours
Prerequisites: CHEM 2223 and CHEM 3312. This course involves experiments designed to illustrate principles introduced in CHEM 3312.

CHEM 3341 Basic Inorganic Chemistry: 3 semester hours
Prerequisite: CHEM 1121. This course reviews the principles of atomic structure and studies covalent and ionic bonding. Topics include properties of the elements and synthesis, reactions and bonding aspects of important main group and transition metal compounds. Two hours lecture per week.

CHEM 3643 Advanced Organic Chemistry Laboratory: 2 semester hours
Prerequisites: CHEM 2223, CHEM 2622, CHEM 2633, and CHEM 3022 (may be taken concurrently). Identification of organic compounds by classical and spectroscopic methods; advanced techniques in synthesis and separation of organic compounds. One hour of lecture and four and one-half hours of laboratory per week. Not for graduate credit.

CHEM 3905 Chemical Research: 1-10 semester hours
Prerequisite: Consent of instructor. Independent laboratory and library study, in conjunction with faculty member, of fundamental problems in chemistry. A written report describing the research is required.

CHEM 4212 Instrumental Analysis: 3 semester hours
Prerequisites: CHEM 3312 and CHEM 3322. This course studies the principles and applications of modern methods of instrumental analysis for analytical chemistry measurements. Topics may be selected from the areas of electrochemistry, absorption and emission spectroscopy, chromatography, mass spectrometry, surface analysis, and nuclear magnetic resonance.

CHEM 4233 Laboratory in Instrumental Analysis: 2 semester hours
Prerequisites: CHEM 4212, CHEM 3333. Experiments designed to illustrate the principles and practices of instrumental analysis, involving the use of modern instrumentation in analytical chemistry applications. One hour of discussion and four and one-half hours of laboratory per week.
CHEM 3302 Survey of Physical Chemistry with Applications to the Life Sciences: 3 semester hours
Prerequisites: CHEM 2612 and MATH 1800 or MATH 1100, and PHYSICS 1012. This course covers the principles of physical chemistry with applications to the life sciences. Topics will include thermodynamics, equilibria, kinetics, and spectroscopy. This course will be taught simultaneously with CHEM 3302, but students in CHEM 4302 will have additional assignments or projects. No student may receive credit for both CHEM 3302 and CHEM 4302. No student may receive credit for both 4302 and 5302.

CHEM 4343 Physical Chemistry Laboratory II: 2 semester hours
Prerequisites: CHEM 2223 and CHEM 3322 (CHEM 3322 may be taken concurrently). This course involves experiments designed to illustrate principles introduced in CHEM 3322.

CHEM 4412 Advanced Inorganic Chemistry: 3 semester hours
Prerequisites: CHEM 3322 (may be taken concurrently), CHEM 3412, and CHEM 2622. This course introduces the chemistry of the elements, including atomic and molecular structure, acids and bases, the chemistry of the solid state, and main group and transition metal chemistry. Three hours of lecture per week. Students may not receive credit for both CHEM 4412 and CHEM 5412.

CHEM 4433 Inorganic Chemistry Laboratory: 2 semester hours
Prerequisites: CHEM 3333, CHEM 3643, and CHEM 4412 (CHEM 3643 may be taken concurrently). The more sophisticated techniques of physical and analytical chemistry will be used to study inorganic compounds and their reactions. One hour of lecture and four and one half hours of laboratory per week. Not for graduate credit.

CHEM 4612 Introduction to Macromolecular, Supramolecular, and Nanoscale Chemistry: 1 semester hour
Prerequisites: CHEM 2622, CHEM 3412, and CHEM 3312. This course introduces students to macromolecular, supramolecular, and nanoscale chemistry. Structure, synthesis and/or preparation, characterization, and physical properties of these systems will be introduced. May not be taken for graduate credit.

CHEM 4712 Biochemistry: 3 semester hours
Same as BIOL 4712. Prerequisites: CHEM 2612 and either BIOL 1831 or CHEM 2622. Examines the chemistry and function of cell constituents, and the interaction and conversions of intracellular substances. Students may not receive credit for both BIOL 4712 and CHEM 4712.

CHEM 4722 Advanced Biochemistry: 3 semester hours
Prerequisite: CHEM 4712. This course covers selected advanced topics in the chemistry of life processes. Students may not receive credit for both CHEM 4722 and CHEM 5722.

CHEM 4733 Biochemistry Laboratory: 2 semester hours
Prerequisites: CHEM 4712 (may be taken concurrently), and CHEM 2223. Laboratory study of biochemical processes in cellular and subcellular systems with emphasis on the isolation and purification of proteins (enzymes) and the characterization of catalytic properties. One hour of lecture and four and one half hours of laboratory per week.

CHEM 4772 Physical Biochemistry: 3 semester hours
Prerequisites: CHEM 3312 or CHEM 4712 or BIOL 4712. This course is designed to acquaint students with concepts and methods in biophysical chemistry. Topics that will be discussed include protein and DNA structures, forces involved in protein folding and conformational stability, protein-DNA interactions, methods for characterization and separation of macromolecules, and biological spectroscopy. Students may not receive credit for both CHEM 4772 and CHEM 5772.

CHEM 4774 Introduction to Bioinformatics: 3 semester hours
Prerequisites: CHEM 4712 or equivalent. This course introduces modern approaches in bioinformatics and computational biochemistry. Topics covered include a survey of biological databases, predictions from protein and DNA sequences, sequence alignment and sequence database searches, building phylogenetic trees, three-dimensional protein structure prediction, molecular modeling and simulation, and computational genomics. Students may not receive credit for both CHEM 4774 and CHEM 5774.

CHEM 4797 Biochemistry and Biotechnology Seminar: 1 semester hour
Same as CHEM 4797. Prerequisites: Senior standing in the Biochemistry and Biotechnology program and consent of faculty advisor. This course will focus on selected publications related to biochemistry and biotechnology from both refereed journals and news sources. Students are expected to participate in discussions and to prepare oral and written presentations. Completion of the Major Field Achievement Test in Biochemistry & Biotechnology is a course requirement. May not be taken for graduate credit.

CHEM 4814 Special Topics in Chemistry: 1-10 semester hours
A reading and seminar course in selected advanced topics.

CHEM 4897 Seminar in Chemistry: 2 semester hours
Prerequisites: CHEM 3022 and senior standing. This course will provide students with the opportunity to listen to talks presented by students, faculty, and invited speakers. Students must complete a comprehensive examination before the end of the course. Chemistry majors should enroll during the semester in which they intend to graduate, or during their next-to-last semester before graduation.

CHEM 5302 Foundations of Physical Chemistry: 3 semester hours
Prerequisites: Consent of Instructor. A survey of fundamental and advanced topics in physical chemistry including thermodynamics, kinetics, quantum chemistry, and spectroscopy. Three hours of lecture per week. Additional independent study work is required. Students may not receive credit for both CHEM 4302 and CHEM 5302.

CHEM 5394 Special Topics in Physical Chemistry: 1-3 semester hours
Prerequisite: Consent of instructor. The topic for this course may change from semester to semester, and more than one course or topic can be offered in a given semester. The course may be taken more than once for credit provided that the topic is different in each case. The course can have more than one instructor.

CHEM 5396 Directed Readings in Physical Chemistry: 1-3 semester hours
Prerequisites: Consent of Physical Chemistry Faculty. A series of readings of monographs, review papers, and/or research publications for a particular student directed at providing that student with appropriate background preparation for experimental or theoretical Ph.D.-level research in an area of physical chemistry. The particular readings will be selected by the physical chemistry staff. Potential topics include but are not limited to advances in Electrochemistry, Surface Chemistry, Thermodynamics, Molecular Spectroscopy, Quantitative Absorption Spectroscopy using new Methodologies, Applications of Group Theory in Spectroscopy, and Computational Chemistry. Assessment may be in various forms including by assignments and seminars. Students may take this course more than once for credit through the particular topic must be different in each case.
CHEM 5412 Advanced Graduate Inorganic Chemistry: 3 semester hours
Prerequisites: Graduate standing and consent of instructor. An introduction to the chemistry of the elements, including atomic and molecular structure, acids and bases, the chemistry of the solid state, and main group and transition metal chemistry. Additional independent study work is required. Three hours of lecture per week. Students may not receive credit for both CHEM 4412 and CHEM 5412.

CHEM 5422 Coordination Chemistry: 3 semester hours
Prerequisites: CHEM 4412 or an equivalent course. Chemistry of the coordination compounds of the transition metals including such topics as kinetics and mechanisms of reaction, stereochemistry, ligand field theory, stability and electronic spectra. Three hours of lecture per week.

CHEM 5462 Organometallic Chemistry of the Transition Elements: 3 semester hours
Prerequisites: CHEM 4412 or an equivalent course. A study of transition metal compounds containing metal-carbon bonds and related metal-element bonds, including their synthesis, structure and bonding, and reactions. Applications in organic synthesis and catalysis will also be presented. Three hours of lecture per week.

CHEM 5494 Special Topics in Inorganic Chemistry: 1-3 semester hours
Prerequisite: Consent of instructor. The topic for this course may change from semester to semester, and more than one course or topic can be offered in a given semester. The course may be taken more than once for credit provided that the topic is different in each case. The course can have more than one instructor.

CHEM 5602 Advanced Organic Chemistry I - Physical Organic: 3 semester hours
Prerequisites: CHEM 2622 and CHEM 3322. Mechanism and theory of organic chemistry. Topics to include kinetics, transition state theory, reaction intermediates, and stereochemical analysis. Three hours of lecture per week.

CHEM 5612 Advanced Organic Chemistry II - Reactions And Synthesis: 3 semester hours
Prerequisite: CHEM 2622. This course will examine a variety of organic transformations typically utilized in organic synthesis. Topics will include carbon-carbon bond formation, pericyclic reactions, oxidation, reduction, and functional group interconversions. Mechanism and stereochemistry will be emphasized. Three hours of lecture per week.

CHEM 5652 Spectroscopic Identification of Organic Compounds: 3 semester hours
Prerequisites: Graduate standing or CHEM 3643. An applied approach to the use of spectroscopic techniques in organic chemistry. Topics to include integrated applications of infrared and Raman spectroscopy, $^{13}\text{C}$ and $^{1}\text{H}$ nuclear magnetic resonance spectroscopy and mass spectroscopy for the purpose of elucidating the structure and dynamics of organic compounds. Three hours of lecture per week.

CHEM 5694 Special Topics in Organic Chemistry: 1-3 semester hours
Prerequisite: Consent of instructor. The topic for this course may change from semester to semester, and more than one course or topic can be offered in a given semester. The course may be taken more than once for credit provided that the topic is different in each case. The course can have more than one instructor.

CHEM 5722 Advanced Graduate Biochemistry: 3 semester hours
Prerequisites: CHEM 4712 or BIOL 4712. Selected advanced topics in the chemistry of life processes. Three hours of lecture per week. Students may not receive credit for both CHEM 4722 and CHEM 5722.

CHEM 5772 Advanced Physical Biochemistry: 3 semester hours
Prerequisites: CHEM 3312 or CHEM 4712 or BIOL 4712. Designed to acquaint students with concepts and methods in biophysical chemistry. Topics that will be discussed include protein and DNA structures, forces involved in protein folding and conformational stability, protein-DNA interactions, methods for characterization and separation of macromolecules, and biological spectroscopy. Three hours of lecture per week. Students may not receive credit for both CHEM 4772 and CHEM 5772.

CHEM 5774 Bioinformatics: 3 semester hours
Prerequisites: CHEM 4712 or equivalent. This course introduces modern approaches in bioinformatics and computational biochemistry. Topics to be covered include a survey of biological databases, predictions from protein and DNA sequences, sequence alignment and sequence database searches, building phylogenetic trees, three-dimensional protein structure prediction, molecular modeling and simulation, and computational genomics. Additional independent study work is required. Students may not receive credit for both CHEM 4774 and CHEM 5774.

CHEM 5794 Special Topics in Biochemistry: 1-3 semester hours
Prerequisites: Consent of instructor. The topic for this course may change from semester to semester, and more than one course or topic can be offered in a given semester. The course may be taken more than once for credit provided that the topic is different in each case. The course can have more than one instructor.

CHEM 5798 Practicum in Science in Business: 1-2 semester hours
Same as: BIOL 5798. Prerequisites: Graduate standing and enrollment in a Professional Science emphasis in Chemistry, Biochemistry & Biotechnology, or Biology. Students will integrate and apply their scientific expertise to a practical, business-related problem. The course will emphasize interdisciplinary team-work as well as both written and oral communication skills.

CHEM 5799 Internship in Science in Business: 1-2 semester hours
Same as: BIOL 5799. Prerequisites: Graduate standing and enrollment in a Professional Science emphasis area in Chemistry, Biochemistry & Biotechnology, or Biology. The internship will consist of period of on-the-job training at a local company. Credit hours will be determined by the number of hours the student works each week and in consultation between the intern's supervisor and the course instructor. Internship assignments will be commensurate with the education and experience of the student, with an emphasis on work at the interface between the scientific and business components of the company. A written report describing the internship project is required.

CHEM 6487 Problem Seminar in Inorganic Chemistry: 1 semester hour
Prerequisite: Consent of the inorganic chemistry staff. Problems from the current literature, presentations and discussions by faculty, students and visiting scientists. Ph.D. students may take more than once for credit. Up to three credits may be applied to the M.S. degree program.

CHEM 6687 Problem Seminar in Organic Chemistry: 1-3 semester hours
Prerequisite: Consent of the organic chemistry staff. Problems from the current literature, presentations and discussions by faculty, students and visiting scientists. Ph.D. students may take more than once for credit. Up to three credits may be applied to the M.S. degree programs.

CHEM 6787 Problem Seminar in Biochemistry: 1 semester hour
Prerequisite: Consent of the biochemistry staff. Problems from the current literature, presentations and discussions by faculty, students and visiting scientists. Ph.D. students may take more than once for credit. Up to three credits may be applied to the M.S. degree program.
CHEM 6812 Introduction to Graduate Study in Chemistry: 1 semester hour
Prerequisite: Consent of Graduate Advisor. Topics to be covered include: techniques of teaching of chemistry in colleges and universities, methods of instruction and evaluation; role and responsibilities of the Graduate Teaching Assistant in laboratory instruction; safety in the undergraduate laboratory, safety practices, emergency procedures; selection of a research project and thesis advisor.

CHEM 6822 Introduction to Graduate Research in Chemistry: 1 semester hour
Prerequisite: Consent of instructor. Topics to include: safety in the research laboratory, safety practices, emergency procedures, hazardous materials, waste disposal, radiation safety; research ethics, chemistry information retrieval, computer assisted information retrieval, types of databases, searching bibliographic data bases.

CHEM 6832 Strategies for Independent Research Proposal Development: 1 semester hour
Prerequisites: CHEM 6822 and Consent of Graduate Advisor. Topics include: strategies for identification of research topics in chemistry and biochemistry, techniques for database literature search, critical analysis of existing research knowledge, introduction to standard grant proposal formats, technical aspects in preparation of a research plan and accompanying sections, use of bibliographical software, and overview and practice of the peer review process.

CHEM 6887 Graduate Student Seminar in Chemistry: 1 semester hour
Prerequisites: Graduate standing. Scientific presentations by students. One hour per week.

CHEM 6897 Chemistry Colloquium: 1 semester hour
Presentation of papers by students, faculty and invited speakers. One hour per week.

CHEM 6905 Graduate Research in Chemistry: 1-10 semester hours

Child Advocacy Studies

Courses

CAST 1000 Introduction to Child Advocacy Studies: 3 semester hours
This survey course explores how child-serving systems have evolved, the functions they serve, and the roles they play in the lives of children and families. Key legislation, concepts, theories, and historical and contemporary approaches will be examined to highlight the types of advocacy relevant to children and the career paths associated with them. Students will examine skills needed for success as a child advocate, including collaboration and secondary traumatic stress prevention.

CAST 2200 Policy and Global Issues in Child Advocacy: 3 semester hours
Prerequisites: CAST 1000. This course reviews the history and implications of key national and international policies related to child advocacy. Students will explore the components of policy-making and strategies for effective policy advocacy. Students will also engage in advocacy efforts with policy-makers on behalf of children.

CAST 2300 Ethics and Values in Child Advocacy: 3 semester hours
Prerequisites: CAST 1000. This course explores the ethical, legal and professional issues related to child advocacy. Students will study the codes of ethics from a range of multidisciplinary perspectives and apply ethical decision making processes to case studies. The values inherent in a variety of child-serving sectors will be considered, as well as the conflict resolution practices aimed at resolving tensions between professionals.

CAST 2390 Traumatic Stress in Childhood and Adolescence: 3 semester hours
Same as PSYCH 3290. Prerequisites: PSYCH 2270 (majors) or PSYCH 2268 or ED PSY 2212 or approval from the instructor. This course is an exploration of the biopsychosocial impact of community, family, and individual trauma and stressors experienced during infancy, childhood, and adolescence. It introduces students to relevant theoretical frameworks, cultural considerations, and advocacy strategies.

CAST 4398 Child Maltreatment: A Multidisciplinary Approach: 3 semester hours
Same as PSYCH 4398 and SOC WK 4398. Prerequisites: CAST 3290 or PSYCH 3290 (may be taken concurrently), or consent of instructor. This course, with its interdisciplinary emphasis, focuses on the systemic response to the primary domains of child maltreatment by multidisciplinary teams and child advocacy centers. Risk factors, cultural considerations, and mandated reporting of child abuse and neglect are emphasized. Students will begin to develop professional skills pertaining to child maltreatment, using a variety of experiential learning modalities.

CAST 4498 Forensic Investigation of Child Abuse: 3 semester hours
Prerequisites: CAST 4398 or PSYCH 4398 or SOC WK 4398. This course is designed for students across multiple disciplines where knowledge of child abuse investigation and advocacy is necessary. It focuses on the investigative and prosecutorial responses of multidisciplinary team professionals involved with child abuse cases to expand the student’s knowledge and skills about the most effective response to child abuse investigations. The course also includes critical thinking and competency-based skills training, such as conducting a cursory interview, participating in peer review, making case presentations, and producing investigative documentation.

CAST 4598 Child Abuse Assessment and Intervention: 3 semester hours
Prerequisites: CAST 4398 or PSYCH 4398 or SOC WK 4398. This course provides students from a variety of disciplines with knowledge and skills to intervene effectively and empathically with families who may experience child abuse and neglect. It uses experiential learning to develop critical thinking and skills in trauma-focused screening, assessment, and crisis intervention for vulnerable children and their families who are involved with child serving systems, such as law enforcement, child protective services, prosecution, and physical and mental health.

