## Notes on qualifying for the CPA exam in Missouri

Successful completion of the Post-Baccalaureate Certificate in Accounting includes all the accounting courses needed to qualify for the CPA exam in Missouri. However, Missouri law also requires a total of 60 credit hours in business (including the accounting courses). Many students with undergraduate degrees in business have satisfied this requirement. A student who has not satisfied this requirement must take additional business classes in order to qualify for the CPA exam.

In addition, Missouri requires 150 credit hours of college level coursework in order to qualify for the CPA exam. A student who has completed a 120-hour undergraduate business degree and the Post-Baccalaureate Certificate in Accounting will need additional coursework in order to satisfy the 150-hour requirement.

## Learning Outcomes

Upon completion of the program, certificate earners will be able to:

- Analyze business process transactions and create financial statements
- Critically examine strategic options relevant to business processes, corporate governance, internal controls, and security
- Assess business decisions in the functional areas of financial analysis, corporate governance, taxation, and business processes
