

Counseling MEd, Clinical Mental Health Emphasis

Mission

The Clinical Mental Health Counseling Program of the Department of Education Sciences and Professional Programs prepares professional counselors, including mental health, career, addictions, couples/family, and child and adolescent counselors, to serve the mental health needs of culturally diverse individuals, groups, couples, and families in need. The program's outreach extends to schools, colleges and universities, community based organizations, business and industry, as well as independent practice. The program strives to develop a culturally diverse student population and to draw students from local, regional, national, and international locations.

Purpose

The M.Ed. in Clinical Mental Health Counseling program prepares clinical mental health counselors for positions in community colleges, universities, employment agencies, vocational rehabilitation agencies, probation and parole work, juvenile detention, alcoholism and drug abuse clinics, career planning and placement centers, community mental health agencies, family and children services, and various federally funded public service projects. Additionally, graduates are employed in career development, and business and industry positions, especially in training and personnel areas. Others have moved into roles calling for research and evaluation skills. The program is designed to fulfill entry-level program standards of preparation. It also is intended to enable program graduates to apply for the Missouri License for Professional Counselors.

Admission

In addition to meeting the general admission requirements of the Graduate School, applicants to the M.Ed. must complete the program supplemental application, have two completed references on file, have an undergraduate GPA of 3.0, and upon admission will take CNS ED 6010, Theories of Counseling, in their first semester. Admissions will be conducted twice a year. The deadlines for application are March 1 for the fall semester and October 1 for the spring semester.

CNS ED 6010	Theories of Counseling
CNS ED 6020	Ethical and Professional Issues in Counseling
CNS ED 6060	Helping-Relationship Skills
CNS ED 6270	School Counseling Practicum
CNS ED 6280	School Counseling Internship
CNS ED 6370	Clinical Mental Health Counseling Practicum I
CNS ED 6380	Clinical Mental Health Counseling Internship

Students admitted to the M.Ed. degree programs in counseling as "restricted graduate students" (see the "graduate study" rules in this Bulletin) must attain a 3.0 GPA in the 12 hours of course work at UMSL. Restricted students must include the following courses in the first 12 hours of coursework: CNS ED 6010: Theories of Counseling and CNS ED 6020: Ethical and Professional Issues in Counseling. A student on restricted status earning any grade less than a B- in either of these courses but still

maintaining a 3.0 GPA, will be allowed to repeat the course one time and must earn a grade of B- or better to be fully admitted.

Degree Requirements

The clinical mental health counseling emphasis prepares professionals for work in community settings, universities, and businesses. Graduates are eligible for the Missouri Licensed Professional Counselor and National Certified Counselor credentials.

Core Curriculum (CNS ED)

Comprehensive Examination (Capstone Experience) ¹

Total Hours	60
--------------------	-----------

¹ Please consult with the Department office for requirements and dates of this examination.

Learning Outcomes

The Master of Education in Counseling programs prepare professionals to work in educational settings - elementary, middle, or high schools - as school counselors or in clinical settings - clinics, community mental health centers, or private practice - as clinical mental health counselors. Counselors have professional preparation in the theory and practice of counseling, treatment planning, and career development.

The candidate learning outcomes of the school and clinical mental health counseling programs are to:

- Demonstrate awareness and behavior consistent with an understanding and appreciation of diversity issues.
- Apply helping relationship skills to establish therapeutic alliances and to achieve counseling goals with clients in diverse counseling settings.
- Utilize counseling ethical standards to guide professional practice and ethical decision-making.
- Assess client status and goals within relevant treatment contexts (e.g., school, clinic, community) and identify interventions based on research and best practice.
- Identify and apply appropriate theories to conceptualize client cases and inform counseling practice to achieve therapeutic goals.
- Articulate the ways in which mental health and career needs intersect for clients across the lifespan.
- Use developmentally appropriate trauma-informed approaches to address the needs of clients and systems.