CAST 4698 Internship in Child Advocacy Studies: 3 semester hours
Prerequisites: CAST 4398 or PSYCH 4398 or SOC WK 4398, CAST 4498 (may be taken concurrently), CAST 4598 (may be taken concurrently), and approval of the CAST director. This course involves an internship in child or youth-serving setting and requires approval from the CAST director prior to enrolling. It must be taken concurrently with the CAST field education seminar (CAST 4700).

CAST 4700 Field Education Seminar in Child Advocacy Studies: 1 semester hour
Prerequisites: Consent of CAST director and concurrent enrollment in an approved CAST field education course. In this course, students will synthesize their learning from the Child Advocacy Studies (CAST) certificate courses with their field experiences.
Chinese

Courses

CHINESE 1001 Chinese I: 5 semester hours
Emphasis is placed upon the understanding, speaking, reading, and writing of Mandarin Chinese and upon the acquisition of the fundamentals of grammar and syntax.

CHINESE 1002 Chinese II: 5 semester hours
Prerequisites: Chinese I or equivalent. Emphasis is placed upon the understanding, speaking, reading, and writing of Mandarin Chinese. Continuation of the acquisition of the fundamentals of grammar and syntax.

CHINESE 1005 Chinese Calligraphy and Writing in East Asia: 1 semester hour
Same as JAPAN 1005. This course is an introduction to the art of Chinese calligraphy and the history and basic features of the writing systems in East Asia (Chinese, Japanese, Korean, Mongolian, Tibetan, etc.). Emphasis is placed on the Chinese script and writing Chinese characters correctly with a calligraphy brush and ink. Students practice writing basic strokes and characters and creating their own calligraphic works.

CHINESE 2101 Intermediate Chinese I: 5 semester hours
Prerequisites: CHINESE 1002 or equivalent. Grammar review and continued development of language skills.

CHINESE 2190 Special Readings: 1-6 semester hours
Prerequisites: CHINESE 2102 or consent of the department. Independent study through readings, reports, and conferences.

CHINESE 2199 Special Topics: Language Immersion: Chinese: 1 semester hour
Prerequisites: CHINESE 2101 or concurrent enrollment in CHINESE 2101. Faculty-led experience designed specifically to enhance acquisition of the target language and culture. This course may be repeated for credit if the topics vary.

Communication

Courses

COMM 1000 Effective Communication for College: 3 semester hours
A communication by objective approach is used to introduce students to effective communication in a college environment. Emphasis is placed on preparing and delivering effective messages whether written or spoken, formal or informal, digital or hardcopy.

COMM 1030 Interpersonal Communication I (MOTR COMM 120): 3 semester hours
Introduction to the theories of interpersonal communication. Emphasis on basic principles involved in one-to-one interactions.

COMM 1040 Introduction to Public Speaking (MOTR COMM 110): 3 semester hours
Theories and techniques of organization, argumentation, persuasion and delivery in public speaking.

COMM 1041 Presentational Speaking: 3 semester hours
Theories and techniques of presenting information in various contexts, formats, and settings. Emphasis is placed on strategic coordination for message effectiveness in a team-based environment.

COMM 1042 Reacting to the Past: Communication: 3 semester hours
This course consists of a series of historical simulations built around key moments and texts from the past. In each simulation, students are assigned a role and develop that character. It offers students a rigorous academic experience in which they conduct historical research and speak extensively. Because this course requires extensive public speaking, it fulfills the core general education requirement for Communication Proficiency.

COMM 1050 Introduction to Mass Communication: 3 semester hours
Introduction to oral, print, and electronic media of communication, including emerging digital formats. The course covers the major theories of mass communication effects as well as the social, organizational, economic, political, and technological factors that shape the creation and reception of mass media messages.

COMM 1150 Introduction to Public Relations: 3 semester hours
This course provides an introduction to contemporary and professional social science principles, processes, and issues involved in the management of communications between an organization and its publics. An emphasis on ethics, law, and professional standards is highlighted.

COMM 1369 Introduction to Health Communication: 3 semester hours
This course introduces the concept of health communication through interpersonal, organizational, and mass media health contexts. Topics may include patient-provider communication, issues of diversity and culture, social support, health entertainment, marketing, HR and PR in health, and careers in health communication.

COMM 1950 Finding an Internship in Communication and Media Fields: 1 semester hour
This course equips Communication majors with the necessary skills to secure an internship or practicum that aligns with their long-term, post-graduation goals. Students will identify internships relevant to their coursework and career goals, create resumes, write cover letters, develop interviewing skills, and more. The concepts of this course prepare students to secure an internship or practicum for the following semester.

COMM 2230 Small Group Communication (MOTR COMM 125): 3 semester hours
Development of communication skills needed in small group decision-making. Application of these skills in contemporary problems.

COMM 2231 Communication in the Organization: 3 semester hours
Course integrates communication theories applicable to the structure and function of organizations. The effect of communication variables on departmental interface, member satisfaction and motivation, leadership and subordinate styles, and perception of the organization by the external environment.

COMM 2235 Professional Communication: 3 semester hours
This course seeks to prepare students to develop and apply the practical communication and self-development skills needed to excel in academic and workplace settings. Topics may include self- and relationship management, communicating effectively in professional settings, and career planning. Students will also become familiar with specific careers in the field of communication and media.

COMM 2240 Persuasive Communication: 3 semester hours
A study of persuasive communication including theories, techniques, forms, functions, applications, potential and limitations for individual and organizations. Insights from both classical rhetoric and contemporary communication theory.
COMM 2332 Intercultural Communication: 3 semester hours
This course examines culture as a variable in both interpersonal and collective communicative situations. There is emphasis placed upon opportunities and problems arising from similarities or differences in communication patterns, processes, and codes among various cultural groups.

COMM 3130 Communication in Family, Dating, and Marriage: 3 semester hours
Prerequisite: COMM 1030. This course examines dating, courtship, and marriage relationships. It focuses on exploring the history and contemporary issues associated with intimate relationships.

COMM 3150 Crisis, Disaster, and Risk Communication: 3 semester hours
Prerequisites: Junior standing or consent of instructor. Course will focus on three specialized areas within public relations: communication methods and infrastructure in relation to large-scale disaster management; organizational crisis communication; and public communication regarding environmental, chemical and other public risk issues.

COMM 3330 Research Methods in Communication I: 3 semester hours
Introduction to the fundamental tools of quantitative research in communication. Focus of the course is on reading and comprehending communication research reports rather than conducting quantitative research.

COMM 3337 Male/Female Communication: 3 semester hours
Prerequisite: Junior standing or consent of instructor. This course explores the influence of gender upon contemporary American communication behavior. Topics include semantic and syntactic variations in male and female speech, gender-role development as process and product of communication, analysis of communication patterns and barriers within gender groups. Mass, public, interpersonal, and dyadic communication contexts are considered.

COMM 3355 Dangerous Messages: 3 semester hours
Prerequisites: Junior standing or consent of instructor. This course examines how communication can be used to promote as well as inhibit societal and individual well-being. Topics include alcohol and tobacco, drugs, sexual behavior, and others pertaining to health and risky behaviors. Stereotyping, diversity in media ownership and content, hate speech, and other topics with implications for the health of citizens individually and as a people may also be covered.

COMM 3368 Advanced Health Communication: 3 semester hours
Prerequisites: COMM 1369 or consent of instructor. This course focuses on how to use communication to promote health across interpersonal, organizational, and mass media contexts. Topics may include crisis communication, health interventions and campaigns, and social marketing among others.

COMM 3370 Social Media in Public Relations: 3 semester hours
Prerequisites: COMM 1150 or MEDIA ST 1100 or consent of instructor. The course presents an overview of how to use social media and blogging in contemporary public relations. Students will also learn how to evaluate and create a social media plan.

COMM 3395 Special Topics in Communication: 3 semester hours
In-depth study of topics pertaining to current research in the department. May be repeated up to six credit hours if topic is different.

COMM 4100 Communication Campaigns: 3 semester hours
Prerequisites: COMM 1150, COMM 2180 and junior standing, or consent of instructor. This course focuses on the design, analysis, and implementation of mass communication-based information campaigns by integrating research and theory from interpersonal communication, mass communication, and public relations. It provides an advanced study of an organization's public relations needs and includes researching the situation, analyzing audiences, and preparing strategic plans for approved clients.

COMM 4199 Applied Strategic Communication: 3-6 semester hours
Prerequisites: Senior standing and consent of instructor; enrollment limited to PR certificate students. This course allows students to gain advanced, practical work experience emphasizing strategic communication skills within a discipline-relevant organization. Work must be done under supervision of a working professional in the field, and in consultation with a faculty member. Proposed sites must be approved by the department. This course may be repeated for a maximum of 6 credit hours.

COMM 4360 Applied Health Communication: 3 semester hours
Prerequisites: Senior standing with at least 12 hours of course work in Communication, consent of instructor; enrollment limited to health communication certificate students. Advanced practical work experience emphasizing communication skills within a health organization. Experiences may include organizational and promotional activities, mass communication, public relations, research and writing, strategic communication, or training and development, all with a health communication focus. Internships are off-campus and proposed sites must be approved by the department. Work must be done under supervision of a working professional in the field, and in consultation with a faculty member.

COMM 4450 Seminar in Fundamental Communication Theory: 3 semester hours
Prerequisites: Senior standing. This course introduces students to the theoretical, methodological, and philosophy of science issues in the discipline of communication. It includes general, micro, contextual, and interdisciplinary (symbiotic) communication theories.

COMM 4600 Seminar in Fundamental Organizational Communication Theory: 3 semester hours
Prerequisites: COMM 2231 and senior standing. This course examines the function of communication in the workplace. Students will learn to evaluate, adapt, and apply various research-supported frameworks for understanding organizational communication and communication processes in organizations. Interpersonal sensitivity, communication skills, and ethical values within organizations are also examined.

COMM 4650 Seminar in Fundamental Interpersonal Communication Theory: 3 semester hours
Prerequisites: COMM 1030 and one 3000-level course from the Interpersonal Communication Emphasis Area. This course examines the theories and research pertaining to interpersonal communication. It introduces students to fundamental theoretical writings and current research literature in the field. They will evaluate, adapt, and apply research findings on several interpersonal communication topics, including information management in interpersonal contexts, relational uncertainty in interpersonal communication, deception detection, new technologies, and dating.
**COMM 4700 Seminar in Fundamental Mass Communication Theory: 3 semester hours**
Prerequisites: COMM 1050 and at least three credit hours of 3000-level courses from the Mass Communication Emphasis Area. This course examines the theories and research pertaining to media industries, content, and users. It introduces students to the fundamental theoretical writings and current research literature in the field. Students will evaluate, adapt, and apply research findings in mass communication topics such as the impact of technology on media content and usage patterns, media effects on society and on individuals, media representation patterns, and the reasons users select particular types of content.

**COMM 4900 Directed Readings: 3 semester hours**
Prerequisite: Consent of instructor. Supervised independent study focused on discipline-relevant content that expands on concepts and theories presented in communication courses. May be repeated for credit.

**COMM 4905 Directed Readings in Health Communication: 3 semester hours**
Prerequisites: Consent of instructor. Supervised independent study focused on discipline-relevant content in health communication that expands on concepts and theories presented in health communication courses. May be repeated once for credit.

**COMM 4910 Supervised Research: 1-3 semester hours**
Prerequisites: Consent of instructor. Supervised field, laboratory, or survey research experience that includes activities such as data collection, literature searches, qualitative or quantitative data analysis, survey or experiment administration, and other research related activities. May be repeated with consent of department.

**COMM 4915 Supervised Research in Health Communication: 1-3 semester hours**
Prerequisites: Consent of instructor. Supervised field, laboratory, or survey research experience in the area of health communication. Includes activities such as data collection, literature searches, qualitative or quantitative data analysis, survey or experiment administration, and other research related activities. May be repeated for up to 6 credit hours total with consent of department.

**COMM 4920 Practicum in Applied Communication: 1-3 semester hours**
Prerequisite: Junior standing, at least 12 hours of course work in Communication, and consent of instructor; open to Communication majors/minors. Practicum work experience with any discipline-relevant unit at UMSL including, but not limited to: the offices of students affairs, public relations, and research administration; the school newspaper or radio station; and intra-departmental activities. Work must be done on campus, under supervision of a working professional in the field, and in consultation with a faculty member. Repeatable, but no more than six hours total credit may be earned in practicum courses toward the 36-hour minimum required for the degree.

**COMM 4950 Internship in Applied Communication: 3-6 semester hours**
Prerequisites: Senior standing with at least 12 hours of course work in Communication, consent of instructor; open to communication majors only. Advanced practical work experience emphasizing communication skills with any discipline-relevant entity. Experiences may include organizational and promotional activities, mass communication, public relations, research and writing, strategic communication, or training and development. Internships are off-campus and proposed sites must be approved by the department. Work must be done under supervision of a working professional in the field, and in consultation with a faculty member. Repeatable, but nor more than six hours total credit may be earned in internship courses toward the 35-hour minimum required for the degree.

**COMM 5000 ACP - Elements of Public Speaking: 3 semester hours**
Prerequisites: Graduate standing, special consent. This course focuses on the delivery of theory and research based public speaking content for teachers seeking certification to teach communication courses for the Advanced Credit Program.

**COMM 5010 ACP: Elements of Debate: 3 semester hours**
Prerequisites: Graduate standing, special consent. This course focuses on developing a comprehensive understanding of the theory and research typically taught in college level forensics and debate courses. Designed for teachers seeking certification to teach communication courses for the Advanced Credit Program.

**COMM 5020 ACP - Persuasion and Influence: 3 semester hours**
Prerequisites: Graduate standing, special consent. This course focuses on developing a strong background in the research and theory that underlies attempts to persuade and influence others through the use of effective communication. Designed for teachers seeking certification to teach communication courses for the Advanced Credit Programs.

**COMM 5050 ACP - Special Topics: 3-6 semester hours**
Prerequisites: COMM 5000, COMM 5010, and COMM 5020, special consent. This rotating topic course focuses on developing knowledge of communication theory and research applicable to the context of teaching public speaking and debate. Topics may include such issues as nonverbal communication, conflict communication, and argumentation, among others. Designed for teachers seeking certification to teach in the Advanced Credit Program. May be repeated for a maximum of 6 credit hours.

**COMM 5099 ACP - Observation and Implementation: 3 semester hours**
Prerequisites: COMM 5000, COMM 5010, COMM 5020 and COMM 5050, special consent. Provides a capstone experience for teachers seeking to teach communication courses in the advanced credit program. While enrolled, participants will implement an ACP course in their school under the supervision of the Communication Department's advanced Credit Program Liaison.

**COMM 6500 Seminar in Communication Theory: 3 semester hours**
Prerequisite: Graduate standing. Examination of the theoretical, methodological, and philosophy of science issues in the discipline of communication. Examines general, micro, contextual, and interdisciplinary (symbiotic) communication theories. Required of all graduate communication students.
COMM 6510 Advanced Communication Research Methods I: 3 semester hours
Prerequisites: Graduate standing. Concerns the logic and forms of communication inquiry including an examination of various communication research and evaluation methods and their theoretical frameworks. Topics include communication research strategy and methodology, scientific process, derivation and test of hypotheses, methods of research design. Provides and orientation to graduate research including proposal development for thesis, internship and paper requirements, and includes a theory-based research project of the student's choice. Required of all graduate communication students.

COMM 6600 Seminar in Strategic Communication in Organizations: 3 semester hours
Prerequisite: Graduate standing. Examines the function of communication in the workplace. Students will study various frameworks for understanding organizational communication, implications of major organizational theories, and strategic communication processes in organizations. Interpersonal sensitivity, communication skills, and ethical values within organizations are also examined.

COMM 6630 Seminar in Interpersonal Communication: 3 semester hours
Prerequisites: Graduate standing. This course examines the theories and research pertaining to interpersonal communication. Students will evaluate, adapt, apply, and formulate theory and research findings to several interpersonal communication topics, including information management in interpersonal contexts, relational uncertainty in interpersonal communication, deception detection, new technologies, and dating.

COMM 6700 Seminar in Mass Communication: 3 semester hours
Prerequisites: Graduate Standing. Examines the theories and research pertaining to media industries, content, and users. Topics include the impact of technology on media content and usage patterns, media effects on society and on individuals, media representation patterns, and the reasons users select particular types of content.

COMM 6800 Seminar in Health Communication: 3 semester hours
Prerequisites: Graduate Standing. Examines the theories that researchers use to investigate health communication phenomena, as well as the application of those theories to understanding and enhancing health. Course topics include health campaigns and interventions, patient-provider communication, and cultural perceptions of health.

COMM 6830 Seminar in Special Topics in Communication: 3 semester hours
Prerequisite: Graduate standing. Selected topics in the study of communication. Review of the communication theory and methods appropriate to the topic. The course includes a research project. May be repeated if the topic is different.

COMM 6900 Directed Readings in Communication: 1-6 semester hours
Prerequisite: Graduate standing and consent of instructor. Independent study of published research and reports relating to a specific topic in communication. May be repeated for credit with permission of advisor.

COMM 6910 Supervised Research in Communication: 1-3 semester hours
Prerequisites: Graduate standing and consent of instructor. Primary research on specific topics in communication. May involve collaborative research with a faculty member on a topic of mutual interest or data collection/analysis for a project developed by the student under the guidance of a faculty member. May be repeated for credit with permission of advisor.

COMM 6920 Practicum in Computer-Mediated Communication: 1-3 semester hours
Prerequisites: Graduate standing and consent of program director. Applied practice or research in collaboration with a faculty member.

COMM 6950 Graduate Internship: 3-6 semester hours
Prerequisites: Graduate standing and approval of graduate coordinator. Individual on-site internship in organizational or mass communication. May be repeated.

COMM 6960 Thesis Research and Preparation: 1-10 semester hours
Prerequisites: Graduate standing and consent of instructor. Individual research for and preparation of the graduate thesis.

Computer Science

Courses

CMP SCI 1000 Computer Science Experiences: 1 semester hour
This course is for recently declared undergraduate students majoring in Computer Science or Computing Technology. Topics may include resources that are available on campus and in the department, career opportunities, choosing the right degree, and exploration of concepts, skills and practices that are essential for successful careers. This course should be taken by freshmen and transfers within the first two semesters of declaring the major.

CMP SCI 1011 Introduction to the Internet and World Wide Web: 3 semester hours
Intended for any student wishing to utilize the Internet and World Wide Web more effectively. Topics include networking basics, the Internet and World Wide Web, browsers, search engines, Web Services, utilities, tools, online privacy and security. Students will learn to develop a personal web page using skills acquired in the course.

CMP SCI 1012 Learning to Program Using Virtual Worlds: 3 semester hours
Introduces modern programming principles without requiring the knowledge of a traditional programming language. Instead, this course utilizes a novel graphical approach that enables the student to create, populate, and manipulate virtual 3-dimensional worlds which resemble video games. The development of these worlds allows students to gain direct experience and skills in using computers to solve problems. Students will create worlds of varying complexity.

