

Nursing PhD

Applicants to the Ph.D. program will be holistically reviewed using criteria such as GPA, work/volunteer experience, scholarly writing or projects of any kind, leadership roles, honors, and awards.

For those not residing in Missouri or non-Missouri residents: Prospective students are responsible for reviewing the NC-SARA state authorizations page now and throughout their program to see if the UMSL PhD program is authorized in the state in which they reside. <https://online.missouri.edu/about/state-authorization>.

Admission Criteria

- Admission to the University by completing the UMSL Graduate School Application
- Completion of the College of Nursing supplemental application
- Graduation from a nationally accredited baccalaureate or master's nursing program with 3.25 minimum GPA (4.0 scale)

International applicants must meet minimum requirements on tests of written and spoken English (79 TOEFL, 6.5 IELTS, 53 PTE-A, or 105-110 Duolingo is desired). International students must also apply through the UMSLGLOBAL Services Office.

See the UMSL College of Nursing's website for the application process and specific program deadlines.

Degree Requirements

There are 66 credits required to complete the degree. BSN to Ph.D. students complete a minimum of 48 credit hours of graduate-level course work, 6 credit hours of electives, and an additional 12 credit hours of dissertation. MSN to Ph.D. students complete a minimum of 45 post-MSN credit hours and an additional 12 credit hours of dissertation, plus 9 credit hours are earned from Master's level work.

Nursing Science, Theory, and Discipline of Nursing

NURSE 6424	Social Determinants of Health for Underserved Populations	3
NURSE 7200	State of the Science in Nursing Research and Practice	3
NURSE 7403	Development of the Nurse Scientist	3
NURSE 7481	Development of Nursing Science and Theory	3
NURSE 7491	Advanced Nursing Theory Development and Validation	3
Total Hours		15

Nursing Research Methods

NURSE 7211	Biostatistics I	3
NURSE 7488	Introduction to Qualitative Research Methodologies and Methods	3
NURSE 7212	Biostatistics II	3
NURSE 7490	Advanced Nursing Research Designs and Methods	3

NURSE 7955	Research Topics in Nursing and Health: Psychometrics	3
------------	--	---

NURSE 7494

All Ph.D. students (BSN to Ph.D. and MSN to Ph.D.) are required to take 3 credit hours of research residency with a faculty member. The advisor must approve the residency placement to ensure it meets the College of Nursing guidelines.

Total Hours	15
--------------------	-----------

Advanced Research Methods Course

Select one of the following: 3

NURSE 7495	Mixed Methods Research in Health Care
NURSE 7497	Design, Implementation and Evaluation of Health Interventions
NURSE 7213	Biostatistics III - Structural Equation Modeling
NURSE 7496	Seminar in Advanced Qualitative Research Methods
NURSE 7957	Research Topics in Nursing and Health: Hierarchical Linear Modeling

Total Hours	3
--------------------	----------

Cognates

All Ph.D. students (BSN to Ph.D. and MSN to Ph.D.) are required to take a minimum of 9 credit hours of cognates in the related area of research. The advisor must approve the cognate to ensure it meets the College of Nursing guidelines.

Dissertation

NURSE 7499	Dissertation Research	12
------------	-----------------------	----

Additional Required Course for BSN to Ph.D. Students

NURSE 6130	Research, Interventions and Evidence-Based Practice	3
------------	---	---

Electives	6
------------------	----------

Total Hours	9
--------------------	----------

PhD Program Learning Outcomes

Upon completion of the program, graduates will be able to:

- Become a steward of the discipline dedicated to the integrity of its work in the generation, critique, transformation, transmission, and use of its knowledge.
- Develop expertise in core knowledge and methods of the discipline and selected areas of theory and research to establish a program of research and scholarship about patient-related outcomes.
- Develop philosophical literacy and epistemic diversity, in addition to exploring the breadth of the discipline and depth of a particular area of related science.
- Acquire competencies to expand socially meaningful science that supports the discipline and practice of nursing.
- Articulate the clinical and policy implications of their research contributions by translating nursing research into practice and policy to improve health and healthcare systems.

- Provide leadership to effect change in healthcare practice, policy, and education issues by collaboration and partnerships in a data-rich world.
- Improve the healthcare outcomes for individuals, families, communities, and systems regionally, nationally, and internationally.
- Articulate up-to-date data content regarding determinants of health, health equity concepts and theories, structural inequities in health, promotion of cultural safety, and social justice (cultural humility, structural inequities in health including gender bias, and health disparities).
