Bioethics Graduate Certificate

The Graduate Certificate in Bioethics blends the missions and values of the medical field and social work for equitable service provision, knowledgeable development of ethical policies and just professional decision making at the institutional, local, or state level. This program provides an interdisciplinary exploration of bioethical issues that arise in health care, biological sciences and emerging technologies. It is most applicable to students with interests in nursing, social work, law, public policy, public health, philosophy, and theology.

Admission Requirements
Applicants must meet general University of Missouri-St. Louis Graduate School admission requirements.

Total Hours 12

No more than 6 total credits can be earned through courses at the 4000 level.

Additional elective courses can be included with the approval of the Bioethics program coordinator.

Learning Outcomes

Upon completion of the program, graduates will be able to:

- Identify and deconstruct bioethical problems in health care, systems, policies, and laws
- Apply ethical principles, norms, and theories in ethically complex situations to facilitate open and informed discussion among multiple stakeholders
- Apply ethical theories and methods to real-world bioethical dilemmas
- Describe the essential theories and methods that underpin the ethics of public health, clinical care, science, and research
- Identify and describe basic clinical concepts and processes in nursing and social work as well as connect them to present and future bioethical dilemmas