CMP SCI 1250 Introduction to Computing: 3 semester hours
Prerequisites: MATH 1030 with a B- or better, or MATH 1045 with B- or better, or MATH 1100 (can be taken concurrently), or MATH 1800 (can be taken concurrently), or a 70% on the proctored UMSL Math Placement obtained at most one year prior to enrollment in this course. This course provides an introduction to the concepts of computation, problem solving, and computer systems. It covers topics such as, fundamental programming constructs, basic data types, and modularization using a modern high level language. Problem solving skills are developed through a progression of programming projects.

CMP SCI 2250 Programming and Data Structures: 3 semester hours
Prerequisite: CMP SCI 1250. Continuation of CMP SCI 1250. Discusses properties and implementation of abstract data types such as lists, trees, stacks and queues. Introduces procedural and class abstraction, basic program architecture, use of interfaces, modular programming, and file processing.
CMP SCI 2261 Object-Oriented Programming: 3 semester hours
Prerequisite: CMP SCI 2250. Introduces object-oriented concepts, terminology, and notation (UML) using Java. Covers encapsulation, classes, objects, inheritance, and the use of class libraries. Additional topics may include graphical user interfaces, applets, and related tools and technologies.

CMP SCI 2700 Computer Organization and Architecture: 3 semester hours
Prerequisites: CMP SCI 2250 (can be taken concurrently). This course introduces details of computer systems from architectural and organizational points of view. It covers data representation, basic digital logic circuits, memory types and hierarchies, I/O and storage devices, CPU architectures such as RISC, CISC, parallel, and multi-core.

CMP SCI 2750 System Programming and Tools: 3 semester hours
Prerequisites: CMP SCI 2250 and CMP SCI 2700 (CMP SCI 2700 can be taken concurrently). This course covers systems programming, scripting, libraries, utilities, and development tools. Additional programming topics include piping, binary files, exception handling, command-line arguments and symbolic debugging. This course also explores tools available in the Unix/Linux environments.

CMP SCI 3010 Web Programming: 3 semester hours
Prerequisites: CMP SCI 2261 (can be taken concurrently) or INFSYS 3806. This course provides a comprehensive overview of website development using prevalent LAMP stack architecture. Students will create well-structured, easily maintained, standards-compliant, accessible client-side code (HTML, CSS, JavaScript) in addition to server-side code (PHP and Python). Client-server computing projects are a course requirement. Students leave the course knowing how client-side code, server-side code, web servers, and databases function together.

CMP SCI 3130 Design and Analysis of Algorithms: 3 semester hours
Prerequisites: CMP SCI 2250, MATH 1320, and MATH 3000. This course addresses the design and analysis of fundamental algorithms in computer science. Studies basic sorting algorithms, priority queues, order statistics, search trees, and hash tables. Analysis techniques may involve time and space complexity analysis of both iterative and recursive algorithms, analysis of algorithm correctness, and amortized complexity analysis. Additional topics may include data compression, string manipulation, greedy algorithms, dynamic programming, and graph traversal.

CMP SCI 3200 .NET Framework: 3 semester hours
Prerequisites: CMP SCI 3010. This course introduces the .NET framework and related languages and technologies. Topics will include Visual Studio and C# for OOP and web applications. Additional topics may include ASP.NET with MVC, data access, and windows communication.

CMP SCI 3410 Video Game Design and Development: 3 semester hours
Prerequisites: CMP SCI 2261. This course covers major aspects of the design and development of video games, including world/level design, game UI design, game character design, game engine programming, 2D/3D modeling and rendering, game physics and animation. This is a project-based course in which students learn to apply acquired knowledge and skills to building a video game in a team environment.

CMP SCI 3702 Introduction to Cyber Threats and Defense: 3 semester hours
Prerequisites: CMP SCI 2250. This course introduces the importance of cybersecurity and covers its various components. Topics may include different types of malware, phishing, password attacks, spoofing, efficient encryption algorithms, firewalls, intrusion prevention/detection systems, and honeypots. Credit cannot be granted for both CMP SCI 3702 and CMP SCI 5702.

CMP SCI 3780 Software Security: 3 semester hours
Prerequisites: CMP SCI 2261, CMP SCI 2750, and CMP SCI 3010. This course introduces the basic software security principles and pitfalls, including topics such as buffer, integer and string problems, runtime errors, SQL and command injection. Additional topics may include data protection, secure file access, password and network security.

CMP SCI 3990 Undergraduate Internship: 1-3 semester hours
Prerequisites: Consent of instructor. This course is a computer science internship that provides a student field experience in an organization related to the profession. To be enrolled, students must be employed in an internship or co-op program and find an instructor to supervise the experience. Internship activities may vary by site, but will often require end-of-semester reporting. Typically 1 credit can be earned for about 100 work hours. A maximum of 3 credit hours of CMP SCI 3990 can be counted as major electives and a maximum of 6 credit hours of CMP SCI 3990 and CMP SCI 4880 combined can be counted as major electives.

CMP SCI 4010 Advanced Web Development with Java: 3 semester hours
Prerequisites: CMP SCI 3010 and either CMP SCI 2261 or INFSYS 3806; or graduate standing. This course covers more advanced Java topics, along with related concepts and technologies for Web development. Topics may include database connectivity, multi threading, security, networking, MVC pattern, testing and source control for Java applications, and server-side topics such as servlets and web servers.

CMP SCI 4011 Web Development with Advanced JavaScript: 3 semester hours
Prerequisites: CMP SCI 3010. This course provides a comprehensive overview of website development using the modern MEAN (MongoDB, Express.js, Angular, Node.js) stack architecture. Students will create web applications that make use of today's modern JavaScript engine. Other topics may include React, Sass (Syntactically awesome style sheets), and Pug template engine.

CMP SCI 4012 Introduction to Enterprise Web Development: 3 semester hours
Prerequisites: CMP SCI 4010. This course covers design and implementation issues for enterprise web development, and some popular advanced technologies. Topics include MVC and persistence frameworks, such as Spring and Hibernate. Other topics may include Java Web services, EJB, messaging standards such as JMS, and Java EE design patterns. Students will develop enterprise-level web application projects. Credit cannot be earned for both CMP SCI 4012 and CMP SCI 5012.

CMP SCI 4020 Introduction to Android Apps: Android Fundamentals: 3 semester hours
Prerequisite: CMP SCI 2261. This course covers the fundamental programming principles, software architecture, and user experience considerations underlying handheld software applications and their development environments. The course involves in-depth, hands-on examples that are implemented on the Android Platform, along with discussions of security. Credit can not be granted for both CMP SCI 4020 and CMP SCI 5020.

CMP SCI 4030 Introduction to Intelligent Web: 3 semester hours
Prerequisites: CMP SCI 3010 and CMP SCI 3130. This course covers the application of artificial intelligence and other modern techniques to help construct, navigate, and experience the Web. Topics may include retrieval models, classification, mining, association, topology, and indexing algorithms such as PageRank and HITS. Credit cannot be earned for both CMP SCI 4030 and CMP SCI 5030.
**CMP SCI 4200 Python for Scientific Computing and Data Science: 3 semester hours**

Prerequisites: CMP SCI 1250 and (MATH 1100 or MATH 1800) and (ANTHRO/SOC 3220 or BIOL 4122 or CRIMIN 2220 or ECON 3100 or MATH 1320 or POL SCI 3000 or PSYCH 2201). This course covers programming using the Python language and related libraries. The course explores problem solving using Python's support of procedural, object-oriented, and functional approaches to programming. Topics may include NumPy arrays, visualization, Pandas DataFrames, and selected functions from statistical and scientific packages.

**CMP SCI 4220 Introduction to iOS Programming and Apps: 3 semester hours**

Prerequisites: CMP SCI 2261 or INFSYS 3806 or graduate standing. This course will use Swift for building iOS apps. It also introduces Xcode, Interface Builder, basic design patterns like MVC and delegation, and core libraries for Swift and iOS. Additional topics may include network communication, data persistence, basic animation, and mapping. This is a project-oriented class that will require significant use of a Mac with Xcode installed.

**CMP SCI 4222 IOS Apps: 3 semester hours**

Prerequisites: CMP SCI 4220 or consent of the instructor. This course focuses on building more sophisticated iOS apps. May include networking such as web services, Bluetooth and wifi connectivity, graphics and animation in 2-d and 3-d, autolayouts, OpenGL, advanced data sources such as plist and core data, source control and unit testing. May also discuss security topics. Credit not granted for both CMP SCI 4222 and CMP SCI 5222.

**CMP SCI 4250 Programming Languages: 3 semester hours**

Prerequisites: CMP SCI 2261 and CMP SCI 3010, or graduate standing. This course studies the principles, approaches, and trade-offs in modern programming languages, including a comparative study of syntax, semantics, and pragmatics. It also examines major programming paradigms: object-oriented, imperative, functional and logic.

**CMP SCI 4280 Program Translation Project: 3 semester hours**

Prerequisites: CMP SCI 2700, CMP SCI 2750, CMP SCI 3130, and CMP SCI 4250, or graduate standing. This course uses program translation as an example of a complex task, and focuses on managing and developing solutions for such complex programming tasks using modular incremental development and testing while applying proper standards. Translation topics may include finite automata, BNF, language semantics, and various translation models.

**CMP SCI 4300 Introduction to Artificial Intelligence: 3 semester hours**

Prerequisites: CMP SCI 3130. This course provides an introduction to artificial intelligence. The list of topics may include search, planning, knowledge-based reasoning, probabilistic inference, machine learning, natural language processing, and practical applications. Credit cannot be granted for both CMP SCI 4300 and CMP SCI 5300.

**CMP SCI 4320 Introduction to Evolutionary Computation: 3 semester hours**

Prerequisites: CMP SCI 2261, CMP SCI 2750 and CMP SCI 3130. This course introduces the concepts of nature-inspired problem solving with artificial evolution using selection, crossover, mutation and inheritance. It discusses applications of evolutionary algorithms, overviews the existing models and instances, and analyzes specific instances such as genetic algorithms, evolutionary programming, evolution strategies, and genetic programming. Credit not granted for both CMP SCI 4320 and CMP SCI 5320.

**CMP SCI 4340 Introduction to Machine Learning: 3 semester hours**

Prerequisites: CMP SCI 4342, or CMP SCI 2261 and CMP SCI 3130, or consent of instructor. This course provides an introduction to machine learning principles, algorithms and applications. Topics may include computational learning theory, VC Dimension, generalization, classification, regression, regularization, validation, and reinforcement learning. Credit cannot be granted for both CMP SCI 4340 and CMP SCI 5340.

**CMP SCI 4342 Introduction to Data Mining: 3 semester hours**

Prerequisites: CMP SCI 4200, or CMP SCI 2261 and CMP SCI 3130. This course provides an introduction to data mining principles, algorithms, and applications. Topics may include data preprocessing, data transformation, similarity and dissimilarity measures, data representation, classification techniques, association analysis, cluster analysis, and anomaly detection. Credit cannot be granted for both CMP SCI 4342 and CMP SCI 5342.

**CMP SCI 4370 Introduction to Biological Data Science: 3 semester hours**

Prerequisites: CMP SCI 3130 or consent of instructor. This course focuses on image analysis and visual perception. Relevant background topics in genetics, current issues, and a variety of available resources will be explored. Upon successful completion of this course, the student will be able to evaluate algorithms for analyzing genetic data, including assessments of sources of errors and analysis of time and space complexity; address shortcomings in existing approaches; and implement efficient and effective software for exposing information hidden in genetic data. Credit cannot be granted for both CMP SCI 4370 and CMP SCI 5370.

**CMP SCI 4390 Introduction to Deep Learning: 3 semester hours**

Prerequisites: CMP SCI 3130 or consent of instructor. This course introduces mathematical foundations for deep learning, and follows with practical applications using selected domains such as image classification or protein predictions. It also covers dense neural networks, convolutional neural networks, recurrent neural networks, and other state-of-the-art networks. Credit cannot be granted for both CMP SCI 4390 and CMP SCI 5390.

**CMP SCI 4410 Introduction to Computer Graphics: 3 semester hours**

Prerequisites: CMP SCI 2250 and MATH 2450. This course covers the theoretical foundation and algorithms for computer graphics. Students learn the basics of graphics programming for modeling, rendering, and animation of 2D and 3D objects, using standard graphics API. A brief discussion of special graphics hardware, such as GPU, may be included. Credit cannot be granted for both CMP SCI 4410 and CMP SCI 5410.

**CMP SCI 4420 Introduction to Digital Image Processing and Computer Vision: 3 semester hours**

Prerequisites: MATH 1900, MATH 2450, CMP SCI 2750, and CMP SCI 3130. This course focuses on image analysis and visual perception. Students learn data structures and algorithms for image processing, region and texture analysis, image filtering, edge detection, contour following, and image enhancement in both spatial and frequency domain. Other topics may include color processing, coding for storage, retrieval, transmission, and image restoration. Credit cannot be granted for both CMP SCI 4420 and CMP SCI 5420.
**CMP SCI 4500 Introduction to the Software Profession: 3 semester hours**
Prerequisites: CMP SCI 2261, CMP SCI 3010, and MATH 3000. This course focuses on software development and on the skills required for success in the software profession. Topics related to software development may include software process, models and views, software architectures, documentation, and testing strategies. Topics related to the profession may include ethics, licensing, copyright, trademarks, and professional conduct. Individual and group projects, research, and presentations may be required in this capstone course.

**CMP SCI 4520 Introduction to Object-Oriented Analysis and Design: 3 semester hours**
Prerequisites: CMP SCI 2261 and CMP SCI 3130. This course covers object-oriented development, using UML and following an agile process. It discusses elements of analysis, requirements, design, implementation and deployment, such as use cases, static and dynamic models, patterns, and frameworks. This course includes a semester long project. Credit not granted for both CMP SCI 4520 and CMP SCI 5520.

**CMP SCI 4610 Database Management Systems: 3 semester hours**
Prerequisites: CMP SCI 3010 and MATH 3000; or graduate standing. This course focuses on database theory and applications, with emphasis on the relational model. Topics include database design, modeling, file systems, indexing, integrity constraints, relational algebra, normalization, transaction processing, and concurrency control. Students are exposed to emerging DBMS technologies and applications. Several programming projects will be required using a popular SQL server.

**CMP SCI 4700 Computer Forensics: 3 semester hours**
Prerequisites: CMP SCI 2750 and CMP SCI 3010; or graduate standing. This course explores topics and methodologies for examining digital evidence, along with some principles of the investigative process. Includes memory, file system, operating system, network, and mobile device forensics. This course addresses both theory and hands-on aspects for conducting digital forensic examinations.

**CMP SCI 4730 Computer Networks and Communications: 3 semester hours**
Prerequisites: CMP SCI 2750 and MATH 1320, or graduate standing. The course provides an understanding of computer network fundamentals, design, management and security through the layered Internet architecture and the TCP/IP protocol stack. The topics may include common networking techniques and protocols, as well as more advanced concepts like cloud computing, software-defined networks, and virtual network functions.

**CMP SCI 4732 Introduction to Cryptography for Computer Security: 3 semester hours**
Prerequisites: MATH 1100 or MATH 1800 or consent of instructor. This course provides an introduction to cryptography as it applies to computer security. It describes modern cryptographic systems and potential attacks on against these systems. Topics may include both symmetric and asymmetric encryption algorithms, authentication, key exchange protocols, onion networks and blockchain technology, as well as potential attacks on these systems. Credit cannot be granted for more than one of CMP SCI 4732, CMP SCI 4780, and CMP SCI 5732.

**CMP SCI 4740 Introduction to High Performance Computing: 3 semester hours**
Prerequisites: CMP SCI 2750 and CMP SCI 3130. This course introduces algorithms for multiprocessor and multi-core architectures. Students learn the models of modern parallel computation and techniques to take advantage of parallel architectures for distributed and shared memory multi-processor architectures. Credit not granted for both CMP SCI 4740 and CMP SCI 5740.

**CMP SCI 4745 Introduction to Cloud Computing: 3 semester hours**
Prerequisites: CMP SCI 2750. This course provides an introduction to development and deployment of applications in the cloud space. Touches on different aspects of cloud computing such as IaaS, PaaS, and SaaS. Includes significant discussion on legal and security aspects of clouds in the marketplace. May also include public, private, and hybrid clouds, and Internet of Things. Credit not granted for both CMP SCI 4750 and CMP SCI 5750.

**CMP SCI 4740 Operating Systems: 3 semester hours**
Prerequisites: CMP SCI 2750 and CMP SCI 3130; or graduate standing. This course covers the structure of a generic operating system, considering in detail the algorithms for interprocess communication, process scheduling, resource management, memory management, file systems, and device management. It presents examples from contemporary operating systems and requires practical projects implemented within a modern operating system or simulator environment.

**CMP SCI 4750 Computer and Network Security: 3 semester hours**
Prerequisites: CMP SCI 2750 and CMP SCI 3010; or graduate standing. This course provides a broad overview of computer and network security technologies and concerns from multiple perspectives, such as cryptography, Public Key Infrastructures (PKI), hashes and message digests, computer viruses and malware, email security, TCP/IP security, IPSec, Secure Socket Layer (SSL), Transport Layer Security (TLS), Virtual Private Networks (VPN), Firewall, AAA (Authentication, Authorization, Accounting), wireless and mobile systems security, secure identifications (IDs), cloud security, privacy and integrity, network attacks, system monitoring, and Intrusion Detection System (IDS). Management and human factors related to security will also be discussed.

**CMP SCI 4780 Computer and Network Security: 3 semester hours**
Prerequisites: CMP SCI 2750 and CMP SCI 3010; or consent of instructor. This course provides an overview of the cybersecurity profession and the various domains associated with it. Students will be introduced to various information risk management concepts and how it is interconnected to cybersecurity. A broad range of cybersecurity domains will be discussed along with practical applications of information risk management. Additional topics may include labs in select cybersecurity domains. Credit can not be granted for both CMP SCI 4782 and CMP SCI 5782.

**CMP SCI 4782 Information Security: 3 semester hours**
Prerequisites: CMP SCI 2750 and, CMP SCI 3702 or INFYSYS 3848, or consent of instructor. This course provides an overview of the cybersecurity profession and the various domains associated with it. Students will be introduced to various information risk management concepts and how it is interconnected to cybersecurity. A broad range of cybersecurity domains will be discussed along with practical applications of information risk management. Additional topics may include labs in select cybersecurity domains. Credit can not be granted for both CMP SCI 4782 and CMP SCI 5782.

**CMP SCI 4782 Information Security: 3 semester hours**
Prerequisites: CMP SCI 2750 and, CMP SCI 3702 or INFYSYS 3848, or consent of instructor. This course provides an overview of the cybersecurity profession and the various domains associated with it. Students will be introduced to various information risk management concepts and how it is interconnected to cybersecurity. A broad range of cybersecurity domains will be discussed along with practical applications of information risk management. Additional topics may include labs in select cybersecurity domains. Credit can not be granted for both CMP SCI 4792 and CMP SCI 5792.
**CMP SCI 4794 Introduction to Security of IoT Systems: 3 semester hours**
Prerequisites: CMP SCI 4730 or consent of instructor. This course covers the cutting-edge techniques on the emerging edge cloud and wireless/mobile Internet of Things (IoT) systems. It covers the IoT reference architecture, integrated IoT security architecture, major threats and vulnerabilities with the IoT devices and edge cloud, and defense mechanisms. It includes hands-on labs on both the vulnerabilities and defense of the systems. Credit cannot be granted for both CMP SCI 4794 and CMP SCI 5794.

**CMP SCI 4880 Individual Studies in Computer Science: 1-3 semester hours**
Prerequisites: Consent of instructor. This course allows a student to pursue individual studies under the supervision of a faculty member. Topics may include learning new technology, software development, or participation in research activities. Students must arrangements for an instructor to supervise their work. A maximum of 6 credit hours of CMP SCI 3990 and CMP SCI 4880 combined can be counted as major electives.

**CMP SCI 4890 Topics in Computer Science: 3 semester hours**
Prerequisites: Consent of the Instructor. This course covers a special topic in computer science to be determined by recent developments in the field and the interests of the instructor. This course may be taken for credit more than once so long as the topic discussed in each semester is different.

**CMP SCI 5012 Enterprise Web Development: 3 semester hours**
Prerequisites: CMP SCI 4010 or consent of instructor. Covers design and implementation issues for enterprise web development, and some popular advanced technologies. Topics include MVC and persistence frameworks, such as Spring and Hibernate. Other topics may include Java Web services, EJB, messaging standards such as JMS, and Java EE design patterns. Students will develop enterprise-level web application projects. Credit cannot be earned for both CMP SCI 4012 and CMP SCI 5012.

**CMP SCI 5020 Android Apps: Android Fundamentals: 3 semester hours**
Prerequisite: Graduate standing. This course covers fundamental programming principles, including software architecture and user experience considerations, which underlie handheld software applications and their development environments. The course involves in-depth, hands-on examples that are implemented on the Android Platform, along with discussions of security. Credit is not granted for both CMP SCI 4020 and CMP SCI 5020.

**CMP SCI 5030 Intelligent Web: 3 semester hours**
Prerequisite: Graduate standing. This course covers the application of artificial intelligence and other modern techniques to help construct, navigate, and experience the Web. Topics may include retrieval models, classification, mining, association, topology, and indexing algorithms such as PageRank and HITS. Credit cannot be earned for both CMP SCI 4030 and CMP SCI 5030.

**CMP SCI 5130 Advanced Data Structures and Algorithms: 3 semester hours**
Prerequisites: Graduate standing in Computer Science. This course covers the design of efficient data structures and algorithms, as well as an advanced analysis of the time and space complexities of iterative and recursive algorithms. Student will learn a variety of techniques including dynamic programming, greedy algorithms, various graph algorithms, and NP-completeness and approximation algorithms.

**CMP SCI 5222 Advanced iOS Apps: 3 semester hours**
Prerequisites: CMP SCI 4220 or consent of instructor. Focuses on building sophisticated apps using iOS. Will cover recent developments in networking such as web services, Bluetooth and wifi connectivity, graphics and animation in 2-d and 3-d, autolayouts, OpenGL, advanced data sources such as plist and core data, source control and unit testing. May also discuss security topics. Credit not granted for both CMP SCI 4222 and CMP SCI 5222.

**CMP SCI 5300 Artificial Intelligence: 3 semester hours**
Prerequisites: Graduate standing. This course provides an introduction to artificial intelligence. The list of topics may include search, planning, knowledge-based reasoning, probabilistic inference, machine learning, natural language processing, and practical applications. Credit cannot be granted for both CMP SCI 4300 and CMP SCI 5300.

**CMP SCI 5320 Evolutionary Computation: 3 semester hours**
Prerequisites: Graduate standing in Computer Science. This course introduces the concepts of nature-inspired problem solving with artificial evolution using selection, crossover, mutation and inheritance. It discusses applications of evolutionary algorithms, overview the existing models and instances, and analyzes specific instances such as genetic, evolutionary programming, evolutionary strategies, and genetic programming. Credit cannot be granted for both CMP SCI 4320 and CMP SCI 5320.

**CMP SCI 5340 Machine Learning: 3 semester hours**
Prerequisites: Graduate standing in Computer Science/Cybersecurity (Computer Science option) or CMP SCI 4342 or CMP SCI 5342 or consent of the instructor. This course provides an introduction to machine learning principles, algorithms and applications. Topics may include computational learning theory, VC dimensions, generalization, classification, regression, regularization, validation, and reinforcement learning. Credit cannot be granted for both CMP SCI 4340 and CMP SCI 5340.

**CMP SCI 5342 Data Mining: 3 semester hours**
Prerequisites: Graduate standing in Computer Science/Cybersecurity (Computer Science option) or consent of the instructor. This course provides an introduction to data-mining principles, algorithms, and applications. Topics may include data preprocessing, data transformation, similarity and dissimilarity measures, data representation, classification techniques, association analysis, cluster analysis, and anomaly detection. Credit cannot be granted for both CMP SCI 4342 and CMP SCI 5342.

**CMP SCI 5370 Biological Data Science: 3 semester hours**
Prerequisites: Graduate standing in Computer Science or consent of instructor. This course provides an introduction into several key areas of biological data science, with a focus upon genetic data. Relevant background topics in genetics, current issues, and a variety of available resources will be explored. Upon successful completion of this course, the student will be able to evaluate algorithms for analyzing genetic data, including assessments of sources of errors and analysis of time and space complexity; address shortcomings in existing approaches; and implement efficient and effective software for exposing information hidden in genetic data. Credit cannot be granted for both CMP SCI 4370 and CMP SCI 5370.

**CMP SCI 5390 Deep Learning: 3 semester hours**
Prerequisites: Graduate standing in Computer Science. This course reviews a typical machine learning recipe, mathematical foundations for deep learning, and provides an introduction to deep learning. Topics include dense neural networks, convolutional neural networks, and recurrent neural networks. The course will cover building, training, and using deep neural networks for solving various machine learning problems like image classification and protein contact prediction. Credit cannot be granted for both CMP SCI 4390 and CMP SCI 5390.
**CMP SCI 5410 Computer Graphics: 3 semester hours**
Prerequisites: Graduate standing in Computer Science. This course covers the theoretical foundation and algorithms of computer graphics. Students learn the basics of graphics programming for modeling, rendering, and animation of 2D and 3D objects, using standard graphics API. A brief discussion of special graphics hardware, such as GPU, may be included. Credit cannot be granted for both CMP SCI 4410 and CMP SCI 5410.

**CMP SCI 5420 Digital Image Processing and Computer Vision: 3 semester hours**
Prerequisites: Graduate standing in Computer Science. This course focuses on image analysis and visual perception. Students will learn data structures and algorithms for image processing, region and texture analysis, image filtering, edge detection, contour following, and image enhancement in both spatial and frequency domain. Other topics may include color processing, coding for storage, retrieval, transmission, and image restoration. Credit cannot be granted for both CMP SCI 4420 and CMP SCI 5420.

**CMP SCI 5500 Software Engineering: 3 semester hours**
Prerequisite: Graduate standing. Introduces software engineering as a discipline, discusses stages of the software life cycle, compares development models such as waterfall, prototyping and incremental/iterative, covers requirements analysis, effort and cost estimation, compares structured and object-oriented analysis and design methods. Discusses verification/validation, quality assurance, software reliability, testing methods, maintenance, documentation, project management and team structure, metrics, and available tools.

**CMP SCI 5420 Digital Image Processing and Computer Vision: 3 semester hours**
Prerequisites: Graduate standing in Computer Science. This course covers object-oriented development, illustrated with a visual modeling language and following an agile process. Discusses elements of analysis, requirements, design, implementation, and deployment such as use cases, static and dynamic diagrams, patterns, and frameworks. This course includes a semester long project starting with requirements and culminating with deployment. Credit not granted for both CMP SCI 4520 and CMP SCI 5520.

**CMP SCI 5620 Intelligent Information Retrieval: 3 semester hours**
Prerequisites: CMP SCI 4300 or CMP SCI 5300. This course studies techniques for analysis of information by statistical, syntactical, and logical methods. Topics related to multimedia information are also discussed.

**CMP SCI 5700 Computer Systems: 3 semester hours**
Prerequisite: Graduate standing in Computer Science. This course focuses on parallel computing architectures, including RISC, pipelining, vector processing, SIMD, MIMD, and array processing. It introduces different memory and I/O subsystems, hardware description languages, and it demonstrates performance enhancement using different architectures studied.

**CMP SCI 5702 Cyber Threats and Defense: 3 semester hours**
Prerequisites: Graduate standing. This course introduces the importance of cybersecurity and covers its various components. Topics may include different types of malware, phishing, password attacks, spoofing, efficient encryption algorithms, firewalls, intrusion prevention/detection systems, and honeypots. Credit cannot be granted for both CMP SCI 3702 and CMP SCI 5702.

**CMP SCI 5732 Cryptography for Computer Security: 3 semester hours**
Prerequisites: Graduate standing. This course provides an introduction to cryptography as it applies to computer security. It describes cryptographic code-making and code-breaking, and how they are integrated within larger security systems. Topics include symmetric encryption algorithms like AES, asymmetric encryption using prime number factorization and elliptic curves, message authentication codes, key exchange protocols and attacks on all these systems. Additional topics may include onion networks and blockchain technology, as well as possible attacks on those systems. Credit cannot be granted for more than one of CMP SCI 4732, CMP SCI 4780, and CMP SCI 5732.

**CMP SCI 5740 High Performance Computing: 3 semester hours**
Prerequisite: Graduate Standing in Computer Science. This course introduces algorithms for multiprocessor and multi-core architectures. Students learn the models of modern parallel computation and techniques to take advantage of parallel architectures for distributed and shared memory multi-processor architectures. Credit not granted for both CMP SCI 4740 and CMP SCI 5740.

**CMP SCI 5750 Cloud Computing: 3 semester hours**
Prerequisites: Graduate standing. Provides an introduction to development and deployment of applications in the cloud space. Touches on different aspects of cloud computing such as IaaS, PaaS, and SaaS. Includes significant discussion on legal and security aspects of clouds in the marketplace. May also include public, private, and hybrid clouds, and Internet of Things. Credit not granted for both CMP SCI 4750 and CMP SCI 5750.

**CMP SCI 5782 Advanced Information Security: 3 semester hours**
Prerequisites: CMP SCI 5702 or INFYS 6828 or consent of instructor. This course provides an overview of the cybersecurity profession and the various domains associated with it. Students will be introduced to various information risk management concepts and how they are interconnected to cybersecurity. A broad range of cybersecurity domains will be discussed along with their practical applications in information risk management. Additional topics may include labs in select cybersecurity domains to further the learning process. Credit cannot be granted for both CMP SCI 4782 and CMP SCI 5782.

**CMP SCI 5792 Mobile Computing, Networking, and Security: 3 semester hours**
Prerequisites: CMP SCI 5702 or INFYS 6828 or consent of instructor. This course introduces fundamental concepts of mobile wireless networks, mobile edge computing, and security measures at the edge. It discusses challenges related to mobile edge computing systems in general and may include topics such as crowdsourcing/crowdsensing systems, Quality of Experience (QoE) in real-time mobile services, Internet of Things, scalability, secure and verifiable computing, and vehicular and autonomous driving networks. Credit not granted for both CMP SCI 4792 and CMP SCI 5792.

**CMP SCI 5794 Security of IoT Systems: 3 semester hours**
Prerequisites: CMP SCI 4730 or consent of the department. This course covers the cutting-edge techniques on the emerging edge cloud and wireless/mobile Internet of Things (IoT) systems. It covers the IoT reference architecture, integrated IoT security architecture, major threats and vulnerabilities with the IoT devices and edge cloud, and defense mechanisms. It includes hands-on labs on both the vulnerabilities and defense of the systems. Credit cannot be granted for both CMP SCI 4794 and CMP SCI 5794.
CMP SCI 5870 Computer Science Seminar: 1-3 semester hours
Prerequisites: Graduate standing. This is a seminar on various topics. Substantial student reading and participation is expected. It may be taken more than once for credit with the consent of the department.

CMP SCI 5880 Computer Science Independent Project: 1-3 semester hours
Prerequisites: Graduate standing and consent of instructor. This course offers the student an opportunity to work on a supervised project, individually or in a group. A maximum of 6 hours can be counted toward the M.S. in Computer Science program from a combination of CMP SCI 5880, CMP SCI 5900, and CMP SCI 6900.

CMP SCI 5888 Cybersecurity Capstone: 3 semester hours
Prerequisites: INFSYS 6828 and one of either INFSYS 6858 or CMP SCI 5782. This course provides students an opportunity to participate in the full cybersecurity lifecycle in an applied setting using a project-based approach. Students from technical and non-technical backgrounds will work together in teams. Major tasks may include creating an information security management plan, conducting risk assessments, implementing technical and administrative controls to mitigate information security risks, and managing security operations with a focus on incident detection and response. Students may work on projects through an actual organization and demonstrate application of knowledge gained through all prior courses in the degree program. This course must be taken the last semester prior to graduation. Cannot receive credit for CMP SCI 5888 and INFSYS 6888.

CMP SCI 5890 Topics in Computer Science: 1-3 semester hours
Prerequisites: Graduate standing. This course offers various topics not offered on a regular basis. This course may be taken for credit more than once so long as the topic discussed in each semester is different.

CMP SCI 5900 Graduate Internship in Computer Science: 1-3 semester hours
Prerequisites: Consent of instructor. This course is an internship that provides a student field experience in an organization related to the profession. To be enrolled, students must be employed in an internship or co-op program. If an instructor is not named, the student must find an instructor to supervise the internship. Internship activities may vary by site, but will require some reporting. Typically 1 credit can be earned for about 100 work hours. Only up to 3 hours total can be counted toward the M.S. in Computer Science program, and at most 6 hours can be counted from a combination of CMP SCI 5880, CMP SCI 5900, and CMP SCI 6900.

CMP SCI 6320 Advances in Evolutionary Computation: 3 semester hours
Prerequisites: CMP SCI 5320. This course focuses on some advanced topics in genetic and evolutionary computation (both theory and applications). Topics may include genetic algorithm variants, intelligent metaheuristics, evolutionary machine learning, differential evolution, swarm intelligence, learning classifier systems, and Markov models. A substantial part of the course will be based on selected topics from recent literature. This is a project-based course, with the project typically involving literature search and conducting and reporting research. Projects may involve developing specific applications or implementing a specific model.

CMP SCI 6340 Genetic Programming: 3 semester hours
Prerequisites: CMP SCI 5320. This course provides an in-depth exploration of Genetic programming, including advanced concepts such as scalability, evolution of modularity and regularity, and constrained evolution with CGP, STGP, or CFG-based GP. It may be reading, research, or application oriented.

CMP SCI 6410 Topics in Computer Graphics: 3 semester hours
Prerequisites: CMP SCI 4410 or CMP SCI 5410. This course covers various aspects of advanced graphics techniques, such as geometric modeling, rendering, shading, texturing, and computer animation. The course provides an in-depth study of recent advanced topics in computer graphics.

CMP SCI 6420 Topics In Image Processing and Computer Vision: 3 semester hours
Prerequisites: CMP SCI 5420. This course covers new developments in digital image processing, computer vision, and multimedia. Topics to be covered may include image databases, object tracking, and large-scale data visualization.

CMP SCI 6900 Thesis in Computer Science: 1-6 semester hours
Prerequisites: Completion of at least 12 graduate credits and approval of research topic by thesis advisor. This course is designed for students intending to pursue a thesis as part of their M.S. in Computer Science program. A maximum of 6 hours can be counted toward the program from a combination of CMP SCI 5880, CMP SCI 5900, and CMP SCI 6900.

CMP SCI 7990 Ph.D. Dissertation Research in Computer Science: 1-9 semester hours
Prerequisites: Completion of comprehensive examinations. This course is used to pursue research work for a Ph.D. dissertation under the supervision of a faculty advisor. This course is available only to the students pursuing a Ph.D. under the Computer Science option.

Counselor Education

Courses

CNS ED 1400 Making a Career Choice: 3 semester hours
Introduces students to career development theories and the career decision-making process. Students receive an overview of career development theory and learn how these theories pertain to the formulation of individual career plans. Self-knowledge of career interests, values, beliefs, aptitudes, and other factors are explored. Self-assessment and decision-making techniques learned in this class can be revisited throughout the life span. The seminar format allows for small group discussion of career-related issues and personal application of career development principles.

CNS ED 3200 Interpersonal Skills in Helping Relationships: 3 semester hours
This course will enhance the student's ability to communicate clearly, build healthy relationships with others, resolve conflicts, advocate appropriately, and promote a positive and inclusive learning environment among individuals and groups and to be prepared to work well with diverse populations.

CNS ED 3220 Counseling Individuals with Special Needs: 3 semester hours
Prerequisite: TCH ED 3313 or equivalent, or consent of instructor. A course emphasizing counseling skills for individuals who plan to work with people with disabilities. Emphasis is placed on using counseling strategies with school-age children with disabilities.
CNS ED 6000 Personal and Professional Development in Counseling: 3 semester hours
Prerequisites: Provisional Acceptance to the Counseling Program or consent of instructor. This course provides an in-depth view of the professional counseling field. Attention is focused on the development of the helping relationship, including a review of research on factors which influence helping processes and rapport building, a development of skills used in the counseling process, and increased awareness of how students’ values, beliefs, and behaviors are related to counselor effectiveness.

CNS ED 6010 Theories of Counseling: 3 semester hours
Prerequisites: Admission to the MEd program in counseling, or graduate standing and consent of instructor. This course explores the philosophical foundations of counseling theory. The major constructs of contemporary counseling approaches are included and the practical applications of these theories are analyzed.

CNS ED 6020 Ethical and Professional Issues in Counseling: 3 semester hours
Prerequisites: Admission to the MEd program in Counseling, or graduate standing and consent of instructor. This course explores ethical, legal, and professional issues related to counseling. Ethical dilemmas in the provision of counseling services to individuals, couples, families, and groups are defined. Specific ethical codes of professional organizations are examined.

CNS ED 6030 Foundations for Multicultural Counseling: 3 semester hours
Prerequisites: CNS ED 6010 and CNS ED 6020, or graduate standing and consent of instructor. This course focuses on (1) reviewing knowledge and research in the area of multicultural counseling, (2) developing and/or enhancing skills useful in counseling with individuals from minority populations, and (3) developing levels of personal awareness about stereotypes, and learning how feelings and attitudes about these may impact counseling with individuals from minority populations.

CNS ED 6040 Group Procedures in Counseling: 3 semester hours
Prerequisites: CNS ED 6010 and CNS ED 6020, or graduate standing and consent of instructor. This course examines the process dynamics of groups, including group development, leadership, norms and therapeutic factors. Group counseling theories and approaches used for other group work including skills, personal growth, support, vocational, and developmental guidance groups are explored. Knowledge and skills of how to facilitate therapeutic groups are included. Students are required to be participant-observers or facilitators of a group outside of class time.

CNS ED 6050 Individual Inventory: 3 semester hours
Prerequisites: ED REM 6710. This course develops counselors’ abilities in assisting clients toward self-awareness through the use of test and non-test data and educational and psychological appraisal techniques. Ethical practices in the use of tests and the maintenance of personnel records are stressed.

CNS ED 6060 Helping-Relationship Skills: 3 semester hours
Prerequisites: CNS ED 6010 and CNS ED 6020, or graduate standing and consent of instructor. This course includes the knowledge and application of counseling techniques and helping skills with an emphasis on experiential learning. Attention is focused on the development of the helping relationship, including helping processes and rapport building, skills used in the counseling process, and increased awareness of how students’ values, beliefs, and behaviors are related to counselor effectiveness.

CNS ED 6070 Psychopathology and Diagnosis: 3 semester hours
Prerequisites: Graduate standing. This course examines the etiology, assessment, and diagnosis of mental disorders using contemporary diagnostic systems. Course topics and assignments address the dynamics of adjustment and treatment implications for counselors, school psychologists, and other professionals.

CNS ED 6200 Foundations of School Counseling: 3 semester hours
Prerequisites: Admission to the MEd program in counseling, or graduate standing and consent of instructor. This course gives students a foundation for understanding the history, philosophy, and development of school counseling programs. The course examines the role functions of the school counselor within a developmental, comprehensive program, along with communication skills necessary for consultation with students, parents, school support staff, and resource people in the community.

CNS ED 6220 Counseling Individuals with Disabilities: 3 semester hours
Prerequisite: Graduate standing. This course provides instruction and practice in the basic communication, de-escalation, and evidence-based counseling skills and techniques used to support children, adolescents, and young adults with disabilities. The social-emotional needs of this population and impact on the family system will be discussed.

CNS ED 6270 School Counseling Practicum: 3 semester hours
Prerequisites: CNS ED 6200, CNS ED 6202, and either CNS ED 6000 or CNS ED 6060. This course requires 100 clock hours of supervised practice in counseling. It provides opportunity for students to pragmatically integrate and process materials, theories, techniques, and methodologies as they are applied in the counseling profession with emphasis on school counseling.

CNS ED 6280 School Counseling Field Experience: 1-6 semester hours
Prerequisites: CNS ED 6040 and CNS ED 6270, or graduate standing and consent of instructor. This course requires 100 clock hours of field experience for each semester credit hour of enrollment. Students are closely supervised under the direction of a graduate faculty member. Students must demonstrate counseling competencies and skillful ethical practice. Students receive a minimum of 1.5 contact hours of group supervision weekly by a graduate faculty member and 1 contact hour of individual supervision weekly by a field experience site supervisor during terms of enrollment. Course may be repeated for a maximum of 6 semester credit hours.

CNS ED 6300 Foundations of Clinical Mental Health Counseling: 3 semester hours
Prerequisites: Admission to the MEd Counseling program, or graduate standing and consent of instructor. This course is a survey of counseling in a variety of mental health settings and introduces the basic philosophical, historical, and psychological foundations of clinical mental health counseling. The course is designed to acquaint the student with the foundations and roles of the professional counselor in various community and agency settings.

CNS ED 6370 Clinical Mental Health Counseling Practicum I: 3 semester hours
Prerequisites: CNS ED 6060 with a grade of B- or better. This course is one hundred clock-hours of supervised practice in counseling to provide the opportunity for students to pragmatically integrate and process materials, theories, techniques, and methodologies as they are applied in the counseling profession, focusing on clinical mental health counseling. This course may be repeated for a maximum of 6 credit hours.
CNS ED 6375 Clinical Mental Health Counseling Practicum II: 3 semester hours
Prerequisites: CNS ED 6370 with a grade of S, or graduate standing and consent of instructor. This course is one hundred clock-hours of supervised advanced practice in counseling to provide the opportunity for students to continue to integrate and process theories, techniques, and methods as they are applied to the professional practice of counseling, with an emphasis on clinical mental health counseling.

CNS ED 6380 Clinical Mental Health Counseling Field Experience: 1-6 semester hours
Prerequisites: CNS ED 6370 with a grade of S, or graduate standing and consent of instructor. This course is one hundred clock-hours of field experience for each semester-credit-hour of enrollment. Students will be closely supervised under the direction of a graduate faculty member. Students must demonstrate counseling competencies and skillful ethical practice. Students will receive 1.5 contact hours of group supervision weekly by a graduate faculty member and 1 contact hour of individual supervision weekly by a field experience site supervisor during terms of enrollment. This course may be repeated for a maximum of 6 credit hours.

CNS ED 6400 Career Information and Development: 3 semester hours
Prerequisites: Admission to the Counseling program, or graduate standing and consent of instructor. This course emphasizes the nature of the changing labor market and the impact on personal, social, economic, career, and educational aspects of individuals and society. The use of occupational and educational information systems and resources to assist with career decisions are examined. Techniques and methods of career counseling and the needs of culturally diverse populations are discussed. Various theories of career development and career choice are examined.

CNS ED 6404 Seminar: 1-10 semester hours
Prerequisite: Graduate standing.

CNS ED 6410 Advanced Career Development: 3 semester hours
Prerequisites: CNS ED 6400 or consent of instructor. Emphasis in on current theories of career development, career choice, and techniques and methods of career counseling. Issues concerning education and training, work, leisure, the family, life roles, and culturally diverse populations are studied. The role of career theory in planning, development, and delivery of a career development program is explored.

CNS ED 6420 Career Assessment in Counseling and Rehabilitation: 3 semester hours
Prerequisites: CNS ED 6050 and CNS ED 6400 or consent of instructor. This course provides an in-depth and specialized look at the educational and psychological assessment techniques used in career counseling, especially the assessment of career interests, work values, work environment, work skills, work samples, career development stages, career maturity, career decision making, and career beliefs. Issues of using computers in the delivery of career development services will be discussed.

CNS ED 6497 Problems: 1-10 semester hours

CNS ED 6500 Introduction to Systems Theory for Couples and Family Counseling: 3 semester hours
Prerequisite: CNS ED 6010 or consent of instructor. This course is an introduction to relationship theory as applied to couples and family counseling. General systems theory, and social constructivism theory are reviewed. Students learn relationship interventions and beginning couple and family counseling techniques. Ethical, professional, and legal issues related to couples and family counseling are addressed.

CNS ED 6510 Marriage Counseling and Enrichment: 3 semester hours
Prerequisite: CNS ED 6500 or consent of instructor. This course focuses on the theory and techniques of marital or couples counseling and enrichment. Models and methods for prevention and treatment of relationship dysfunction are explored. Relationship developmental issues are addressed. Students are challenged to develop the critical skills necessary to be effective marriage counselors and marital-life educators.

CNS ED 6520 Family Counseling: 3 semester hours
Prerequisite: CNS ED 6500 and CNS ED 6270, or CNS ED 6370, or consent of instructor. This course offers an in-depth analysis of strategic, structural, experiential, communications, behavioral, and psychodynamic approaches to systems change and family counseling. The range of techniques and applied practices evolving from each orientation are explored as are normal and dysfunctional family processes. Various counseling modalities, such as individual, concurrent, collaborative, conjoint, group, intergenerational, and networking are also considered.

CNS ED 6600 Theories and Techniques of Counseling Children and Adolescents: 3 semester hours
Prerequisites: CNS ED 6010, or graduate standing and consent of instructor. This course focuses on counseling theories and their applicability to the developmental special concerns of children and adolescents including child at-risk issues such as abuse, suicide, divorce, and death and dying. Individual, group, and family intervention techniques and consultation skills are emphasized, as well as ethical, legal and multicultural considerations for counselors. Strategies presented can be utilized in a variety of settings.

CNS ED 6610 Introduction to Play Therapy: 3 semester hours
Prerequisites: CNS ED 6060 and ED PSY 6210. This course provides students with a foundation for understanding the history, theories, and application of play therapy. Discussion focuses on working with children in both agency and school settings, as well as how play therapy skills can be incorporated into the student's developing theoretical framework. This course can count toward the Registered Play Therapist credential.

CNS ED 6620 Advanced Play Therapy: 3-4 semester hours
Prerequisites: CNS ED 6040 and CNS ED 6615. This course helps students further develop their play therapy skills, especially in the area of client-centered play therapy. The course examines the use of play therapy with traumatized children and aggressive children in both school and agency settings. Group play therapy and sand tray therapy as additional modalities are explored. Ethical and legal issues, as well as supervision in play therapy, are emphasized. This course can count towards the Registered Play Therapist credential.

CNS ED 6630 Career Development in K-12 Schools: 3 semester hours
Prerequisites: CNS ED 6200 or consent of instructor. This course emphasizes knowledge and skills for addressing the career development needs and decision making of K-12 students. The course addresses the creation, implementation, and evaluation of sequential and developmentally appropriate career curricula and interventions, as well as contextual influences on career development. The course is intended for school counseling graduate students, and those interested in college and career preparation and advising.
CNS ED 6680 School Counseling in the Classroom: 3 semester hours
Prerequisites: CNS ED 6200. This course covers curriculum design and delivery and classroom management for school counselors who are teaching classroom lessons focused on academic, career, and social/ emotional content areas. The course emphasizes student-centered pedagogies, methods of conducting needs assessments and evaluations of student learning, and differentiation strategies to meet the needs of diverse learners.

CNS ED 6700 Introduction to Addictive Behaviors and Addiction Counseling: 3 semester hours
Prerequisites: CNS ED 6010 or consent of instructor. Exploration of the theoretical foundations of contemporary approaches to such addictive behaviors as alcohol and drug abuse, smoking, compulsive gambling, and sexual addiction. The nature, etiology, prevention, and treatment of addictions are discussed and analyzed from a variety of theoretical perspectives. The applications of these specific theoretical models to various treatment settings are examined. Multicultural considerations are also addressed.

CNS ED 6710 Advanced Strategies in Addictions Counseling: 3 semester hours
Prerequisites: CNS ED 6700 or consent of instructor. Study of advanced, empirically supported counseling approaches and techniques for the treatment of addictive behaviors. An emphasis is placed on screening and assessment procedures and on matching interventions to individual client and community needs.

CNS ED 6720 Counseling Individuals with Co-Occurring Disorders: 3 semester hours
Prerequisites: CNS ED 6700 or consent of instructor. This course introduces the student to the special needs, concerns, and problems encountered when counseling clients who have co-occurring substance use and mental health problems. Subject areas include an overview of screening and assessment, evidence-based practices, counseling approaches and psychopharmacology for co-occurring disorders.

CNS ED 6730 Counseling for Loss, Crisis, and Trauma: 3 semester hours
Prerequisites: CNS ED 6060, and ED PSY 6210 or ED PSY 6222. This course introduces students to theory and practice in counseling response to loss, crisis, and trauma experiences. Topics include models of grief counseling, the impact of crises, disasters, other trauma-causing events, and counseling skills and therapeutic interventions appropriate for individuals, families, and groups experiencing loss, crisis, and trauma.

CNS ED 6810 Integrating Religion and Spirituality in Counseling: 3 semester hours
Prerequisites: CNS ED 6010, or graduate standing and consent of instructor. This course examines the methods to integrate religion and spirituality in counseling. It also addresses counseling strategies for persons of various religious backgrounds, the link between health and religion, and ethics involved in the assessment and integration of religion and spirituality in practice.

CNS ED 6820 Counseling Women Toward Empowerment: 3 semester hours
Prerequisites: CNS ED 6010 and either CNS ED 6270 or CNS ED 6370, or graduate standing and consent of instructor. This course is an introduction to women's issues in counseling. Relational theory, healthy development, and an overview of clinical issues most common to women are examined.

CNS ED 6830 Counseling African American Clients: 3 semester hours
Prerequisites: CNS ED 6010, or graduate standing and consent of instructor. This course promotes an increased awareness and understanding of the psychological development and mental health needs of African American clients. This course examines research-based theoretical strategies for counseling this diverse population.

CNS ED 6840 Counseling Sexual and Gender Minorities: 3 semester hours
Prerequisites: CNS ED 6010, or graduate standing and consent of instructor. This course focuses on affirmative perspectives regarding lesbian, gay, bisexual, and transgender (LGBT) issues and populations. Students will learn current perspectives in the fields of counseling and psychology on LGBT issues necessary for adequate practice or research in this area.

CNS ED 6850 Social Class and Poverty Issues in Counseling: 3 semester hours
Prerequisites: CNS ED 6010, or graduate standing and consent of the instructor. This course focuses on social class and poverty in the United States. Specifically, the course examines the circumstances of poverty, the consequences of living in poverty (on behaviors, aspirations, relationships, education, and health including mental health), and the impact of poverty on the helping relationship. Personal, social, and cultural aspects of poverty are examined in both rural and urban settings. Included in this endeavor are specific attitudes and techniques designed to maximize the quality of a counselor's work with clients experiencing poverty.

CNS ED 6860 Human Sexuality in Counseling: 3 semester hours
Prerequisites: CNS ED 6010, or graduate standing and consent of instructor. This course focuses on integrating issues of human sexuality into the counseling process. The psycho-sexual development of the individual from birth throughout the lifespan is discussed and compared to other developmental tasks at each age. Themes related to influences from family, culture, environment, socioeconomic, ethnic, and religious perceptions of sexuality are integrated. The physiology of human sexual function is addressed, including variations in sexual orientation and gender identity.

CNS ED 6870 Counseling and Cultural Competence in a Global Society: 3 semester hours
Prerequisites: CNS ED 6030 or consent of instructor. Through a mixed methods approach of cultural immersion, readings, class activities, and forums with cultural and educational leaders, counselor candidates will acquire strategies to collaborate with culturally diverse families and develop systemic approaches to equalize the experiences for every child/adolescent/adult client. Counselor candidates will broaden their world view and global perspective, and identify and develop culturally sensitive interventions for a range of counseling issues and settings. Candidates will also examine the impact of contemporary socio-cultural viewpoints.

CNS ED 7000 Advanced Theories and Practice of Counseling: 3 semester hours
Prerequisites: Doctoral standing or instructor consent. An integrated seminar and practicum focused on traditional, contemporary, and emergent theories as applied to practice with diverse clients. May be repeated up to three times.

CNS ED 7010 Advanced Multicultural Counseling: 3 semester hours
Prerequisites: CNS ED 6030 and doctoral standing or consent of instructor. This advanced course addresses theories and research in multicultural counseling.
CNS ED 7020 Seminar in Counseling Research: 3 semester hours
Prerequisites: ED REM 6710, doctoral standing or consent of instructor. The purpose of this course is to review and analyze current counseling research literature. Ethical issues will be addressed.

CNS ED 7025 Advanced Counseling Research: 3 semester hours
Prerequisites: CNS ED 7020 or consent of instructor. Engages students in the conduct of an empirical research project. Building from the research proposal developed in CNS ED 7020, students will obtain IRB approval, collect data, analyze the data, and write a manuscript reporting the results in journal article format.

CNS ED 7030 Counselor Education and Supervision of Individuals and Groups: 3 semester hours
Prerequisites: CNS ED 7000, or graduate standing and consent of instructor. This course examines theories, models, and research in supervision (individual and group). Students will supervise master's level students in practicum, group, and field experience courses in counseling.

CNS ED 7035 Counselor Education and Supervision Practicum: 3 semester hours
Prerequisites: CNS ED 7030, or graduate standing and consent of instructor. This course offers advanced training in counseling supervision. Students will supervise master's level students in practicum and internship courses in counseling. Students will be expected to maintain an assigned caseload of supervisees and attend three hours of weekly doctoral-level supervision.

CNS ED 7040 Advanced Group Procedures in Counseling: 3 semester hours
Prerequisite: CNS ED 6040. Examines advanced group leadership theory, development, and facilitation. Knowledge and skills of how to facilitate therapeutic groups within ethical and legal guidelines are included. Specific attention will be paid to developing effective group work skills and interventions in career, clinical mental health, and school counseling settings. Students will be required to conceptualize, develop and facilitate a group outside of class time.

CNS ED 7075 Teaching, Learning, and Technology in Counselor Education: 3 semester hours
Prerequisites: CNS ED 7000, or graduate standing and consent of instructor. This course examines the pedagogy and epistemology of counselor education. Philosophies of teaching, instructional design, instructional methods, assessment of learning, and the impact and use of technology in teaching will be explored within the framework of the eight core courses as defined by the Council for Accreditation of Counseling & Related Educational Programs (CACREP). Students will both learn and apply classroom teaching knowledge and skills.

CNS ED 7400 Advanced Topics in School Counseling Leadership: 3 semester hours
Prerequisite: Admission to the Counseling Option in the Ed.D. Program. Focuses on leadership roles and advanced skills for professional school counselors, school counseling supervisors, and evaluation strategies, and training and supervision strategies will be addressed, with a special emphasis on preventative and culturally sound interventions.

CNS ED 7770 Doctoral Practicum: 3 semester hours
Prerequisite: Doctoral standing. One hundred clock hours of on-campus doctoral-level supervised counseling practice. Students will counsel clients and will be introduced to teaching and supervising beginning counseling trainees in a clinical context. As a prerequisite to the Doctoral Internship, students will be expected to demonstrate competence in skills required of counselor educators and clinical supervisors. Students will receive 1.5 hours of group and 1 hour of individual supervision by a graduate faculty member.

CNS ED 7780 Doctoral Internship: 1-6 semester hours
Prerequisite: CNS ED 7000. This course is a one hundred clock-hour field experience for each semester-credit hour of enrollment under the direction of a graduate faculty member. Students provide counseling services to clients at field sites, teach and supervise beginning counseling trainees, conduct research projects, and engage in leadership and advocacy. This course may be repeated for a maximum of 9 credit hours.

CNS ED 7806 Practicum in Group Counseling: 3 semester hours
Prerequisites: CNS ED 7804 and doctoral standing or consent of instructor. Students will lead or co-lead a supervised counseling group in the community.

Criminology & Criminal Justice Courses

CRIMIN 1100 Introduction to Criminology and Criminal Justice: 3 semester hours
Introduction to the basic concepts and approaches in the study of criminology and criminal justice. The major components of the criminal justice system are examined.

CRIMIN 1101 Crime and Criminal Justice Today: 1-2 semester hours
This course provides students insight into crime and the criminal justice system in contemporary America. All students, whether enrolled for one or two hours, will complete the same core course requirements. Those students enrolled for two hours will complete additional course work as outlined in the course syllabus.

CRIMIN 1110 Theories of Crime: 3 semester hours
This course provides an introduction to major theoretical approaches to the study of crime and justice.

CRIMIN 1120 Criminal Law: 3 semester hours
This course provides an analysis of substantive criminal law, evidence, and judicial procedure.

CRIMIN 1150 Violence in America: 3 semester hours
Prerequisites: CRIMIN 1100 or consent of instructor. Overview of patterns and correlates of violence in America. Emphasis on the variety of forms of violent crimes, such as murder, assault, robbery, rape, and gang violence. Includes an examination of violence as a response to lawbreaking.

CRIMIN 1200 Foundations of Law: An Introduction to Legal Studies: 3 semester hours
Same as POL SCI 1200. As a broad liberal-arts approach to the study of law, this course is designed to familiarize students with legal ideas, legal reasoning, and legal processes. It also provides comparative and historical perspectives on law that will help explain legal diversity and legal change. Finally, it offers opportunities to explore some of the persistent issues in law and legal theory: for example, issues about the sources of law, the responsibilities of the legal profession, or the relative merits of the adversary system.

CRIMIN 2130 Criminal Justice Policy: 3 semester hours
This course provides an introduction to criminal justice policy making, planning, and implementation.

CRIMIN 2180 Alcohol, Drugs and Society: 3 semester hours
Same as SOC 2180. Prerequisite: SOC 1010 or PSYCH 1003. This course examines the medical, legal and social aspects of alcohol and drug use. Medical aspects considered include treatment approaches and the role of Physicians in controlling such behavior. In the legal realm, past and present alcohol and drug laws are explored. Cultural and social influences on alcohol and drug use are discussed.
CRIMIN 2210 Research Methods in Criminology and Criminal Justice: 3 semester hours
This course provides an examination of basic methods of research design, measurement, and data collection in criminology and criminal justice.

CRIMIN 2220 Statistical Analysis in Criminology and Criminal Justice: 4 semester hours
Prerequisites: CRIMIN 2210 (may be taken concurrently) and the university math proficiency requirement. This course is an introduction to techniques of quantitative data analysis. Both descriptive and inferential statistics are applied to problems in criminology and criminal justice. Includes a one hour lab.

CRIMIN 2240 Policing: 3 semester hours
This course provides an overview of current and historical perspectives on the function of American policing. There is emphasis on the management of police organizations and relationships with the community.

CRIMIN 2250 Courts: 3 semester hours
This course provides an overview of current and historical perspectives on the function of the American courts. There is emphasis on the dynamics of courthouse justice, with special attention placed on the roles of the prosecutors, judges, defense attorneys, defendants, victims, and jurors regarding the decisions that impact the adjudication process.

CRIMIN 2251 Youth Gangs: 3 semester hours
This course provides an overview of research and policy concerning youth gangs. Definitional and methodological issues are examined, along with both qualitative and quantitative research. Topics may include the causes of gangs and gang involvement with focus on variations by race, gender, time period, and geography.

CRIMIN 2252 Crime and Punishment: 3 semester hours
Same as PHIL 2252. This course will address fundamental conceptual, ethical, and moral issues that arise in the context of the legal system. Topics may include punishment, pre-trial detention, the death penalty, acquittal of persons who are legally guilty, plea bargaining, moral obligation to obey the law, and laws restricting civil liberties.

CRIMIN 2260 Corrections: 3 semester hours
This course provides an examination of correctional philosophies and practices. There is emphasis on the history of corrections, the formal and informal organization of correctional facilities, inmate rights, and correctional alternatives.

CRIMIN 3043 History of Crime and Justice: 3 semester hours
Same as HIST 3043. Prerequisites: Junior standing or consent of instructor. The analysis development, and change in philosophies and responses to crime. Emphasis on major forms and definitions of crime, the emergence of modern policing, the birth of the prison and the juvenile court.

CRIMIN 3209 Forensic Anthropology: 4 semester hours
Same as ANTHRO 3209. Prerequisites: ANTHRO 1005 or BIOL 1102 or consent of instructor. Students learn basic human dental and skeletal anatomy and the methods used by biological anthropologists and archaeologists to collect and analyze human skeletal remains, including how to age and sex skeletal remains, identify ethnic markers, determine stature and handedness, and identify the presence of trauma and/or pathology. Also covers the role of the forensic anthropologist in crime scene investigations and human rights issues. In the weekly lab section students will have an opportunity for hands-on application of techniques to skeletal remains.

CRIMIN 3230 Crime Prevention: 3 semester hours
Prerequisites: ENGL 3100 (may be taken concurrently) or consent of instructor. This course provides an examination of situational, social, and legislative approaches to the prevention of crime and delinquency. There is emphasis on theories, implementation, and consequences of these approaches.

CRIMIN 3270 Juvenile Justice and Delinquency: 3 semester hours
Prerequisites: ENGL 3100 (may be taken concurrently) or consent of instructor. This course provides an examination of formal and informal responses to juvenile delinquency. There is emphasis on theories of delinquency and the decision-making processes of police, court and probation officials.

CRIMIN 3280 Internship in Criminology and Criminal Justice: 3 semester hours
Prerequisites: Junior standing. This course consists of an internship in a criminal justice setting under faculty supervision. It may be repeated for a maximum of six credit hours.

CRIMIN 3290 Special Readings: 1-6 semester hours
Prerequisite: Consent of instructor. Individualized study, under regular faculty supervision, designed to meet particular educational needs of selected students.

CRIMIN 3305 Crime and Justice in a Globalized World: 3 semester hours
Prerequisites: ENGL 3100 (may be taken concurrently) or consent of instructor. This course will critically examine computer crime, cyber-criminology, and the ways in which technology and the Internet facilitate criminal and deviant behavior. Discussion will focus on the types of crime using computer technology, theories addressing digital criminals, and an overview of the criminal justice response to these issues.

CRIMIN 3310 Computers in Criminal Justice: 3 semester hours
Prerequisites: ENGL 3100 (may be taken concurrently) or consent of instructor. This course will critically examine computer crime, cyber-criminology, and the ways in which technology and the Internet facilitate criminal and deviant behavior. Discussion will focus on the types of crime using computer technology, theories addressing digital criminals, and an overview of the criminal justice response to these issues.

CRIMIN 3320 The Death Penalty: 3 semester hours
Prerequisite: CRIMIN 1100. An examination of the history, application, and attitudes toward the death penalty.

CRIMIN 3330 Corporate, Organizational, and White Collar Crime: 3 semester hours
Prerequisites: ENGL 3100 (may be taken concurrently) or consent of instructor. This course will critically examine how technological innovations have changed both the mechanisms of crime commission as well as opportunities for computer crime. New techniques, new offenders, and new victims of computer crime will be explored. The mechanisms of computer crime prevention and control utilized in the criminal justice system by the police, the courts, and corrections will be addressed. Discussions will focus on how technology creates new ways of thinking about crime, criminals, and criminality.

CRIMIN 3345 Constitutional Law and the Criminal Justice System: 3 semester hours
Prerequisites: ENGL 3100 (may be taken concurrently) or consent of instructor. This course provides an analysis of the objectives of criminal law regarding the United States Constitution. It emphasizes the rights of persons suspected or convicted of crime within the institutional settings of the police, courts, and corrections.
CRIMIN 4300 Communities and Crime: 3 semester hours  
Same as SOC 4300. Prerequisites: ENGL 3100 (may be taken concurrently) or consent of instructor. This course provides an analysis of the causes of crime, and on population instability, family structure, and the concentration of poverty as causes of crime.

CRIMIN 4320 Forms of Criminal Behavior: 3 semester hours  
Same as SOC 4320. Prerequisites: ENGL 3100 (may be taken concurrently) or consent of instructor. This course provides an examination of major types of criminal behavior including violent, property, public order, and organizational offenses. There is emphasis on theories of and responses to these crimes.

CRIMIN 4325 Gender, Crime, and Justice: 3 semester hours  
Same as SOC 4325 and GS 4325. Prerequisites: ENGL 3100 (may be taken concurrently) or consent of instructor. This course provides an analysis of gender differences in crime commission, criminal processing, and the employment of women in criminal justice agencies. Fulfills CRIMIN diversity requirement.

CRIMIN 4330 Violence Against Women: 3 semester hours  
Same as GS 4330. Prerequisites: ENGL 3100 (may be taken concurrently) or consent of instructor. This course examines the nature, extent, causes, and consequences of various types of violence against women, including rape, sexual assault, stalking, and intimate partner violence. Criminal justice policy and practice regarding violence against women are also examined.

CRIMIN 4335 Probation and Parole: 3 semester hours  
Prerequisites: ENGL 3100 (may be taken concurrently) or consent of instructor. This course provides an analysis of alternatives to incarceration and postincarceration supervision. There is emphasis on diversion, restitution, and community reintegration.

CRIMIN 4340 Race, Crime, and Justice: 3 semester hours  
Same as SOC 4340. Prerequisites: ENGL 3100 (may be taken concurrently) or consent of instructor. This course provides an analysis of the involvement of racial minorities in crime and the criminal justice system. There is emphasis on group differences in offending, processing, victimization, and employment in criminal justice agencies. Fulfills CRIMIN diversity requirement.

CRIMIN 4345 War Crimes, Genocide, and Justice in the 20th and 21st Centuries: 3 semester hours  
Same as SOC 4345, POL SCI 4345, MVS 4345. Prerequisite: ENGL 3100. This course provides advanced undergraduate and Master's level students a comprehensive overview of the subject of war crimes, crimes against humanity, genocide and legal responses to these crimes in the modern era. The goal of this course is to engage students in sustained, critical thought about these issues and to foster a deeper understanding of both the causes and consequences of these egregious crimes.

CRIMIN 4350 Victimology: 3 semester hours  
Prerequisites: ENGL 3100 (may be taken concurrently) or consent of instructor. This course provides an analysis of major perspectives on victimization. There is emphasis on patterns of victimization, the role of victims in the generation of crime, and the experience of the victim in the criminal justice system.

CRIMIN 4360 Sociology of Law: 3 semester hours  
Same as SOC 4362. Prerequisites: CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100, or consent of instructor. The interaction of legal, political and social forces in the US is explored. Course examines historical developments in law and politics in the US, including law and economics, crime policy, socioeconomic inequality, race relations, and state sanctioned punishment. The course considers how America's federalist structure shapes law, politics and social relations. Examines how legal and political institutions establish and shape power relations between social groups.

CRIMIN 4370 Crime, Justice, and the Media: 3 semester hours  
Prerequisites: ENGL 3100. This course provides a fresh take on issues of crime and justice through the exploration of media, such as The Wire, and its role in shaping the public's perception of crime and justice. Students will learn to synthesize ideas and perspectives about crime and justice as well as critically assess popular media images of crime.

CRIMIN 4380 Special Topics in Criminology and Criminal Justice: 3 semester hours  
Prerequisites: ENGL 3100, which may be taken concurrently, or consent of instructor. This course provides an in-depth study of a selected topic in criminology and criminal justice. This course may be repeated for credit if the topic differs.

CRIMIN 4390 Seminar in Criminology and Criminal Justice: 3 semester hours  
Prerequisites: CRIMIN 2210, CRIMIN 2220, and ENGL 3100, or consent of instructor. In this capstone course, students demonstrate the ability to work independently, integrating theory and research in criminology and criminal justice in a major paper supervised by the instructor.

CRIMIN 4487 Philosophy of Law: 3 semester hours  
Same as PHIL 4487. Prerequisites: CRIMIN 1100 and 3 hours of philosophy and/or consent of instructor. An intensive study of recent philosophical debate about such issues as the authority of law, legal equality and justice, legal responsibility, self-determination and privacy, and legal punishment.

CRIMIN 5415 Foundations of Criminological Theory: 3 semester hours  
Prerequisites: Graduate standing and consent of instructor. Examination of the history of criminological thought incorporating the major works of such theorists as Bentham, Beccaria, Marx, Durkheim, Lombroslo, Sutherland and Merton.

CRIMIN 5533 Philosophy of Law: 3 semester hours  
Same as PHIL 5533. Prerequisite: Graduate standing or consent of instructor. Graduate standing and consent of instructor. Examination of origins of law and the basis for legal obligation. Specific consideration of the justification of punishment, morality and law, and legal reasoning.

CRIMIN 6400 Proseminar: 3 semester hours  
Prerequisite: Graduate standing. (Must be taken in the first Semester). A critical examination of theoretical, methodological and policy issues in criminology and criminal justice. Focus is on the nature of crime, policing, pretrial processes, adjudication and corrections.

CRIMIN 6405 Methods: 3 semester hours  
Prerequisite: Graduate standing and consent of instructor. Examination of basic methods for research design and data collection. Topics include participant observation and interviewing, survey research, aggregate data analysis, and experimental design.
CRIMIN 6410 Statistical Applications in Criminology and Criminal Justice: 3 semester hours
Prerequisite: CRIMIN 6405. Examination of elementary principles of quantitative analysis and their application to crime and justice problems. Topics include univariate, bivariate and multivariate procedures for discrete and continuous data, and a comprehensive introduction to ordinary least squares regression.

CRIMIN 6420 Contemporary Criminal Theories: 3 semester hours
Prerequisite: CRIMIN 5415. Examination of contemporary explanations of crime and criminal justice. Theories covered include strain, control, cultural, labeling, conflict, as well as more recent attempts at theoretical integration and multidisciplinary integration.

CRIMIN 6422 Law Courts, and Public Policy: 3 semester hours
Same as POL SCI 6422. Prerequisite: Graduate Standing. An analysis of the role of courts as policymaking institutions and the law as policy. We will explore the role of judges as policymakers, consider the attributes of courts, (both trial and appellate), that make them appropriate yet limited targets for advocates of reform, and the implementation and impact of court decisions. We will consider recent examples of judicial involvement in state and national policymaking. In addition, we will examine the role of lawyers and interest groups in selecting litigation rather than alternative political processes for policy change.

CRIMIN 6430 Law and Social Control: 3 semester hours
Prerequisites: Graduate standing and consent of instructor. Examination of the relationship between law and other social institutions, the values and interests that are expressed in law and shaped by legal structures and processes, and law as an instrument of public policy, social control and social change. Same as Sociology 5461.

CRIMIN 6436 Comparative Criminology: 3 semester hours
Prerequisite: Graduate Standing. Examination of crime and criminal justice systems in world perspective.

CRIMIN 6440 Nature of Crime: 3 semester hours
Prerequisite: Graduate standing or consent of instructor. Examination of patterns and correlates of crime at the individual, situational, and aggregate levels. Topics include definitions of crime, offending topologies, and criminal careers.

CRIMIN 6441 Juvenile Delinquency: 3 semester hours
Prerequisite: Graduate standing or consent of instructor. Examination of youth crime and juvenile offenders. Topics include definitions of juvenile crime, and theories of juvenile crime causation in the U.S.

CRIMIN 6442 Communities and Crime: 3 semester hours
Prerequisite: Graduate standing or consent of instructor. Examination of the trends and sources of crime and social disorder across communities. The course emphasizes relationships among crime, neighborhood change, neighborhood responses to crime, and public policies.

CRIMIN 6443 Violent Crime: 3 semester hours
Prerequisite: Graduate standing or consent of instructor. Examination of the sources and patterns of violent offending across time and space. Topics include conceptions and typologies of violent crimes and offenders, victim-offender relationships, and efforts to predict and control violent offending.

CRIMIN 6448 Victimization: 3 semester hours
Prerequisite: Graduate standing or consent of instructor. Examination of the risks and consequences of crime for its victims. Issues considered include victim-offender relationships, characteristics of victims, the nature of the injuries they experience and criminal justice procedures that involve them.

CRIMIN 6450 Criminal Justice Process and Policy: 3 semester hours
Prerequisite: Graduate standing. An analysis of criminal justice as a network of decisions and complex organizations. Topics include sources of criminal justice policy, policy agendas, implementation and evaluation.

CRIMIN 6452 The Police: 3 semester hours
Prerequisite: Graduate standing or consent of instructor. Historical, social and political analysis of policing in America. Examination of federal, state, county and municipal agencies.

CRIMIN 6454 Corrections: 3 semester hours
Prerequisite: Graduate standing or consent of instructor. Examination of the history, forms, and functions of correctional philosophies, institutions, programs and policies. Topics include the structure and functions of prisons and jails, community corrections, intermediate sanctions, and the growth of correctional control in modern society.

CRIMIN 6465 Qualitative Research Design: 3 semester hours
Prerequisites: CRIMIN 6405. Examination of participant observation and informant and respondent interviewing. Topics include gaining access, sampling, data collection and analysis, and legal and ethical concerns.

CRIMIN 6470 Quantitative Research Design: 3 semester hours
Prerequisites: CRIMIN 6405, CRIMIN 6410, and CRIMIN 6480. Examination of experimental, longitudinal, and cross-sectional designs. Sources of data, sampling procedures, operational definitions, and issues of reliability are also discussed.

CRIMIN 6471 Evaluating Criminal Justice Interventions: 3 semester hours
Prerequisites: CRIMIN 6405 and CRIMIN 6410. This course examines a broad range of interventions designed to prevent crime or improve some aspect of the criminal justice system. The validity reliability, and feasibility of differing intervention designs are addressed. Several major criminal justice evaluations are discussed.

CRIMIN 6480 Multivariate Statistics in Criminology: 3 semester hours
Prerequisites: CRIMIN 6405 and CRIMIN 6410. Introduction to the general linear model with applications to multivariate problems in criminal justice and criminology. Topics include advanced ordinary least squares, causal modeling, time series analysis, simultaneous equations, and analysis of limited dependent variables.

CRIMIN 6485 Directed Readings/Research in Criminology and Criminal Justice: 1-6 semester hours
Prerequisite: Consent of instructor. Directed reading and research, under faculty supervision, designed to meet particular educational needs of selected students.

CRIMIN 6495 Internship in Criminology and Criminal Justice: 3 semester hours
Prerequisite: Graduate standing or consent of instructor. Supervised placements with criminal justice agencies. Designed primarily for students with limited field experience.

CRIMIN 6498 M.A. Thesis Research: 1-6 semester hours
Prerequisite: Graduate standing and consent of instructor.

CRIMIN 6550 Seminar in Criminology and Criminal Justice: 3 semester hours
Prerequisites: Graduate standing and CRIMIN 5415, CRIMIN 6400, and CRIMIN 6405 or consent of the instructor. Research and policy approaches to the study of criminology and criminal justice. Class may be repeated for credit when the subject matter is different.

CRIMIN 7499 Ph.D. Dissertation Research: 1-6 semester hours
To be arranged.
Early Childhood Education

Courses

**ECH ED 3300 Introduction to Early Childhood Education: 3 semester hours**
Prerequisites: Completion of Level I requirements. Students will use theoretical bases as well as on site observations to develop an awareness of teaching learning strategies appropriate for the developmental needs of children from birth through age eight. Scheduling, classroom arrangement, and child management practices will be considered. Students will develop their own philosophy of early childhood education.

**ECH ED 3301 Early Childhood Special Education Processes and Trends: 3 semester hours**
Prerequisites: Completion of Level I requirements. Focus on the history and federal laws related to the early childhood special education process. Examination of child development theories and assessment to determine if developmental delays exist. Emphasis on the importance of collaboration between teachers and therapists for service delivery, designing effective transition plans and integrating intervention services into a developmentally appropriate curriculum.

**ECH ED 3302 Introduction to Inclusive Early Childhood Education: 3 semester hours**
Prerequisites: Completion of Level I requirements; current and clear background check; current and clear TB screening. This course serves as an introduction to the field of early childhood education including historical, social and psychological foundation, child development, recommended and evidence based-practice appropriate to address developmental needs of children from birth through age 8. Program administration, management, environmental arrangement, and consultation/collaboration are emphasized. The family-centered practice, diversity, early intervention, early childhood special education, ethical and legal issues are addressed to enhance students’ knowledge of inclusive education. Additional Field Experience may be required.

**ECH ED 3303 Curriculum and Practice Laboratory: Infant/Toddler: 1 semester hour**
Prerequisites: Completion of Level II requirements; admission to the teacher education program; current and clear background check; current and clear TB screening. Classroom experience in infant/toddler inclusive classrooms under directions of University personnel. Must be taken concurrently with ECH ED 3313.

**ECH ED 3304 Curriculum and Practice Laboratory: Preschool: 1 semester hour**
Prerequisites: Completion of Level II requirements; admission to the teacher education program; current and clear background check; current and clear TB screening. Classroom experience in inclusive preschool classrooms under direction of university personnel. Must be taken concurrently with ECH ED 3314.

**ECH ED 3313 Curriculum and Practice: Infant/Toddler: 2 semester hours**
Prerequisites: Completion of Level II requirements; admission to the teacher education program. This course addresses how to design and implement integrated, inclusive curriculum for children from birth to 3 years of age. Must be taken concurrently with ECH ED 3303.

**ECH ED 3314 Curriculum and Practice: Preschool Education: 2 semester hours**
Prerequisites: Completion of Level II requirements; admission to the teacher education program. This course addresses how to design and implement integrated, developmentally appropriate curriculum for the inclusive preschool classroom with emphasis on science, social studies, creative activities and technology. Must be taken concurrently with ECH ED 3304.

**ECH ED 3332 Literacy, Learning and Instruction for the Young Child: 3 semester hours**
Prerequisites: Completion of Level I requirements, current and clear background check, and current and clear TB screening required. Attention on the language acquisition and environments (home, school, community) of young children as they construct knowledge of print from birth to age eight. Critical examination of the range of opportunities for early literacy learning available to all children including the use of assistive technology and augmentative communication approaches to support their literacy development. Emphasis on meaningful, culturally, and developmentally appropriate activities for fostering beginning reading and writing. Focus on strategies for involving families and capitalizing on community resources in promoting language and literacy learning for young children. Field experience required.

**ECH ED 3350 Family and Professional Partnerships within School/Community: 3 semester hours**
Prerequisites: Completion of Level I requirements. This course is designed to provide students with the knowledge and skills needed to work successfully with diverse families of young children including those who have children with special needs. The focus is on using a family-systems perspective and family centered approach to strengthen family-professional relationships. Building collaborative partnerships with families and community agencies is emphasized.

**ECH ED 4317 Implementation, Evaluation, and Assessment in Early Childhood Education: 3 semester hours**
Prerequisites: Completion of Level II requirements, admission to the teacher education program, current and clear background check, and current and clear TB screening required. This course is designed to provide students with techniques for observing children and using assessment instruments to collect information and plan and implement individual program plans and curriculum in inclusive early childhood settings. Field experience required.

**ECH ED 4348 The Acquisition of Mathematical and Science Concepts: 3 semester hours**
Prerequisites: MATH 1150 and MATH 2510, completion of Level II requirements, current and clear background check, current and clear TB screening, and admission to the Teacher Education Program. Applications of the major theorists to mathematics reasoning and scientific inquiry. Content is appropriate for pre-K to third grade learners. Research and its implications for practice in the areas of logical thinking, pre-number ideas, geometry, topology, arithmetical operations, problem solving, observation, inquiry and documentation are considered. Field experience required.
ECH ED 4989 Practicum I: Early Childhood Education/Early Childhood Special Education Site Based Experience: 3 semester hours
Prerequisites: Completion of Level II requirements; current and clear background check; current and clear TB screening. This course is a two-day per week intensive, collaborative professional experience in diverse K-12 settings with students, emphasizing improving student learning outcomes, data-driven instruction, classroom management, and video use and analysis. Course includes mandatory on-site and on-campus seminars, which could be scheduled outside of normal class time. Concurrent Level III methods course assignments will be completed in Practicum I. Taking the Missouri Content Exam (MOCA) is required during Practicum I. Not available for graduate credit.

ECH ED 4990 Practicum II: Early Childhood Education/Early Childhood Special Education Site Based Experience: 12 semester hours
Prerequisites: Grade of B or higher in ECH ED 4989, completion of Level III requirements, and taking the Missouri Content Exam. This course is a four-day per week intensive, collaborative professional experience in diverse K-12 settings with students, emphasizing improving student learning outcomes, data-driven instruction, classroom management, and video use and analysis. Course includes mandatory on-site and on-campus seminars, which could be scheduled outside of normal class time. Certification requirements are successful completion of the Missouri Content Exam (MOCA) and the Missouri Preservice Teacher Assessment (MOPTA).

ECH ED 5989 Practicum I: Early Childhood/Early Childhood Special Education Site Based Experience: 2 semester hours
Prerequisites: Completion of Level I and Level II requirements. Activities on site include partnering with the classroom teacher in all areas of instruction, assessment, classroom management. Particular emphasis will be given to impacting students' achievement for diverse populations and differentiated instruction. Level III methods courses assignments may be completed during the practicum day at school sites and Practicum I experiences inform Level III coursework. Activities to acquire research skills are included. Practicum I is taken in the semester immediately preceding Practicum II.

ECH ED 5990 Practicum II: Early Childhood/Early Childhood Special Education Site Based Experience: 8 semester hours
Prerequisites: Grade of B- or higher in ECH ED 5989 and admission to Teacher Education Program. Clinical teaching experiences, 4 days per week where placements occur with two different age levels (infant/toddler; pre-k or k-3) within preschool and elementary schools. These sites offer settings where classrooms implement inclusion (combined general education and special education) and/or have pull-out resources room setting and may also have self-contained settings where students with complex disabilities are educated exclusively. Teacher candidates collect data for a research project.

ECH ED 6321 Parent and Community Resources in Early Childhood Education: 3 semester hours
Prerequisite: Graduate standing. Competencies for working with parents and community agencies will be developed through a study of community and community resources. Procedures for parent participation and use of service agencies in the education of all young children, including those with special needs, will be examined.

ECH ED 6348 Understanding and Supporting Children's Math and Science Inquiry: 2-3 semester hours
Prerequisites: ED PSY 6215, ECH ED 6412. Advanced study of current cognitive theory to support the development of children's inquiry skills. Curriculum development and implications for practice in the areas of logical thinking, pre-number ideas, geometry, topology, arithmetical operations, problem solving, observation, inquiry and documentation are considered. National and state standards in math and science will provide a framework for teaching strategies.

ECH ED 6412 Foundations of Early Childhood Education: 3 semester hours
Prerequisite: A course in child psychology or equivalent. A study of the various types of early childhood programs and the philosophy upon which they are based. Attention will also be directed to the implementation of such programs, problems of parent involvement and the social environment of the children.

ECH ED 6412A Foundations of Early Childhood Education: History, Philosophy and Current Trends: 1 semester hour
Prerequisites: Admission to Teach For America or Alternative Certification Program and must be practicing teacher with Bachelor Degree. A study of the various types of early childhood programs and the philosophy upon which they are based. Attention is directed to the history and philosophy of a variety of early childhood programs, current trends and issues in the early childhood education field, and parental involvement.

ECH ED 6412B Foundations of Early Childhood Education: Practice and Application: 1 semester hour
Prerequisites: Admission to Teach For America or Alternative Certification Program and must be practicing teacher with Bachelor Degree. A study of the various types of early childhood programs and the philosophy upon which they are based. Students analyze appropriate practice and program implementation. Students conduct an action research project pertaining to a relevant early childhood issue.

ECH ED 6413 Educational Role of Play: 3 semester hours
Prerequisites: ECH ED 3300 or equivalent. Emphasizes play as a constructive process with application to cognitive and social development. Special attention to facilitating play in early childhood classrooms.

ECH ED 6415 Organization and Development of Early Childhood Programs: 3 semester hours
Prerequisites: ECH ED 3300 or equivalent. Strategies for the effective organization and development of programs for children from diverse cultures, ages birth through age eight years, will be studied. Research and theory in funding and budgeting, staffing and professional development, and selection, development, and assessment of program curriculum will be emphasized. Long-range planning for program stability and involvement in advocacy issues will be covered.

ECH ED 6490 Internship: 1-10 semester hours
Prerequisite: Consent of instructor. Closely supervised experience in a field setting under the direction of a graduate faculty member. An appropriate level of competence and evidence of growth in the professional role must be demonstrated by the intern. The internship will include planning, research, evaluation and related professional activities.

ECH ED 6497 Problems: 1-10 semester hours
Prerequisite: Graduate standing. Individual study on topics pertaining to early childhood education.
ECH ED 6535 Assessment, Curriculum, and Research-Based Practice: Birth-Grade 3: 2-4 semester hours
Prerequisites: ED PSY 6030, ECH ED 6412. Advanced studies in curriculum design, assessment, and research-based practice for children from birth through eight years, with primary emphasis on birth through 5 years. Students will learn to develop curriculum based upon observation of children and their interests; child development theory and research and the diverse needs of children by considering culture, context, and family relationships. Must be taken concurrently with ECH ED 6536 if obtaining certification.

ECH ED 6536 Early Childhood Pre-Primary Practicum: 2 semester hours
Prerequisites: ED PSY 6215, TCH ED 5310A, ECH ED 6412. The focus of this practicum is observation of and participation in classrooms of children birth through five years. Concurrent registration in ECH ED 6535 required.

Economics

Courses

ECON 1000 Economics in Everyday Life (MOTR ECON 100): 3 semester hours
This course is an introduction to economic concepts, analysis, and issues for non-majors. ECON 1000 does not substitute for ECON 1001 or ECON 1002. Students who have already completed ECON 1001 or ECON 1002 may not take ECON 1000 for credit.

ECON 1001 Principles of Microeconomics (MOTR ECON 102): 3 semester hours
Prerequisite: MATH 1030. Introduction to the determinants of household demand, production and cost, and market prices. Applies the principles of individual decision-making behavior to understanding goods, services and resource markets.

ECON 1002 Principles of Macroeconomics (MOTR ECON 101): 3 semester hours
Prerequisite: MATH 1030 and ECON 1001. Introduction to the determination of levels of and changes in aggregate income, output, employment and prices. Applies economic principles of choice to the formulation and achievement of public policies that affect national employment, income distribution, and economic growth.

ECON 1005 Family Economics and Household Development: 3 semester hours
Provides social service professionals that work with low income individuals and families with an understanding of the principles of personal financial management. Case studies are used to apply course content and to develop training strategies for clients to improve household financial management. The role of financial institutions and government policies as well as their impact on low income families is also examined. Resources to use with clients will be identified. ECON 1005 does not count toward a major or minor in Economics.

ECON 1052 Microeconomics for the School Curriculum: 3 semester hours
Analysis of market forces, with emphasis on business firms, households, and productive-factor markets, price determination and resource allocation. Special reference to topics included in elementary and secondary school social science curricula. ECON 1052 may not be used by Economics majors to meet degree requirements.

ECON 1900 Introductory Topics in Economics: 3 semester hours
This course provides an analysis of an introductory economic topic. May be repeated for credit when topic varies.

ECON 2010 The Business Firm: History, Theory, and Policy: 3 semester hours
Prerequisites: ECON 1000 or ECON 1001 or consent of instructor. This course presents a history of the development of modern business firms and examines the evolution of the economic theory of the firm. Special attention is paid to the role that firms play in fostering social and economic development. The ultimate objective of the course will be to provide students with a deeper understanding of firms so they can make better policy decisions as firm owners, managers, lawmakers, regulators, and voters.

ECON 2800 History of American Economic Development: 3 semester hours
Same as HIST 2800. Prerequisites: ECON 1000 or ECON 1001 or consent of instructor. Uses economic concepts to explain historical developments in the American economy, beginning with the hunter-gatherers who crossed the Bering land bridge around 12,000 BC. Main topics include the Native American economies, European exploration and conquest, the colonial economies, indentured servitude, the American Revolution, the US Constitution, westward expansion, transportation, the Industrial Revolution, state banking and free banking, slavery, the Civil War, post-bellum agriculture, the rise of big business and anti trust, banking panics, the Federal Reserve Act, the First and Second World Wars, the New Deal, and the growth of government in the postwar economy.

ECON 3001 Intermediate Microeconomics: 3 semester hours
Prerequisite: MATH 1030 and ECON 1001. Analysis of prices in terms of equilibrium of the business firm and consumer demand in markets of varying degrees of competition.

ECON 3002 Intermediate Macroeconomics: 3 semester hours
Prerequisites: MATH 1030, ECON 1001 and ECON 1002. This course examines national income and expenditure and the forces determining the level of economic activity. Special emphasis is placed on the theory of income determination and its application to public policy.

ECON 3003 Game Theory and Strategic Decision Making: 3 semester hours
Prerequisites: ECON 1001. When the best course of action depends on the decisions made by others, strategy becomes important. Game theory provides the tools for analyzing such strategic decision making. Strategic behavior is analyzed in the context of business, logistics, biology, war, government, politics, and everyday life. A wide variety of in-class experiments are used to illustrate key concepts.

ECON 3100 Economic Data and Statistics: 3 semester hours
Prerequisite: MATH 1030, ECON 1001, and ECON 1002. This course is an introduction to economic data sources, data interpretation, and statistical inference as used in economic analysis. It emphasizes the testing of economic hypotheses and the development and estimation of economic models. Students will be introduced to statistical software used in economics.

ECON 3200 Money, Banking and Monetary Theory: 3 semester hours
Prerequisites: ECON 1001 and ECON 1002. Factors influencing bank reserves and the money supply. Ability of the Federal Reserve System and the Treasury to control these factors. Introduction to monetary theory: integration of monetary phenomena with national income theory. Analysis of current policy issues.
ECON 3300 International Economic Analysis: 3 semester hours
Prerequisite: ECON 1001. Introduction to the theories of international trade and factor movements including determinants of trade, the effects of trade on sectors and on overall economic performance, trade restrictions, and balance of payments and exchange rates. Discussion of current institutions and economic developments in the global economy.

ECON 3400 Labor Economics: 3 semester hours
Prerequisites: ECON 1001. Examines the labor market in the economy, considers the theories of labor supply, labor demand, and market determination of wages. Other topics include noncompetitive markets, international labor markets, the theory of human capital, compensating wage differentials, labor market discrimination, unions and collective bargaining, unemployment, and poverty and the distribution of income.

ECON 3500 The Economics of Government Spending and Taxation: 3 semester hours
Prerequisites: MATH 1030 and ECON 1001. Analysis of the role of government expenditures and taxation. Topics include: (1) analysis of public goods and externalities, models of collective choice, elements of benefit-cost analysis; the theory of bureaucracy, governments as agents in markets; and (2) analysis of the economic role of governments, subsidies and taxes in the federal system, criteria for tax evaluation, the nature of tax legislation, private decision making under different tax institutions, and government borrowing.

ECON 3600 Market Structure, Strategy, and Pricing: 3 semester hours
Prerequisite: ECON 1001. A theoretical and empirical analysis of the actions of firms under alternative forms of market organization. The role of economies of scale, product differentiation, mergers, and advertising in affecting industry structure and the impact of the resulting industry structure on pricing, output, promotion, and technology decisions of firms.

ECON 3610 Economics of Sports, Gaming, and Gambling: 3 semester hours
Prerequisite: ECON 1001. This course focuses on applications of fundamental economic principles to the world of sports, gaming, and gambling. It analyzes incentives present in sports and the rise of e-sports. Legal and illegal gambling are analyzed in regard to their effect on the local economy and impact of legalized gambling on sports. In addition to professional sports, NCAA, Olympic, and sports popular around the world are explored.

ECON 3900 Selected Topics in Economics: 3 semester hours
Prerequisites: ECON 1001 and ECON 1002. Analysis of a selected economic topic. The topic selected will vary from semester to semester. This course may be taken for credit more than once so long as the topic discussed in each semester is different.

ECON 4030 Managerial Economics: 3 semester hours
Prerequisites: ECON 3001; MATH 1800 or MATH 1100 recommended. Application of microeconomic theory to decision-making process in the business firm. Topics include pricing and profit strategy, cost analysis, decision making under uncertainty, technology, innovation, and productivity growth, and the structure and organization of firms. Problem-solving and case-study approach used.

ECON 4040 Booms and Busts in the Economy: Data and Theory: 3 semester hours
Prerequisites: ECON 3002 and ECON 3100. This course focuses on the empirical regularities in macroeconomics commonly referred to as the business cycle. Students explore the variability and co-movements of aggregate economic variables and consider alternative theoretical explanations of these phenomena.

ECON 4100 Introduction to Econometrics: 4 semester hours
Prerequisites: ECON 1001 and ECON 1002; ECON 3100 or MATH 1320 or SCMA 3300; MATH 1800 or MATH 1100. An introduction to quantitative analysis of economic behavior. The ordinary least squares technique and the assumptions underlying it are developed. Methods designed to detect and correct for the violations of these assumptions are examined. Special emphasis is given to the practical application of the procedures discussed through the use of computer exercises.

ECON 4110 Applied Econometrics: 4 semester hours
Prerequisites: ECON 4100 or equivalent. Concepts, techniques, & advanced applications of econometrics. Emphasis on developing a critical understanding of the appropriateness and limitations of a variety of state-of-the-art techniques used to model economic or political processes. Topics will include joint tests of hypotheses, estimation of lagged effects, models of qualitative choice, simultaneous systems, and outlier diagnostics. This course includes laboratory work in quantitative economic analysis.

ECON 4120 Time Series Econometrics for Economics and Finance: 4 semester hours
Prerequisites: ECON 4100 or equivalent and a solid foundation in statistics. Introduction to application of econometric methods to timeseries data. Emphasis on model specification as it appears to macroeconomic or financial data. Topics include: Stationary and non-stationary time-series, seasonality, random walks, unit roots, Dickey-Fuller tests, cointegration, ARCH/GARCH models, and general to specific modeling (ADLs). Specific applications to macro-economics, international economics and/or financial markets.

ECON 4130 Business and Economic Forecasting: 4 semester hours
Prerequisites: ECON 4100 or equivalent. Alternative forecasting methodologies for economic time series will be analyzed and discussed. The focus of the course will be: (1) the development of time-series (ARIMA) models and their application to forecasting; (2) the use of standard econometric models for forecasting; and (3) evaluation and comparison of these methods and the conditions under which each is the appropriate methodology. This course includes laboratory work in quantitative economic analysis.

ECON 4150 Mathematical Economics: 3 semester hours
Prerequisites: MATH 1800 or MATH 1100, ECON 3001. This course uses calculus and other mathematical tools to analyze economic phenomena. In addition to exploring techniques used to solve unconstrained and constrained optimization problems, the course also examines how matrix algebra is used in economic modeling. This course allows students to mathematically analyze economic models which receive graphical treatment in lower level courses. Students may not receive credit for both ECON 4150 and ECON 5150.

ECON 4160 Geospatial Analysis in the Social Sciences: 3 semester hours
Prerequisites: Junior standing. ECON 1001 or consent of instructor. Analysis of geospatial data relating to a variety of social phenomena using geographic information systems (GIS) software. Students will learn how geospatial analysis can be integrated into research projects and presentations (e.g., creating maps to present and analyze social, political, and economic data). Students will also learn how criminal activity, economic activity, voting patterns and other social behavior are spatially correlated with demographic data. As a culminating project, students will learn how to apply GIS techniques, including but not limited to sophisticated spatial modeling of social behavior.
ECON 4170 Fundamentals of Cost-Benefit Analysis: 3 semester hours
Prerequisites: ECON 3001 or equivalent. The purpose of this course is to provide a systemic and rigorous way of thinking about the measurement of benefits and costs when evaluating public projects, programs or regulations. Cost-benefit analysis has wide application, including: environmental resource use, highway construction projects, safety regulations, taxation of cigarettes, and investment in higher education. Given the prevalence of cost-benefit analysis in government budgetary processes, this course will develop critical appraisal skills to evaluate the appropriateness of these analyses.

ECON 4210 Financial Markets And Institutions: 3 semester hours
Prerequisite: ECON 3200. Demand, supply and flow of funds in the macrofinancial system, including money, capital, futures and foreign exchange markets. Examines types and historical development of domestic and international financial intermediaries operations within these markets, decision-making within individual intermediaries, their regulatory environment, and how their portfolio decisions affect flows of funds in the financial system.

ECON 4550 Natural Resource Economics: 3 semester hours
Prerequisites: ECON 1001 or consent of instructor; junior standing. The relationship between human activity and the world's natural resources requires choices. This course uses an economics perspective to study these choices. This perspective uses the view of the environment as an asset for its starting point. Issues concerning the optimal and sustainable use of natural resources are examined in this context. Special emphasis is given to potential policy responses to environmental problems.

ECON 4900 Advanced Topics in Economic Analysis: 3 semester hours
Prerequisite: ECON 3001 or ECON 3002 or consent of instructor. Study of a specific topic in Economics that may vary from semester to semester. May be taken for credit more than once if the topics are different.

ECON 4980 Special Readings: 1-6 semester hours
Prerequisite: Consent of instructor; grade point of 3.0 or higher in Economics. Unscheduled, independent directed readings on topics mutually acceptable to student and instructor. Maximum credit limited to six hours.

ECON 4990 Internship in Applied Economics: 2-6 semester hours
Prerequisites: ECON 3001, junior standing and consent of instructor. Independent study involving work with an appropriate private firm or public agency. A maximum of six hours may be earned, only three of which may be applied to the Economics major.

ECON 4995 Internship in Actuarial Science: 1-3 semester hours
Same as MATH 4995. Prerequisites: Junior standing and consent of program director. Supervised off-campus training in a private or public sector position in which the student applies the knowledge and skills learned in their actuarial science coursework. The internship is monitored by a faculty member and the student must provide a written report at the end of the project. This course may be repeated for a maximum of 6 credit hours.

ECON 5001 Microeconomic Analysis: 3 semester hours
Prerequisites: ECON 3001 or BUS AD 5001; ECON 3002 or BUS AD 5002; ECON 4150. Survey of Microeconomic comparative statistics. Detailed examination of demand and supply, product and factor markets. Partial equilibrium in competitive, imperfectly competitive and monopolistic markets.

ECON 5002 Macroeconomic Analysis: 3 semester hours
Prerequisites: ECON 3200; ECON 3001 or BUS AD 5001; ECON 3002 or BUS AD 5002; and ECON 4150. Aggregate economic theory, including analysis of the determinants of income, output, employment, and prices. Employment and price-level effects of consumer and investment demand, the money supply and interest rates, and government policies.

ECON 5052 Microeconomics for the School Curriculum: 1-3 semester hours
Prerequisites: Bachelor's degree from an accredited institution or consent of instructor. Analysis of market forces, with emphasis on business firms, households, productive factor markets, price determination and resource allocation. Special reference to topics included in the elementary and secondary school social science curricula.

ECON 5055 Economic Issues for School Curriculum: 1-3 semester hours
Prerequisite: Junior standing and consent of instructor. Analysis of selected economic issues appropriate to instruction in secondary and elementary schools. May be taken more than once for credit provided the topic of the course is different each time. May not normally be used by economics majors to meet degree requirements.

ECON 5100 Econometric Theory and Methods: 3 semester hours
Prerequisites: ECON 3001 or BUS AD 5001; ECON 3002 or BUS AD 5002; ECON 4100; ECON 4150 or equivalent. A rigorous review of statistical models and methods relevant to the estimation and testing of economic relationships. Emphasis on the theoretical underpinnings of techniques commonly used for multivariate regression analysis and hypothesis testing. Topics include ordinary least squares, generalized least squares, and instrumental variables estimation.

ECON 5110 Topics in Applied Econometrics: 3 semester hours
Prerequisites: ECON 4100, or ECON 5100 or SCMA 5300. Concepts and application of advanced econometric techniques. Students will develop a thorough understanding of the appropriateness and application of a variety of state-of-the-art techniques. Topics will include specification tests, polynomial distributed lags, discrete choice, pooled time-series cross-section, simultaneous equations and outlier detection.

ECON 5120 Advanced Topics in Time Series Econometrics: 3 semester hours
Prerequisites: ECON 4100 or equivalent and a solid foundation in statistics. Application of econometric methods to time-series data. Emphasis on model specification as it applies to macroeconomic or financial data. Advanced topics include: Stationary and nonstationary time-series, seasonality, random walks, unit roots, Dickey-Fuller tests, cointegration, ARCH/GARCH models, and general to specific modeling (ADLs). Specific applications to macro-economics, international economics and/or financial markets.

ECON 5130 Advanced Topics in Business and Economic Forecasting: 3 semester hours
Prerequisites: ECON 3001 or BUS AD 5001; ECON 3002 or BUS AD 5002; ECON 4150; ECON 4100 or SCMA 5300. This course develops the alternative techniques which are used to forecast economic time series. Each forecasting technique will be evaluated in terms of its theoretical soundness and predictive track record. Students will also learn to use these techniques to differentiate among competing economic models.
ECON 5150 Mathematical Methods for Economics: 3 semester hours
Prerequisites: MATH 1100 or MATH 1800, ECON 3001. This course presents the mathematics used in economics at an advanced level. Subjects covered include multivariate calculus, linear algebra, comparative statics, and unconstrained and constrained optimization. Emphasis is placed on the interpretation of mathematical results in economic terms. Students may not receive credit for both ECON 4150 and ECON 5150. This course may not be used by Economics students to meet M.A. degree requirements.

ECON 5200 Monetary Theory and Policy: 3 semester hours
Prerequisites: ECON 3200; ECON 3001 or BUS AD 5001; ECON 3002 or BUS AD 5002; and ECON 4150. An examination of how monetary policy has affected the economy in the past and how it can improve economic performance in the future. Topics include: the origins of money, money supply, money demand, the determinants of real and nominal interest rates, the term structure of interest rates, the impact of discretionary monetary policy on the domestic economy and foreign exchange markets, and the domestic economy and foreign exchange markets, and the relationship between monetary policy and federal government deficits.

ECON 5210 Financial Markets: 3 semester hours
Prerequisites: ECON 3001 or BUS AD 5001; ECON 3002, and ECON 3200. Demand, supply, and flow of funds in allocating credit and distributing risk in the macrofinancial system. The saving investment process, the rationale for financial markets, and the role of financial intermediaries are studied within the framework of the flow of funds accounts. Special attention is given to the operation of money, capital, futures, and foreign financial markets and the impact of public policy on the structure and performance of financial markets.

ECON 5300 International Trade: 3 semester hours
Prerequisites: ECON 3001 or BUS AD 5001. Survey of the modern theories of international trade and their applications including factor endowments and other, trade restrictions, foreign investment, trade and economic development, and balance of payments and exchange rates. Discussion of current institutions and economic developments in the global economy.

ECON 5301 International Monetary Analysis: 3 semester hours
Prerequisites: ECON 3200 and ECON 3002 or BUS AD 5002. Application of macroeconomic theory to the international monetary system. Topics include the balance of payments, exchange rates, international linkages, world inflation, capital flows, and the gold standard.

ECON 5400 Labor Economics: Theory and Public Policy: 3 semester hours
Prerequisites: ECON 3001 or BUS AD 5001. This course examines labor supply, labor demand, and market determination of wages. Topics covered include the effect of technological change on employment, trends in labor force participation, the impact of government taxes and transfers on labor supply, poverty, and its economic consequences, the human capital model and its implications for investment in education and on-the-job training, and theories of economic discrimination and empirical measurement issues. Throughout the course, current public policy debates are examined using the theoretical models developed.

ECON 5450 Economics for Public Policy Analysis: 3 semester hours
Prerequisite: Graduate standing. This course focuses on the role of the government in the economy, with particular attention paid to the way government affects the allocation of resources and the distribution of income. This course covers microeconomic principles and key economic concepts used in public policy analysis. Practical application of theoretical concepts is emphasized. This course may not be used by Economics students to meet M.A. degree requirements.

ECON 5900 Advanced Topics in Economic Analysis: 3 semester hours
Prerequisite: Consent of the instructor. Study of a specific economics topic, which may vary from semester to semester. May be taken more than once if the topic is different.

ECON 5980 Directed Readings: 1-6 semester hours
Prerequisite: Consent of the instructor. Independent study through readings, reports, research projects, and conferences.

Education

Courses

EDUC 2002 Social Entrepreneurship: 3 semester hours
This course examines the mindsets, skills, and approaches that social entrepreneurs use to solve problems in society. Students explore the role of social entrepreneurs with an emphasis on how social entrepreneurs create change in people's lives and their impact on local to global scales. Students identify sustainable models for social innovation and formulate social entrepreneurship action plans. Previous experience as a social entrepreneur or the desire to become a social entrepreneur in the future is not required.

EDUC 2204 Special Topics in Education: 1-3 semester hours
Prerequisite: Completion of 75 hours and consent of instructor. Examination of a special area or topic within the field of education. Topics to be considered will be announced prior to registration and may vary. For elective credit only. This course may be repeated for different topics. Not to exceed a total of six hours credit.

EDUC 2222 Interpretation: Connecting Audiences and Meaning: 3 semester hours
Interpretation is a process for forming intellectual and emotional connections between the interests of an audience and the inherent meanings within a resource. This class covers interpretive methods for development and delivery of thematic, non-formal, presentations to various audiences. The class also introduces informal exhibit design, customer service and social media as they relate to interpretation.

EDUC 2297 Independent Study: 1-3 semester hours
Prerequisite: Completion of 75 hours and consent of instructor. Independent study through readings, research, reports and conferences designed to provide depth in areas of study previously introduced in education courses. For elective credit only. May be repeated. Not to exceed a total of three hours credit.

EDUC 3170 Grant Proposal Writing for Educators: 3 semester hours
Prerequisites: ENGL 1100 or equivalent and junior standing. An introduction to grant proposal writing for educators and other professionals in community agencies, cultural institutions, and childcare centers. Students will practice writing the customary parts of a grant proposal as they learn essential concepts in fundraising, nonprofit management, and social entrepreneurship. Writing assignments include cover letters, problem statements, organizational profiles, project descriptions, budget narratives, and evaluation plans. Collaboration and peer review are required. Emphasis is on clarity, conciseness, format, style, tone, persuasiveness, and evidence basis.
EDUC 4000 International Education Field Experience: 2-4 semester hours
Prerequisites: ED PSY 2212, consent of instructor, minimum GPA of 2.5, current and clear background check, and current and clear TB screening. This field experience will be supervised by university faculty. Students will travel to a country to explore the culture and educational system. Prior to the field experience students will receive training that includes familiarization with the culture and educational system of the host country. Students will complete approximately 50 hours per credit hour in travel and cultural exploration as well as designed educational experiences. Course may not be repeated for more than 6 credit hours. This course will satisfy the cultural diversity requirement if the country is appropriate.

EDUC 4989 Internship I: 3 semester hours
Prerequisites: Junior standing, admission to the Bachelor of Educational Studies program, or consent of instructor. Supervised field experience in educational settings to prepare for planning, research, evaluation, and other professional activities in the student's emphasis area of concentration that will be carried out in EDUC 4990 and EDUC 4991.

EDUC 4990 Internship II: 6 semester hours
Prerequisites: B- or better in EDUC 4989, senior standing, or consent of instructor. Supervised field experience in an approved setting.

EDUC 4991 Internship III: 6 semester hours
Prerequisites: B- or better in EDUC 4990 (may be taken concurrently) or consent of instructor. Supervised field experience in an approved setting.

EDUC 5006 Graduate Workshop: 1-10 semester hours
Prerequisite: Consent of instructor.

EDUC 5612 Intrapreneurial Leadership: 3 semester hours
Prerequisite: Graduate standing. This course helps graduate students bring people and resources together to create value within existing organizations. Intrapreneurial leadership focuses on identifying and leveraging opportunities to enhance organizational responsiveness, growth, and vitality.

EDUC 5616 Accelerate Intrapreneurial Experience: 3 semester hours
Prerequisites: Graduate standing. This course equips graduate students to apply theories of leadership, entrepreneurship, innovation, and systems thinking within real-world organizational or business contexts. Students propose and implement a new program, product, or service model that builds organizational capacity and financial sustainability.

EDUC 6142 The History and Practice of Community Education: 3 semester hours
Prerequisites: Graduate standing. Students will explore the history of community-based education initiatives cultivating the insights, capacities and skill sets required to lead educational innovation, use information, media and technology effectively, strengthen cultural literacies, and engage in leadership and community development.

EDUC 6308 Graduate Institute: 1-10 semester hours
Prerequisite: Consent of instructor.

EDUC 6401 Seminar: 1-10 semester hours
Seminar on an educational topic or special issue not normally included in the regular curriculum.

EDUC 6408 Graduate Seminar: 1-10 semester hours
Prerequisites: Consent of instructor. Intensive study of selected issues in education.

EDUC 6442 Leadership in Community Education: 3 semester hours
Prerequisites: Graduate standing. Students will explore the leadership skills and capacities required for effective community-development efforts, including social innovation and entrepreneurship, adaptive management, cultural competence, and how to work with community collaborators to plan and implement inclusive projects.

EDUC 6491 Staff Development and Professional Growth: 1-10 semester hours
Designed in conjunction with an individual school district or educational agency and related to problems of education confronting that specific district or agency.

EDUC 6998 Thesis Research: 1-10 semester hours
Prerequisite: Consent of instructor.

EDUC 7050 The Research Process I: Framing Research Questions in Education Research: 3 semester hours
Prerequisites: Admission to the EdD or PhD in Education. This course is an overview of the essential elements of writing a research proposal including, identifying a problem statement and conceptualizing critical research questions. The course emphasizes exploring the research literature, framing research questions, and justifying them based on the literature.

EDUC 7200 English Academic Support: 1-3 semester hours
This course addresses the language needs of international doctoral students as they perform scholarly analysis and write at the doctoral level. The course contributes to the development of skills necessary for the successful completion of the dissertation. This course may be repeated for a maximum of 27 credit hours.

EDUC 7205 Action Research for Educational Practitioners: 1 semester hour
Prerequisites: Admission to an EdD cohort or consent of instructor. Study of small-scale simulations that introduce students to the fundamentals of framing relevant questions, working in community, writing field notes, interviewing, technologies to support and help analyze data, and storytelling. Particular attention will be given to representing perspectives of various stakeholders including students, parents, administrators, and colleagues.

EDUC 7210 Survey Design for Educational Practitioners: 1 semester hour
Prerequisites: Admission to an EdD. cohort or consent of instructor. Application of relevant theories, research, and pedagogical practices in designing surveys for educational settings. Focus on instrument development and design, forming questions and scales, and sampling methods as well as analysis of results and presentation for various target audiences in educational organizations and settings.

EDUC 7215 Data Analysis for Educational Practitioners: 3 semester hours
Prerequisites: Admission to an EdD cohort or consent of instructor. This course provides an overview of the quantitative skills needed for research including using software for statistical data analysis. The course facilitates an understanding and application of statistical techniques used for survey research.

EDUC 7220 Designing Research for Educational Practitioners: 1 semester hour
Prerequisites: Admission to an EdD. cohort or consent of instructor. Guided workshop, applying the principles of research design, to design a study of the research issues selected by the learning community. Course covers how to develop research questions, choose among quantitative and qualitative methods, and consider the best, ethical practices.
EDUC 7225 Ethnography for Educational Practitioners: 1 semester hour
Prerequisites: Admission to an Ed.D. cohort or consent of instructor. The study of ethnography as a methodology to engage in field research and provide the conceptual, theoretical, and empirical knowledge base for action research.

EDUC 7230 Interviewing for Educational Practitioners: 1 semester hour
Prerequisites: Admission to an Ed.D. cohort or consent of instructor. Provides opportunities for developing skills in interviewing individuals and groups to identify, describe, assess and compare educational programs, practices and policies. Emphasis on interviewing experts in the field and research participants in educational research field studies.

EDUC 7295 Inquiry Seminar for Educational Practitioners: 1 semester hour
Prerequisites: Admission to an Ed.D. cohort or consent of instructor. Seminar on a specified approach to inquiry in order to obtain or analyze information of interest to scholar-practitioners leading educational programs through continuous improvement cycles.

EDUC 7305 Representing Data for Educational Practitioners: 1 semester hour
Prerequisites: Admission to an Ed.D. learning community or permission of instructor. Methods for presenting and displaying various types of data to a range of target audiences. Means of assuring accurate representation and the advantages and disadvantages of various methods are reviewed. Displays include tables, graphs, and charts. Current software programs to aid representation are reviewed.

EDUC 7310 Integrating Technology in Learning for Educational Practitioners: 1 semester hour
